Dispersive compression of plane frequency modulated waves in inhomogeneous plasma based on generalizing geometric optics approximation to unsteady quasi-harmonic processes

03 p0447 A70-13287

Narrow bandwidth FM signal distortion during multiplication in lossless varactor multiplier calculated, using equivalent circuit of frequency doubler

03 p0452 A70-14040

Linear phase detection using FM demodulation for Apollo S band communication system eliminating baseband voice interference with telemetry

04 p0648 A70-14659

Saturation induced wave front distortions effect on beam divergence and frequency modulation in laser amplifiers, discussing refractive index changes 04 p0703 A70-15620

Spectral and lasing characteristics of microwave frequency modulated He-Ne laser operating at 0.63 micron wavelength 05 p0858 A70-16257

Modulation properties of stabilizing frequency standard for gas laser with signal control by separate absorption cells 06 p1079 A70-17440

Optical harmonic generation by doubling picosecond laser pulse frequency under nonstationary conditions 06 p1080 A70-17494

Amplitude and frequency characteristics of gas ring laser with optical feedback between oppositely moving waves amplified by reflecting mirrors 06 p1081 A70-17497

Analytical expressions for amplitude and frequency modulation characteristics of bias modulated tunnel diode oscillator on steady state mode 06 p1022 A70-17836

CW, pulsed and frequency modulated radar scattering, discussing flight, system, terrain and data processing parameters 06 p1012 A70-18594

Modulation transfer function (MTF) of eye-visual system as spatial frequency filter 07 p1216 A70-18870

Narrow band limiter influence on SNR at FM reception output by computer simulation using threshold pulse model 07 p1227 A70-19124

Oblique ionospheric pulse sounding records improvement by use of linear FM chirp transmission, discussing time delay resolution, transmitter power and RF interference rejection 07 p1233 A70-19184

Size reduction and low noise temperature in receiving antennas obtained by transistor integration and resonance frequency modulation 07 p1241 A70-19353

Ionospheric distortion of linearly FM radio signals used for sounding, considering signal characteristics in distortion equations 07 p1268 A70-19459

Radar coherent linear FM microwave generation with 14 microsecond pulse length and 1000 MHz bandwidth, discussing phase error and coherency 07 p1236 A70-20064

Matched filter rectangular pulse compression non-linear FM waveform design with low time sidelobes and zero mismatch loss due to spectral weighting 07 p1242 A70-20065

FM spectral density model with applications to radio transmitter bandwidth estimation and interference analysis 08 p1456 A70-20473

Tandem link multichannel LOS FDM-FM communication system cost optimization by computer-aided design 08 p1459 A70-20798

Phase locked loop method for waveshaping rectangular wave frequency modulation signals in phase coherent VLF-FSK systems, reducing transient effects and adjacent channel interference 08 p1459 A70-20803

Frequency locked loop optimization, showing advantages in frequency shift keying detection and FM signal demodulation 08 p1460 A70-20808

Multichannel performance measurement of threshold extension FM demodulators using click suppression techniques 08 p1460 A70-20812

Cross modulation due to nonlinearity and linear cross modulation due to local oscillator pulling in FET FM receiver, discussing mixer operating points 08 p1460 A70-20818

Large carrier to noise ratios in FM receivers as function of correlation between Gaussian and impulse shot noise /clicks/ 08 p1463 A70-21776

Double resonator ruby maser dynamic and static characteristics for centimeter band improved by pumping frequency modulation 09 p1695 A70-22188

Distortion-compensation circuit theory, considering voltage-frequency characteristics and varactor controlled oscillator nonlinearities of frequency modulators 09 p1632 A70-22235

Intermodulation noise performance of FM FDM trunk radio systems in two path fading situations, calculating noise/power ratio and baseband enhancements 09 p1632 A70-22237

Correlation function of oscillation modulated in amplitude, phase and frequency by random processes causing spectral density maximum shift away from carrier frequency 09 p1633 A70-22409

Optimizing control system design using fluidic digital circuitry and FM type transducers 09 p1614 A70-23690

Gunn oscillator current noise correlation with frequency modulation noise 10 p1848 A70-24230

FM noise threshold reduction achieved through narrow bandwidth of self synchronized N-path filter tracking incoming FM carrier 10 p1833 A70-24233

Geostationary orbit capacity based on multichannel telephony, comparing digital and analog modulation techniques 10 p1836 A70-24343

Communication commercial satellite systems capacity in terms of telephone channels, using frequency modulation and digital methods 10 p1836 A70-24344

AM and FM CW Doppler radar by combined AM-FM waveform, noting automatic track while scan radar application 10 p1840 A70-24445

Microwave devices excess AM and FM noise levels measurement by carrier suppression methods 10 p1841 A70-24579

Frequency sharing between satellite-transmitted FM TV signals and terrestrially transmitted AM-VSB TV signals [AIAA PAPER 70-438] 11 p2001 A70-25467

Probability density function of click duration in FM discriminator 11 p2018 A70-26270

FM/FM telemetry threshold carrier SNR and receiver IF bandwidth optimization through computer program 11 p2014 A70-26272

Telemetric systems for moving machine elements tests, discussing seven channel PFM and FM/FM systems 11 p2056 A70-26451

Narrow band FM noise suggested for masking studies application, discussing noise properties 11 p2011 A70-26496

PAM-FM modulation system optimal receiver derivation, assessing threshold performance assuming uniformly distributed modulating signal 12 p2183 A70-27155

Large capacity long distance transmission by circular waveguides, describing artery frequency modulation and equipment for multiplexed telephone messages transmission 12 p2194 A70-27233

Time constant, steady state and tracking error of AGC loops at input/output of FM link in AM-FM telemetry system 12 p2184 A70-27250

Threshold extension demodulator /TED/ using bandpass filter without oscillator for FM multiplex 12 p2197 A70-27908

Radar transmitter waveforms for multifunction operation, emphasizing phase and frequency modulation for CW radars 12 p2188 A70-27939

Frequency modulated RF pulses compression with dispersive property of lossless, isotropic and homogeneous plasma used to enhance receiver transmission resolution 12 p2282 A70-27960

Dynamic tracking filter response analysis for FM reception using equivalent circuit method 12 p2200 A70-28054

Wideband FM signals transionospheric propagation, calculating output spectrum, signal to distortion ratios and signal to noise ratios 13 p2367 A70-29588

FM detector without normalization useful for low S/N reception of FSK and PSK in telemetry systems 13 p2367 A70-29589

FM limiter-discriminator followed with ideal bandpass filter, deriving output signal to noise ratio 14 p2558 A70-31189

Wideband PCM/FM discriminator detection, predicting effects of predetection and postdetection filtering on system performance 14 p2558 A70-31192

Two signal selectivity and permissible noise level of FM receiver with linear cascades and detector non-linearity effects 15 p2696 A70-31506

FM optical signals detection, using Fabry-Perot interferometer with air gap between mirrors 15 p2733 A70-31523

Noise effect on modulation transfer function of visual channel by threshold measurements 15 p2698 A70-32013

FM/FM radio telemetry system for transmitting strain and temperature data from rotating parts 15 p2739 A70-32330

Delta modulation threshold extension technique for phase lock loop FM demodulator 15 p2703 A70-32559

Phase lock loop acquisition and tracking of carrier frequency modulated by single sinusoid, obtaining

parameter values through mathematical model and digital simulation 15 p2703 A70-32578

Voltage-frequency conversion technique using FM principle and RF oscillator beating with crystal oscillator output 15 p2705 A70-32705

Weak narrow band noise measurements using FM radiometer insensitive to gain fluctuations 17 p3053 A70-35278

Semiconductor laser frequency modulation by ultrasonic waves, noting pressure variation effect on sideband resolution 18 p3269 A70-36736

Ionospheric distortion of linear FM radio signals used for sounding, considering signal characteristics in distortion equations 18 p3250 A70-36933

IMPATT diode microwave oscillator with modulated bias current, discussing amplitude and frequency modulation sensitivity, thermal effects and load parameters 19 p3390 A70-38363

FM demodulation threshold extension by correlation detection implemented in impulse noise cancellation system 19 p3382 A70-38893

Sideband frequency disturbances at analog data magnetic storage using frequency modulation 20 p3586 A70-39706

FM transmission of multiplex telephone signals by communication satellites, deriving impulse noise due to adjacent channel interference 21 p3787 A70-41330

FM threshold extension for system performance improvement, comparing impulse noise elimination, correlation detection and delta modulation signal processing techniques implemented at demodulator output 21 p3787 A70-41334

Multicarrier FM communication system, calculating adjacent channel interference due to impulse noise 21 p3789 A70-41343

Optico-acoustic autocorrelator for linear FM signals spatial compression, discussing design and performance 22 p3984 A70-42398

Frequency modulated gas laser communication system, discussing Raman-Nath effect, Doppler shifting phase grating, monochromatic light, pseudostanding wave, optical heterodyne detector, etc 22 p3989 A70-42966

Linear differential equation solution associated with FM signal generation, presenting analytical methods for FM and AM components 22 p4063 A70-43209

Cuprous chloride /CuCl/ as low-loss electro-optic material modulating 10.6 micron laser radiation 22 p4051 A70-43334

Linear FM radar pulse compression matched filter response calculated by computer evaluation of cross ambiguity function for design tradeoff between resolution and performance 22 p3992 A70-43589

P-n junction dependent FM noise spectrum of UHF transistor power oscillator at transit frequency 23 p4161 A70-43789

Optical FM system with laser interferometer and sideband carrier circuit for measuring mechanical shock by Doppler shift 23 p4193 A70-43964

Four channel FM radio telemetry for exercise physiology, measuring EKG, respiration rate and pulmonary ventilation 23 p4151 A70-44380

Threshold output characteristic of FM signals, generalizing Gaussian baseband modulation solution to obtain autocorrelation function of output signal plus FM discriminator noise 24 p4313 A70-46063

FREQUENCY MULTIPLIERS

Narrow bandwidth FM signal distortion during multiplication in lossless varactor multiplier calculated, using equivalent circuit of frequency doubler 03 p0452 A70-14040

Imaging properties of parametric image converters, taking into account frequency doubling of brilliant object by self interaction within nonlinear material 05 p0852 A70-16991

Laser harmonic-frequency mixing techniques extended into IR with IR metal-metal point contact diode 06 p1083 A70-17944

Neodymium laser frequency doubling based on nonlinear functional relation between polarization and electric vector in matter 08 p1512 A70-20677

Five resonator broadband frequency doubler design using charge storage diodes 08 p1475 A70-21280

Deformed grating frequency multiplication by filtering in Fourier plane of lens, forming moire pattern in image plane by mechanical interference 10 p1890 A70-24592

UHF frequency doubler with series-parallel array of eight punch-through diodes, preventing spurious oscillations 12 p2196 A70-27650

Statistical output characteristics of harmonic cosine and sinusoidal inertialess phase periodic converters in two channel system with frequency multiplication 13 p2370 A70-29741

Harmonic generation in gas discharge by frequency multipliers, assessing multipliers capabilities for millimeter wavelength operation 14 p2549 A70-30437

Broadband frequency multipliers optimum efficiency solutions, realizing linear charge-voltage characteristics with MIS varactors 14 p2557 A70-31159

Single phase static ferromagnetic frequency multiplier with odd multiplication factor 14 p2559 A70-31357

Analog simulation of frequency multipliers and dividers with step recovery diodes 15 p2709 A70-32467

Wideband varactor multipliers with flat output as microwave sources in radar systems 16 p2877 A70-33412

Frequency multipliers with charge storage diodes, examining recombination and hysteresis effects on performance 17 p3050 A70-34588

Radar tracking of meteors with slow drift velocity, improving accuracy via echo frequency multiplication 19 p3514 A70-37644

Fundamental microwave oscillator subharmonic phase locking for stable power, comparing with varactor frequency multipliers 19 p3386 A70-37689

Frequency multipliers with charge storage diode, analyzing turn-off transient effect on performance by charge control model 19 p3391 A70-38748

Frequency multipliers with charge controlled junction diode model, predicting operational behavior 22 p3998 A70-43421

Spectrum generator with step recovery diode multiplier, discussing line spacing, energy and phase coherence 22 p3990 A70-43485

Equivalent circuits for charge storage varactor diode in frequency multiplier mode 23 p4169 A70-43782

Transistorized power amplifiers, frequency multipliers and parametric multipliers design for VHF and UHF ranges 23 p4170 A70-43876

Cascaded varactor frequency multiplier design for microwave range 23 p4170 A70-43877

Semiconductor microwave generator design for maser simulator using transistorized amplifier, varactor frequency multiplier and diode multiplier 23 p4171 A70-43878

Nd-glass mode-locked laser with KDP crystal frequency doubling and pulse selection with Pockels cell 23 p4201 A70-44476

Frequency measurement extension to 5 micron region by IR laser harmonic frequency mixing in point contact diode as multiplier chain 23 p4201 A70-44917

FREQUENCY RANGES

NT RADIO RANGE

Dual frequency ranging within narrow bandwidth of VHF communications satellite repeater for transmitted signals correction of ionospheric refraction error 01 p0043 A70-10781

Ionospheric reflection coefficients calculations by two full wave theory, using related monoenergetic and collisional frequency profiles and 10-100 kHz frequencies 01 p0076 A70-10870

Ionospheric slopes and range frequency characteristics obtained from oblique incidence sounding of horizontally nonuniform ionosphere 01 p0083 A70-11534

Optimum prism angles and ultrasonic frequencies for detecting fatigue cracks 02 p0301 A70-12487

Natural oscillation frequencies lower bounds of orthotropic plates determined as coupled elastic systems 03 p0592 A70-13451

Quasi-optical propagation in frequency wave range above 100 MHz as user problem in VOR, ILS, navigation satellite and CAT detection and warning systems 03 p0523 A70-13613

Constant temperature hot-wire anemometer to compensate for thermal lag of wire/film resistance thermometer within useful frequency range 03 p0492 A70-13761

Sky background brightness temperature measurement at 408 MHz by pyramidal horn antenna 03 p0496 A70-14344

Fluidic component linearized characteristics in coupled or uncoupled environment determined for wide frequency range, discussing application to proportional fluidic amplifier [ASME PAPER 69-WA/FLCS-2] 04 p0626 A70-14847

Informative filter automatic selection for describing visual object with aid of frequency spectrum, taking filter output voltage mean square value as criterion 04 p0662 A70-15438

Level differences measured at 300 Hz to 200 MHz frequency range, discussing methods and measuring circuits and components 07 p1234 A70-19354

Microwave mixer design to increase dynamic range applied to communications and video systems 07 p1243 A70-20216

Resonance radiation transport in optically thick layer, obtaining conservative light scattering solution 09 p1753 A70-22451

Ruby lasers simultaneous Q switching by single rotating prism, discussing possible differential frequency ranges 09 p1697 A70-22989

Rectangular waveguide with cross shaped slot as polarizer ensuring circular polarization over wide frequency range 09 p1652 A70-23649

Pulsars dynamic spectra in 110-420 MHz range, observing emission bandwidths to formulate power law 10 p1938 A70-24099

Type 3 burst sources velocity calculated by frequency drift and Newkirk model of electron density, discussing frequency range extension of Weissenau radiospectrograph 10 p1934 A70-25274

Vibration meter coupled with electrodynamic transducers for measurements in 3-2000 Hz range 11 p2055 A70-26448

Waveguide slot array operation in different frequency bands generating independent radiation patterns, utilizing orthogonal dominant modes propagation 12 p2199 A70-27967

Vibration effects on receptors in frog toe muscles at various frequencies 12 p2179 A70-28344

Ionospherically reflected HF radio signal frequency spread measurement involving phase difference crossings counting between antennas 14 p2550 A70-30743

Multipurpose pulse generator design for 1 Hz-100 MHz frequency range and adjustable rise and fall times 14 p2557 A70-31162

Atomic collision effect on frequency range of opposing traveling wave modes in gas ring laser, using density matrix equation 15 p2749 A70-31553

Classical and modern approaches to tracking problem, discussing optimal control in frequency domain and time domain terms 16 p2882 A70-33039

Phase shift direct and balance measurement procedures between signals over wide frequency range classified by conversion schemes 19 p3391 A70-38702

Passive microwave sensors based on brightness temperature vs frequency model for various atmospheric conditions, presenting vegetation pictures 20 p3626 A70-39054

Source antenna range length and aperture diameter, discussing length, frequency, aperture size and free space conditions 21 p3784 A70-40563

Wide frequency range dielectric spectrometer for insulating materials permittivity and loss factor measurement and display 21 p3830 A70-41950

Acoustoelectric domain spectra in n-GaAs by microwave emission, comparing results with parametric conversions theory 21 p3863 A70-42002

Shock waves strength and frequency in solar atmosphere heating deduced by empirical model, integrating radiative losses over height 21 p3925 A70-42188

Frequency dependence of Gunn oscillator maximum negative conductance 23 p4172 A70-44198

Light velocity frequency dependence in variable stars gravitational fields suggested from yellow and UV NP 0532 observations 24 p4405 A70-45488

Human EEG alpha rhythm during surface-tapping test with rod at time-limited maximum frequency, noting slowdown to preferred frequency 24 p4301 A70-45987

FREQUENCY REGULATION

U FREQUENCY CONTROL

FREQUENCY RESPONSE

Approximate determination of termination hydraulic servomotors frequency characteristics with four way valves using piecewise straight lines on Bode diagram 01 p0007 A70-10034

Frequency characteristics of air, water and blood filled pressure transducer systems using various needle and connecting tubing sizes 01 p0031 A70-10275

CRT resolution measurements by double slit method, relating light spot response to slit width 01 p0093 A70-11278

Optical and radio pulses from pulsars as test of light speed variation with frequency and photon mass possible existence 02 p0373 A70-12394

Wideband parametric and tunnel diode amplifiers synthesizing method for obtaining maximum flat amplitude frequency response 03 p0457 A70-13727

Nonlinear feedback control system analysis and synthesis by parametric plane method, investigating frequency response by describing functions 03 p0460 A70-13970

Closed loop frequency response analyzer with steepest descent computing procedure to obtain in-phase and quadrature signal components in linear or nonlinear systems [ASME PAPER 69-WA/AUT-3] 04 p0688 A70-14830

Solid viscoelastic cylinder bonded to thin elastic casing, analyzing normal and tangential stresses for stress and displacement frequency responses in forced transverse vibration [ASME PAPER 69-WA/APM-20] 04 p0771 A70-14911

Elastic spherical shell excited by point force, analyzing HF response in terms of near field and flexural wave field [ASME PAPER 69-WA/APM-18] 04 p0771 A70-14912

Control system response improvement by state variable feedback illustrated by frequency and transient response tests data from analog model 04 p0662 A70-15331

Optical resonator reaction to coupled laser frequency, attributing differences between theory and experiment to errors in mirror reflection efficiency measurement 05 p0859 A70-16354

Frequency reaction of optical resonator to coupled laser in mismatch case, measuring laser and resonator axes displacements 05 p0859 A70-16355

Frequency responses bounds of nonnormalized low pass and bandpass filters 05 p0820 A70-16360

Frequency response linearity for self excited microwave oscillators with complementary cavity derived, proposing parameters selection for widening voltage tunable frequency range 05 p0824 A70-16891

Frequency response of 6328 A He-Ne laser interferometer analyzed for multimode oscillations noting plasma diagnostics applications 05 p0861 A70-16989

Klystron amplifier output circuit large signal frequency response, showing dependence on distance between cavities 06 p1021 A70-17672

Ring laser frequency characteristics at two longitudinal modes emphasizing intermodal pulse frequencies 06 p1081 A70-17769

Microwave transistors frequency and power characteristics and tradeoffs in relation to thermal and packaging design 06 p1023 A70-18390

Flight configured single sideband telemetry accuracy determined by digitally computed frequency response 06 p1012 A70-18600

Electrocorticograms frequency spectra from different visual cortex layers of rabbits during exposure to rhythmic light pulses 07 p1198 A70-18698

Plane rigid airfoil frequency response in incompressible potential flow using simple equivalent oscillator based on Theodorsen function 07 p1404 A70-19232

Response characteristics of negative feedback galvanometer amplifier with inductive source impedance for geomagnetic micropulsation detection 07 p1242 A70-19998

Bernoulli-Euler beam equation describing natural frequencies and mode shapes for vibrating beam immersed in fluid 07 p1413 A70-20043

Fluidic air gauge back pressure signal frequency response as function of time [ASME PAPER 68-WA/FE-16] 08 p1441 A70-21316

May 1966 solar eclipse effects on sporadic E layer, including ionizing radiation decrease relation to boundary and blanketing frequencies decrease 08 p1490 A70-21432

Popping pressure of relief valve with helical spring under dynamic load noting frequency dependence [ASME PAPER 69-VIBR-48] 08 p1441 A70-21479

Single mode He-Ne ring laser lock-in threshold and output power relationships to frequency 08 p1514 A70-21692

Frequency function of sound localization in median plane measured psychoacoustically at both ears with narrow band signals

09 p1624 A70-22762

Linear high order aircraft and missile control systems design using Horowitz frequency response method

09 p1654 A70-22835

Integrated lunar disk wavelength dependence of polarization using photoelectric polarimeter, tabulating results

09 p1759 A70-22910

Open cut-off rectangular resonator calculated for frequency dependence on reflection coefficient and relative length

09 p1648 A70-23165

Standing wave ratio frequency dependence in miniature stripline power dividers and ring structure hybrid junction

09 p1652 A70-23653

Equivalent oscillatory model defined from asymptotes of frequency response amplitude and cut-off frequency amplitude value of plane rigid airfoil in incompressible potential flow

10 p1953 A70-23841

Broad band power amplification with Gunn effect diodes, describing frequency response and saturation characteristics and FM/AM noise spectrum measurements for reflection amplifier in X band

10 p1847 A70-23886

Waveguides consisting of three concentric regions suitable for plasma experiments, showing dispersion characteristics and cut-off frequencies

10 p1850 A70-24835

Vibration damping theory validity, discussing response curve for frequency dependence of energy dissipation

11 p2133 A70-25733

Maxima increases without limit in damped linear oscillator response to random wideband excitation interpreted by heuristic explanation

11 p2085 A70-26694

Sound generation and detection by distributed piezoelectric sources using frequency response and equivalent circuit

11 p2085 A70-26701

Log-periodic dipole /LPD/ antennas compressed along transmission-line axis, considering frequency dependent behavior in narrow bands and radiation pattern

12 p2198 A70-27955

Dynamic tracking filter response analysis for FM reception using equivalent circuit method

12 p2200 A70-28054

LF electrostatic waves oblique to magnetic field in plasma, evaluating dispersion relation near ion cyclotron frequency

13 p2363 A70-28641

Maximum frequency response of reactive modulation amplifier using parametrically excited oscillator circuit

13 p2377 A70-29304

Fluidic circular and rectangular transmission lines characteristics noting frequency dependence

13 p2349 A70-29477

Double diffused epitaxial silicon bipolar microwave transistor design, fabrication and performance evaluation, including scattering parameters vs frequency for common-emitter amplifier

13 p2379 A70-29592

Feedback control systems automatic testing by examining frequency response

13 p2423 A70-29696

Solar spectral line source function frequency dependence

13 p2496 A70-29842

Frequency sampling adjustable equalizer design and operation, describing coaxial cable system tests

14 p2547 A70-30282

Microwave avalanche diode emission frequency dependence on charge transfer across drift region, considering varactor diode output, negative resistance and noise factor

14 p2555 A70-30354

Linear control systems identification and synthesis from data containing modulus and phase information as frequency functions

14 p2559 A70-30520

SCAMP 4 program for electronic circuits statistical analysis in frequency domain, obtaining mathematical models and transfer functions

14 p2561 A70-30667

Extrinsic photoconductor with reduced background under uniform illumination, describing frequency response as function of recombination and dielectric relaxation times and load resistances

14 p2586 A70-30989

Low pass filter synthesis with transfer function having frequency response boost in pass band

15 p2708 A70-31833

Optical quantum amplifier frequency characteristics dependence on broad spectral composition amplified signal intensity and resonator parameters

15 p2754 A70-32862

Linear continuous vibratory system unknown parameters identification from frequency response data

16 p2988 A70-33337

S band GaAs FET fabrication technology and frequency response

16 p2877 A70-33414

Vibration transducer systems design, using active filter networks to tailor phase and frequency responses

17 p3095 A70-35527

Beat and synchronization modes of opposed waves in rotating gas ring laser, examining frequency response asymptotic behavior

17 p3108 A70-35683

Ionospheric scatter channel amplitude frequency characteristics recording equipment, discussing design

18 p3256 A70-36090

Ionospheric scatter communications channel phase frequency characteristics measuring method, considering probability density function

18 p3256 A70-36091

Radio wave absorption dependence on ionospheric sounding frequency at vertical incidence, using pulse method

18 p3255 A70-37038

Low pass linear phase active feedback circuit synthesis using distributed RC networks to realize flat magnitude response

19 p3392 A70-37707

Digital filter synthesis, discussing transfer function determination based on prescriptions for frequency or time response properties

19 p3391 A70-38746

Nonlinear acoustic absorbers behavior analysis, discussing spectral and temporal computation methods

20 p3672 A70-39237

Frequency discriminators output voltages under action of fluctuating signal and noise with arbitrary energy spectrum

20 p3584 A70-39254

Transistor amplifier with back coupled emitter and parallel inductive correction, calculating optimal frequency and phase characteristics under complex load

20 p3598 A70-39790

Nonlinear closed loop systems frequency response determination by graphical method

20 p3605 A70-40122

Rat neuron impulsive reactions and frequency response differences to varying sound signals, discussing time constant, signal intensity and frequencies

20 p3574 A70-40172

Nonlinear automatic control systems transient response by frequency response curves of amplitude and phase characteristics

22 p4001 A70-42831

Semiconductor luminescence and photodetector diodes near IR region transmission, describing frequency response measurements

22 p4087 A70-43445

Radio electronic circuits precision, deriving relationship between frequency response and component variations solvable by linear programming

23 p4171 A70-43958

Transistorized LF RC filter circuit design for desired frequency response characteristics

23 p4171 A70-43962

He-Ne laser with absorbing cell in magnetic field, investigating nonlinear effect in frequency dependence of output power

23 p4203 A70-45070

Microwave propagation in hollow conducting elliptical pipe waveguide, calculating successive modes cut-off wavelengths by numerical analysis

24 p4318 A70-45212

Thin film microwave acoustic transducers, calculating top electrode thickness effect on frequencies of infinite conversion loss

24 p4333 A70-45218

Jet interaction type proportional fluid amplifier as feedback oscillators, measuring frequency response

24 p4292 A70-45291

Nitrogen laser pumped exciplex 4-Methylumbelliferone and rhodamine 6G dye laser amplifier, measuring single pass power gain vs wavelength

24 p4355 A70-46088

Microwave transmission in partially dielectric filled circular waveguide, deriving cutoff wavelength and phase velocity vs frequency

24 p4315 A70-46260

FREQUENCY SCANNING

Numerical solutions to determinantal equation for predicting properties of periodically modulated dielectrically filled frequency scanning waveguide as microwave antenna

03 p0457 A70-13696

Aircraft flutter equations solution by reduced frequency scanning method [ONERA-TP-786]

06 p1171 A70-18470

Signal frequency capture probability vs frequency search rates and AFC loop parameters determined in phase locked oscillator

11 p1996 A70-25349

Meteor trail angular dimensions determined by frequency scanning method involving minimum points on reflected signal characteristics

11 p2107 A70-25556

Mode controlled Q switched tuneable ruby laser, obtaining frequency scanning by temperature and pressure control

15 p2752 A70-32048

Real time swept sine wave spectrum analyzer using time compression to change filter bandwidth as function of control signal

17 p3059 A70-35166

Signal frequency capture probability vs frequency search rates and AFC loop parameters determined in phase locked oscillator

20 p3589 A70-40461

Meteor trail angular dimensions determined by frequency scanning method involving minimum points on reflected signal characteristics

21 p3892 A70-41306

Periodically modulated corrugated surface array for application as phase-frequency scanning array, deriving design equations for comparison with radiation characteristics measurements

21 p3800 A70-41944

Nd glass laser with smooth emission frequency scanning, giving block diagrams and radiation spectra

24 p4353 A70-45646

Eddy current magnetic probe with frequency scanning for signal-noise discrimination in nondestructive testing of tubes

24 p4336 A70-45698

FREQUENCY SHIFT

Chromospheric average velocity field near sunspots determined from M alpha line absorption elements wavelength shifts

01 p0176 A70-10247

Sudden frequency deviation /SFD/ correlation with solar radio bursts at different frequencies following inverse square law of intensity

01 p0171 A70-10871

Horizontal gradients below satellite orbit effect on reduced and minimum difference in Doppler frequency shifts of coherent radio waves from satellite in inhomogeneous ionosphere

01 p0046 A70-11517

Electrodynamic contactless method for ultrasonic nondestructive testing of materials based on natural frequencies shift with and without defects

02 p0301 A70-12483

Angular dependence of one dimensional first and second index matching for optical parametric mixing of laser and SRS Stokes beams for tunable laser source

03 p0498 A70-13157

Semistatic acceleration sensor, using ferrite rod magnetostriction effects to convert acceleration stress to microwave resonant frequency shift

03 p0495 A70-14191

Resonance frequency shift in motional field averaging system due to nonuniformities in static magnetic or electric field may cause unexpected systematic errors

04 p0721 A70-14665

Radiation effects on swept-synthetic quartz resonators and materials, discussing frequency shift measurements and defect studies

04 p0731 A70-14735

Nonducted VLF walking trace whistlers and Doppler shifts in fixed frequency transmissions identified on OGO midlatitude spectrographic records

04 p0649 A70-15116

Center frequency shift prediction model for nonlinear collector junction capacitance in transistor Class C amplifiers

04 p0660 A70-15343

Frequency shift in Rb-87 atomic frequency standards dependence on filter temperature interpreted for optical pumping radiation improvement

05 p0859 A70-16269

Length shifts measurement with single 2-mode laser by observing beat frequency, obtaining frequency shift proportional to length shifts

05 p0859 A70-16356

Laser-forced medium anisotropy effects on nonlinear optical frequency mixing and combined forced scattering

07 p1335 A70-19863

Atomic hydrogen maser wall shift determined by measurements on FEP Teflon coated storage bulbs, suggesting Teflon properties change as basis

07 p1301 A70-19973

Optical to IR conversion in circumstellar dust envelope with spherical symmetry based on optical radiation scattering and absorption by dust

08 p1573 A70-21047

Mode locked laser pulse chopping by interferometrically combined electro-optical frequency shifters

08 p1513 A70-21541

Frequency change for coupled vibrations of slender rotating beam due to hub radius change determined in centrifugal force field by perturbation method
08 p1594 A70-21772

He-Ne laser IR generation in three mirror mismatched resonator, using Fabry-Perot interferometer to study mode and lasing range frequency shift
10 p1900 A70-24265

Electromagnetic radiation frequency shift during passage by sun or earth not caused by electrostatic or magnetic fields
10 p1917 A70-24860

Pseudonoise phase shift keying /PN/PSK/ and frequency hopping /PN/FH/ modulation technique for low altitude satellite receiving /VHF/ transmissions [AIAA PAPER 70-496]
11 p1999 A70-25436

Length shifts measurement with two mode laser, noting frequency shift proportionality to mirror displacement
11 p2062 A70-25632

Optical modulation using rotating diffraction grating to obtain frequency shifts
11 p2049 A70-25633

Sun effect on anomalous frequency shift in 21 cm absorption spectrum in Taurus A
11 p2108 A70-25659

Nova Delphini brightness variations, observing absorption lines shift toward violet
12 p2306 A70-27860

Spectral line width and shift measured by spectrograph crossed with Fabry-Perot interferometer in pressure chamber, measuring magnetic field in solenoid
12 p2238 A70-28178

Annular gas laser, considering external periodic perturbation effect on difference frequency of oppositely moving waves
12 p2251 A70-28291

Midlatitude chorus frequency spectrum changes in relation to previous local magnetic conditions
13 p2365 A70-29187

LF signals phase determination during solar eclipse of 22 September 1968, noting frequency shift magnitude
14 p2547 A70-30238

Mariner 6 radio signals frequency changes analysis during occultation measurement for determining Mars surface pressure and temperature
14 p2646 A70-31071

Laser beam scattering by free electrons in semiclassical radiation theory, discussing intensity dependent frequency shift
15 p2753 A70-32452

Doppler shifted radiation production, using time and space dependent radiant energy sources
16 p2952 A70-34255

Sunspot spectrograms analysis, observing wavelength shift in Zeeman triplet circular components and magnetic splitting inequality under different circular polarizations
18 p3322 A70-37136

Radio wave holography with unequal reference to signal frequency, recording linear object with superheterodyne receiver
19 p3420 A70-37290

Hydrogen maser wall shift measurement, using flexible storage bulb for accuracy improvement
19 p3445 A70-37759

Aperture size effect on frequency shift and frequency width variation of beat signals observed with laser Doppler velocity meter
19 p3428 A70-38502

Hydrogen maser frequency shift due to atomic collisions with deformable storage bulb surface
21 p3836 A70-41453

Frequency shifted diffraction of monochromatic Gaussian light beam by reflection off ultrasonic surface wave
21 p3850 A70-41907

Doppler frequency shift of reflected radio waves for ionospheric disturbances, discussing solar flares, geomagnetic variations, etc
21 p3820 A70-42256

Nonlinear frequency shift for electronic and ionic cyclotron modes in magnetospheric whistler and hydrodynamic propagation, using Vlasov equation
23 p4187 A70-43880

Single frequency gas laser synchronization by small harmonic signal from second laser, deriving frequency shift dependence on power
23 p4200 A70-43929

LF signals phase determination during solar eclipse of 22 September 1968, noting frequency shift magnitude
24 p4316 A70-46313

FREQUENCY SHIFT KEYING

Transient response role in limiter-discriminator detection of binary FSK signals, comparing resulting and optimum error probabilities
02 p0258 A70-12421

Step recovery frequency shift keyed retimer using Gunn effect FSK pulse regenerator for microwave communication
07 p1237 A70-20285

Phase locked loop method for waveshaping rectangular wave frequency modulation signals in phase coherent VLF-FSK systems, reducing transient effects and adjacent channel interference
08 p1459 A70-20803

UHF satellite receiver for binary FSK data collection system using matched integrate and dump filter detectors
08 p1459 A70-20804

Frequency locked loop optimization, showing advantages in frequency shift keying detection and FM signal demodulation
08 p1460 A70-20808

X band Gunn oscillators for binary FSK regenerator operation employing signal injection triggering
12 p2199 A70-28015

Analog data transmission over PCM telemetry link, comparing noncoherent FSK vs PSK reception performance for waveform error
14 p2552 A70-31187

Probability density function of specularly fading signal plus noise for frequency shift keying and pulse radar systems
16 p2865 A70-34040

Incoherent Manchester coded FSK system performance based on optimal signal detection theory, plotting instantaneous frequency vs time
16 p2866 A70-34074

Communication satellite UHF link with FSK or PSK modulation, considering coded digital transmissions
16 p2867 A70-34331

Satellite communications performance improvement by use of multipath signal for channel models including noncoherent FSK
21 p3787 A70-41329

Wideband detection of FSK transmissions in three component two path channel, obtaining channel bit error probability
21 p3792 A70-42176

Wideband detection of frequency uncertain M-ary frequency shift-keyed /MFSK/ transmission in Gaussian noise, deriving symbol error rate for limiting SNR cases
21 p3792 A70-42177

Multilevel FSK system with limiter discriminator followed by low pass filter as demodulator, calculating error rates for comparison with other analyses
23 p4161 A70-44003

FREQUENCY STABILITY

Gas laser frequency stabilization by employing Zeeman splitting in external discharge tube containing He-Ne mixture in alternating magnetic field
03 p0498 A70-13090

Molecular beam laser short term frequency instability found dependent on laser and measuring device noise
03 p0455 A70-13091

Frequency pulling and pulse position modulation of CW GaAs injection lasers by locking signal frequency variation
03 p0502 A70-13815

Feedback technique for frequency stability requirements of airborne radar systems, discussing noncoherent radar applications and cost comparison to power-amplifier approach
04 p0656 A70-14708

Frequency shift and FM noise of uncontrolled Gunn effect diode and reflex klystron oscillators
05 p0818 A70-15774

Modulation properties of stabilizing frequency standard for gas laser with signal control by separate absorption cells
06 p1079 A70-17440

Self pulsation in He-Cd laser, noting decreasing number of modes effect on beat frequency stability
07 p1301 A70-20017

Optimal linear control system with multiple controls, determining stability margins with respect to phase, amplitude, oscillation index and cut-off frequency
08 p1480 A70-21015

Gain stabilization of transistorized LF selective amplifiers in radiometric receivers, discussing two-frequency resonance system
08 p1473 A70-21061

Laser frequency measurement and active and passive stabilization techniques, emphasizing HCN laser phase locking to frequency standard output
09 p1697 A70-22951

Transistorized pulse repetition frequency bandpass and band elimination filters, using trigger circuit to improve pulse-edge steepness and critical frequency stability
09 p1650 A70-23630

Frequency jumps and small amplitude wobble in pulsars
09 p1764 A70-23794

Ruby monopulse laser emission spectrum wavelength stabilization by frequency tuning of generated radiation using Fabry-Perot interferometer
10 p1898 A70-23970

Axial mode selection and frequency stabilization of Nd-YAG laser by optimally designed crystal quartz etalon
10 p1900 A70-24943

Carbon dioxide laser frequency stabilization, using plasma tube impedance variations generating error signal
10 p1901 A70-24946

Frequency stability characteristics and control in SSB-FDMA/PhM multiple access system tested by ATS [AIAA PAPER 70-411]
11 p2000 A70-25460

Gain-stabilization of SHF traveling wave maser radiometer, using thermal noise from neon discharge tube
12 p2228 A70-26881

Automatic frequency control of single frequency He-Ne laser, tuning cavity length to extremum output power with Lamb dip
12 p2250 A70-28181

Gunn oscillator voltage supply influence on domain capacity, considering frequency stability
13 p2377 A70-29302

Oscillators frequency instability and spectral purity relations [ONERA-TP-829]
13 p2383 A70-29637

Tunable and fixed frequency high power magnetrons parallel operation to achieve stable output
13 p2379 A70-29667

HF instabilities effect on magnetospheric drift waves, considering Alfvén mode in auroral plasma
13 p2482 A70-30084

High stability oscillators frequency check, using meteor trails and combined least squares and moving averages methods
14 p2583 A70-30320

Coaxial, inside-out and rising-sun magnetrons for millimeter waves generation under pulsed conditions, discussing tunability, frequency stability and weight
14 p2555 A70-30429

Interference free and frequency stable transistorized multivibrator circuits using High Level Logic /HLL/ units
14 p2561 A70-31163

S band transmitters frequency deviations optimization enabling designer to determine optimum value within constraints of associated receiving equipment
14 p2559 A70-31373

CW injection laser frequency stability, noting injection current influence on lasing frequency
15 p2750 A70-31629

Motion and small vibration frequency stability of correctable gyroscope with correction moment at arbitrary angle with mismatch plane
15 p2738 A70-32154

Frequency instability of oscillator perturbed by internal thermal noise [ONERA-TP-838]
16 p2872 A70-33105

Cycle slipping rate in first order phase locked loop, extending Viterbi analysis
16 p2865 A70-34058

Optical frequency standards research covering lasers application with superstable emission frequency
17 p3104 A70-35081

Frequency and stability measurements of IF signals generated between laser far IR radiations and conventional oscillators
17 p3104 A70-35084

Primary wavelength standard established via line produced with wavelength-stabilized laser
17 p3104 A70-35086

He-Ne laser emission wavelength long and short term stability for metrological applications
17 p3104 A70-35087

Canadian laser stabilization program involving metrology and absolute standard replacing international meter
17 p3105 A70-35089

Spectral densities of intensity and frequency fluctuations of single frequency He-Ne laser radiation
17 p3105 A70-35092

Single frequency Ar ion laser, discussing power and frequency stability
17 p3105 A70-35095

Oscillation frequency retuning and stabilization and loss factor determination in solid state lasers by dispersive resonators
17 p3106 A70-35100

Radio observation of Crab Nebula radio pulsar NP 0532, discussing main and subpulse stability at optical and radio frequencies
17 p3164 A70-35116

GaAs laser with inhomogeneous injection, noting instability of stimulated RF oscillations
17 p3108 A70-35631

Gas laser frequency stabilization using nonlinear effects of magnetic Lamb dip
17 p3109 A70-35911

Phase locked automatic frequency control system, estimating duration of stabilization by theory Markov processes
18 p3228 A70-36625

Self induced intensity pulsations frequency stabilization and narrowing in continuously operating GaAs injection lasers
18 p3269 A70-36734

Optimum stabilized variable frequency multiple input phase locked oscillator in mutually synchronized systems
19 p3389 A70-37969

Transistorized quartz oscillators, testing frequency and amplitude stabilities and functions of input and output capacitances, supply voltage and feedback

20 p3597 A70-39258

Wave particle resonances broadening by particles random motion in turbulent electric field, determining cyclotron instabilities saturation level from vanishing nonlinear growth rate

20 p3679 A70-39661

Fluidic oscillators frequency stability evaluation, noting analog circuits superiority over digital

[ASME PAPER 70-FLCS-20] 22 p3963 A70-42407

Oscillator stability of selective RF transistor amplifiers, using stage dimensioning and gain graphs

22 p3996 A70-42818

Automatic frequency control device for power klystron with two cavities, obtaining stabilization at natural frequency of crystal-containing cavity

22 p3998 A70-43236

High Q frequency stabilized cavity controlled microwave oscillator using Super Invar resonator

23 p4169 A70-43792

S band tunable free running high Q triode oscillator phase and frequency instability measurement based on delay lines applications

23 p4170 A70-43796

Controlled self excited quartz triode oscillator, calculating flicker noise effect on frequency stability

23 p4171 A70-43959

High stability phase locked Gunn microwave oscillator with internal crystal reference, discussing applications as signal generator, low noise Doppler radar sources, etc

23 p4172 A70-44013

Single-frequency oscillations mode in nonlinear catenary systems, considering factors promoting stabilization and uniformity

23 p4218 A70-44344

Ionospheric HF Doppler frequency dispersion at low latitudes under various geomagnetic disturbance conditions

24 p4314 A70-46129

FREQUENCY STANDARDS

Frequency shift in Rb-87 atomic frequency standards dependence on filter temperature interpreted for optical pumping radiation improvement

05 p0859 A70-16269

Secondary frequency standard obtained for Hg laser operating at microwave frequencies

05 p0859 A70-16271

Modulation properties of stabilizing frequency standard for gas laser with signal control by separate absorption cells

06 p1079 A70-17440

Monograph on time measurements covering time scales, intervals, natural and artificial clocks, frequency standards, time and time signal transmission

07 p1283 A70-19664

Phase comparisons between commercial cesium beam frequency standards and NASA experimental hydrogen maser NX-1

08 p1513 A70-21592

Ionospheric effects and transmitter characteristics observed on HF standard and time stations, discussing spurious emissions arising from frequency overcrowding

10 p1842 A70-25050

Atomic frequency standards for phase calibration of large aerial arrays applied to radiobroadcasting

11 p2019 A70-26300

HCN laser 890 GHz line phase locked to multiplied standard frequency with wide bandwidth loop, narrowing line widths

13 p2426 A70-28798

HCN laser far IR line phase locked to absolute frequency standard

13 p2426 A70-28810

Optical frequency standards research covering lasers application with superstable emission frequency

17 p3104 A70-35081

Primary wavelength standard established via line produced with wavelength-stabilized laser

17 p3104 A70-35086

Standards for measuring pulsed laser energy, CW laser power and HCN laser frequency

17 p3105 A70-35097

Timing systems using Cs frequency standard for satellite tracking

21 p3828 A70-41697

Short and long term stabilized optical frequency standard of gas laser, using two absorption cells

23 p4202 A70-45057

FREQUENCY SYNCHRONIZATION

Steady state operation and synchronization range of frequency dividers with complex feedback derived by symbolic abbreviated equations and modulation technique

05 p0813 A70-16263

Magnetron amplifiers with ferrite circulators for synchronizing natural frequency, obtaining I-V characteristics and gain vs bandwidth curves

05 p0823 A70-16886

Second and third harmonic simultaneous generation in ammonium oxalate crystals achieved by three frequency interactions

10 p1901 A70-25159

Frequency synchronization of far spaced high stability oscillators with aid of meteor trails, discussing signal retranslation and duplex methods

14 p2636 A70-30321

Discrete signals optimal reception by lowering synchronization requirements for communications or radar purposes

16 p2863 A70-33242

Unrestrained oscillator under action of external synchronous signal, deriving differential synchronization equation

17 p3051 A70-34614

ATA Collision Avoidance System based on time and frequency synchronization via ground stations or other aircraft

19 p3466 A70-38239

Mutual synchronization of oscillators at multiple frequencies, analyzing effect of tuning on frequency and phase

20 p3597 A70-39252

Frequency synchronization channel pulse fluctuations effect on noise stability of binary signal reception

20 p3587 A70-40145

Ring lasers loss lock-in, attributing frequency synchronization between oppositely directed traveling waves to mutual coupling

21 p3838 A70-42007

Single frequency gas laser synchronization by small harmonic signal from second laser, deriving frequency shift dependence on power

23 p4200 A70-43929

FREQUENCY SYNTHESIZERS

Monograph on normal frequency generator serving devices measuring differential Doppler effect, discussing generator design for ionospheric research satellites frequencies

09 p1645 A70-22531

Absolute frequency wideband high resolution determination, using frequency synthesizer as phase locked loop local oscillator

10 p1854 A70-25316

Two-photon transitions effect on two-frequency generation threshold in media with line broadening, considering laser radiation effect on amplification in second channel

12 p2251 A70-28289

Digital frequency synthesizer design, operation and stability

19 p3390 A70-38581

FREQUENCY TRANSLATION

U FREQUENCY CONVERTERS

Fresnel diffraction Laser beam intensity distribution determination from measuring Fresnel diffraction pattern at straight edge using photographic plate

12 p2249 A70-28032

Optical and quasi-optical transmission of EM wave beams of type in directional antennas Fresnel region, examining free space and waveguide modes

14 p2549 A70-30445

Transparent spherical rotor spin axis orientation by measuring Fresnel drag effect of optical beam inside ring laser cavity

19 p3445 A70-37669

Fresnel diffraction using He-Ne gas laser and opaque wire

21 p3834 A70-40549

FRESNEL REGION

Antenna calibration by measuring emission of absorbing black disk positioned in Fresnel region

07 p1239 A70-18759

Laser with telescopic resonator, examining characteristics at different Fresnel zones and emission losses with geometric optics approximation

13 p2427 A70-29280

Antenna calibration by measuring emission of absorbing black disk positioned in Fresnel region

18 p3233 A70-37103

Radio beam trajectory in Fresnel zones of isotropic laminarly inhomogeneous ionosphere, discussing point source field and wave propagation

19 p3381 A70-38569

Tracking of point object in Fresnel zone from observation of amplitude-phase pattern in aperture plane

22 p4026 A70-42555

Weak-scattering limit in thin screen model of interplanetary scintillations of radio sources involving solar wind fluctuations at Fresnel scale

22 p4104 A70-42996

Near field vector evaluation of Fresnel zone field for microwave reflector antennas

23 p4161 A70-43771

Ultrasonic pulse emitter with interference-free near field and sidelobe suppression for materials testing

24 p4343 A70-45685

FRETING

Hydrogen effects on ELI Ti-Al-Sn alloy, conducting tensile, fretting and abrasion tests on stressed and thermal cycled specimens

07 p1309 A70-19710

Fretting and fretting fatigue in metal-metal contacts, showing friction as important parameter

12 p2253 A70-27110

FRETING CORROSION

Fretting corrosion effect on structural steel fatigue strength under asymmetric load cycles

01 p0207 A70-11155

Dislocation structure during fretting corrosion in steel plates, analyzing via electron microscopy

12 p2258 A70-28318

Fretting corrosion zone steel, measuring transient temperature distribution during contact friction

20 p3647 A70-39243

FRICITION

NT AERODYNAMIC DRAG

NT DRY FRICTION

NT FLOW RESISTANCE

NT FRICTION DRAG

NT INTERNAL FRICTION

NT KINETIC FRICTION

NT SKIN FRICTION

NT SLIDING FRICTION

NT STATIC FRICTION

NT SUPERSONIC DRAG

NT VISCOUS DRAG

Difference method for calculating one dimensional nozzle flow and expansion with allowance for relaxation, friction and heat losses, discussing fluorine-hydrogen mixture application

03 p0408 A70-13804

Dissolved macromolecules effect on flow resistance due to turbulent friction in nonNewtonian liquids, considering physical parameters and hydrodynamic conditions

08 p1483 A70-21228

Friction, wear and surface evaluation of alloys as bearing materials in prosthetic devices

09 p1690 A70-22044

Nonlinear differential equations analysis based on weighted linear approximation applied to singular points and trajectories in phase plane in friction problems

09 p1727 A70-22665

Metal surfaces friction and wear processes dynamic equilibrium noting loading conditions effects

13 p2423 A70-29766

Friction theory, discussing surface mechanics, wear and erosion control

15 p2743 A70-31699

Friction properties of internally lubricated and glass-fortified thermoplastic resins for gears and bearings

16 p2935 A70-33354

Elasticity theory two dimensional contact problems, examining cohesion or friction in contact area

17 p3192 A70-35693

Spacecraft simulator using air bearing technique to simulate low friction aspect of environment, considering application to satellite attitude control

18 p3236 A70-36064

Friction and temperature fields in lubricant film of journal bearings, discussing friction torque and heat dissipation

19 p3434 A70-37601

Metal surfaces friction and wear processes dynamic equilibrium noting loading conditions effects

20 p3638 A70-40099

FRICITION COEFFICIENT

U COEFFICIENT OF FRICTION

FRICITION DRAG

NT AERODYNAMIC DRAG

NT SUPERSONIC DRAG

NT VISCOUS DRAG

Pressure changes associated with surface friction and geostrophic drag coefficient related, discussing mass inflow and outflow

05 p0837 A70-16151

Vorticity effects on drag friction and heat transfer near stagnation point of supersonic jet impinging on obstacle

05 p0833 A70-16290

Frictional drag reducing polymer solution injection into boundary for turbulent pipe flow, discussing Reynolds number, injection rate, injection points and concentration

06 p1032 A70-17215

Blowing intensity influence on turbulent boundary layer of incompressible fluid and friction drag of flat plate

06 p1036 A70-17852

Turbulent incompressible boundary layer on porous heat insulated plate with uniform suction, calculating ratio of friction drag coefficients

07 p1254 A70-19082

Elastic coatings effect on turbulent friction using turbulence flow theory based on mixing length concept

08 p1483 A70-21227

Friction drag on thin pyramidal lobed bodies in supersonic flow, analyzing detached shock region and body geometry function

09 p1606 A70-23612

Velocity distribution along cylindrical pipe in adiabatic flow with friction and known inlet parameters

09 p1607 A70-23616

Convergent-divergent nozzle flow under influence of friction drag, determining heat transfer rate as function of nozzle geometry

17 p3194 A70-34694

Heat transfer and friction drag calculation for turbulent boundary layer of gas with temperature dependent physical properties

17 p3012 A70-35729

German monograph on casing and hub wall friction effects on three dimensional flow in turbocompressors in subsonic compressible working fluids

24 p4287 A70-45096

Friction-originated ageostrophic mass flux in ground friction layer at nonaccelerated geotriptic boundary layer flow

24 p4370 A70-45133

FRICITION FACTOR

Pneumatic line losses due to friction in pneumatic control systems

04 p0628 A70-15399

Packing rub effect on rotating machinery produced by unstable vibration generated by friction and heat of rubbing rotor in sliding contact

05 p0854 A70-15908

Friction on fuselage surface layer under static and instantaneous loads without allowance for oscillation

05 p0856 A70-17015

Equations of motion for hypersonic friction layers integrated using quadrature procedures

06 p1033 A70-17230

Potential flow over rocket contour containing bends calculated by polygonal distribution of singularities on axis of body of revolution, determining friction effects

06 p0964 A70-17239

Turbulent friction in gas flow core determined on basis of maximum stability principle

07 p1253 A70-18719

Complex elastic system coupled flexural vibrations resonant frequencies determined with allowance for friction

07 p1363 A70-19111

Elastic contact between bodies in presence of friction or adhesion by reducing singular integral equations to Fredholm equation

08 p1585 A70-20958

Single fluid theory for plasma laminar flow in field-free region of circular tube, obtaining friction factor and Nusselt number correlations

08 p1552 A70-21585

Forced vibrations of trusses calculated by dynamic rigidities method allowing for friction forces

09 p1773 A70-22540

Frictional traction-sliding speed relation in elastohydrodynamic lubrication in Barlow-Lamb model of viscoelastic liquid, discussing oscillatory and continuous shear

09 p1691 A70-22600

Friction and orography influence on wave motions in real atmosphere, discussing planetary boundary layer and propagation in free atmosphere

09 p1718 A70-23331

Velocity and friction stress profiles of semibounded plane turbulent jets discharging from finite slit along smooth plate into moving medium

09 p1663 A70-23617

Statistical chance characteristics of velocity profiles and friction for flow along infinite plane wall with constant suction

10 p1869 A70-24519

Atmospheric pressure variations as function of vertical movements caused by friction and orography, considering numerical forecasting

11 p2076 A70-26073

Self-synchronization of forced frictional mechanical vibrators assuming simple harmonic combination

11 p2139 A70-26417

One dimensional compressible flow with heat addition in nonconstant area duct extended for friction addition, discussing critical thermal shocking

11 p2041 A70-26651

Monograph on acoustic theory for determining frictional pressure drop effect on gas state behind reflected wave in shock tube

12 p2209 A70-27000

Fretting and fretting fatigue in metal-metal contacts, showing friction as important parameter

12 p2253 A70-27110

Two component piezoelectric skin friction force transducer for hypersonic flow tunnel

13 p2405 A70-28815

Wear intensity of abrasives during fine grinding of Armco Fe, Ti and Ti alloys, comparing friction and chemical composition effects

15 p2743 A70-31640

Drag optimal stern section of plane body at supersonic flow, allowing for friction forces

18 p3206 A70-36261

Mathematical solutions validity in determining constant interface friction factor from ring compression tests

[ASME PAPER 69-WA/LUB-8] 19 p3434 A70-37603

Pure metals structure effect on friction and lubrication under steady slip in ultrahigh vacuum at low temperatures

19 p3438 A70-38729

Oil seals service life as function of friction horsepower

[ASLE PREPRINT 70AM 5C-1]

19 p3439 A70-38807

Elastic contact between bodies in presence of friction or adhesion by reducing singular integral equations to Fredholm equation

20 p3719 A70-39381

MHD induction generator design, considering electrical and friction loss measurement and control

20 p3565 A70-39988

Turbulent gas boundary layer at finite Reynolds numbers, investigating relative changes in friction and heat transfer coefficients and temperature factor

20 p3614 A70-40390

Heat transfer and friction effects on flow parameters in nozzle with independent cooling

21 p3951 A70-41769

Earth rotation rate deceleration due to lunar tidal friction taking into account fluctuations from internal processes, discussing moon retreat from earth

21 p3921 A70-41970

Tidal friction theories relating to earth rotation and lunar evolution

21 p3921 A70-41972

Downstream heat transfer and wall friction predictions for quasi-developed strongly heated turbulent pipe flow, using mixing length model

[ASME PAPER 70-HT-8] 22 p4008 A70-42439

Acoustic frequency spectra of transverse vibrations in bracketed bar caused by dry friction, using Lagrange method

22 p4073 A70-42612

Antifriction number characterizing friction coupling, distinguishing between elastic and plastic modes

22 p4047 A70-43348

Equations solution for turbine blade flexural vibration, considering internal friction

22 p4117 A70-43363

Low friction seal for axial loading piston in triaxial soil testing cells

23 p4199 A70-43873

Orography and friction effects on numerical forecast of atmospheric pressure variation

24 p4370 A70-45112

FRICITION LOSS COEFFICIENT

U FRICITION FACTOR

FRICITION MEASUREMENT

High temperature internal friction measurements on miniature torsional pendulum specimens from TD nickel bar, showing damping differences due to microstructural anisotropy

01 p0122 A70-11237

Local skin friction measurement on model in blow-down hypersonic wind tunnels using floating element transducer, giving results for flat plate and wedge

[ONERA-TP-756] 03 p0463 A70-13629

Sliding friction and wear of polytetrafluoroethylene ball bearing filled with graphite investigated for irradiation effects

06 p1077 A70-18404

Sliding rigid conical indenter friction experiments over work hardenable metal flats in high adhesion conditions, observing forces, stresses and deformation modes

13 p2421 A70-29548

Supersonic skin friction measurements in grit type boundary layer transition trips with zero heat transfer

13 p2343 A70-29969

Test stand based on Froude pendulum for measuring friction coefficients and oscillation parameters of porous bushings

16 p2924 A70-34298

Friction coefficient theory and measurement, considering definition and measuring equipment

16 p2924 A70-34332

Ball bearing materials for ultrahigh vacuum space environments, determining frictional and wear behavior

17 p3099 A70-34573

Metal-silicate rock friction in ultrahigh vacuum of lunar environment

17 p3101 A70-34760

Force-balance principle application to pressure and skin friction measuring instruments, discussing construction, operation and performance

17 p3089 A70-35171

Skin friction measurement in supersonic flows by thin film heated element method, describing thermal boundary layer properties

18 p3243 A70-36710

Ultrahigh precision microminiature bearing resistance moment measurement with inductive sensors

18 p3264 A70-37069

Mathematical solutions validity in determining constant interface friction factor from ring compression tests

[ASME PAPER 69-WA/LUB-8] 19 p3434 A70-37603

FRICITION PRESSURE DROP

U SKIN FRICITION

FRICITION REDUCTION

Low speed Ga lubricated sliding electrical contacts of Be in vacuum, discussing Ga film role in friction and contact resistance

01 p0099 A70-10325

Compression test for ductile materials based on Saint Venant principle of plasticity to reduce friction effects on deformation by lubricant pressurization

04 p0776 A70-15373

Antifriction reinforced plastics based on polyamide fibers in epoxy phenolic resins, determining optimum ratios to obtain desired mechanical properties

09 p1710 A70-23675

Friction reducing oxide layer effects on Ti alloys low temperature plastic and mechanical properties

19 p3450 A70-37458

Liquid-gas separator design with reduced friction loss for MHD generators using two phase convergent-divergent nozzles

20 p3612 A70-40014

Power loss reduction from disk friction and gas leakage through rotor seals of low speed centrifugal pumps in aircraft hydraulic systems and liquid propellant rocket engines

22 p4091 A70-42806

FRICITIONLESS ENVIRONMENTS

Steady and frictionless supersonic flow of ideal gas of constant heat capacity around slightly deformed cone, calculating force exerted by gas

06 p0964 A70-17240

FRINGE PATTERNS

U DIFFRACTION PATTERNS

FROGS

Relationships between frog vestibular afferents, cerebellum and efferent vestibular system, using electron microscopy and Nauta degeneration technique

01 p0014 A70-10351

Cerebello-otolith system represented by axons of Purkinje cells, studying inhibitory vestibular efferent system relation to cerebellum in frog

01 p0014 A70-10352

Termination mode of primary and secondary vestibular fibers in cerebellar cortex of frog and cat, measuring evoked field and unitary potentials

01 p0014 A70-10353

Frog sartorius muscle heat production and work effect measured under isotonic and isometric conditions, using gradient layer calorimetry

02 p0232 A70-11715

High strength magnetic fields effect on early embryonic development of frogs, relating growth abnormalities and paramagnetic ferritin motions

16 p2848 A70-33099

Auditory perception by neuroelectrical tests based on logic coincidence among several detectors, discussing bullfrog inner ear

21 p3765 A70-41991

Organism reactions to gravity forces, discussing experimental zero and hyper g simulation studies with frog and nematode eggs

23 p4146 A70-44630

Altered gravitational field effects on frog eggs centrifuged under various conditions after fertilization, noting time dependence of induced abnormalities

24 p4298 A70-45619

FRONTAL AREAS [METEOROLOGY]

U FRONTS [METEOROLOGY]

FRONTS [METEOROLOGY]

Ball lightning mechanism proposal based on mathematical model for electric discharge current in parabolic plasma shell forming vortex-type storm front

05 p0879 A70-17021

Upper frontal waves behind quasi-stationary surface cold front using mathematical model

08 p1540 A70-21924

Sheared frontal zones structure and stability, studying Richardson number limiting role in free atmosphere

08 p1492 A70-21971

Heavy squalls observations by satellite TV and radar, considering wave disturbances at cold front

13 p2444 A70-28585

Extratropical planetary high altitude frontal zones statistical analysis and position forecasting by eigenfunction expansion

13 p2445 A70-29673

Upper level frontal zones geostrophic approximation theory based on scale analysis and case study diagnosis

15 p2769 A70-31442

Radiation fields structural characteristics of fronts, intertropical convergence zones and cyclone formations from radiation charts based on meteorological satellite observations

15 p2770 A70-32068

Maximum up- and downdrafts altitude, using two dimensional model of lee wave disturbances for post-frontal subsidence modification

16 p2945 A70-32948

Meteorological observation on atmospheric boundary layer during winter, determining width and inclination of frontal zones

19 p3463 A70-38758

Midtropospheric frontogenesis, using three hourly rawinsonde data for isentropic trajectories to describe velocity field in space and time

20 p3664 A70-39374

FROST

- Near IR reflectance spectrometer integrated into environmental chamber to study frost spectral properties
06 p1072 A70-18522
- Spectral reflectance of carbon dioxide and water frosts at 0.8-3.2 microns, growing frosts in cold vacuum chamber from high purity gases
07 p1388 A70-19945
- Martian polar cap spectra interpreted with laboratory measurements of water-carbon dioxide frost spectral reflectance
07 p1388 A70-19946
- Saturn ring IR spectrum, discussing resemblance and discrepancies of ammonia and water frost spectra
10 p1935 A70-23813
- Thermal conductivity of frost, using imbedded hot-wire method
18 p3262 A70-37118

FROUDE NUMBER

- Large Froude number solution for nonseparative impact of elliptical cylinder floating on incompressible fluid surface in half space extended to small Froude numbers
07 p1253 A70-18770
- Interfacial and free surface mode instabilities of time periodic flows of viscosity and density stratified fluids at various Froude numbers
14 p2566 A70-31026

FROZEN EQUILIBRIUM FLOW

- Mach numbers, electron density and temperature in partially ionized frozen equilibrium flows of Ar in hypersonic nozzle
01 p0063 A70-10994
- Normal shock waves in frozen, partly frozen and equilibrium flow in gas-solid particle mixtures
01 p0065 A70-11100
- Frictionless hypersonic flow around blunt bodies of revolution, taking into account real gas effects in equilibrium and frozen flow calculations
06 p0965 A70-17242
- Frozen flow effect in hypersonic wind tunnel nozzle on parameters of nonequilibrium incident flow past wedge
09 p1604 A70-22446
- One dimensional sound propagation in reacting gas mixture near equilibrium, obtaining equilibrium and frozen sound speed
22 p4074 A70-42752

FRUSTUMS

- Axisymmetric vibration modal properties /frequencies and mode shapes/ of thin conical shell frustums, considering dimensional and boundary condition influences
23 p4270 A70-44501

FUEL CAPSULES

- Thermal mapping vacuum chamber tests of nuclear fuel capsules for lunar surface experiments, using remote IR radiometric microscope
15 p2718 A70-32800

FUEL CELL CATALYSTS

U ELECTROCATALYSTS

FUEL CELLS

NT HYDROGEN OXYGEN FUEL CELLS
NT REGENERATIVE FUEL CELLS

- Book on electrochemical processes in fuel cells covering mass transport processes, electrode reactions, anodic oxidation, etc
06 p0989 A70-18250
- Fuel cell assemblies as primary electrical source for Apollo command and service modules, discussing heat removal, water vapor control and transient performance
08 p1439 A70-20702
- Molten carbonate fuel cells power source for military applications, considering catalytic recycle reformer
08 p1439 A70-20703
- Fuel cells - Conference, Brussels, June 1969
10 p1828 A70-24451
- Silver/polytetrafluoroethylene water-repellant air-breathing cathodes for fuel cells with alkaline electrolytes, discussing pressure compatibility
10 p1829 A70-24454
- Fuel cells phase equilibria between carbonate melt and Li, Na and K solid aluminate electrolytes, analyzing thermal and electrical conductances
10 p1830 A70-24458
- High temperature fuel cell electrolytes, analyzing electrical conductivity of ternary systems of zirconium, cesium or tantalum and yttrium oxides in fluoride phase
10 p1830 A70-24460
- Solid electrolyte high temperature fuel cells electrode materials, investigating various metal oxides
10 p1830 A70-24461
- CO electrochemical oxidation at porous solid electrolyte fuel cell anodes under high temperature, noting current density role
10 p1830 A70-24462
- Electrodes oxidation processes involving fuel cell molecules or derived adsorbed intermediates reacting with anodically generated surface oxide, considering Pt electrochemical reduction
10 p1830 A70-24465

Raney alloy catalyst activity and stability in fuel cell anodes, noting properties of ternary phases of nickel, aluminum and iron, molybdenum or titanium
10 p1831 A70-24466

Catalytic load carrying capacity of porous carbon electrodes impregnated with nickel salt and nickel boride in anodic fuel cell hydrazine oxidation
10 p1831 A70-24469

Electrode structural parameters effect on polarization characteristics of air-hydrogen cells to obtain optimum performance, reliability and service life
10 p1831 A70-24471

Low temperature fuel cell materials impurity effects on catalyst poisoning, stressing sulfur elimination from rubber molding
10 p1832 A70-25043

Fuel cells with solid oxide electrolyte, principles, advantages and drawbacks
12 p2163 A70-26994

Medium temperature hydrogen fuel cells design, operational characteristics and performance
12 p2163 A70-26996

Fuel cell electrolytes, describing porous tungsten carbide as catalyst
12 p2164 A70-27068

Fuel cell systems - ACS Conference, Chicago, September 1967, Part II
12 p2165 A70-27757

Fuel cells power density improvement under pulsed loading at high current density and constant voltage
12 p2165 A70-27758

Liquid hydrocarbon-air battery with fuel transport operation, considering electrode structure, boiling range, carbon dioxide rejection, etc
12 p2166 A70-27764

Electrocatalysts, electrode structure and design of fuel cells using air at cathode, describing applications to hybrid systems
12 p2166 A70-27765

Natural gas-air fuel cell battery with sulfuric acid electrolyte for low temperature operation
12 p2166 A70-27766

Book on fuel cells electrochemistry covering direct energy conversion methods, electrode kinetics, electrocatalysis, organic substances, electrochemical combustion, research techniques, etc
14 p2532 A70-30100

LPG use in fuel cells, discussing efficiency, weight and size
18 p3216 A70-36657

Fuel cell cavities, analyzing fluid motion purge dynamics based on anisotropic porous media model
18 p3216 A70-36766

High temperature fuel cell with thin disk solid electrolyte, evaluating performance as function of electrolyte, electrode and current collector resistance ratio
22 p3966 A70-42499

Hydrazine-fueled battery low power consumption auxiliary system with voltage regulator and gas pumps
22 p3966 A70-43539

Hydrazine-oxygen fuel cell design and operation, discussing efficiency, electrolyte space, etc
22 p3966 A70-43541

Batteries and fuel cells as portable and transportable electrochemical power sources
24 p4295 A70-46399

FUEL COMBUSTION

Book on turbulent diffusive flames in combustion of gaseous fuels covering mass, heat, flame exchange and stabilization processes, etc
01 p0219 A70-11377

Fuel droplets burning at pressures sufficient to reach critical temperature under zero gravity conditions in free fall apparatus
02 p0351 A70-12002

Flame spreading theory for plastic fuels surfaces in nitrogen-oxygen mixtures, considering initial fuel temperature, pressure and mixture composition effects
02 p0396 A70-12015

Laminar diffusion flame spread against air stream over solid or liquid fuel bed, noting influence of stoichiometric and thermal properties and data inconsistency
02 p0396 A70-12016

Hydrogen reactions with nitrogen dioxide, oxygen and mixtures of oxygen and nitric oxide in adiabatic flow reactor measured as function of temperature and pressure
02 p0250 A70-12020

Chemical additives effect on H-Cl-N mixtures burning velocity in air and nitrogen
02 p0398 A70-12031

Ultrasonic atomizer system for liquid fuels combustion
02 p0356 A70-12470

Polymethyl methacrylate fuel for hypersonic air breathing propulsion systems, studying ablation, mixing and combustion processes
03 p0603 A70-12942

Burning constants prediction for suspended hydrocarbon fuel droplets based on modified theoretical equation
03 p0544 A70-13916

Liquid fuel film vaporizing combustor for gas turbines, considering combustion efficiency and flame intensity
03 p0552 A70-14324

Emulsified jet fuels combustion characteristics evaluation by laboratory technique, presenting data on emulsifiers and corrosion inhibitors effect
04 p0785 A70-14893

Ignition of freely falling single fuel droplets, considering initial size, oxidizer temperature, fuel composition, droplet spacing, etc
04 p0733 A70-15540

Nozzle exit turbulence and excess fuel combustion as low and high speed jet noise source using Lighthill theory
05 p0834 A70-16782

Liquid fuel combustion luminous flame monochromatic radiation distribution, considering soot particle clouds effective emission thickness
06 p1172 A70-17142

Ducted turbulent mixing and burning of coaxial streams, presenting experimental results for rocket-air mixing system
06 p1130 A70-17171

Combustion stability in air-liquid fuel zone of jet engine burner with burning rate controlled by droplet vaporization rate controlled mechanism
06 p1178 A70-17980

Ignition of cold premixed fuel by hot projectile, obtaining distance for ignition occurrence
06 p1180 A70-18133

Combustion and flow characteristics associated with direct injection of liquid hydrocarbons into high speed air stream
06 p1182 A70-18198

Gas phase ignition theory of evaporating fuel in stagnant hot oxidizing gas as function of temperature
07 p1421 A70-19317

Mathematical model for calculating radiative heat transfer from turbulent diffusion buoyant flame and predicting liquid fuel burning rate
07 p1425 A70-20008

Condensed fuel mixtures and oxidizers combustion rates as function of pressure and particle size
09 p1786 A70-22104

Steady flame propagation attainment for chemical reaction initiation in gaseous fuel by heated surface with various wall temperatures
09 p1787 A70-22115

Flame propagation in slowly combusting fuel-air mixtures using gas chromatography and flame speed
11 p2151 A70-26381

Temperature and metallic contact effects on composition and structure of solid phase deposits during reactive fuel oxidation
12 p2289 A70-27493

Solid fuel steady combustion regime stability dependence on heat generation in reaction zones and temperature and velocity fields inhomogeneity
13 p2522 A70-29423

Shock wave interaction with burning liquid fuel droplets in gaseous oxygen atmosphere, observing wave amplification due to mass combustion rate increase
13 p2522 A70-29424

Liquid fuel droplet ignition quasi-stationary theory occurring at maximum chemical reaction rate
14 p2664 A70-30393

Flameout from burning liquid fuel droplet within reduced film theory
14 p2664 A70-30394

High temperature combustion wind tunnels for investigating gas and liquid fuel combustion stabilized by shock waves in supersonic flow
16 p2996 A70-32991

Thermodynamic diagram indicating enthalpy and entropy of oil combustion gases for any state and air excess value
16 p2997 A70-33295

External burning fuels environmental temperature requirements from nonlinear droplet ignition model, emphasizing droplet size importance
16 p2997 A70-33604

Powder combustion on metal plate, investigating unburned layer thickness dependence on initial temperature
17 p3198 A70-35738

Chemical kinetics effect on combustion rates of fuel plate in turbulent oxidizer flow, deriving conservation equations in boundary layer and diffusion equation
18 p3346 A70-36245

Turbine engine combustion chambers with various frontal devices, investigating burnout mechanism and heat yield in secondary air flow injection zone
19 p3489 A70-37246

Gas turbine engine combustion chamber efficiency dependence on injector characteristics, temperature and fuel physicochemical properties
19 p3489 A70-37247

Flame propagation velocity of gasoline-air mixture during two stage combustion process in laminar and turbulent flows, discussing combustion products effect
19 p3550 A70-37253

Elementary chemical reaction kinetics effect on electrophysical parameters of low temperature plasma jets, calculating relaxation time for C fuels
19 p3481 A70-38184

Soviet papers on kinetics and aerodynamics of fuel combustion processes covering supersonic flow, flame stabilization, fluid atomization, nonequilibrium recombination, etc
20 p3736 A70-39265

Combustion of decomposition products of Mg based pyrotechnic fuel in supersonic flow, obtaining heating device characteristics
20 p3736 A70-39266

Flame stabilization in boundary layer during mixing of cold homogeneous fuel mixture and hot gas based on combustion and turbulent jets theories
20 p3736 A70-39267

Air to air missile launch range maximization for plane trajectories and nonmaneuvering targets, discussing optimal fuel burning rate
[AIAA PAPER 70-980] 20 p3668 A70-39549

Turbulent jet system with previously unmixed chemically active gases, calculating heat and mass transfers during diffusion combustion
20 p3737 A70-39813

Hydrogen-oxygen and hydrogen-nitrous oxide systems combustion, studying isotopic substitution effect on flame speed by schlieren technique with rotating drum camera
20 p3583 A70-40472

Methane and hydrogen consumption rates during slow reactions in mixtures of molecular hydrogen, oxygen and nitrogen
21 p3772 A70-40879

Multicomponent fuels combustion in air, deriving simplified flame sheet model
21 p3942 A70-40881

Oxygen-kerosene fuel combustion products thermodynamic properties, tabulating computed values
21 p3865 A70-41771

Particulate boron levitated electrostatically in air and ignited by pulsed laser to avoid contamination, investigating combustion by high speed photography [SMPT PREPRINT 100] 22 p4032 A70-43034

Numerical analysis of fuel combustion in supersonic stationary flows of hydrogen air mixture past bodies by two-component reaction kinetics model
[ICAS PAPER 70-52] 24 p4428 A70-45500

Photographic measurement of droplets size, velocity and number during sprayed liquid fuel combustion, using Xe flash bulbs
24 p4429 A70-46008

FUEL CONSUMPTION

Optimal rendezvous maneuver of two spacecraft in circular orbits with minimum fuel consumption, taking into account propelled vehicle control program and flight path
01 p0193 A70-10424

Minimum propellant rendezvous maneuver of space vehicles in neighboring circular orbits
01 p0193 A70-10555

Minimum fuel consumption criteria applied to design of manned spacecraft attitude control system, using reaction jets for lateral and directional controls
01 p0196 A70-10950

Optimal fuel consumption for climbing, cruising and landing flight conditions for medium range subsonic, high supersonic and hypersonic aircraft
02 p0227 A70-12404

Minimum propellant maneuver during docking of elliptical orbit rendezvous between propelled and passive target vehicles, analyzing as variational problems
02 p0380 A70-12784

Turbojet engine controls and control devices design, considering fuel properties and fuel consumption
03 p0552 A70-13806

Optimal control of thrust limited minimum- propellant rocket-powered vehicle using expansion about optimal trajectory
04 p0750 A70-14928

Analytic guidance and control for minimum fuel expenditure and optimal guidance corrections for low thrust vehicle in Martian orbit
[AIAA PAPER 68-862] 04 p0716 A70-15544

Satellite circular orbital plane rotation by jet thrust, minimizing fuel for fixed time
07 p1393 A70-19497

Soviet helicopter and aircraft engines characteristics covering designer, power, rpm limits, fuel consumption, weight, geometry and applications
08 p1559 A70-21366

Composite programming of vertical ascending rocket with constant thrust phase followed by acceleration and coasting phases, discussing burnout altitude and fuel consumption
08 p1582 A70-21775

Range, block speed and fuel-weight ratio formulas for hypervelocity, boost glide and ballistic vehicles
08 p1582 A70-21871

Fourth order differential equation system with complex conjugate eigenvalues, deriving optimal control for fuel minimum
09 p1759 A70-22831

Linearized theory for minimum fuel guidance in neighborhood of minimum fuel space trajectory, unrestricted thrust magnitude and allowances for mid-course impulses
[AIAA PAPER 69-74] 11 p2079 A70-25957

Minimum fuel continuous thrust elliptical orbit transfer problem, obtaining optimal steering function for departure and arrival points
11 p2124 A70-26214

Accelerated gradient projection method applied to rocket trajectory optimization for minimizing fuel required for placing payload in circular orbits
13 p2485 A70-28395

Spacecraft rendezvous control at minimal propellant consumption, deriving algorithm
13 p2499 A70-28400

Minimum fuel takeoff and landing paths for VTOL aircraft with constraints on state and control, determining optimal trajectories
[AIAA PAPER 70-550] 13 p2345 A70-29015

Rolls-Royce RB 211 turbofan engine, discussing fuel consumption, specific weight, noise and smoke level, reliability and maintainability
15 p2787 A70-31948

Satellite circular orbital plane rotation by jet thrust, minimizing fuel for fixed time
15 p2813 A70-32742

Minimum impulse transfer between two neighboring low eccentricity orbits, discussing fuel consumption and transfer time
17 p3167 A70-35231

Linear time invariant plant driven by scalar control, deriving second variation algorithm for minimum fuel problems
17 p3057 A70-35555

Steady state off-on attitude control strategy for minimizing propellant consumption and thrust ignitions of satellite in presence of environmental disturbance torques
17 p3180 A70-35556

Optimum approach and departure paths for VTOL aircraft simulated by hybrid computer under constraints
[AIAA PAPER 69-209] 18 p3213 A70-36452

Integrals of motion for minimum fuel rocket trajectories in inverse square field calculated for constant power and constant exhaust rockets
18 p3316 A70-36678

Closed form solution for minimum fuel constant thrust trajectories for vehicle transfer in vacuum between arbitrary boundary conditions
18 p3316 A70-36683

Spacecraft fuel optimal controls for out-of-plane motion about translunar libration point based on phase plane methods
[AIAA PAPER 70-1079] 19 p3530 A70-38890

Optimum switching in minimum fuel, time-free impulsive planar transfer problem by primer vector concept
20 p3709 A70-40074

Fuel optimal orbital transfer trajectories by linear programming
20 p3711 A70-40337

Fuel consumption related to aircraft performance and engine type
22 p4090 A70-42602

Analytic approximation for initial adjoint vector for optimal/minimum propellant/ space trajectories
[AIAA PAPER 69-916] 23 p4243 A70-44509

Minimum fuel thrust limited transfer trajectories computation for coplanar elliptic orbits
[AIAA PAPER 69-914] 23 p4244 A70-44558

Interplanetary mission propellant reduction by using earth-moon-sun gravity field properties, discussing swingby techniques, low energy trajectories, etc
23 p4244 A70-44607

Two shaft bypass jet engine analog simulation, determining angular acceleration dependence on angular velocity and fuel consumption
24 p4393 A70-45442

TSCP700 aircraft auxiliary power unit design, fuel consumption and maintainability
[SAE PAPER 700815] 24 p4395 A70-45902

FUEL CONTAMINATION

Contaminants formation during pulse mode operation of liquid bipropellant attitude control rocket engine, discussing exhaust plume effects
[AIAA PAPER 69-574] 07 p1394 A70-19708

Field test for microbiological contamination of jet fuel, discussing phosphates detection
18 p3299 A70-36344

Water separation index modified /WSIM/ test for jet fuel surface active materials in relation to filter/separators performance
[SAE PAPER 700279] 18 p3300 A70-36815

Aircraft and engine fuel systems deposit formation and microstructure in various test rigs, using electron microscopy
[SAE PAPER 700258] 18 p3214 A70-36823

Automated aircraft flight safety, concerning probabilities and onboard elimination of servomotor failures in hydraulic system due to fuel contamination
22 p3961 A70-42804

FUEL CONTROL

RB.211 aircraft engine control, describing fuel and electronic control systems design and operation
[SAE PAPER 690404] 03 p0551 A70-12895

Turbojet engine controls and control devices design, considering fuel properties and fuel consumption
03 p0552 A70-13806

Concorde microelectronic power plant control system, noting overfueling prevention by throttle actuator during startup and speed governor function
05 p0896 A70-16003

Fuel suboptimal attitude control of spin stabilized axisymmetric spacecraft
10 p1953 A70-25237

Business aircraft fuel management system using capacitance and mass flow rate measurements, displaying fuel quantity and flow rate and flight time remaining
[SAE PAPER 700225] 11 p1983 A70-25896

Minimum fuel control for discrete time Gaussian processes, applying results to spacecraft midcourse guidance for earth-Mars mission
11 p2079 A70-25958

Capillary barriers to provide propellant positioning, expulsion capability and slosh dampening for spacecraft propulsion systems during rotational maneuvers
[AIAA PAPER 69-529] 11 p2123 A70-26119

Fuel-optimal retrothrust control in state dependent retarding force fields, taking into consideration synthesis for vertical trajectory system configuration
11 p2126 A70-26321

Hydrostatic stability and damping characteristics of perforated plates and screens for passive propellant control schemes from drop tower tests
[AIAA PAPER 69-531] 15 p2787 A70-32510

Dual bellows ball seat valve design for colloid thruster coupled to pressurized feed system, demonstrating thrust decay and flow regulation
[AIAA PAPER 70-615] 16 p2919 A70-33610

VTOL 5000 hp engine design optimization, considering component arrangements, rotor design, blade cooling method and fuel control
17 p3147 A70-34709

Fluidically controlled aircraft fuel transfer system three-tank model construction, noting maintenance and fail safe operation
[SAE PAPER 700786] 24 p4294 A70-45858

FUEL CORROSION

Temperature and metallic contact effects on composition and structure of solid phase deposits during reactive fuel oxidation
12 p2289 A70-27493

Solid tar deposits from hydrocarbon fuels oxidation during prolonged storage
12 p2289 A70-27494

Jet fuel system deposits measurement, noting reliability of oxygen combustion and beta ray backscattering techniques
[SAE PAPER 700257] 18 p3214 A70-36824

FUEL ECONOMY

U FUEL CONSUMPTION

FUEL ELEMENTS [NUCLEAR REACTORS]

U NUCLEAR FUEL ELEMENTS

FUEL FLOW

NT PROPELLANT TRANSFER

Flow characteristics of curved porous wall gas core reactors for nuclear rocket engines, visualizing simulated fuel flow with air-smoke combination
06 p1104 A70-17509

Fuel delivery and speed control systems for aircraft gas turbine engines, discussing control circuit transfers and block diagrams
22 p4091 A70-43116

FUEL FLOW REGULATORS

Fluidic vortex valve to modulate solid propellant generated hot gas flow
[AIAA PAPER 69-424] 09 p1743 A70-23249

FUEL GAGES

NT CAPACITIVE FUEL GAGES

Gaging system utilizing nuclear radiation to obtain mass measurement of fuel quantity
[SAE PAPER 690673] 05 p0880 A70-15832

FUEL INJECTION

Diffusion flame structure in boundary layer with fuel injection from wall, analyzing expansions with single step reversible chemical kinetics, including nonequilibrium case
01 p0214 A70-10334

Supersonic diffusion flames produced by subsonic and supersonic free jet injection of hydrogen into high enthalpy airstream
02 p0399 A70-12042

Fuel injections into supersonic air stream through isolated normal ports and porous wall, using interferometry, schlieren and high speed photography
02 p0354 A70-12044

Fuel injection and mixing and piloted ignition in supersonic flow design principles for scramjet engine, evaluating eddy viscosity model for parallel injection
02 p0354 A70-12047

Flow field of jet spoilers downstream from nozzle, accounting for main stream and secondary jet mixing

and fuel injection problems during supersonic combustion

03 p0608 A70-14098

Chemical composition of scale formation in jet engine injectors for various fuel types tabulated, noting buildup levels in transport aircraft and subsonic jets

07 p1362 A70-18651

Combustion of pure crystalline boron single particles injected into hot oxidizing gases streams at atmospheric pressure

[AIAA PAPER 69-562] 07 p1359 A70-19583

Pressure peaks control in hydrazine propulsion system during static tests by controlling initial hydrazine injection

11 p2101 A70-25691

Monopropellant rocket combustion one dimensional theory with uniform velocity and size droplets injection, obtaining chamber length

14 p2629 A70-30773

Large scale hydrogen fueled supersonic combustor test at simulated Mach 8 flight, describing fuel injector design

[AIAA PAPER 70-715] 16 p2965 A70-33539

Oxygen difluoride/diborane propellant thrust chamber and injector technology, discussing engine duty cycles and performance

[AIAA PAPER 70-717] 16 p2962 A70-33550

Liquid rocket engine injector elements design criteria, using noncircular orifice geometry to predict efficiency

[AIAA PAPER 70-704] 16 p2967 A70-33565

Hydraulic characteristics of flow through miniature slot orifices for rocket engine injectors, observing stability of effluent liquid streams

[AIAA PAPER 70-706] 16 p2891 A70-33566

Particle penetration of solid or liquid combustible additives injected into air breathing combustors airstreams

17 p3073 A70-35665

Liquid propellant rocket engines, investigating fuel injection effect on formation of fuel mixture

18 p3300 A70-36252

Air-mechanical fuel injection effect on gas turbine engine combustion chamber working process, investigating heat generation coefficient, temperature field nonuniformity and combustion efficiency

19 p3489 A70-37248

Integrated double oblique shock scramjet for supersonic combustion tests and instrumentation development, discussing fuel injection through sonic orifices, combustion data, etc

[AIAA PAPER 69-827] 21 p3867 A70-41752

Fuel atomization drop size calculation for mechanical swirl injectors with and without air input

21 p3867 A70-41770

FUEL SPRAYS

Ultrasonic atomizer system for liquid fuels combustion

02 p0356 A70-12470

Combustion chamber design for engines, considering atomization by rotating disk vs nozzle atomization

03 p0552 A70-14031

Fuel nozzle sprays mean droplet diameter based on computerized analysis of small angle forward scattered light profile

21 p3806 A70-40805

Photographic measurement of droplets size, velocity and number during sprayed liquid fuel combustion, using Xe flash bulbs

24 p4429 A70-46008

FUEL SYSTEMS

NT AIRCRAFT FUEL SYSTEMS

Gaseous He bubbles injection into liquid propellant launch vehicle fuel lines to reduce vehicle pogo oscillations by lowering feed system natural frequencies

01 p0196 A70-10851

Fuel filter icing prevention by injecting antifreeze into filter instead of fuel

06 p0988 A70-17873

Spacecraft stochastic optimal control, discussing design of least upper bound fuel optimal system with measurement uncertainty

11 p2025 A70-26222

Liquid rocket technology for chemical engineers, discussing propellant tanks, lines and valves, tank pressurization, turbopumps and combustion chamber problems

12 p2291 A70-27664

Saturn 5 S-2 stage propellant feedlines and J-2 engines simulating structural longitudinal oscillation by analog computer

[AIAA PAPER 70-626] 16 p2968 A70-33591

Jet fuels ground handling at airfields, describing flow monitors, filters, fueling techniques, etc

22 p4006 A70-43093

FUEL TANK PRESSURIZATION

Gas solubilities investigated for gaseous pressurization of propellants

01 p0160 A70-10840

Gas bubble formation and equilibrium conditions in air supersaturated fuel stored under atmospheric pressure after injection into evacuated tank

03 p0605 A70-13394

Fluorine injectors for main tank injection of space vehicle liquid hydrogen tank, including study of hypergolicity and reaction product freezing

[AIAA PAPER 69-528] 04 p0736 A70-15406

Helium properties and utilization in NASA projects, discussing pressurization of fuel tanks cooling of superconducting magnets

04 p0720 A70-15633

Helium low temperature applications to fuel tank pressurization, superconducting magnet cooling and cryopumping of solar space simulators

11 p2083 A70-25620

Vapor fraction dependence on liquid hydrogen propellant outflow during NERVA operation under stored gas or autogenous pressurization, using computer simulation

[AIAA PAPER 70-677] 16 p2950 A70-33578

Gas-wall heat losses reduced and heated gas pressurization systems performance improved by ullage mixing by gas flow from pressurant injectors

[AIAA PAPER 70-681] 16 p2962 A70-33581

Boeing 747 aircraft pressure fueling system, describing tanks, feed system, refueling and electrostatic charge minimization

[SAE PAPER 700276] 18 p3214 A70-36816

FUEL TANKS

NT WING TANKS

Spontaneous ignition temperature as function of surface-to-volume ratio in static systems for fuels

11 p2151 A70-26384

Jet A kerosene deposit accumulation problem and proposed SST fuel tank design

[SAE PAPER 700256] 18 p3214 A70-36825

Liquid fuel behavior in right circular cylindrical tank inclined to earth gravitational field, computing fundamental sloshing frequency

20 p3610 A70-39694

Automatic calculations for fuel volume mass properties in tanks at various angles of attack, considering total weight, gravity center moment and inertia product

[SAE PAPER 850] 20 p3563 A70-40376

Catalytic combustion fuel tank inerting techniques for fire protection in military and civilian aircraft

23 p4141 A70-44485

Low gravity fuel sloshing in axisymmetric rigid tank, calculating oscillations by modified Galerkin method

24 p4324 A70-45292

Fluidically controlled aircraft fuel transfer system three-tank model construction, noting maintenance and fail safe operation

[SAE PAPER 700786] 24 p4294 A70-45858

FUEL TESTS

Carbon deposit formation in gas turbine engines with various fuels, studying thermal insulation properties

09 p1742 A70-22472

Flame spread rate across surface of liquid fuels, discussing effects of ignition mode, fuel purity and temperature, fuel container dimensions and material

10 p1929 A70-24090

Gelled and emulsified fuels for jet transport aircraft, testing rheological and physical properties regarding fire hazard reduction in crashes

[SAE PAPER 700251] 12 p2160 A70-27430

Electrostatic charging hazard and flight evaluation of aviation fuels with static dissipator additive

[SAE PAPER 700278] 12 p2289 A70-27439

Toxic fuel test site selection, evaluating meteorological factors in Gypsum Canyon, California

14 p2563 A70-30613

Ethyl alcohol fuel diffusion flame, examining thermal decomposition pyrolysis and free electron concentration distribution

18 p3345 A70-36113

FUEL VALVES

Fluidic vortex valve to modulate solid propellant generated hot gas flow

[AIAA PAPER 69-424] 09 p1743 A70-23249

FUEL-AIR RATIO

Ducted turbulent mixing and burning of coaxial streams, presenting experimental results for rocket-air mixing system

[AIAA PAPER 69-85] 06 p1130 A70-17171

Unsensitized gaseous fuel-air mixtures photochemical ignition due to molecular oxygen photodissociation by radiant energy absorption

[AIAA PAPER 70-149] 06 p1183 A70-18225

Cold combustible mixture ignition at forward stagnation region of hot projectile, calculating temperatures for propane-air mixture

07 p1422 A70-19577

Mixture composition and airflow rate dependence of combustion efficiency in turbo-prop afterburner chamber with air-fuel flame stabilizer

10 p1929 A70-24282

Excess air ratio and heat release efficiency in combustion of kerosene mixture determined by volumetric gas analysis

10 p1968 A70-24283

Nozzle fuel and air system geometrical parameters to determine mean diameter of fuel droplets, dispersion angle and spectrum and flame jet shape

10 p1930 A70-24295

Flame propagation in slowly combusting fuel-air mixtures using gas chromatography and flame speed

11 p2151 A70-26381

Combustion gases compositions and adiabatic flame temperatures of potassium seeded propane-air mixtures calculated at various equivalence ratios and temperatures assuming thermal equilibrium

12 p2330 A70-27227

Open cycle MHD generator operation, comparing below stoichiometric air-fuel ratios to excess air level

14 p2533 A70-30534

Burning velocities for methane-air mixtures with water cooled porous metal flat flame burner, discussing surrounding ambient atmospheres effects

14 p2666 A70-31093

High temperature gas turbine aircraft engine control system requirements, noting stoichiometric fuel-air ratio

[SAE PAPER 700823] 24 p4394 A70-45895

FULL SCALE FATIGUE TESTS

U FATIGUE TESTS

U FULL SCALE TESTS

FULL SCALE TESTS

Full scale R/V flight test base pressure data for slender cones with ablative heat shields, considering mass flow and addition effects

[AIAA PAPER 70-109] 06 p0973 A70-18148

Aircraft design structural development and substantiation utilizing computer analysis and testing

[SAE PAPER 700216] 11 p2134 A70-25888

Full scale R/V flight test base pressure data for slender cones with ablative heat shields, considering mass flow and addition effects

[AIAA PAPER 70-109] 21 p3745 A70-41753

FUNCTION GENERATORS

Table lookup/interpolation function generation for fixed point digital computations, illustrating sine-cosine generator

01 p0047 A70-10459

Rotator and symmetrizer negative resistance circuits application in electronic function generator

05 p0824 A70-15991

Functions generation to determine probabilistic parameters of automatic air traffic control system

08 p1541 A70-20873

Separable potential with hard core effects, treating short range repulsion in nucleon-nucleon interaction, generating T matrix for existing data

09 p1725 A70-22042

Output and frequency limitations of functional converter using photopotentiometer with shaped resistor

09 p1682 A70-23358

Random process represented in canonical expansion form simulated by method of prognosis of reliability

11 p2022 A70-25344

Autonomous control system for moving plant based on logic threshold networks and multivariable functional converter

11 p2023 A70-25612

Walsh functions electrical generation with small orthogonality error based on multiplication theory, presenting circuit diagram for 32 channel analyzer

13 p2364 A70-28900

Logic cells for multiple arithmetic functions suitable for LSI

13 p2377 A70-29145

NaI scintillation spectrometer response function matrices semiautomatic generation, using standard source spectra to obtain normalized Compton continua

14 p2587 A70-31006

Liapunov functions direct generation by state space system vector matrix transformation

15 p2768 A70-32555

Digital computer generation of system stability Liapunov functions for ninth order spacecraft attitude control

16 p2867 A70-33043

Simultaneous generation of sensitivity functions for linear automatic control system with known characteristic differential equation

19 p3394 A70-37867

Generator for modeling random processes with given statistical parameters

20 p3593 A70-39915

Fast pseudorandom number generators for digital computers 21 p3793 A70-40851

Spherical Bessel functions fast generation recurrence technique, presenting real or complex arguments 22 p4062 A70-42920

FUNCTION SPACE

NT BANACH SPACE

NT HILBERT SPACE

Optimal control problems concerning vector determination and trajectory of point motion toward target in n-dimensional phase space 01 p0053 A70-11028

Linear functionals over Sobolev spaces and elliptical boundary value problems generated by theorems on homeomorphisms 03 p0519 A70-13505

Stronger locally convex topology on space C/S/ of bounded continuous functions proved in nonagreement with strict topology on norm bounded sets 05 p0875 A70-16050

Stationarization problems involving nonlocal and null class Euler-Lagrange operators, considering vector spaces of function spaces 05 p0881 A70-16059

Fourier series localization conditions for fundamental system of Beltrami operator functions in arbitrary n-dimensional space 05 p0877 A70-16972

Numerical solution of control optimization problems by systematic search in initial costate space, using Newton-Raphson method 06 p1025 A70-17964

Constraint optimization on phase coordinates and controls noting extension to functional spaces 07 p1330 A70-18683

Soviet collection of papers on boundary problems for differential equations covering variational problems in half space, polynomial behavior at infinity, function spaces, Fourier transformation, etc 07 p1322 A70-18851

Electromagnetic and gravitational fields classification methods using spinor techniques, introducing five dimensional complex linear space with Weyl tensors elements 07 p1337 A70-20302

Class of spaces containing class of order totally paracompact spaces, deriving invariance theorem 09 p1712 A70-22774

Regular C cubed space curve bending in Euclidean 3-space into piecewise helix, considering torsion and curvature 12 p2260 A70-26973

Linear time dependent stochastic optimal control with nonquadratic performance indices using function space approach 12 p2204 A70-27668

Diffusion processes on multidimensional cylindrical phase space for studying stochastic processes for physical systems with angular measurements, developing model for satellite under torque 12 p2273 A70-28067

Optimal control problems solution using Cartesian product of space of right-hand sides of differential equations with Euclidean n space 17 p3129 A70-34868

Feedback control systems synthesis by three parameter space, using two dimensional graphic techniques 17 p3130 A70-35296

Parameter analysis of dynamical systems by matrix approach, using n-dimensional parameter space 17 p3130 A70-35300

Nonlinear approximation under auxiliary conditions in normed space involving minimum solution 18 p3282 A70-36363

Antenna radiation patterns dependence on functional spaces in inverse problem of linear antenna theory, using calculus of variations 19 p3386 A70-37439

Soviet book on dynamic systems with cylindrical phase space covering differential equations with angular coordinates, parameter estimation, multidimensional and discontinuous systems, pendulums, etc 19 p3470 A70-37468

Inequality constrained optimal control problems by function space method, using integral equation representation of second variation 21 p3802 A70-41266

Minimal deviation estimates for linear approximations by seminorms for space defined by differential equations 23 p4210 A70-44018

Weak compactness of set of measures in functional space corresponding to stochastic differential equations solutions for n-dimensional Euclidean space 23 p4212 A70-44341

Isotropic transformation of tensor space, proving theorem for reducing hemitropic function to N invariants of rotations and single vector 24 p4378 A70-45271

Nonlocal continuity and correctness of principle for comparing functions with Liapunov vector function, demonstrating continuous dependence of principle on certain parameters 01 p0130 A70-10151

Autonomous functional differential equations with finite time lag using Liapunov functionals, discussing stability and instability 01 p0132 A70-11070

Book on function theoretic methods for partial differential equations covering complex variables, harmonic functions, envelope method for singularities, operators, etc 01 p0133 A70-11325

Optimization potential selection in control system design by analytical method 02 p0272 A70-12412

R function method for solving plate bending problem by satisfying differential equations coordinates 04 p0767 A70-14489

Monograph on functional analysis and time optimal control as application of mathematics 07 p1322 A70-18857

Optimal control of linear distributed parameter systems using functional analysis 07 p1245 A70-19096

Neumann problem reformulation for regions having boundaries with limited rotation 07 p1325 A70-19538

Sufficient condition for calculus of variations problem, applying results to integrands without partial derivatives 07 p1327 A70-20022

Shallow shells of variable thickness and curvature calculated using small parameter method based on functional analysis 07 p1416 A70-20193

Feedback systems stability treated by functional analysis, describing procedures for generating instability criteria 09 p1654 A70-22348

Analytic systems theory using Volterra calculus of functionals applied to nonlinear differential equations 10 p1908 A70-23845

Continuous media geometry with given discrete structure reduced to analyzing relations between functions in denumerable set of points, presenting selected points of subregions 10 p1954 A70-24016

Narrow throat problems of linear dynamic programming concerning maximum linear functional determination in set of vector functions, giving algorithm for solution 10 p1855 A70-24393

Discrete calculus of variations for optimal control involving use of discrete time sequence and functionals 10 p1910 A70-24702

Mixed boundary value problem for linear parabolic equations with discontinuous coefficients, proving solution existence and uniqueness by functional method 10 p1911 A70-25304

Method of ascent for general representation in boundary value problems associated with differential equation of n variables 14 p2599 A70-30636

Sequential and combined gradient restoration algorithms for functional minimization in control theory 15 p2716 A70-32574

Software reliability program development, functional analysis and error sources 15 p2742 A70-32667

Jacobi conditions for singular optimization problems by transforming singular accessory minimum problem into nonclassical nonsingular form, considering optimal control theory applicability 16 p2885 A70-33331

Unified variational theory of quadratic forms, considering linear functional on real linear space and bilinear and quadratic functionals 17 p3129 A70-34867

Multistage rockets terminal control synthesis based on linear functionals 18 p3333 A70-36163

Book on abstract methods in partial differential equations, covering functional analysis and distribu-

tions, elliptic theory, linear and nonlinear problems, evolution equations, etc 18 p3284 A70-36782

German book on functional theory, Volume 6, tabulating theta and elliptic functions for application to applied physics, potential theory, fluid dynamics and oscillation theory 19 p3459 A70-38600

Characteristic functions for frequency analysis of fringes obtained by time-average holographic interferometry of generalized time dependent optical phase function 20 p3628 A70-39133

Optimal control of distributed parameter systems via functional analysis 20 p3600 A70-39136

Lissajous figures for phase response of N-path signal filter transfer functions, using switched modulators 22 p3998 A70-43256

Non-Chebyshevian moments induced by system of linearly independent functions expanding to semi-infinite programs 23 p4211 A70-44243

Limiting distribution of additive nonnegative continuous functional of homogeneous Markovian process with conditional transfer function 23 p4212 A70-44346

Cauchy problem for singular parabolic equation, establishing existence, uniqueness and representation theorem by integral operator techniques in conjunction with function-theoretic methods 23 p4212 A70-44895

Parameter methods generalization and D decomposition, using function minimization methods 24 p4322 A70-46155

Automatic weather station cost effectiveness criteria based on concepts of loss and error functions 24 p4323 A70-46405

FUNCTIONAL INTEGRATION

Functionally integrated superheterodyne receivers design by applying microwave IC technology, providing weight reduction, interconnecting cables elimination and circuit interface problems minimization 02 p0267 A70-12055

 Functional optimization within partial differential equation solutions class by choosing optimum boundary values
 01 p0131 A70-10922
 Collection of papers on boundary value problems of mathematical physics and related aspects of function theory, Part I
 01 p0131 A70-11066
 Differential properties of class of functions of many real variables
 01 p0132 A70-11067
 Accelerated memory gradient method for minimization of functions with unconstrained variables, investigating generalization of Fletcher-Reeves algorithm
 01 p0132 A70-11194
 Material functions mathematical forms for Green-Rivlin constitutive equations of nonlinear viscoelasticity
 03 p0585 A70-12970
 Laplace transform of piecewise continuous function derivative for application to differential equations
 06 p1164 A70-17428
 Sequential gradient-restoration algorithm for minimization of function subject to constraint
 07 p1325 A70-19355
 Ergodic steady random functions measurement and analysis in terms of statistical properties
 [ONERA-TP-720]
 07 p1411 A70-19825
 Two point boundary value problems of quasi-differential equations, discussing conditions for continuous and increasing lower bounds of functions
 07 p1328 A70-20349
 Conjugate direction procedures for function minimization compared for convergence, recommending modified conjugate gradient procedure
 08 p1535 A70-21875
 Differential calculus for multifunctions using Rastrom embedding theorem for convex sets
 09 p1710 A70-22060
 Iterative technique for determining zero of differentiable function
 09 p1641 A70-22287
 H-function integrals for noncoherent isotropic scattering for two level atom, tabulating numerical values for Lorentz scattering profile
 09 p1727 A70-22506
 Circuit for analog computing system to determine function extremum of many variables in presence of constraints
 11 p2023 A70-25927
 Generalized inverse algorithm for solving linear inequalities from Ho-Kashyap algorithm
 11 p2013 A70-26207
 Relaxation function of linear viscoelastic body, defining mechanical deformation process using Stieltjes integral
 12 p2327 A70-28046
 Elsasser and statistical band models in single parameter functions representing mean absorption in given spectral range
 12 p2191 A70-28295
 Elliptic equations solved by projection network methods noting estimate derivation for convergence rates
 13 p2440 A70-28962
 Random-input describing function as linear approximation to instantaneous nonlinearity in terms of minimum mean-squared error
 13 p2382 A70-29070
 Extrema of functions of many variables in presence of constraints from modified simplex method with variable search step
 13 p2382 A70-29277
 Arbitrary function expansion into series of Legendre functions by generalizing Weyl-Lebedev-Skalaia integral transform
 13 p2441 A70-29312
 Stochastic analog approximation method minimizing criterion functions and for recovering functions from noisy measurements of values in learning systems
 13 p2442 A70-29585
 Uniform function defined throughout plane with isolated singularities at finite distance, obtaining solution uniqueness proof
 13 p2389 A70-29626
 Deflection function for annular plate simply supported and loaded with eccentric concentrated force
 13 p2518 A70-29981
 Penalty functions for state-space constraints elimination in continuous optimal control problems
 14 p2562 A70-31353
 Asymptotic expansion of contour integrals involving analytic functions of complex variable, using steepest descent method
 15 p2767 A70-31696
 Addition theorems for cylindrical functions, discussing applications to shell stress analysis and three dimensional elasticity theory
 15 p2819 A70-32187

Walsh functions and spectrum for signal processing, discussing computer compatibility
 16 p2864 A70-33483

Book on stochastic tools in turbulence covering generalized functions, probability, moments, characteristic functions, Gaussian distribution, random functions and multidimensional fields
 17 p3128 A70-34601

Functional equivalence between FS expression and programs
 17 p3130 A70-35139

Program for function computation replaced by notion of flow algorithm
 17 p3130 A70-35140

Quadratically convergent algorithms for function minimization, discussing unified method and applications to quadratic and nonquadratic functions
 19 p3458 A70-38302

Simultaneous approximation of function and product with given operator, applying to boundary value problems of partial differential equations
 19 p3459 A70-38682

Optimal variable shell thickness, describing numerical solution as function of forces, moments and thickness
 20 p3725 A70-39865

Asymptotic equivalent functions for integral Laplace transformation transition to original in continuous media mechanics
 20 p3726 A70-39873

Polynomial tensor functions generated by vector functions in space of invariants, noting applicability to isotropic media
 20 p3728 A70-39895

Chandrasekhar H function approximation for isotropic scattering, calculating absorption line contours
 22 p4109 A70-43750

Schedule theory problem with redundancy and technological constraints reduced to optimal control problem by penalty function, making maximum principle applicable
 23 p4177 A70-44304

Optimal algorithm for searching extremum of single variable unimodal function satisfying Lipschitz condition based on maximum possible error criteria
 23 p4177 A70-44305

Functions of two variables, using digital method for curve family modeling
 23 p4166 A70-44350

Real functions and sets representation theorems derivation and application to nonlinear programming, using Bellman quasi-linearization technique
 24 p4370 A70-46099

FUNGUS

NT SACCHAROMYCES

NT SPORES

NT YEAST

Flying disability period due to coccidioidomycosis in southwestern U.S., giving recommendations for earlier return to flying duty
 06 p1000 A70-17300

Penicillium mutant chemical stress tolerance in boric acid and potassium chloride selective media, studying carbohydrate and inosine-5-phosphate effects on growth rate
 10 p1811 A70-24325

FUNGICIDES

NT CAFFEINE

NT URIC ACID

NT XANTHINES

FURAN RESINS

NT POLYAMIDE RESINS

FURFURYL ALCOHOL

Ignition delay-reducing catalyst for furfuryl alcohol-red fuming nitric acid hypergolic bipropellant
 13 p2473 A70-29992

FURNACES

NT SOLAR FURNACES

NT VACUUM FURNACES

Small high temperature rotary plasma-heated furnace for refractory material high purity processing, discussing design and operation
 22 p4005 A70-42368

FUSELAGE MOUNTING

U AIRCRAFT PRODUCTION

FUSELAGES

Boron-polyimide composite reinforced Ti fuselage stringers design and test program for SST
 02 p0387 A70-11950

Dynamic stability of flexible aircraft fuselage in controlled supersonic flight at zero angle of attack, basing analysis on elastic oscillation equations
 03 p0579 A70-13418

Three dimensional flow separations on upswept rear fuselages, using flow visualization and pressure measurement
 05 p0790 A70-16097

Friction on fuselage surface layer under static and instantaneous loads without allowance for oscillation
 05 p0856 A70-17015

Pressure distribution and drag for inviscid flow past slender sharp-nosed fuselages and afterbodies at arbitrary transonic Mach numbers
 [AIAA PAPER 70-556]
 13 p2340 A70-29021

Airliner fuselage shape design and effect on manufacturing and flight operation economics
 14 p2532 A70-31369

Ti sheet welded construction for transport aircraft fuselages, assuming use of electron beam and plasma arc equipment
 17 p3198 A70-34452

Fuselage frames minimum weight analysis by automatic iterative method
 [SAWE PAPER 826]
 20 p3733 A70-40370

Swing tail cargo aircraft fuselage section stress analysis by finite element method, discussing displacement models, deformation modes and economics
 21 p3935 A70-41260

Elastic fuselage flight vehicle dynamic stability at supersonic speeds, using automatic pilot stabilization
 23 p4139 A70-44157

FUSES [ORDNANCE]

Protuding, stepped and conical end fittings for confined detonating fuse, discussing assembly procedures effect on characteristics based on statistical scanning test
 03 p0547 A70-14115

FUSIBILITY

Fluid flow visualization in closed channels, using spherules of pulverized fusible materials prepared in swirl injector
 03 p0485 A70-13473

Sodium-titanium-boron-silicate glass opacity and fusibility increase during partial substitution of K for Na, noting phase composition changes
 05 p0871 A70-16598

PbTe-based Sn, Se and Ge alloys lattice constant, thermal EMF and resistance, fusibility and microstructure
 08 p1555 A70-21117

FUSIFORM SHAPES

U CONES

FUSION [MELTING]

Geometrical analysis of partial fusion in earth crust and mantle formation, discussing solid solution and boundaries in MgO-iron oxide-silicon dioxide system
 09 p1670 A70-23398

Plasma torch for increasing material fusion temperatures in metallization methods
 12 p2244 A70-28072

Corrosion resistance of molybdenum coatings on steel and Pb-Bi eutectic alloy obtained by vacuum contact fusion method
 12 p2258 A70-28320

Electron beam welding, explaining high fusion zone homogeneity and weld defect formation by dynamic model
 17 p3100 A70-34637

Al particles fusion during combustion of stoichiometric mixtures of ammonium and potassium perchlorate and polyformaldehyde
 18 p3299 A70-36246

Thermal control through fusible materials for missile S band transmitter package, using computer analysis
 18 p3231 A70-36349

Installed system calibration thermocouples using temperature plateaus due to pure metals melting and freezing heat of fusion
 21 p3823 A70-40857

Linear aliphatic polyesters, calculating conformational contribution to heats and entropies of fusion
 22 p3981 A70-42501

Linear aliphatic polyesters melting point, fusion heat and entropy correlations to molecular parameters
 22 p3982 A70-42502

Al and W specific heat and Al heat of fusion by quasi-adiabatic calorimetry, estimating anharmonic lattice vibrations role via atomic thermodynamic analysis
 23 p4208 A70-44931

FUSION WELDING

NT ARC WELDING

NT BRAZING

NT ELECTRON BEAM WELDING

NT GAS TUNGSTEN ARC WELDING

NT GAS WELDING

NT LOW TEMPERATURE BRAZING

NT PLASMA ARC WELDING

NT ULTRASONIC SOLDERING

Computer program predicting thermal response of fusion welding tooling chill bars and holding fixtures, simulating moving heat source and contact
 08 p1508 A70-21487

Metal matrix fiber reinforced materials bonding, discussing brazing and fusion and diffusion welding
 [ASM PAPER W9-23.2]
 09 p1690 A70-22557

Porosity and intergranular crack formation in tungsten fusion welds using electron fractography
 11 p2059 A70-25666

Fusion welding cooling rates, peak temperatures and heating duration relationships to distance from fusion line predicted by theory for comparison with experiment
 21 p3832 A70-40791

Fracture mechanics application to fusion weld
 [ASME PAPER 70-MET-2]
 22 p4043 A70-42424

Gas porosity in fusion welds of chemical vapor deposited W, noting formation of microfissures due to pore linkup 22 p4046 A70-43149

G-91 AIRCRAFT
VAK 191 B VTOL aircraft fitting NATO Basic Military Requirements for low level reconnaissance-fighter operations developed from Fiat G-91 17 p3017 A70-34992

G-222 AIRCRAFT
Fiat G-222 aircraft featuring high wing twin engine retractable landing gear for military cargo transport 10 p1805 A70-24381

GADOLINIUM
Zeeman interaction for super 8S term in ESR Hamiltonian determined, using trivalent GD magnetic spectrum at eightfold coordinated cubic sites of thorium 02 p0340 A70-12718
Gadolinium ions in zinc tungstate single crystals, studying low symmetry effects on EPR spectrum 08 p1556 A70-21120
Gadolinium II solar lines classification from photographic IR observations 10 p1947 A70-24990

Neutron capture effects in Gd from Norton County meteorite by isotopic composition analysis 12 p2300 A70-27524
Lunar rocks isotopic composition for Gd and variations due to low energy neutron capture produced by cosmic ray interactions 13 p2485 A70-28473

Thermogravimetric analysis (TGA) of gadolinium-doped silver carbonate decomposition, obtaining activation energy, preexponential factor and reaction order 15 p2694 A70-32074

Gadolinium surface work function from contact potential difference against platinum 20 p3687 A70-39996

Electron exchange coupling of Gd and Gd-Y alloy dihydrides from ESR indicating negative hydrogen ion entry 21 p3862 A70-41703

U AMPLIFICATION

GALACTIC EVOLUTION

Statistical relation between radiation power of radio source and distance of center from radio-galactic nucleus, investigating evolution of radio galaxies 01 p0174 A70-10196

Three mode galactic age model for nucleosynthesis of solar radioisotopic material produced by r-processes 01 p0182 A70-10720

Computer model for evolution investigation of disks of stars, discussing methods to obtain gravitational potential 01 p0185 A70-11065

Lemaître universe and galaxy formation effect on stability of quasi-static epoch, deriving limits for red shift, cosmic ray and electromagnetic fluxes 02 p0363 A70-11779

Particle-antiparticle creation in galactic nuclei, expelling particles while retaining antiparticles 02 p0371 A70-12195

Stellar systems evolutionary stages, considering gravitational instability in rotating expanding gas, relaxation, viscosity, transition to metastable state and drift effect on geometry 02 p0376 A70-12445

T and L spiral waves existence in disk galaxies, noting helical and ring structures formation near center from standing waves onset 03 p0564 A70-13223

Magnetic cosmological nonuniformity hypothesis leading to galaxies and clusters isolation 03 p0564 A70-13224

Electron and positron flux steady state in interstellar space relationship to differential energy spectrum exponent in cosmic rays, discussing galactic halo and age 03 p0561 A70-14151

Hydrogen molecule formation relation to galaxy formation, discussing cosmic plasma neutralization role 03 p0577 A70-14152

Protogalaxy formation and molecular processes in primeval hydrogen gas, discussing cold gas cloud cooling mechanism and contraction 03 p0577 A70-14153

Brans-Dicke cosmological gravitational instability using Lagrangian gage for galaxy formation, discussing density contrast growth in time 03 p0577 A70-14154

Protogalaxy mass limits determined for galactic formation by thermal instability due to radiative cooling and followed by nonlinear gravitational contraction 04 p0744 A70-14469

Galactic mass loss by gravitational radiation, discussing galactic expansion and nucleus mass 04 p0752 A70-15068

Mass-energy content of universe, discussing galactic formation in positive energy systems and missing mass problems 04 p0753 A70-15073

Stellar systems dynamics, discussing dynamic interactions of point masses, forces in gravitational field, galactic model construction, etc 04 p0754 A70-15353

Radio galaxy evolution in terms of analysis of relation to superluminous elliptical systems, deriving radio emission duration upper limits 04 p0759 A70-15715

Physical conditions required to explain observations of radio galaxies through electrons of secondary origin, considering spectral characteristics and evolution 04 p0742 A70-15716

Elliptical cosmology, discussing evolutionary geometry, Sygne distribution, galactic age and distance from earth, Friedman equations and independence of constants 05 p0905 A70-15794

Primordial cosmic ray sources evidence suggesting galaxies and quasars in initial stages of formation 05 p0897 A70-15921

Galactic expansion due to mass energy loss by gravitational radiation 05 p0913 A70-16557

Statistical analysis of Zwicky catalog of galaxies and clusters of galaxies, interpreting very distant clusters in terms of intergalactic extinction 05 p0915 A70-16697

Galaxy mass loss on billion year time scale, discussing possibility on basis of bound stellar orbits 06 p1139 A70-17472

Age mixtures and physical heterogeneity of G-M cold stars emphasized in study of galactic fine structure and evolution 06 p1140 A70-17640

Galactic groups age considered in studying radio emission occurrence frequency 07 p1376 A70-18908

Model for gaseous proto-galaxy collapse and formation of spherical galaxy 07 p1390 A70-20287

Age dating of earth and universe emphasizing methods based on radioactivity, discussing stellar evolution, galactic age and assessment of cosmic time 08 p1568 A70-20633

T and L spiral waves existence in disk galaxies, noting helical and ring structures formation near center from standing waves onset 08 p1580 A70-21656

Gravitating bodies quasi-stationary rotating systems, giving equations of state and evolution 09 p1753 A70-22457

Galactic halo origin and evolution postulated from chemical evolution assuming stellar evolution details 09 p1758 A70-22742

Spherically symmetric galaxies dynamic evolution analysis, emphasizing irregular motions description using fluctuating gravitational field hypothesis to construct Markov process 09 p1758 A70-22747

Varying flux density values measured at SHF for radio galaxy PK 0048-09 indicating recent origin of radio source 09 p1764 A70-23790

Gas cloud expulsion from galactic nucleus indicated in 21 cm survey of neutral hydrogen 10 p1937 A70-23948

Gravitational instability theory for large density perturbations growth during expansion of matter without pressure 10 p1945 A70-24961

Nonaxisymmetric free oscillations of self gravitating disk reduced to eigenvalue problem to investigate galactic spiral structures 10 p1917 A70-25207

Soviet literature on galactic origins and physics including radio emission, star formation, quasars, nuclei activity, etc 12 p2307 A70-27868

Nonequilibrium self gravitating medium unified thermodynamics theory based on propagators, describing spatial and temporal fluctuations and coupling for galactic formation 12 p2310 A70-27978

Rotating spherical galaxy evolution, using equations of motion for mass points representing mass distribution 13 p2492 A70-29385

Gas injection model in galactic nuclei from evolving stars, producing high temperature, low density, thermally unstable medium 14 p2639 A70-30730

Galactic formation by spinning core theory, determining core properties by mass, energy and spin fluctuation parameters 14 p2640 A70-30734

Adiabatic relation between initial plasma density perturbations and radiation temperature fluctuations during galaxies formation, discussing relic radiation fluctuations 14 p2632 A70-31286

Dynamic spectrum of density fluctuations and galaxy clustering in Einstein universe, considering self gravitation of medium 14 p2652 A70-31389

Intergalactic gas condensation rates in galactic nuclei, considering recurrent magnetoplasma cores and quasar-like phenomena 15 p2801 A70-32479

Trail formation due to tidal effect in interacting galaxies during close approaches, considering mass flow hydrodynamics 15 p2801 A70-32481

Quasars as protoclusters of galaxies, discussing hypothesis of dense matter cascading fragmentation with subsequent scattering in form dispersing stellar systems 15 p2808 A70-32881

Arp hypothesis regarding radio source ejection from galaxies tested for quasars 15 p2808 A70-32887

Equations of motion and continuity for early and later stages of expanding universe, explaining matter concentration process of galaxy formation 16 p2976 A70-33783

Galactic evolution, reviewing Hubble theory of distances and red shift, Friedman model of expanding universe, big bang model, etc 17 p3168 A70-35328

Spiral galaxies structure, considering maintenance problem and effect of possible gas inflow from intergalactic space 18 p3326 A70-37152

Spiral galaxies pattern statistics, examining morphological type of Milky Way galaxy 18 p3326 A70-37155

Spiral structure gravitational theory, discussing separation between linear and nonlinear effects 18 p3330 A70-37189

Large scale spiral galaxy structure interpretation, examining density wave theory, Milky Way System and spiral form origin 18 p3331 A70-37196

Galactic spiral structure, discussing gravitational theory, pattern origin, radio and optical structure and magnetic field effects 18 p3332 A70-37201

Expansion motions in inner Galaxy, discussing lower velocity absorption features, mass estimation method and model 19 p3522 A70-38602

Galaxies systems dynamic evolution and instability in terms of nuclei division process model, comparing with observational data 19 p3525 A70-38765

Black hole objects in elliptical galaxies, using stellar light and velocity dispersion distribution in nuclear regions for mass limits 20 p3702 A70-39010

Galactic nuclei activity effect on galactic evolution and cosmology, discussing stellar and gaseous components 20 p3707 A70-39938

Supernova remnants catalog based on radio surface brightness, deriving galactic distribution and testing theories for nonthermal radio sources evolution 20 p3709 A70-40077

High velocity intergalactic hydrogen origin, examining galactic evolution by gas infall 21 p3887 A70-41112

Universe density estimation by galaxy formation theory, discussing spiral galaxies intergalactic gas thermal radiation and soft X rays 21 p3887 A70-41113

Total energies of stars with velocities perpendicular to galactic plane, examining absolute luminosities, galaxy size and local gravitational potential 21 p3890 A70-41162

Galactic distribution of supernova remnants and association with pulsars and X ray sources 21 p3892 A70-41188

Galactic evolution and secular variations of cosmic rays, magnetic fields and turbulence, assuming stellar birth rate dependence on gas density and temperature 21 p3919 A70-41700

Stellar system statistical mechanics, discussing collisionless gas in gravitational field, galaxy formation, stellar dynamics, double stars and bounded isothermal spheres 22 p4098 A70-42577

Computer model of self gravitating gas-stars system with spiral structure surviving galactic rotations 22 p4103 A70-42982

Interstellar molecules from stellar and galactic evolution viewpoint, emphasizing OH emission spectrum characteristics 23 p4238 A70-43801

Intergalactic gas condensation rates in galactic nuclei, considering recurrent magnetoplasma cores and quasar-like phenomena 23 p4240 A70-43904

Trail formation due to tidal effect in interacting galaxies during close approaches, considering mass flow hydrodynamics 23 p4240 A70-43906

Statistical estimates of precessional corrections, solar motion and galactic rotation from proper motions 23 p4246 A70-44752

Big bang temperature problem, discussing galactic masses determination possibility by gravity-strong interactions interplay in early stages 24 p4403 A70-45402

Galactic evolutionary models using disklike Riemann ellipsoids with internal motions and gravitational gas equilibria 24 p4410 A70-45759

High luminosity M type star photometry, determining supergiant intrinsic properties, interstellar extinction mean law and galactic evolution 24 p4410 A70-45764

Atmospheric composition of cool stars in relation to nucleosynthesis and galactic evolution 24 p4414 A70-46227

GALACTIC MAGNETIC FIELDS

U INTERSTELLAR MAGNETIC FIELDS

GALACTIC RADIATION

NT GALACTIC RADIO WAVES

Galactic water vapor line emission observations indicating short term variability in spectra of several sources 01 p0182 A70-10722

Cosmic ray gas galactic effects, discussing galactic magnetic field, hydromagnetic wave propagation, etc 02 p0361 A70-11749

Galactic interstellar absorption lower limit in selected Area 19 determined from Stellar spectra densities, using Schmidt camera 02 p0370 A70-12073

IR observations for position of hypothetical Seyfert-like nucleus explaining M82 polarization pattern 02 p0372 A70-12246

Galaxy model formulated in cylindrical coordinate system using Fokker-Planck equation for cosmic radiation particles propagation, discussing trajectories of high energy particles 03 p0553 A70-12880

IR flux variations from Seyfert galaxy NGC 4151 nucleus, using telescope 03 p0562 A70-14221

Long term behavior of blue photographic luminosity of Seyfert galaxy 3C 120 nucleus, considering similarity to quasar 3C 273B 04 p0748 A70-14589

Galactic cosmic rays scattering by solar wind magnetic field fluctuations, considering energy and momentum transfer 04 p0739 A70-14596

Galactic cosmic ray origins, discussing supernovae and galactic nucleus cosmic ray production 04 p0740 A70-15071

Gamma rays due to cosmic ray electrons bremsstrahlung in interstellar medium, predicting diffuse galactic X ray flux 04 p0742 A70-15713

Galactic X rays and high energy gamma rays in terms of cosmic ray electrons Compton scattering by submillimeter radiation 05 p0900 A70-16100

Galactic synchrotron emission and diffuse X ray background, noting correspondence between spectral indices of radio and X ray emissions in polar directions 05 p0913 A70-16472

Radio emission distribution from supernova remnants and galactic magnetic field 06 p1139 A70-17323

Galactic cluster A 262 luminosity function constructed from integral magnitudes of component galaxies obtained from continuous observations 07 p1376 A70-18904

Solar wind, using data on solar and galactic cosmic rays in interplanetary space 07 p1366 A70-19030

Solar wind effects on galactic cosmic rays isotropic diffusion and density distribution in interplanetary space in presence of azimuthal asymmetry 07 p1366 A70-19429

Galactic cosmic rays intensity long term modulation, studying roles of solar corona, solar wind and interplanetary electromagnetic field 07 p1369 A70-20075

Solar wind interaction with galactic cosmic radiation resulting in wind radial motion braking, discussing possible solar wind focusing 07 p1373 A70-20343

Ultrahigh energy primary cosmic rays model, considering galactic origin and energy spectrum 08 p1560 A70-20479

Solar modulation of low energy galactic cosmic ray protons, proposing diffusion-convection model with time dependent diffusion coefficient 08 p1561 A70-20906

Anomalous microwave recombination line at 11 cm detected in NGC 2024, Orion A, and IC 1795, discussing peak antenna temperature 08 p1576 A70-21399

Far IR radiation at galactic center suggested as thermal emission by dust particles 09 p1744 A70-22502

Angular size measurement for galactic X ray sources in Sagittarius region using modulation collimator aboard sounding rocket 09 p1744 A70-22521

Low energy positrons and gamma rays from large fluxes of galactic cosmic rays 09 p1746 A70-23477

Optically variable compact galaxy with broad emission lines similar to Seyfert and N-type galaxies, noting no stellar contribution in continuous spectrum 09 p1765 A70-23808

Hydrogen 109 alpha recombination line emission in galactic H II regions surveyed at National Radio Astronomy Observatory 10 p1936 A70-23942

Galactic radio source W 31 distance from sun determined from measurements of OH, H I and formaldehyde absorption lines 10 p1937 A70-23949

Gamma ray astronomy above 10 Mev, investigating intensity dependence on galactic latitude and radiation detection technology 10 p1931 A70-24067

Spectral lines and radial velocities of paired galaxies, noting red shift difference between emission and absorption lines 10 p1946 A70-24978

Alpha recombination line emission from galactic center detected, discussing possible origins in continuum source or interstellar medium 10 p1947 A70-24995

IR luminosity of galactic nucleus from far IR observations, noting considerations favoring nonthermal model consisting of multiple sources 10 p1947 A70-24996

Continuum spectra of well-resolved thermal and nonthermal galactic sources compared with H-alpha recombination line 12 p2296 A70-26898

X ray source from Coma cluster of galaxies, interpreting observed flux on basis of missing mass suggested by Virial theorem 12 p2293 A70-27388

Diffuse galactic radiation and absorbing clouds luminance illuminated by integral stellar radiation in Milky Way 12 p2307 A70-27866

Integral color indices relation to spectral type on NGC 3077 and M82 galaxies 12 p2308 A70-27871

Cosmic rays origin, discussing choice between galactic halo and radio disk models for trapping region 12 p2295 A70-27883

Absolute sky brightness temperatures measured with horn antennas and Dicke receivers, indicating spectrum change due to galactic nonthermal radiation 12 p2309 A70-27893

Compton electron scattering generated galactic gamma ray flux effects on diffuse IR 13 p2476 A70-28630

Cosmic rays and cosmic X rays, considering galactic and extragalactic sources, diffuse background, detection devices, etc 13 p2477 A70-29160

Galactic X ray stars and X ray sources positions, appearance frequency and intensities 13 p2495 A70-29818

Cosmic ray energy spectrum in absence of solar activity from eleven year ray variations, noting coincidence with galactic rays 14 p2630 A70-30204

Diffusion loss model for cosmic ray electron propagation in galaxy, considering direct and radio observations 14 p2631 A70-30538

Galactic cosmic ray actions on interstellar medium for origin of Li, Be and boron in stellar atmospheres and solar system 14 p2640 A70-30786

Cosmic IR radiation sources, discussing galactic and stellar masses 14 p2632 A70-30882

M31 continuum radio emission produced by magnetic field aligned along arms, discussing field turbulence effects 14 p2642 A70-30891

Galactic cosmic rays high altitude measurements by balloon-borne Sparmu type multidirectional detectors, revealing azimuthal anisotropy 14 p2632 A70-31309

Galactic cosmic rays origin in terms of statistical mechanical model of supernova explosions 15 p2799 A70-31793

Galactic abundances and cosmic ray spectra by IMP-4 satellite, obtaining He ratio 15 p2793 A70-31794

Book on nonthermal processes in galactic and extragalactic radio sources covering plasma behavior in magnetic field, energy redistribution in spectrum by electron scattering, etc 15 p2799 A70-31999

Galactic gamma rays from OSO-3 observations attributed to decay of neutral pions produced by cosmic rays interaction with interstellar gas nucleons 17 p3150 A70-34567

Galactic cosmic rays eleven year modulation, determining modulating region L depth from dynamical phase lag between changes in cosmic ray intensity and solar activity 17 p3150 A70-34833

Galactic UV emission attributed to solar radiation scattered by hydrogen atoms, using Mariner 5 measurements 17 p3163 A70-34902

UV background radiation observed above atmosphere for intergalactic gas, Galaxy and subcosmic ray components 17 p3163 A70-34903

Large anisotropy observed for gravitational radiation detector intensity as function of sidereal time, suggesting source from galactic center 17 p3137 A70-35725

Galactic center region lunar occultations in 21 cm neutral hydrogen line 18 p3313 A70-36328

Diffuse cosmic X ray background galactic component, using model to predict angular spread 18 p3308 A70-36484

Solar wind effects on galactic cosmic rays isotropic diffusion and density distribution in interplanetary space in presence of azimuthal asymmetry 18 p3309 A70-36903

Extragalactic objects 3C 273 NGC 5128 and M87 X ray emission detection, using proportional counters on Aerobee 150 rocket 18 p3310 A70-37016

Galactic 21 cm line emission motion picture film, discussing contour maps on neutral hydrogen distribution 18 p3327 A70-37163

Neutral hydrogen distribution in galactic region surveyed with radiotelescope 18 p3328 A70-37169

Integrated Milky Way spectrum, examining composition and galactic structure in solar neighborhood 18 p3329 A70-37182

Carina spiral feature progress report covering O and B star distribution, optical and radio H 2 and H I sources and cosmic dust 18 p3330 A70-37185

Low energy solar and galactic cosmic rays propagation in interplanetary medium observed by Zond and Venus space probes, discussing shock waves retardation 19 p3493 A70-37475

Water vapor and OH spectra overlap, investigating association of galactic OH masers and water emission sources with IR stars 19 p3444 A70-37571

Galactic plane hard X ray emission measurements, considering gamma and X ray origin from Compton scattering of photons by galactic electrons 19 p3497 A70-38023

Metagalactic and galactic sources of cosmic rays, including composition, electron spectra and radio emission 19 p3500 A70-38077

Extraterrestrial gamma radiation from Cygnus region of galactic disk, using OGO-5 observations 19 p3501 A70-38087

High energy gamma ray flux enhancement towards galactic plane from OSO-3 particle telescope observations 19 p3501 A70-38089

Galactic low energy cosmic ray positrons and gamma rays, considering production mechanism in interstellar space 19 p3503 A70-38099

High energy galactic gamma ray and X ray flux explained by cosmic ray electron scattering 19 p3504 A70-38112

High energy galactic gamma rays photons, suggesting two-component cosmic ray source model 19 p3505 A70-38115

Traversed matter thickness and charge composition for high energy galactic cosmic rays with various propagation modes 19 p3506 A70-38123

Galactic cosmic ray energy spectra of light and medium nuclei from IMP-4 satellite measurements, investigating L/M ratio 19 p3506 A70-38124

Low energy galactic cosmic radiation energy spectra and charge composition in 2-14 Z range by OGO-5, suggesting two component model for origin 19 p3507 A70-38127

Galactic cosmic rays temporal and spatial variations in solar system, discussing nuclear active particles and spallation products depth distribution in meteorites 19 p3509 A70-38143

Cosmic ray lifetime, investigating radioactive Be 10 nuclei decay effects on intensity ratios Be/B and Be/Li, suggesting nuclei confinement to galactic disk 19 p3509 A70-38148

Sideral daily variation in cosmic ray muon intensity at 60 mwe depth, indicating extragalactic origin 19 p3509 A70-38149

Galactic cosmic ray anisotropy, discussing amplitude and phase values of daily sidereal variation 19 p3510 A70-38152

Galactic disk model for confinement of cosmic ray electrons, assuming isotropic background radiation 19 p3510 A70-38156

Cosmic rays propagation and production in Milky Way galaxy, using equilibrium model 19 p3510 A70-38157

Cosmic rays relationship to cosmological parameters and galactic radiation source evolution 19 p3511 A70-38160

Sbc galaxy NGC 7320 radio emission and neutral H observations, showing improbability of physical association with Stephan Quintet by distance measurement 19 p3524 A70-38699

Galactic cosmic rays lifetime based on nuclei and matter interactions, discussing ionization losses effect 20 p3695 A70-38965

X ray emission mechanisms in galactic sources, considering black body, supernova remnants, synchrotron radiation, etc 21 p3874 A70-40679

Diffuse cosmic X rays, discussing energy spectrum and contribution of galactic integration 21 p3875 A70-40686

Galactic or extragalactic origin of diffuse X ray background, reporting sky survey results 21 p3875 A70-40688

High energy galactic gamma rays search onboard OGO-5, tabulating results 21 p3876 A70-40690

Galactic gamma ray intensity near Cygnus by OGO-5 spacecraft-borne telescope with acoustic spark chamber, discussing source intensity 21 p3876 A70-40691

Soft X ray background galactic absorption and intensity measurements indicating inverse relation to columnar atomic hydrogen density 21 p3877 A70-40698

Galactic gamma ray sources model with magnetic fields concentration in expanding shell, suggesting production by neutral pion decays in supernova remnants 21 p3877 A70-40701

Galactic K series emission at 1-10 kev by low energy cosmic rays and diffuse X rays interaction with H I region heavy ions 21 p3877 A70-40704

Soft X ray flux emanation from galactic disk, discussing latitude dependence, interstellar H, maps and discrete sources nature and properties 21 p3878 A70-40707

Gamma ray background anisotropy effects of Sgr A flux arising from Compton scattering and neutral pion decay, discussing complex radio and IR structure 21 p3878 A70-40926

M87 radio observations at 5 GHz, examining central region components, optical nucleus and jet and X ray emission 21 p3923 A70-42103

Galactic X ray background due to inner bremsstrahlung associated with suprathermal particles, taking into account interstellar gas self absorption and ionization rate 22 p4093 A70-42465

Galactic center region gamma radiation observations, discussing intensities, energy spectrum and decay 22 p4093 A70-42927

Forbidden iron emission lines excitation in Seyfert galaxies, discussing various mechanisms 22 p4102 A70-42977

Alpha hydrogen recombination lines 156, 166, 167 and 168 from galactic center, using radio telescope 22 p4103 A70-42980

Galactic soft X ray and subcosmic ray heating and ionizing of interstellar H I regions 22 p4094 A70-42985

Extragalactic variable radio sources as clue for quasars and galactic nuclei energy, using long baseline interferometry 22 p4105 A70-43226

Cosmic rays galactic propagation and confinement, discussing matter and star distributions, magnetic fields, positron flux and energy spectrum, etc 22 p4096 A70-43396

Outer space galactic cosmic rays energy spectrum and modulation region boundary determination, using meteorite observations 23 p4236 A70-44050

Interplanetary magnetic field inhomogeneities structure from galactic cosmic rays intensity fluctuations observation 23 p4237 A70-44053

Radio astronomy research covering solar radio emission, Milky Way radiation, molecular radio line spectra, etc 23 p4256 A70-45041

Excess galactic X rays, discussing synchrotron emission of high energy cosmic ray electrons 24 p4398 A70-46161

Discrete source interpretation of isotropic component of diffuse gamma radiation in Milky Way galaxy 24 p4398 A70-46166

Cosmic ray energy spectrum in absence of solar activity from eleven year ray variations, noting coincidence with galactic rays 24 p4398 A70-46279

GALACTIC RADIO WAVES

Extraterrestrial sources radiation including galactic, solar and magnetospheric radio emissions observed by RAE-I satellite at long wavelengths [AIAA PAPER 69-1049] 01 p0170 A70-10603

Galactic water vapor radio sources spectral observation suggesting correlation between time variation and polarization 04 p0747 A70-14547

Galactic clusters analyzed for identifying possible relationship between cluster configuration, type of component galaxies and radio emission 07 p1376 A70-18907

Galactic groups age considered in studying radio emission occurrence frequency 07 p1376 A70-18908

Mass to luminosity relations in RF region derived from data for nearest galaxies 07 p1383 A70-19404

Zero radiospectrometer for spectral observations of radio emission of excited galactic hydrogen at centimeter wavelength, noting Omega nebula detection 08 p1495 A70-21063

Cosmic electron detection and measurement techniques, considering presence in solar system, interstellar space and metagalaxy and galactic continuum radio emission 12 p2293 A70-27572

Galactic noise and solar type 3 bursts using Alouette 2 satellite HF receiver voltage recordings 12 p2226 A70-28065

Galactic noise spectrum and solar radio bursts in hecto-decimeter wave region observed by Alouette 2 satellite 13 p2491 A70-29093

Galactic continuum surveys at 8000 MHz by radio telescope, noting North American nebula and Cyg X region 13 p2491 A70-29096

Galactic hydroxyl emission sources right ascensions, presenting coordinates and antenna temperature measurements 15 p2796 A70-31594

Galactic radio radiation observations at 610 MHz, using corner reflector antenna 18 p3313 A70-36331

Physical processes in galactic and extragalactic sources of nonthermal radio emission, assuming pulsars as principal magnetic field and cosmic rays sources 18 p3321 A70-37126

Galactic radio corona existence, measuring northern galactic hemisphere sky brightness and cosmic ray distributions 18 p3322 A70-37129

Milky Way galaxy continuous background radio emission observed at various longitude intervals 18 p3322 A70-37130

Galactic hydroxyl emission sources right ascensions, presenting coordinates and antenna temperature measurements 23 p4242 A70-44277

GALACTOSE

Retention times and gas chromatographic conditions for resolution of galactonic and gluconic acid derivatives 16 p2855 A70-33064

GALAXIES

NT ANDROMEDA GALAXIES

NT MILKY WAY GALAXY

NT RADIO GALAXIES

NT SPIRAL GALAXIES

Velocity field measurements in NGC 5128 galaxy, discussing relative motion between gas and stars and correspondence of emission and absorption lines 01 p0184 A70-10898

Quasars radio emission tabulated, showing quasar B264 as member of galactic cluster 02 p0372 A70-12244

IR observations for position of hypothetical Seyfert-like nucleus explaining M82 polarization pattern 02 p0372 A70-12246

Blast wave model for galaxy M82 explosion using Sedov self similar solutions, indicating line excitation

mechanism origin in shock wave heating and compression 02 p0372 A70-12247

Soviet collection of articles on structure and dynamics of stellar systems, Part 2 02 p0375 A70-12442

Discrete statistical stellar system relation existence with continuous model proved by introducing unique volume concept for discrete systems 02 p0376 A70-12443

Self gravitating galaxies theoretical properties, including structural and dynamic characteristics of interacting and colliding galaxies 02 p0376 A70-12444

Statistical analysis of position angles of Berenice cluster galaxies, estimating mass, expansion, rotation period and age 02 p0376 A70-12448

Isophote flattening functions of elliptical galaxies including identification of giant and dwarf galaxies 02 p0377 A70-12449

T and L spiral waves existence in disk galaxies, noting helical and ring structures formation near center from standing waves onset 03 p0564 A70-13223

IR flux variations from Seyfert galaxy NGC 4151 nucleus, using telescope 03 p0562 A70-14221

Correlation function for spatial distribution of galaxies determined as function of inverse distance between galaxies 04 p0744 A70-14470

Double galaxy systems hypothesis with tidal interaction, presenting data from galaxy internal motion studies 04 p0747 A70-14519

Compact radio source in M87 nucleus observed with long base line interferometer composed of two telescopes, suggesting diameter 04 p0747 A70-14546

Models of partially relaxed stellar disks in galaxies, discussing gravitational instability and stellar velocities 04 p0748 A70-14588

Neutral H study of binary galaxies showing departures from circular symmetry, suggesting model involving hydromagnetic interaction 04 p0759 A70-15709

Tabular results of Galaxy mean and angular diameters and smallest/largest ratios measured on Palomar Atlas 05 p0906 A70-15797

Group velocity of spiral density waves propagating in disk galaxies implying self destruction, discussing possible replenishment sources 05 p0919 A70-16929

Galaxies statistical distribution studied to determine superclusters existence, correlating results with random distribution expectations 07 p1375 A70-18868

Galactic cluster A 262 luminosity function constructed from integral magnitudes of component galaxies obtained from continuous observations 07 p1376 A70-18904

Hydromagnetic self gravitating galactic slab embedded in halo, deriving stability criteria using models of magnetic field 07 p1390 A70-20293

Galactic longitude interval region radio telescope observations, obtaining isophotes of brightness distribution of RF spectral line of neutral H and continuous spectrum 08 p1564 A70-20551

T and L spiral waves existence in disk galaxies, noting helical and ring structures formation near center from standing waves onset 08 p1580 A70-21656

M87 jet, using theoretical model and observed emission lines for heating, cooling, ionization, cosmic ray proton regeneration of optical electrons, X radiation, etc 09 p1754 A70-22501

Quasar sky distribution as function of apparent magnitude for identification with galaxies of origin 09 p1759 A70-22909

Oscillations stability along symmetrical axis in galaxies analyzed by Jacobi and Lagrange equations, obtaining cylindrical coordinates upper and lower limits 09 p1761 A70-23052

Compact galaxies, discussing distribution, integral photometry and isophotometry, brightness outbursts, etc 09 p1763 A70-23373

Optically variable compact galaxy with broad emission lines similar to Seyfert and N-type galaxies, noting no stellar contribution in continuous spectrum 09 p1765 A70-23808

Interstellar flights, discussing human limitations, star systems with habitable planets and possible galactic communities 10 p1943 A70-24759

Noncircular ionized gas motions in NGC 253 central region observed in velocity field analysis, indicating outflow from center

10 p1946 A70-24979

Coma cluster of galaxies morphological and statistical characteristics, determining major and minor axes

10 p1948 A70-25194

Faint violet stars in southern galactic latitudes found during scanning of two color plates including halo stars, subdwarfs, white dwarfs and quasi-stellar galaxies

10 p1949 A70-25248

Stellar hydrodynamic equations for thin disk galaxy derived from collisionless Boltzmann equation moments

11 p2117 A70-26688

X ray source from Coma cluster of galaxies, interpreting observed flux on basis of missing mass suggested by Virial theorem

12 p2293 A70-27388

Nonthermal radiation effects on emission line spectra of Seyfert galaxies and quasars determined from ionization equilibrium of gas envelope

12 p2293 A70-27585

Soviet literature on galactic origins and physics including radio emission, star formation, quasars, nuclei activity, etc

12 p2307 A70-27868

Integral color indices relation to spectral type on NGC 3077 and M82 galaxies

12 p2308 A70-27871

Self gravitating collisionless particles instability related to anisotropic random velocity distribution function in presence of disk-galaxy type spiral wave perturbations

13 p2492 A70-29299

Galaxies rotation, applying optical and radio data to statistical analysis of angular velocities and periods

13 p2492 A70-29386

Absolute magnitudes of first brightest galaxies in rich clusters from luminosity model, allowing for mass variation

13 p2495 A70-29795

Gas injection model in galactic nuclei from evolving stars, producing high temperature, low density, thermally unstable medium

14 p2639 A70-30730

Radio sources spectroscopy, discussing central density and mass of elliptical galaxy NGC 3998 and red shifts of radio galaxies

14 p2642 A70-30893

Third integral of stellar dynamics, considering Contopoulos galactic system model separability

14 p2651 A70-31288

Cosmogenic phenomena instability, discussing red shift, expanding universe, galactic nuclei and quasars

15 p2800 A70-32144

Galactic masses and mass-luminescence ratios from motions data

15 p2801 A70-32480

Galactic longitude interval region radio telescope observations, obtaining isophotes of brightness distribution of RF spectral line of neutral H and continuous spectrum

15 p2805 A70-32706

Galactic composition differences, considering stellar and galactic nucleosynthesis

16 p2976 A70-33791

Red shift absorption systems ions related to intergalactic medium properties in clusters of galaxies

17 p3153 A70-34526

Disturbances rotational alignment in variable galaxies nuclei, using interstellar gas motions model

17 p3153 A70-34527

Giant E and SO galaxies, discussing radio spectra, emission characteristics and brightness distributions

18 p3313 A70-36332

Galaxies and globular clusters, obtaining data by measurements with intermediate bandpass photometry

18 p3321 A70-37121

Galaxies pairs motions, considering disintegrating, rotational and oscillatory types for comparison with observational data

18 p3322 A70-37133

Stellar magnitude equation from corrected catalog data to determine absolute proper motions relative to galaxies

18 p3323 A70-37145

Kinematics of M 33, M 51 and large Magellanic cloud (LMC)

18 p3326 A70-37157

Stellar velocity field in M 51 from image tube spectra

18 p3327 A70-37158

Flat model galaxy stability, examining unstable two armed density wave by numerical methods

18 p3330 A70-37190

Large scale galactic oscillations, discussing observational evidence and theoretical modal calculations

18 p3330 A70-37191

Galactic rotation law parameters determination, considering effect of random and systematic errors on accuracy

19 p3525 A70-38774

Black hole objects in elliptical galaxies, using stellar light and velocity dispersion distribution in nuclear regions for mass limits

20 p3702 A70-39010

Image tube observations of Large and Small Magellanic Clouds and southern planetary nebulae at Cerro Tololo Observatory

20 p3705 A70-39480

Oscillation stability of stars moving along axis of symmetry in galaxy, discussing first order orbit perturbations in general resonance case

21 p3884 A70-40873

Stellar polarization measurements in Magellanic Clouds, tabulating position, magnitude, spectral type, percentage polarization and electric vector position angle

21 p3922 A70-41979

Preferential galactic orientation based on inclination statistics of predominantly elliptical clustered nebulae

22 p4099 A70-42627

Star content in Small Magellanic Cloud wing counted to determine detachability from tidal arm and main body

22 p4099 A70-42628

Galactic noncircular velocity fields, discussing statistical correlation with radio luminosity, nuclear brightness and total mass

22 p4100 A70-42844

Galactic rotation model derived from radial velocities and spectrophotometric distances of H II regions

22 p4101 A70-42864

Galactic masses and mass-luminescence ratios from motions data

23 p4240 A70-43905

High velocity stars in Large Magellanic Cloud from spectroscopic observations, including A dwarfs and G-K giants

23 p4240 A70-44212

Extragalactic astronomy research covering quasars, Seyfert and related galaxies, cosmology, Magellanic Clouds, supernovae, etc

23 p4256 A70-45040

Extragalactic radio source optical identifications showing association with quasars or Seyfert galaxies nuclei

24 p4413 A70-46168

GALAXY AIRCRAFT U C-5 AIRCRAFT GALERKIN METHOD

Galerkin method applied to boundary layer flows, considering transport problems in unbounded domains

01 p0066 A70-11129

Bubnov-Galerkin approximations convergence in problem of thin plate nonlinear vibrations, allowing for inertial forces due to rotation

03 p0593 A70-13470

Galerkin method to formulate buckling problem of homogeneous and fiber reinforced anisotropic plates simply supported under uniform membrane loads

06 p1160 A70-17313

Buckling behavior of elliptical cylinders under normal pressure using linear thin shell theory and Galerkin method, compared with test results

06 p1169 A70-18038

Buckling of clamped skew plates under uniform system of applied stress using Galerkin method

07 p1406 A70-19339

Finite element solution procedures for inextensible beams elastica problem, using galerkin method for element stiffness matrices

11 p2143 A70-26640

Coordinate function selection for boundary value problems solution by Galerkin method demonstrated for heat conduction equation of anisotropic parallelepiped with internal source

12 p2271 A70-27291

Nonlinear equations boundary value problem solution by Galerkin method in integrodifferential equations form, determining Lipschitz conditions constant and proving existence and uniqueness

13 p2442 A70-29513

Incompressible solid propellant rocket charges axisymmetric problems, using Galerkin stress functions

14 p2657 A70-30772

Circular cylindrical shells with clamped ends, investigating supersonic panel flutter by two mode approach and Galerkin method

17 p3184 A70-34695

Incompressible laminar boundary layer equations approximate solution by Galerkin-Kantorovich technique

18 p3238 A70-35972

Elasticity theory for circular cylinder weakened by cavities, discussing boundary conditions on butt ends and Galerkin solutions

23 p4265 A70-43983

Fundamental error in Galerkin method application to bending problem of elastic rods

23 p4268 A70-44172

Rectangular cable networks covered by or embedded in membrane matrix, calculating vibration response under load by Galerkin method

24 p4421 A70-45279

Cylindrical shells dynamic thermoelastic response to sudden rotating thermal inputs, using Galerkin method

24 p4421 A70-45285

Low gravity fuel sloshing in axisymmetric rigid tank, calculating oscillations by modified Galerkin method

24 p4324 A70-45292

GALLIUM

Gallium found suitable for doping cadmium/tin arsenide semiconductor, exhibiting hole-type conductivity

01 p0156 A70-10214

Low speed Ga lubricated sliding electrical contacts of Be in vacuum, discussing Ga film role in friction and contact resistance

01 p0099 A70-10325

Brittleness of joints using Ga solders prevention by high temperature annealing noting application to aluminum alloys

05 p0855 A70-16199

Far IR radiation transmission through bismuth and gallium normal and superconducting thin films, considering transition temperature role

09 p1739 A70-22323

Al, Ga and In effects on creep and rupture stress of Ti at 500 C

17 p3120 A70-34425

Solar Ga abundance from spectral synthesis of region around 4172 A line

18 p3316 A70-36894

Fe meteorites with high Ge content, tabulating concentrations of Ni, Ga, Ge and Ir

23 p4241 A70-44259

GALLIUM ANTIMONIDES

Miniature electromechanical gallium antimonide tunnel diode transducer theory fabrication and performance

12 p2236 A70-28055

N-type Te-doped gallium antimonide conversion to p-type by electron irradiation, noting thermal conductivity variations

13 p2470 A70-29167

Ternary phase diagram of liquid epitaxially grown gallium arsenide antimonide, considering use as high quantum efficiency long wavelength photoemitter

15 p2782 A70-31758

GALLIUM ARSENIDE LASERS

GaAs injection laser operated with external optical resonator for diffraction-limited radiation, considering peak power and quantum efficiency

02 p0311 A70-11920

IR light beam modulation in Gunn oscillator near fundamental edge of GaAs, investigating mechanism

03 p0539 A70-13160

Frequency pulling and pulse position modulation of CW GaAs injection lasers by locking signal frequency variation

03 p0502 A70-13815

Simple approximations for threshold current, gain and lasing frequency of GaAs injection laser at room temperature

03 p0503 A70-14085

UHF self modulation in GaAs laser coupled to external cavity, focusing convergent beam on external mirror

04 p0701 A70-14718

Rate equation analysis of steady state behavior of double cavity GaAs diode laser, noting solution stability by perturbation method

04 p0703 A70-15618

Self induced light pulses from GaAs injection lasers in pulse driven diodes at liquid nitrogen temperatures, noting pulse width and frequency

04 p0703 A70-15623

Collection of papers on GaAs lasers covering injection lasers, p-n junction lasers, GaAs preparation and properties, laser applications, etc

07 p1297 A70-19394

GaAs p-n junction lasers operating properties under ideal and thermal conditions

07 p1298 A70-19396

GaAs lasers fabrication, discussing p-n junctions formation, laser die mounting, low resistance electrical contacts, optical cavities, etc

07 p1298 A70-19398

GaAs diode amplifiers and switching devices behavior, describing optical coupling between two GaAs lasers

07 p1241 A70-19399

GaAs laser and laser array applications, discussing pulse generators, laser cooling, laser optics, detectors, etc

07 p1298 A70-19400

CW GaAs junction laser bistable operation due to saturable absorbing centers in active medium

08 p1513 A70-21598

GaAs-Ge platelet laser output, observing absorption edge dynamic Burstein shift

09 p1697 A70-22920

Self stabilization and narrowing of optical pulses from GaAs junction lasers by regenerative feedback of oscillations in injection current

09 p1697 A70-22921

CRT laser with gallium arsenide crystal excited by electron gun, describing output characteristics

09 p1698 A70-23161

Second harmonic emission from GaAs injection laser and from stimulated KDP crystal at room temperature

12 p2245 A70-27306

Waveguide optical properties effect on injection GaAs laser threshold lasing and field distribution in near/far zones for various parameters of active region

12 p2246 A70-27365

Gallium arsenide laser with external mirror excited by electron beam, measuring radiation patterns

12 p2247 A70-27482

Laser tracking system for space guidance, describing equipment and operations

[ALAA PAPER 69-870] P-type GaAs laser diodes spontaneous emission power temperature dependence, considering radiative recombination mechanism

13 p2447 A70-28529

Modulation phase distribution over emitting surface of p-n junction GaAs laser at micron wavelength

13 p2431 A70-29866

GaAs junction lasers output oscillations, analyzing time dependent equations for low temperatures

13 p2378 A70-29545

Injection semiconductor lasers emission characteristics, discussing gallium arsenide diodes, nonlinear losses in pulsed mode, laser interactions, etc

15 p2749 A70-31453

Lasers and GaAs diode emitters near IR radiation intensity distributions, using IR films and IR display phosphors

15 p2753 A70-32607

GaAs injection lasers for optical communication, synthesizing high bit rate data link between synchronous relay satellites

16 p2865 A70-33710

Gallium arsenide laser ranging system for helicopters obstacle warning

17 p3103 A70-34720

GaAs laser with inhomogeneous injection, noting instability of stimulated RF oscillations

17 p3108 A70-35631

Close-confinement LPE /AlGaAs junction laser properties, examining range of alloy direct bandgap transition

18 p3268 A70-36727

Gain and loss processes in GaAlAs-GaAs heterostructure lasers as functions of current and cavity length

18 p3268 A70-36728

CW GaAs junction lasers bistable operation above delay transition temperature based on double acceptor trap theory

18 p3268 A70-36729

Spontaneous emission spectra and band tailing from GaAs laser diodes fabricated by vapor phase epitaxy with compensation in p-type side of junction

18 p3268 A70-36730

Reflectivity effect on external quantum efficiency of Fabry-Perot type GaAs injection lasers

18 p3268 A70-36731

Resonant modes of GaAs junction laser beams with Hermite-Gaussian rectangular symmetry, using stripe geometry with lens-slit combination

18 p3268 A70-36732

Microwave self modulating GaAs diode laser, showing coupled external cavity resonator influence on intrinsic resonance frequency

18 p3269 A70-36733

Self induced intensity pulsations frequency stabilization and narrowing in continuously operating GaAs injection lasers

18 p3269 A70-36734

Self induced sustained light pulsations from GaAs injection lasers with tandem double section stripe geometry based on repetitively Q switched model

18 p3269 A70-36735

Pulsed GaAs injection lasers second harmonic generation with nonlinear crystal alpha iodic acid phase matched by angular tuning

18 p3269 A70-36737

GaAs lasers with light propagation along curved junctions, discussing threshold current density variation with radius of curvature

18 p3269 A70-36738

Electron energy effect on output power and beam divergence of electron beam pumped GaAs lasers

18 p3269 A70-36740

CW multifilament GaAs laser diodes measurement, showing cross correlation between light and current noises

18 p3270 A70-36742

GaAs laser diodes thermal degradation, observing nature, extent and occurrence of permanent damage

19 p3446 A70-37818

Gallium aluminum arsenide-GaAs laser diodes properties and applications for CW operation, discussing p-GaAs layer thickness effects

19 p3447 A70-38454

Recombination lifetime /laser/ states in Si doped GaAs light emitting diodes on p-type thin platelets

21 p3838 A70-42016

GaAs laser and noncoherent IR emitting diodes fabrication and design, discussing card readers, encoders, alarms, range finders, bomb fuses and night vision systems

22 p4050 A70-43248

GaAs injection lasers, calculating effect of active region displacement from p-n junction waveguide on wave generation

23 p4203 A70-45074

CW GaAs semiconductor laser fabrication by liquid epitaxy, noting Ag plating role in output power

24 p4352 A70-45468

High efficiency gallium arsenide IR illuminators, comparing dome diodes fabricated from diffused or Si doped solution grown materials

24 p4319 A70-45784

GALLIUM ARSENIDES

Scanned laser microscope producing shadowgraph displays of IR transmittance variations attributed to defects in polished Si and GaAs semiconductor wafers

01 p1015 A70-10025

Edge luminescence effect in doped p-GaAs single crystals with various hole concentrations, determining band structure at liquid nitrogen and room temperature

01 p0154 A70-10097

Plane harmonic Rayleigh wave propagation in piezoelectric semiconductor GaAs crystals, using successive approximation procedure

01 p0154 A70-10131

Electrical properties of Si-doped GaAs p-n structures obtained by liquid phase epitaxy, considering charge buildup

01 p0155 A70-10132

Current dependence of integral brightness and electroluminescence spectrum of ZnS-GaAs heterojunctions obtained by I vapor reaction in H flow

01 p0155 A70-10142

Electric characteristics and impurity distribution in GaAs-Ge heterojunctions obtained by deposition on p-type Ge

01 p0155 A70-10143

Second phase formation in Czochralski grown Cr-doped GaAs crystals by metallography, radioactive indicators and X ray analysis

01 p0156 A70-10189

Iron behavior in GaAs during crystallization, studying Fe distribution ratio, impurity migration and diffusion coefficient

01 p0156 A70-10219

Planar Gunn effect devices using various surface electrode configurations, discussing limitations by breakdown on Ga arsenide exposed surface

01 p0049 A70-10287

GaAs - Conference, Dallas, October 1968

01 p0157 A70-10515

Negative resistance light emitting lateral GaAs diode, analyzing oscillation frequency, I-V characteristics, temperature and magnetic effects

01 p0050 A70-10565

Laser transitions to valence band or acceptor in low loss uniformly pumped crystal structure p-type GaAs at 77 K

01 p0113 A70-11168

Alloying additions effect on plastic deformation anisotropy in GaAs single crystals, determining dislocation activation energies from creep tests

01 p0160 A70-11606

Book on GaAs components technology covering properties, fabrication and applications of GaAs semiconductor elements in electronics

02 p0350 A70-11734

Semiconductor laser quantum mechanical rate equations derivation to determine temperature and current dependences of light output properties, indicating numerical calculations for GaAs

02 p0311 A70-11884

Autoelectron and autophotocurrent emission from Fe-doped p-type GaAs cathodes in vacuum, noting I-V and emission characteristics dependence on light flux

03 p0538 A70-13067

N-GaAs pulsed Gunn effect oscillators for decimeter band, discussing synchronization by external sinusoidal current

03 p0499 A70-13204

GaAs nonlinear I-V characteristics and negative differential conductivity associated with electron heating by electric field

03 p0540 A70-13720

GaAs n-type single crystals thermoreflectance spectra at various energies

03 p0541 A70-13721

Optical inhomogeneity of GaAs associated with current carrier distribution analyzed quantitatively using magnetooptical Faraday effect and transmittance method

03 p0541 A70-13726

Electrical properties of Cu-diffused GaAs, studying temperature effects on acceptor concentration and electron population growth

03 p0541 A70-13730

Cavity resonator linear excitation by Gunn diode, considering external circuit effects on oscillation conditions and GaAs single crystal parameters

03 p0457 A70-13965

GaAs microwave diode Gunn oscillator subharmonically injection phase locked at low frequency ratios

03 p0459 A70-14041

Carrier concentration profiles and surface resistance of Ohmic contacts to solution epitaxial n-type GaAs wafers measured by Schottky barrier capacitance

03 p0543 A70-14213

InAs-GaAs solid solutions microhardness and brittleness, studying chemical composition effects

04 p0730 A70-14464

GaAs tunnel diodes excess current nature and voltage dependence, considering thermal current measurements, depletion layer processes, electron barrier height, etc

04 p0656 A70-14713

Schottky barrier FET fabrication using epitaxial growth of single crystal GaAs on insulating sapphire substrate

04 p0660 A70-15364

Epitaxial GaAs FET using evaporated Au-Ge-Ni contacts and Ni Schottky barrier, describing fabrication and electrical properties measurement

04 p0660 A70-15367

Velocity field characteristic for electrons in GaAs in negative differential mobility region by method involving probe measurements

04 p0732 A70-15690

Doped n-type GaAs electrophysical parameters determinable from IR reflection spectra

05 p0892 A70-16540

Fabrication and electrical properties of p-ZnTe/n-InAs heterojunctions: obtained by interface alloying, suggesting p-n structure from characteristics and capacitance behavior

06 p1125 A70-17123

Bulk GaAs devices and avalanche /IMPATT and TRAPATT/ diodes compared as microwave sources

06 p1018 A70-17357

Forbidden bandwidth in Brillouin zone and valence band spin-orbital splitting degree determined for mixed gallium-phosphide-arsenide

06 p1126 A70-17815

Minority current carriers diffusion in heterojunctions and p-n junctions in AlAs-GaAs, using X ray microanalyzer performing electron beam scanning

06 p1126 A70-17816

GaAs preparation techniques, crystal structure, electrical and physical properties, single crystal growth, impurities properties and distribution, thermal and optical properties, etc

07 p1356 A70-19397

Magnetoresistance effects in impurity conduction mode of n-type GaAs crystals below 6 K, giving electron concentration

07 p1356 A70-19796

Semiconsulating GaAs doped with Cr, discussing negative resistance segment in current-voltage curves of S diodes

07 p1242 A70-19798

Polarized light electroreflection from GaAs single crystal, noting useful signal linear dependence on electric field

08 p1556 A70-21124

Gunn diode parallel combinations fabricated for X band with n-type GaAs crystals, discussing output power at CW operation

08 p1477 A70-21296

Negative differential conductivity effects in Gunn domain GaAs semiconductors, discussing physical properties and microwave applications

08 p1556 A70-21303

Plane harmonic Rayleigh wave propagation in piezoelectric semiconductor GaAs crystals, using successive approximation procedure

08 p1556 A70-21407

Electrical properties of Si-doped GaAs p-n structures obtained by liquid phase epitaxy, considering charge buildup

08 p1556 A70-21408

GaAs solar cells performance as function of doping levels, ascribing poor efficiencies to surface recombinations

08 p1557 A70-21721

Absorption spectra of n-type GaAs before and after proton irradiation, discussing dependence on wavelength

09 p1739 A70-22753

Microwave conductivity and limiting frequency in Gunn effect GaAs using drifted Maxwellian

09 p1739 A70-22849

Fabrication effects on current instability during injection and breakdown of p-n junctions in GaAs oscillators

09 p1740 A70-23351

Electrical, physical and technological requirements and methods of preparation of ohmic contacts on GaAs, noting use of Au-Ge-Ni alloy

10 p1927 A70-24225

Resistive parametric mixing in GaAs oscillators at microwave frequencies resulting in negative mobility at signal frequency

10 p1849 A70-24231

Gallium arsenide phosphide epitaxial films electroluminescence spectra noting composition effect
10 p1928 A70-24833

GaAs light amplifier p-n junction gain and output noise determination for wide photon energy ranges, studying input noise levels effects on sensitivity
10 p1928 A70-25167

Ion-implanted GaAs junction diodes anneal behavior and defect nature
11 p2098 A70-26391

Epitaxial surface morphology layer electrical properties and autoping at GaAs-Ge heterojunctions as function of substrate temperature, orientation and HCl concentration
11 p2098 A70-26392

Nucleation and heteroepitaxial GaAs film growth on sapphire using electrical measurements, reflection diffraction and electron microscopy
11 p2098 A70-26393

Temperature effects on width of current-voltage characteristics of GaAs Gunn oscillators
11 p2020 A70-26819

GaAs vapor phase epitaxial growth characteristics noting applications to Gunn diodes
11 p2020 A70-26826

GaAs relaxation and hybrid modes properties and formation conditions
11 p2099 A70-26827

Epitaxial or bulk GaAs for Gunn diodes in high power microwave oscillators
11 p2021 A70-26828

GaAs-Au surface barrier n-type photodiode structure, electrical parameters and response characteristics
12 p2194 A70-26969

Electron amplification and phase velocity of plane harmonic Rayleigh wave in gallium arsenide crystals under constant electric field
12 p2285 A70-27294

Impurity centers thermal and autoionization and effective capture cross section dependent on free carrier concentration in GaAs under electric field, allowing for plasma shielding
12 p2285 A70-27361

Low resistivity films synthesized on seminsulating GaAs by xenon, krypton, selenium and zinc ions bombardment
12 p2286 A70-27364

Chromium doped GaAs photoconductivity spectral distribution at various temperatures, determining temperature dependence of impurity maximum
12 p2286 A70-27366

Electroluminescence recombination emission spectra during avalanche breakdown in AlGaAs n-p and p-n heterojunctions
12 p2286 A70-27367

Electric field heating effect on edge photoluminescence of n-type GaAs, noting increase in electron energy
12 p2286 A70-27368

Iron impurity energy level behavior in seminsulating GaAs from determining temperature dependences of Hall coefficient, resistivity, optical absorption and steady spectral photoconductivity
12 p2286 A70-27370

Electron-hole transitions in GaAs obtained by sulfur diffusion, noting capacitance dependence on voltage at 293 and 77 K at various frequencies
12 p2287 A70-27481

Electroacoustic conversion in low resistivity GaAs crystal surface layer, applying external magnetic field to tune converter in wide frequency range
12 p2287 A70-27483

Radiation defects distribution in GaAs during proton irradiation, noting distribution dependence on proton energy and integral flux
12 p2287 A70-27488

Fe and Ni doped GaAs photoconductivity at various temperatures, determining activation energy level
12 p2287 A70-27489

Cu doped GaAs n- to p-type transition after fast reactor neutron irradiation, measuring Hall effect and photoconductivity to determine Cu electrical activation
12 p2287 A70-27490

Absorption spectra of seminsulating gallium arsenide in IR region, investigating transmittance and absorption coefficient at room and low temperatures
12 p2287 A70-27492

Sum and difference frequency signals generated and propagated by mixing carbon dioxide laser and millimeter wave klystron outputs in GaAs loaded waveguide
12 p2250 A70-28098

Ohmic contacts for gallium arsenide single crystals, describing fabrication technique and IV characteristics
12 p2202 A70-28187

Metallic contacts deposition on p- or n-GaAs using vacuum evaporation by electron bombardment
12 p2202 A70-28188

Lattice defect influence on EPR spectral and luminescent characteristics of annealed Fe doped gallium arsenide crystals
12 p2288 A70-28330

N-type GaAs carrier mobility and concentrations increased slow cooling after heat treatment
12 p2289 A70-28343

Solid solutions of GaAs with 2B or 6A intermetallic compounds, using metallographic and X ray methods
13 p2469 A70-28856

Optical charge exchange and thermal stimulation effects in Fe doped GaAs crystals, determining iron content role by EPR method
13 p2469 A70-28880

Photon lifetime dependence on hole and electron concentration in GaAs from IR reflection spectra analysis
13 p2470 A70-28882

Neutron irradiation effect on n-channel GaAs junction FET performance, considering transconductance, drain current, pinch-off voltage and cut-off frequency
13 p2376 A70-28932

High power L- and S-band transferred-electron oscillators from epitaxial GaAs
13 p2377 A70-28978

Parallel and perpendicular negative magnetoresistance measurements as function of magnetic field in p-type GaAs at 77 K
13 p2471 A70-29374

Microwave oscillator providing transition to stable emission at harmonics with power levels comparable to fundamental frequency, considering gallium arsenide oscillation mode
13 p2471 A70-29413

Undoped GaAs lattice constants and electrical properties before and after heat treatment
13 p2471 A70-29504

Iodide concentration effects on epitaxial GaAs p-n junctions growth characteristics
14 p2625 A70-30171

GaAs epitaxial layered wafer natural CW R band oscillations in LSA mode
14 p2550 A70-30688

Vaporization characteristics of solids for relationship between chemical bonding and sublimation mechanism emphasizing NaCl, CdS and GaAs
14 p2545 A70-30906

GaAs-Ge heterojunction transistors with microwave planar geometry, calculating performance for comparison with Ge homojunction transistor
14 p2556 A70-30925

GaAs Gunn devices oscillatory modes under various operating conditions
14 p2557 A70-31158

Gamma radiation effects on GaAs Gunn diodes, measuring Hall effect, low field resistance, output power and FM noise in X band cavity
14 p2558 A70-31322

Spectral distribution of GaAs photoconductivity, allowing for coordinate dependence of minority carrier lifetime in surface space charge region
15 p2782 A70-31626

Acceptor level formation kinetics from measuring Hall constant as function of temperature after diffusion of copper into n-type GaAs
15 p2782 A70-31633

Ternary phase diagram of liquid epitaxially grown gallium arsenide antimonide, considering use as high quantum efficiency long wavelength photoemitter
15 p2782 A70-31758

Surface photovoltage regeneration mechanism in GaAs dependent on free carrier concentration, space charge density and minority carriers
15 p2783 A70-31951

GaAs slices efficiency as transferred electron devices, correlating impurity profiles with microwave performance
15 p2708 A70-31957

Semiconducting gallium arsenide LF oscillations, considering domain behavior and illumination effects
15 p2783 A70-31972

Solar cells based on homogeneous diffusion p-n junctions in epitaxial GaAs films grown on Ge single crystal substrate
16 p2843 A70-33202

GaAs microwave devices including diffused varactor, Schottky barrier and Gunn diode, discussing single crystals preparation and epitaxial growth layers
16 p2873 A70-33293

High power microwave pulse generation in SHF region, discussing use of boat-grown and epitaxial GaAs diodes
16 p2875 A70-33396

SHF pulsed Gunn effect GaAs oscillators for nsec pulse length radar applications
16 p2875 A70-33397

Millimeter wave amplification by pumped n-type gallium arsenide oscillating in limited space charge accumulation mode
16 p2875 A70-33399

S band GaAs FET fabrication technology and frequency response
16 p2877 A70-33414

Transverse magnetic field influence on Gunn effect characteristics of n-type GaAs
17 p3142 A70-34622

Electron bombardment effect on volt-ampere, voltage-capacitance and pulse characteristics of GaAs point contact pulse diodes
17 p3055 A70-35675

Wideband UHF amplification in bulk n-type GaAs during domain generation, comparing cut-off and Gunn frequency
17 p3143 A70-35684

Hysteresis effects during retuning of n-type GaAs Gunn oscillator with bias source and LCR circuit, showing range of domain damping by low field
17 p3055 A70-35689

Shallow acceptor level in Au-doped n-type GaAs, using photoconductivity temperature dependence
17 p3143 A70-35702

Photoconductivity relaxation kinetics of low resistivity n- and p-type GaAs, showing nonradiative recombination
17 p3143 A70-35703

Electrical properties of n-type GaAs epitaxial films grown by gas transport method
17 p3144 A70-35706

Photosensitivity and electroluminescence spectra of GaAs-indium gallium arsenide p-n heterojunctions at room temperature
17 p3144 A70-35708

IV characteristics of high resistivity Ti-doped GaAs single crystals and S-diodes, using Hall constant and conductivity measurements
17 p3144 A70-35709

Gunn phenomenon, discussing GaAs Gunn diodes preparation and applications
18 p3231 A70-36198

GaAs diodes electroluminescence dependence on temperature and injection current
18 p3297 A70-36234

High resistance space charge region formation near crystal cathode in GaAs due to limited contact emissive capacity
18 p3297 A70-36417

Electrical conductivity, Hall constant and differential thermal emf n-type GaAs-CdS solid solutions
18 p3298 A70-36596

Epitaxial growth of GaAs thin films in vapor phase using hydrogen, gallium and arsenic trichloride as sources
19 p3488 A70-38200

In-Au contacts for GaAs, discussing fabrication and performance tests on transverse Gunn mode oscillator
20 p3686 A70-39118

Surface damage of GaAs crystals by mechanical handling and polishing with hard abrasive lapping materials
20 p3686 A70-39119

Microwave emission from GaAs due to EM wave amplification within biased sample
20 p3686 A70-39397

Epitaxial GaAs films growth from solid solutions of InAs-GaAs system deposited on GaAs substrates, noting electron mobility and temperature effect
20 p3686 A70-39629

Ga-as Gunn diodes small signal admittance in dipole oscillation mode, analyzing RC model
20 p3598 A70-40062

GaAs Gunn diodes design and fabrication, discussing material selection and operating heat removal
21 p3799 A70-41424

High energy electron irradiation generated defect centers in GaAs p-n electroluminescent diodes, using capacitance and thermally stimulated current measurements
21 p3863 A70-41914

Acoustoelectric domain spectra in n-GaAs by microwave emission, comparing results with parametric conversions theory
21 p3863 A70-42002

Transmission electron microscopy observation of thermal annihilation of stacking faults in epitaxial layers of GaAs grown from liquid phase
21 p3863 A70-42004

Electron tunneling through p-type GaAs point contacts on Pb single crystals at liquid He temperatures
21 p3864 A70-42017

Fermi energy and bandtail parameters in heavily doped and degenerate n-type GaAs, calculating conduction band density of states by screened Coulomb potential
21 p3864 A70-42018

Microwave output power and impedance for InP and GaAs bulk negative resistance oscillators, using velocity/field characteristics
21 p3800 A70-42049

Picosecond large amplitude pulse generating GaAs diode with nu-n structure
21 p3800 A70-42116

Thermally induced oscillations and negative resistance in seminsulating oxygen-doped GaAs double injection devices via heating beyond critical temperature
22 p4084 A70-42326

GaAs point contact diodes quick response performance with glass-metal or metal-ceramic bases, obtaining Schottky-type rectifying barriers by half period currents
22 p3995 A70-42406

GaAs stripline domains and guided EM waves, discussing velocity, conductivity, drift and transmission amplification gain
22 p3996 A70-42917

- Lattice parameter and thermal expansion of AlAs as function of temperature, indicating lattice match at 900 C with GaAs 22 p4086 A70-43004
- High purity surface-free GaAs epitaxial layer carrier lifetime measurement by optical transmission and excitation technique 22 p4086 A70-43017
- Photocurrent multiplication in single crystal n-type epitaxial GaAs due to impact ionization of shallow donors 22 p4087 A70-43218
- Low noise GaAs Schottky barrier beam lead mixer and chip style diodes, discussing fabrication and performance 22 p3998 A70-43333
- Millimeter band electromagnetic scattering from weakly doped GaAs, calculating reflection coefficient and phase angle 23 p4229 A70-43926
- N-type GaAs samples doped with Ag, Se, and Te respectively, measuring absorption coefficient spectral dependences at room temperature 23 p4229 A70-43928
- N type GaAs doped with Si, conductivity anisotropy observed from measurement and explanation in terms of electron distribution 23 p4231 A70-44890
- Irradiation influence on emission power of GaAs laser excited by high energy electron beam 23 p4203 A70-45060
- Terminal compensation influence on radiative recombination in n- and p-type GaAs, observing emission band in photoluminescence and electroluminescence spectra 23 p4231 A70-45063
- Threshold characteristics of injection and electron excitation semiconductor lasers having photoluminescence properties of n-type GaAs single crystals 23 p4203 A70-45065
- Intraband absorption in p-type GaAs associated with carrier transitions between heavy and light hole in valence band 23 p4232 A70-45066
- Spectral and threshold emission from optically pumped semiconductor lasers as function of carrier type and concentration in GaAs single crystals 23 p4203 A70-45069
- Temperature effects on width of current-voltage characteristics of GaAs Gunn oscillators 24 p4318 A70-45191
- Czochralski thermal probe for current carrier concentration in strip shaped area of n-type GaAs single crystals active growth 24 p4389 A70-45481
- Solid solution of GaAs with CdSe and CdS compounds, investigating intrinsic absorption edge dependence on temperature 24 p4390 A70-45663
- Internal Q switching deviation in gallium aluminum arsenides-GaAs single heterojunction lasers attributed to loss reduction at current pulse end 24 p4354 A70-45815
- GaAs crystal surface Raman scattering from phosphorus impurities localized modes, using Ar ion laser line 24 p4391 A70-46255
- GALLIUM COMPOUNDS**
- NT GALLIUM ANTIMONIDES
- NT GALLIUM ARSENIDES
- NT GALLIUM PHOSPHIDES
- NT GALLIUM SELENIDES
- Vapor deposited GaN single crystals tested for electrical and optical properties, determining band gap energy, electron concentration, etc 04 p0732 A70-15688
- Gallium trichloride and aqueous solution of lithium chloride as solar neutrino detectors 05 p0899 A70-15956
- GALLIUM PHOSPHIDES**
- Solution crystallization method to obtain gallium indium phosphide semiconductor alloys, discussing optical absorption thresholds and transitions 01 p0158 A70-10661
- Forbidden bandwidth in Brillouin zone and valence band spin-orbital splitting degree determined for mixed gallium-phosphide-arsenide 06 p1126 A70-17815
- Gallium arsenide phosphide epitaxial films electroluminescence spectra noting composition effect 10 p1928 A70-24833

- Radiation hardened fiberglass reinforced plastics rupture, bending, compression and tensile strength and elastic modulus, considering gamma ray doses effect 02 p0323 A70-12811
- Two phase density and void fraction measurement using beta, gamma and X ray radiation, considering optical accuracy and beam collimation 02 p0305 A70-12835
- Electron and hard photon /X and gamma ray/ production and propagation in expanding metagalaxy, deducing universe matter density, cosmic ray sources, etc 03 p0557 A70-13225
- Postirradiation free radical processes in cellular organelles of rat liver exposed to gamma irradiation detected by graft copolymerization method 03 p0418 A70-13302
- Radioprotective action of pyridine derivatives in monkey heart and human epithelium cells exposed to gamma radiation evaluated by dioxyphenyl alpha-alanine oxidation 03 p0418 A70-13303
- Ultraweak luminescence intensity, radiation damage kinetics and spectral properties of cellular organelles of rat liver exposed to gamma radiation 03 p0419 A70-13304

Graft copolymerization and chemiluminescence analysis of lipids complexes in animal and plant tissue homogenates exposed to gamma radiation
03 p0419 A70-13305

Correlation between atmospheric meteor entry and gamma and neutron radiation intensity verifying micrometeor antimatter hypothesis
03 p0454 A70-13528

Peripheral blood, neutrophil myeloid hematopoiesis, phagocytic activity and serotonin level in gamma irradiated dogs
03 p0423 A70-13706

Gamma ray astronomy experiments, discussing likelihood method for analyzing and reporting results
03 p0559 A70-13810

Balloon-borne experiments with directional scintillators to measure low energy gamma radiation spectrum in midlatitude atmosphere for photons origin and gamma albedos investigation
03 p0561 A70-13996

Pulsed gamma radiation from pulsars searched for by Cerenkov air shower detection method
04 p0738 A70-14518

Four layer semiconductor device triggering by X or gamma radiation calculated by transport equations for electron and hole distribution motion and electric field distribution
04 p0657 A70-14731

Reactor gamma in-pile effects on thermionic diodes simulated in electron accelerator, noting ion production insufficient to support saturation currents
04 p0717 A70-14948

Allende carbonaceous chondrite radionuclide composition and concentration determined by nondestructive gamma ray spectrometry
04 p0754 A70-15275

Gamma rays due to cosmic ray electrons bremsstrahlung in interstellar medium, predicting diffuse galactic X ray flux
04 p0742 A70-15713

High energy neutron accelerator as fast neutron radiography source, comparing contrasts with gamma and X radiography
05 p0844 A70-15779

Gamma radiation integral fluxes and production rate evaluation from ground and neutron production in Plexiglas and Fe to calculate optimum recoil electron threshold
05 p0899 A70-15955

Spectral intensity recording facility design for high energy electrons and hard gamma quanta in upper layer and beyond atmosphere
05 p0846 A70-15959

Galactic X rays and high energy gamma rays in terms of cosmic ray electrons Compton scattering by submillimeter radiation
05 p0900 A70-16100

Spatial resonance capture rates for U-238 thick slabs to correct gamma ray attenuation errors in broad group shielding calculations
05 p0884 A70-16169

Transistor circuit design with junction compensation techniques to reduce transient gamma radiation effects
05 p0821 A70-16418

Environmental control underground low level radiation counting facility of Lunar Receiving Laboratory for gamma ray spectrometry, including radon adsorption system
05 p0829 A70-16707

Cosmic gamma radiation sources above 50 Mev investigated by high altitude balloons in Northern Hemisphere with spark chamber system
05 p0904 A70-16930

Molecular fluorescence emission rate factors for strong bands of nitric oxide gamma systems, noting day airglow temperature dependence
05 p0886 A70-17085

Survival rates of continuously cultivated *Chlorella* plants in air-carbon dioxide atmosphere after single exposure to gamma radiation, using microcolony counting technique
05 p0803 A70-17113

Positive effect of shielding and cystamin administration on tonic and evacuator functions of rats gastrointestinal tract after gamma irradiation
05 p0804 A70-17122

Acid soluble nucleotides content in normal and gamma irradiated rat spleens, presenting table
06 p0995 A70-17799

Geomagnetic field amplification near gamma radiation steady source, describing field displacement
07 p1367 A70-19446

Monograph on balloon and satellite borne spark chambers for cosmic gamma radiation energy and direction determination, discussing relativistic electrons multiple scattering
07 p1368 A70-19617

Calf thymus DNA structural and functional changes following exposure to hydrogen atoms and gamma radiation
07 p1215 A70-20050

Free radical destruction by gamma irradiation in organic solids at low temperature measured by electron

spin resonance spectroscopy, noting dosage relationship
07 p1225 A70-20324

Satellite recording of electron-positron annihilation gamma emission on Cosmos 135 artificial earth satellite relating to meteors antimatter nature
07 p1371 A70-20334

Electron and gamma quanta concentrations measurements by high altitude balloon, noting fluctuations at various altitudes
07 p1374 A70-20446

Density gradient sedimentation of *Escherichia coli* populations irradiated with Co 60 gamma rays, showing correlation between DNA degradation and cell death
08 p1441 A70-20680

Escherichia coli cell division patterns, discussing generation times spread, gamma ray irradiation in nutrient broth, DNA damage and growing points, etc
08 p1441 A70-20681

Gamma radiation effects on emission time, excitation threshold and efficiency of four level Nd glass laser under multimode operation
08 p1512 A70-21209

Electron and hard photon /X and gamma ray/ production and propagation in expanding metagalaxy, deducing universe matter density, cosmic ray sources, etc
08 p1563 A70-21658

Chronic gamma irradiation effects on bone marrow mitotic activity and chromosome aberrations in dogs
09 p1614 A70-22083

Nuclear landing roll aid based on gamma radiation field built along approach line, runway and taxiways
09 p1721 A70-22662

Gamma radiation effects on higher mammals nerve activity after chronic total body exposure
09 p1619 A70-22790

Trapped Ag atoms production in silver nitrate ice by gamma irradiation, discussing reaction enhancement by fluoride ion
09 p1631 A70-23445

Gamma-neutron irradiation effect on miniature pig, observing incapacitation with severe convulsions and performance decrement
09 p1622 A70-23461

Low energy positrons and gamma rays from large fluxes of galactic cosmic rays
09 p1746 A70-23477

High energy electron and gamma quanta flux measurement in atmosphere at different heights by high altitude balloons
09 p1747 A70-23728

High energy pulsed gamma rays detection method for pulsars based on search for nanosecond duration Cerenkov light signals
09 p1748 A70-23795

Radiation transport calculations based on approximate method restricted to X ray and low energy gamma ray region of electromagnetic spectrum
10 p1915 A70-23977

Gamma ray astronomy above 10 Mev, investigating intensity dependence on galactic latitude and radiation detection technology
10 p1931 A70-24067

Primary cosmic gamma-quanta fluxes measured using telescope consisting of Cerenkov counters
10 p1931 A70-24316

Peripheral blood, neutrophil myeloid hematopoiesis, phagocytic activity and serotonin level in gamma irradiated dogs
11 p1985 A70-25506

Cosmic gamma ray spectrum from secondary neutral pion production in p-p interactions, discussing delta isobar, fireball and nuclear interactions effects
11 p2106 A70-26707

High energy break in isotropic gamma ray spectrum predicted from critical test of cosmological pion-decay hypothesis
11 p2106 A70-26844

Gamma irradiation effects on thermal stability and decomposition of ammonium perchlorate
12 p2289 A70-26870

Solar gamma ray lines search with high resolution balloon-borne directional spectrometer based on lithium-drifted germanium detector
12 p2292 A70-27178

Cosmic gamma rays observation by balloon flight and satellite with scintillation detector, tabulating counting rates in pulse height channels relative to Crab Nebula
12 p2292 A70-27387

Diffuse cosmic X and gamma ray background radiation isotropic component
12 p2295 A70-27887

Sgr gamma-1 source, determining upper limit on soft X rays intensity
13 p2475 A70-28615

Compton electron scattering generated galactic gamma ray flux effects on diffuse IR
13 p2476 A70-28630

X- and gamma-ray detectors design based on combination of solar batteries with scintillators, noting stability requirements
13 p2404 A70-28657

Radioactive Mn 54 with high specific activity for short distance gamma radiography
13 p2404 A70-28658

Combined neutron and gamma ray irradiation effects on piezoresistive accelerometers
13 p2405 A70-28814

Pulsed gamma ray emission from Crab Nebula pulsar NP 0532 investigated by balloon-borne spark chamber detector
13 p2492 A70-29271

Marrow granulocyte reserve restoration in dogs exposed to chronic gamma radiation, discussing leukocyte reaction to pyrogenic agent
13 p2351 A70-29326

Total Absorption Shower Cascade (TASC) detector for gamma ray astronomy space, discussing energy and angular resolution
14 p2587 A70-31004

Gamma radiation effects on GaAs Gunn diodes, measuring Hall effect, low field resistance, output power and FM noise in X band cavity
14 p2558 A70-31322

Cosmic X ray and gamma ray spectral energy distribution slope change explained by measurement process involving photon spectrum
15 p2792 A70-31431

Planetary gamma and X radiation by remote sensing and passive observation for gross chemical composition
15 p2793 A70-31749

Chronic gamma irradiation effects on bone marrow mitotic activity and chromosome aberrations in dogs
15 p2685 A70-32679

Neutron stars gamma and radio emission in gas accretion state, determining surface gravitational potential
15 p2808 A70-32883

X and gamma ray astronomy instrumentation, point sources, continuum emission, line spectra, etc
16 p2976 A70-33721

Mars evolution observation by gamma ray spectrometer in Martian orbit, transmitting information to earth as pulse height distribution
16 p2912 A70-33978

Omnidirectional cosmic gamma ray flux in 1-6 MeV range observed by ERS-18 satellite
17 p3149 A70-34539

Critique of paper on Crab Nebula pulsar pulsed gamma ray emission, considering photon flux and statistical data analysis
17 p3149 A70-34565

Critique of paper on pulsed gamma rays detection from Crab Nebula pulsar by balloon flights, attributing pulsations to random fluctuations
17 p3149 A70-34566

Galactic gamma rays from OSO-3 observations attributed to decay of neutral pions produced by cosmic rays interaction with interstellar gas nucleons
17 p3150 A70-34567

Nonpenetrative reentry vehicle nose thickness ablation sensor using gamma radiation backscatter
17 p3094 A70-35519

Gamma ray pulse height spectra during active and quiet solar periods from midlatitude balloon flights
17 p3152 A70-35774

Vertical secondary cosmic gamma spectra from primary nucleon and electron spectra, discussing effects of solar cycle and geomagnetic cut-off
18 p3308 A70-36500

Geomagnetic field amplification near gamma radiation steady source, describing field displacement
18 p3309 A70-36920

Depleted uranium for gamma radiation shielding, discussing properties, alloys, fabrication and applications
19 p3469 A70-37834

Galactic plane hard X ray emission measurements, considering gamma and X ray origin from Compton scattering of photons by galactic electrons
19 p3497 A70-38023

High energy cosmic gamma radiation detection from point source in Sagittarius, using balloon mounted spark chamber with Cerenkov telescope
19 p3500 A70-38078

High energy gamma rays detection from pulsars by fast night sky Cerenkov counter
19 p3500 A70-38083

Periodic high energy gamma rays from pulsars, using night sky Cerenkov light receiver for proton showers
19 p3500 A70-38084

Cygnus constellation energetic gamma ray emission by nuclear emulsion and spark chamber telescope on high altitude balloon
19 p3501 A70-38086

Extraterrestrial gamma radiation from Cygnus region of galactic disk, using OGO-5 observations
19 p3501 A70-38087

Astronomical gamma ray emission measurement by balloon-borne spark chamber, presenting results for discrete and diffuse sources and albedo intensities
19 p3501 A70-38088

High energy gamma ray flux enhancement towards galactic plane from OSO-3 particle telescope observations
19 p3501 A70-38089

Periodic cosmic gamma radiation from pulsars, using reflector detection of shower generated Cerenkov light

19 p3501 A70-38090

Cosmic gamma ray sources detection in 100-1000 GeV range by atmospheric Cerenkov radiation from energetic particle showers

19 p3501 A70-38091

High energy primary gamma quanta intensity limits from Proton-2 and Cosmos-208 measurements

19 p3502 A70-38092

Energetic primary gamma ray fluxes by satellite-borne spark chamber, isolating galactic radiation

19 p3502 A70-38093

Galactic low energy cosmic ray positrons and gamma rays, considering production mechanism in interstellar space

19 p3503 A70-38099

High energy galactic gamma ray and X ray flux explained by cosmic ray electron scattering

19 p3504 A70-38112

High energy galactic gamma rays photons, suggesting two-component cosmic ray source model

19 p3505 A70-38115

ESR spectrum of gamma irradiated cycloheptatriene silver perchlorate, indicating free radicals and trapped electrons

19 p3374 A70-38272

Diffuse cosmic X and gamma ray spectrum analysis, considering implications for Compton scattering models in intergalactic space

20 p3695 A70-39049

Atmospheric gamma rays vertical intensity dependence on spectrum and altitude from high altitude balloon studies

20 p3697 A70-39286

Recording device for gamma quanta in primary cosmic radiation

20 p3629 A70-39316

Stony meteorites radionuclides gamma emission measurement, determining specific activity ratios

20 p3703 A70-39322

Human body radioactive nuclides in vivo quantitative analysis by gamma ray spectra, considering matrix method accuracy

20 p3582 A70-40449

Nonsolar X and gamma ray astronomy - Conference, Rome, May 1969

21 p3870 A70-40651

Optical photometric observations of nonsolar gamma and X ray sources WX Cen, NGC 5189 and GX3 plus 1

21 p3873 A70-40669

Pulsed hard X and gamma rays from NP0532 pulsar in Crab Nebula, comparing with extrapolated optical data

21 p3874 A70-40675

Cosmic gamma radiation from pulsars, examining atmospheric Cerenkov light generated by energetic particle showers

21 p3874 A70-40676

Discrete X ray and gamma ray sources theories, considering binary and gas stream models

21 p3874 A70-40680

Magnetic field lower limit in Crab Nebula from cosmic gamma ray studies using optical reflector to detect atmospheric Cerenkov radiation

21 p3875 A70-40684

Extragalactic gamma ray and X ray intensity with power law spectrum, comparing galactic plane and high latitude spectra

21 p3875 A70-40687

High energy galactic gamma rays search onboard OGO-5, tabulating results

21 p3876 A70-40690

Galactic gamma ray intensity near Cygnus by OGO-5 spacecraft-borne telescope with acoustic spark chamber, discussing source intensity

21 p3876 A70-40691

Gamma ray astronomical point sources by balloon flight and satellite observation, discussing detector system and telescope for flux and energy spectrum

21 p3821 A70-40694

High energy gamma rays detection by balloon flights, investigating flux and energy spectrum

21 p3876 A70-40696

Omnidirectional cosmic gamma ray flux near one MeV observed by ERS-18 satellite, plotting spectral energy distribution

21 p3876 A70-40697

Galactic gamma ray sources model with magnetic fields concentration in expanding shell, suggesting production by neutral pion decays in supernova remnants

21 p3877 A70-40701

Background gamma ray observations attributed to decay of pi-mesons produced by extragalactic cosmic ray protons collisions, noting radiation sources age

21 p3877 A70-40703

Pulsars and other discrete sources celestial gamma rays flux distribution calculation

21 p3878 A70-40745

Gamma ray background anisotropy effects of Sgr A flux arising from Compton scattering and neutral pion decay, discussing complex radio and IR structure

21 p3878 A70-40926

Dosso stony meteorite gamma emitters radioactivity by nondestructive spectroscopy, obtaining quantitative analysis by least squares method

21 p3893 A70-41446

Galactic center region gamma radiation observations, discussing intensities, energy spectrum and decay

22 p4093 A70-42927

Pulse height distributions due to terrestrial gamma rays, using NaI/Tl scintillation counter

23 p4187 A70-43899

High Energy Astronomy Observatory for space X rays, gamma and cosmic rays research via unmanned spacecraft

23 p4261 A70-44680

Temperature effect on radiation tolerance of mice exposed to low dose rate gamma radiation, noting mortality delay in low temperature environment

23 p4148 A70-44789

WC radiation damage by resonant absorption following Coulomb excitation observed from gamma ray spectra

23 p4231 A70-44888

Gamma ray nondestructive tests for materials defects, discussing cinematic, geometric and radiological factors effects on detection

24 p4337 A70-45711

Aircraft structures service life estimation, using Ir-192 and Tm-170 gamma ray radiography

24 p4346 A70-45725

Spallation limits on low energy cosmic and nuclear gamma rays interstellar fluxes, evaluating fast particle effects on interstellar medium

24 p4397 A70-45758

Radiative flow detection problems, calculating gamma radiation scattering

24 p4348 A70-45848

Liquid compensators for gamma ray flow detection of complex metal product configurations, considering radiation source energy spectrum and specimen density

24 p4348 A70-45849

Discrete source interpretation of isotropic component of diffuse gamma radiation in Milky Way galaxy

24 p4398 A70-46166

Gamma ray inspection of opposed-arc weld-nugget penetration in Al-Cu alloy

24 p4350 A70-46384

GANGLIA

NT NERVES

NT NEURONS

Local stress effect on immunocompetent cells differentiation in guinea pigs lymphatic ganglia, noting increase in number of antibody producing cells

05 p0803 A70-17114

GAPS

NT SPARK GAPS

Anisotropic superconducting energy gap of pure Zn from microwave absorption measurements

16 p2961 A70-33776

Anisotropic energy gap model in superconducting Zn to describe microwave absorption measurements

16 p2961 A70-33777

Scattering and radiation from circumferential gap in circular dielectric-loaded waveguide, using integral equations

23 p4167 A70-43765

GARNETS

NT YTTRIUM-ALUMINUM GARNET

NT YTTRIUM-IRON GARNET

Abundance levels of K, Rb, Sr and Ba in pyroxenes, olivines and garnets of ultramafic rocks for upper mantle composition

03 p0472 A70-13149

Absorption transition fine structure measurements for bulk rare earth garnets single crystals using reflectivity techniques

[IEEE PAPER 19.6] 05 p0894 A70-16998

Absorption spectra of single crystals TbAlG and DyAlG garnets, investigating Verdet constant dependence on ion concentration

07 p1355 A70-18705

Magneto-optical birefringence anisotropy and light propagation in terbium ferrite garnet in presence of Faraday and Cotton-Mouton effects

11 p2097 A70-25377

HF energy nonresonance dissipation in polycrystalline yttrium-garnet ferrites subjected to constant magnetizing field

11 p2097 A70-25384

Majorite garnet in veinlet of Coorara meteorite suggesting transformation from pyroxene

13 p2492 A70-29267

Spectral emission in trivalent Ho doped Yb-Al garnet single crystals grown by optical zone melting

15 p2784 A70-32198

Lunar rocks almandine-rich garnet chemical composition and crystallography, noting cell edge and refractive index

21 p3883 A70-40711

GAS ANALYSIS

NT OZONOMETRY

Bimolecular transfer reactions activation energies for multivalent gaseous compounds estimated by bond energy method avoiding use of adjustable parameters

03 p0441 A70-14045

Computerized mass spectrometer for monitoring atmosphere in astronauts suits and cabin

[AIAA PAPER 69-1016] 07 p1249 A70-19730

Portable unit for collection and analysis of toxic gas contaminants in enclosed aircraft and spacecraft cabin atmospheres

07 p1224 A70-20222

Multicomponent gas absorption analysis to illustrate interactions of coupled fluxes in ammonia-water system

08 p1597 A70-21028

Oxygen uptake by brain as function of oxygen tension in rats using venous outflow method and blood gas analysis

08 p1446 A70-21436

Simultaneous titration of gases, metalloids and metals in steels and refractory alloys by far UV vacuum spectrometry

[ONERA-TP-765] 08 p1455 A70-21842

Modified apparatus for volumetric determination of alveolar carbon dioxide as indicator of pilot hypernea

10 p1825 A70-24503

Hydrogen, oxygen and carbon dioxide in off-gas stream from nuclear reactor experiment using on-line gas chromatography

11 p1994 A70-25615

Differential thermal analysis-effluent gas analysis /DTA-EGA/ experiment for lightweight Martian landed capsule

11 p2050 A70-25802

Atmospheric hydrogen content continuous recording method based on absorption line analysis of mercury vapor from mercuric oxide reduction

11 p2052 A70-26389

Aircraft turbine engines gaseous emission measurements, discussing instrumentation for continuous pollutant concentration monitoring

[SAE PAPER 700249] 12 p2290 A70-27428

Liquid hydrazine decomposition by Shell 405 catalyst, determining gaseous products by gas chromatography and titrometric analysis

[AIAA PAPER 70-606] 16 p2856 A70-33603

Aircraft turbine engines emission sampling, handling and measurement, evaluating various instruments and techniques

[SAE PAPER 700338] 18 p3226 A70-36810

Gas turbine emissions analysis for air pollutants, determining species distribution and concentration

[ASME PAPER 70-GT-81] 18 p3226 A70-36883

Residual atmosphere analysis and application to ion pumping on Al alloy high pressure chamber of differential vacuum system

19 p3434 A70-37464

Ultrahigh vacuum pressure measurement by improved residual gas analysis mass spectroscopy with magnetic section

19 p3396 A70-37465

Evolved gas analysis by mass spectrometry /EGA-MS/, discussing filament heating system and data processing

19 p3374 A70-38495

Fluorine-compatible apparatus for measuring temperature PVT properties of gaseous and liquid fluorine

20 p3630 A70-39485

Rare gas analysis of Apollo 11 lunar soil and breccia for surface layer history

21 p3906 A70-41571

GAS BEARINGS

Two axis spherical gas bearing gyro for accurate measurements of space vehicle position and attitude rates while maintaining compatibility with exotic environments

01 p0086 A70-10308

Air lubricated foil bearing support design with external pressurization for high speed rotor in high temperature turbomachinery

[ASME PAPER 69-LUB-D] 01 p0100 A70-10377

Externally pressurized air journal bearings load capacity, film stiffness, attitude-eccentricity locus and mass flow, studying supply pressure and shaft rotation effects

[ASME PAPER 69-LUB-29] 01 p0100 A70-10380

Externally pressurized gas lubricated journal bearings zero load rotating stability, using digital computer

[ASME PAPER 69-LUB-27] 01 p0100 A70-10382

Synchronous dynamic response of gaseous double squeeze film thrust plate with very high frequencies, showing increased load capacity and stiffness

[ASME PAPER 69-LUB-8] 01 p0102 A70-10395

Inertia forces effect in turbulent and laminar, self acting and infinitely long film bearings, considering compressible and incompressible lubricants

[ASME PAPER 69-LUB-2] 01 p0103 A70-10400

Step thrust self acting gas bearing without feed grooves for two directions of shaft rotation, determining geometric, gas and speed parameter characteristics

02 p0307 A70-12164

Book on gas lubrication covering general equations, externally pressurized journal and thrust bearings, etc

02 p0310 A70-12651

Carrying capacity and moment of friction calculated for cylindrical MHD bearing for small magnitude of radial clearance

03 p0497 A70-13877

Time transient and step-jump dynamic analyses of gas lubricated bearing, illustrating hybrid journal and Rayleigh-Step thrust bearings

[ASME PAPER 69-WA/LUB-5] 04 p0697 A70-14768
Pendulous integrating gyro accelerometer gas bearing wheel characteristics at high slow rates monitored by differential varmeter

[ASME PAPER 69-WA/LUB-3] 04 p0698 A70-14770
Optimum one dimensional Rayleigh gas slider bearing, calculating step location, pressure and load capacity for range of bearing numbers

[ASME PAPER 69-WA/LUB-1] 04 p0698 A70-14772
Molecular mean free path influence on gas lubricated thrust bearings performance, discussing slip flow effect and load capacity

05 p0854 A70-15909
Self acting, hydrostatic and squeeze-film gas lubricated bearings applications to gyroscopes, accelerometers, torque testers, etc

05 p0855 A70-16446
Load capacity of rotating field MHD hydrostatic thrust bearing increased by rotating axial magnetic field

06 p1076 A70-17527
Dynamic response of gas lubricated radial sliding bearing from transfer function derived from pH linearized mathematical model of gas lubrication

07 p1290 A70-18739
Oil vapor lubricated bearing for compensated antenna of spin stabilized spacecraft, discussing service life, power and storage in sintered porous material [DGLR-69-062] 07 p1391 A70-18775

Spherical gas bearings static characteristics and performance, discussing materials selection, optimum clearances and surface hardness

07 p1294 A70-19122
Equilibrium state instability of radial gas bearing accompanied by oscillations, examining bearing dynamics and nonlinear film reaction characteristics

07 p1295 A70-19536
Central equilibrium position stability of gas bearing supported rotor allowing for inertia and lubricant compressibility

08 p1502 A70-20695
Air brake with compressed air fed bearings for testing small turbines, determining power and friction moment

08 p1481 A70-21188
Spherical radial bearing with gas lubricant, solving Reynolds equation by small parameter method

09 p1690 A70-22450
Stable equilibrium of rotor in pressurized gas bearing, considering perturbed rotor motion equation together with Reynolds equations for pressures in lubricant layer

09 p1690 A70-22544
Pressurized gas bearing analysis, using finite difference method for solving Reynolds equation for pressures in lubricant layer

09 p1690 A70-22545
Load parameters of externally pressurized gas journal bearing with multiple supply holes

09 p1693 A70-22977
Externally pressurized porous journal gas bearings with solid sleeve parts for reducing porous media waviness and roughness effects

10 p1896 A70-25097
Balanced rotor with radial sliding bearing bushings, studying lubricant gas restoring force effect on stability with allowance for bushings translational movements

11 p2058 A70-25581
Externally pressurized bearing with electrically-conducting gas lubricant under axial magnetic field, considering load capacity

12 p2244 A70-28018
Externally pressurized air journal bearing performance prediction, obtaining pressure distribution by numerical solution of Reynolds equation

13 p2418 A70-28743
Oil-vapor lubricated ball bearing system for deployable spin-free antenna of spin stabilized spacecraft

13 p2349 A70-28843
Free rotor air bearing gyros active damping evaluated through experimental studies

[AIAA PAPER 67-590] 15 p2741 A70-32506
Additional inertia introduced by velocity profile gradient in flow direction effects on externally pressurized gas bearing

16 p2924 A70-34233
Pressurized gas bearing flow field, discussing velocity transversal component, pressure distribution and profile

16 p2924 A70-34237
Spacecraft simulator using air bearing technique to simulate low friction aspect of environment, considering application to satellite attitude control

18 p3236 A70-36064
Spherical gas lubricated sliding bearing with forced injection, determining pressure distribution by numerical integration

18 p3262 A70-36273

Pneumatic instability, capacity and rigidity of thrust and journal gas bearings with external air injection

18 p3264 A70-37072

Inertia forces effect in turbulent and laminar, self acting and infinitely long film bearings, considering compressible and incompressible lubricants

[ASME PAPER 69-LUB-2] 19 p3435 A70-37613
Optimum one dimensional Rayleigh gas slider bearing, calculating step location, pressure and load capacity for range of bearing numbers

[ASME PAPER 69-WA/LUB-1] 19 p3436 A70-37617
Pendulous integrating gyro accelerometer gas bearing wheel characteristics at high slow rates monitored by differential varmeter

[ASME PAPER 69-WA/LUB-3] 19 p3436 A70-37618
Time transient and step-jump dynamic analyses of gas lubricated bearing, illustrating hybrid journal and Rayleigh-Step thrust bearings

[ASME PAPER 69-WA/LUB-5] 19 p3436 A70-37619
Aerostatic journal bearings with double plane admission feeder holes, determining maximum load and stiffness by numerical method

19 p3443 A70-38898
Fluidic gyro compatible with PDM missile guidance system, discussing spherical gas bearing design

[AIAA PAPER 70-1008] 20 p3631 A70-39524
Load bearing capacity of radial gas bearing with annular injection line, discussing gas feeding methods

20 p3637 A70-39816
Cylindrical gas suspension lubricating layer pressure distribution calculation by perturbation method, determining angular rigidity

20 p3637 A70-39818
Unsteadiness effect on load bearing capacity of cylindrical sectoral gas bearing

20 p3637 A70-39819
Heat generation effects in air hydrostatic journal bearing, including shaft and housing thermal deformation and lubricant viscosity changes

[ASME PAPER 70-LUBS-19] 22 p4044 A70-42442
Gas lubricated three-foil bearing for high speed rotor support, considering dynamic and static behavior in zero gravity environment

[ASME PAPER 70-LUBS-18] 22 p4044 A70-42443
Dynamic characteristics of turborotor simulator supported on gas lubricated foil bearings, considering rotor response to imbalance

[ASME PAPER 70-LUBS-11] 22 p4044 A70-42449

GAS CHROMATOGRAPHY

Gas chromatography and mass spectroscopy study of fatty acids and hydroxy acids in 5000 year sediment from English Lake District

02 p0252 A70-12507

Gas chromatography and mass spectrometry applied to porphyrin microanalysis, studying homologous porphyrin series in ancient sediments and oils

02 p0252 A70-12516

Palladium alloy transmodulator for gas chromatograph, demonstrating sensitivity gain for thermal conductivity and ionization cross section detectors

03 p0442 A70-14325

Gas chromatography based on sampling gas-vapor phase at liquid surface for determining volatile oxygen containing compounds in biological media

04 p0646 A70-14580

Butyl esters separation from protein amino acids, using acid washed Chromosorb W of various mesh sizes

10 p1828 A70-24397

Carbonaceous chondrites composition by gas chromatography for light hydrocarbons and carbon, discussing origin of organic matter

10 p1949 A70-25327

Propylene carbonate applications in nonaqueous electrolyte batteries, describing impurities identification by gas-liquid chromatographic analysis

12 p2164 A70-27069

Retention times and gas chromatographic conditions for resolution of galactonic and gluconic acid derivatives

16 p2855 A70-33064

Digital logic control of chromatographic system for measuring instrumental contributions to band broadening

16 p2855 A70-33120

Chromatographic analysis of organic matter in Pueblito de Allende meteorite

17 p3173 A70-35754

Quantitative and qualitative analysis of biochemically and radiobiologically important thiols and disulfides via gas-liquid chromatography

19 p3373 A70-37836

Hydrogen, N, O, Kr methane and carbon dioxide gas chromatographic examination, discussing life detection device for Mars landing

22 p3983 A70-43094

Quantitative gas-liquid chromatography of histidine, using N-TFA n-butyl ester derivatives and histidine converted trimethylsilyl derivative

22 p3983 A70-43524

Gas-liquid chromatography studies of direct esterification of protein amino acids to n-butyl esters

22 p3984 A70-43525

GAS COMPOSITION

NT CARBON DIOXIDE CONCENTRATION

Chemical and physical adsorption of gaseous oxygen contaminants to maintain purity for respiratory purposes, noting trichlorethylene and carbon tetrachloride

01 p0031 A70-10236

Acoustic and shock waves propagation in multicomponent media, assuming uniform speed for components and complex density dependence of media on pressure

03 p0465 A70-13329

Al alloys crack growth effects due to gaseous environment and fatigue frequencies, suggesting role of gas adsorption

05 p0938 A70-16478

Inhaled air intrapulmonary distribution uniformity and alveolar N concentration using single breath method

05 p0802 A70-16496

EKG, EEG, pneumograms and X ray pictures showed no pathological effect after prolonged confinement in sealed chamber having artificial atmosphere with variable gas composition

05 p0810 A70-17121

Kinetic relaxation and Boltzmann equations for studying shock waves propagating in gas composed of rigid ideally elastic spherical molecules without internal degrees of freedom

06 p1036 A70-17756

Vertical profile of angular mass distribution of atmospheric water vapor and ozone as gas proportion function

06 p1097 A70-17794

Statistical models in kinetic theory for describing gases ranging from gas with no internal degrees of freedom to multicomponent reacting mixtures

06 p1047 A70-18312

Zr, Ti, Nb and Ta carbides deposition from metal chloride, methane, hydrogen and argon mixture, studying gas concentration and temperature effects on deposition rate

08 p1517 A70-21147

Gas turbine engines contribution to air pollution, using model combustor to study burned gas composition, emphasizing nitric oxide concentration

08 p1559 A70-21481

Power output of sealed carbon dioxide-nitrogen-helium laser as function of gas composition and pressure

08 p1514 A70-21751

Gaseous species in equilibrium with Apollo 11 holocrystalline rocks during crystallization

09 p1758 A70-22744

Dynamics of multicomponent plasma involving charged or neutral gases with transport phenomena for case of no magnetic field

09 p1738 A70-23580

Vertical profile of angular mass distribution of atmospheric water vapor and ozone as gas proportion function

10 p1913 A70-25025

Combustion gases compositions and adiabatic flame temperatures of potassium seeded propane-air mixtures calculated at various equivalence ratios and temperatures assuming thermal equilibrium

12 p2330 A70-27227

Resonance radiation transport in optically thick plane gas layer with two-level atoms

12 p2305 A70-27853

Metals purity, gas content and porosity effects on nature and size of material zone affected by laser beam treatment

12 p2250 A70-28219

Acoustic and shock waves propagation in multicomponent media, assuming uniform speed for components and complex density dependence of media on pressure

14 p2566 A70-30709

Navier-Stokes equations derivation for multicomponent gas with internal nonrotary degrees of freedom, using moment equations

15 p2672 A70-31649

Metals purity, gas content and porosity effects on nature and size of material zone affected by laser beam treatment

20 p3643 A70-40094

Premixed laminar flames of hydrogen, oxygen and nitrogen burned on Meker burner, investigating diffusional effects on gas composition changes

20 p3739 A70-40469

Atmospheric pressure hydrocarbon-air mixtures confined by thin plastic membrane, obtaining composition range for detonation initiation limits

21 p3865 A70-40884

Dynamic spacecraft cabin atmospheres for extended operation, discussing gas composition, weightlessness and various stress factors

22 p3980 A70-43643

Limit analysis for ionization potential reduction effect on ionized gas atomic composition, considering temperature and electron density

23 p4220 A70-44435

Flow-through carbon dioxide lasers population inversion relation to individual gas components and electron velocity distribution functions

24 p4352 A70-45458

GAS COOLED REACTORS

NT HIGH TEMPERATURE NUCLEAR REACTORS

Nuclear light bulb reactor and coaxial flow reactor for gas core nuclear rocket engines [AIAA PAPER 70-708] 16 p2949 A70-33532

GAS COOLING

Foreign gas injection and slot geometry influencing film cooling effectiveness 01 p0219 A70-11182

Brazed plate-fin superalloy panels suitable for hydrogen-cooled structures, discussing fabrication techniques, performance tests and pressure containment and fatigue characteristics 02 p0306 A70-11930

Subsonic, transonic and supersonic laminar boundary layers acceleration and cooling effects, discussing heat transfer and gas enthalpy 12 p2211 A70-27830

Injection slot geometry effect on gas film cooling, discussing effect of secondary stream acceleration 21 p3952 A70-42084

GAS DENSITY

Hydrodynamics, mass and energy transfer equations for moderately dense gases multicomponent mixtures, using Bogoliubov theory 01 p1146 A70-10129

Thermospheric structure and variations obtained from satellite drag data analysis, discussing gas density, temperature and atmospheric composition 01 p0077 A70-11203

Interstellar neutral hydrogen flux effects on atmospheric hydrogen density, considering annual and semiannual density variations 01 p0186 A70-11207

Particle velocity distributions in low density supersonic jets measured by molecular beam sampling technique and multidisk velocity analyzer 02 p0276 A70-11849

Recombination instabilities in plasmas and gases undergoing density changes through volumetric processes, solving linearized and nonlinear cases by simplified fluid mechanics equations 02 p0348 A70-12238

Acoustic and shock waves propagation in multicomponent media, assuming uniform speed for components and complex density dependence of media on pressure 03 p0465 A70-13329

Supernova light emitted from surrounding gas layer, describing gas density role in type I and type II events 04 p0748 A70-14590

Equation of state for neutron, proton and electron gas mixture associated with cold matter above white dwarf densities and below nuclear density 05 p0905 A70-15756

Neutrinos production by primary cosmic rays in rarefied and dense media, calculating spectra 05 p0899 A70-15963

Density effects on rotational temperature measurements in nitrogen by electron beam excitation, discussing emission intensity distribution 06 p1067 A70-18306

Density field around leading edge of blunted flat plate, using electron beam measurements in low density hypersonic wind tunnel 06 p0980 A70-18351

Nonlinear relativistic wave velocity distribution within spherical nucleus bounded by shock wave in superdense gas determined by Cauchy problem 08 p1484 A70-21403

Hydrodynamics, mass and energy transfer equations for moderately dense gases multicomponent mixtures using Bogoliubov theory 08 p1548 A70-21405

Simple molecules viscosity as function of temperature and density using empirical equation 09 p1731 A70-22292

Electrostatic shielding of nuclei Coulomb field during thermonuclear reactions in degenerate gases of arbitrary densities 11 p2087 A70-26578

Gas and electron density fluctuations in weakly ionized turbulent wake behind hypersonic spheres and cones 11 p1978 A70-26773

Mesosphere payload to measure neutral gas density, positive and negative ions concentration and mobility in D region 13 p2393 A70-28682

Interstellar hydrogen density around solar system from calibrated Lyman-alpha intensity measurements of Vela 7 13 p2489 A70-28894

Elastic scattering formation and decay of unstable particle gases, discussing density and corrections to chemical and nuclear statistical equilibrium equations 13 p2455 A70-29223

Acoustic and shock waves propagation in multicomponent media, assuming uniform speed for components and complex density dependence of media on pressure 14 p2566 A70-30709

Electroless traveling wave accelerator for wind tunnel use, determining gas stream density for subsonic and supersonic operation 16 p2889 A70-33868

Low Reynolds number flow inside Delaval nozzle, examining gas density and rotational temperatures by electron beam techniques [AIAA PAPER 70-810] 17 p3065 A70-34454

Kinetic theory of moderately dense gases, obtaining generalized Boltzmann equation 17 p3072 A70-35534

Earth Lyman alpha emission rates as function of atomic hydrogen column density in outer atmosphere, using Mariner 5 measurements 18 p3244 A70-36007

Kinetic effects of Barnett equations and slip conditions for continuous dense gas flows at small Knudsen numbers 18 p3239 A70-36256

Pulsar AP 2015 21 cm line absorption profile, indicating uniform density and temperature neutral H model invalid 19 p3518 A70-38026

Atomic hydrogen population distribution in far UV of comets 19 p3526 A70-38782

Cosmic ray superhigh energy electrons and neutrinos propagation in degenerate neutrino gas universe, considering gas density in cosmological models 20 p3700 A70-39593

Combustion driven Hall configuration MHD generator, discussing boundary layer analysis, gas density nonuniformity and electrode drop 20 p3566 A70-40003

Hydrogen emanation and distribution in metals and alloys by Nd hydrogen metal detection method 20 p3651 A70-40071

Schlieren method application in plasma diagnostics, obtaining density change of neutral, ion and electron gases 21 p3825 A70-40950

Molecular oxygen density and vibrational distribution in lower atmosphere, observing solar UV radiation absorption by satellite OSO-4 21 p3816 A70-41066

Mean density and temperature measurements in hypersonic Ti spheres wakes in nitrogen atmosphere, using electron beam fluorescence probes 21 p3745 A70-41754

Neutral interplanetary particle impact ionization of atmosphere, discussing density of neutral interstellar media near solar system 22 p4106 A70-43291

H II regions density-size relationship, using emission measurements and radio data 22 p4109 A70-43746

Binary gas mixture separation effects by centrifugation in cylindrical tube, calculating maximum radial concentration difference between wall and axis by numerical integration 23 p4181 A70-44206

Compressibility, viscosity and thermal conductivity of dense gases, examining high temperature and pressure effects 23 p4222 A70-44431

Oscillating vane and rotating disk pressure gauge theory, considering gas damping and density variations 23 p4198 A70-44948

GAS DETECTORS

Hydrocarbon gas detection using He-Ne laser radiation absorption, discussing detector electronics 17 p3107 A70-35520

GAS DISCHARGE COUNTERS

U COUNTERS

U GAS DISCHARGE TUBES

GAS DISCHARGE TUBES

Ceramic plasma containers construction by soldered seal technique for ion lasers, noting moly-manganese process 02 p0314 A70-12746

Gas laser frequency stabilization by employing Zeeman splitting in external discharge tube containing He-Ne mixture in alternating magnetic field 03 p0498 A70-13090

Discharge tube rotation effects on ring laser polarization, Q factor and radiation frequency 03 p0501 A70-13744

Cadmium vapor density distribution by cataphoresis in He-Cd laser discharge tube determined by side light measurements 06 p1084 A70-18613

Argon ion laser output powers dependence on discharge tube design and mirror reflection coefficient in emission line 08 p1511 A70-20541

Aircraft gas discharge displays, discussing segmented alphanumeric annunciator devices with field effect electroluminescent elements and incandescent lamps 08 p1493 A70-20671

Carbon dioxide molecules dissociation along tube length, measuring temperature drop behind shock front at various pressures and 4300 K 09 p1730 A70-22172

Ar ion laser performance improvement by using beryllia for sealed-off discharge tube 09 p1699 A70-23443

Carbon dioxide-neon-helium flowing lasers gain characteristics determined by transverse-discharge configuration 10 p1901 A70-24944

He-Ne laser noise caused by discharge current fluctuation and moving striation in long capillary tubes 12 p2245 A70-27272

He-Cd laser construction with quartz tube manufactured separately, describing flow-through processing 14 p2594 A70-30509

Ar ion laser gas discharge tube construction, using anodically oxidized directly cooled aluminum segments 19 p3444 A70-37567

Sealed-off carbon dioxide laser discharge deposits analyzed by mass spectroscopy 19 p3445 A70-37670

He-Ne laser with conical discharge tube, investigating transverse cross section geometry influence on power gain 19 p3449 A70-37845

Ionic and molecular gas lasers, discussing pumping, transitions, emission, discharge tube dimensions, cooling, pressures, optical elements and applications 19 p3449 A70-37851

Triangular ring laser polarization, using discharge tube with Brewster angle windows in optical circuit 20 p3639 A70-39084

Carbon dioxide-helium laser hollow cathode negative glow discharge amplifier, discussing construction and advantages compared to other excitation media and discharge structures 21 p3834 A70-40568

Low voltage slotted hollow cathode laser tube design with transverse discharge operation and uniform axial distribution of laser media, including metal vapors 21 p3834 A70-40571

Stable ellipsoidal plasma configurations in alternating electrode annular system, considering longitudinal magnetic field strength, electrode voltage and gas discharge chamber pressure 24 p4385 A70-45456

GAS DISCHARGES

NT RING DISCHARGE

NT TOROIDAL DISCHARGE

LF longitudinal waves propagation in DC gas discharge plasma, obtaining wave dispersion equation for various limiting gases 01 p0149 A70-10162

Critical magnetic fields, frequencies and spatial structure of ion-acoustic instability of HF induction discharge plasmas in hydrogen, Ar, He and Hg vapor 02 p0348 A70-12261

Static breakdown voltage of air and nitrogen measured under uniform field conditions for specific gas number densities, comparing results with Paschen law 03 p0528 A70-14086

Laser cavity structure for homogeneous transverse discharge in carbon dioxide-nitrogen-helium mixtures, discussing energy and power increase per unit volume 03 p0503 A70-14357

Ionization study of gas discharge parameters behind shock wave front produced by moving plasma pulse interaction with immovable gas discharge plasma 03 p0535 A70-14361

Electric discharges in low pressure Ar in external magnetic fields, studying charge in transport coefficients and drift due to MHD forces 04 p0724 A70-14529

Discharges in Ar flow in membrane shock tube at Mach 5, discussing plasma compression, shock wave position and effect on electrode region 04 p0725 A70-14534

Longitudinal pressure gradient measurement for DC discharges in He, Ne and Ar, investigating effects of gas purity, tube geometry, etc 04 p0671 A70-14995

Pulsed high current arc burning in hydrogen at pressures to 400 atm, discussing stability and discharge plasma parameters 04 p0729 A70-15224

Gas discharge avalanche breakdown in Si semiconductors, analyzing micropasmas, ionization coefficients, p-n junction voltage, electron and light emissions 04 p0731 A70-15494

Steady state plasma generation in metallic waveguide without dielectric container by cold cathode discharge in He 05 p0819 A70-15803

Charge carriers recombination and diffusion coefficients for confined gas discharge plasma obtained from data on radial particle distribution profile 05 p0888 A70-16330

Physical theory of ball lightning based on cooling air spheres models, calculating equilibrium composition,

GAS DISSOCIATION

temperature profiles, output radiation and mass density

05 p0843 A70-17102

Collective interactions and low density plasma instability in high current gas discharge showing influence on neutral gas breakdown in interelectrode space

07 p1354 A70-20317

Intense quasi-steady He plasma discharge stability in magnetic field measured by Langmuir and optical techniques

07 p1354 A70-20321

Anodic precursors of convergent cylindrical shock wave of z-pinch discharges in He and Ar

07 p1261 A70-20357

Transformed thermodynamics equations derived automatically by substitution codes, noting exceptions for real gas and discharge flow

08 p1597 A70-20918

Plasma display system characteristics and history, discussing gas discharge cell construction and behavioral mechanisms

08 p1499 A70-21688

Anodic electric layer in self sustaining discharge in transverse magnetic field with neutral gas burnout, studying neutral atom ionization probability

09 p1734 A70-22110

Inert gas glow discharge current change under laser radiation, investigating dependence on discharge region, gas and electrode material and configuration

09 p1696 A70-22484

Time delay between pulses of discharge current and ionized argon laser power as function of current and discharge pressure

09 p1697 A70-22847

Coherent radiation amplification factor for 0.63 micron wavelength in He-Ne mixture, noting dependence on discharge current for various pressures

09 p1698 A70-23304

Transient laser phenomenon /observations and evanescent localized glows/ related to dust raised by degassing and electrostatic glow discharges in gas phase

10 p1938 A70-24069

LF longitudinal waves propagation in DC gas discharge plasma, obtaining wave dispersion equation for various limiting gases

10 p1925 A70-25010

Carbon dioxide dissociation in flowing carbon dioxide nitrogen helium laser and effects of carbon monoxide on discharge properties

11 p2063 A70-26068

Microscopic behavior and excitational processes found similar in argon ion lasers with hollow cathode or conventional heated oxide cathode discharge

11 p2063 A70-26370

Gas mixture plasma ionized and heated by discharge and ejected into vacuum, considering nonequilibrium ionization calculation with gap between electron and heavy particle temperatures

11 p2092 A70-26732

Waveguide gas discharge indicator of transmitted microwave power, investigating sensitivity, discharge conditions, filler gas and pressure effects

11 p2020 A70-26807

Laser emission generation on sodium lines, studying pulsed discharge mechanism involving ion-ion recombination in sodium vapor and hydrogen mixture

13 p2425 A70-28600

Gas discharge gap preionization by thin preheated tungsten wire ignition without explosion, resulting in plasma turbulence prevention and radiation density increase

13 p2462 A70-28986

Shock waves in partially ionized gas discharge argon plasma, recording potential jump at wavefront

13 p2388 A70-29419

AC and DC driven gas discharge aircraft displays, discussing capabilities and applications

13 p2412 A70-29875

Hot-wire probe measuring He-air mixture velocity and concentration following He discharge from circular orifice, noting calibration method

13 p2412 A70-29990

Harmonic generation in gas discharge by frequency multipliers, assessing multipliers capabilities for millimeter wavelength operation

14 p2549 A70-30437

Shock wave propagation during moving pulsed plasma interaction with stationary gas discharge plasma

15 p2780 A70-32197

Electron energy loss per collision in Cs vapor discharge, measuring electric field and electron temperature by Langmuir probes

16 p2954 A70-33281

Electrothermal instability in nonequilibrium plasma interpreted in terms of generalized instability in gas discharge

17 p3139 A70-34550

Spacecraft flight systems voltage breakdown due to DC gas discharge, discussing occurrence and preventive techniques

17 p3053 A70-35164

Nonequilibrium plasma from pulsed discharge in crossed electric and magnetic fields

17 p3142 A70-35727

Gas discharge in longitudinal magnetic field, investigating instability of diffusion dominated positive column

20 p3677 A70-39112

Fugacities of HCl and HF compared with abundance in volcanic fumarolic emanations, indicating magma undersaturation

20 p3619 A70-39321

Homopolar device electric arc dynamics dependence on gas type, noting flow geometry-Hall effect competition

20 p3681 A70-40009

Dense plasma jet kinetic instabilities and heating in strong magnetic field

20 p3682 A70-40138

Gaseous neon plasma positive column electrons density and drift velocities measurements by Langmuir probe technique

20 p3683 A70-40163

Microwave propagation in circular waveguide containing inhomogeneous gas discharge plasma

21 p3785 A70-40630

Two probe electron energy distribution measurements in gaseous discharges with random and coherent oscillations, giving xenon results at low pressures

21 p3828 A70-41471

Apollo 11 fines gas evolution and physical changes via heat treatment, discussing Ar 40 anomaly, lava structure origin and oxidation rate

21 p3907 A70-41577

Carbon dioxide-He-nitrogen gas mixture pulsed discharge system afterglow gain measurements up to one atmosphere, using CW laser

21 p3837 A70-41719

Gas discharges - IEE Conference, London, September 1970

22 p4077 A70-42351

Carbon dioxide-nitrogen He discharge gas temperature measurements involving plasma refractivity determination by interferometer

22 p4049 A70-42366

Gas discharge positive column finite length effect on wave dispersion and instability, indicating critical magnetic field

22 p4079 A70-42374

Cs seeded Ar discharges electron energy distribution, discussing drift velocities, electrons elastic and inelastic collisions with ions and molecules, etc

22 p4081 A70-43198

Microwave characteristics in plasma of short discharges in low pressure cesium and mercury vapors, noting spectral and spatial distribution of microwave power and intensities

22 p4083 A70-43392

Hydrogen cluster beam discharges, determining transient plasma ion density from Stark broadening measurements of H beta line

23 p4228 A70-44939

Waveguide gas discharge indicator of transmitted microwave power, investigating sensitivity, discharge conditions, filler gas and pressure effects

24 p4317 A70-45179

GAS DISSOCIATION

Collision induced dissociations of 2000 eV diatomic O, N, CO and NO positive molecular ions as function of reactant ion internal energy

01 p0148 A70-11354

Dynamic behavior of dissociating homonuclear diatomic gas, deriving instability equations, proposing stability loss in transonic region

01 p0068 A70-11584

Carbon dioxide temperature distribution, absorption and concentration as functions of molecular dissociation behind shock wave determined by measuring IR bands intensity

01 p0069 A70-11623

Oscillations and decomposition of diatomic gas molecules at high temperatures during atom-molecule collisions, deriving kinetic equations for energy level changes

01 p0148 A70-11630

Oxygen molecules dissociation by molecular and atomic collisions in shock tube from measuring molecular O concentration behind shock wave front

01 p0149 A70-11632

Nimbus 3 satellite observations of near UV solar flux intensity and variability, describing instrumentation and measurement of radiation producing molecular oxygen photodissociation

02 p0291 A70-12295

Hypersonic flow in thermodynamic equilibrium of diatomic dissociating gas with power law shock, investigating self similar solutions of Van Dyke small disturbance equations

03 p0405 A70-12925

Atomic oxygen reaction with carbon dioxide and carbon dioxide dissociation in shock waves, using nitrous oxide decomposition for oxygen source

03 p0440 A70-13578

Molecular hydrogen destruction by reaction with carbon dioxide ion in Martian ionosphere, discussing conversion into atomic hydrogen

03 p0575 A70-13997

Dissociative attachment of low energy electrons in nitrous oxide as function of gas temperature

03 p0441 A70-14006

Equilibrium composition and thermodynamic functions calculated for mixtures of dissociating and ionizing high temperature gases from standard data

04 p0780 A70-14538

Equivalent pressure concept for breakdown processes and sparking voltage of gas moving at angle to electric field across uniformly stressed gap

05 p0881 A70-16000

Nitrous oxide molecular beam reflection and dissociation on tungsten surface at high temperatures from angular distribution measurements

06 p1004 A70-17493

Slope and shape of blood-gas dissociation curve as factor influencing pulmonary gas exchange in presence of ventilation-perfusion inequality

06 p0994 A70-17522

Attractive potential effects on free and bound particles distribution in dissociating gas, studying recombination reaction effects on gas kinetic structure

06 p1044 A70-18280

Kinetics of attack of SiC in monoatomic mixtures of N and O generated by microwave discharge dissociation

07 p1421 A70-19332

Dissociating hydrogen transport coefficients analysis compared with data calculated as function of temperature and pressure without allowance for ionization

07 p1338 A70-19654

Photodissociation of diatomic O and N molecules in far UV

07 p1338 A70-20052

Water vapor dissociation in dilute mixtures with Ar behind shock waves, studying OH concentrations using flash-absorption technique

08 p1548 A70-21355

Comet brightness outbursts monochromatic measurements for lifetime of parent gaseous molecules in solar radiation fields

08 p1575 A70-21373

Numerical solutions of one dimensional expanding flow of dissociating gas initially in frozen state for variations in recombination rate

08 p1484 A70-21531

Carbon dioxide molecules dissociation along tube length, measuring temperature drop behind shock front at various pressures and 4300 K

09 p1730 A70-22172

Forward and backward rate constants for diatomic recombination and dissociation in dilute gas

09 p1730 A70-22231

Water vapor high temperature dissociation kinetics in dilute mixtures with argon in shock waves

09 p1629 A70-22319

Shock heated molecular beams of argon, oxygen and mixtures with helium, measuring particle velocities and gas dissociation

09 p1733 A70-23180

State equation for entropy of dissociated air with enthalpy and pressure as independent variables for calculating gas dynamic processes on computers

10 p1966 A70-23839

Vibrational and dissociation relaxation effects on plane shock wave structure and supersonic flow around blunt bodies

10 p1801 A70-24150

Carbon dioxide dissociation effects on refractive index gradients and decay rates in pulsed carbon dioxide-nitrogen laser mixture

10 p1900 A70-24602

Thermal dissociation kinetics in chlorine pentafluoride over high temperature range

11 p1994 A70-25823

Carbon dioxide dissociation in flowing carbon dioxide nitrogen helium laser and effects of carbon monoxide on discharge properties

11 p2063 A70-26068

CO dissociation kinetics in Ar and mixtures of O in Ar by shock tube study using vacuum UV absorption

12 p2180 A70-26857

Coupled relaxation dependence on translational and vibrational temperature and number of modes in polyatomic gases, noting molecular dissociation

12 p2276 A70-27797

Oxygen cation electron dissociative recombination rate coefficient measurement during expanding oxygen flow in nozzle

12 p2276 A70-27802

Vibrational dissociation relaxation effects on chemical reactions, molecular energy and thermal quanta in air flow behind direct shock wave

12 p2213 A70-28232

Pseudo one dimensional dissociational nonequilibrium nozzle flows, obtaining equilibrium and nonequilibrium solution through similar transformation of governing equations

14 p2527 A70-30264

Molecular gases ionization and dissociation by low energy atoms, using mass spectroscopy on secondary ionic products of collisions

14 p2619 A70-30723

Gaseous monoxides dissociation energies and free energy functions tabulation for calculating partial pressures

14 p2545 A70-30902

Nonequilibrium dissociation effect on supersonic oxygen flow past inverted blunted cones at angle of attack, considering thermal fluxes and aerodynamic forces

15 p2671 A70-31496

Dissociating hydrogen transport coefficients analysis comparison with data calculation as function of temperature and pressure without allowance for ionization

15 p2828 A70-32691

Dissociation energy of gaseous TiN molecule at high temperature

15 p2695 A70-32748

Thermodynamic equations of state for dissociating and ionizing air in equilibrium, noting applications to vertical and oblique compression shocks [DGLR-70-026]

15 p2828 A70-32840

Fragment ion products velocity vector distribution for dissociative collisions of molecular ions with He

16 p2953 A70-33005

Gas breakdown produced by long wave IR pulsed radiation of carbon dioxide laser

16 p2928 A70-33655

Rocket chambers combustion products isentropic expansion effects within nozzle on dissociation degree, assuming shifting and frozen equilibria

16 p2963 A70-34341

Shock tube flow of dissociating oxygen with chemical relaxation using Lax method

17 p3070 A70-35243

Carbon dioxide electric discharge dissociation producing oxygen molecules

17 p3138 A70-35588

Perfect and dissociating gas nonstationary supersonic flow around sharp profile of finite thickness analyzed by linearization and method of characteristics

19 p3351 A70-37242

Carbon dioxide initial dissociation rates in glow discharges and gas mixtures at low pressures, using mass spectrometric sampling and plasma diagnostic methods

20 p3674 A70-39235

Diatomic fluorine dissociation energy by mass spectrometry

20 p3582 A70-39615

Self focusing schlieren observation in gas breakdown, discussing cubic polarizability of excited atoms in electron cascade due to laser pulses

21 p3835 A70-40594

Titanium dicarbide and tetracarbide vaporization at high temperatures, using Knudsen effusion method with mass spectroscopy, determining dissociation energies

21 p3773 A70-41274

Collision induced dissociation of nitric oxide and molecular oxygen ions at low kinetic energies, noting internal ionic excitation effects

21 p3773 A70-41398

Electron collisional detachment from negative fluorine ions in shock tube following nonequilibrium ion overshoot in CsF dissociation in argon, noting correlation with temperature

21 p3853 A70-41705

Equations for unsteady frozen nonequilibrium flow of dissociating and relaxing gas, using Lighthill ideal dissociating diatomic gas for aerothermochemical model

22 p4124 A70-42754

Threshold parameters of liquid and gaseous helium breakdown caused by ruby laser beam, noting Mandelstam-Brillouin scattering in liquid phase

22 p4051 A70-43465

Three body recombination and dissociation rate coefficients of nitrogen in Ar atoms heat bath, using modified phase-space theory

23 p4221 A70-44008

Dissociative nonequilibrium hypersonic flow of low density gas mixtures over flat plate in free stream, noting catalytic wall effect on flow field

23 p4135 A70-44604

GAS DYNAMICS

NT AERODYNAMICS

NT AEROTHERMODYNAMICS

NT HYPERSONICS

NT RAREFIED GAS DYNAMICS

NT ROTOR AERODYNAMICS

Moving gas with thermodynamic relaxation process, discussing bulk viscosity and application to shock structure calculations

01 p0063 A70-10927

Aerodynamic gas flame theory and computations, discussing diffusion burning, turbulent flow burning rate, Reynolds number effects, etc

01 p0217 A70-11006

Gas motion and heating by radiation behind shock wave front, noting ionization and radiation absorption occurrence

01 p0068 A70-11570

Soviet book on gas thermodynamics of solid propellant rocket engines covering combustion products equilibrium in nozzle and chamber, engine design, etc

02 p0353 A70-11690

Arc phenomena for producing interaction effects, discussing reflected shocks rarefaction waves and gas dynamics

02 p0345 A70-11863

Gas detonation dynamics associated with shock tube self ignition kinetics, noting chemokinetic factors role

02 p0397 A70-12024

Book on gas kinetics, treating experimental methods, reaction theories, transition state theories, complex processes, etc

02 p0251 A70-12058

Gas-stabilized electric arc heater electrical and gas dynamic parameters, studying velocity and enthalpy radial distributions and IV characteristics

03 p0531 A70-13386

Galactic bending dynamics, discussing omega and zeta motions coupling of neutral hydrogen in outer region

03 p0570 A70-13553

Formation of Maxwell and nonMaxwellian energy distribution in gases, noting reduction of time reversible to time irreversible equations

03 p0606 A70-13861

Gas dynamics analysis of explosion phenomena based on unsteady flow fields and thermodynamic properties of chemically reacting substance

03 p0607 A70-13922

Applied MHD and high temperature gas dynamics - Conference, Prague, May 1968

04 p0724 A70-14526

Ultrasonic beam scanning measurements in high temperature axisymmetric gas flow, discussing errors and use of numerical transformation methods

04 p0685 A70-14536

Difference methods application to supersonic gas flow past blunt body and unsteady axisymmetric flow past body of unspecified configuration, analyzing stability

04 p0670 A70-14957

Unsteady problems of gas dynamics solved by method of characteristics, Godunov method, difference methods, etc

04 p0670 A70-14958

Method of integral relations, finite differences and method of characteristics applied to numerical solution of steady state problems of gas dynamics

04 p0670 A70-14961

Integral relations and finite difference methods application to problems of boundary layer equations in gas dynamics

04 p0670 A70-14962

Temperature distribution around radiating sphere in homogeneous gas medium with molecular heat transfer, solving energy transport equation

04 p0785 A70-15012

Gas dynamics of intense explosion with expanding inner contact surface in Newtonian limit, discussing shock layer reattachment

04 p0619 A70-15322

Nonlinear wave propagation in relaxing gas with internal energy characterized by translational and internal temperature, using model equation for piston induced motion

04 p0786 A70-15324

Real gas properties effect on base pressure of blunt nosed vehicle flying through atmosphere at high velocities

04 p0764 A70-15556

Gas dynamics theory with nonequilibrium radiative and collisional ionization applied to strong normal shock wave structure

05 p0831 A70-15870

Thermal and gas dynamic characteristics of aircraft turbine engine annular vaporizing combustion chamber determined from air distribution ratio

05 p0895 A70-15897

Thermal and dynamical evolution of gas clouds in transparent and opaque stages by comparing rates of cooling, heating, contraction and expansion

05 p0907 A70-16041

Gas dynamic functions using critical velocity and Laval number

06 p1033 A70-17237

Numerical methods for solving Boltzmann gas kinetics equation, assessing various methods effectiveness

06 p1036 A70-17752

Approximate solution to Boltzmann gas kinetics equation, using moment relations of collision integral and reverse collision operator

06 p1036 A70-17758

Motion of gaseous medium with uniform deformation with respect to three dimensional Cartesian coordinates

06 p1036 A70-17854

Gas dynamic effects of reaction center in explosive gas mixture analyzed by model and numerical computation

[AIAA PAPER 70-147] 06 p1181 A70-18144

Collision cross sections direct measurement for determining macroscopic reaction rates in inelastic molecular collision processes in gas dynamics

06 p1113 A70-18276

Boltzmann equation at arbitrary Knudsen numbers and kinetics of polyatomic molecule gases

06 p1047 A70-18310

Monte Carlo method applied to solving nonlinear Boltzmann equation for plane shock waves in elastic sphere gases

06 p1050 A70-18335

Density field around leading edge of blunted flat plate, using electron beam measurements in low density hypersonic wind tunnel

06 p0980 A70-18351

Explosive driver development with hypervelocity gas in thin walled tube surrounded by concentric cylinder of high explosive, discussing detonation wavefront propagation

07 p1248 A70-19098

Numerical method of characteristics for unsteady radiation gas dynamics, discussing surface pressures and heat transfer rates

[AIAA PAPER 68-163] 07 p1256 A70-19314

Carbon dioxide gas dynamic layer in shock tube facility, measuring shape, time, output energy, beam diameter, etc

07 p1301 A70-20021

Model for gaseous proto-galaxy collapse and formation of spherical galaxy

07 p1390 A70-20287

One dimensional difference scheme for gas dynamics with heat conduction

08 p1482 A70-20859

Two temperature gasdynamics for binary gas mixtures of differing molecular weight components, analyzing ultrasound and shock wave propagation

08 p1486 A70-21808

Kramer problem in kinetic gas theory and gas dynamics applied to Boltzmann equation, discussing uniqueness theorem [ONERA-TP-776]

08 p1486 A70-21845

Transparent gas radiation behind strong shock wave front with small pressure gradient due to energy losses

08 p1486 A70-21986

Plane one dimensional motion of shock wave with moving inner boundary investigated for given shock wave front position and gas mass and energy

09 p1659 A70-22432

Aircraft turbine engines strength and gas dynamic characteristics improved by vibration decrease using elastic elements

09 p1742 A70-22471

Nonlinear stellar density waves in galaxy using gas dynamic equations, assuming one dimensional and steady waves

09 p1762 A70-23073

Uniaxial strain pulse propagation through various materials loaded uniformly with step function pressure by gas dynamic shock wave reflection

09 p1783 A70-23449

Discontinuous weak solutions of differential equations of gas dynamics as limits in topology of functions

10 p1866 A70-24109

One dimensional fluid flows with shock waves described by constructing discontinuous solution for gas dynamic equations, using successive approximation

10 p1866 A70-24113

Excited gas kinetic state determination from observed spectral profiles during interaction with radiation

10 p1919 A70-24147

Plane exponential reactive shock waves following piston impact on gamma-law gas solved by similarity method, including Whitham conditions and shock acceleration

10 p1967 A70-24194

Gas dynamics regarding velocity field excited by vibrations propagating over elastic wing surface at finite velocity

10 p1803 A70-24779

Noncircular ionized gas motions in NGC 253 central region observed in velocity field analysis, indicating outflow from center

10 p1946 A70-24979

Electrostatic dynamic energy converter load current analysis, deriving expression for space charge electric field with axially varying or constant charge distribution

10 p1808 A70-25036

Gasdynamic test stand analyzing elastoplastic strains in aircraft gas turbine disks and liquid-propellant rocket engines turbopumps under alternating nonisothermal loads

10 p1862 A70-25298

Gasdynamic functions of supersonic flow past spherically and ellipsoidally blunted inverted cones

11 p1973 A70-25522

Gas passing through shock wave, investigating constitutive relations for stress and heat flux using Maxwell moment method

11 p2036 A70-26015

Gas dynamic processes insufficiency for triggering transition to detonation obtained from laser schlieren records of nonsteady flow field ahead of accelerating turbulent flame

11 p2150 A70-26378

Monograph on relaxation processes at high temperatures for thrust nozzle calculation and optimization covering real gas effects, reaction kinetics, heat transfer, etc

11 p2103 A70-26475

Reduced second virial gas coefficients calculations by modified Lennard-Jones intermolecular potential function

12 p2180 A70-26860

Acoustic and gas dynamic characteristics of jet noise muffler using adapters at outlet section of exhaust nozzle

12 p2160 A70-27295

Spectra, luminescence and gas dynamic effects in variable stars, discussing nonthermal theory to explain continuous emission

12 p2306 A70-27857

Gas with large radial velocity in radio galaxy NGC 1275, suggesting constitution of separate galaxy

12 p2308 A70-27870

Piston formed weak steady shock wave propagation in relaxing gases, investigating via characteristics method

[DFVLR-SONDDR-38]

12 p2212 A70-28206

Kinetic theory of gas composed of identical particles with discrete velocity distribution, using Chapman-Enskog method

12 p2213 A70-28211

Nonstationary pressure pulse acting on body in liquid or gas, discussing flow with unperturbed parameters at infinity

12 p2213 A70-28239

Stagnation point position as function of gas thermodynamic state behind detached shock for spherical segment at incidence in three dimensional hypersonic flow

12 p2159 A70-28247

One dimensional steady state flows and discontinuities in radiation gas dynamics, neglecting radiation pressure, viscosity and heat conduction

13 p2387 A70-28937

Book on interstellar medium covering gas dynamics, dust, magnetic fields and nonthermal radio emission, cosmic ray diffusion in galaxy, gravitational instability theory, etc

13 p2490 A70-28996

Jeans escape rate error for atmospheric H and He attributed to perturbed velocity distribution function, using realistic atom-atom elastic scattering cross sections

13 p2398 A70-29226

EGD energy converter system geometries for maximum power efficiencies, comparing slender conversion channels, abrupt expansion, free jet and divergent for operating characteristics

14 p2534 A70-30536

Periodic shock waves amplitudes and profiles, investigating longitudinal nonlinear oscillations of gas excited in closed tube

15 p2719 A70-31482

Gravitational compression of spherical cloud, determining asymptotic features of gas motion near center

15 p2808 A70-32882

Gas dynamic molecular laser with electrons in ground state, using incoherent optical pumping from stationary shock wave

16 p2927 A70-33255

Vibrational relaxation and energy transfer processes in gas dynamic flows, discussing cross sections, atom-molecule interactions, molecular rotation, kinetic equations, etc

17 p3068 A70-34670

Dusty gas dynamics, examining shock wave structure, boundary layers stability, flow equations, acoustic damping, velocity and density perturbations, etc

17 p3068 A70-34671

Collection of papers on gas dynamics covering hypersonic flow, rarefied gas and plasma dynamics, heat and mass transfer, etc

17 p3069 A70-35031

Steady and unsteady gas dynamics analogies with two dimensional water flow, taking into account energy and continuity equations

17 p3069 A70-35032

Hypersonic flow past slender bodies, discussing inviscid flows, outer edge singularity of boundary layer and three dimensional interaction on needle-like bodies

17 p3010 A70-35035

Adiabatic and chemically inactive hypersonic continuum flow around blunt body, analyzing flow field

17 p3010 A70-35036

Radiation gas dynamics, investigating thermal radiation effects on flow field of high temperature gas

17 p3195 A70-35038

Relaxation gas dynamics with chemical reactions, emphasizing differences and similarities with classical gas dynamics behavior

17 p3071 A70-35467

Gas dynamics of explosions and reacting systems - Conference, Novosibirsk, U.S.S.R., August 1969

17 p3074 A70-35882

Gasdynamic equations in Euler variables, constructing completely conservative difference schemes with first and second orders of approximation

18 p3241 A70-36288

Gas turbines dynamics and control system requirements, discussing equipment design and reliability [ASME PAPER 70-GT-76]

18 p3305 A70-36887

Neutral H concentrations far from galactic plane associated with spiral arms

18 p3327 A70-37166

Radial velocities of neutral hydrogen in anticenter region of Galaxy

18 p3328 A70-37170

Boltzmann equation for relativistic gas, adapting Grad solution method

19 p3403 A70-37584

Boltzmann equation for relativistic gas without dissipation, solving for relaxation time and elastic collisions

19 p3403 A70-37586

Relativistic kinetic theory of gases, considering phase space quantum statistics, Liouville equation, Boltzmann equation, conservation laws, kinematics, equilibrium distributions, etc

19 p3404 A70-37594

Soviet monograph on gas dynamics one dimensional problems in variable networks, discussing difference schemes, boundary conditions and discontinuities

19 p3407 A70-38930

Radiative gas dynamic equations similarity representation with spherical symmetry, constructing numerical examples for strong explosions and implosions

20 p3609 A70-39657

Gas dynamic functions of point explosions, determining flow parameters for instantaneous energy release in quiescent, inviscid, nonheat conducting perfect gas

20 p3612 A70-39821

Nonlinear free boundary problem for hyperbolic one dimensional gas dynamics equations

20 p3658 A70-40105

Book on nonuniform gas theory covering viscosity, thermal conduction, diffusion, Maxwell-Boltzmann equations, density, quantum theory, transport phenomena, mixtures, electric fields, etc

20 p3673 A70-40135

Axial pressure, electric current and potential distribution in two-phase particulate electrodynamic flow, discussing space charge electric field effect

20 p3683 A70-40257

Gas dynamic quantum amplifier improvement, discussing power utilization, photon distribution and radiation transport

21 p3836 A70-41418

Computerized evaluation of Krook kinetic relaxation equation approximating Boltzmann nonlinear integral equation for rarefied gas motion

21 p3851 A70-42201

Decelerated channel flow dynamics of ideal gas with supersonic velocity closed by compression shock, using finite difference method

21 p3747 A70-42203

Laser torch plasma dispersion gas dynamics from motion and kinetics of ionization processes

21 p3839 A70-42238

Perfect gas acyclic and cyclic, steady and irrotational motions in subsonic regime around convex profile with constant curvature variation by Chaplygin method

21 p3846 A70-42259

Relaxation gas dynamics, discussing vorticity and drag generation by relaxation, linearized theory and shock waves structure

23 p4178 A70-43889

Plane shock wave decay by interaction with simple wave, solving nonisentropic equations of gas dynamics

23 p4179 A70-43969

Gas dynamic molecular laser with electrons in ground state, using incoherent optical pumping from stationary shock wave

23 p4201 A70-44284

Shock curvature at wedge or cone tip in radiating gas flow, noting differences between radiative and chemically coupled gas dynamics

23 p4135 A70-44638

Relativistic gas bulk motion nonrelativistic equations, demonstrating spatially random fluctuations damp suprathermal hydromagnetic perpendicular propagation mode to interstellar magnetic field

24 p4397 A70-45761

GAS EVACUATING U. EVACUATING [VACUUM]

GAS EVOLUTION

Free gas formation in propellant systems and effects on attitude control systems

[AIAA PAPER 69-434]

04 p0763 A70-15418

Tribonucleation emphasizing viscosity-velocity product in gas nuclei formation and cavitation

12 p2170 A70-27661

Ethylene-propylene elastomers compatibility with hydrazine determined under ambient conditions from gas evolution rate by catalytic decomposition

13 p2472 A70-28669

Gases adsorption on water snows in cometary nucleus, noting sublimation rate role as regulating mechanism in gas production

14 p2650 A70-31244

Gas formation by sliding friction of self lubricating Teflon with carbon black on steel in ultrahigh vacuum, using mass spectrometry [DFVLR-SONDDR-54]

15 p2745 A70-32446

Ammonium perchlorate pyrolysis, investigating exothermic surface reactions and gasification rates

16 p2963 A70-33873

Photosystem II and oxygen evolution kinetics

24 p4305 A70-46411

GAS EXCHANGE

Pulmonary artery blood sampled before or during rebreathing of carbon dioxide in nitrogen mixtures, at rest and during exercise, discussing oxygen pressure changes

01 p0020 A70-10652

Airway resistance effect on ventilation and gas exchange during exercise, discussing minute volume and work of breathing response

03 p0429 A70-14157

Alveolar ventilation difference in nasal and oral breathing in hyperventilation due to work

05 p0802 A70-16492

Slope and shape of blood-gas dissociation curve as factor influencing pulmonary gas exchange in presence of ventilation-perfusion inequality

06 p0994 A70-17522

Prolonged hypodynamia effect on human external respiration, arterial blood oxygenation, circulation rate and gas exchange under various physical stress conditions

10 p1814 A70-24674

Pursed lips breathing effects on ventilation and blood gas exchange in patients with chronic airway obstruction

15 p2684 A70-32538

Human muscular function in conditioned and unconditioned thermoregulatory reflex changes of gaseous metabolism during repeated cooling

18 p3218 A70-36528

Gas exchange adaptation to heat and cold in rats with different ecological backgrounds

18 p3218 A70-36533

Gas metabolism in passerine birds adaptation to ambient temperature

18 p3219 A70-36536

Gas metabolism, chemical thermoregulation, body temperature and weight of rats during adaptation to repeated high temperature exposure

18 p3219 A70-36538

High temperature adaptation, gas exchange and thermoregulation in dogs during repeated overheatings in open sunshine

18 p3219 A70-36539

Gas exchange, body temperature and electrical activity of neck and back muscles of cold-acclimated white rats subjected to various temperatures

18 p3219 A70-36540

Repeated local spine cooling effect on gas exchange and electrical activity of white rats skeletal muscles

18 p3219 A70-36541

Adaptive recession of gas metabolism in rats during multiple high temperature exposures

18 p3220 A70-36545

Altered respiratory pattern effect on alveolar gas exchange in mechanically ventilated dogs after introducing end-inspiratory pause

21 p3766 A70-42156

GAS EXPANSION

Nonequilibrium effect of expanding water vapor condensation on supersonic nozzle flows with or without inert carrier gas

01 p0063 A70-10806

Transient energy transfer during expansion of plane layer of radiating gas bounded by strong shock, assuming LTE and perfect inviscid nonconducting gas

02 p0279 A70-12230

Difference method for calculating one dimensional nozzle flow and expansion with allowance for relaxation, friction and heat losses, discussing fluorine-hydrogen mixture application

03 p0408 A70-13804

Monatomic gas steady expansion into cylindrical vacuum, considering Maxwell molecules with cylindrical symmetry

04 p0674 A70-15557

Plasma gas jets high velocity propagation, studying radiation precursor and divergence and expansion chamber effects

04 p0675 A70-15594

Time dependent expansions into vacuum of monatomic gases with spherical symmetry, obtaining moments expressions for Maxwellian molecules

05 p0831 A70-16015

- Temperature at end of admission process and exhaust gas temperature in cylinder of internal combustion engine using reversible adiabatic hypothesis
06 p1173 A70-17629
- Exhaust plume from underexpanded sonic and supersonic nozzles including boundary mixing analyzed by approximate model to predict Mach disk location [AIAA PAPER 70-229]
06 p0972 A70-18135
- Isentropic model for time behavior of steady spherical source expanding into arbitrary ambient gas [AIAA PAPER 70-232]
06 p1042 A70-18215
- Species spatial distribution measured for He-Ar gas mixtures expanding in supersonic jets, compared to measurements with skimmer-nozzle arrangement
06 p1066 A70-18256
- Nitric oxide free jet expansion, studying molecular cluster formation, inhibition and chemiluminescence
06 p1044 A70-18281
- Boltzmann equation fourth moment numerically solved to study distribution function characteristics during monatomic gases spherical expansions into vacuum
06 p1048 A70-18320
- Shock wave profiles in rarefied gas expansion flows, using static and impact pressure probes
06 p1052 A70-18386
- Numerical solutions of one dimensional expanding flow of dissociating gas initially in frozen state for variations in recombination rate
08 p1484 A70-21531
- Hypersonic spherical gas expansion into finite pressure region with transition from supersonic to subsonic flow in shock wave, discussing structure and pressure effects
09 p1658 A70-22116
- Arc driven shock tunnel operation with expansive area change at main diaphragm, evaluating flow characteristics
09 p1657 A70-23279
- External supersonic potential flow effects on turbojet engine ring and needle nozzle performance, considering gas overexpansion operation
10 p1930 A70-24286
- Comets ionized shells, studying plasma expansion in corpuscular solar wind magnetic field
10 p1940 A70-24372
- Wall heat transfer effect on expansion following Chapman-Jouguet detonation wave, calculating pressure and gas velocity profiles from friction coefficient
10 p1869 A70-24423
- Deuterium plasma expansion resulting from thermal shock produced by laser impulse
10 p1923 A70-24526
- Chemiluminescence from NO adiabatically expanded against supersonic H atoms stream in inert carrier
10 p1831 A70-24566
- Conducting gas unsteady efflux from plane tube into vacuum, determining time dependent position of expanding rarefaction wave fronts
10 p1924 A70-24569
- Tapered resonance tubes matching supersonic air jet geometries considered for explosion hazards created by pneumatic system seals failure
11 p2035 A70-25981
- Population inversions in rapidly expanded flows of nonequilibrium gases, discussing kinetic processes in cooled mixtures of shock heated nitrogen and carbon dioxide
11 p2041 A70-26572
- Oxygen cation electron dissociative recombination rate coefficient measurement during expanding oxygen flow in nozzle
12 p2276 A70-27802
- Steady expansion flows at three dimensional supersonic edges with small corner angles using analytical method of characteristics
13 p2338 A70-28491
- Time and spatial evolution of shock and expansion wave evolution from density discontinuity for gas with repulsive delta function interaction between particles
13 p2388 A70-29224
- Variable temperature plasma with two ion species, noting rarefaction wave propagation during one dimensional expansion into vacuum
13 p2464 A70-29415
- Spherically symmetric state of slightly ionized gas of unbounded expanse about catalytic conductor by nonequilibrium continuum theory, analyzing Debye number limit for electrostatic probes
14 p2665 A70-30946
- Pentolite spherical charge gaseous explosion products expansion into vacuum, using Taylor similarity solution for flow in detonation wave
15 p2774 A70-31764
- Inviscid air nonequilibrium shock layer properties correlation based on plenum entropy, predicting composition of downstream converging-diverging nozzle expanding air flow
16 p2838 A70-33909
- Rocket chambers combustion products isentropic expansion effects within nozzle on dissociation degree, assuming shifting and frozen equilibria
16 p2963 A70-34341
- Underexpanded carbon dioxide free jet expanding into vacuum from conical nozzles
17 p3070 A70-35246
- Conical expansion nozzles manufacturing errors effect on flow expansion considered for large Mach numbers
17 p3011 A70-35662
- Magnetic storms development via initial asymmetric inflation of evening magnetosphere, using Explorer 26 and ground observatory data
18 p3311 A70-36008
- Knudsen effusion in free molecular flows in supersonic jet during expansion through circular orifice, discussing power and heat transmission
18 p3346 A70-36379
- Convergent-divergent nonequilibrium nozzle flow numerical solution by time dependent technique, investigating rapid vibrational nonequilibrium supersonic expansion of gas mixture with population inversion
20 p3609 A70-39655
- Moist air expansion through supersonic nozzle, investigating small ions role in water condensation
22 p4011 A70-42774
- Mathematical model for plasma expansion resulting from short energy pulse absorption
24 p4387 A70-45799
- ### GAS EXPLOSIONS
- Gas dynamics of intense explosion with expanding inner contact surface in Newtonian limit, discussing shock layer reattachment
04 p0619 A70-15322
- Gas dynamic effects of reaction center in explosive gas mixture analyzed by model and numerical computation [AIAA PAPER 70-147]
06 p1181 A70-18144
- Gaseous detonation transverse wave propagation and measurement from smoked foil records
07 p1424 A70-20006
- Projectile acceleration under gas explosion calculated for velocity
09 p1777 A70-22723
- High electron density plasma generation by ionized gaseous filament explosion, noting plasma frequency effect on spectral brightness
10 p1915 A70-23961
- Detonation in nonuniformly heated gas capable of chemical reaction, obtaining numerical solution
17 p3198 A70-35737
- Tetrafluorodibromo-ethane and bromethyl inhibiting effects on explosion development in constant volume container and flame expansion rates in hydrogen-air mixtures
18 p3345 A70-36241
- Gas dynamic functions of point explosions, determining flow parameters for instantaneous energy release in quiescent, inviscid, nonheat conducting perfect gas
20 p3612 A70-39821
- MHD measurements of gas flow velocity and boundary layer in oxyhydrogen explosions in detonation tube
21 p3942 A70-40876
- Atmospheric pressure hydrocarbon-air mixtures confined by thin plastic membrane, obtaining composition range for detonation initiation limits
21 p3865 A70-40884

01 p0060 A70-10267
- Heat and mass transfer in Couette flow of partially ionized symmetric diatomic gas for chemical equilibrium and chemically frozen flow cases
01 p0060 A70-10290
- Normal shock waves in frozen, partly frozen and equilibrium flow in gas-solid particle mixtures
01 p0065 A70-11100
- Plasma arc wind tunnel gas velocity measurement with electron beam probe using closed-loop electronic controller to stabilize beam position
01 p0092 A70-11195
- Rumanian book on shock tubes covering facility construction, gas flow, electronic measuring equipment, etc
01 p0059 A70-11379
- Compressible gas flow problem in point body gravitational field solved with reference to sun and interstellar gas
01 p0172 A70-11489
- Navier-Stokes equations for compressible gas, generalizing viscous channel flow of heat conducting gas to slip flow of rarefied gas
01 p0068 A70-11579
- Potential triple traveling space waves in barotropic gas with arbitrary equation of state, analyzing adjacent and three dimensional self similar flows
01 p0068 A70-11582
- Dynamic behavior of dissociating homonuclear diatomic gas, deriving instability equations, proposing stability loss in transonic region
01 p0068 A70-11584
- Hydrodynamic approximation to interplanetary gas motion influenced by solar flare caused perturbations
01 p0192 A70-11586
- Speed ratio of rarefied gas flows by molecular miniature pressure probes with orifice at thin cylindrical tube side, discussing LTE deviation regions
02 p0296 A70-11871
- Self similar wave solutions of continuity and momentum equations for two dimensional unsteady isentropic motion of polytropic gas
02 p0278 A70-11998
- Optical density measurements in high speed confined air vortex, discussing light deflection mapping of vortex density field at off axis positions [AIAA PAPER 68-694]
03 p0480 A70-12906
- Heat resistant coatings in high temperature gas flow, studying external layer deformation kinetics during shrinkage
03 p0483 A70-13250
- Fracture and degree of material removal of glassy body in hypersonic gas flow, considering radiant heat conduction inside body
03 p0516 A70-13391
- Mean volume heat transfer coefficient, mean thermal head and coolant temperature determined for gas flowing through porous wall with internal heat source
03 p0605 A70-13474
- Turbulence in hypersonic nozzle due to two phase flow of ideal gas and solid spherical particles, discussing thermal and dynamic differences
03 p0407 A70-13494
- Incompressible gas turbulent jet flow characteristics in subsonic wind tunnel, stressing pressure distribution in recirculation region for interpreting heat transfer in separated flows
03 p0593 A70-13495
- Rib-reinforced rectangular plate flutter in gas flow, considering shell stability, rib torsional rigidity, etc
03 p0593 A70-13498
- Carbon dioxide supersonic flows, describing numerical integration procedure for chemical and vibrational relaxation
03 p0440 A70-13743
- Supersonic unsteady gas flow around bodies at low Strouhal numbers, noting angle of attack amplitude and leading edge shock wave
03 p0409 A70-13865
- AD Herculis components as Algol system with gas flow based on observed absorption effects
03 p0577 A70-14100
- Boundary value problems for partial differential equations representing steady gas flow hydrodynamic problems
03 p0469 A70-14228
- Axisymmetric and three dimensional gas flow around blunt bodies using numerical methods, discussing finite difference algorithms for gas dynamic equations
03 p0410 A70-14251
- Natural oscillations and flutter of three layer cylindrical shell in supersonic gas flow analyzed by semimomentless theory, discussing boundary value problems, damping effects, etc
03 p0600 A70-14301
- Viscous compressible heat conducting laminar perfect gas flow in slender axisymmetric channels with adiabatic walls, using equations of motion
03 p0471 A70-14383
- Discharges in Ar flow in membrane shock tube at Mach 5, discussing plasma compression, shock wave position and effect on electrode region
04 p0725 A70-14534
- Nonlinear rarefied Couette flow with heat transfer in polyatomic gases, using kinetic theory of gases [ASME PAPER 69-WA/HT-39]
04 p0781 A70-14803
- Mass flow rate calculation of methane and natural gas mixtures through critical flow nozzles [ASME PAPER 69-WA/FM-4]
04 p0667 A70-14839
- One dimensional unsteady gas flows formation theories extended to include viscosity, heat conductivity, diffusion and chemical reactions effects
04 p0672 A70-15230
- Viscous gas self similar channel flow with heat transfer at wall corresponding to fixed Mach number profile in all channel cross sections
04 p0673 A70-15231
- Hypersonic viscous gas flow past power law bodies under viscous interaction between boundary layer and inviscid flow extended to slender bodies
04 p0618 A70-15240
- One dimensional steady adiabatic source nonisentropic flow of thermally and calorically perfect gas in

conical nozzle, considering exit divergence and nonuniform flow effects

04 p0619 A70-15427

Gas core nuclear reactors feasibility based on gas core hydrodynamics, heat transfer and neutronics development, noting spacecraft weight and trip time reduction potential

04 p0717 A70-15639

Ideal equivalent gas method for studying thermodynamic properties in supersonic gas flows behind shock wave

05 p0831 A70-15872

Equivalent pressure concept for breakdown processes and sparking voltage of gas moving at angle to electric field across uniformly stressed gap

05 p0881 A70-16000

Low Reynolds number flow of variable property gas past infinite heated circular cylinder at large temperature differences, measuring drag on cylinder

05 p0789 A70-16014

Sliding tube assembly for diverting carrier gas from flow pattern of Verneuil apparatus for flame fusion crystal growth

05 p0829 A70-16849

Unsteady laminar gas flow near infinite flat plate using Laplace transforms, obtaining closed form solutions for plate velocity and temperature

05 p0836 A70-17106

DC electric arc with superimposed axial subsonic gas flow breakdown voltage and anode heat transfer using high speed photography

06 p1177 A70-17697

Spatially homogeneous distribution function describing uniform gas motion derived to permit computer calculations in obtaining numerical solutions to kinetic equation

06 p1036 A70-17753

Water flow with solid particles, obtaining predictions for two component two phase gas flow

06 p1037 A70-17899

Cold ducted supersonic flow of premixed ethylene and air ignition by hot turbulent jet

[AIAA PAPER 70-148]

06 p1131 A70-18057

Time dependent inviscid gas flow on infinite domain computed by finite difference method

[AIAA PAPER 70-45]

06 p1042 A70-18188

Electron gun onboard reentering spacecraft to measure densities and temperatures in flowing gases

06 p1066 A70-18286

Interactions between hypersonic neutral gas beam and orificed pressure gauge in spinning satellite noting dependence on angle of attack

06 p1159 A70-18290

Monte Carlo method for modeling gas flow by simulated molecules concurrently followed through collisions and boundary interactions in simulated physical space within computer

06 p1113 A70-18314

Monatomic gas flow past moderate curvature body, obtaining approximate solutions to Boltzmann equation under form of matched asymptotic expansions

06 p0979 A70-18316

Transition regime gas flows using Navier-Stokes equations and boundary conditions set, considering heat transfer, torque and drag in spherical geometry

06 p1049 A70-18331

Thermal slip velocity of gas in infinite temperature gradient tangential to solid wall, basing calculation on linearized Boltzmann kinetic equation

06 p1049 A70-18332

Finite difference analysis of partial differential equations derived from Navier-Stokes equations in hypersonic leading edge problem in merged gas flow-layer regime

06 p0980 A70-18349

Shock wave profiles in rarefied gas expansion flows, using static and impact pressure probes

06 p1052 A70-18386

Radiating gas flows during hypersonic planetary reentry, discussing atmospheric composition, shock layer characteristics, nonequilibrium flows, etc

06 p0985 A70-18558

Nonequilibrium processes behind shock wave in shock tube supersonic air and nitrogen flow, using photoelectrical shadow method

06 p1053 A70-18562

Rarefied gas flow past sphere, using integral iteration method for Krook equation

07 p1187 A70-18675

Equilibrium forms of prolonged rectangular plate in gas flow in terms of nonlinear boundary problem, emphasizing plate with hinged supports

07 p1187 A70-18679

Turbulent friction in gas flow core determined on basis of maximum stability principle

07 p1253 A70-18719

Three dimensional hypersonic flow past body solved assuming developable surface head shock wave

07 p1187 A70-18767

Laminar flow of compressible gas in axisymmetrical channel in absence of wall insulation using velocity profiles, heat transfer, etc

07 p1253 A70-19062

Velocity fields and turbulent pulsations effects on heat transfer in gas flow past plate with rectangular protrusion using wind tunnel tests

07 p1254 A70-19063

Low density hypersonic flow over slender cone using air and He test gases

07 p1188 A70-19309

Asymptotic behavior of inviscid radiating gas flow near stagnation point of blunt body

07 p1188 A70-19315

Gas phase ignition theory of evaporating fuel in stagnant hot oxidizing gas as function of temperature

07 p1421 A70-19317

Current sheet pattern and gas flow stabilization in pulsed plasma accelerators

[AIAA PAPER 69-112]

07 p1348 A70-19322

Real gas behavior effect on shock tube temperature and pressure flow nonuniformity for range of Mach numbers

07 p1257 A70-19337

Sound waves dispersion and attenuation produced in gas flow by relaxation effects of solid particles presence

07 p1258 A70-19567

HF arc anemometer for subsonic and supersonic gas flow turbulence measurement

07 p1285 A70-19837

Earth ionosphere and magnetosphere electrodynamic state as function of neutral gas small scale motions, considering magnetic disturbances and ionospheric discontinuities

07 p1276 A70-20426

Boundary value problem solution in study of axisymmetric viscous heat conducting gas flow past body of revolution

08 p1431 A70-20854

Combustion kinetics in supersonic gas flows past various bodies, assuming exothermal and inverse recombination reactions behind adiabatic shock wave after induction period

08 p1596 A70-20855

Three dimensional gas flow calculated by direct method of characteristics

08 p1431 A70-20860

Gas flow influence on wave characteristics of thin viscous liquid layers pulled by gravity vertical surface compared with water layer experiments

08 p1482 A70-20917

Aerodynamic characteristics of nonconvex bodies in free molecular flow of monatomic gas

08 p1547 A70-21081

Infinitely wide plate bending at small angle of attack in supersonic gas flow, obtaining critical flow rate equal to divergence rate

08 p1588 A70-21175

Variational problem of determining optimal heat transfer from gas flow to porous plate boundary layer

08 p1597 A70-21176

Shock ionized Ar flow properties estimation using alignment charts

08 p1551 A70-21324

Dominant radiation field interaction with gas flow field using matched asymptotic expansion method

08 p1598 A70-21579

Navier-Stokes equations exact solutions for two dimensional steady flow of compressible viscous heat conducting perfect gas

08 p1485 A70-21638

Gas flow in pipe with uniform wall heat flux, analyzing turbulent heat transfer using heat balance equation

[ASME PAPER 69-HT-H]

08 p1486 A70-21834

Aerothermochemistry of two phase flow in gaseous media of solid or liquid particles or spherical gas pockets

[ONERA-TP-691]

08 p1600 A70-21848

Gas flow in arc heaters, discussing dissociation, ionization, swirl flow, arc discharge, gas temperature/pressure ratio, gas composition, etc

08 p1554 A70-21925

Continuous generation of gas trace component quantities into carrier gas flow using dosage device

09 p1672 A70-22028

Natural oscillation frequencies of subsonic gas flow past plate array, solving eigenvalue problem by splicing method

09 p1603 A70-22117

Local heat transfer to gas mixed with graphite particles described for variable temperature differences and wall temperatures

09 p1787 A70-22174

Survey of papers on computer calculation of two and three dimensional gas flows, emphasizing method of characteristics and finite difference techniques

09 p1603 A70-22265

Steady laminar gas flow on duct wall boundary layer considering external swirling flow and wall heat transfer

09 p1659 A70-22428

Steady turbulent perfect compressible gas flow in axisymmetrical or plane channel, using equations governing channel height and static pressure variations

09 p1659 A70-22429

Energy losses in gas turbine flows ascribed to combined exhaust and internal losses, noting usefulness of entropy loss concept

09 p1743 A70-22659

Magnetic field and gas thermal conductivity effects in analysis of solar wind as one dimensional, steady and spherically symmetric flow

09 p1745 A70-22687

Relaxation time influence on mass output calculation errors for gases in small diameter sonic nozzles

09 p1604 A70-22841

Macroscopic properties of thermal molecular flow between coaxial cylinders and concentric spheres, using transpiration theory in Knudsen gas

09 p1788 A70-22906

Dissociative-recombination rate coefficient measured for dissociative recombination reaction in inviscid nozzle flow of reflected shock tunnel, using high temperature and pressure nitrogen

09 p1737 A70-23225

Fluidic vortex valve to modulate solid propellant generated hot gas flow

[AIAA PAPER 69-424]

09 p1743 A70-23249

Laminar boundary layers behavior in shock tube flows behind primary moving shock wave using perturbation method

09 p1662 A70-23281

Population inversion generation through gaseous oxides mixing with nitrogen flow thermally excited

09 p1700 A70-23569

Heat transfer from circular cylinder in rarefied gas flow at low Mach number, using B-G-K model of Boltzmann equation

09 p1791 A70-23582

Hydrogen 21 cm emission line in Pegasus region observed for motion of neutral hydrogen connected with II Per, discussing stellar radial velocity

10 p1937 A70-23944

One dimensional Navier-Stokes equations solution for viscous heat conducting gas flow involving spherical sink for finite pressure at infinity

10 p1865 A70-24104

Perturbed equations solutions for plane supersonic steady and nonsteady gas flows, considering propagation of perturbations in initially nonstationary main flow

10 p1866 A70-24107

Inverse blunt body problem using integral relations method assuming inviscid axisymmetric hypersonic gas flow

10 p1798 A70-24116

Three dimensional supersonic gas flow solution by numerical method of characteristics, discussing direct and inverse tetrahedral and semicharacteristic schemes

10 p1798 A70-24117

Gas flow from nozzle into duct with enlarged cross section investigated for flow pattern and boundary conditions, noting oscillation behavior

10 p1799 A70-24123

Shock wave and gas flow structure at constant Mach number past three dimensional blunt bodies, applying method for unsteady flow

10 p1799 A70-24127

Transonic aerodynamics problems concerning plane and spatial rotational flows of perfect gas, discussing analytical and numerical methods

10 p1800 A70-24132

Supersonic gas flow past sphere investigated for characteristics using Fabry-Perot etalon

10 p1888 A70-24258

Molecular, viscomolecular and laminar gas flows in tubes and porous bodies at low pressures

10 p1869 A70-24287

Chaplygin function approximation in subsonic steady gas flow analysis

10 p1909 A70-24293

Model testing gas flow calculation in system emitting electron beam into atmosphere through supersonic gas seal

10 p1895 A70-24590

Hypersonic viscous interactions on insulated slender cone with mass injection assuming perfect gas flow and negligible transverse curvature effects

10 p1803 A70-24821

Gas flow rate measurement by repeated spark method suitable for stationary and nonstationary flows past surfaces of complex shape

10 p1892 A70-25119

Laminar flow of compressible gas in axisymmetrical channel in absence of wall insulation using velocity profiles, heat transfer, etc

10 p1871 A70-25213

Velocity fields and turbulent pulsations effects on heat transfer in gas flow past plate with rectangular protrusion using wind tunnel tests

10 p1871 A70-25214

Population inversions in rapidly expanded flows of nonequilibrium gases, discussing kinetic processes in cooled mixtures of shock heated nitrogen and carbon dioxide

11 p2041 A70-26572

- Electric arc column properties in channel gas flow, including electric fields distribution of potential and heat conduction function 11 p2092 A70-26729
- Electric arc in cylindrical channel gas flow described by boundary layer equations, assuming equilibrium and quasi-neutral media 11 p2151 A70-26730
- Heat exchange in linear vortex plasmatron with bilateral ejection, noting dependence on electrodes geometry and gas flow rates 11 p1984 A70-26737
- Carrier gas effect on homogeneous condensation in supersonic nozzle using liquid drop theory 12 p2211 A70-27829
- Shock wave reflection into ideal gas flow with linear density variation analyzed for flow field 12 p2211 A70-27832
- Carbon dioxide laser electrical discharge stabilization against transverse gas flow by cross magnetic field 12 p2250 A70-28099
- Turbulent and laminar heat transfer to gases in circular ducts entry region, considering various gas properties 12 p2212 A70-28114
- One dimensional perfect gas motion under spatial pressure distribution, investigating self similar solutions 12 p2212 A70-28189
- Vortex layer and entropy of supersonic gas flow past circular cones at incidence using surface velocity corrections 12 p2159 A70-28230
- Gasdynamic flows strong and weak density discontinuity surfaces determination, using shadowgraphs and interference patterns 12 p2238 A70-28248
- Monge equation in small perturbation method of characteristics applied to propagation phenomena in three dimensional supersonic gas flow 13 p2386 A70-28490
- Pressure measurements and gas flow analysis during thermal vacuum tests of manned spacecraft indicating adequate space vacuum simulation [AIAA PAPER 69-1033] 13 p2384 A70-28518
- Graphite mass removal rates under ohmic heating in reacting gas turbulent flows 13 p2519 A70-28579
- DC plasma arc jet excitation and emission characteristics for solution analysis with economical inert gas flow rates 13 p2362 A70-29107
- Steady diabatic complex lamellar gas flow, obtaining parameters by extending geometric theory of surfaces and curves in fluid flow theory 13 p2387 A70-29122
- Inviscid thermally nonconducting gas unsteady and steady motions in Laval nozzle of known geometry, obtaining solutions for subsonic, transonic and supersonic regions 13 p2391 A70-29756
- Rarefied gas flow in slip regime through cylindrical tube assuming parabolic velocity profile 14 p2565 A70-30263
- Radiating gas flow about pointed bodies, investigating shock curvature at wedge or cone tip and straight shock waves flow field downstream 14 p2663 A70-30267
- Gas transfer through silicone elastomer capillaries wall in variable pressure chamber 14 p2541 A70-30386
- He-Cd laser construction with quartz tube manufactured separately, describing flow-through processing 14 p2594 A70-30509
- Gas flow calculations application to gas turbines simulations, considering engine dynamics, one dimensional flow and program structure 14 p2629 A70-30990
- High temperature inviscid flow of ideal radiating gas, analyzing effects of radiation pressure and energy on flow field 14 p2666 A70-30999
- Rarefied gas flow past sphere, using integral iteration method for Krook equation 15 p2671 A70-31467
- Equilibrium forms of prolonged rectangular plate in gas flow in terms of nonlinear boundary problem, emphasizing plate with hinged supports 15 p2671 A70-31471
- Viscous gas hypersonic flow past blunt nosed bodies based on Navier-Stokes equation 15 p2671 A70-31481
- Subsonic and transonic gas flow in wake behind finite thickness plate based on Navier-Stokes equations 15 p2719 A70-31484
- Reinforced shells of revolution carrying capacity upper limit subjected to internal adiabatic ideal gas flow 15 p2814 A70-31534
- Internal shock waves in axisymmetric flowfield of perfect gas past blunt cone, noting roles of Mach number and cone half angle 15 p2672 A70-31592
- Hypersonic gas flow characteristics incident on elliptic paraboloid and triaxial ellipsoid at arbitrary angles of attack 15 p2672 A70-31647
- Superradiant pulsed 5401 A neon laser for interferograms of gas flow through nozzles in shock tunnel 15 p2750 A70-31763
- Aerothermopressor experiment in subsonic and supersonic gas flow compared with numerical solutions of equations 15 p2720 A70-31900
- Gas flow velocity measurement by coherent detection of scattered laser radiation from small particles suspended in fluid, using Doppler effect 15 p2751 A70-32030
- Electric arc in unbounded axisymmetric steady gas flow, solving energy equation 15 p2780 A70-32129
- Boundary layer equations for laminar flow, drag and heat transfer of gas in circular tube, considering parabolic and uniform entrance velocity profiles 15 p2722 A70-32692
- Laser Doppler velocimeter for measuring turbulence in gas and fluid flows 16 p2926 A70-33140
- Supersonic and hypersonic gas flow past blunt bodies, using finite difference and integral relation methods 16 p2890 A70-33244
- Stationary hydrodynamic equations of gas channel and nozzle flow with inlet tangential discontinuities 16 p2833 A70-33247
- Monograph on steady shock waves in one dimensional frictionless gas flows with thermodynamic relaxation, using continuum mechanics 16 p2891 A70-33294
- Gaseous flows and local droplet velocity measurement in dense gas/liquid sprayfields, using noninterference technique 16 p2910 A70-33491
- [AIAA PAPER 70-728] Maximum thrust nozzles design for rotational or nonequilibrium simple dissociating gas flows, including boundary layer effects 16 p2891 A70-33567

- [AIAA PAPER 70-681] Flow and diffusion phenomena in rarefied gas mixtures associated with separation nozzle process, using molecular pressure probe and mass spectrometer 16 p2893 A70-33699
- Experimental and numerical nonequilibrium shock layer around cones in hypersonic pure oxygen flows with simultaneous rotational, vibrational and dissociation relaxation [AIAA PAPER 69-136] 16 p2894 A70-33858
- German monograph on temperature distribution and motion of free burning arcs in transversal magnetic fields and gas flows, covering aerodynamic model concept 16 p2959 A70-34077
- Gas flow velocity measurement using hot foil probes 17 p3082 A70-34680
- Shock tube orifice effect on gas flow velocity and pressure drop, using pressure probes and Jenny friction formula 17 p3069 A70-34699
- Shock tube flow of dissociating oxygen with chemical relaxation using Lax method 17 p3070 A70-35243
- Supersonic electrically conducting gas flow in flat channel with dielectric walls in inhomogeneous magnetic field 17 p3141 A70-35334
- Heat transfer and friction drag calculation for turbulent boundary layer of gas with temperature dependent physical properties 17 p3012 A70-35729
- Heat and gas curtain efficiency in turbulent boundary layer on flat plate, including heat transfer data 17 p3198 A70-35731
- Viscous heat-conducting one dimensional piston driven gas flow, assuming sharp shock discontinuity 17 p3075 A70-35890
- Plane nonconducting elastic plate with one side impinged upon by supersonic conducting gas flow, determining magnetic field effect on flutter vibrations 18 p3336 A70-36135
- Hypersonic gas flow around blown plane of segmentally blunted cones at large angle of attack, using two dimensional model 18 p3206 A70-36258
- Laminar gas flow enthalpy determination in stagnation regions based on energy balance equation across separation streamline 18 p3240 A70-36266
- Unsteady two dimensional gas flow calculation axisymmetric shock tube of variable cross section, using numerical method 18 p3240 A70-36275
- One dimensional steady gas flow, deriving algorithm for iterative solution of Boltzmann kinetic equation by statistical approach 18 p3241 A70-36285
- Soviet book on passenger aircraft aerodynamics covering motions of gases and immersed bodies, similarity laws, boundary layer theory, finite span wing, etc 18 p3208 A70-36507
- Turbulent coaxial flow analysis predicting fuel volume fraction in gas core nuclear rocket reactor cavity, using free-jet computer code and eddy viscosity equation 18 p3290 A70-36560
- Radiative energy loss and wall sublimation effects on gas flow parameters behind reflected strong plane shock wave, taking into account small disturbances 18 p3348 A70-36673
- Method of characteristics for two dimensional steady supersonic gas flows with foreign particles in plane and axisymmetric nozzles 18 p3210 A70-37228
- Optimal control for one dimensional compressible gas flow, combustion and heat exchange, described by first order partial differential hyperbolic equations 19 p3402 A70-37240
- Conducting gas channel and jet flow in electric and magnetic fields, using linearizing equations of motion under assumption of small magnetic Reynolds number 19 p3479 A70-37598
- Multicomponent chemically unstable nonequilibrium gas flow past body, taking into account boundary layer behavior 19 p3373 A70-38182
- Heat transfer behind shock wave in air, oxygen or carbon dioxide flow past wedge, determining thermal fluxes vs wave velocity 19 p3405 A70-38188
- Heat resistant coatings in high temperature gas flow, studying external layer deformation kinetics during shrinkage 19 p3428 A70-38468
- Gas flow velocity measurement by thermal signal emitted from thin wire fed with modulated known frequency current 19 p3406 A70-38673
- Pressure and temperature distribution in constant volume viscous Poiseuille gas flow velocity profile 20 p3608 A70-39121
- Electrically conducting gas flow past slender body of arbitrary cross section in presence of crossed magnetic field by MHD Stokes approximation 20 p3558 A70-39613
- Three dimensional supersonic and hypersonic gas flow by Oseen equations, obtaining asymptotic flow field 20 p3609 A70-39656
- Optical image hologram production, investigating gas flows around body by means of Mach-Zehnder interferometer 20 p3633 A70-39761
- Laminar boundary layer equations on plate with arbitrary catalytic properties in diatomic gas flow undergoing vibrational dissociative relaxation 20 p3611 A70-39802
- High velocity gas motion in laminar boundary layer, describing universal motion equations two parameter solution 20 p3611 A70-39805
- Radiation field multidimensionality effect on radiating gas jet flow, taking into account radiative energy transfer by differential approximation 20 p3611 A70-39808
- Chemically active surface decomposition in dissociated gas flow with turbulent boundary layer, determining diffusion fluxes in laminar sublayer 20 p3612 A70-39812
- Flow rate, momentum and energy perturbations during gas motions through shock wave, discussing acoustic waves impinging from supersonic region 20 p3612 A70-39815
- Shock tube with diffuser in low shock wave Mach number range, considering gas flow models to relate wave intensity to initial conditions in chambers 20 p3606 A70-39820
- Heat fluxes from shock-heated gas to shock tube wall and wedge surface as function of Mach number, using platinum resistance thermometers 20 p3613 A70-40343
- Local variables in boundary layer of high temperature ionized gas flowing in magnetic field, using X ray absorption 20 p3613 A70-40344
- Turbulent gas boundary layer at finite Reynolds numbers, investigating relative changes in friction and heat transfer coefficients and temperature factor 20 p3614 A70-40390
- Gas flow rate measurement by repeated spark method suitable for stationary and nonstationary flows past surfaces of complex shape 20 p3635 A70-40512
- Axisymmetric detached shock before blunt body in hypersonic monatomic gas flow, obtaining radiative ionization patterns in cold precursor 21 p3950 A70-41731
- Interaction zone between gas flow and injected air jets, measuring turbulence characteristics by thermocanemometer 21 p3809 A70-41773

Viscous gas flow through Laval nozzle, calculating velocity coefficient and pressure recovery in contracting and expanding parts

21 p3746 A70-41774

Inviscid thermally nonconducting gas unsteady and steady motions in Laval nozzle of known geometry, obtaining solutions for subsonic, transonic and supersonic regions

21 p3811 A70-42074

Heat transfer from thin plate in compressible gas flow, considering interface temperature as nonanalytic function

21 p3953 A70-42086

Gas velocity and static pressure effects on evaporation rate of moving liquid fuel droplets

21 p3953 A70-42094

Self similar formulations for motion of radiating-absorbing perfect gas symmetric flow

21 p3954 A70-42202

Linear corrections formulas for shear stress and heat transfer coefficients associated with boundary layer blowing in binary gas mixture

21 p3748 A70-42207

Two layer gas flows in supersonic axisymmetric nozzles, using method of characteristics

21 p3748 A70-42210

Subsonic channel incompressible gas flow past semiinfinite flat plate base, using flow pattern for cavitation flow

21 p3748 A70-42213

One dimensional supersonic flow of ideal conducting gas in linear channel under transverse magnetic field

21 p3861 A70-42228

Perfect gas circular subsonic flow around convex obstacle, using hodographic method for boundary problem

22 p3958 A70-42608

Shock wave damping by perforated walls in gas channel, visualizing curved fronts with 24-spark HF camera

[SMPTE PREPRINT 104] 22 p4032 A70-43031

Spark tracing in gaseous flows in flames, wind tunnels, nozzles and pneumatic valves, using pulse transformer

[SMPTE PREPRINT 41] 22 p4033 A70-43041

Gas velocity measurement by high speed schlieren observation of laser induced breakdown phenomena

[SMPTE PREPRINT 27] 22 p4034 A70-43048

One dimensional perfect gas motion under spatial pressure distribution, investigating self similar solutions

22 p4012 A70-43314

Viscoelastic strip in gas flow, analyzing stability conditions

22 p4117 A70-43353

Potential flow around oscillating shell-plate structure subjected to supersonic gas flow at zero angle of attack, solving nonlinear aerelasticity problem

22 p4117 A70-43362

Isentropic gas two dimensional unsteady flow through channel contraction, using hydraulic analogy

22 p4012 A70-43438

Expiratory gas flow oscillations during forced vital capacity maneuvers in atmospheres of various composition and pressure

22 p3981 A70-43702

Controlled filling of container with compressed gas through time-variable cross section inlet, using variable mass thermodynamics

23 p4180 A70-44160

Internal shock waves in axisymmetric flow field of perfect gas past blunt cone, noting poles of Mach number and cone half angle

23 p4133 A70-44276

Steady irrotational gas flow characteristics calculation from finite difference scheme for three dimensional method of characteristics, considering supersonic nozzle flow

23 p4133 A70-44308

Reacting gas supersonic flow over two dimensional base, examining reaction rate effects on base pressure

23 p4135 A70-44626

Viscous compressible gas flows in pipe initial section, calculating friction and heat transfer coefficients

23 p4135 A70-44734

Turbulent nonadiabatic flow of compressible gas at inlet and main sections of variable cross section plane channel

23 p4183 A70-44739

Low Reynolds number gas flow past heated circular cylinder, considering Stokes region transport properties

23 p4284 A70-44978

Non-LTE radiative gas flow conservation equations

24 p4325 A70-45610

Simple wave functions solutions in multidimensional nonviscous polytropic gas unsteady and steady flow

24 p4327 A70-46030

Diabatic steady gas flow vorticity, examining various kinematic and kinetic properties

24 p4328 A70-46365

GAS GENERATOR ENGINES

U ENGINES

U GAS GENERATORS

GAS GENERATORS

Strong shocks and high temperature gases production using multistage gaseous detonation driven shock tube

02 p0274 A70-11855

Solid propellant cool gas generating systems applications to inflating emergency escape slides, rafts, pontoons and flotation bags

06 p0986 A70-17720

Cool gas inflation systems for evacuation equipment on large aircraft with size and weight fitting into aircraft doors

06 p0986 A70-17721

Continuous generation of gas trace component quantities into carrier gas flow using dosage device

09 p1672 A70-22028

Electrodynamic generator channel electric field model, evaluating electric body forces on ionized working fluid flow

10 p1807 A70-24571

Electrodynamic generator with spatial charge neutralization for direct thermal-to-electrical energy conversion at high gas pressures

12 p2165 A70-27330

Pressurization system for nitrogen generation based on hydrazine catalytic decomposition, describing metal membrane configuration, fuel additives, etc [AIAA PAPER 70-682]

16 p2962 A70-33583

High temperature and pressure hot gas source for testing fluidic temperature sensor used in gas turbine engine inlet simulation

17 p3058 A70-35157

Optimum adaptation of propulsion gas generators to power jet driven rotors with blown flap control, considering jet engine, fanjet and engine driven compressor

17 p3024 A70-35661

Solid oxygen generator for oxygen gas production from sodium chlorate decomposition, discussing reliability, safety and maintenance

18 p3225 A70-36211

Electrodynamic generator with spatial charge neutralization for direct thermal-to-electrical energy conversion at high gas pressures

21 p3760 A70-42071

Solid propellant cool gas generating systems, discussing development history, general capabilities and applications

22 p3962 A70-42297

GAS GUNS

Hypervelocity gas, electromagnetic, explosive drive and exploding wire accelerometers and high explosive, shaped charge, plasma drag and electrostatic accelerators for projectile impact studies

15 p2718 A70-32783

Gas gun and instrumentation for impact tests

18 p3238 A70-37090

Ames Hypervelocity Free Flight Facility, discussing aerodynamic tunnel, radiation tunnel and light gas gun for reentry simulation

22 p4006 A70-42764

GAS HEATING

Gas motion and heating by radiation behind shock wave front, noting ionization and radiation absorption occurrence

01 p0068 A70-11570

Thermal properties of neutral interstellar gas heated by low energy cosmic rays, noting role of electrons in heating processes

02 p0364 A70-11783

Electrical and thermal characteristics of stabilized gas heating by electric arc at high pressures calculated by successive approximation

07 p1350 A70-19840

Intense laser radiation effect on light absorption, gas breakdown and formation of spark at focus

10 p1899 A70-24154

Gas heating and ionization by Q switched laser beam, discussing electron collisions, density, etc

12 p2277 A70-27007

High temperature, electrically heated convective gas heating system for high velocity atmospheric flight simulation using air-nitrogen working fluids

12 p2205 A70-27100

Self heating accompanying exothermic decomposition of gaseous diethyl peroxide in spherical vessel measured positionally by thermocouple

12 p2330 A70-27223

Pulsed CO₂ laser calculating upper level lifetime of carbon dioxide molecule with allowance for gas heating at relaxation

12 p2251 A70-28296

Radiant gas heater for Brayton cycle space power system

[ASME PAPER 70-GT-36] 18 p3303 A70-36834

Interstellar gas thermal instability under cosmic ray heating, investigating perturbations causing transition to dense cool phase in pressure equilibrium with intercloud phase

18 p3309 A70-37003

Crab Nebula filamentary system, examining excitation conditions in terms of ionization and heating by HF radiation

20 p3702 A70-39011

GAS INJECTION

Hydrogen-oxygen variable length combustor longitudinal instability, studying hydrogen injection temperature effects on pressure interaction index and pressure sensitive time lag

01 p0214 A70-10324

Rocket engines gas/liquid injectors atomization characteristics using molten wax technique, considering drop sizes and gas streams velocity, density and pressure

01 p0161 A70-10326

Gaseous He bubbles injection into liquid propellant launch vehicle fuel lines to reduce vehicle pogo oscillations by lowering feed system natural frequencies

01 p0196 A70-10851

Foreign gas injection and slot geometry influencing film cooling effectiveness

01 p0219 A70-11182

Laminar isothermal entrance flows in circular cross section ducts with uniform mass injection at wall from boundary layer equations, discussing molecular weight effects

02 p0288 A70-12859

Porous wall material entrainment in turbulent boundary layer during supplementary inert gas injection, including nonisothermicity effects in heat and mass transfer equations

03 p0440 A70-13385

Optimization of control forces in rocket nozzles produced by multipoint secondary gaseous injection

05 p0923 A70-15889

Heat and mass transfer in reacting laminar boundary layer over porous cylinder with propane injection in wind tunnel experiments

05 p0956 A70-16289

Inviscid gas injection through flat plate in supersonic flow, obtaining self similar solution by integrating differential equation for stream function

05 p0791 A70-16963

Skin friction and heat transfer on flat plate in high velocity laminar motion with mass transfer for any free stream and injected gas combination

06 p1176 A70-17689

Residence time of foreign gas injected into recirculation region of wake behind slender body in axisymmetric supersonic flow

[AIAA PAPER 70-111] 06 p0968 A70-18040

Transpiration and film cooling systems comparison for high speed flows with foreign gas injection effects

[AIAA PAPER 70-153] 06 p1179 A70-18073

Base mass injection effects of various gases on slender body supersonic near wake stability, diffusion and cooling

[AIAA PAPER 70-110] 06 p0970 A70-18075

Helium injection Mach number effect on supersonic jet penetration into Mach 2 air stream from flat plate determined from concentration measurements

[AIAA PAPER 70-92] 06 p0975 A70-18200

Heat protection effectiveness of rectangular channel plane wall with flow by air injection through aperture on wall

07 p1420 A70-19066

Injectant stagnation temperature and molecular weight variation effect on flow field generated from secondary gas injection into supersonic stream

[AIAA PAPER 69-1] 09 p1733 A70-23217

Interaction shock shape prediction for gaseous and liquid injection in supersonic flow, using solid body and complementary models

09 p1662 A70-23244

Injection induced swirl effect on thrust and mass flow through nozzle in spinning rocket, discussing internal and exhaust flow measurements and visualization

09 p1606 A70-23247

Relative transition probabilities of Si I and II determined from emission spectra obtained by injecting SiCl₄ vapor into argon plasma jet

09 p1737 A70-23315

Velocity and concentration profiles for mixing of two dimensional foreign gas jet injected into parallel air mainstream, emphasizing film cooling applications

10 p1801 A70-24155

Heat protection effectiveness of rectangular channel plane wall with flow by air injection through aperture on wall

10 p1970 A70-25217

Characteristics and calibration of flow in gas induction driven close return transonic wind tunnel

11 p2030 A70-25687

Film cooling effectiveness measured following air injection through discrete holes into turbulent boundary layer of air on flat plate

11 p2146 A70-25690

Injectant stagnation temperature and molecular weight effects in jet interaction flowfield

11 p2036 A70-25989

Laminar multicomponent boundary layer for large injection and heat transfer, with particular reference to vehicle entry into planetary atmosphere

12 p2159 A70-28234

Gaseous injection into supersonic flow, investigating secondary Mach number and injection angle effects on flowfield in supersonic wind tunnel

[AIAA PAPER 70-552] 13 p2339 A70-29017

Cone boundary layer transition location and Reynolds number as function of nose bluntness combined effect with Ar, air and He mass injection [AIAA PAPER 69-706] 13 p2343 A70-29954

Surface pressure and heat transfer over blunt conical body in hypersonic flow with uniform mass addition of various gases [AIAA PAPER 69-716] 13 p2523 A70-29977

Chemically reacting stagnation point boundary layers with wall injection of gas, comparing multicomponent solution with binary approximation and chemical simplifications 14 p2565 A70-30265

Flow disturbances and side forces in supersonic rocket nozzle with O to gaseous secondary injection analyzed by semiempirical models 14 p2629 A70-30756

High velocity gas jet injection into subsonic and supersonic air streams from wall injectors [AIAA PAPER 70-714] 16 p2834 A70-33538

Uniform two dimensional turbulent boundary layer with hydrogen-nitrogen mixture injection and combustion at flame front, obtaining velocity distribution by kinetic energy equation 16 p2894 A70-33880

Numerical solutions for velocity and concentration profiles to nonsimilar isothermal diffusion laminar boundary layer equations for uniform injection of foreign gas 17 p3069 A70-34824

Shock waves in supersonic conical nozzle flow due to secondary gas injection, using conical lens for flow visualization 17 p3011 A70-35236

Heat exchange in dissociating partly ionized gas flow over critical point on permeable surface with injection into laminar boundary layer 17 p3011 A70-35347

Finite plate length effect on two dimensional supersonic turbulent boundary layer with large distributed surface injection 18 p3242 A70-36688

Film cooling protecting axisymmetric nozzle slot surface exposed to high temperature Mach 6 air injection 18 p3242 A70-36695

Helium injection Mach number effect on supersonic jet penetration into Mach 2 air stream from flat plate determined from concentration measurements 20 p3558 A70-39690

Pressure vessels charging procedure efficiency analysis 20 p3606 A70-39692

Load bearing capacity of radial gas bearing with annular injection line, discussing gas feeding methods 20 p3637 A70-39816

Gas lubrication with injection at large compressibility numbers, deriving asymptotic solution 20 p3637 A70-39817

Longitudinal averaged and pulsating turbulent flow velocities in rectangular channel with one-sided air injection through porous wall 20 p3614 A70-40346

Gaseous film cooling effect on adiabatic wall temperature distribution in rocket nozzle with gas injection 21 p3867 A70-41028

Reentry vehicle with multicomponent gas mixture injection, calculating heat and mass transfer correlations for stagnation point flow 21 p3945 A70-41033

Rocket roll control by secondary compressed air injection via slender fins inserted into nozzle convergent 21 p3931 A70-41953

Injection slot geometry effect on gas film cooling, discussing effect of secondary stream acceleration 21 p3952 A70-42084

Analytical evaluation of secondary flow injection effects on rocket engine performance including cold flow and simulated hot flow data [AIAA PAPER 69-473] 23 p4233 A70-44516

Gas coolant slot injection into hypersonic laminar boundary layer, comparing experimental results to boundary layer equations numerical integration 23 p4282 A70-44694

Coaxial plasma deflagration gun for accelerating particles to high velocities at low thermal energy for plasma injection experiments 24 p4383 A70-45120

GAS IONIZATION

NT ATMOSPHERIC IONIZATION

NT AURORAL IONIZATION

NT FLAME IONIZATION

Low voltage arc discharge in thermionic converter at low Ce pressures measured for current-voltage characteristics, showing degree of ionization 01 p0150 A70-10173

Total cross section for electron impact excitation and ionization in He, CO, nitrogen, oxygen, carbon dioxide, ethylene and benzene, emphasizing threshold values 01 p0147 A70-10489

Threshold laser power density-atom density relation in cesium vapor optical breakdown, suggesting two photon ionization process 01 p0110 A70-10569

Electron gas heating at E region altitudes as function of ionization of atmospheric gases, noting rocket experiments during solar eclipse 01 p0082 A70-11492

Gas motion and heating by radiation behind shock wave front, noting ionization and radiation absorption occurrence 01 p0068 A70-11570

Cross sections determined for formation of secondary positive molecular and atomic hydrogen ions during 1.4-46 keV positive molecular hydrogen passing through hydrogen 02 p0344 A70-12704

Ionizing shock wave propagation into magnetic field from Ar gas flow characteristics in electromagnetic shock tube 03 p0532 A70-13548

Ionization spatial growth similarity with Paschen law in air and nitrogen for specific electric field/gas number density values, discussing ionization coefficients 03 p0528 A70-14087

Shock tube measurements of ionization relaxation times behind shock waves in air at shock Mach numbers from 8 to 17 03 p0471 A70-14360

Hydromagnetic normal ionizing shock wave properties in H and D mixtures and pure gases in SUPPER 2 shock wave tube 03 p0536 A70-14365

Reflected shock wave velocity, boundary layer disturbance and wall ionization measurements using thin film resistance thermometers 04 p0666 A70-14537

Equilibrium composition and thermodynamic functions calculated for mixtures of dissociating and ionizing high temperature gases from standard data 04 p0780 A70-14538

Neutral gas ionization and ion recombination effect on electrodynamic plasma acceleration in coaxial and flat electrode accelerators 04 p0728 A70-15222

Nitrogen ionization rate increase by admixing neutral molecules of electronically excited nitrogen, noting nitrogen decay controlled by spontaneous radiation and wall collisions 05 p0884 A70-15918

Slow electron attachment to O molecules forming stable O-ions, discussing formation rate constant 06 p1109 A70-17488

Equivalent excited-state temperature of high pressure plasma calculated for unequal electron and gas temperature, considering ion and electron recombination 06 p1114 A70-18634

Interstellar gas ionization and heating by background X radiation, studying neutral hydrogen density distribution between spiral arms and at galactic peripheries 07 p1383 A70-19401

Excitation, ionization and recombination rates for charged ions during collisions with electrons in solar corona assuming Maxwellian electron distribution 07 p1384 A70-19409

Hydromagnetic ionizing shock wave structure in electromagnetic fields, using model composed of strong adiabatic shock to translational equilibrium followed by ionization initiation 07 p1351 A70-19985

Note on Bell-Kington paper on Born total and differential cross sections for proton impact ionization of He 08 p1548 A70-21501

Electron ion recombination role in atomic collision process in rare gases ionization path, considering scintillation mechanism 08 p1549 A70-21815

Anodic electric layer in self sustaining discharge in transverse magnetic field with neutral gas burnout, studying neutral atom ionization probability 09 p1734 A70-22110

One dimensional flow field behind ionizing detonation wave in magnetic field using Chapman-Jouguet hypothesis, accounting for Alfvén speed 09 p1660 A70-22722

Intense laser radiation effect on light absorption, gas breakdown and formation of spark at focus 10 p1899 A70-24154

Laser beam ionization of gases, using proportional ionization counter 10 p1890 A70-24588

Quasars photoionization of intergalactic high density hydrogen gas to interpret absorption features absence, noting gas temperature 10 p1942 A70-24628

Low voltage arc discharge in thermionic converter at low Ce pressures measured for current-voltage characteristics, showing degree of ionization 10 p1925 A70-25018

Small parameter structure and propagation velocity of ionization front in gas, applying nonequilibrium plasma model and electron equation 10 p1926 A70-25191

Book on engineering aspects of MHD power generation, discussing working gas ionization and electrical

conductivity, incompressible conducting fluid motion in magnetic field, etc 11 p1982 A70-25525

Shock-heated noble gases total ionization times, considering recombination and atom-atom and atom-electron collisions 12 p2274 A70-26856

Gas heating and ionization by Q switched laser beam, discussing electron collisions, densities, etc 12 p2277 A70-27007

N and O ions electron impact ionization rates calculated from approximate cross sections 12 p2275 A70-27173

Ionization kinetics of Ar, Xe and Hg monatomic gas behind shock wave front at high temperatures 12 p2210 A70-27319

Gas discharge gap preionization by thin preheated tungsten wire ignition without explosion, resulting in plasma turbulence prevention and radiation density increase 13 p2462 A70-28986

Shock wave multiple ionization in hydrogen with impurities, discussing intensity and duration effects on electron temperature profile and ion concentrations 13 p2388 A70-29369

Inert gas ionization behind shock wave at high Mach numbers, using electrical conductivity and continuum emission measurements 13 p2388 A70-29380

Interstellar electron gas distribution and temperature, suggesting cosmic ray heating as main ionization source 13 p2495 A70-29796

Shock slip analysis of merged layer stagnation point air ionization, clarifying effects of reaction rates, species diffusion, etc 13 p2343 A70-29987

Ionization and metastable excitation in low energy collisions of ground state argon atoms formed by charge transfer 14 p2618 A70-30121

Molecular gases ionization and dissociation by low energy atoms, using mass spectroscopy on secondary ion products of collisions 14 p2619 A70-30723

Spherically symmetric state of slightly ionized gas of unbounded expanse about catalytic conductor by nonequilibrium continuum theory, analyzing Debye number limit for electrostatic probes 14 p2665 A70-30946

Gas ionization with hydrogen atoms in gravitational equilibrium at constant temperature in upper half space by instantaneous radiation burst in lower space 15 p2775 A70-31477

Electron-ion gas ionization, neutralization and ambipolar diffusion effects on F region vertical profile 15 p2730 A70-32090

Thermodynamic equations of state for dissociating and ionizing air in equilibrium, noting applications to vertical and oblique compression shocks [DGLR-70-026] 15 p2828 A70-32840

Axially symmetric detached shock preceding blunt body immersed in hypersonic monatomic gas flow, considering radiative ionization in cold precursor by differential approximation 16 p2839 A70-34252

Plasma diagnostic data from onboard Langmuir probes, reflectometers, antenna VSWR and beacon and telemetry attenuation for blunt body reentry flow field [AIAA PAPER 70-756] 17 p3008 A70-34495

Nonequilibrium air ionization in hypersonic viscous shock layers in flow about axisymmetric blunt bodies 17 p3008 A70-34501

Channeling and guidance of electrical breakdown streamer via laser induced gas ionization trail 17 p3108 A70-35905

Argon and helium breakdown induced by ruby laser 50-picosec pulse at various pressures 18 p3267 A70-36616

Interstellar H I gas physical conditions, discussing ionization ratio average values and temperature conditions 18 p3328 A70-37175

Stepwise ionization effect on electron distribution, transport and balance coefficients in low voltage low pressure neon plasma 19 p3476 A70-37555

Ionization relaxation behind reflected luminous shock front in argon plasma flow interaction with magnetic fields, using spectroscopic and streak interferometric observations 19 p3479 A70-37814

P autoionization states of helium and hydrogen negative ions, calculating widths and shifts 19 p3474 A70-38307

Crab Nebula filamentary system, examining excitation conditions in terms of ionization and heating by HF radiation 20 p3702 A70-39011

Preionization in Cs seeded Ar nonequilibrium plasma for MHD generators, examining discharge characteristics, recombination reactions, etc 20 p3680 A70-39991

- Hydrogen ionization and second quantum level excitation by collision with H atoms in ground state
21 p3852 A70-40596
- Nitrogen, hydrogen, oxygen and He total ionization cross sections due to electron impact
21 p3852 A70-40597
- X ray emission of hot dense intergalactic plasma, discussing evolution equation for temperature and degree of gas ionization vs red shift
21 p3877 A70-40702
- Axisymmetric detached shock before blunt body in hypersonic monatomic gas flow, obtaining radiative ionization patterns in cold precursor
21 p3950 A70-41731
- Spatial energy loss and ionization deposition distributions of fluorescent radiation emission induced by electron beam in nitrogen gas
21 p3853 A70-41913
- Ionization kinetics of Ar, Xe and Hg monatomic gas behind shock wave front at high temperatures
21 p3854 A70-42061
- Laser torch plasma dispersion gas dynamics from motion and kinetics of ionization processes
21 p3839 A70-42238
- Prebreakdown ionization growth in gases based on initial photocurrents production from high voltage uniform field electrodes
22 p4026 A70-42353
- Intense high ionization degree discharge plasma initiation at low gas pressures, using auxiliary discharge
22 p4078 A70-42356
- Molecular vibrational temperature dependence on electron and neutral gas temperatures and degree of ionization for plasma excitation in nitrogen
22 p4078 A70-42358
- Dissociated and ionized hypersonic flows of hydrogen heated by electric arc techniques, investigating flows in wind tunnel nozzles
22 p4011 A70-42759
- Optically thin plasma population and ionization equilibrium, taking into account heavy particle collisions
22 p4082 A70-43219
- Plasma generation by pulsed laser heating, investigating ionization effects on temperature
22 p4082 A70-43224
- Laser induced gas breakdown, considering plasma generation and properties
23 p4225 A70-44185
- Multiphoton gas ionization by coherent radiation, showing electron transitions role with gas ionization model
23 p4201 A70-44205
- Upstream gas photoionization caused precursor ionization effects on MHD switch-on shock structure
24 p4382 A70-45106
- Gas ionization with Q switched carbon dioxide laser radiation, determining breakdown threshold or minimum power density requirement
24 p4355 A70-46261
- GAS JETS**
- IR radiation absorption from carbon dioxide laser in supersonic gas jet, applying results to nitrogen-carbon dioxide gas dynamic laser action
01 p0148 A70-11123
- Gas jets collision flowing from parallel wall channels, applying solution to calculating geometrical characteristics or fluid jet amplifiers
01 p0011 A70-11569
- Structural characteristics of supersonic twisting underexpanded air jet, using filming and schlieren photography
04 p0618 A70-15246
- Sound vibrations effect on pulsation characteristics of turbulent gas jet
04 p0618 A70-15248
- Plasma gas jets high velocity propagation, studying radiation precursor and divergence and expansion chamber effects
04 p0675 A70-15594
- Unsteady calorimetric sensor for measurement of heat transfer between gas jets and solid targets
06 p1064 A70-17857
- Unified model for transverse gaseous jet penetration into supersonic stream agreeing with measured flow field properties
06 p0976 A70-18201
- [AIAA PAPER 70-93] Species spatial distribution measured for He-Ar gas mixtures expanding in supersonic jets, compared to measurements with skimmer-nozzle arrangement
06 p1066 A70-18256
- Translational relaxation in low density axisymmetric hypersonic free gas jet, describing transition from isentropic to free molecular flow
06 p1043 A70-18277
- Supersonic free jets condensation, examining kinetics of reactions in mono- or diatomic gases
06 p1044 A70-18282
- Roshko model cavity solution based on Falkovich method application to two dimensional permanent irrotational flow of subsonic gas jet
07 p1258 A70-19571
- Heat transfer from impinging gas jets on enclosed concave surface, noting self recirculation currents within cavity
07 p1425 A70-20413
- Metal cutting by gas jet lasers, discussing single and multimode lasers, carbon dioxide lasers, power and power density requirements, etc
08 p1501 A70-20470
- Supersonic gas jets applicability as vacuum locks for molecular fluxes at thermal velocity in magnetic trap
08 p1549 A70-20509
- Axisymmetric helium jet transition to turbulent flow in air slipstream, measuring temperature and velocity profiles
09 p1660 A70-22439
- M87 jet, using theoretical model and observed emission lines for heating, cooling, ionization, cosmic ray proton regeneration of optical electrons, X radiation, etc
09 p1754 A70-22501
- Velocity and concentration profiles for mixing of two dimensional foreign gas jet injected into parallel air mainstream, emphasizing film coating applications
10 p1801 A70-24155
- Coaxial plasmatron pulsation on intensity of heat exchange between high temperature nitrogen jet and axisymmetric body near critical point region of spherical bluntness
11 p1984 A70-26739
- Gas jet bounding of Ar arc column, providing high power/intensity light source
12 p2237 A70-28159
- Solid particles or liquid drops admixture effect on propagation of inhomogeneous turbulent gas jet, using Prandtl mixing length theory to estimate pulsation velocities
12 p2213 A70-28218
- Carbon dioxide jet plumes condensation on model nozzle in vacuum chamber, noting particle size and growth rate
13 p2523 A70-29983
- Gas kinetic pressure profile and mass density of propagating current sheet in argon pinch discharge, using piezoelectric transducer
14 p2624 A70-31041
- Schlieren optical method for measuring He jet penetration into supersonic flow
15 p2741 A70-32520
- High velocity gas jet injection into subsonic and supersonic air streams from wall injectors
16 p2834 A70-33538
- [AIAA PAPER 70-714] Unsteady incompressible planar gas jets with stable vortex street, investigating near flow field region to establish oscillatory component
19 p3404 A70-37799
- Sound vibrations resonant frequency relation to jet internal structure in gas jet stem radiator
19 p3354 A70-38658
- Solid particles or liquid drops admixture effect on propagation of inhomogeneous turbulent gas jet, using Prandtl mixing length theory to estimate pulsation velocities
20 p3612 A70-40091
- Extinction condition for diffusion flame formed from opposing coaxial gas jets
20 p3739 A70-40399
- Gravitational effects on laminar gas jet diffusion flame stability, including zero gravity environment
21 p3949 A70-41316
- Stagnation temperature of two phase nozzle gas jet containing solid particles on particle density and velocity
21 p3748 A70-42220
- Supersonic air flow interaction with transverse gas jet from plate orifice
21 p3749 A70-42222
- Computerized integral treatment of turbulent constant pressure mixing of two dimensional gas jet with atmosphere having different temperature and composition
22 p4011 A70-42755
- Trajectory equations for plane and three dimensional gas jets with arbitrary injection hole shapes in subsonic shear flow
22 p3960 A70-43365
- Low density gas jet from short circular cylindrical tube, calculating molecular flux radial density variation
22 p4076 A70-43430
- Space vehicle attitude control by cold gas jets, examining principles of operation, optimal conditions for gas consumption and gravitational and gyroscopic effects
23 p4261 A70-44662
- [MBB-UR-37-70-0]
- GAS LASERS**
- Population inversion induced in middle channel of cascade gas laser, using probability method
01 p0106 A70-10059
- Spectral efficiency of coaxial flash lamp pumping gas laser, noting dependence on geometrical and physical parameters of source and active body
01 p0106 A70-10061
- Gas laser beams divergence at various laser power levels vs resonator nonconfocality
01 p0106 A70-10062
- Ar ion laser with high discharge current density observed for working level populations by simultaneously measuring power gain and spontaneous emission lines intensity
01 p0106 A70-10063
- He-Ne laser heterodyne system evaluating dispersive effect in He-Ne laser, measuring dispersion as function of cavity loss, excitation level, etc
01 p0107 A70-10102

- Gas pressure differences and diffusion rates recording using He-Ne laser interferometer, discussing aerodynamic applications and avionic instrumentation problems
02 p0299 A70-12272
- Helium-neon laser wavelength calculations from spectral observations by Fabry-Perot etalon, proposing formulas to enhance accuracy
02 p0299 A70-12439
- Partial coherence in spontaneous Raman effect, using He-Ne laser source
02 p0313 A70-12465
- Brillouin scattering of hypersonic waves produced in liquid medium, using He-Ne laser light source
02 p0313 A70-12471
- Ceramic plasma containers construction by soldered seal technique for ion lasers, noting moly- manganese process
02 p0314 A70-12746
- Interferential picture visibility in turbulent atmosphere measured at large path differences with Michelson-Twyman-Green interferometer using He-Ne laser radiation source
03 p0498 A70-12869
- Pulse peak width of He-Ne laser with Ne filled absorbing cell in resonator found dependent on saturating field and Ne pressure in cell
03 p0498 A70-13089
- Gas laser frequency stabilization by employing Zeeman splitting in external discharge tube containing He-Ne mixture in alternating magnetic field
03 p0498 A70-13090
- Transverse mode controlled hydrogen Stokes laser oscillator optically pumped by pulsed ruby laser
03 p0498 A70-13153

- Frequency measurement for HCN laser at 0.357 and 0.311 μ m wavelength by mixing signal with backward wave tube harmonics 03 p0500 A70-13464
- Complex profile aspherical mirrors used in He-Ne gas laser to obtain single mode emission 03 p0500 A70-13465
- Sealed-off He-Cd laser construction, describing life test, noise, Cd transport characteristics and transverse magnetic field effect 03 p0501 A70-13582
- He-Ne laser using K-activated alumina cold cathode and coaxial construction, discussing output, low noise applications, construction and testing 03 p0501 A70-13583
- Nonlinear differential equations for determining radiation density of three level pulsed gas laser as function of power losses, active medium parameters and time 03 p0502 A70-13745
- Fabry-Perot resonator misalignment effect on TEM wave transmission coefficient in gas laser 03 p0492 A70-13749
- Gain interaction among oscillating modes of gas laser analyzed from rate equations viewpoint 03 p0503 A70-14208
- Measurement method for second and third order photon intensity correlation functions, using optical field produced by gas laser operating near oscillation threshold 04 p0700 A70-14686
- Optical effects in parallel glass fibers irradiated by He-Ne laser beam, studying resonance tunneling and periodic power repumping between fibers 04 p0702 A70-15215
- Polarization effects of helium-neon laser emission at 3.39 micron wavelength investigated in longitudinal and transverse magnetic fields 04 p0702 A70-15227
- He-Ne-Cd II laser operation modes for optimum pressure fill, obtaining red to blue outputs by varying current and/or temperature 04 p0702 A70-15366
- Ar laser as suitable source for LF heterodyne anemometry experiments through noise spectrum suppression under optimum conditions 04 p0702 A70-15569
- Pulsed Ar ion lasers at high currents, measuring plasma parameters, electrical conductivity, electron temperature and density for inversion mechanism 04 p0703 A70-15617
- Spectral and lasing characteristics of microwave frequency modulated He-Ne laser operating at 0.63 micron wavelength 05 p0858 A70-16257
- Power output of gas laser pumped by laser contained in single resonator 05 p0858 A70-16259
- Gain measurement in He-Ne laser based on small modulation of discharge current 05 p0859 A70-16267
- Secondary frequency standard obtained for Hg laser operating at microwave frequencies 05 p0859 A70-16271
- Monograph on He-Ne laser beam noise properties and intensity fluctuations during single mode operation 05 p0860 A70-16559
- Frequency response of 6328 A He-Ne laser interferometer analyzed for multimode oscillations noting plasma diagnostics applications 05 p0861 A70-16989
- Laser signal modulation at RF by subjecting emitting atoms of Xe-He laser amplifier to simultaneous DC and RF magnetic fields 06 p1079 A70-17191
- He-Ne laser emission attenuation coefficient relation to water content of artificial fogs for 0.63, 1.15 and 3.39 microns 06 p1079 A70-17209
- Modulation properties of stabilizing frequency standard for gas laser with signal control by separate absorption cells 06 p1079 A70-17440
- Amplitude and frequency characteristics of gas ring laser with optical feedback between oppositely moving waves amplified by reflecting mirrors 06 p1081 A70-17497
- Two cavity mode locking of He-Ne laser using electro-optic phase modulator 06 p1083 A70-17947
- Radiation from nonlinear polarization sideband in Ar lasers, discussing anomalous beat notes and mode locking phenomena 06 p1083 A70-17949
- Operational characteristics, spectroscopy and inversion mechanisms of noble gas ion lasers in light of plasma theories and atomic data [AIAA PAPER 70-82] 06 p1083 A70-18236
- Cadmium vapor density distribution by cataphoresis in He-Cd laser discharge tube determined by side light measurements 06 p1084 A70-18613
- He-Cd laser output improved by transverse magnetic field application 06 p1084 A70-18619
- Two mode gas laser behavior under external signal action showing mode locking possibility by combination frequencies due to medium nonlinearity 07 p1296 A70-18764
- Optical polygon calibration by interferometric method using He-Ne laser light source 07 p1297 A70-19227
- Self pulsation in He-Cd laser, noting decreasing number of modes effect on beat frequency stability 07 p1301 A70-20017
- He-Ne single frequency laser output characteristics at various active medium pressures noting emission polarization 08 p1511 A70-20517
- Longitudinal modes competition in He-Ne laser, studying effects of active medium isotopic composition and pressure 08 p1511 A70-20518
- He-Ne laser plasma vibrations and radiation power during active medium discharge excitation by DC current, noting characteristic energy hysteresis 08 p1511 A70-20519
- Radiation field photon density matrix for gas laser with ring resonator determined from double level atomic model, considering photon dispersion and wave reflection feedback 08 p1513 A70-21420
- CW laser operation at 10.6 microns in DF-carbon dioxide and HF-carbon dioxide molecular systems achieved by purely chemical means 08 p1513 A70-21539
- Pulsed nitrogen gas laser to obtain continuously tunable dye laser action to 3550 A with output at 3771 A in UV 08 p1513 A70-21553
- Single mode He-Ne ring laser lock-in threshold and output power relationships to frequency 08 p1514 A70-21692
- Statistical characteristics of Q switched He-Ne laser emission gain during transient process from subthreshold to superthreshold value 08 p1514 A70-21814
- He-Ne laser investigated for He and Ne population inversion as function of discharge parameters 09 p1694 A70-22006
- He-Ne laser emission in transverse oscillation mode, analyzing spatial and temporal coherence characteristics 09 p1694 A70-22135
- Collision effects on saturation of He line transition in He-Ne laser, determining power output dependence on cavity tuning and gas pressure 09 p1695 A70-22322
- He-Ne and argon lasers for measuring radar scattering cross sections of plane and three dimensional targets 09 p1632 A70-22405
- He-Ne laser emission modulation by varying discharge current, studying gas pressure effect and role of ballast resistor 09 p1695 A70-22411
- Microwave in-cavity modulation of helium-neon laser, obtaining frequency dependence of modulation depth 09 p1696 A70-22628
- Solid state and gas lasers industrial applications in machining and nonmachining areas, discussing limiting factors 09 p1692 A70-22706
- Pulse train transition in Nd-YAG and He-Ne lasers mode-locked by intracavity phase modulator 09 p1697 A70-22919
- CW water vapor laser line frequency measurements by beating with radiations from HCN laser in metal-on-metal point contact diode 09 p1697 A70-22925
- Laser frequency measurement and active and passive stabilization techniques, emphasizing HCN laser phase locking to frequency standard output 09 p1697 A70-22951
- Single mode output power at 6328 A spectral line during He-Ne laser oscillation simultaneously at 6328 A and 3.39 microns 09 p1697 A70-22957
- LEPR spectrometer with sample cavity as part of HCN laser for experiments with gases, noting improved sensitivity 09 p1698 A70-22991
- Axial mode gas laser radiation intensity fluctuations for plane and spherical light waves in turbulent atmosphere 09 p1636 A70-23137
- He-Ne CW and pulsed lasers operation, design and technology, describing measurement methods for output, beam divergence and radiation spectrum distribution 09 p1698 A70-23303
- Coherent radiation amplification factor for 0.63 micron wavelength in He-Ne mixture, noting dependence on discharge current for various pressures 09 p1698 A70-23304
- Mode coupling and intensity pulsations observed between two 6328 A He-Ne lasers through nonlinear gain characteristics of inverted population 09 p1699 A70-23363
- Laser action in 5d-6p electron transitions of neutral atomic iodine, measuring electron temperature and density 09 p1699 A70-23517
- Atmospheric phase jitter for He-Ne locked laser measured by retroreflector for half mile round trip 09 p1699 A70-23539
- Population inversion generation through gaseous oxides mixing with nitrogen flow thermally excited 09 p1700 A70-23569
- He-Ne laser Q factor modulator based on Fabry-Perot interferometer with alternating absorption 10 p1899 A70-24255
- He-Ne laser emission electro-optical modulation by three mirror optical cavity, considering structural and thermal stability and coupled resonators geometry effects 10 p1899 A70-24260
- He-Ne laser IR generation in three mirror mismatched resonator, using Fabry-Perot interferometer to study mode and lasing range frequency shift 10 p1900 A70-24265
- Carbon dioxide dissociation effects on refractive index gradients and decay rates in pulsed carbon dioxide-nitrogen laser mixture 10 p1900 A70-24602
- He-Ne laser amplifier in axial magnetic field, measuring Faraday rotation and gain for various input signal intensity values 10 p1901 A70-24945
- Doppler beat spectrum and modulation depth of He-Ne laser emission with backward beam reflected from moving mirror into resonator 10 p1901 A70-25123
- Tunable nitrous oxide laser cavity losses and absorption by carbon dioxide determined spectroscopically 11 p2061 A70-25361
- Mirror adjustment effect on transverse structure, time dependence and spatial coherence of pulsed UV molecular nitrogen laser emission 11 p2062 A70-25394
- Scanned beam holography reducing system stability time for hologram production with CW gas laser 11 p2050 A70-25639
- Cyanide gas lasers design for submillimetric region of electromagnetic spectra 11 p2062 A70-25735
- Foreign gases effects on He-Ne lasers IR emission, describing quenching due to positive column electron temperature decrease 11 p2062 A70-25826
- He-Ne optical laser CW operation under DC excitation, considering output power, discharge current, total pressure, mixture ratio, etc 11 p2062 A70-25827
- Auto-oscillatory regimes in annular gas laser under coupling due to scattering, considering mode competition 11 p2064 A70-26811
- Multiplicative modulation noise of helium-neon traveling wave laser amplifier at micron wavelength 11 p2020 A70-26816
- He-Ne laser noise caused by discharge current fluctuation and moving striation in long capillary tubes 12 p2245 A70-27272
- He-Ne lasers mode locking by self beat feedback between cavity modes, achieving nonlinearity control by circuit adjustment 12 p2245 A70-27273
- Emission spectrum of neon-helium laser receiving Doppler shifted signal from moving mirror, showing memory effect due to beat harmonics 12 p2246 A70-27352
- Emission spectrum of He-Xe CW laser with non-resonant feedback mode achieved with scattering agent and various mirror schemes 12 p2246 A70-27354
- Photoelectric receiver and light beam alignment in gas laser aerial photography, considering directrix rectilinearity verification 12 p2247 A70-27476
- Transient process statistical characteristics in He-Ne laser operating near excitation threshold with pronounced rise time oscillations of light wave field 12 p2247 A70-27507
- Saturation homogeneity ascribed to resonant photon capture in emission of neon laser 12 p2247 A70-27508
- Local losses distribution effect on intensity and opposing waves generation in ring gas laser analyzed in approximation of noninteracting modes 12 p2248 A70-27510
- Carbon monoxide, carbon dioxide and oxygen impurities effects on threshold current and output power of HCN laser 12 p2249 A70-27648
- Raman scattering by oxygen and nitrogen in atmosphere observed by using pulsed nitrogen UV laser 12 p2189 A70-28093

Submillimeter range HCN gas laser design and characteristics, noting single mode, linear polarization and output power

12 p2250 A70-28180

Automatic frequency control of single frequency He-Ne laser, tuning cavity length to extremum output power with Lamb dip

12 p2250 A70-28181

Maximum mode selection tuning of scanning interferometer with spherical mirrors applied to He-Ne laser spectrum analysis

12 p2250 A70-28182

Analog information transmission device using He-Ne laser radiation, discussing optical telemetric channel transfer characteristics for pulsed nanosecond analog signals

12 p2250 A70-28184

Annular gas laser, considering external periodic perturbation effect on difference frequency of oppositely moving waves

12 p2251 A70-28291

He-Ne laser optimal mixture component ratio for generating IR radiation at two wavelengths

12 p2251 A70-28293

Ruby and He-Ne laser radiation attenuation found due to scattering by gas molecules and aerosols from atmospheric spectral transparency fine structure studies

12 p2191 A70-28294

Q switched CO-HE laser IR fluorescence, considering population inversion recovery by vibrational energy transfer

13 p2423 A70-28496

Soviet collection of articles on gas laser physics, covering focusing, spectra, modes, resonators etc

13 p2424 A70-28591

Gas laser radiation focusing with spherical mirrors, calculating field distribution and beam path

13 p2424 A70-28592

Operator representing anisotropic element in gas laser resonator, considering phase crystalline and rotating plates

13 p2424 A70-28593

Anisotropic two phase plates gas laser resonator spectrum, analyzing zero or 90 degree angles between plates

13 p2424 A70-28594

Three mirror resonator He-Ne laser output spectra, studying frequencies and intensities of generated modes

13 p2424 A70-28595

Hanle effect in single mode He-Ne laser, observing spontaneous emission on different spectral lines and estimating lifetimes of Ne excited states

13 p2424 A70-28598

Spontaneous emission modulation, interference beat and level crossings observable in gas laser operating at two output frequencies

13 p2425 A70-28599

Power output dependence on cavity configuration of He-Ne laser in TEM mode operation

13 p2425 A70-28625

HCN laser 890 GHz line phase locked to multiplied standard frequency with wide bandwidth loop, narrowing line widths

13 p2426 A70-28798

High power CO lasers, discussing UV and visible sidelight, gas mixtures, spectral output, gas pressure, etc

13 p2426 A70-28807

HCN laser far IR line phase locked to absolute frequency standard

13 p2426 A70-28810

Dye laser small signal gain via pumping by UV nitrogen laser

13 p2426 A70-28811

He-Ne laser beam transmission through atmosphere, investigating intensity, spot size, polarization and power spectrum fluctuations

13 p2427 A70-29103

Gas laser active medium nonlinear polarizability calculations with allowance for resonance emission capture effect on atomic velocity and population distributions

13 p2427 A70-29284

Pulsed Ne laser superradiation spectrum fine structure, using Fabry-Perot interferometer

13 p2428 A70-29362

Homogeneous absorption line and peak power widths relationship in high resolution gas laser with internal absorbing cell

13 p2428 A70-29365

Electronic heterodyne astronomical spectroscopy, using lasers for absolute monochromatic flux and polarization measurements on star-like objects

13 p2408 A70-29473

He-Ne laser focused beam effect on negative Si diodes base I-V characteristics

13 p2378 A70-29517

He-Ne laser memory, discussing induced oscillation excitation with radiation fed back to resonator by moving reflecting mirror

13 p2429 A70-29572

Crossed field nitrogen laser operation in second positive band to obtain high UV pulse output

13 p2429 A70-29669

Laser acoustooptic quartz modulators inserted inside He-Ne and argon cavities for internal power extraction

13 p2430 A70-29705

He-Ne laser radiation absorption in dense Li plasma, calculating absorptivity for bremsstrahlung and photoionization

13 p2465 A70-29710

Continuous operation He-Ne lasers, discussing excitation, structural and optical design, mode selection and performance specifications

14 p2593 A70-30353

Pulsed molecular and atomic gas laser sources design for submillimeter region

14 p2593 A70-30433

He-Cd laser construction with quartz tube manufactured separately, describing flow-through processing

14 p2594 A70-30509

High voltage gas laser trigger pulse generators featuring high pulse rate with semiconductor controlled rectifier

14 p2594 A70-31181

Single mode gas laser theory for arbitrary field intensities in terms of ensemble averaged form of density-matrix equations of motion

14 p1594 A70-31361

Gas ring lasers, discussing optimal parameters, colliding waves interference, nonmutual effect and radiation polarization

15 p2749 A70-31451

Atomic collision effect on frequency range of opposing traveling wave modes in gas ring laser, using density matrix equation

15 p2749 A70-31553

False signal in scanning interferometer for helium-neon lasers in single and simultaneous TEM modes

15 p2749 A70-31557

Carbon dioxide-nitrogen and nitrous oxide-nitrogen laser systems, substituting diatomic N 15 for N 14 to investigate radiation intensity

15 p2750 A70-31761

Superradiant pulsed 5401 A neon laser for interferograms of gas flow through nozzles in shock tunnel

15 p2750 A70-31763

High power CW CO laser operation at room temperature by introducing mercury vapor into discharge

15 p2751 A70-31979

He-Cd laser with cathapboretic transport and diffusion return path, noting condenser critical temperature for radiation noise reduction

15 p2751 A70-31987

White light laser construction using Ar-Kr laser with suitable mixture and pressure of gases to provide equal output intensities of red, yellow, green and blue

15 p2752 A70-32046

Single mode gas laser with large saturation and dispersion effects, discussing resonator alignment to spectral line frequency

15 p2752 A70-32196

Plasma concentration measurement in coaxial accelerator, using gas laser and multiple wave interferometer in vacuum chamber

15 p2781 A70-32858

Bleachable dye filters selection for periodic undamped output power oscillations in laser

15 p2753 A70-32859

Gas dynamic molecular laser with electrons in ground state, using incoherent optical pumping from stationary shock wave

16 p2927 A70-33255

Gas laser amplitude, competition, self locking, beat frequency and modes time development, using Kutta-Merson integration method

16 p2928 A70-33284

He-Ne laser geodimeter for Coast and Geodetic Survey length measurements on continental traverses

16 p2928 A70-33525

Coaxial gas laser generating high intensity pulses at constant pulse repetition rate, using singly ionized Ar and molecular nitrogen as active media

16 p2928 A70-33698

Mode locked He-Ne laser nsec pulses propagation along multimode clad glass fibers

16 p2865 A70-34039

Light velocity from frequency and wavelength differences between gas laser lines, using precision long path interferometry

17 p3104 A70-35085

He-Ne laser emission wavelength long and short term stability for metrological applications

17 p3104 A70-35087

He-Ne laser emission wavelength, using laser interferometry based on feedback between moving mirror and resonator

17 p3104 A70-35088

Canadian laser stabilization program involving metrology and absolute standard replacing international meter

17 p3105 A70-35089

Spectral densities of intensity and frequency fluctuations of single frequency He-Ne laser radiation

17 p3105 A70-35092

Excited atoms transfer mechanism in helium plasma, using He-Ne laser

17 p3106 A70-35102

Gas laser components optical properties determination, describing measuring apparatus and techniques

17 p3106 A70-35104

Plasma opacity measurements using CW He-Ne and Ar lasers as light sources

17 p3106 A70-35107

He-Ne CW laser emission line width measurement, describing apparatus and technique

17 p3106 A70-35108

Pulsed plasmas refractive index measurement by two-wavelength He-Ne laser interferometry, estimating effects of heavy atoms and neutral gas density

17 p3107 A70-35110

Gas laser phase locking due to loss modulation with double mode spacing

17 p3107 A70-35474

Internally loss modulated multimode ring gas laser, showing pulse peak intensity with detuning for phase locking

17 p3107 A70-35475

Hydrocarbon gas detection using He-Ne laser radiation absorption, discussing detector electronics

17 p3107 A70-35520

Beat and synchronization modes of opposed waves in rotating gas ring laser, examining frequency response asymptotic behavior

17 p3108 A70-35683

Photodetector frequency response measurement, using beat light signals from mixed single mode He-Ne lasers

17 p3108 A70-35688

He-Cd laser discharge, determining population densities and lifetimes for levels of Cd ion excited by He metastables

17 p3108 A70-35903

Gas laser frequency stabilization using nonlinear effects of magnetic Lamb dip

17 p3109 A70-35911

Transverse flow CO chemical laser using atomic oxygen reaction with carbon disulfide, comparing output with longitudinal flow devices

18 p3266 A70-36313

Two mode gas laser behavior under external signal action showing mode locking possibility by combination frequencies due to medium nonlinearity

18 p3271 A70-37108

Gas laser radiation depolarization coefficient as function of radiation energy, cavity anisotropy and operating transition type

19 p3444 A70-37445

Gas lasers intensity expression derived by theory of double resonance spectroscopy, comparing results with He-Ne laser experimental data

19 p3445 A70-37672

Helium to electron excitation ratios for population inversion in helium-neon laser

19 p3445 A70-37758

Three level gas laser amplifier theory, considering quantum mechanical atomic system in interaction with two monochromatic EM waves

19 p3446 A70-37829

Plasma lasers, investigating striation oscillations and excess noise phenomena and generation mechanisms

19 p3446 A70-37858

Gas laser iterative alignment of Mach-Zehnder interferometer for monochromatic and white light fringes

19 p3424 A70-37880

Monograph on gas laser dynamics, emphasizing single mode intensity measurement as function of cavity loss in He-Ne laser

19 p3446 A70-37978

He-Ne laser beam hazard to human retina

19 p3371 A70-38309

Low noise He-Ne laser with capillary elements, measuring current threshold of noise free operation as function of design parameters

19 p3448 A70-38512

Transverse magnetic field effect on emission spectrum of He-Ne laser, using scanning interferometer

19 p3448 A70-38735

Pulsed laser emission at IR transitions of xenon and neon under electron beam pumping

19 p3449 A70-38743

He-Ne laser with conical discharge tube, investigating transverse cross section geometry influence on power gain

19 p3449 A70-38745

Ionic and molecular gas lasers, discussing pumping, transitions, emission, discharge tube dimensions, cooling, pressures, optical elements and applications

19 p3449 A70-38751

CW second harmonic He-Ne laser light second order intensity correlation function measurements

20 p3640 A70-39153

He-Xe laser with pure Xe-136 gain cell inside cavity, observing enhanced Lamb dip in power output vs frequency curve

20 p3640 A70-39154

He-Ne laser profile-tracing system for contour measurement, suggesting steps for error reduction

20 p3640 A70-39417

Submillimeter gas lasers with low noise and CW operation for far IR spectroscopy, noting emission lines multiplicity

20 p3641 A70-39423

Light He isotope effect on He-Ne laser power output

20 p3641 A70-39737

Pulsed composite laser performance with He-Ne active section and neodymium-glass power gain section

20 p3641 A70-39740

Radiation divergence from gas laser resonator with coupling aperture

20 p3642 A70-39752

He/Ne laser amplifier and oscillator threshold bandwidth measurement by double laser device

20 p3643 A70-40126

Doppler beat spectrum and modulation depth of He-Ne laser emission with backward beam reflected from moving mirror into resonator

20 p3643 A70-40516

Gas and semiconductor diode lasers construction and operation principles, discussing terminology, Boltzmann distribution function, excitation methods, population inversion, etc

20 p3643 A70-40535

Fresnel diffraction using He-Ne gas laser and opaque wire

21 p3834 A70-40549

Q switching of nitrous oxide laser with Freon 12 and sulfurhexafluoride absorbers, comparing wavelengths with carbon dioxide laser outputs

21 p3834 A70-40567

Continuous wave laser action in chlorine, Ar and He gas mixtures, observing energy transfer between Ar and chlorine by pumping action

21 p3834 A70-40570

Low voltage slotted hollow cathode laser tube design with transverse discharge operation and uniform axial distribution of laser media, including metal vapors

21 p3834 A70-40571

Carbon monoxide laser efficiency increase through addition of Xe, noting change in laser output spectral intensity distribution

21 p3835 A70-40572

Methane IR filter for monochromatizing He-Ne laser

21 p3823 A70-40823

Optical properties of off-axis multimode resonators with spherical mirrors, discussing application to He-Ne lasers

21 p3836 A70-40914

Optimum tube diameter for maximum radiation output of single and multimode He-Ne lasers

21 p3836 A70-40916

Wideband high speed PCM/AM optical communication system using mode locked He-Ne laser, noting simultaneous signal transmission and bit rate

21 p3789 A70-41354

CW gas laser improvement, discussing optimum efficiency and photon beam spatial distribution

21 p3836 A70-41419

Carbon monoxide-nitrogen laser mechanism vibrational populations, discussing operational characteristics and walls condition and nature

21 p3837 A70-41716

Carbon monoxide-nitrogen laser luminescent phenomena by electronic spectroscopy

21 p3837 A70-41717

Mode intensity fluctuations in unlocked multiple mode He-Ne laser related to LF noise

21 p3837 A70-41918

Laser torch plasma dispersion gas dynamics from motion and kinetics of ionization processes

21 p3839 A70-42238

Water cooled carbon monoxide-He-nitrogen-oxygen laser CW output at room temperature

22 p4048 A70-42327

Ne absorption cell and He-Ne gain cell pulse velocities compared with free space light velocity

22 p4048 A70-42329

Lasing transitions time delay in carbon monoxide laser under pulsed electrical excitation, attributing inversion to anharmonic decoupling

22 p4048 A70-42330

Multifrequency autooscillatory systems, comparing reflex klystron with He-Ne laser

22 p3995 A70-42404

He-Ne gas laser, construction, operation and characteristic mode patterns

22 p4049 A70-42959

Saturated absorption spectroscopy of various molecules using emission spectra of carbon dioxide and nitrous oxide lasers

22 p4050 A70-43239

Longitudinal, transverse and simultaneous longitudinal-transverse gas laser mode locking

22 p4051 A70-43329

High power gas lasers constructed in Poland, describing structural design and operational specifications

22 p4051 A70-43441

Emission spectrum of neon-helium laser receiving Doppler shifted signal from moving mirror, showing memory effect due to beat harmonics

22 p4052 A70-43596

Emission spectrum of He-Xe CW laser with non-resonant feedback mode achieved with scattering agent and various mirror schemes

22 p4052 A70-43597

Single frequency gas laser synchronization by small harmonic signal from second laser, deriving frequency shift dependence on power

23 p4200 A70-43929

Gas dynamic molecular laser with electrons in ground state, using incoherent optical pumping from stationary shock wave

23 p4201 A70-44284

High gain Xe laser effects on longitudinal mode splitting, noting increased frequency of radiation propagation through highly dispersive medium

23 p4201 A70-44918

Magnetic flux dependent interference beats in spontaneous emission of gas discharge of He-Ne laser, estimating Hertzian coherence duration

23 p4202 A70-45052

Axial modes interaction in He-Ne laser with atomic collisions in active medium, computing intensities and emission frequencies

23 p4202 A70-45053

Carrier frequency transfer of amplitude modulated signal at two coupled transitions in traveling wave gas laser

23 p4202 A70-45055

Short and long term stabilized optical frequency standard of gas laser, using two absorption cells

23 p4202 A70-45057

He-Ne laser with absorbing cell in magnetic field, investigating nonlinear effect in frequency dependence of output power

23 p4203 A70-45070

Auto-oscillatory regimes in annular gas laser under coupling due to scattering, considering mode competition

24 p4351 A70-45183

Multiplicative modulation noise of helium-neon traveling wave laser amplifier at micron wavelength

24 p4317 A70-45188

Electro-optical light speed measurements with interference comparator using He-Ne lasers with light modulators

24 p4353 A70-45562

Rate equation study of multiwavelength far IR laser oscillations in water vapor, taking into account molecular rotation-vibration interaction

24 p4354 A70-45812

High pressure pulsed Xe laser obtained with transversely excited He-Xe discharge

24 p4355 A70-46087

Thermonuclear spacecraft propulsion, comparing X ray pumped gas laser and ion drive systems

24 p4377 A70-46211

Interference fringes on gas laser beam reflected by total reflection prism

24 p4356 A70-46272

GAS LIQUEFACTION U CONDENSING GAS LUBRICANTS

High speed rotor supported by air lubricated foil bearings subjected to periodic unidirectional excitation by vibrator, noting stability at high speeds

[ASME PAPER 69-LUB-E] 01 p0099 A70-10376

Direct and incremental variational formulations for steady compressible lubrication based on finite element method, noting limitations of numerical techniques

[ASME PAPER 69-LUB-12] 01 p0102 A70-10393

Book on gas lubrication covering general equations, externally pressurized journal and thrust bearings, etc

02 p0310 A70-12651

Hydrostatic thrust bearing with electrically conducting gas lubricant under axial current induced MGD pinch

03 p0497 A70-13780

Augmented small parameter gas film equation for squeeze film journal bearing solved in terms of radial displacement

[ASME PAPER 69-WA/LUB-9] 04 p0697 A70-14766

Self acting, hydrostatic and squeeze-film gas lubricated bearings applications to gyroscopes, accelerometers, torque testers, etc

05 p0855 A70-16446

Balanced rotor with radial sliding bearing bushings, studying lubricant gas restoring force effect on stability with allowance for bushings translational movements

11 p2058 A70-25581

Externally pressurized bearing with electrically-conducting gas lubricant under axial magnetic field, considering load capacity

12 p2244 A70-28018

Spherical gas lubricated sliding bearing with forced injection, determining pressure distribution by numerical integration

18 p3262 A70-36273

Augmented small parameter gas film equation for squeeze film journal bearing solved in terms of radial displacement

[ASME PAPER 69-WA/LUB-9] 19 p3435 A70-37609

Direct and incremental variational formulations for steady compressible lubrication based on finite element method, noting limitations of numerical techniques

[ASME PAPER 69-LUB-12] 19 p3436 A70-37616

Gas lubrication with injection at large compressibility numbers, deriving asymptotic solution

20 p3637 A70-39817

Cylindrical gas suspension lubricating layer pressure distribution calculation by perturbation method, determining angular rigidity

20 p3637 A70-39818

Externally pressurized air lubricated journal bearings with multiple supply holes, predicting load carrying capacity, flow requirement and stiffness

20 p3639 A70-40505

Spiral grooved gas lubricated thrust bearings, calculating self heating induced thermal distortion effects on load capacity

[ASME PAPER 70-LUBS-14] 22 p4044 A70-42447

Gas lubricated foil bearing performance as support for turborotor simulator, examining heating and thermal gradient effects

[ASME PAPER 70-LUBS-12] 22 p4044 A70-42448

GAS LUBRICATED BEARINGS U GAS BEARINGS

GAS MASERS

Dynamic time constants for specific transition and relaxation times of hydrogen maser, noting coupling between hyperfine differences and atomic polarization

03 p4498 A70-13007

Ammonia maser transient spiking effects under periodic oscillation condition modulation, noting frequency sweep width role

07 p1299 A70-19685

Atomic hydrogen maser wall shift determined by measurements on FEP Teflon coated storage bulbs, suggesting Teflon properties change as basis

07 p1301 A70-19973

Phase comparisons between commercial cesium beam frequency standards and NASA experimental hydrogen maser NX-1

08 p1513 A70-21592

Orbiting clock experiment for measuring gravitational red shift of earth by comparing ground based and satellite-borne hydrogen maser clocks

08 p1501 A70-21950

Submillimeter wave applications in measurement and communication, developing submillimeter gas maser sources

09 p1676 A70-22784

Cavity and storage temperature effects on hydrogen maser oscillation in 77-293 K range

13 p2425 A70-28713

Hydrogen maser wall shift measurement, using flexible storage bulb for accuracy improvement

19 p3445 A70-37759

Hydrogen maser frequency shift due to atomic collisions with deformable storage bulb surface

21 p3836 A70-41453

GAS MIXTURES

NT DETONABLE GAS MIXTURES

Hydrodynamics, mass and energy transfer equations for moderately dense gases multicomponent mixtures, using Bogoliubov theory

01 p1146 A70-10129

Gas-particle primary and pure gas secondary streams turbulent mixing, solving for various mixing zone flow field parameters

01 p0061 A70-10337

Pulmonary artery blood sampled before or during rebreathing of carbon dioxide in nitrogen mixtures, at rest and during exercise, discussing oxygen pressure changes

01 p0020 A70-10652

Linear small disturbance theories applied to two component gas mixture with fluid motion accompanied by nonequilibrium effects, discussing linear convection and reaction processes

01 p0062 A70-10803

Relaxation in gas-particle flow, analyzing thermodynamic properties, interactions, single particles and one dimensional flow equations

01 p0062 A70-10805

Molecular sieve mixed gas adsorption and vacuum desorption of carbon dioxide in Apollo spacecraft cabin

01 p0040 A70-11450

Diffusion coefficients for laminar multicomponent dissociating boundary layer at surfaces of thermally decomposing protective coatings

01 p0042 A70-11583

Chemical kinetics in reaction zone of shock heated hydrogen-carbon monoxide-oxygen mixtures, measuring density field behind normal shock wave by optical interferometry

02 p0250 A70-12022

Detonation of gaseous systems with marginal compositions, showing sensitivity to physicochemical factors

02 p0251 A70-12025

Premixed methane-oxygen-nitrogen combustion in conical reactor fed by choked sonic flow jet, analyzing reaction products chromatographically

02 p0397 A70-12030

Structure of hydrogen-oxygen diffusion flame in equilibrium using iterative solution

02 p0352 A70-12796

Density effects on transport coefficients of gaseous mixtures, solving modified Boltzmann equation including collisional transfer and three-particle collision effects

03 p0606 A70-13576

Numerical analysis of near equilibrium flow regions in chemically relaxing gas mixtures past blunt bodies at supersonic speeds

04 p0666 A70-14603

Ionic collision processes in nitrogen and oxygen mixtures in mass spectrometer ion source

04 p0646 A70-14700

Gas diffusion coefficients for He-N and nitrogen-carbon dioxide systems in diffusion cell utilizing porous stainless steel barrier

04 p0780 A70-14710

Thermal recovery factors at hemispheric probe stagnation point in low density supersonic jets of He-Ar and H-N mixtures

[ASME PAPER 69-WA/HT-27] 04 p0782 A70-14810

Mass flow rate calculation of methane and natural gas mixtures through critical flow nozzles

[ASME PAPER 69-WA/FM-4] 04 p0667 A70-14839

Admixtures effect of chloroform, diethyl ether and acetone vapors on carbon dioxide laser output power

04 p0702 A70-15202

Shock wave width and temperature expressions for argon-helium mixture

04 p0672 A70-15223

Diatomic oxygen-nitrogen collisions in mixtures with CO, determining vibration-vibration energy exchange probabilities

04 p0723 A70-15562

Equation of state for neutron, proton and electron gas mixture associated with cold matter above white dwarf densities and below nuclear density

05 p0905 A70-15756

Initial disturbances propagation in gas mixtures by asymptotic analysis, observing diffusely and viscously damped modes

05 p0833 A70-16404

Polyamide fabric burning rates in oxygen-inert gas mixtures, studying damping effects of density, thermal conductivity, molecular constants and mass flow

06 p1090 A70-17284

Vigilance time degradation, studying effects of breathing gas mixtures with varying oxygen and carbon dioxide content

06 p1000 A70-17293

Kinetic analysis of ion-molecule reactions in Ar-N mixtures with H, deuterium and HD using ion ejection mode of ion-cyclotron-resonance spectroscopy

06 p1108 A70-17332

Chemical laser action in spark excited CS₂-O₂ mixtures, attributing emission to combustion product CO

06 p1080 A70-17445

Chemical laser CW operation achieved by mixing gases, obtaining pumping energy from chemical reactions

06 p1080 A70-17492

Inviscid hypersonic blunt body flow of hydrogen-oxygen mixtures in shock layer stagnation region

06 p0968 A70-17555

Gas mixture internal energy in internal combustion engine cylinder calculated with allowance for thermal discontinuity

06 p1130 A70-17628

Viscosity, thermal conductivity, specific heat and Prandtl number of hydrogen, methane and hydrogen-methane mixtures calculated for variation with temperature neglecting dissociation effects

06 p1177 A70-17700

Kinetic Boltzmann equations for spatially uniform two component gas mixture solved with allowance for relaxation processes, assuming differing temperatures

06 p1109 A70-17754

Energy and mass transfer during elastic and inelastic molecular collisions in reacting gas mixtures, using Enskog and variational methods in solving Boltzmann equations

06 p1110 A70-17760

Maxwellian distribution perturbation in chemically reacting gas mixtures with lower inelastic collision frequency than elastic

06 p1110 A70-17761

Laser induced Raman scattering as diagnostic technique for measuring specie concentrations in gas mixtures

[AIAA PAPER 70-224] 06 p1066 A70-18214

Unsensitized gaseous fuel-air mixtures photochemical ignition due to molecular oxygen photodissociation by radiant energy absorption

[AIAA PAPER 70-149] 06 p1183 A70-18225

Species concentration, jet structure and diatomic nitrogen rotational temperature measured for diffusive separation of nitrogen-helium mixture free jets, using electron beam

06 p1043 A70-18253

Species spatial distribution measured for He-Ar gas mixtures expanding in supersonic jets, compared to measurements with skimmer-nozzle arrangement

06 p1066 A70-18256

Boltzmann equation for binary mixtures of rarefied gases solution involving specific expansion of distribution functions

06 p1047 A70-18311

Surface diffusion slip velocity in binary gas mixture above solid surface, basing calculation on distribution functions determined from Boltzmann equation

06 p1049 A70-18333

Moment methods for calculating modeled diffusion gas mixture shock waves using Monte Carlo method, discussing distribution function and flow pattern

06 p1050 A70-18336

Normal shock wave structure in binary gas mixtures of chemically inert monatomic molecules, using kinetic theory moment method

06 p1051 A70-18343

Shock structure in binary gas mixture, discussing governing equations and Chapman-Enskog procedure

06 p1051 A70-18344

Shock wave structure in He-Ar mixture velocity and temperature profiles based on kinetic model equations

06 p1051 A70-18346

Thermal conductivity calculation for chemically reacting multicomponent gas mixture, comparing results from Brokaw method and simplified formula

06 p1184 A70-18554

Thermodynamic properties of nonequilibrium multicomponent gas mixtures including Fermi-Dirac statistics effect, discussing internal partition function for free and confined atoms

06 p1184 A70-18637

Stainless steels case hardening in hydrogen, nitrogen, propane and butane mixture, showing temperature and process duration effects

07 p1291 A70-18831

P-v-T-x relationships determination method for gaseous mixtures at high pressures and temperatures, studying He-nitrogen mixtures compressibility

07 p1420 A70-19205

Preignition heat release rate profile in ethylene-air mixture flow against hot surface, determining temperature and velocity distribution optically

07 p1420 A70-19263

Kinetics of attack of SiC in monoatomic mixtures of N and O generated by microwave discharge dissociation

07 p1421 A70-19332

Coupled vibrational relaxation in mixtures of diatomic gases, showing energy pumping phenomenon between species

07 p1338 A70-19627

Cesium plasma composition as equilibrium mixture of ideal gases assuming chemical equilibrium attainable by specified reactions

07 p1349 A70-19660

Helium and argon atoms number densities radial profiles in supersonic free jets of binary gas mixtures by molecular beam sampling

07 p1341 A70-20105

Photochemical calculations on mesospheric ozone for oxygen only, oxygen-hydrogen and oxygen-hydrogen-nitrogen atmospheres

07 p1273 A70-20268

Diffusive separation of Ar 36 and 40 and He in axisymmetric supersonic jet taking into account pressure diffusion

08 p1431 A70-21027

Multicomponent gas absorption analysis to illustrate interactions of coupled fluxes in ammonia-water system

08 p1597 A70-21028

Oscillatory relaxation of binary system of heat conducting viscous gases composed of nonspherical molecules

08 p1547 A70-21085

Shock wave structure in binary mixture of monoatomic gases based on integral kinetic equations, using iteration process

08 p1483 A70-21086

Bromine monoxide formation by atomic oxygen-bromine reaction in flash photolysis of bromine-nitrous oxide and bromine-nitrogen dioxide mixtures

08 p1455 A70-21342

Hydrodynamics, mass and energy transfer equations for moderately dense gases multicomponent mixtures using Bogoliubov theory

08 p1548 A70-21405

Thermal conductivity of multicomponent gas mixtures obtained in higher approximations

09 p1788 A70-22317

Ti tetrachloride, Si tetrachloride and hydrogen gas mixtures flow over heated graphite substrates, describing Ti silicides formation

09 p1703 A70-22646

Ni-Cr superalloys hot corrosion, studying sulfidation-oxidation in various synthetic controlled gas mixtures

09 p1706 A70-22944

Shock heated molecular beams of argon, oxygen and mixtures with helium, measuring particle velocities and gas dissociation

09 p1733 A70-23180

Coherent radiation amplification factor for 0.63 micron wavelength in He-Ne mixture, noting dependence on discharge current for various pressures

09 p1698 A70-23304

Electric discharge reactions in mixtures of phosphine with methane, ammonia and water, obtaining biologically significant inorganic and organic phosphorus compounds

09 p1630 A70-23396

Population inversion generation through gaseous oxides mixing with nitrogen flow thermally excited

09 p1700 A70-23569

Near equilibrium transonic flows of reacting gas mixtures based on linearization of thermodynamic and kinetic quantities

10 p1867 A70-24133

Solar radiation energy distribution simulated using vacuum monochromator, discussing Ar-Kr-Xe-methane mixture

10 p1931 A70-24317

Specific intensity production from photolysis of ozone-oxygen mixtures at 2537 Å, investigating mechanism

10 p1831 A70-24565

Perfect gas mixtures thermodynamic functions at high temperatures with correction for Debye-type electrostatic interaction effects

10 p1968 A70-24707

Molecular densities and population inversion pulse shape in working gas in mixture with thermally excited auxiliary gas

10 p1920 A70-25112

Thermal conductivity of monatomic binary gas mixtures at moderately low temperatures and pressures, considering various Ar-He mixtures

11 p2147 A70-25755

Gas mixture composition effect on bacteria growth oxidizing methane and propane, establishing proportional biomass concentration to hydrogen and oxygen in mixture

11 p1991 A70-25938

Carbon dioxide fixation in hydrogenomonas eutropha determined from titrating liquid culture with carbon dioxide, showing dependence on oxygen content in gas mixture

11 p1991 A70-25940

Hypoxia tolerance of albino rats in He-oxygen and Ar-oxygen environments in heat-pressure chamber, discussing He-oxygen mixture cooling effect

11 p1987 A70-26103

Recombination in hydrogen-oxygen reaction studied by monitoring IR emission from water vapor formed by shock initiated combustion

11 p1995 A70-26377

Hydrogen-air turbulent diffusion flame structure at differing air and hydrogen velocities

11 p2151 A70-26387

Laminar boundary layer equations solved for mass and energy transfer in binary gas mixture, investigating forced and free convection

11 p2151 A70-26558

Gas mixture plasma ionized and heated by discharge and ejected into vacuum, considering nonequilibrium ionization calculation with gap between electron and heavy particle temperatures

11 p2092 A70-26732

Reaction rate constants in heated mixture of hydrogen, carbon dioxide and Ar behind shock waves measured by IR spectroscopy

12 p2274 A70-26891

Radiative intensity calculations for carbon dioxide and carbon dioxide-nitrogen plasmas for various temperatures, densities and path lengths, computing UV and continuum spectra

12 p2275 A70-27170

Primitive earth prebiological organic synthesis via amino acids shock heating in atmosphere: simulating gas mixture, suggesting energy sources from atmospheric entry

12 p2167 A70-27269

He-Ne laser optimal mixture composition ratio for generating IR radiation at two wavelengths

12 p2251 A70-28293

Quenching efficiency of molecular oxygen relative to nitrogen, carbon monoxide, carbon dioxide and argon, involving photolysis of gas mixtures

13 p2361 A70-28498

Reaction rates temperature dependence for artificial carbographites of various densities in oxidizing gas media

13 p2519 A70-28577

Electron radiation temperature measurements in sealed-off carbon dioxide laser, determining gas mixture effect on discharge properties

13 p2426 A70-28808

Ar ion lasers investigated for effect of added He on pulse output intensity

13 p2426 A70-28809

- Human respiratory responses to gas mixtures with different oxygen content under rarefied atmospheric conditions 13 p2353 A70-29521
- Hot-wire probe measuring He-air mixture velocity and concentration following He discharge from circular orifice, noting calibration method 13 p2412 A70-29990
- Linearized gas mixture nonequilibrium flow fields, analyzing consequences of multiplicity of principal relaxation frequencies 14 p2566 A70-30474
- Transport cross sections for isotopic methane and mixtures, considering inelastic and thermal diffusion effects 14 p2665 A70-30652
- Turbulent mixing at contact surface in driven shock wave in shock tube with bursting diaphragm for He-Ar test gas mixtures 14 p2566 A70-31030
- Methane-air inverted flames blowoff at thin stabilization plates of twin slit inverted flame burner, determining critical values of Karlovitz flame stretch factor 14 p2666 A70-31092
- Temperature estimation of micro hydrogen-air diffusion flame from hydrogen content of unburned gas mixture 14 p2666 A70-31095
- Nitrogen dioxide continuum in green-white afterglow of molecular oxygen and nitrogen, using spectrometry and photometry 14 p2579 A70-31254
- Supersonic nonequilibrium gas mixture flow past segmental bodies nose areas to simulate Venusian atmosphere, determining temperature, pressure and concentration distributions 15 p2796 A70-31483
- White light laser construction using Ar-Kr laser with suitable mixture and pressure of gases to provide equal output intensities of red, yellow, green and blue 15 p2752 A70-32046
- Heat conductivity of Xe-He binary gas mixtures, allowing for molecular transfer and polarity effects 15 p2827 A70-32107
- Rarefied gas mixtures efflux from opening at various pressures, calculating component discharge coefficients for molecular flow conditions 15 p2721 A70-32137
- Cesium plasma composition as equilibrium mixture of ideal gases, assuming chemical equilibrium attainable by specified reactions 15 p2781 A70-32697
- Approximate formula for viscosity of binary polar gas mixtures confirmed for unlike cross sections 16 p2996 A70-33055
- Spacecraft attitude control microthrusters utilizing catalytically reactive gas mixtures during pulse mode and steady state operation [AIAA PAPER 70-614] 16 p2969 A70-33611
- Flow and diffusion phenomena in rarefied gas mixtures associated with separation nozzle process, using molecular pressure probe and mass spectrometer 16 p2893 A70-33699
- Nonequilibrium vibrational energy and relaxation equation for carbon dioxide-nitrogen molecular gas mixtures in supersonic free jet exhausting into vacuum [AIAA PAPER 70-867] 16 p2895 A70-33910
- High temperature plasmas of mixtures of nitrogen with rare gases, calculating equilibrium thermodynamic properties 17 p3195 A70-34932
- Aluminum spherical particles nonautonomous and autonomous combustion in O with N or Ar initiated by HF induction heating 17 p3145 A70-35042
- Coulomb interaction Fermi gas mixture collision integral, obtaining formula from Boltzmann equations and Taylor series expansion 17 p3070 A70-35043
- Thermal diffusion of isotropic, nonisotropic and multicomponent mixtures with monatomic and polyatomic molecules, considering kinetic theory and experimental results 17 p3197 A70-35537
- Orifice length-to-diameter ratio effect on spray mixture uniformity from unlike impinging jets 17 p3073 A70-35671
- Potassium salts thermal and chemical ionization in flames of hydrogen-oxygen-helium and hydrogen-air mixtures in constant volume vessels 18 p3345 A70-36243
- Gas particle mixtures nozzle flow at high loading ratios 18 p3208 A70-36693
- Heat transfer coefficient of chemically reacting gas mixture as function of Lewis-Semenov number, discussing nitrogen dioxide decomposition 19 p3550 A70-37251
- Pulsed argon ion laser output properties from electron temperatures and densities produced by He-Ar gas mixture 20 p3640 A70-39137
- Carbon dioxide initial dissociation rates in glow discharges and gas mixtures at low pressures, using mass spectrometric sampling and plasma diagnostic methods 20 p3674 A70-39235
- Noble gas mixture large shock tunnel driven linear MHD generator, examining electron density, operating characteristics and electrical properties 20 p3682 A70-40012
- Orthostatic tolerance increase in animals by application of hyperoxic and hypercapnic gas mixtures 20 p3574 A70-40185
- Weak steady shock waves formation in relaxing binary gas mixture, discussing vibrational specific heat temperature dependence 20 p3614 A70-40350
- Premixed laminar flames of hydrogen, oxygen and nitrogen burned on Meker burner, investigating diffusional effects on gas composition changes 20 p3739 A70-40469
- Hydrogen-oxygen and hydrogen-nitrous oxide systems combustion, measuring isotopic substitution effect on flame speed by schlieren technique with rotating drum camera 20 p3583 A70-40472
- Continuous wave laser action in chlorine, Ar and He gas mixtures, observing energy transfer between Ar and chlorine by pumping action 21 p3834 A70-40570
- Methane and hydrogen consumption rates during slow reactions in mixtures of molecular hydrogen, oxygen and nitrogen 21 p3772 A70-40879
- Ion-molecule reactions in mixtures of hydrogen sulfide with ethylene and acetylene from deuterium labeling studies via ion cyclotron resonance spectroscopy 21 p3773 A70-41200
- Shock tube measurements of bimolecular reaction rates in branched chain hydrogen-carbon monoxide-oxygen system, monitoring flame band emission 21 p3773 A70-41314
- Carbon dioxide-He-nitrogen gas mixture pulsed discharge system afterglow gain measurements up to one atmosphere, using CW laser 21 p3837 A70-41719
- Helium and nitrogen role in carbon dioxide laser excitation, discussing optimum gas mixture 21 p3837 A70-41919
- Carbon dioxide-nitrogen He discharge gas temperature measurements involving plasma refractivity determination by interferometer 22 p4049 A70-42366
- One dimensional sound propagation in reacting gas mixture near equilibrium, obtaining equilibrium and frozen sound speed 22 p4074 A70-42752
- Equilibrium sonic velocity in reacting gas mixture in nozzle flow for unlimited species and independent chemical reactions 22 p4074 A70-42753
- Nonequilibrium gasdynamic and thermodynamic properties of chemically reacting gas mixtures in high expansion subsonic and supersonic nozzles for selected rocket propellants 22 p3982 A70-42761
- Interdiffusion coefficients for hydrogen-carbon dioxide and oxygen-carbon dioxide systems at low temperatures 22 p4076 A70-43393
- Binary gas mixture separation effects by centrifugation in cylindrical tube, calculating maximum radial concentration difference between wall and axis by numerical integration 23 p4181 A70-44206
- Kinetic transport theory for mixed dilute gases consisting of linear rotating diamagnetic molecules in external homogeneous magnetic field 23 p4223 A70-44927
- Rarefied binary gas mixture, determining temperature gradient effect under various pressures 23 p4284 A70-44984
- Heat transfer in chemically reacting gases boundary layers, obtaining approximate solution by film theory 24 p4428 A70-45101
- Numerical analysis of fuel combustion in supersonic stationary flows of hydrogen air mixture past bodies by two-component reaction kinetics model [ICAS PAPER 70-52] 24 p4428 A70-45500
- GAS PHASES**
- U VAPOR PHASES**
- GAS PIPES**
- Comparative load capacity of disk models of natural gas blowers of different designs under plastic strain 23 p4232 A70-43941
- GAS POCKETS**
- Roshko model cavity solution based on Falkovich method application to two dimensional permanent irrotational flow of subsonic gas jet 07 p1258 A70-19571
- GAS PRESSURE**
- Pulsed arcs in argon and helium at superhigh pressures, noting plasma ionization and temperature and charged particle density 01 p0149 A70-10168
- Coronal gas pressure boundary conditions on model upper chromosphere, determining temperature and hydrogen density assuming hydrostatic equilibrium 01 p0175 A70-10243
- Pulmonary artery blood sampled before or during rebreathing of carbon dioxide in nitrogen mixtures, at rest and during exercise, discussing oxygen pressure changes 01 p0020 A70-10652
- Gas solubilities investigated for gaseous pressurization of propellants 01 p0160 A70-10840
- Nitrogen, oxygen and air luminescence spectra excited by fast electrons at low gas pressures in IR spectral region compared with polar auroral spectra 01 p0083 A70-11536
- Leakage in mechanical face seals with hydrodynamic films, noting misaligned seal theories for pumping with cavities and two fluids [ASLE FICFS PREPRINT 19] 02 p0308 A70-12170
- Longitudinal pressure gradient measurement for DC discharges in He, Ne and Ar, investigating effects of gas purity, tube geometry, etc 04 p0671 A70-14995
- Axial neutral gas pressure gradient calculated in cylindrical positive column of DC discharge due to driving volume force 04 p0671 A70-15003
- Pulsed high current arc burning in hydrogen at pressures to 400 atm, discussing stability and discharge plasma parameters 04 p0729 A70-15224
- Spectroscopic determination of radial temperature distribution at various currents in negative glow of hollow cathode discharge, analyzing influence of gas pressure 05 p0888 A70-16358
- Gas pressure and pressure stratification in sunspot, using curve of growth analysis 05 p0911 A70-16432
- Hypersonic rarefied merged layer flow over sharp slender cones, using strong interaction theory and free molecular flow to analyze surface pressures 06 p0982 A70-18363
- Orifice effect investigated for sharp flat plate in hypersonic rarefied flow, measuring surface pressure 06 p0982 A70-18366
- Dense gas effects in free piston hypersonic wind tunnel, discussing Longshot facility, free piston cycle, reservoir conditions decay and hypersonic nozzle flow [AIAA PAPER 69-169] 07 p1249 A70-19310
- Loading effects in measurements involving electrical and nonelectrical systems used in determining gas pressure and fluid flow 09 p1672 A70-22011
- He-Ne laser emission modulation by varying discharge current, studying gas pressure effect and role of ballast resistor 09 p1695 A70-22411
- Stable equilibrium of rotor in pressurized gas bearing, considering perturbed rotor motion equation together with Reynolds equations for pressures in lubricant layer 09 p1690 A70-22544
- Pressurized gas bearing analysis, using finite difference method for solving Reynolds equation for pressures in lubricant layer 09 p1690 A70-22545
- Fast neutral particles produced in electron-ion oscillation discharge as function of gas pressure and magnetic field 09 p1736 A70-23190
- Turbulent gas nonresonant pressure pulsations effects on local convective heat transfer in tube flow 10 p1968 A70-24288
- Helium ions diffusion perpendicular to magnetic field in He gas, measuring coefficients as function of field strength and for various gas pressures 10 p1925 A70-25108
- Gas effect on natural frequency of electrostatically excited string vibrating between flat electrodes at medium pressures 11 p2048 A70-25582
- Thermodynamic and transport properties of high temperature and pressure gases measured with ultrasonic pulse technique 11 p2147 A70-25753
- Effusion steady state pressures time dependence of carbon monoxide and calcium vapors generated during calcium oxide-graphite interaction 11 p1995 A70-26602
- Isotropic Be billet fabrication by gas pressure consolidation and pressureless sintering techniques 12 p2252 A70-26888
- Monograph on acoustic theory for determining frictional pressure drop effect on gas state behind reflected wave in shock tube 12 p2209 A70-27000
- EHF microwave absorption in compressed carbon dioxide, measuring dielectric loss as function of gas density 12 p2273 A70-27571
- Electron density determination, establishing gas pressure relation to discharge current 13 p2460 A70-28710

- Gas pressure effects on visible and UV laser action in small argon Z-pinch plasma discharge, using streak photographs 15 p2750 A70-31968
- White light laser construction using Ar-Kr laser with suitable mixture and pressure of gases to provide equal output intensities of red, yellow, green and blue. 15 p2752 A70-32046
- Current-voltage relation for ion collection spherical DC probe at high ambient gas pressure 16 p2899 A70-32929

- Hunting phenomena of hydrogen gas plastic balloon at ceiling altitude, considering exhaust duct, extra volume and shape 17 p3018 A70-35317
- Vibrating diaphragm gas pressure measuring system based on membrane damping, applying to prototype atmospheric entry probes 17 p3095 A70-35524
- Oxygen pressure effect on stainless steel cyclic hardening during vibration tests at resonant frequency 18 p3273 A70-36042
- Reliability tests of blood carbon dioxide pressure measurement methods, indicating carbon dioxide-electrode method superiority 19 p3365 A70-38371
- Argon hydrostatic pressure effect on self diffusion coefficients and activation energy of Al and Be single crystals 20 p3644 A70-38961
- Transversely excited atmospheric pressure TEA/carbon dioxide laser, noting power output and cost 20 p3641 A70-39424
- Hypersonic sound speeds measured in methane at moderate pressures by spontaneous Brillouin light scattering experiments 21 p3830 A70-41938
- Intense high ionization degree discharge plasma initiation at low gas pressures, using auxiliary discharge 22 p4078 A70-42356
- Gaseous substances thermodynamic functions and chemical equilibrium constants logarithms dependence on temperature and pressure, deriving internally self consistent formulas 22 p4124 A70-42682
- Combustion driven shock tunnel applied to tailored interface operating conditions, controlling mass flow into tube by throttling plates 22 p4006 A70-42765
- Gas pressure differential across multilayer insulation blanket during rapid evacuation predicted, using one dimensional flow theory [AIAA PAPER 69-608] 23 p4282 A70-44522
- Oxygen pressure effects on Ni oxidation kinetics at high temperatures 23 p4408 A70-44920
- One dimensional gas pressure as function of activity, using Poisson-type partition function for perturbation calculation of thermodynamic limit 24 p4430 A70-46269
- GAS REACTORS**
- Flow characteristics of curved porous wall gas core reactors for nuclear rocket engines, visualizing simulated fuel flow with air-smoke combination 06 p1104 A70-17509
- GAS SPECTROSCOPY**
- Dispersed fluorescence spectra from vacuum UV photon impact on COS, noting absence of emission from higher vibrational levels 01 p0148 A70-11353
- Spectral absorption and transparency of water vapor, carbon dioxide, carbon monoxide, methane and nitrous oxide bands in IR region 04 p0715 A70-15255
- Tunable nitrous oxide laser cavity losses and absorption by carbon dioxide determined spectroscopically 11 p2061 A70-25361
- Ion cyclotron resonance spectroscopy technique for determining electrons photodetachment energy from negative ions in gas phase 11 p1995 A70-26001
- Average rotational temperature of Venus atmosphere above cloud tops from carbon dioxide band spectroscopy 14 p2650 A70-31219
- Gaseous Al oxide bond bending frequency in Ne and Ar matrices at liquid He temperatures, investigating IR spectrum 15 p2695 A70-32830
- Turbulent and reacting flows temperature and mixing rates determination, using gaseous HF tracer spectroscopy [AIAA PAPER 70-726] 16 p2856 A70-33497
- Ar plasma generation by focused Q switched ruby laser beam, measuring density and temperature by electro-optical spectroscopy 17 p3107 A70-35111
- Secondary combustion products of air augmented boron loaded solid propellant rocket ramjet, measuring properties by spectroscopy 17 p3196 A70-35196

- Optimal separation height of instrument container in atmospheric gas composition mass spectrometric studies 18 p3260 A70-36996
- Excitation transfer by spontaneous emission in atomic gas, investigating static magnetic field effect on radioactive cascade 19 p3443 A70-37363
- Transition probabilities of visible and near-IR neon lines, using gas-driven shock tube spectroscopy 20 p3674 A70-39134
- Level relaxation constants measurements by three-level laser spectroscopy, using line shape of stimulated shifted resonance scattering in gas 24 p4354 A70-45821
- GAS STREAMS**
- Gas-particle primary and pure gas secondary streams turbulent mixing, solving for various mixing zone flow field parameters 01 p0061 A70-10337
- Injected B particles burning in hot gas stream of oxidant mixture with Ar and H, observing trace widening by motion picture technique 01 p0218 A70-11016
- Circulation gas lens temperature distribution, considering effects of gravity, wall thermal conductivity, glass interlayer, etc 03 p0604 A70-13387
- Optimum radiation shield quantity assuring gas temperature measurement accuracy, using radiation transfer equations and shield-to-shield temperature estimations 03 p0486 A70-13556
- Axisymmetric radiating flow behind paraboloidal shock in ideal inviscid gas hypersonic stream, using differential approximation method for blunt body solution 04 p0669 A70-14937
- Breakthrough curve shape prediction during adsorption from gas stream in fixed bed adsorbers for trace contaminant control applied to activated charcoal 04 p0786 A70-15317
- Liquid sheet and jet breakup in supersonic gas stream, characterizing breakup mechanism by gross jet fracture [AIAA PAPER 70-89] 06 p1039 A70-18109
- Combustion of pure crystalline boron single particles injected into hot oxidizing gases streams at atmospheric pressure 07 p1359 A70-19583
- Brightness curves for eclipsing binary V448 Cygni indicating gas stream flows in system 08 p1577 A70-21441
- Current diffusion from magnetic piston into postshock gas upstream observed in electromagnetic shock tube 09 p1736 A70-23185
- Gas stream velocity field produced by shock wave impinging against wing moving at supersonic speed 10 p1799 A70-24124
- Rarefied gas stream density measurements with electron beam fluorescence experiment, determining pressures and densities behind plane shock wave and in supersonic nozzles 11 p2087 A70-26743
- Plane, steady, irrotational flow of gaseous subsonic stream bounded by two infinite parallel walls, discussing application to incompressible fluids 13 p2389 A70-29631
- Carbon dioxide absorption from gas streams by weak base ion exchange resins 18 p3226 A70-36767
- Gas dynamics turbulence of controlled properties effect on electrical discharge across plasma stream, preventing filamentary nature 20 p3681 A70-40008
- High velocity intergalactic hydrogen origin, examining galactic evolution by gas inflall 21 p3887 A70-41112
- Liquid droplet shape effect flow field velocity and pressure distribution over windward surface in high speed gas streams 21 p3809 A70-41762
- GAS TRANSPORT**
- Monte Carlo method applied to Boltzmann collision integral in solving heat transfer between plates at different temperatures in elastic spheres gas 06 p1183 A70-18324
- Step profile decay of initial perturbations of radiating gas as function of optical depth and Boltzmann number 07 p1255 A70-19212
- Transport properties of high temperature gases compared with room temperature differences, considering chemical equilibria, heat conduction and atom-free radical forces 07 p1424 A70-19880
- Downward ozone transport from troposphere to atmospheric boundary layer by turbulent diffusion calculated by model, estimating annihilation rate 10 p1875 A70-24486
- Physiology of oxygen transport in human organism and genesis of tissue hypoxia, discussing pulmonary functions, blood transport properties and tissue blood flow and diffusion 10 p1821 A70-25077

- Physiology and pathophysiology of oxygen transport in human blood, discussing fluctuations in O₂ capacity and affinity 10 p1821 A70-25079
- Critical oxygen supply of cerebral mitochondria and intercapillary oxygen transport 10 p1821 A70-25080
- Oxygen transport after cardiopulmonary resuscitation from asystole and ventricular fibrillation in dogs 10 p1822 A70-25085
- External respiration, hemodynamics, oxygen transport and consumption in lungs during static load tests 10 p1822 A70-25176
- Nitrogen transport properties to 26,000 degrees K, measuring current-field intensity properties and radial temperature distributions in molecular nitrogen cascade 11 p2151 A70-26841
- Open circuit gas washout test of lungs under inspiration-expiration transmission symmetry, using Hilbert-Schmidt operators 12 p2175 A70-27021
- Spontaneous ignition dependence on transient temperature variations accompanying gas entry to evacuated vessel 12 p2330 A70-27222
- Hydrogen oxygen fuel cell investigated for oxygen transfer to Pt cathode surface 12 p2166 A70-27848
- Resonance radiation transport in optically thick plane gas layer with two-level atoms 12 p2305 A70-27853
- Dilute gas transport properties calculation, investigating numerical techniques to minimize computation time to prescribed accuracy 13 p2441 A70-29089
- Kinetic gas theory mathematical models, analyzing system of N particles in cube 14 p2601 A70-31422
- Hybrid computer simulation of steady state oxygen transport and consumption in capillary-tissue system 15 p2694 A70-32845
- Oxygen-hemoglobin reaction rate constants in red cells obtained by applying in vitro blood data to solutions of differential equations describing intracellular oxygen transport 15 p2686 A70-32846
- Electrical properties of n-type GaAs epitaxial films grown by gas transport method 17 p3144 A70-35706
- Nitrogen and nitric oxide production and diffusion, examining photochemistry and transport at high altitudes 20 p3620 A70-39339
- Hyperbaric oxygen exposure produced hypertension and pulmonary edema, discussing carbon dioxide transport mechanism in blood 20 p3572 A70-39430
- Lower thermosphere minor gaseous constituents vertical transport by nonlinear gravity wave process, showing density scale height decrease from diffusive equilibrium 21 p3818 A70-41098
- Approximate calculations of thermal and viscous transport in high temperature air based on empirical transport equations 21 p3951 A70-41750
- Perturbation method with small parameter applied to turbulent transfer equation in lower atmosphere, solving longitudinal diffusion effect on evaporation 22 p4065 A70-42911
- Nitrogen transport coefficients as function of high temperature in stationary plasma produced in cascade arc chamber 22 p4082 A70-43373
- Enskog theory extended to three particle collisions for gas transport properties 23 p4222 A70-44427
- Gas transport properties at high temperatures and pressures, discussing Ar plasma arc characteristics 23 p4226 A70-44433
- GAS TUBES**
- Gas tube isolator circuit for arcing amplifier in phased arrays, using, programmed charge of capacitance bank during interpulse 16 p2879 A70-34072
- GAS TUNGSTEN ARC WELDING**
- Commercial Ni-Co gas tungsten arc filler metal with mechanical properties stable following stress relief 04 p0710 A70-15653
- Weld porosity in TIG welding of technical Ni in ternary mixtures of Ar with H, O and N 08 p1518 A70-21345
- Low cost programming system for gas tungsten arc welding process for Ti taper and stepped joint designs 08 p1507 A70-21484
- Gas tungsten arc welding application broadened by introducing controlled droplet transfer process 10 p1896 A70-25308
- Electrode shape and background resistance effects on power rationing between gas tungsten arc and electrode 10 p1897 A70-25314

- Numerically controlled gas tungsten arc welding, discussing tape programming, fixture design and fabrication for various welded metal joint configurations
11 p2058 A70-25661
- Pulsed current gas tungsten arc welding in inert gas atmosphere and applications
12 p2238 A70-26853
- Gas tungsten arc hot wire welding operational characteristics and applications
14 p2590 A70-30929
- In-place gas tungsten arc fusion welding for joining small diameter precipitation hardenable aluminum tubing
14 p2590 A70-30930
- Argon-arc welds porosity mechanism in Ti welding
17 p3098 A70-34443
- Al-Si welding rods tests with various surface finishes, considering oxide coatings effect on gas tungsten arc weld quality
18 p3264 A70-37113
- Porosity effects on mechanical properties of Al alloy gas tungsten arc welds, noting strength loss proportional to cross sectional area loss
18 p3265 A70-37205
- Tungsten-helium arc atmospheric contaminants spectral monitoring parameters under welding conditions, using rotating circular wedge to oscillate emission lines across exit slits
21 p3831 A70-40725
- Stainless steel gas tungsten arc welding, considering anode spot size variation and current density
22 p4042 A70-42377
- Repair weld procedures effects on annealed Ti-Al-V weldments mechanical properties, examining defects in inert gas shielded arc welded joints
[ASME PAPER 70-MET-1] 22 p4043 A70-42425
- GAS TURBINE ENGINES**
- NT DUCTED FAN ENGINES
- NT JET ENGINES
- NT RAMJET ENGINES
- NT SUPERSONIC COMBUSTION RAMJET ENGINES
- NT T-56 ENGINE
- NT TURBOFAN ENGINES
- NT TURBOJET ENGINES
- NT TURBOPROP ENGINES
- NT TURBORAMJET ENGINES
- Gas turbine engines vibration characteristics, discussing statistical analysis obtained through condensed vibration overload control program
01 p0166 A70-11420
- Model gas turbine engine blades fatigue strength under stress conditions, considering tensile stresses reproducibility from centrifugal loads
03 p0587 A70-13241
- Failure and defect formation in gas turbine engine disks made of steel alloys, stressing fabrication methods effect on reliability
03 p0588 A70-13251
- Multiple array critical flow venturi air flow metering system constructed for gas turbine engines, developing pressure control valve
[ASME PAPER 69-WA/FM-5] 04 p0688 A70-14838
- Nickel base alloy, WAZ-20 with improved strength in 2000-2200 F range for application to gas turbine engine starter vanes
04 p0706 A70-15097
- Inertia bonded and electron beam welded joints of Waspaloy compared for suitability in aircraft gas turbine engines
04 p0700 A70-15655
- Thermal and gas dynamic characteristics of aircraft turbine engine annular vaporizing combustion chamber determined from air distribution ratio
05 p0895 A70-15897
- Moisture absorptivity and hydrolytic stability effects on operational parameters of gas turbine engine lubricants
06 p1075 A70-17222
- Gas turbine engine blades grinding and polishing procedures, considering fatigue life increase and physical properties stabilization
07 p1292 A70-18833
- Coating and coating processes for superalloys in hot section components of gas turbine engines for aircraft, industrial, marine and vehicular applications
07 p1362 A70-18929
- Centrifugal force induced stressed state in gas turbine blades using photoelastic analysis, emphasizing stress distribution at shroud holes
07 p1403 A70-19118
- Aerodynamic and mechanic design of gas turbine for light helicopters, including flight tests and program objectives
08 p1558 A70-20686
- Gas turbine engines contribution to air pollution, using model combustor to study burned gas composition, emphasizing nitric oxide concentration
08 p1559 A70-21481
- Tubing materials for gas turbine engines covering fabrication, selection, etc
08 p1559 A70-21854
- Aircraft turbine engines strength and gas dynamic characteristics improved by vibration decrease using elastic elements
09 p1742 A70-22471
- Carbon deposit formation in gas turbine engines with various fuels, studying thermal insulation properties
09 p1742 A70-22472
- Energy losses in gas turbine flows ascribed to combined exhaust and internal losses, noting usefulness of entropy loss concept
09 p1743 A70-22659
- Gas turbine components, discussing material selection, fabrication and assembly with emphasis on combustion and turbine sections, turbine coatings, shafts, bearings and seals
10 p1929 A70-23851
- Fluorocarbon fluid Rankine cycle system utilizing gas turbine exhaust heat for environmental control
[SAE PAPER 700160] 11 p1982 A70-25371
- Gas turbine engine technology for military and commercial aircraft, discussing operations economy, design matching to missions and fabrication methods
11 p2101 A70-25873
- Gas turbine engine performance prediction with water-methanol injection, describing analytical method
[SAE PAPER 700208] 11 p2102 A70-25881
- Fluidic gas turbine controls, discussing high temperature operation, hybrid sensors and logic in hostile environment applications
12 p2164 A70-27074
- Tubular gas turbine combustors design by analytical model, summarizing theories of combustor analysis, turbulent flame speed, microvolume burning and stirred reactors
[WSCI PAPER 70-2] 13 p2474 A70-29613
- Soviet book on gas turbine engines for helicopters covering aircraft design and flight dynamics
15 p2787 A70-32199
- Aircraft fan and turbine noise reduction, discussing blade wake interaction, jet mixing and duct acoustic linings
16 p2963 A70-32946
- Weight-dimensions correlation for gas turbine engine/airplane optimization analyses, determining tradeoffs among performance, noise, drag characteristics, etc
[AIAA PAPER 70-669] 16 p2967 A70-33575
- High strength Ti alloys for aircraft gas turbine engines, determining critical properties for compressor fan blades
17 p3122 A70-34436
- Compressor erosion correlation with aerodynamic parameters in gas turbine engines
17 p3147 A70-34711
- Aircraft gas turbine propulsion, discussing engine performance characteristics, thermodynamics, noise and installation
[AIAA PAPER 70-873] 17 p3147 A70-34810
- High temperature and pressure hot gas source for testing fluidic temperature sensor used in gas turbine engine inlet simulation
17 p3058 A70-35157
- Aircraft design minimizing damage by bird strikes to gas turbine engine components, discussing service experience, airworthiness demonstration tests and research programs
18 p3300 A70-35994
- Gas turbine aero engines damage due to bird strikes, emphasizing rig testing and simulation at first stage rotor blading
18 p3236 A70-35995
- Flameout and ignition correlation for diffusion fuel burnup behind angled stabilizers in annular turbine combustion chamber
18 p3300 A70-36127
- High temperature radial turbine design for small gas turbine engines, discussing aerodynamic, structure and thermal analyses
18 p3301 A70-36450
- Gas turbine engine dynamic performance simulation, using analog and digital techniques
[ASME PAPER 70-GT-23] 18 p3327 A70-36830
- Ni superalloys for gas turbine engines, discussing chemical composition, microstructure, strength, solidification, etc
[ASME PAPER 70-GT-24] 18 p3278 A70-36831
- Helicopter gas turbine governor systems for engine and rotor speed control, minimizing pilot activity
[ASME PAPER 70-GT-37] 18 p3214 A70-36835
- Flight test program for helicopter gas turbine engines, considering engine-airframe-control systems integration and environmental tests
[ASME PAPER 70-GT-38] 18 p3303 A70-36836
- Critical aviation gas turbine rotating component life limit determination, describing statistical, maintenance, inspection and life evaluation computer program (SMILE)
[ASME PAPER 70-GT-66] 18 p3303 A70-36841
- Helicopter gas turbine engines protection against salt spray, dust, sand, ice, cut grass, etc
[ASME PAPER 70-GT-96] 18 p3263 A70-36843
- Electronic gas turbine diagnostic systems, discussing engine parameters and analysis system
[ASME PAPER 70-GT-131] 18 p3259 A70-36857
- Control system considerations for small shaft-type aircraft gas turbines providing torque, temperature, load sharing and overspeed limiting functions
[ASME PAPER 70-GT-132] 18 p3304 A70-36858
- Aerodynamic stability of branched diffuser systems used in annular combustors of gas turbine engines
[ASME PAPER 70-GT-27] 18 p3209 A70-36868
- Aero gas turbine engines digital computer control, discussing special properties, design and safety problems
[ASME PAPER 70-GT-40] 18 p3304 A70-36870
- Gas turbine emissions analysis for air pollutants, determining species distribution and concentration
[ASME PAPER 70-GT-81] 18 p3226 A70-36883
- Surface alterations by machining processes for gas turbine engine materials, emphasizing effects of milling on Ti and grinding on high strength steels
[ASME PAPER 70-GT-100] 18 p3264 A70-36888
- Ceramic materials for low cost high inlet temperature gas turbine engine components
[ASME PAPER 70-GT-105] 18 p3279 A70-36889
- Gas turbines, dust and air cleaners interrelationship in preventing failure due to air contaminants
[ASME PAPER 70-GT-104] 18 p3305 A70-36890
- Aircraft gas turbine engine development, considering gas dynamic and structural parameters
19 p3489 A70-37238
- Gas turbine engine combustion chamber efficiency dependence on injector characteristics, temperature and fuel physicochemical properties
19 p3489 A70-37247
- Air-mechanical fuel injection effect on gas turbine engine combustion chamber working process, investigating heat generation coefficient, temperature field nonuniformity and combustion efficiency
19 p3489 A70-37248
- Model gas turbine engine blades fatigue strength under stress conditions, considering tensile stresses reproducibility from centrifugal loads
19 p3548 A70-38459
- Failure and defect formation in gas turbine engine disks made of steel alloys, stressing fabrication methods effect on reliability
19 p3548 A70-38469
- Aircraft gas turbine engine smoke emission measurement, discussing test equipment and procedure standardization
20 p3689 A70-39720
- Angular contact bearing balls track position on aero gas turbine engines shaft measurement in test rig at high speeds
20 p3638 A70-40141
- Gas turbine engine compressor rotor roller bearing operation conditions analysis by computer calculation of thermal regime
21 p3834 A70-41777
- Helicopter gas turbine engine protection against sand and dust erosion using particle separators, screens and coatings
[SAE PAPER 700705] 22 p4090 A70-42671
- Sand and dust erosion reduction in gas turbine engines by coatings, sleeves and inserts
[SAE PAPER 700706] 22 p4090 A70-42672
- Fuel delivery and speed control systems for aircraft gas turbine engines, discussing control circuit transfers and block diagrams
22 p4091 A70-43116
- Gas turbine combustion chamber convective and radiant heat transmission, examining steam film cooling of flame tube
22 p4092 A70-43199
- Convection, transpiration and full coverage film cooling methods for various local turbine inlet temperatures, gas pressures and cooling air temperatures
22 p4092 A70-43275
- Gas turbine engine combustion chamber starting, discussing effects of temperature, nozzle characteristics and fuel physicochemical properties
22 p4092 A70-43356
- Two stage gas turbine engine optimal tuning for RPM, thrust, fuel rate and gas temperature, describing automated bench tests
22 p4092 A70-43361
- Stepwise heat removal for increased continuous combustion gas turbine engine cycle efficiency, deriving equations describing cycles
22 p4092 A70-43372
- Computerized calculation of gas turbine cycles thermal efficiency, using hydrocarbon fuel, considering fuel composition and heat of combustion changes
22 p4125 A70-43439
- Aircraft flight propulsion systems performance improvement via materials technology for gas turbine engine components
22 p4057 A70-43573
- Surface degradation by oxidation, temperature fluctuations and hot corrosion of Ni- and Co-base superalloys in gas turbine engines
22 p4057 A70-43574

- Statistical analysis of durability data of heat resistant alloys for gas turbine engines, using long term strength tests of melts in mass production
23 p4204 A70-43940
- Gas turbine engines flow velocity fields, comparing various calculation methods
23 p4136 A70-44735
- Heat transfer at air cooled gas turbine blade trailing edges at various wall temperatures and Reynolds numbers
23 p4283 A70-44737
- Columnar grain and Ni alloy single crystal gas turbine engine components resistant to high temperatures produced by precision casting, using directional solidification
23 p4207 A70-44857
- High temperature gas turbine aircraft engine control system requirements, noting stoichiometric fuel-air ratio [SAE PAPER 700823]
24 p4394 A70-45895
- Turbofan, turbojet and turboprop engine development in aircraft gas turbine evolution, discussing VTOL propulsion, centrifugal and axial compressor engines
24 p4396 A70-46251
- GAS TURBINES**
- Heat transfer coefficients in transpiration cooled gas turbine blades, using two dimensional theory covering porous wall and internal cooling passages
01 p0166 A70-11392
- Chemical composition of cermet material for radial sealing of high temperature gas turbines, ensuring structural stability and oxidation resistance
01 p0124 A70-11621
- Combustion instability in gas turbine main combustors, noting heat release and inlet air flow rates coupling
02 p0353 A70-12012
- Radiation from flames in gas turbines and rocket engines, discussing effects of soot formation fuel chemical composition, combustor operating conditions, etc
02 p0354 A70-12050
- U-shaped combustion chamber two dimensional model for studying factors influencing flame spread and stabilization and heat transfer in gas turbines
02 p0355 A70-12257
- Aerodynamic performance of cascade of porous gas turbine blades with cooling air effusion compared with solid noneffusing blades
02 p0355 A70-12311
- Monograph on application of semiclosed thermosiphon system to gas turbine blade cooling, covering heat transfer and temperature distribution analysis, etc
03 p0551 A70-12992
- Air cooling with radial and jet blowing on gas turbine stage, discussing influence on aerodynamic characteristics
03 p0551 A70-13486
- Liquid fuel film vaporizing combustor for gas turbines, considering combustion efficiency and flame intensity
03 p0552 A70-14324
- Gas turbine rotating disks failure analysis, studying strength as function of material properties, thermal stresses and hole dimensions
04 p0775 A70-15260
- Gas turbine blade material properties change effect on thermal fatigue strength after long term heating
05 p0864 A70-16700
- Gas turbine blades thermal fatigue strength under simultaneous temperature cycles and static tensile loads, analyzing temperature and stress fields
05 p0953 A70-17053
- Temperature field in internally cooled gas turbine blades determined, using integrator combined with coordinating device
05 p0954 A70-17057
- Steady state and dynamic performance of variable geometry free gas turbine using nomogram and analog simulation
06 p1129 A70-17143
- Thin gas turbine disk strength under axisymmetric flexural vibrations, noting agreement of calculated and experimental rotor rpm danger zone
06 p1166 A70-17654
- Gas turbine compensating bellows structural strength, discussing low cycle fatigue test under static loads
06 p1167 A70-17664
- Fluidic devices and applications to gas turbine control, discussing beam deflection amplifiers design parameters [AGARDOGRAPH-120]
08 p1559 A70-21933
- Gas turbine blades design and exploitation processes, discussing long time fatigue strength, static durability and heating effects at elevated temperatures
09 p1772 A70-22469
- Thermal fatigue cycle produced by cooled gas turbine blades, using stress-strain tests and thermal simulation
09 p1655 A70-22585

- Thermal stresses in gas turbine blade calculated, showing role of initial temperature increase of blade cooling air
09 p1775 A70-22596
- Pressure and velocity distribution within radial flow gas turbine rotor computed by two dimensional streamline curvature method
09 p1608 A70-23737
- Balancing method for correcting mathematical model discrepancy with gas turbine based on test data
10 p1930 A70-24289
- Heat transfer from gas to gas turbine buckets, determining angle of attack and rotation influences by extending transfer equation
10 p1930 A70-25140
- Gasdynamic test stand analyzing elastoplastic strains in aircraft gas turbine disks and liquid-propellant rocket engines turbopumps under alternating nonisothermal loads
10 p1862 A70-25298
- Gas turbine blade materials investigated for effect of prolonged heating on mechanical properties and thermal fatigue strength
13 p2434 A70-28994
- Circulated air natural and technical impurities effects on gas turbine time dependent performance emphasizing erosion, deposits and overheating
13 p2475 A70-29713
- Gas flow calculations application to gas turbines simulations, considering engine dynamics, one dimensional flow and program structure
14 p2629 A70-30990
- Gas turbine performance dynamic modeling by analog and digital computer simulation providing clear picture of transient behavior
14 p2629 A70-30991
- Low Reynolds number laminar flow gas turbine regenerators, investigating manufacturing tolerances effects on heat transfer and flow friction behavior
14 p2629 A70-31022
- Periodic flow structure between gas turbine blades, using asymptotic representation [ONERA-TP-790]
16 p2833 A70-33102
- Emergency auxiliary electric and/or hydraulic power for commercial and military aircraft using self contained monofueled gas turbine system
16 p2964 A70-33472
- German monograph on gas turbine combustion chambers part-load behavior improvement by load controlled change of flame tube air cross section
17 p3148 A70-35373
- High temperature radial turbine design for small gas turbine engines, discussing aerodynamic, structure and thermal analyses
18 p3301 A70-36450
- Fiber-metal matrix composites for gas turbine blades, discussing stress rupture strength, modulus of elasticity, fabrication, etc [ASME PAPER 70-GT-133]
18 p3302 A70-36827
- Transpiration cooling for high temperature gas turbines, investigating effects on aerodynamic and thermodynamic performance [ASME PAPER 70-GT-56]
18 p3303 A70-36839
- Brayton cycles in gas turbines, investigating intercooling or reheat and pressure ratio proportioning influence on efficiency and specific work [ASME PAPER 70-GT-130]
18 p3304 A70-36856
- Axial gas turbine performance prediction method improvements based on comparison with tests [ASME PAPER 70-GT-2]
18 p3304 A70-36859
- Gas turbine shrouded rotating disk system with radial outflow of air coolant, investigating fluid dynamics, pressure distribution and frictional moment [ASME PAPER 70-GT-6]
18 p3208 A70-36862
- High speed combustion chambers for gas turbine applications, using finite rate chemistry and turbulent mixing computer program for burner design [ASME PAPER 70-GT-25]
18 p3304 A70-36866
- Tailpipe effects on gas turbine diffuser performance with fully developed inlet conditions [ASME PAPER 70-GT-86]
18 p3210 A70-36881
- Gas turbines dynamics and control system requirements, discussing equipment design and reliability [ASME PAPER 70-GT-76]
18 p3305 A70-36887
- Thermal fatigue cracking of gas turbine blades in fuel combustion product flow, investigating surface composition, microhardness and structure under simulated loads
19 p3490 A70-37338
- Gas turbine propulsion systems design, performance and applications for industrial and military uses, discussing sensors for measurement and control of critical engine parameters
19 p3424 A70-37881
- Monograph on radial flow between air cooled gas turbine rotating and stationary disk near stator covering turbulent boundary layer, velocity distribution, etc
19 p3404 A70-38007
- Critical rotation rates of gas turbine rotors disk-drum designs, describing initial parameters of model in matrix form
20 p3721 A70-39782

- High temperature Ni, Co and Fe alloys for gas turbines, examining sulfidation-oxidation corrosion test methods
20 p3651 A70-39971
- Heat transfer from gas to gas turbine buckets, determining angle of attack and rotation influences by extending transfer equation
20 p3694 A70-40345
- Nozzle geometry effects on turbine gas ejector characteristics
21 p3867 A70-41765
- Single stage gas turbines rational design based on minimum diametric dimensions
21 p3867 A70-41768
- Gas turbine ball bearings, measuring effect of rolling elements shape on hydrodynamic power losses
21 p3834 A70-41776
- Three-lobe fluid film bearing configuration for gas turbine concentric rotating shafts/spool shafts/ [ASME PAPER 70-LUBS-10]
22 p4045 A70-42450
- Ni base superalloy for gas turbines, describing heat treatment for precipitation hardening
22 p4055 A70-43099
- Gas turbine design by nomograms with minimal preliminary calculations
22 p3960 A70-43368
- High temperature gas turbine blades cooling by liquid Na-K alloy [ONERA-TP-872]
22 p4125 A70-43458
- Nonsteady temperature and thermal stress distribution in gas turbine blades, using plastic model and photothermoelastic method
22 p4093 A70-43743
- Gas turbine controller design by inverse Nyquist method compared to conventional multivariable design methods
24 p4396 A70-46157
- GAS VALVES**
- Electroexplosively powered release valve for high pressure N stored in hermetically sealed container of missile, discussing design and performance tests
03 p0546 A70-14106
- Fluoric altitude insensitive thruster based on two way gas flow diversion valve developed for VTOL aircraft and missile hot gas attitude control systems [ASME PAPER 69-WA/FLCS-10]
04 p0626 A70-14843
- Breathing valve with reduced air resistances based on aerodynamic principles
06 p1000 A70-17433
- Comet tail simulation by using fast acting gas valve to produce gas cloud for interaction with plasma stream
12 p2298 A70-27190
- Thin high vacuum gate valve design for use with UV grating spectrograph
19 p3357 A70-37687
- Magnetic pressure fast opening gas puff valve for hydrogen bursts in conical theta pinch plasma source
21 p3833 A70-41472
- Gas reducers transient processes, analyzing valve equations of motion
22 p3965 A70-43357
- Single stage warm gas directed jet valve for missile attitude control, noting servovalve and auxiliary power unit control applications [SAE PAPER 700778]
24 p4295 A70-45864
- GAS VISCOSITY**
- Moving gas with thermodynamic relaxation process, discussing bulk viscosity and application to shock structure calculations
01 p0063 A70-10927
- Viscosity of nitrogen, hydrogen, Ar and He at high pressures measured by capillary flow viscometer with range extended to minus 100 C
04 p0718 A70-14697
- Steady circulation and temperature perturbations in stratified nonrotating ideal gas atmosphere with viscosity and heat conduction
04 p0681 A70-15517
- Temperature dependence of viscosity coefficient determined for hydrogen, helium, argon and nitrogen at atmospheric pressure using capillary viscometry
07 p1424 A70-19980
- Inert gases and nitrogen determined at high temperature, discussing revision of existing functions representing intermolecular energy
08 p1598 A70-21525
- Simple molecules viscosity as function of temperature and density using empirical equation
09 p1731 A70-22292
- Gas viscosity high temperature measurement method in shock tube using boundary layer equations for velocity and static temperature distributions
10 p1867 A70-24151
- Correction factor for free stream Reynolds number errors resulting from low temperature viscosity in He wind tunnels
13 p2385 A70-29985
- Viscous gas hypersonic flow past blunt nosed bodies based on Navier-Stokes equation
15 p2671 A70-31481
- Approximate formula for viscosity of binary polar gas mixtures confirmed for unlike cross sections
16 p2996 A70-33055

Argon plasma viscosity measurements at one atmosphere and 10-13,000 K, using discharge with laminar flow as plasma source
[AIAA PAPER 70-775] 17 p3139 A70-34479

Viscosity and thermal conductivity of dilute gaseous para and normal hydrogen at various temperatures
19 p3551 A70-37710

Polar gas rotational relaxation time calculation, comparing volume viscosity and energy equation definitions
19 p3473 A70-38266

Shock tube high temperature air viscosity from laminar boundary layer heat exchange data
20 p3608 A70-39633

Book on nonuniform gas theory covering viscosity, thermal conduction, diffusion, Maxwell-Boltzmann equations, density, quantum theory, transport phenomena, mixtures, electric fields, etc
20 p3673 A70-40135

Nitrogen viscosity coefficient at high pressure, describing viscosimeter operation and kinetic theory calculations
20 p3738 A70-40140

Solar photosphere negative viscosity phenomenon, examining Rossby wave on differentially rotating isothermal spherical shell of nonconducting inviscid ideal gas
22 p4109 A70-43748

Compressibility, viscosity and thermal conductivity of dense gases, examining high temperature and pressure effects
23 p4222 A70-44431

Nitrogen plasma viscosity measurements as function of velocity and axial static pressure gradient
23 p4226 A70-44439

Atmospheric pressure Ar plasma viscosity measured over heavy particle temperature range 3500-8500 K, using DC wall stabilized cylindrical arc
23 p4229 A70-44983

GAS WELDING
NT BRAZING
NT LOW TEMPERATURE BRAZING
NT ULTRASONIC SOLDERING
Flash, gas-pressure and electron-beam welding of airframe steels
[ASTM PAPER MR-69-712] 12 p2239 A70-26987

Pressure role in inert gas shielded metal arc welding, discussing voltage-pressure relation, weld head profile, metal transfer, etc
22 p4043 A70-42383

GAS-GAS INTERACTIONS
Cavitating flow in converging channels of hydraulic system, calculating energy distribution at gas-vapor phase using Borda-Carnot theorem
03 p0466 A70-13513

Helium injection Mach number effect on supersonic jet penetration into Mach 2 air stream from flat plate determined from concentration measurements
[AIAA PAPER 70-92] 06 p0975 A70-18200

Interactions between hypersonic neutral gas beam and orificed pressure gauge in spinning satellite noting dependence on angle of attack
06 p1159 A70-18290

Atmospheric gases atomic and molecular binary short range repulsive forces, determining interaction potentials from elastic scattering cross sections
07 p1345 A70-20141

Circular turbulent air jet from flat plate into deflecting stream using potential flow model, noting applicability to V-STOL aircraft technology
[AIAA PAPER 69-223] 07 p1190 A70-20406

Nonequilibrium interaction of radiative and vibrational rate processes in IR-active diatomic gas using macroscopic equations
08 p1549 A70-21574

Wave number, intensity and half width of vibrational-rotational lines pertaining to transition of carbon monoxide perturbed by argon
09 p1733 A70-23316

Kinetic theory applied to model of interaction between two gas flows colliding at sharp leading edge at different hypersonic speeds
10 p1800 A70-24139

Perfect gas mixtures thermodynamic functions at high temperatures with correction for Debye-type electrostatic interaction effects
10 p1968 A70-24707

Turbulent flow generation by interacting principal stream with transverse jets, obtaining flow domains in test chamber of two dimensional wind tunnel
10 p1870 A70-24785

Injectant stagnation temperature and molecular weight effects in jet interaction flowfield
11 p2036 A70-25989

Turbulent mixing at contact surface in driven shock wave in shock tube with bursting diaphragm for He-Ar test gas mixtures
14 p2566 A70-31030

Krook gas particle collision model for relaxation from nonequilibrium to equilibrium Boltzmann distribution in spatially uniform gases
17 p3068 A70-34697

Energy and momentum exchange between gases in elastic collisions at different temperatures and velocities
19 p3551 A70-37538

Helium injection Mach number effect on supersonic jet penetration into Mach 2 air stream from flat plate determined from concentration measurements
20 p3558 A70-39690

Nonequilibrium radiation from stagnation region of high velocity spherical gas cap traveling through air
22 p4124 A70-42758

EPR method for elementary reaction kinetics of vapor phase oxygen atoms interacting with molecular hydrogen
22 p3983 A70-43349

Three body recombination and dissociation rate coefficients of nitrogen in Ar atoms heat bath, using modified phase-space theory
23 p4221 A70-44008

CO vibrational relaxation measurements in shock tube expansion wave generated in argon heat bath
23 p4180 A70-44009

GAS-ION INTERACTIONS
F region ionized and neutral atmospheric movements interactions, discussing ion drag forces, electromagnetic drift, wind effects, etc
01 p0074 A70-10587

Atmospheric gravity waves in F region, discussing neutral gas-ionization interaction and detection by electron density profile measurements
01 p0079 A70-11216

Dissociative charge-transfer reactions of positive He ions with molecular N and O measured in drift tube-mass spectrometer
06 p1109 A70-17490

Resonant and foreign gas broadening using Schroedinger equations for collision problems
07 p1346 A70-20244

Elementary processes cross sections in charged states changes during proton-hydrogen molecule interactions
08 p1549 A70-21817

Hydromagnetic coupling between neutral and ionized atmosphere perturbations, noting role of gravity waves
13 p2397 A70-29191

Hydromagnetic fluid model of solar wind for interpreting discontinuities in plasma and magnetic field, interaction with atmosphere, heating mechanism and chemical composition
13 p2481 A70-30067

Rare gas diatomic ions reactions with molecules and rare gas atoms, measuring rate coefficients and product channels by flowing afterglow technique
15 p2776 A70-31726

Rare gas diatomic and hydride ions reactions with hydrogen, determining rate coefficients and product channels by flowing afterglow technique
15 p2776 A70-31727

Positive atomic oxygen ion reactions with carbon dioxide detected using ion cyclotron and double resonance methods
18 p3225 A70-36189

Fully ionized magnetized rotating plasma interaction with neutral gas blanket, discussing plasma decay and velocity field
19 p3481 A70-38489

Chemical reactions of ions and neutral particles in D region, discussing photochemistry of atomic oxygen and ozone and reaction rate constants
19 p3418 A70-38905

Mass spectroscopy analysis of neutral and ionic population of plasma in carbon dioxide laser gas mixture, discussing collision processes
21 p3838 A70-42006

GAS-LIQUID INTERACTIONS
Two phase flow in cylindrical channel, formulating maximum momentum flow variational principle for laminated adiabatic vapor- and gas-liquid flows
01 p0213 A70-10216

Gas bubble formation and equilibrium conditions in air supersaturated fuel stored under atmospheric pressure after injection into evacuated tank
03 p0605 A70-13394

Porous matrix flow, surface liquid layer and hot gaseous boundary layer interactions at nose tip of reentry vehicle
[AIAA PAPER 70-152] 06 p1037 A70-18028

Interaction between turbulent air flow and water surface based on Fourier analysis of finite intervals of field
11 p2042 A70-26775

Gas mass diffusivity measurements in plasma and reaction velocity constant in human and dog blood
15 p2692 A70-32311

Resistance to two phase gas-liquid flow in airways simulating human bronchial tree
24 p4303 A70-46111

GAS-METAL INTERACTIONS
Effects of solidification conditions and gas content in melt on continuously cast Al ingots as-cast structure
02 p0316 A70-12297

Hydrogen, oxygen and nitrogen effects on gas shielded arc weld porosity of Ni, comparing MIG and TIG processes
02 p0310 A70-12543

Pseudoboiling heat transfer from platinum wire to carbon dioxide during free convection
03 p0604 A70-13209

Energy accommodation coefficients for He3-W and He4-W, comparing results with classical gas-solid interaction theory
04 p0721 A70-14388

Hydrogen diffusion in pure Ti and beta Ti alloy VT15, determining diffusion coefficient for various temperatures
04 p0707 A70-15190

Polymorphic transformation effects on oxygen diffusion rate in alpha and beta phases of Ti, considering temperature effects and activation energy
04 p0707 A70-15211

Ti-hydrogen reaction at ambient temperatures, investigating factors favoring reaction and preventive measures
05 p0863 A70-16524

Quasi-equilibrium treatment of heterogeneous reactions applied to evaporation rate /desorption/ computation for volatile species formed in oxygen reactions with W, Mo and graphite
06 p1004 A70-17330

Quasi-equilibrium treatment of heterogeneous reactions applied to flash desorption data for oxygen reaction with tungsten surface, discussing species desorption dependence on adsorption temperature
06 p1004 A70-17331

Mo-nitrogen interaction, studying nitriding influence at various temperatures on Mo alloys properties
06 p1089 A70-17741

Cold molecular beam of helium impinging on LiF or Si crystals investigated for gas-surface interactions, using time of flight method
06 p1043 A70-18255

Nitrogen molecule-tungsten surface interactions, computing trajectories and accommodation coefficients for various temperatures by equations of motion
06 p1110 A70-18262

Particle, momentum and energy flux spatial distributions of molecules scattered in collisions of low energy Ar atoms with mica and Ag surfaces
06 p1111 A70-18268

Lift and drag forces measured on metal surfaces inclined to Ar ion stream above and below earth-satellite speeds in free molecular flow
06 p1111 A70-18269

Angular distributions of fast scattered particles resulting from noble gases collision with metal surfaces
06 p1112 A70-18271

Rare gas scattering from Ag surfaces calculated up to earth satellite energy values
06 p1112 A70-18275

Weld porosity in TIG welding of technical Ni in ternary mixtures of Ar with H, O and N
08 p1518 A70-21345

Gas saturation and inhomogeneity in surface layer of Ti alloys with alpha and beta stabilizers after high temperature heating
09 p1700 A70-22078

Rhenium single crystals basal plane surface properties using LEED and Auger electron spectroscopy, describing gas adsorption studies
09 p1739 A70-22526

Propellant extinction near powder-metal contact to study nonsteady combustion mechanism
09 p1742 A70-23228

Oxygen reduction reaction mechanism and catalysis, considering metal electrode surfaces and substrates, hydrogen peroxide role, adsorption, metal-oxygen bonds, etc
10 p1829 A70-24452

Al and B particles combustion in methane-oxygen system, considering reaction zone models, energy release rate, particle kinetics, instabilities, etc
11 p2149 A70-26284

Oxygen adsorption on W(110) surface determined for coverage as function of exposure by Auger electron spectroscopy
12 p2180 A70-27253

High temperature gaseous molecular beams impingement on Cu surfaces at cryogenic temperatures measured for condensation rates
12 p2271 A70-27265

Oxygen interaction on rhenium filament, considering sticking probability as function of temperature
12 p2181 A70-27677

Nitrous oxide chemisorption by rhenium filament at low pressures at various temperatures, determining sticking probability
12 p2181 A70-27678

CO adsorption on smooth polycrystalline platinum and rhodium electrodes at various potentials
12 p2182 A70-27761

Hydrogen solubility in electrically exploded metals
15 p2762 A70-32747

Electron energy losses at interface of helium inclusions in aluminum irradiated by radioactive lithium
15 p2785 A70-32764

Scattering cross sections for monoenergetic Ar beams on epitaxial Ag films
16 p2956 A70-34013

Hydrogen embrittlement of Ti and Ti alloys under plastic deformation and critical hydrogen concentration 17 p3117 A70-34397

Ti alloys thermomdiffusion impregnation with rarefied nitrogen and oxygen plasma, determining optimal gas pressure and temperature conditions and magnetic field frequency effects 17 p3101 A70-35391

Relaxation peaks associated with interaction clusters of Zr and N dissolved in Nb 18 p3274 A70-36056

Depth measurement of gas-saturated surface layer in Ti alloys, using microhardness method 18 p3277 A70-36472

Alloying elements effect on diffusion coefficient of hydrogen in low-alloyed alpha titanium 19 p3449 A70-37274

Clean Ru/0001/ and Rh/111/ surface properties by LEED and Auger electron spectroscopy, discussing gas adsorption 19 p3483 A70-37546

Monatomic inert gas molecules interaction with continuous elastic solid of alkaline and nonalkaline metals, calculating energy exchange 19 p3373 A70-37816

Niobium yield stress at room temperature for various nitrogen and oxygen concentrations 19 p3454 A70-38814

Particulate matter interaction with ionized gas in external magnetic field and nonequilibrium state, examining free electron density 20 p3677 A70-39324

Interactions between moving alkali-metal seeded dense plasma and metallic thermionically emitting electrode with surface properties influenced by seed particle absorption 20 p3681 A70-40007

Clean iron /011/ surfaces, determining sulfur, oxygen and hydrogen sulfide films effects on adhesion behavior 21 p3831 A70-40748

Thermodynamic equilibrium analysis of metal oxidation and thermal dissociation of oxides in vacuum, noting decreased affinity by evaporation 24 p4361 A70-45835

Oxygen and nitrogen adsorption on thin tantalum films, measuring pressure, electrical resistivity and temperature 24 p3463 A70-46219

Diffusing element deposition on metal surface during saturation from gas phase based on calculation of equilibrium composition of reaction mixture 24 p4364 A70-46333

GAS-SOLID INTERFACES

Equilibrium existing at gaseous-condensed phases interface inferred as mechanism for dissociative sublimation of ammonium perchlorate 05 p0894 A70-17079

Gas phase reactions near solid-gas interface of deflagrating double base propellant causing abrupt changes in burning rate-pressure curve [AIAA PAPER 70-124] 06 p1179 A70-18046

Velocity distributions of incident and reflected Ar beams, determining partial energy accommodation coefficients for reflection from copper and carbon dioxide deposited surfaces 06 p1111 A70-18264

Gas stream-elastic solid surface scattering characteristics, calculating trajectories, particle flux angular distributions, velocities, transfer coefficients, etc 06 p1111 A70-18265

Momentum transfer from neutral nitrogen molecules to solid surfaces measured for various incident beam molecule energies 06 p1112 A70-18272

Nonlinear Knudsen layer gas flow using BGK model for Boltzmann equation 06 p1048 A70-18322

Pressure effects in predicting ablation velocities for gas-solid systems, assuming reactions and gaseous products reversible adsorption on solid surfaces 07 p1422 A70-19373

Low and moderate energy gas molecule-solid surface interactions using molecular beams 07 p1328 A70-20116

Molecular beam interactions with solid crystalline surface with fcc lattice elementary cell, investigating intensity distribution of scattered particles 07 p1342 A70-20119

Reflected molecular beam intensity distribution interpreted in terms of disturbances in boundary layer between gas and solid 07 p1343 A70-20122

Gas molecules scattering by solid surface for monoenergetic and Maxwellian beams, discussing model with different values for magnitude and velocity direction 07 p1343 A70-20124

Atomic gas particles interactions with self and solid surfaces based on rarefied gas dynamics and classical mechanics 08 p1547 A70-21077

Molecular beams and particle adsorbing surfaces interactions in state of relaxation, determining reflection parameters as function of gas characteristics 08 p1547 A70-21078

Molecular beams and particle adsorbing surfaces interaction with allowance for deposited atoms relaxation, determining reflected flux 08 p1547 A70-21079

Molecular beam and pure surface interactions on background of external forces field 08 p1547 A70-21080

Aerodynamic characteristics of nonconvex bodies in free molecular flow of monatomic gas 08 p1547 A70-21081

Aerodynamic coefficients of nonconvex bodies in free molecular flow of monatomic gases based on delta representation of flow velocity distribution function 08 p1432 A70-21084

Free radicals role in high temperature surface reactions of solid metal oxide particles interacting with unburned flame gases 09 p1629 A70-22320

Monograph on ionosphere-satellite interactions, discussing ionosphere layers, plasma sheaths and wakes, electromagnetic wave propagation, spacecraft antennas, etc 10 p1944 A70-24900

Heat transfer from gas to gas turbine buckets, determining angle of attack and rotation influences by extending transfer equation 10 p1930 A70-25140

Gas-filled composites under impact loading, studying thermal damping due to heat transfer between compressed gas and solid structure 11 p2140 A70-26480

Solid-gas phase equilibria of binary systems related to cryogenics 12 p2329 A70-27023

Neutral molecule-solid surface interactions mass spectrometric techniques for measuring molecular flux and mean thermal energy after interaction 12 p2181 A70-27257

Graphite-carbon dioxide interaction at high temperatures in presence of solid phase diffusion from bulk to reacting surface 13 p2520 A70-28581

Heat exchange measurements between solid body and high enthalpy gas flow at stagnation point using electric arc heater 15 p2826 A70-32102

Gas-particle efflux from nozzle at critical velocities, noting particle size and concentration effects on inlet pressure 15 p2721 A70-32136

Gas-wall heat losses reduced and heated gas pressurization systems performance improved by ullage mixing by gas flow from pressurant injectors [AIAA PAPER 70-681] 16 p2962 A70-33581

Dusty gas dynamics, examining shock wave structure, boundary layers stability, flow equations, acoustic damping, velocity and density perturbations, etc 17 p3068 A70-34671

Light gas atoms adsorption on solid surfaces, calculating wave function, energy, mobility, sticking coefficient, etc 18 p3225 A70-36186

Plane wall surface sublimation under radiation from shock wave heated gas 18 p3348 A70-36721

Heat transfer from gas to gas turbine buckets, determining angle of attack and rotation influences by extending transfer equation 20 p3694 A70-40345

Piston problem numerical solution by Boltzmann collision integral, considering shock waves and thermal disturbances evolution at gas-solid interfaces 21 p3808 A70-41378

Phase velocity and attenuation of shear waves in gases from sampled-CW ultrasonic crystal resonator reflection measurement 21 p3827 A70-41457

Gases interaction with ablator and components during thermal conductivity, measuring nitrogen, helium, carbon dioxide and water sorption 21 p3951 A70-41873

Heat transfer from thin plate in compressible gas flow, considering interface temperature as nonanalytic function 21 p3953 A70-42086

Radiative energy transfer during interaction between blunt body and hypersonic gas flow, noting effect on flow temperature, shock wave separation, etc 23 p4136 A70-45020

Contact region structure with viscosity, conduction and radiative transfer effects applied to plane shock wave reflection from heat conducting wall 24 p4326 A70-46001

GASEOUS CAVITATION

U CAVITATION FLOW

U GAS FLOW

GASEOUS DIFFUSION

Metal surface microscopic defects detection and display using diffused radioactive Kr-85 gaseous penetrant for anodized flaws, bearing porosity and turbine blade cracks 01 p0096 A70-10006

Human pulmonary gas mixing between large airways and alveolar spaces, using argon bolus inhalation 01 p0024 A70-10976

Structure of hydrogen-oxygen diffusion flame in equilibrium using iterative solution 02 p0352 A70-12796

Diffusivities of argon, krypton and xenon determined in olive oil by curve-fitting analysis of sorption curves 03 p0429 A70-14159

Gas diffusion coefficients for He-N and nitrogen-carbon dioxide systems in diffusion cell utilizing porous stainless steel barrier 04 p0780 A70-14710

Hydrogen diffusion in pure Ti and beta Ti alloy VT15, determining diffusion coefficient for various temperatures 04 p0707 A70-15190

Polymorphic transformation effects on oxygen diffusion rate in alpha and beta phases of Ti, considering temperature effects and activation energy 04 p0707 A70-15211

Initial disturbances propagation in gas mixtures by asymptotic analysis, observing diffusely and viscously damped modes 05 p0833 A70-16404

Pulmonary CO diffusing capacity in young men during muscular exercise 06 p0993 A70-17432

Species concentration, jet structure and diatomic nitrogen rotational temperature measured for diffusive separation of nitrogen-helium mixture free jets, using electron beam 06 p1043 A70-18253

Turbulent heat and mass diffusion in catalytic reactors for hydrazine decomposition, developing computer program to calculate temperature and reactant concentration distributions [AIAA PAPER 69-421] 07 p1365 A70-19706

Hydrogen supply rate by solar wind found comparable to hydrogen losses from earth by diffusion into space 08 p1487 A70-20637

Hydrogen penetrability in heat resistant steels subjected to high temperature creep, observing activation energy decrease with increased stress 08 p1515 A70-20923

Austenitic Fe-Cr-Ni-Ti alloys at high temperature to determine activation energy for nitrogen diffusion, noting oxygen role 08 p1522 A70-21707

Oxygen diffusion time into nitrogen in dichotomously branched human lung model calculated by finite difference technique, discussing alveolar plateau 10 p1809 A70-24003

Teflon-bonded gas diffusion electrode flooded agglomerate model, determining porosity, surface area, IR drop, etc 10 p1829 A70-24455

Oxygen diffusion in presence of hemoglobin taking into account chemical kinetics, showing approximate and computer solutions 10 p1819 A70-24772

Air pollution measured from high altitude balloons and satellites by remote sensing of diffused atmospheric gases, using solar illumination 12 p2221 A70-26950

Oxygen and hydrogen diffusion coefficients in aqueous potassium hydroxide electrolyte solutions at various temperatures and concentrations 12 p2181 A70-27575

Oxygen diffusion facilitation in vivo and nonsteady state conditions under physiological circumstances, emphasizing hemoglobin in red cells and myoglobin in muscle 12 p2171 A70-28024

Self diffusion coefficient for gaseous ammonia at specific temperature range, applying polar gases theory 13 p2453 A70-29800

Soviet monograph on gas laws in aviation medicine for reduced oxygen pressure pathology, discussing kinetic theory, temperature effects, solubility, diffusion, etc 15 p2682 A70-31925

Gas mass diffusivity measurements in plasma and reaction velocity constant in human and dog blood 15 p2692 A70-32311

Internal friction in hydrogenated Ti-Mn alloys, observing relaxation peak formation under stress induced hydrogen diffusion in beta phase 16 p2930 A70-33082

Flow and diffusion phenomena in rarefied gas mixtures associated with separation nozzle process, using molecular pressure probe and mass spectrometer 16 p2893 A70-33699

- Intrapulmonary distribution of gases inhaled during positive and transverse accelerations
17 p3037 A70-35130
- Lung diffusing capacity for CO in Caucasians native to 3100 m noting membrane diffusing capacity, lung capillary volume and age effects
17 p3031 A70-35427
- Thermodynamic effects and transport phenomena in discontinuous system of gas filled containers connected by membrane, deriving entropy production and diffusion flux in membrane
17 p3197 A70-35531
- Time and altitude dependences between 340-1000 km of delta parameter for height scale ratio of neutral and electron-ion gases, discussing diffusion coefficient
18 p3254 A70-37030
- Binary Nb vapor systems mutual diffusion coefficients concentration and temperature dependences, discussing interatomic bonds and melting point of alloys
19 p3454 A70-38715
- Turbulent jet system with previously unmixed chemically active gases, calculating heat and mass transfers during diffusion combustion
20 p3737 A70-39813
- Book on nonuniform gas theory covering viscosity, thermal conduction, diffusion, Maxwell-Boltzmann equations, density, quantum theory, transport phenomena, mixtures, electric fields, etc
20 p3673 A70-40135
- Premixed laminar flames of hydrogen, oxygen and nitrogen burned on Meker burner, investigating diffusional effects on gas composition changes
20 p3739 A70-40469
- Oxygen diffusion coefficient of alpha-Ti from oxidation of saturated and unsaturated beta phase in 932-1142 C range
22 p4053 A70-42731
- Interdiffusion coefficients for hydrogen-carbon dioxide and oxygen-carbon dioxide systems at low temperatures
22 p4076 A70-43393
- Carbon dioxide molecular vibration excitation by Q switched carbon dioxide laser, obtaining accommodation and diffusion coefficients by relaxation measurements
24 p4351 A70-45369
- GASEOUS FISSION REACTORS**
Engine weight estimation for showing effect on thrust, specific impulse and uranium loss rate for open cycle gas fueled nuclear rocket engine
[ALAA PAPER 70-690] 16 p2949 A70-33553
- Gas-core nuclear rocket engine simulation by induction coupled plasma torch, determining gas flow patterns
[ALAA PAPER 70-691] 16 p2950 A70-33555
- Gas core nuclear rocket engine light and heavy species centrifugal separation by MHD-driven rotating flow, discussing fluid dynamic simulation results
20 p3671 A70-40256
- GASEOUS ROCKET PROPELLANTS**
Book on turbulent diffusive flames in combustion of gaseous fuels covering mass, heat, flame exchange and stabilization processes, etc
01 p0219 A70-11377
- Long term life test and vacuum tests of high temperature resistors using ammonia and hydrogen propellants
[ALAA PAPER 70-1136] 20 p3567 A70-40212
- Nuclear light bulb and coaxial flow gaseous core nuclear rocket reactors based on energy transfer via thermal radiation
22 p4070 A70-43182
- GASES**
NT AIR
NT ARGON
NT ARGON ISOTOPES
NT CARBON DIOXIDE
NT CARBON MONOXIDE
NT COLD GAS
NT COSMIC GASES

NT XENON 133
- Steady state thermal defocusing of carbon dioxide laser radiation in gases as function of beam power, gas absorption coefficient and pathlength
06 p1079 A70-17190
- Light inductions and echo intensities in liquids and gases, investigating thermal vibrations, translational Brownian motion, particle collisions and laser diffusion effects
06 p1082 A70-17809
- Thermal conductivity for organic compound gases at atmospheric pressure
08 p1597 A70-21026
- Gaseous media absorption coefficient and refractive index in field of two nonmonochromatic radiation streams quasi-resonant with neighboring atoms and molecules transitions
19 p3448 A70-38740
- GASOLINE**
Acute gasoline poisoning toxicology and prophylaxis, manner of ingestion and effects on organs and systems
08 p1451 A70-20976
- Commercial aviation gasoline inspection data tabulated and compared for 1969 and 1964
[SAE PAPER 700228] 11 p2099 A70-25897
- GASTROINTESTINAL SYSTEM**
NT INTESTINES
NT RECTUM
NT STOMACH
- Stainless steel micropipettes implantation in rat amygdala to study role in gastric secretion
02 p0234 A70-11729
- Starvation effect on intestinal amino acid absorption of rats, noting protein synthesis reduction
02 p0234 A70-11731
- Positive effect of shielding and cystamin administration on tonic and evacuator functions of rats gastrointestinal tract after gamma irradiation
05 p0804 A70-17122
- Radioactive isotopes removal from respiratory tract, lungs and gastrointestinal tract by ion dilution and antagonism, blood transfusion and hemodialysis, etc
06 p0994 A70-17666
- Low ambient temperature exposure effect on hamster intestinal absorption capacity, using glucose test compound
19 p3360 A70-37772
- Cardiac rhythm, respiration and rhythmical processes of alimentary tract, using digital data device
19 p3370 A70-38214
- GATES [CIRCUITS]**
NT THRESHOLD GATES
- Picosecond on-off light gate based on Kerr cell design, using optical pulses to induce birefringence in liquids
01 p0111 A70-10571
- Burst noise in forward biased silicon diodes and transistors, discussing measurements on gate controlled devices
03 p0458 A70-14029
- Preamplifier-discriminator-gate generator in printed circuit for use with photomultipliers, noting pulse sensitivity and cost
09 p1679 A70-22997
- Hysteresis in MOS transistors attributed to trapped charge carriers on oxide near silicon oxide interface
14 p2555 A70-30338
- Binary division by logic gates cellular arrays, noting accuracy and operating speed
14 p2556 A70-30517
- Algebraic computation of diagnostic tests for combinational digital circuits single gate failure detection and location
16 p2868 A70-33455
- Interference free high speed monolithic digital integrated gate, determining current swing, lead inductances and switching times
17 p3048 A70-34587
- DC transistorized Nor logic gates design based on graphic analytic method permitting influence of circuit parameters variations for reliability improvement
21 p3793 A70-40765
- Specification sheets for fluidics clarified by demonstrating step-by-step solutions for typical problems involving flip-flop and OR/NOR gate
24 p4293 A70-45431
- GATES [OPENINGS]**
Night vision systems with integrated pulse gated viewing and laser ranging, analyzing transmitter and viewer
12 p2236 A70-27902
- Non Q switched Nd laser light intensity correlation function measurement, using optical gate for producing second harmonic light
13 p2430 A70-29706
- GAUSS EQUATION**
Stationary Gaussian stochastic processes sample functions properties and local times
02 p0324 A70-12504
- Gaussian approximation of parameters of arbitrarily oriented magnetic dipole representing geomagnetic field
07 p1266 A70-19441
- Gaussian approximation of parameters of arbitrarily oriented magnetic dipole representing geomagnetic field
18 p3249 A70-36915
- GAUSS FUNCTION**
U GAUSS EQUATION
- GAUSS-MARKOV THEOREM**
Probability of given configuration and statistical distribution of peaks between mean crossings of broadband locally stationary and Gaussian processes
[ONERA-TP-806] 10 p1805 A70-24546
- GAUSSIAN DISTRIBUTIONS**
U NORMAL DENSITY FUNCTIONS
- GAUSSIAN NOISE**
U RANDOM NOISE
- GAUSSMETERS**
U MAGNETOMETERS
- GCR [REACTORS]**
U GAS COOLED REACTORS
- GEAR TEETH**
Prototype inspection equipment for automatic detection of fatigue damage in helicopter transmission gears teeth by magnetic perturbation method
01 p0097 A70-10011
- Dynamic loads calculation on teeth of cylindrical straight tooth gears under engaged and disengaged conditions, performing strength analysis
01 p0105 A70-11421
- Overcut phenomenon in early stage of cutting developed as theory for tip interference in internal gears
05 p0854 A70-15885
- Gear ratios series determination for planetary reduction gear having positive and negative difference between number of gear teeth
05 p0856 A70-17007
- Discrete mechanical models of single speed gearings in torsional vibrations without teeth deformation and damping resistance
16 p2995 A70-34288
- GEARS**
Vacuum evaluation of lubricants and techniques applicable to miniature ball bearings and instrument gearing for space systems
[ASME PAPER 69-LUB-30] 01 p0100 A70-10379
- Gear materials evaluation program for space environment application with unlubricated or solid film lubricated operation mode
[ASLE PREPRINT 69-LC-6] 02 p0309 A70-12539
- Structural design of boron/epoxy front housing for T-56 turboprop reduction gear case achieving reduced weight and increased stiffness
[SAE PAPER 690666] 05 p0853 A70-15837
- Self stopping in involute gear mechanisms with external and internal gearing
07 p1290 A70-18818
- Spiral gears bearing disks contact fatigue endurance process, deriving critical points cyclic stability from stress distribution considerations
07 p1291 A70-18819
- Gear materials evaluation program for space environment application with unlubricated or solid film lubricated operation mode
10 p1893 A70-23837
- Corrosive wear due to oxygen and/or moisture in air indicated as major failure mode in lubricated gears
10 p1895 A70-24852
- Vacuum evaluation of lubricants and techniques applicable to miniature ball bearings and instrument ball bearings and instrument gearing for space systems
13 p2419 A70-29120
- Gear pumps for hydraulic systems, discussing costs, types and applications
14 p2590 A70-30302

Swinging gear drive, breather cartridge and hypocyclid timer mechanisms for reliable aerospace applications

16 p2921 A70-34104

Discrete mechanical models of single speed gearings in torsional vibrations without teeth deformation and damping resistance

16 p2995 A70-34288

Mechanical models of single speed gearings for torsional vibrations, taking into account nodes of first free vibration mode

16 p2995 A70-34289

GEIGER COUNTERS

Density spectrum exponent of penetrating muon component of extensive air showers determined for hodoscopic assembly of Geiger-Muller counters with lead absorber

03 p0556 A70-13043

Cosmos-261 satellite-borne scintillation electron proton spectrometers and lead shielded Geiger counter, measuring electron and proton energy spectra, pitch distributions, etc

08 p1501 A70-21799

Charged particle albedo latitude dependence estimated from balloon-borne Geiger telescopes

09 p1746 A70-23481

ESRO 1 satellite and ground observations of energetic auroral electrons angular distribution during solar event, using Geiger counters

19 p3412 A70-37519

Soft X ray astronomical instrumentation for space experiments, discussing Geiger tubes, gas counters, modulation collimators, telescopes, etc

23 p4196 A70-44416

GEIGER-MUELLER TUBES

U GEIGER COUNTERS

GELATINS

Dichromated gelatin holographic films preparation, sensitization, exposure and development, giving diffraction efficiencies and reconstruction SNR

04 p0691 A70-15031

Calcium phosphate crystals precipitation from nutrient gel to determine role of gelatinous ground substance in calcification

10 p1832 A70-25075

GELLED PROPELLANTS

NT GELLED ROCKET PROPELLANTS

GELLED ROCKET PROPELLANTS

Gelled space-storable oxygen difluoride and diborane analysis, including particle preparation, yield stresses, viscosities and storability

16 p2962 A70-33607

GELS

NT DOUBLE BASE ROCKET PROPELLANTS

Calcium phosphate crystals precipitation from nutrient gel to determine role of gelatinous ground substance in calcification

10 p1832 A70-25075

Gelled and emulsified fuels for jet transport aircraft, testing rheological and physical properties regarding fire hazard reduction in crashes

12 p2160 A70-27430

Dispersion/peak broadening/ in gel chromatography measured with nonporous and porous column packings, suggesting diffusion controlled separation with linear permeation isotherm

12 p2181 A70-27474

Gel permeation chromatography peak broadening, discussing liquid dispersion factors and column efficiency

24 p4310 A70-46349

GEMINI FLIGHTS

NT GEMINI 4 FLIGHT

NT GEMINI 6 FLIGHT

NT GEMINI 11 FLIGHT

NT GEMINI 12 FLIGHT

Space suit meteoroid protection for extravehicular activity, discussing Gemini and lunar surface EVA suits and bumper concept

04 p0645 A70-15402

Cardiac cycle and phases shortening observations from analyzing electro- and phonocardiographic data recorded during Gemini flights

13 p2359 A70-29437

GEMINI PROJECT

Extravehicular activity maneuvering devices, describing design and performance of Gemini project unit

21 p3929 A70-41075

GEMINI SPACECRAFT

Gemini spacecraft shielding configuration and radiation detectors, describing cabin radiation distributions

06 p0990 A70-17269

Meteoroid impacts on Gemini spacecraft windows, calculating flux-mass relation

19 p3520 A70-38376

Space shuttle electronics requirements, considering systems in Mercury and Gemini spacecraft and Apollo lunar and command service modules

23 p4259 A70-44612

GEMINI 4 FLIGHT

Accumulated dose and dose rate during Gemini 4 and 6 flights measured as function of elapsed time and position within spacecraft

06 p0990 A70-17270

GEMINI 6 FLIGHT

Accumulated dose and dose rate during Gemini 4 and 6 flights measured as function of elapsed time and position within spacecraft

06 p0990 A70-17270

GEMINI 11 FLIGHT

Supergiant alpha Car UV spectrophotometry from Gemini 11, comparing with model atmosphere

17 p3161 A70-34888

GEMINI 12 FLIGHT

Gemini 12 photographs examined for urban and transportation data content

12 p2228 A70-26909

GEMINID METEORIODS

Geminid and Quadrantid meteor shower densities observed on wave-channel-antenna radar

14 p2635 A70-30305

GENERAL AVIATION AIRCRAFT

NT DH 125 AIRCRAFT

Unstable spiral precursor to jet upset /Mach tucks/ in executive jet transports

06 p0987 A70-18248

STOL touring aircraft propeller design and aerodynamics, discussing takeoff runs, landing runs, high lift, downwash, ground effects, etc

08 p1435 A70-20628

General aviation urban airport capacity problem, suggesting diversion of training portion of peak-hour traffic

08 p1481 A70-21306

Light aircraft-airliner collision avoidance, discussing Time-Frequency Collision Avoidance System cost restriction, Pilot Warning Instruments, etc

11 p2079 A70-25872

Operating characteristics and performance of business aircraft jet engines compared with piston engine handling

11 p2102 A70-25880

CRT displays for business aircraft emphasizing EADI/electronic attitude director indicator/

11 p2079 A70-25882

Low cost lightweight flight control systems for business aircraft providing equivalent performance to larger equipment

11 p2079 A70-25886

Adhesive bonding for structural efficiency, lower weight, reduced production costs and improved appearance in general aviation industry

11 p2134 A70-25893

Air conditioning systems design for turboprop commuter and business aircraft

11 p1980 A70-25895

Business aircraft fuel management system using capacitance and mass flow rate measurements, displaying fuel quantity and flow rate and flight time remaining

11 p1983 A70-25896

FAA recommendations on general aviation airports and heliport design standards, explaining standards establishment or modification procedures

11 p2031 A70-25900

General aviation aircraft styling and interior developments, describing seat construction role in personalized aircraft production costs

11 p1980 A70-25901

General aviation aircraft fixed-base engineering flight simulator involving use of analog computer, discussing equations of motion and aircraft cockpit

11 p2031 A70-25904

Cessna CITATION aircraft design, considering engineering, marketing and corporate cooperation

11 p1981 A70-25910

Light general aviation aircraft production cost reduction, considering adhesive bonding, production certification, etc

11 p1981 A70-25911

General aviation requirements for national aviation system of 1970s including use of airspace and airports under all conditions

12 p2335 A70-27446

Optical IR system as low cost pilot warning indicator providing audible and visual collision warnings to general aviation aircraft

12 p2234 A70-27647

Twin turboprop executive aircraft /Falcon/ development, describing modifications and antinoise features

12 p2162 A70-28026

Falcon 10 economical executive aircraft development involving dimensions of cabin, powerplant and range

12 p2162 A70-28027

General aviation demands on Pilot Warning Indicator systems for collision avoidance

14 p2615 A70-31176

General aviation growth forecast during next decade, considering economic importance, air traffic control, collision avoidance, etc

16 p3003 A70-33469

Antenna design for single engine light general aviation aircraft weather radar, reviewing attenuation and terrain return problems

16 p2864 A70-33471

Corporate aircraft accident statistics, causes and prevention, noting pilot errors, mechanical failures, etc

16 p2842 A70-33814

Corporate aircraft operations in Europe, discussing meteorological conditions, flight planning, airport arrival and departure procedures and language differences

16 p2842 A70-33820

Reliability maintenance problems in corporate aircraft operations, discussing equipment calibration, aircraft systems analysis and repair facility selection

16 p2921 A70-33821

Aircraft utilization rate vs invested money as factor determining financial justification of corporate aircraft operations, discussing maintenance engineering

16 p2921 A70-33822

Fatal general aviation accidents examined by pathologists, determining pilot incapacity, accident sequence, aircraft design modification and crash protection performance

17 p3033 A70-35567

General aviation aircraft accident investigation toxicological findings, describing methods of examination for drugs and toxic agents

17 p3033 A70-35569

General aviation aircraft accident post mortem findings, emphasizing standardization of format and terminology

17 p3040 A70-35579

Corporate-executive market for helicopters related to fixed wing business air transportation problems

18 p3350 A70-36814

MBB Bo-209 Monsun travel, commuter and acrobatics aircraft, discussing configurations, specifications, structure and handling characteristics

19 p3355 A70-37388

Air conditioning in piston-powered light general aviation aircraft, comparing vapor cycle and cryogenic systems

19 p3359 A70-38500

ATC and general aviation growth, considering airport capacity, radars, navigation, National Airspace System, etc

19 p3467 A70-38631

Yak-40 business jet design and flight characteristics

21 p3755 A70-42174

SN 600 Corvette business jet design and performance

21 p3755 A70-42175

General aviation traffic control, discussing limitations of present system and improvements of position information and area navigation approach procedures

22 p4066 A70-42385

Pilot heart rate during in-flight simulated ILS approaches in general aviation aircraft

24 p4306 A70-45333

General aviation aircraft influences on federal airways systems, considering area and Omega navigation examples

24 p4373 A70-45929

General aviation expansion and competitive position dependence on safety and utility improvements and simultaneous cost reductions

24 p4291 A70-45953

General dynamics aircraft

NT CANADIAN AIRCRAFT

NT CL-84 AIRCRAFT

NT F-106 AIRCRAFT

NT F-111 AIRCRAFT

GENERAL DYNAMICS MILITARY AIRCRAFT

U MILITARY AIRCRAFT

GENERALIZATION (PSYCHOLOGY)

Attention and cue-producing responses in response-mediated stimulus generalization

09 p1617 A70-22342

GENETIC CODE

Biophysics research, discussing supramolecular biological structures, synthesis of proteins, nucleic acids and genetic codes, biological membranes, coding in nervous system, etc

03 p0420 A70-13491

Nucleated organisms divergence from bacteria compared to nucleated organisms divergence into separate kingdoms by analysis of genetic changes in cytochrome c and transfer RNA

16 p2846 A70-32990

GENETICS

NT GENETIC CODE

NT MUTATIONS

Space environment and radiation on Biosatellite 2 enhancing radiation effects in developing flour beetle *Tribolium confusum*

02 p0238 A70-12517

Soviet book on radiation genetics problems covering radiation damage of chromosomes, sexual and somatic cells, postradiation cell recovery, etc

08 p1445 A70-20761

Genetic theory application to selection of partial descriptions for algorithms group handling

08 p1466 A70-20875

Partial nucleotide sequences for fragments isolated from ribonuclease digests of tobacco mosaic virus RNA, suggesting genetic duplication possibility

13 p2363 A70-29798

Space travel genetic effects, discussing radiation, weightlessness, vibration and acceleration
21 p3761 A70-40842

Lunar rocks petrography, mineralogy and petrogenesis from Apollo 11 samples
21 p3902 A70-41554

Mammalian tissues metabolic and genetic alteration during weightlessness, relating rats liver regeneration delay to centrifuging intensity following hepatectomy
23 p4146 A70-44617

Inherited hypertension genetic and autonomic factors, discussing rats crossbreeding for genetic contribution ratio in males vs females, age effects, etc
24 p4299 A70-45806

GENTOURINARY SYSTEM
NT BLADDER
NT OVARIES
NT TESTES

GEOASTROPHYSICS
U ASTROPHYSICS
U GEOPHYSICS

GEOCENTRIC COORDINATES
Geocentric coordinate system definition by earth mass center and rotation axis and Greenwich meridian plane
01 p0082 A70-11456

Ground station geocentric coordinates from intersection of spatial directions in Baker- Nunn network determined by satellites
02 p0254 A70-11758

Earth poles motion influence on latitude, longitude, azimuth and geocentric rectangular coordinates of points determinations on earth surface
03 p0473 A70-13187

Great circle vector formula in space triangulation, discussing topocentric and geocentric position of satellite and tracking stations and absolute distance determination
03 p0445 A70-13193

North American datum related to geocentric satellite reference system, using Lambeck method for geodetic parameters
05 p0841 A70-16644

Astronomical and physical geodesy, discussing geometrical methods involving triangulation and trilateration and geocentric coordinates method in navigation
07 p1265 A70-19370

Three vector coplanarity equations for space geodetic triangulation grid, discussing role of satellite photographic observation
09 p1667 A70-22488

Equations for converting satellite geodetic latitude and altitude into geocentric Cartesian system
20 p3669 A70-39691

Electron densities between inner edge plasma sheet and plasmasphere as function of geocentric radial distance from OGO-3 electrostatic measurements
23 p4236 A70-43834

GEOCHEMISTRY
NT BIOGEOCHEMISTRY
Hydrocarbon content of coorongite derived from algae analyzed by IR spectrometry, gas chromatography and mass spectrometry, discussing alkanes and alkenes occurrence
01 p0041 A70-10037

Hydrocarbon contents of two sediments from Scottish Carboniferous Formation, examining isoprenoid alkanes abiogenesis
01 p0041 A70-10038

Steranes and triterpanes identification from Green River shale by capillary gas liquid chromatography and mass spectrometry
02 p0252 A70-12514

Hydrocarbons and fatty acids distribution in living organisms, fossils, sediments and crude oils, discussing slow thermal maturation role and geological applications
02 p0252 A70-12520

Gas chromatographic-mass spectrometric identification of aliphatic hydroxy acids in plants and sediments
02 p0252 A70-12521

Amino acid stability in pyrolyzed Pleistocene Mercenaria shells, comparing decomposition rates for aqueous solution
03 p0472 A70-13150

Electron microprobe determinations of Si concentrations in metal of iron meteorites, showing weak evidence for Si presence in earth core
05 p0921 A70-17094

Earth central region chemical exploration using antineutrino flux produced by natural radioactive isotopes
09 p1761 A70-22985

Phenolic aldehydes generated from lignin in fossil woods and carbonaceous sediments by oxidative degradation
13 p2361 A70-28911

Geochemistry of venus volatile elements identifying cloud forming species as Hg compounds
14 p2650 A70-31217

Mobile geochemical laboratory for in situ radiation measurement and elemental analyses in lunar exploration
15 p2717 A70-31801

Carbonaceous complex use as indicators of geothermal history and high temperature organic geochemistry
17 p3042 A70-35331

Sulphur in earth core composition, considering volatile element abundances and iron melt in thermal models
18 p3256 A70-37078

Apollo 11 lunar rock and soil elemental abundances, discussing composition, volatile element depletion, rare earths, basalt and geochemical processes
21 p3909 A70-41593

GEOCHRONOLOGY
Age dating of earth and universe emphasizing methods based on radioactivity, discussing stellar evolution, galactic age and assessment of cosmic time
08 p1568 A70-20633

Australite fall age determination from in situ radioactive carbon and standard geological dating methods
09 p1750 A70-22055

GEOCORONAL EMISSIONS
D-2 experiments measuring atomic oxygen emission from terrestrial atmosphere and polarization rate and emission intensity from geocoronal hydrogen
03 p0559 A70-13828

Solar Lyman-alpha radiation observed by OGO 4 spacecraft showing short term fluctuations superposed with monthly variation
04 p0741 A70-15128

Geocoronal glow as resonant scattering of solar Lyman-alpha-radiation by H atoms in upper atmosphere
07 p1270 A70-20032

Hydrogen UV geocorona photoionizing effect on nighttime E region electron density in low and midlatitudes, comparing with ionosonde data
14 p2581 A70-31270

Lyman alpha geocoronal emission rate as function of altitude at midnight during solar minimum, solving radiative transfer equations
20 p3619 A70-39329

Lunar based vs orbiting astronomical observatories, discussing limitations imposed by geocorona
22 p4108 A70-43630

Exospheric neutral hydrogen temperature diurnal variation from satellite resonance filter data, suggesting Lyman alpha source external to geocorona
23 p4186 A70-43852

GEODESY
Oblate earth gravitational field effect on ballistic missile trajectories, including body range determination and quadratures expressed by elementary functions
01 p0178 A70-10423

Core convection consequences with regard to earth figure and continental drift, indicating no changes in magnitude of magnetization
01 p0076 A70-10899

Gyrotheodolites application to azimuth determination, discussing use for directional control, photogrammetry in geodetic measurements, etc
02 p0295 A70-11800

Geodetic treatment of satellite observation - Conference, Tashkent, Uzbek SSR, November 1968
03 p0444 A70-13182

Earth satellite tracking data reduction for determining geodetic ground nets, examining errors in triangulation procedures
03 p0445 A70-13184

Satellite observations for determining earth shape and gravitational field zonal harmonics, using dynamic methods
03 p0473 A70-13188

Earth external gravitational potential expressed as infinite series of spherical harmonics, using transformation property on coefficients
03 p0478 A70-14178

Precision and accuracy evaluation of convergence angles for measuring vertical and horizontal components of space position applicable to geodesy and flight measurement
04 p0676 A70-14634

De Sitter hydrostatic equations solution possible with help of boundary condition from external potential theory with/without assumed equilibrium in earth interior
04 p0678 A70-15051

Variational methods in semigeodesic projections of analytic surfaces on plane surface, determining projections impossible by classical cartography
05 p0839 A70-16368

Earth figure parameters from satellite orbit dynamics, including potential on geoidal surface and scale factor for lengths
05 p0840 A70-16638

Geodetic vertical and geoidal height deflection calculated by gravimetric method, considering satellite orbits data
05 p0841 A70-16643

North American datum related to geocentric satellite reference system, using Lambeck method for geodetic parameters
05 p0841 A70-16644

Laser interferometer for earth strain study, measuring Michelson arm length changes by counting fringes in interference pattern
05 p0861 A70-16843

Earth axis position and displacements measured by earth-moon laser telemetry
06 p1058 A70-18452

Astronomical and physical geodesy, discussing geometrical methods involving triangulation and trilateration and geocentric coordinates method in navigation
07 p1265 A70-19370

Earth shape formulas reduction to Taylor series, considering Molodenskii solution method for simple layer density integral equation
09 p1670 A70-23343

Earth surface mapping and shape and internal constitution determination by satellite geodesy
10 p1876 A70-24642

Quaternion representation of general relativity applied to geodesic equation and planetary motion, noting difference from Einstein formulation
10 p1944 A70-24859

Errors estimation arising in inertial navigation equations solution while neglecting terms dependent on earth asphericity and gravitational field
11 p2077 A70-25558

ALGOL modified Gaussian algorithm for geodetic calculations, combining matrices for storage place economy
11 p2013 A70-25797

Systematic errors of reference star catalogs in satellite geodesy, discussing influence on orbit predictability
11 p2045 A70-26180

Plate measurement on comparators in satellite geodesy, discussing optics, magnification, mark selection and error elimination
11 p2051 A70-26181

Spatial geodesy calculations based on photographs of satellites against star background, recommending ECHO type satellites
11 p2046 A70-26191

Radiotelescope measurements for geodetic purposes, applying interferometric principles to quasars
13 p2396 A70-29163

Triaxial earth ellipsoid best fitting parameters for geoidal surface radius vector by spherical harmonics with coefficients computed from satellite observations
13 p2398 A70-29207

Harmonic functions defining geopotential and gravity derived from satellite orbit dynamics, applying to earth shape parameters
13 p2398 A70-29208

Decreasing gravitational constant effects on secular earth figure and dimension changes using Clairaut equation
14 p2568 A70-30143

Gravitational field representation in satellite geodesy by simple layer potential, comparing with geopotential expansion in spherical harmonics
15 p2722 A70-31548

Spacecraft tracking methods applied to solid earth and ocean physics
15 p2809 A70-31685

Report to COSPAR on Hungarian space research including satellite observations, upper atmosphere, geomagnetic effect, geodesy, cosmic rays, etc
15 p2830 A70-31713

Report to COSPAR on space exploration research in Poland including satellite tracking, geodesy, meteorology and aerospace medicine
15 p2830 A70-31721

Reduction constants simultaneous determination in earth figure theory based on astronomical, geodetic and gravimetric data
15 p2731 A70-32147

Triaxial earth attraction potential from expanding certain elliptical functions into series, noting consistency with concepts of astronomy and geodesy
15 p2731 A70-32148

Vertical gravity gradient effect on calculations accuracy of earth figure, deriving corrections for anomalies
15 p2731 A70-32149

Laser interferometry strain gage for measuring earth strain, taking into account wavelength stabilization
16 p2925 A70-33023

Vacuum interferometer strain gage for absolute earth strain measurement via length change comparison with wavelength standard
16 p2925 A70-33024

Geodesic Luneberg lens Q band antenna design, construction and evaluation, noting point feeding and energy collimation
16 p2876 A70-33408

Physical geodesy - Conference, Prague, September 1969
20 p3617 A70-39068

Fundamental equations of physical geodesy for earth figure by oceanic and continental parts via external gravity field
20 p3617 A70-39069

- Stokes earth constants from gravity anomalies
20 p3617 A70-39070
- Curvilinear orthogonal coordinates for gravimetric deduction related to Cartesian coordinates as solvability condition for Molodenskii problem
20 p3617 A70-39071
- Integral equations for gravity field and plumb line deflections solved by Neumann and Molodenskii methods
20 p3617 A70-39073
- Earth ellipticity in past, using hydrostatic equations based on density distribution and angular velocity to obtain oblateness
21 p3820 A70-41973
- Spatial aerotriangulation by analytical method based on independent models matched with geodesic grid
22 p4013 A70-42597
- Earth curvature effects on position of terrain points on planar aerial photographs for various survey altitudes
24 p4333 A70-45197
- Resonant satellites geodesy, determining orbit perturbation and gravity constant via mean Kepler elements high speed analysis
24 p4408 A70-45540
- Laser measurements in semidynamic space geodesy on D1-D satellite using Mediterranean stations
24 p4352 A70-45541
- Doppler satellite measurements in semidynamic geodesy using data from Mediterranean ground stations
24 p4312 A70-45543
- Dynamical and geometrical geodesy on European datum, comparing data from Doppler, laser and photographic satellite measurements
24 p4312 A70-45544
- Geodetic parameters estimated from satellite dynamic and geometric solutions and Mariner 4 and 5 missions
24 p4312 A70-45545

GEODETIC COORDINATES

- Satellite triangulations scale and orientation control, describing terrestrial methods of geodetic bases determination
02 p0254 A70-11755
- Receiving station geodetic coordinates computed from Doppler curves of artificial satellite, using method of differential corrections
02 p0254 A70-11757
- Geodetic coordinate system referred to center of mass and earth rotation axis constructible from satellite observations
03 p0472 A70-13186
- Satellite surveys and astronomic-geodetic nets for joint terrestrial, space triangulation and gravimetric measurements, including laser distance determination
03 p0445 A70-13191
- Satellite observations used to construct coordinate system referred to earth center of mass and axis of rotation
03 p0474 A70-13733
- Book on methods of geodetic astronomy for intertropical zone covering azimuth, latitude and time determination, spherical geometry and geographical coordinate reduction
04 p0677 A70-14750
- Simultaneous maximum likelihood estimation and coordinate conversion for redundant hyperbolic lines of position in radio navigation
04 p0717 A70-15545
- Astronomical and physical geodesy, discussing geometrical methods involving triangulation and trilateration and geocentric coordinates method in navigation
07 p1265 A70-19370
- Vacuum metrics with null geodesic expanding shear-free congruences using holomorphic solution
07 p1334 A70-19600
- Three vector coplanarity equations for space geodetic triangulation grid, discussing role of satellite photographic observation
09 p1667 A70-22488
- Geographic coordinates of intersection points determined directly on sphere, noting reduction on ellipsoid and adjustment for surplus intersections
09 p1670 A70-23441
- Geodetic systems relative positions determination based on satellite synchronous observation
13 p2400 A70-29529
- Equations for converting satellite geodetic latitude and altitude into geocentric Cartesian system
20 p3669 A70-39691
- Tesseral harmonics of geopotential and station coordinates from combined Baker-Nunn, laser and range data from satellites
24 p4407 A70-45538

GEODETIC SATELLITES

- NT GEOS 1 SATELLITE
- NT GEOS 2 SATELLITE
- NT PAGEOS SATELLITE
- Satellite surveys and astronomic-geodetic nets for joint terrestrial, space triangulation and gravimetric measurements, including laser distance determination
03 p0445 A70-13191

- Great circle vector formula in space triangulation, discussing topocentric and geocentric position of satellite and tracking stations and absolute distance determination
03 p0445 A70-13193
- Satellite optical tracking data in space geodesy, determining stations position from minimum number of stations and observations with time errors
03 p0446 A70-13195
- Ranger, Surveyor and Lunar Orbiter televised and reconstructed picture quality, suggesting improvements in existing photographic systems
03 p0490 A70-13656
- Global and European geodetic satellite network, discussing San Marco equatorial satellite and observation stations
03 p0581 A70-13829
- Artificial satellites for geodetic, topographic and cartographic purposes, outlining photographic and distance measuring equipment
03 p0475 A70-13831
- Tradeoff methodology establishing evaluation criteria for comparing radar and laser systems to meet geodetic satellite altimeter performance requirements [AAS PAPER 69-604]
04 p0686 A70-14648
- Laser ranging systems used with retroreflecting satellites in geodetic and geophysical applications
05 p0815 A70-16691
- Data reduction from D1A satellite VHF and UHF Doppler measurements to attempt geodetic link between Nice and Beirut
07 p1262 A70-18941
- Geodetic satellite positional problems taking into account parallax refraction
09 p1765 A70-22653
- NASA Geodetic Satellite Program applications to long range navigation, spacecraft orbit prediction, navigation experiments calibration, etc
09 p1724 A70-23048
- French geodetic satellites Diademe I and II experiments in navigation, noting laser and Doppler devices
09 p1725 A70-23049
- Earth surface mapping and shape and internal constitution determination by satellite geodesy
10 p1876 A70-24642
- Mathematical-physical parametric model of satellite geodetic laser range accuracy, false alarm and count probabilities, correlating with retroreflector signal strength
16 p2863 A70-33166
- Pulse compression for geodesy satellite radar altimeter, considering tradeoff based on system accuracy, power and life
16 p2911 A70-33715
- Position and velocity of geodetic drag free satellite in near circular orbit, including lunar- solar gravitational effects and zonal and tesseral harmonics [AIAA PAPER 70-1054]
19 p3528 A70-38869
- GEODETIC SURVEYS
- Geodetic air mapping and surveying system, describing cartographic camera and system operation
03 p0489 A70-13655
- Error analysis of resonant orbits for geodesy, discussing high order geopotential coefficient recovery by resonance and gravity model errors
05 p0909 A70-16341
- Data reduction from D1A satellite VHF and UHF Doppler measurements to attempt geodetic link between Nice and Beirut
07 p1262 A70-18941
- U.S. Coast and Geodetic Survey satellite triangulation data reduction methods, discussing data acquisition system, plate preparation, etc
11 p2046 A70-26190
- Geodetic systems relative positions determination based on satellite synchronous observation
13 p2400 A70-29529
- He-Ne laser geodimeter for Coast and Geodetic Survey length measurements on continental traverses
16 p2928 A70-33525
- Geodetic boundary value problem reformulation based on geometric satellite geodesy involving gravity measurements
22 p4025 A70-43667
- GEOS 1 satellite short arc optical observations over North American network to improve survey coordinates of tracking stations
24 p4312 A70-45542
- GEODIMETERS
- He-Ne laser geodimeter for Coast and Geodetic Survey length measurements on continental traverses
16 p2928 A70-33525
- GEOELECTRICITY
- NT TELLURIC CURRENTS
- Electrostatic methods considered for using earth electric field in smog dispersion in polluted areas and for airport fog clearing [AIAA PAPER 70-118]
06 p1058 A70-18217
- Magnetic and electric field changes across earth bow shock and magnetosheath, discussing Pioneer 8 andOGO-5 data
19 p3494 A70-37483

GEOGRAPHY

NT OROGRAPHY

GEIDS

- Earth figure parameters from satellite orbit dynamics, including potential on geoidal surface and scale factor for lengths
05 p0840 A70-16638
- Geodetic vertical and geoidal height deflection calculated by gravimetric method, considering satellite orbits data
05 p0841 A70-16643
- Triaxial earth ellipsoid best fitting parameters for geoidal surface radius vector by spherical harmonics with coefficients computed from satellite observations
13 p2398 A70-29207
- Second approximations of deflection of vertical and quasi-geoid height dependence on difference between unknown earth surface and known hypsometric surface
20 p3617 A70-39072
- Global geoid sections determined by satellite orbit dynamics, using best fitting ellipses
21 p3812 A70-40591
- Lunar effects on vertical and shape of geoid in universal time
22 p4100 A70-42852
- Gravity measurement errors in high speed aircraft parallel to undulating geoid attributed to associated vertical accelerations
22 p4025 A70-43662
- GEOLOGICAL FAULTS
- Gas volcanic activity, meteoric impact and geological faults as origin of lunar craters, cracks, maria, etc
03 p0563 A70-13169
- Topographic shadow linears image enhancement by low angle illumination, describing pseudoradar technique for subcontinental sized fracture systems detection
12 p2221 A70-26960
- Vredfort Ring origin, discussing paleomagnetic evidence to choose between meteorite impact or terrestrial cause
16 p2899 A70-34050
- GEOLOGY
- NT GEOCHRONOLOGY
- NT GEOMORPHOLOGY
- NT GLACIOLOGY
- NT LUNAR GEOLOGY
- NT OROGRAPHY
- NT PETROGRAPHY
- NT PETROLOGY
- NT PHOTOGEOLOGY
- NT TECTONICS
- NT VOLCANOLOGY
- Hydrocarbon contents of two sediments from Scottish Carboniferous Formation, examining isoprenoid alkanes abiogenesis
01 p0041 A70-10038
- Lherzolite, anorthosite, Gabbro and basalt dredged from Mid-Indian Ocean Ridge noting geological and geophysical features
04 p0675 A70-14422
- Geological contribution of satellite photography, discussing synoptic surveyability of vast areas and reduced scale maps of little known remote territories
05 p0837 A70-16073
- IR imagery by InSb detectors applied to mapping earth surface thermal distribution
05 p0840 A70-16498
- Geology from air covering aerial and space photography, nonvisible spectrum utilization, photograph transmission from Mars and moon, balloon flights, etc
07 p1272 A70-20225
- Lunar dimple /drainage/ craters formation mechanisms, considering analogous earth drainage craters associated with lava tubes
09 p1666 A70-22311
- Continental migration role in lunar maria formation, suggesting similarity with geological formation of earth ocean floor
09 p1765 A70-23797
- Radiophase and induced pulse transient /input/ remote sensor systems for geological mapping, describing data acquisition and reduction techniques
12 p2221 A70-26961
- Mars geology, discussing polar caps phenomena, diurnal variations, orbital eccentricity, seasonal meteorology, volcanism, erosion, etc
15 p2800 A70-32059
- Geological and cartographical data acquisition and processing, considering aircraft and satellite-borne photography of earth surface
20 p3616 A70-39061
- GEOMAGNETIC ANOMALIES
- U MAGNETIC ANOMALIES
- GEOMAGNETIC CROTCHETS
- U SUDDEN IONOSPHERIC DISTURBANCES
- GEOMAGNETIC EFFECTS
- U MAGNETIC EFFECTS
- GEOMAGNETIC EQUATOR
- U MAGNETIC EQUATOR
- GEOMAGNETIC FIELD
- U GEOMAGNETISM
- GEOMAGNETIC HOLLOW
- Steady state tangential drag by solar wind on geomagnetic cavity, describing unipolar induction
22 p4013 A70-42469

GEOMAGNETIC LATITUDE

Geographically smoothed geomagnetic cut-offs for eliminating discontinuity in neutron monitor latitude variation in Mexico City vicinity

01 p0167 A70-10229

Spatial distribution of Pi 2 micropulsations over specific distances and geomagnetic latitudes, noting coastline and geological effects

02 p0290 A70-12154

Geomagnetic latitude survey by neutron multiplicity monitor covering threshold rigidity ranges at various elevations, relating data to primary cosmic ray rigidity spectrum

04 p0741 A70-15125

Evening time latitudinal distribution of polar magnetic field perturbations compared with nighttime distribution, indicating evening electrojets

04 p0684 A70-15751

Magnetic activity effect on ionospheric drift speeds variation with latitude, observing correlation with electron density

05 p0837 A70-15922

F 2 region critical frequency conjugacy latitudinal variations observation at conjugate stations compared with results from nonconjugate stations

05 p0839 A70-16286

Latitudinal dependence of period and amplitude of steady Pc 3-4 pulsations observed at group of widely spaced stations

07 p1268 A70-19464

Critical sunspot dependence of F 2 region noon observed phenomenon at various equatorial latitudes, observing magnetic dip

08 p1492 A70-21837

Charged particle albedo latitude dependence estimated from balloon-borne Geiger telescopes

09 p1746 A70-23481

Pi2-type pulsations in and near auroral zone observed for amplitude variation dependence on geomagnetic latitude and local time

10 p1885 A70-25280

F 2 layer critical frequencies rms deviations approximate dependences on latitude and solar activity for computer calculation of long-range ionospheric forecasts

11 p2043 A70-25549

Low momentum muon intensity dependence on geomagnetic latitude

13 p2476 A70-28919

Pc-periods dependence on geomagnetic latitude during active sun years, using IGY data

13 p2395 A70-28943

Evening time latitudinal distribution of polar magnetic field perturbations compared with nighttime distribution, indicating evening electrojets

14 p2576 A70-30835

Latitude profiles made of low energy solar electrons over polar cap, finding latitude knee position

18 p3306 A70-36020

Geomagnetic latitudinal variations in Sq/H and Sq/Z in equatorial region, using electric simulation

18 p3246 A70-36099

Latitudinal dependence of period and amplitude of steady Pc 3-4 pulsations observed at group of widely spaced stations

18 p3250 A70-36938

Low energy solar protons penetration, examining geomagnetic cutoff latitude during magnetically disturbed period

21 p3881 A70-41077

F 2 layer critical frequencies rms deviations approximate dependences on latitude and solar activity for computer calculation of long-range ionospheric forecasts

21 p3819 A70-41299

Corrected geomagnetic midnight local time calculations, using nomogram

23 p4187 A70-43862

Pitch-angle distribution of electron fluxes in auroral zone as function of geomagnetic latitude

23 p4192 A70-44878

GEOMAGNETIC MICROPULSATIONS

Geomagnetic micropulsations relation to magnetospheric boundary location on sun-earth line, noting influence of solar wind pressure variations

01 p0071 A70-10412

Regular/irregular micropulsations variations during solar cycle, noting possible magnetospheric contraction and solar wind velocity influence

01 p0075 A70-10600

Amplitude modulated pearl type geomagnetic micropulsations connected with auroral X ray emission variations

01 p0171 A70-11228

Geomagnetic micropulsations fluctuations during solar activity cycle showing changes in excitation frequency with change in corpuscular fluxes parameters

01 p0083 A70-11539

Spatial distribution of Pi 2 micropulsations over specific distances and geomagnetic latitudes, noting coastline and geological effects

02 p0290 A70-12154

Dynamic spectra of quasi-periodic VLF emissions noting association with geomagnetic micropulsations

03 p0477 A70-13985

Latitude-period relation existence in geomagnetic micropulsations, discussing coupling between components of geomagnetic field fluctuations

05 p0838 A70-16278

Numerical analysis of cyclotron amplification of geomagnetic micropulsations in magnetosphere based on dispersion relation for three component cold plasma beam system

05 p0838 A70-16284

Stably trapped magnetospheric plasma distribution determined from Pi2 micropulsations and auroral electrojet index AE

05 p0839 A70-16285

Oscillations intervals with diminishing period during magnetic storms, noting relationship to midlatitude disturbances in F region

05 p0842 A70-16746

Pc 2-4 geomagnetic pulsations abrupt disappearance on global scale ascribed to magnetosphere boundary stabilization, noting interplanetary magnetic field role

05 p0843 A70-16766

Magnetosphere and interplanetary space diagnostics by micropulsations analysis, discussing geomagnetic cavity boundary, cold plasma density, energetic particles, etc

07 p1264 A70-19191

Geomagnetic micropulsation amplitudes and polarization along meridional profile analyzed from simultaneous ground station recording

07 p1268 A70-19463

Pc micropulsations with periods of 4-12 sec, discussing occurrence probability and diurnal characteristics

07 p1268 A70-19465

Response characteristics of negative feedback galvanometer amplifier with inductive source impedance for geomagnetic micropulsation detection

07 p1242 A70-19998

Polar cap magnetic field micropulsations simultaneous recordings at Greenland, Alaska, and Finland, noting seasonal variations

07 p1270 A70-20152

Alfvén wave structure mechanism of geomagnetic micropulsation type in cometary tails, assuming Kelvin-Helmholtz instability at comet plasma-solar wind interface

08 p1565 A70-20567

Longitude and latitude dependence of pc geomagnetic micropulsations related to local time, using analog spectral analysis

09 p1666 A70-22064

Electron precipitation modulation exponential dependence on micropulsation amplitude derived from idealized model

09 p1747 A70-23492

Equatorial geomagnetic micropulsations using earth current technique, discussing night and diurnal variations

10 p1875 A70-24435

Geomagnetic pulsations /pc 4/ characteristics from analyzing magnetosphere model yielding plasma densities consistent with experimental data

10 p1875 A70-24483

Drift instability of Alfvén waves at electron plasma sheet edge as source of auroral micropulsation instability

12 p2222 A70-27184

Geomagnetic micropulsations recording by transistorized saturated core magnetometers noting sensitivity

13 p2416 A70-30055

Book on geomagnetic micropulsations covering dynamic processes of magnetically trapped particles and micropulsations usability in remote sensing of magnetosphere

14 p2581 A70-31325

Geomagnetic micropulsations horizontal polarization characteristics relationship between stations in southern and northern auroral zones

15 p2725 A70-31859

Alfvén wave structure mechanism of geomagnetic micropulsation type in cometary tails, assuming Kelvin-Helmholtz instability at comet plasma-solar wind interface

15 p2805 A70-32722

Earth magnetic field Pc 1 micropulsations polarization characteristics examined in narrow frequency bands

[AFCL-70-0247]

16 p2897 A70-33299

Fine structure of hydromagnetic ULF emissions on spectrograms of whistlers, periodic emissions, choruses and sweepers

17 p3047 A70-35640

Geomagnetic micropulsation amplitudes and polarization along meridional profile analyzed from simultaneous ground station recording

18 p3250 A70-36937

Pc micropulsations with periods of 4-12 sec, discussing occurrence probability and diurnal characteristics

18 p3250 A70-36939

F layer scattering and earth electromagnetic field short period oscillations, relating electron density with pearl micropulsations amplitude and occurrence

18 p3255 A70-37036

Fine structure of geomagnetic Pc 1 micropulsations by cyclotron instability due to anisotropic energetic proton velocity

19 p3410 A70-37334

LF geomagnetic micropulsations recordings by two component induction magnetometer, relating diurnal frequency and occurrence variations to local K-index changes

19 p3412 A70-37995

HF geomagnetic micropulsations recordings by two component induction magnetometer, relating diurnal frequency and occurrence variations to local K-index

19 p3412 A70-37996

Pc 1 geomagnetic micropulsation statistics for middle latitudes, discussing solar cycle and annual variations in occurrence rates

21 p3817 A70-41088

Substorm aspects of magnetic pulsations, discussing classification micropulsations, generation and propagation effects

22 p4019 A70-43145

Micropulsation Pc-1 phase and polarization comparisons concerning L to R wave coupling in ionosphere

22 p4024 A70-43313

Micropulsations polarization characteristics from statistical spectrum analysis

23 p4185 A70-43837

Polarization of short period oscillations Pc2-Pc4 dependence on time of day, oscillation type and geoelectromagnetic field activity

23 p4190 A70-44086

Pi geomagnetic micropulsations relation to magnetotail energetic electron bursts, from ground based midlatitude magnetic observatories and IMP-1 data

23 p4193 A70-44924

GEOMAGNETIC PULSATIONS

NT GEOMAGNETIC MICROPULSATIONS

Short irregular geomagnetic pulsations repetitive characteristics relationship with magnetospheric cavity dimensions

01 p0081 A70-11229

Stable geomagnetic pulsations related to plasma density shock position in magnetosphere and to magnitude of diurnal variations

01 p0082 A70-11508

Electrical phenomena in upper atmosphere and solar wind may control geomagnetic disturbances and aurorae

01 p0082 A70-11523

Geomagnetic field pulsations frequency changes in relation to geomagnetic and solar activity level

01 p0084 A70-11559

Pc 1 range geomagnetic pulsation sweepers /MHD waves/ event in evening sector, considering delay time between sweepers appearance and polar magnetic substorms onset

02 p0290 A70-12121

Postbreakup pulsating aurora association with conjugate absorption bays, indicating hard electron precipitation source location

02 p0290 A70-12161

Fourier spectra of Pi 1 pulsations during magnetic field sudden disturbances derived from amplitude analysis

05 p0840 A70-16641

Geomagnetic field secular variations relation to variations of magnetic field of optimum dipoles, noting earth core role

05 p0842 A70-16747

Latitudinal dependence of period and amplitude of steady Pc 3-4 pulsations observed at group of widely spaced stations

07 p1268 A70-19464

Frequency spectra of Pi 2 geomagnetic field pulsations, noting effects of aural zone location, configuration and structure

07 p1277 A70-20438

PPi bursts interpreted as proton beams cyclotron instability in geomagnetic field

07 p1277 A70-20439

Plasma concentration in nondipole magnetosphere model from Pc 5 pulsations periods for high geomagnetic latitudes, noting solar winds effect

07 p1277 A70-20443

Geomagnetic pulsations with intensity maximum at midlatitudes, noting north to south decreasing trend

07 p1278 A70-20459

Geomagnetic pulsations, discussing giant pulsations and pulsations associated with nuclear detonations, meteor showers, ionospheric pressure waves, ocean waves and earthquakes

08 p1487 A70-20641

Lunar daily and monthly tidal variations in horizontal magnetic field and F 2 region maximum electron density and peak ionization height at Puerto Rico

10 p1872 A70-23823

Pi2-type pulsations in and near auroral zone observed for amplitude variation dependence on geomagnetic latitude and local time

10 p1885 A70-25280

Polarization regularities of Pc 1 oscillations interpreted from propagation along ionospheric waveguide centered at F 2 layer

11 p2043 A70-25543

Geomagnetic damped type pulsations associated with storms interpreted as interaction between hydromagnetic oscillations and magnetospheric motions caused by solar wind

11 p2047 A70-26567

Quasi-sinusoidal fluctuations of magnetic field during geomagnetic storms measured by ATS 1 in synchronous equatorial orbit

12 p2223 A70-27192

Ultra low frequency waves features in magnetosphere, considering geomagnetic pulsations, magnetic data from Explorer 33 and bounce resonance

12 p2223 A70-27573

Solar and lunar daily geomagnetic variations, correcting harmonic components calculated values

12 p2303 A70-27673

Low latitude atmospheric vertical density variations, comparing solar and geomagnetic activities effects

12 p2227 A70-28264

Pc-periods dependence on geomagnetic latitude during active sun years, using IGY data

13 p2395 A70-28943

Auroral electron precipitation and ground based magnetic field pulsations correlation for magnetic storms inception

13 p2401 A70-30053

Solar wind parameters time variations influence on geomagnetic activity from measurements by electrostatic analyzers on Vela satellites

13 p2481 A70-30065

Earth hydromagnetic dynamo spectrum fluctuation related to secular geomagnetic field variations, using unsteady kinematic models

14 p2568 A70-30202

Earth frequency sounding based on geomagnetic field variations spherical analysis, tabulating nonconducting shell thickness, nucleus resistivity, etc

14 p2572 A70-30243

Geomagnetic pulsations and hydromagnetic wave propagation in magnetosphere, using geometric optics approximation

15 p2722 A70-31452

Lunar tidal diurnal and semidiurnal variations in equatorial sporadic E layer related to H geomagnetic field and sunspot period

15 p2726 A70-31862

Superposed effects in solar quiet daily variations of geomagnetic horizontal component, using Lerwick and Eskdalemuir data

15 p2728 A70-31991

Geomagnetic disturbances temporal behavior and spatial scales

15 p2732 A70-32543

Pi 2 pulsation power spectra change with magnetospheric substorm development, relating pulsations and electron precipitation

17 p3080 A70-35641

Long term geomagnetic pulsations /PCS/ with sinusoidal waveforms, using IGY data

17 p3080 A70-35642

Latitudinal dependence of period and amplitude of steady Pc 3-4 pulsations observed at group of widely spaced stations

18 p3250 A70-36938

Pc 1 pulsations occurrence frequency diurnal annual and 11 year variations at midlatitudes, relating distribution with carrier frequencies of perturbation

19 p3408 A70-37316

Magnetospheric plasma concentration from geomagnetic pulsations periods

19 p3409 A70-37320

Diurnal variations in polarization axis direction of Pc 1 pulsations

19 p3410 A70-37333

Geomagnetic storms at ATS 1 in 1967, discussing storm-time disturbance field and associated pulsations

19 p3410 A70-37488

Earth EM field short period pulsations distribution within magnetic storms

19 p3416 A70-38585

Pc-1 pulsations during solar activity maximum and minimum, discussing diurnal, seasonal and cyclic variations

19 p3416 A70-38586

Geomagnetic field pulsations prior to polar magnetic disturbance onset, discussing solar wind role

19 p3416 A70-38588

Geomagnetic pulsations propagation through horizontally inhomogeneous ionosphere, solving EM wave diffraction problem

19 p3416 A70-38589

Pc-1 pulsation production by Cerenkov emission of proton beam oscillating along magnetic field line

19 p3417 A70-38590

Short period Pc-1 pulsations frequency spectra relationship to magnetospheric He ion concentration

19 p3417 A70-38591

Geomagnetic fluctuations relationship to magnetospheric ring current and plasmapause during magnetic storm

20 p3619 A70-39328

Mechanical analogies of magnetodynamic oscillations in homogeneous density column subject to material body impact, relating to earth magnetic field

21 p3854 A70-40593

Polarization regularities of Pc1 oscillations interpreted from propagation along ionospheric waveguide centered at F 2 layer

21 p3819 A70-41293

Dual satellite magnetic field and plasma measurements of earth bow shock pulsation shock by Vela 3A and Explorer 33

22 p4013 A70-42470

Worldwide geomagnetic fluctuations during disturbed conditions computed from spectrum analysis, considering long period oscillation caused by solar wind structure changes

22 p4019 A70-43114

Pc-1 and IPDP pulsations propagation characteristics from ground based measurements, discussing spectral structure, waveforms, polarization, time delay between different observation stations, etc

22 p4021 A70-43277

Solar wind intensity and direction correlated with intensity of earth surface magnetic disturbances and geomagnetic pi-2 type pulsations

22 p4022 A70-43284

Virial theorem for magnetospheric dynamics, discussing boundary and ring currents and densities and geomagnetic sudden impulses and commencement

23 p4184 A70-43830

Global geomagnetic field fluctuations of internal and external origins, analyzing HF spectrum based on monthly mean plots

23 p4187 A70-43861

Solar wind flux correlation with earth EM field pulsations, noting flare-generated shock front effects on magnetosphere

23 p4236 A70-44051

Geomagnetic perturbation effects on conduction along field lines and short period fluctuations associated with plasma turbulence in magnetosphere

23 p4189 A70-44065

Pi 2 type geomagnetic pulsations relationship to auroral zone morphological features

23 p4190 A70-44085

Earth surface magnetic field variations due to magnetopause current system

24 p4329 A70-45355

Earth hydromagnetic dynamo spectrum fluctuation related to secular geomagnetic field variations, using unsteady kinematic models

24 p4330 A70-46277

Earth frequency sounding based on geomagnetic field variations spherical analysis, tabulating nonconducting shell thickness, nucleus resistivity, etc

24 p4332 A70-46318

GEOMAGNETIC STORMS

U MAGNETIC STORMS

GEOMAGNETIC TAIL

Geomagnetic bays produced by neutral sheet plasma earthward movement resulting from solar wind enlargement of geomagnetic tail

01 p0071 A70-10409

Geomagnetic perturbation coincidences observed at conjugate Polar Cap observatories, suggesting magnetospheric tail field lines convergence with plasma neutral layer

03 p0565 A70-13232

Geomagnetic tail observations by Pioneer 8 probe

03 p0475 A70-13851

Geomagnetic tail observations by Pioneer 8 at 500 earth radii, analyzing time-averaged magnetic field data

03 p0575 A70-13983

Magnetopause shape determination model allowing for solar wind direction obliquely toward geomagnetic dipole axis

03 p0560 A70-13984

Resonant compression waves in geomagnetic tail estimated for frequency and spatial distribution by single layered two dimensional model

04 p0680 A70-15127

Magnetic storm /14 September 1966/ observation by Explorer 33 in geomagnetic tail and by polar stations, studying relation in magnetosphere and on earth

05 p0843 A70-16764

Electric field in earth magnetotail via Explorer 33 and 35 satellite observation of solar electrons above 50 kev energy

06 p1058 A70-18528

Geomagnetic tail natural oscillations, studying magnetospheric substorms role

07 p1268 A70-19499

Magnetic field measurements in geomagnetic tail from Explorers 33 and 35 indicating depressed field region centered on neutral sheet

08 p1488 A70-21379

Geomagnetic perturbation coincidences observed at conjugate Polar Cap observatories, suggesting magnetospheric tail field lines convergence with plasma neutral layer

08 p1580 A70-21665

Magnetopause boundary between shocked streaming solar plasma and geomagnetic tail observed at lunar orbit by magnetometer on Explorer 35

10 p1941 A70-24436

Plasmapause form in equatorial plane in presence of magnetospheric tail subsonic potential convective flow

11 p2047 A70-26796

Geomagnetic tail structure and magnetic field fluctuations from IMP 3 satellite measurements, showing enhancement during/after SSC and sudden impulses /SI/

13 p2396 A70-29182

LF MHD waves propagation model through earth magnetic tail, considering analogy with hydromagnetic plasma waveguide

13 p2398 A70-29210

Geomagnetic tail formation, cross section and length and auroral irradiation, discussing observations, models, vacuum magnetic merging and field aligned currents processes

13 p2402 A70-30060

Magnetotail plasma sheet temporal variations during substorms and plasma pressure as related to dynamic pressure of solar wind from Vela satellites observation

13 p2480 A70-30061

Energetic particles measurements in geomagnetic tail by Explorer 33/35 for determining gross magnetic topology of distant tail and electric fields

13 p2481 A70-30070

Spatial distribution and directional anisotropies of tail plasma sheet energetic electrons from measurements by electrostatic analyzer and energetic particle experiments on Vela 4

13 p2482 A70-30071

Geomagnetic tail structure and shape from Explorer 33 and 35 and Pioneer 8 observation data, examining field lines divergence with distance from earth

13 p2402 A70-30075

Magnetospheric tail neutral layer magnetic field distribution, comparing satellite data with theory

14 p2570 A70-30222

Pioneer 8 wave and particle observations correlation showing broadband wave levels reduction during extended geomagnetic tail crossings

15 p2727 A70-31904

Geomagnetic tail natural oscillations, studying magnetospheric substorms role

15 p2732 A70-32744

Solar protons penetration into magnetosphere and magnetotail

18 p3306 A70-36004

Interplanetary plasma observations by Vela satellites in solar wind and plasma sheet of magnetotail during magnetic storm

19 p3410 A70-37490

Magnetotail magnetic field perturbations associated with polar magnetic substorms, using IMP-A and B satellite observations

21 p3882 A70-41720

Solar-magnetospheric neutral sheet reconnection and noise in geomagnetic tail from Explorer 33 Ames magnetometer

22 p4013 A70-42471

Magnetospheric tail magnetic field and particle motion calculation, assuming constant radius cylinder with current sheet bisecting center

22 p4019 A70-43111

Geomagnetic wake in solar wind at 500 earth radii, correlating Explorer 35 and Pioneer 8 data

23 p4184 A70-43828

Geomagnetic tail and plasma sheet hydromagnetic oscillations, deriving dispersion equations and stability conditions

23 p4184 A70-43829

Pi geomagnetic micropulsations relation to magnetotail energetic electron bursts, from ground based midlatitude magnetic observatories and IMP-1 data

23 p4193 A70-44924

Magnetospheric tail neutral layer magnetic field distribution, comparing satellite data with theory

24 p4331 A70-46297

GEOMAGNETICALLY TRAPPED PARTICLES

U RADIATION BELTS

GEOMAGNETISM

Cosmic rays nucleon component measurements interpretation in terms of geomagnetic field model

01 p0169 A70-10354

Spatial characteristics of magnetosheath magnetic field observed simultaneously by Explorer satellites, showing zero order agreement with prediction of MGD theory

01 p0071 A70-10410

Ionospheric auroral oval, proton aurora and midlatitude trough relationship to magnetospheric structure, trapping outer boundary, storm time belt and plasmapause

01 p0073 A70-10586

Earth satellites magnetic survey contributions to World Magnetic Survey project /WMS/, discussing international reference standards and magnetic mapping

01 p0075 A70-10595

Rocket and satellite studies of geomagnetic field during IQSY, confirming ionospheric currents responsible for magnetic diurnal variations

01 p0075 A70-10596

Physical processes responsible for conjugate point phenomena involving particles and waves in magnetosphere and IQSY observations

01 p0075 A70-10598

Magnetic bay microstructures occurrences at low latitude not restricted to day or night hemisphere

01 p0076 A70-10668

Upper atmospheric contribution to Faraday rotation angle above 5000 km determined from beacon frequencies of geostationary satellite, noting geomagnetism weighting and electron content decrement role

01 p0076 A70-10874

Core convection consequences with regard to earth figure and continental drift, indicating no changes in magnitude of magnetization

01 p0076 A70-10899

Jacchia 1965 model discrepancies in solar and geomagnetic activity and semiannual effects observed in satellite drag measurements at 150-200 km and 700-1500 km

01 p0077 A70-11204

Geomagnetic potential optimal representation in frame of reference of eccentric inclined dipole using conversion formulas to determine harmonic coefficients

01 p0081 A70-11230

Real configuration effect of magnetic field in moderately perturbed magnetosphere on whistlers dynamic spectra, stressing geomagnetic perturbation detection

01 p0082 A70-11486

Mariner 2 measurements of geomagnetic field and interplanetary plasma parameters, analyzing interaction between interplanetary medium and magnetosphere during decreased solar activity

01 p0192 A70-11520

Magnetosphere boundary configuration calculated with allowance for geomagnetic dipole inclination to geographic axis and nondipole section of geomagnetic field

01 p0082 A70-11522

Interplanetary magnetic field sectoral structure effect on diurnal cosmic ray intensity and geomagnetic field, noting field direction influence

01 p0172 A70-11525

Lunar diurnal variation parameters at Irkutsk determined from IGY data concerning geomagnetic components

01 p0083 A70-11538

Secular variations distribution on earth surface, plotting isopore charts from mean annual values of magnetic elements /1960-1965/

01 p0083 A70-11540

Polar geomagnetic disturbances global current systems representation by prototypes of equivalent current systems

01 p0084 A70-11557

Harmonic analysis of magnetic storms initial phases having steep leading edges and distinct steady portions, showing homogeneity in first approximation

01 p0084 A70-11558

Geomagnetic field pulsations frequency changes in relation to geomagnetic and solar activity level

01 p0084 A70-11559

Multipole analysis for earth magnetic field allowing secular variation to be illustrated by time trends in multipole parameters

02 p0288 A70-11742

Data collection for ionospheric disturbances, geomagnetic field, radio wave intensity, cosmic rays and solar activity

02 p0290 A70-12125

Geomagnetic activity effect on ionospheric electron content from statistical analysis of data obtained during three year period

02 p0293 A70-12576

Geomagnetic field influence on satellite motion for various angles between field vector and satellite angular velocity vector

03 p0563 A70-13180

Geomagnetic field representation in terms of spherical harmonics, analyzing data for spherical and oblate models of earth

03 p0476 A70-13906

Electron temperature anisotropy in ionospheric plasma for case of ionizing sunlight propagating along geomagnetic field

03 p0479 A70-14376

Geomagnetic conjugate point problems involving temporal displacement field line tracing, display, etc

03 p0479 A70-14385

Cyclonic convective cell fluctuation and nonuniform core rotation effects on reversal of geomagnetic field, investigating fossil magnetism

04 p0676 A70-14600

Satellite observation of energetic particles and magnetic fields, discussing radiation belts, magnetosphere, galactic cosmic rays, etc

04 p0740 A70-14620

Recursive nonlinear system state estimation for arbitrary path magnetic navigation tested on simplified model by Monte Carlo simulation, considering derived error expression

04 p0715 A70-14627

Explorer 31 Langmuir probe data for electron temperature at conjugate point, tracing magnetic field line passing through spacecraft to earth

04 p0000 A70-14971

Intermediate ionospheric layer at high latitudes, discussing relationship to geomagnetic and auroral activity and F region continuity

04 p0678 A70-14974

Ionosphere beacon satellites BeB and BeC transits for field alignment of small ionospheric irregularities

04 p0678 A70-14975

Temporal behavior of energy injection into geomagnetic ring current found burst-like and similar to Dp at all magnetic levels

04 p0679 A70-15108

Solar and geomagnetic effects on variations in physiological tests using alimentary reflex of dogs

04 p0639 A70-15512

Geomagnetic field lines inclination effect on hydromagnetic waves propagation in lower ionosphere, using atmospheric model in plane form with integral conductivity tensor

04 p0683 A70-15737

Positive correlation between normal ionizations at magnetically conjugate regions in ionospheric F 2 layer from aircraft vertical soundings

04 p0683 A70-15741

Coordinates computation method using spherical harmonic expansion of geomagnetic field, discussing direct computations by perturbation method

05 p0837 A70-15820

Solar and geomagnetic activity daily parameters persistence, discussing autocorrelation function, variance spectra, sunspot numbers, radiation flux, etc

05 p0906 A70-15877

Solar magnetic discontinuity fluxes analyzed by studying 27-day cosmic ray and geomagnetic activity variations using linear filtration method

05 p0900 A70-15969

Low energy charged particle motion parallel with magnetic force lines analyzed in magnetosphere model with constant electric field

05 p0903 A70-16726

Polar auroral region displacement ascribed to distant magnetic field disturbances, proposing calculation method

05 p0842 A70-16745

Statistical description of geomagnetic field as random vector field, presenting correlation functions from empirical estimates from geomagnetic charts

05 p0842 A70-16748

Geomagnetic normal fields determination using spherical harmonic analysis, including extension to local fields

05 p0842 A70-16749

Magnetic damping of homogeneous cylindrical satellite rotation about transverse axis

05 p0924 A70-16751

Magnetic torquers consisting of permanent magnets or coils for attitude stabilization of earth satellites in geomagnetic field

[IEEE PAPER 27.1]

05 p0924 A70-17000

Ionospheric storms north-south asymmetry, discussing effects of horizontal and vertical movements of ionization controlled by asymmetric geomagnetic field

06 p1055 A70-17594

Geomagnetic center position determined by coordinate system referred to dipole approximating geomagnetic field

06 p1057 A70-17844

Electrically charged earth satellite motion under action of Lorentz force produced by geomagnetic field interaction, relating field trajectories to acceleration

06 p1142 A70-17879

Nighttime F 2 region temperature distribution under geomagnetically calm and disturbed conditions calculated from Alouette 1 satellite data

06 p1057 A70-17887

Book on ionospheric physics covering neutral atmosphere, ionospheric measurements, photochemical processes, morphology, phenomena, geomagnetism, storms, etc

07 p1262 A70-18856

Gaussian approximation of parameters of arbitrarily oriented magnetic dipole representing geomagnetic field

07 p1266 A70-19441

Geomagnetic field variations represented by optimal electric current loops or dipoles, noting advantages over spherical polynomials

07 p1266 A70-19442

Geomagnetic field amplification near gamma radiation steady source, describing field displacement

07 p1367 A70-19446

Ionospheric radio wave absorption and geomagnetic perturbations correlated with solar activity variations

07 p1267 A70-19457

Quartz magnetometer design to measure horizontal component of geomagnetic field, observing stability of H/zero/ constant

07 p1281 A70-19467

Polar ion-exosphere model with open geomagnetic field lines, calculating electrostatic field for region

07 p1270 A70-20077

Radar measurements of magnetic dip in E region compared with surface values and spherical harmonic models for dip angles

07 p1271 A70-20163

27-day variations in ionization layer created by galactic cosmic rays, discussing association with 27-day cosmic ray and geomagnetic field variations

07 p1373 A70-20345

Earth magnetic field transition recorded in basaltic lavas in southeastern Oregon

07 p1276 A70-20351

Lower ionosphere geomagnetic field local gradients determination by partial reflection method

07 p1277 A70-20455

Terrestrial electrical conductivity measurement from electromagnetic field variations determination by geomagnetic sounding

07 p1277 A70-20458

Geomagnetic field lines coordinates calculation based on coefficients obtained in spherical harmonic analysis

07 p1278 A70-20460

Geomagnetic field total vector modulus secular variations from airborne measurements

07 p1278 A70-20461

Near zero magnetic fields effect on biological systems studied to determine terrestrial magnetic field absence effect on astronauts

08 p1449 A70-20724

Magnetosphere model for quasi-circular precipitation zones of energetic particles based on geomagnetic activity distribution patterns

08 p1489 A70-21385

Mapping of normal distribution of geomagnetic elements in Bulgaria

08 p1490 A70-21433

Multipole analysis applied to 1965 International Geomagnetic Reference Field, separating secular variation field into drifting and nondrifting components

09 p1666 A70-22065

Geogravitational field correlations to geomagnetic fields emphasizing displacements in longitude

09 p1667 A70-22381

Solar cosmic rays development, discussing corpuscular radiation of flare origin, radio noise, geomagnetic activity and intensity measurements

09 p1745 A70-23128

Solar wind magnitude and variability effects on geomagnetic activity and cosmic ray intensity modulation from satellite observations

09 p1745 A70-23272

Algorithm for inversion of geomagnetic induction problem, determining earth radial conductivity distribution

09 p1669 A70-23305

Gravity and vertical magnetic anomalies interpretation to infer magnetization direction

09 p1729 A70-23601

Asymptotic method for aeromagnetic flutter of plane MGD nozzle, discussing conditions of MGD nozzle stability

10 p1800 A70-24129

Ionospheric current flow past circular inhomogeneous spot with Pedersen and Hall conductivities, calculating earth surface magnetic field by Lipshits-Hankel integral

10 p1873 A70-24309

Hydrogen ion flux detected along earth magnetic force lines in Northern Hemisphere midlatitudes, determining flux magnitude

10 p1874 A70-24321

Solar wind-geomagnetic field interactions, considering day and night hemispheres, satellite observations, shock and magnetopause motion, shock structure, etc

10 p1932 A70-24553

Vertical gradient of total geomagnetic field using curves based on continuous records of magnetic variations

10 p1876 A70-24589

Statistical estimation of aeromagnetic survey data errors due to diurnal variations, navigational inaccuracies and instrument drift

10 p1914 A70-24646

Geomagnetic field secular variation and cyclic components amplitudes separation by digital filters, observing seasonal and solar activity effects

10 p1880 A70-24808

Magnetosphere large-scale motions dependence on earth magnetic axis inclination against rotational axis

10 p1885 A70-25279

Dawn chorus frequency relation to solar activity, showing correlation to mean geomagnetic activity

10 p1886 A70-25282

Geomagnetic field upward calculation in lower ionosphere, discussing accurate data acquisition difficulties in Dirichlet problem solution

11 p2043 A70-25544

Sporadic E formation correlation to geomagnetic activity from ionospheric radio absorption observed at midlatitude and polar zone stations

11 p2044 A70-25554

Solar wind correlation with geomagnetic activity, comparing Vela 3 and 4 observations with Mariner 2 measurements

11 p2105 A70-26075

Lunar tides relationship with equatorial electrojet currents using daily variations at fixed lunar ages and monthly variations at solar hours of horizontal magnetic field

11 p2114 A70-26564

Ion temperature gradient along magnetic field lines in outer plasmasphere by thermal diffusion equations compared with electron temperature observations

11 p2047 A70-26568

Explorer 4 magnetic coordinates recalculation using spherical harmonic representation and modified B-L package

12 p2222 A70-27191

Moving object angles of rotation averaging during single measurement of geomagnetic field vector components by quantum magnetometer

12 p2234 A70-27566

Adiabatic drawing of quasi-captured charged particles by geomagnetic trap field during phase recovery period of magnetic storm

12 p2295 A70-28258

Plasmasphere ion concentration measurements on-board Elektron 2 and 4 satellites, observing dependence on geomagnetic activity

12 p2295 A70-28260

Interplanetary magnetic field intensity and geomagnetic activity level correlation with 27-day solar activity cycle based on Venera 4 and Mariner 5 data comparison

12 p2310 A70-28263

Satellite stabilization one-axis control system using earth magnetic torque

13 p2500 A70-28405

Geogravity-geomagnetic fields correlation due to lateral temperature variations in upper mantle

13 p2393 A70-28620

Auroral oval position with trapping region ϕ s boundary compared with closed geomagnetic field lines ϕ c, using Alouette 2 satellite data

13 p2398 A70-29229

Magnetometer for geomagnetic field declination measurement, eliminating thermal drift by light modulation method

13 p2415 A70-30042

Digital recording of geomagnetic field variations, using IBM or international telex code for radio transmission

13 p2415 A70-30043

Automatic cancelling devices with compensating coils for terrestrial magnetic field vector

13 p2401 A70-30044

Magnetic induction sensors sensitivity for magnetotelluric surveying in geophysics

13 p2415 A70-30048

Stability requirements for precision magnetic field measurements on ground and in space, discussing magnetic balances and fluxgate magnetometers for geomagnetic variations and spacecraft attitude

13 p2415 A70-30050

Constant and alternating magnetic field characteristics effects on magnetometric measurements in space near to and far from earth

13 p2401 A70-30052

Geomagnetic noise constraints on weak field measurements in upper magnetosphere

13 p2401 A70-30056

Horizontal geomagnetic force variations, considering ionospheric wind effects on ions in transition layer

13 p2402 A70-30057

Geomagnetic field distortion in high beta magnetospheric regions fromOGO observations for quiet and slightly disturbed conditions

13 p2402 A70-30076

Geomagnetic field distant fluctuations during substorm from ATS 1 magnetometer data on abrupt recoveries of H component

13 p2482 A70-30077

Satellite observation of alpha particles trapped geomagnetically in radiation belts, including Injun 5 results

13 p2484 A70-30092

Outer belt electron intensity variations related to geomagnetic activity indices, using Elektron measurements

14 p2630 A70-30201

Polar auroral hydrogen emission intensity dependence on K index of geomagnetic activity

14 p2569 A70-30213

Polar storm simultaneous onset and development, using observational data for geomagnetic field and aurora

14 p2570 A70-30214

Polar cap elementary magnetic disturbance relationship to auroral electrojet

14 p2570 A70-30215

Magnetosphere boundary altitude dependence on longitude, considering role of electric current density along geomagnetic lines of force

14 p2570 A70-30217

Geoactive ionizing radiation emitted by solar flares having metallic spectral lines of various brightness intensities

14 p2630 A70-30219

Geomagnetic field influence on annual F 2 layer longitudinal ionization at midlatitudes, relating solar activity level

14 p2570 A70-30225

Geomagnetism-sporadic E layer relationship, discussing critical frequencies and H component variations

14 p2571 A70-30236

Geomagnetic storm intensity nonuniform relationship to 27 day and 11 year cycles

14 p2571 A70-30240

Geomagnetic short period oscillations occurrence frequency during IQSY, discussing dependence on magnetic activity and time of day

14 p2572 A70-30242

Errors magnitude in quartz variometer readings resulting from variations of geomagnetic field perpendicular component

14 p2582 A70-30244

Earth dipole field disk dynamo model, studying connection between polarity intervals and precession effects

14 p2638 A70-30619

Mathematical model for interaction of solar wind with geomagnetic field, predicting magnetosphere shape

14 p2574 A70-30736

Daily variations of geomagnetic field horizontal component at dip equator associated with ionospheric current

14 p2575 A70-30792

Geomagnetic field lines inclination effect on hydrodynamic waves propagation in lower ionosphere, using atmospheric model in plane form with integral conductivity tensor

14 p2575 A70-30821

Positive correlation between normal ionizations at magnetically conjugate regions in ionospheric F 2 layer from aircraft vertical soundings

14 p2575 A70-30825

Magnetic activity intensity comparison in Northern and Southern hemispheres, noting correlation with solstices and equinoxes

14 p2580 A70-31260

Geomagnetic dipole field disturbances by trapped particles, calculating self consistent equilibrium configuration for ring current dipole moments

15 p2727 A70-31905

Spherical harmonic analysis of geomagnetic secular variation, applying to regional effects

15 p2799 A70-31992

Terrestrial magnetosphere dynamics in magnetospheric disturbances, analyzing solar wind-geomagnetic field interaction and storm development

15 p2729 A70-32080

Geomagnetic conjugacy variations observed via riometry in Northern and Southern Hemispheres

16 p2897 A70-33792

Spin stabilized satellite reorientation, using magnetic dipole interaction with geomagnetic field

17 p3179 A70-35287

High energy electrons in near space excess radiation from high altitude balloon and satellite data

18 p3307 A70-36170

Temporal and spatial covariation of high latitude geophysical phenomena, using unified mechanism of solar plasma stream interaction with geomagnetic field

18 p3247 A70-36404

Gaussian approximation of parameters of arbitrarily oriented magnetic dipole representing geomagnetic field

18 p3249 A70-36915

Geomagnetic field variations represented by optimal electric current loops or dipoles, noting advantages over spherical polynomials

18 p3249 A70-36916

Geomagnetic field amplification near gamma radiation steady source, describing field displacement

18 p3309 A70-36920

Ionospheric radio wave absorption and geomagnetic perturbations correlated with solar activity variations

18 p3250 A70-36931

Quartz magnetometer design to measure horizontal component of geomagnetic field, observing stability of H/zero/constant

18 p3260 A70-36941

Geomagnetic activity relation to large scale variations in interplanetary magnetic field and solar wind deformation velocity, using satellite and space probe observations

19 p3491 A70-37304

Spherical harmonic analysis of geomagnetic field strength for global magnetic anomaly charts

19 p3408 A70-37317

Nondipole geomagnetic field effect on magnetosphere boundary, presenting graphs for distance dependence on polar angle

19 p3409 A70-37321

Geomagnetic field variations recording by two variometers, correcting for variation components effects by instruments orientation

19 p3420 A70-37335

Earth magnetic field, discussing origin, field absence on planets and moon and MHD theory

19 p3410 A70-37399

Solar wind disturbances associated with solar activity observed by spacecraft probing interplanetary space, considering geomagnetic activity classes

19 p3494 A70-37478

Magnetic and electric field changes across earth bow shock and magnetosheath, discussing Pioneer 8 andOGO-5 data

19 p3494 A70-37483

Auroral phenomena interdisciplinary investigations, discussing electron precipitation and conjugate point drift due to geomagnetic axis position variations

19 p3411 A70-37493

Geomagnetic activity effect on potential gradient and air-earth conduction current density

19 p3413 A70-38000

Semiannual oscillation and fine structure of earth magnetic field horizontal intensity during March and September

19 p3413 A70-38004

Cretaceous rock paleomagnetism from Israel lava fields, determining original magnetization directions

19 p3413 A70-38034

Night airglow oxygen red lines predawn enhancement calculations, confirming role of photoelectrons from magnetic conjugate ionospheric

19 p3414 A70-38380

Lunar perturbations in horizontal geomagnetic field, F 2 layer thickness and electron density, discussing tidal variations

20 p3617 A70-39141

Soviet papers on relations between earth troposphere phenomena and solar activity covering geomagnetic and stratosphere perturbations, warmings and circulation, solar cycles, etc

20 p3618 A70-39181

Geomagnetic perturbation indices indicating different solar corpuscular streams and heliogeophysical properties

20 p3618 A70-39182

H sub 500 field features during natural synoptic seasons in Northern Hemisphere, including circulation characteristics

20 p3663 A70-39271

Geomagnetic field configuration and magnetic drift envelopes of particles with various pitch angles at equator calculated from two-dipole model of magnetosphere

20 p3619 A70-39299

Plasmapause motion in equatorial plane under sudden dawn-dusk field with constant solar wind-magnetosphere interaction

20 p3620 A70-39341

Adiabatic bounce periods of particle gyrophase coherence in earth field for cyclotron echo and triggered emission analyses

20 p3621 A70-39343

Inner magnetosphere magnetic field mapping, deriving Pogo model

20 p3621 A70-39349

Computer program transforming spherical harmonic coefficients into arbitrarily tilted coordinate systems, tabulating coefficients of International Geomagnetic Reference Field 1965 in dipole coordinate system

20 p3621 A70-39353

Steady state magnetic and electric fields in magnetosheath by linear superposition of field vectors, using axisymmetric velocity function from gas dynamics

21 p3815 A70-41063

Low latitude observations of spread F echoes and stationary satellite scintillations, correlating with ionospheric disturbances and geomagnetic activity

21 p3818 A70-41097

Geomagnetic field upward calculation in lower ionosphere, discussing accurate data acquisition difficulties in Dirichlet problem solution

21 p3819 A70-41294

Sporadic E formation correlation to geomagnetic activity from ionospheric radio absorption observed at midlatitude and polar zone stations

21 p3819 A70-41304

Spherical harmonic analysis of declination and secular geomagnetic variation

21 p3820 A70-41884

Earth magnetic dipole represented by Rikitake two-disk MHD dynamo system

22 p4013 A70-42633

Nighttime and daytime midlatitude magnetic bays statistical correlations with riometer-auroral absorption, suggesting precipitating particles role

22 p4018 A70-43107

F region electron content day-to-day changes observation by Early Bird satellite, determining cross correlation with magnetic indices

22 p4020 A70-43161

Geomagnetic axial dipole deviation from true north associated with earth core asymmetric motion, discussing geomagnetic reversal

22 p4020 A70-43231

Geomagnetic daily variations analysis in terms of universal time components, considering solar wind-magnetosphere interactions, auroral zone effects, etc

22 p4021 A70-43278

Lunar tidal effects on horizontal magnetic field compared at equatorial and midlatitude stations

22 p4021 A70-43279

Interplanetary magnetic field directional variation effect on polar caps geomagnetic field, discussing polarity reversals

22 p4022 A70-43285

Geomagnetic variations origin from satellite space probe data, correlating DP 1 activities to interplanetary magnetic field variations

22 p4022 A70-43286

Solar wind properties correlated with geomagnetic activity, discussing interplanetary discontinuities, shock waves, flare associated disturbances and geomagnetic activity sequences

22 p4022 A70-43288

Solar and geomagnetic events for maximum solar activity year 1968, correlating magnetic storms

22 p4022 A70-43290

Monograph on MHD, covering fluid layer stability under adverse temperature gradient, geomagnetic field origin, vector relations, etc

22 p4084 A70-43448

Proton energy angular distribution measurement by OV2-5 research satellite confirming model of shell splitting in geomagnetic field

23 p4236 A70-43832

E region winds response to solar radiation variations, including geomagnetism role

23 p4186 A70-43848

Ionospheric electron trough and magnetospheric plasmopause movements from satellite observations, showing statistical correlation with geomagnetic field

23 p4186 A70-43854

Geomagnetic Sq variation examination, using field expansion into natural orthogonal component series

23 p4188 A70-44063

Laminar geoelectromagnetic field excited by coaxial circular current, determining impedance and magnetic field ratios of spherical harmonics

23 p4189 A70-44064

Magnetic declination data, using spherical harmonics to examine global and secular geomagnetic field variations

23 p4189 A70-44067

Geomagnetic field behavior prediction based on extrapolation of magnetic data collected by observatories and dipole model approximation

23 p4189 A70-44068

Lower ionosphere electromagnetic induction effect on geomagnetic field guided MHD wave propagation, considering Hall effect

23 p4189 A70-44072

Particle motions in magnetic field, demonstrating existence of adiabatic region in particle phase space for Van Allen belt region

23 p4238 A70-44898

Magnetic field and electron flux observations near magnetopause via magnetometer and triaxial electron spectrometer onOGO-E

24 p4328 A70-45350

Geomagnetic activity dependence on angle between earth-sun and hourly averaged vectors of interplanetary magnetic field

24 p4405 A70-45523

Solar corpuscular flux and visible solar spot area correlation with geomagnetic planetary index for 27-day intervals, considering relationship to earth satellites motion

24 p4408 A70-45547

Outer belt electron intensity variations related to geomagnetic activity indices, using Elektron measurements

24 p4398 A70-46276

Polar auroral hydrogen emission intensity dependence on K index of geomagnetic activity

24 p4331 A70-46288

Polar storm simultaneous onset and development, using observational data for geomagnetic field and aurorae

24 p4331 A70-46289

Polar cap elementary magnetic disturbance relationship to auroral electrojet

24 p4331 A70-46290

Magnetosphere boundary altitude dependence on longitude, considering role of electric current density along geomagnetic lines of force

24 p4331 A70-46292

Geoactive ionizing radiation emitted by solar flares having metallic spectral lines of various brightness intensities

24 p4398 A70-46294

Geomagnetic field influence on annual F 2 layer longitudinal ionization at midlatitudes, relating solar activity level

24 p4331 A70-46300

Geomagnetism-sporadic E layer relationship, discussing critical frequencies and H component variations

24 p4332 A70-46311

Geomagnetic storm intensity nonuniform relationship to 27 day and 11 year cycles

24 p4332 A70-46315

Geomagnetic short period oscillations occurrence frequency during IQSY, discussing dependence on magnetic activity and time of day

24 p4332 A70-46317

Errors magnitude in quartz variometer readings resulting from variations of geomagnetic field perpendicular component

24 p4339 A70-46319

High temperature solar energy converter cavity absorbers geometry, considering absorption parameters of radiation reflected by concentrator

01 p0010 A70-10761

Foreign gas injection and slot geometry influencing film cooling effectiveness

01 p0219 A70-11182

Geometrical interpretation of motion of body about fixed point in Hess case based on Kharlamov kinematic equations, using special coordinates system

01 p0144 A70-11428

Focal length-to-aperture ratio for maximizing collection of scattered light at right angles to illuminating laser beam used in Raman spectroscopy

02 p0311 A70-11888

Geometrical determination of real roots of equations applied to linear oscillator and gyroscope in gimbal suspension

03 p0484 A70-13374

Axial geometry deformations of laser resonator due to fabrication errors and misalignment during operation

03 p0502 A70-13748

Two dimensional plasma modes involving geometry and velocity spaces, discussing Vlasov equation

05 p0890 A70-17025

Eigenvalue corresponding to decaying modes for wave equation in exterior of obstacle investigated for dependence on obstacle geometry

06 p1095 A70-18474

Theory for describing rotating fluid planets external geometry in state of hydrostatic equilibrium, noting role of equipotential surfaces

06 p1153 A70-18559

Geometrical-mechanical properties in terms of interlaminar shear stress of composite cantilever beams under end load

07 p1412 A70-19965

Radiation detector geometrical factor approximation for cylindrical bodies, observing convergence for right square and circular cylinders

07 p1286 A70-19971

GEOPHYSICAL OBSERVATORIES

Unified geometric description of gravitational and electromagnetic fields, determining electromagnetic field influence on geometry from dimensional constant

08 p1546 A70-21811

Geometry effect on short beam tests for interlaminar shear strength of composite materials

08 p1529 A70-21882

Glass fiber reinforced epoxy laminate specimens tests in tension and flexure at various strain rates to determine geometry effect on strength

08 p1532 A70-21898

Continuous media geometry with given discrete structure reduced to analyzing relations between functions in denumerable set of points, presenting selected points of subregions

10 p1954 A70-24016

Plane cavity geometry behind plate in incompressible potential flow, deriving geometrical functions to obtain desirable shapes

13 p2390 A70-29645

Geomagnetic tail formation, cross section and length and auroral irradiation, discussing observations, models, vacuum magnetic merging and field aligned currents processes

13 p2402 A70-30060

Deformed parabolic mirror antenna equivalent geometrical parameters based on known points coordinates on real profile of reflector

14 p2563 A70-30147

Plasticity limit theorems applicability extended without geometry change requirement, discussing load elastic buckling and fiber pullout from composite materials

17 p3186 A70-34977

Geometrical interpretation of controlled evolution of optical systems with mixed state constraints, using Pontryagin and variational methods

19 p3542 A70-38056

Coordinate sequences for regions with complex geometries and various boundary conditions, using linear operators

19 p3460 A70-38940

GEOMORPHOLOGY

Earth photographs for geotectonic research from manned orbiting spacecraft, describing Apollo and Gemini belts

[AAS PAPER 69-579]

04 p0677 A70-14663

Geometrical analysis of partial fusion in earth crust and mantle formation, discussing solid solution and boundaries in MgO-iron oxide-silicon dioxide system

09 p1670 A70-23398

Morphology of thermal and energetic particles in inner magnetosphere during geomagnetic disturbances and solar cycles

14 p2630 A70-30358

Soviet papers on morphology of quiet and perturbed ionosphere covering electromagnetic phenomena, measurements, etc

18 p3245 A70-36084

Lunar geomorphological map technique, discussing lunar rock formation classifications

19 p3516 A70-37981

Lunar geomorphological charts of Mare Imbrium southern region, emphasizing crater and maria formations

19 p3516 A70-37983

Lunar geomorphological charts of Mare Nubium northern part, considering structural features in equatorial band

19 p3517 A70-37984

Lunar geomorphological charts of Theophilus and Ptolemaeus walled plains, investigating central region tectonics

19 p3517 A70-37985

Lunar geomorphological charts in Archimedes crater and Appenine and Haemus mountain region, examining duration and stages in Mare Imbrium depression development

19 p3517 A70-37986

Soviet collection of lunar geological and morphological maps and relief tracings, showing tectonic features, craters and surface characteristics

19 p3518 A70-38011

Lunar geomorphic features and mass wasting relation, discussing landslides, rockfalls, debris slides, slump and creep play

22 p4102 A70-42972

Pi 2 type geomagnetic pulsations relationship to auroral zone morphological features

23 p4190 A70-44085

New Mexico Bandera lava tube systems, noting similarities with lunar surface sinuous rilles

23 p4254 A70-44884

GEON [TRADEMARK]

U POLYVINYL CHLORIDE

GEOPHYSICAL OBSERVATORIES

NT OGO

NT OGO-A

NT OGO-B

NT OGO-D

NT OGO-E

NT OGO-F

Hydromagnetic emissions recordings at two Australian stations indicating simultaneous occurrence

10 p1875 A70-24441

Aircraft capabilities as scientific observation platform in astronomy and geophysics, including instrument adaptation and IR absorber problems
22 p4019 A70-43146

GEOPHYSICAL SATELLITES

NT OGO
NT OGO-A
NT OGO-B
NT OGO-D
NT OGO-E
NT OGO-F

Digital telemetry systems for geophysical satellites, describing onboard and ground systems design criteria and experimental results
03 p0451 A70-13837

Laser ranging systems used with retroreflecting satellites in geodetic and geophysical applications
05 p0815 A70-16691

Geophysical parameters of atmosphere and underlying surfaces from outgoing thermal radio emission measurements on Cosmos 243 satellite
07 p1261 A70-18724

Spacecraft and boosters for earth resources surveys, discussing design, payloads, orbits, etc
10 p1950 A70-24641

Space technology applications to earth survey, discussing use of automatic satellites and manned space laboratories for meteorological, geophysical and related purposes
23 p4191 A70-44634

GEOPHYSICS

Solar-terrestrial physics, Terrestrial aspects - IQSY and COSPAR Conference, London, July 1967
01 p0071 A70-10577

Geoscience electronics - IEEE Conference, Washington, D.C., April 1969
05 p0849 A70-16683

Finite element method applied to potential distribution and stress analysis in earth sciences, determining elastic response of rock layer using structural matrix analysis
06 p1055 A70-17606

Geophysical-solar phenomenological interrelationships, considering earth rotation and nutation, sunspot area, earthquake energy, etc
06 p1056 A70-17636

International data exchange guide for solar-terrestrial physics, including listing of stations active during International Years of Active Sun
07 p1377 A70-18937

Earth central region chemical exploration using antineutrino flux produced by natural radioactive isotopes
09 p1761 A70-22985

Geophysical measurement curves mechanical transformation by digitizing curve on punched tape followed by processing in computer
10 p1845 A70-24494

Earth interior structure models using geophysical data in Monte Carlo inversion procedure
11 p2042 A70-25332

Crystal-chemical and geophysical implications concerning earth mantle phase transitions from beta magnesium silicate crystal structure
11 p1994 A70-25333

Project HARP gun-launched projectiles as vertical sounding probes for upper atmospheric meteorological and geophysical measurements, discussing payloads development for high acceleration
11 p2122 A70-26047

Book on statistical processing of geophysical and meteorological data covering independent and autocorrelated data, random processes, check tests, stochastic functions, filtering, etc
11 p2046 A70-26425

Book on space physics covering earth radiation belts, atmosphere, ionosphere, and magnetosphere, solar structure and composition, interplanetary space, etc
12 p2309 A70-27973

Weak magnetic fields in geo- and space physics - Conference, Paris, May 1969
13 p2413 A70-30026

Magnetic induction sensors sensitivity for magnetotelluric surveying in geophysics
13 p2415 A70-30048

Laser applications in geosciences - Conference, Huntington Beach, California, June-July 1969
16 p2925 A70-33013

Atmospheric turbulence effects on optical communication systems in geosciences
16 p2900 A70-33019

Algebraic manipulation of empirical relationships between geophysical parameters, discussing invalid results
17 p3080 A70-35760

Temporal and spatial covariation of high latitude geophysical phenomena, using unified mechanism of solar plasma stream interaction with geomagnetic field
18 p3247 A70-36404

Airborne IR scanner as geophysical research tool depicting surface emission and heat mass transfer
18 p3259 A70-36558

Soviet book on aerial photo plotting of aerogeophysical routes and anomalies covering techniques, equipment, low altitude surveys, etc
19 p3410 A70-37408

Surface waves free period partial derivative correlation and relation to resolution of gross earth data
19 p3414 A70-38374

Earth exospheric plasma distribution, relating solar eclipses effects to geophysical phenomenon
19 p3418 A70-38904

Geomagnetic perturbation indices indicating different solar corpuscular streams and heliogeophysical properties
20 p3618 A70-39182

Geophysical environment, discussing vibrations, foundation conditions, local gravity vector and atmospheric conditions in relation to precision instruments tests and operation
20 p3622 A70-39570

Precise sensing systems and instruments calibration with respect to inertial frame of reference for geokinetics
20 p3622 A70-39571

Palaeogeophysics - Conference, University of Newcastle-upon-Tyne, England, April 1968
21 p3921 A70-41969

Gravity and magnetic geophysical prospecting methods, discussing data acquisition, reduction and analysis in terms of underground geologic anomalies
22 p4018 A70-43086

Space and astronomic methods applied to solid earth and ocean physics
22 p4025 A70-43669

Collisionless plasma shock wave structures from geophysical and astrophysical phenomena standpoint, describing tarantula experiment
23 p4225 A70-44184

GEOPOENTIAL

NT GEOPOENTIAL HEIGHT

Earth potential errors from gravity and satellite motion measurements, discussing sectoral, tesseral and zonal harmonics with large and small second indices
03 p0473 A70-13190

Coefficients of Legendre polynomial expansion of earth gravitational potential, using Stokes problem solution
03 p0474 A70-13344

Earth external gravitational potential expressed as infinite series of spherical harmonics, using transformation property on coefficients
03 p0478 A70-14178

Spherical harmonics expansion for earth surface and outer space geopotential by mapping earth surface onto sphere
05 p0837 A70-15926

Resonance effects on satellite orbits due to tesseral harmonics in potential field
05 p0908 A70-16335

Error analysis of resonant orbits for geodesy, discussing high order geopotential coefficient recovery by resonance and gravity model errors
05 p0909 A70-16341

Earth figure parameters from satellite orbit dynamics, including potential on geoidal surface and scale factor for lengths
05 p0840 A70-16638

Geopotential zonal harmonic coefficients determined from satellite orbit perturbations, using spherical harmonics orthogonality
05 p0840 A70-16639

Prognostic maps of geopotential and wind in middle troposphere derived from hydrodynamic equations
07 p1330 A70-20307

Numerical procedure for determining horizontal wind from geopotential height in barotropic model, discussing solutions for resultant simultaneous equations
08 p1540 A70-21968

Geopotential resonance effects on low altitude satellites orbit determination, analyzing GEOS 2 orbit variations to determine even-degree coefficients
10 p1939 A70-24189

Simple layer model of geopotential from satellite-borne Baker-Nunn camera observations
10 p1876 A70-24645

Harmonic functions defining geopotential and gravity derived from satellite orbit dynamics, applying to earth shape parameters
13 p2398 A70-29208

Geopotential fields seasonal statistical analysis over first natural synoptic region, using expansion into orthogonal eigenfunctions
13 p2446 A70-29674

First order node to node satellite orbital elements perturbations due to arbitrary zonal geopotential harmonic, determining computation methods and time
14 p2638 A70-30703

Coefficients of Legendre polynomial expansion of earth gravitational potential, using Stokes problem solution
14 p2573 A70-30719

Gravitational field representation in satellite geodesy by simple layer potential, comparing with geopotential expansion in spherical harmonics
15 p2722 A70-31548

Triaxial earth attraction potential from expanding certain elliptical functions into series, noting consistency with concepts of astronomy and geodesy
15 p2731 A70-32148

Earth gravity field from successive satellite passages, introducing direction and range observations of first passage
17 p3154 A70-34683

Geopotential fields forecasting on isobaric surfaces over Northern Hemisphere by linear four level nonadiabatic model, discussing eddy transport and heat flux equations
20 p3662 A70-39179

Resonant and nonresonant satellite eccentric orbits for determination of high order terms in geopotential
20 p3709 A70-40073

Statistical interpolation for numerical analysis of middle troposphere AT potential based on geopotential and wind observations
24 p4371 A70-45135

Satellite orbital elements calculation using ellipsoidal harmonics for geopotential representation
24 p4406 A70-45531

Geopotential zonal spherical harmonics coefficients revised values determined from reduced Baker-Nunn observations for satellites
24 p4407 A70-45538

Tesseral harmonics of geopotential and station coordinates from combined Baker-Nunn, laser and range data from satellites
24 p4407 A70-45538

GEOPOENTIAL HEIGHT

Geopotential fields expansion on 500 mb surface for hemisphere in terms of Chebyshev polynomials along meridian and trigonometric polynomials along latitude
07 p1329 A70-19648

Real time global temperature and geopotential height profiles acquisition from satellite spectrometer measurements by least squares regression method
21 p3820 A70-42121

GEOS 1 SATELLITE

GEOS A and OGO-4 satellite orbits and trajectory analysis using Definitive Orbit Determination System, discussing tracking stations error role
24 p4407 A70-45536

GEOS 1 satellite short arc optical observations over North American network to improve survey coordinates of tracking stations
24 p4312 A70-45542

GEOS 2 SATELLITE

Attitude performance of GEOS 2 gravity gradient spacecraft, discussing prelaunch design and post-launch analyses
06 p1154 A70-17162

Geopotential resonance effects on low altitude satellites orbit determination, analyzing GEOS 2 orbit variations to determine even-degree coefficients
10 p1939 A70-24189

GEOSTROPHIC WIND

Jupiter upper atmosphere cloud bands zonal motion velocities, examining barotropic stability criterion and geostrophic balance hypothesis
02 p0368 A70-11828

Nongeostrophic baroclinic stability theory predictions test experiment with vertical heating provision, describing fluid motions
02 p0289 A70-11830

Geostrophic baroclinic flow with zonal magnetic field in beta plane channel, analyzing instability, phase velocities, Alfvén-Rossby waves and Eady problem
02 p0291 A70-11284

Cyclone waves development during stationary long wave basic state two dimensional quasi-geostrophic two layer model
03 p0521 A70-14288

Hydromagnetodynamic equations of two dimensional unsteady geostrophic wind field in turbulent ionosphere
04 p0680 A70-15254

Pressure changes associated with surface friction and geostrophic drag coefficient related, discussing mass inflow and outflow
05 p0837 A70-16151

Jupiter geostrophy indicated by circulation, vorticity and Rossby number determined from Great Red Spot observations
08 p1580 A70-21573

Geostrophic wind vector rotation correlated with precipitation and circulation in vertical solenoid field
11 p2076 A70-26074

Lower atmospheric layer temperature and wind vertical distribution effect on wind velocity ratio to geostrophic wind at earth surface
13 p2444 A70-28586

Barotropy, baroclinity and baroclinity induced variations of geostrophic wind vector with altitude within planetary boundary layer
14 p2604 A70-30546

Upper level frontal zones geostrophic approximation theory based on scale analysis and case study diagnosis
15 p2769 A70-31442

Winter stratospheric circulation quasi-geostrophic model based on joint radiative-photochemical equilibrium, investigating ozone cycle and warming
16 p2945 A70-33250

Thermotropic quasi-geostrophic atmospheric model, deriving linear and quadratic integral invariants 19 p3463 A70-38754

Atmospheric circulation two level quasi-geostrophic model, examining dynamic large scale features of baroclinic wave blocking by high latitude cold anticyclonic cells 20 p3621 A70-39372

Coriolis parameter effects on stream and pressure functions in geostrophic wind equation 22 p4065 A70-43167

GERMANIUM
NT SILICON
NT TELLURIUM
NT TELLURIUM ISOTOPES

Photoconductivity and photomagnetic effect measurements in Ge for determining nonequilibrium current carrier concentration produced by Q switched neodymium laser 01 p0107 A70-10099

Electric characteristics and impurity distribution in GaAs-Ge heterojunctions obtained by deposition on p-type Ge 01 p0155 A70-10143

Ge bolometer cooled by liquid helium 3 to near absolute zero to achieve high sensitivity for far IR detection 01 p0091 A70-10910

HF admittance and noise in forward-biased majority carrier Ge-Si n-n heterojunctions and Schottky barrier 03 p0539 A70-13159

Ge films crystallinity deposited on Ge substrates in vacuum as function of deposition rate, substrate temperature and thermal treatment and background O pressure 03 p0543 A70-14204

Single crystal Ge surface etching characteristics using laser beam reflection pattern 05 p0860 A70-16656

Reactive scattering from solid surfaces, discussing atom beam reaction of O with heated Ge and Si single crystals 07 p1342 A70-20117

LEED pattern and germanium surface conductivity during oxidation indicating electron states annihilation 09 p1738 A70-22215

Electron tunneling into amorphous Ge films using Al-aluminum sesquioxide-germanium tunnel junctions, observing conductance dependence on bias voltage 09 p1739 A70-22918

Transverse Dember effect in elastically bent Ge single crystal illuminated by light beam, considering EMF distribution and photocell application 09 p1740 A70-23191

Ruby laser illuminated Ge recombination radiation intensity measured at room temperature 12 p2286 A70-27369

Radiation defects in Ge single crystals surface layers caused by low energy bombardment with He ions 12 p2287 A70-27486

Cryogenic Ge bolometers sensitivity variation and noise, noting radiation absorption by sensor and by coating 12 p2237 A70-28151

Epitaxial Ge deposits on Si control by Kikuchi pseudolines, considering surface polish, crystallinity and substrate orientation 13 p2470 A70-28957

Metal-Ge n-type semiconductor tunnel junctions, discussing Sb and As doped units and conductance and barrier heights air cleavage effects 14 p2626 A70-30482

GaAs-Ge heterojunction transistors with microwave planar geometry, calculating performance for comparison with Ge homojunction transistor 14 p2556 A70-30925

Nickel-doped p- and n-type Ge hot electrons recombination characteristics in strong electric fields, examining electron capture cross section 15 p2782 A70-31628

Ge and Si hemispherical emittance, showing doping and temperature effects 15 p2784 A70-32055

Growth mechanism and crystal structure of Ge films deposited from molecular beam onto GaAs, Si and Ge substrates 18 p3297 A70-36415

Ge and Si surface electrical properties, discussing conductivity, field effect, work function, current carriers, photoconductivity, photocurrent carrier capture, etc 19 p3483 A70-37297

Fe meteorites with high Ge content, tabulating concentrations of Ni, Ga, Ge and Ir 23 p4241 A70-44259

GERMANIUM ALLOYS

Si-Ge air-vacuum thermocouples for thermoelectric conversion, describing construction materials,

mechanical and electrical properties, radiative heat transfer operation, etc 10 p1807 A70-24896

Thermoelectric generators design, discussing Si-Ge air-vac thermocouple configurations, compression modules, thermal losses, etc 10 p1808 A70-24897

German monograph on use of Ge as oxidation resistant refractory materials alloy component covering base materials, test samples processing methods and apparatus, etc 24 p4367 A70-45525

GERMANIUM COMPOUNDS

GeTe thermoelectric power, electrical/thermal conductivity and expansion coefficient measured at 20-600 C, determining suitability as thermoelectric material 01 p0158 A70-10755

Nonstoichiometric GeTe defects nature from band structure analysis based on two carrier model 02 p0350 A70-11698

GERMANIUM DIODES

Ge IMPATT diodes under pulsed operation to produce LF high efficiency oscillations, recording current and voltage waveforms 05 p0821 A70-16417

Germanium p-n-p-m transistor frequency oscillation dependence on emitter current, noting forced air cooling effect 09 p1741 A70-23354

Planar Ge and Si diodes application in pulsed bridge elements, investigating current-voltage and resistance-voltage characteristics 11 p2015 A70-25350

Planar Ge and Si diodes application in pulsed bridge elements, investigating current-voltage and resistance-voltage characteristics 20 p3600 A70-40462

Low temperature Ge diode thermometer with computer circuit transforming voltage to temperature readout 21 p3828 A70-41473

GERMANIUM RECTIFIERS

GERMANY

German society of aeronautics and astronautics, yearbook 1968 03 p0411 A70-13789

German light aircraft construction industry situation and prospects regarding manufacture of gliders, sport-ing and touring aircraft and motor gliders 03 p0413 A70-13791

Rotor propelled aircraft development in West Germany, analyzing military and civil demand for rotor aircraft, light helicopters and V/STOL transports 03 p0413 A70-13793

V/STOL supersonic fighter VJ 101, transport Do 31 and VTOL fighter/reconnaissance VAK 191 development in West Germany, discussing control and stabilization during hovering 03 p0413 A70-13794

German VTOL transport aircraft projects, discussing Dornier 231/lift by turbojets/ and Bolkow 140/swiveling wing with gas turbine propellers/ 04 p0623 A70-14955

German developments in electric propulsion and energy supply systems for commercial satellites in geostationary orbits [DGLR-69-20] 04 p0735 A70-15169

German transport VTOL projects, discussing VC-500 swiveling wings with turbine powered propellers and HFB-600 blade cascade flow deflectors for vertical takeoff 04 p0623 A70-15349

Electronic search and rescue system developed for West German Air Force, consisting of personal transceiver and automatic distress signal transmitter unit, etc 05 p0793 A70-15904

German research institutes activities in fluid mechanics, structural materials, propulsion, flight control and electronics, space physics and medicine 05 p0829 A70-16374

German aeroballistic hypersonic test facility with moving model and rest atmosphere, describing acceleration mechanism and several tests 06 p0965 A70-17246

Max Planck Institute of Astronomy /Germany/ installations and equipment planned 06 p1029 A70-18024

Azur satellite program, describing NASA- German cooperative effort 07 p1391 A70-18815

International air traffic jurisdictional area of German aeronautical law regarding aircraft equipment regulations and residents 07 p1427 A70-18886

German Research Establishment for Air and Space Navigation covering aerodynamics, aircraft design, flight mechanics, guidance and jet propulsion 07 p1249 A70-19671

West German space research programs, discussing ESRO and ELDO, industry participation, ground support facilities, personnel recruitment and training, etc 08 p1568 A70-20607

German satellite ground station system central station design, discussing cooperation between aerospace institute and electronic company 08 p1481 A70-21368

Digital data display system designed for central station of German ground station system 08 p1462 A70-21369

Regional air traffic in Germany, discussing aircraft, airports, growth rate and control 10 p1970 A70-24199

Photographic satellite plates reduction by astrometric method at geodetic institute at Potsdam, discussing star coordinates, astronomical refraction, etc 11 p2008 A70-26200

Azur satellite flight results, noting trajectory accuracy telemetry reception, yo-yo triggering and attitude control 13 p2505 A70-28766

Aeros aeronomic satellite mission, orbit and design for upper atmosphere observations, noting braking field analyzer for ion and electron speed measurement 13 p2505 A70-28767

Report to COSPAR on East German space research including Intercosmos satellites scientific apparatus preparation, meteorological and ionospheric research, etc 15 p2830 A70-31712

West German aircraft bird hazards problems, discussing research activities and recommendations for strike avoidance 18 p3349 A70-35980

Hypersonic wind tunnel facility for hypersonic aircraft and recoverable booster systems development [DFVLR-SONDDR-19] 23 p4178 A70-44799

GERMICIDES

U BACTERICIDES

GERMINATION

Spore and vegetative cell adenylate kinases of Bacillus subtilis proved indistinguishable by polyacrylamide gel electrophoresis DEAE cellulose chromatography 01 p0021 A70-10789

Seed germination in simulated planetary atmospheres, considering biological responses of various organisms 14 p2537 A70-30692

Parental termini-daughter strand linkage in initiation of DNA replication in Bacillus subtilis after thymine-less germination 16 p2847 A70-33060

GETTERS

High sensitivity photomultiplier TWT microwave photodetector with internal lowered secondary electron multiplier and spiral HF getter 09 p1645 A70-22413

Titanium monoxide thin film as low temperature getter, measuring activity coefficient and capacity under ultra high vacuum 15 p2783 A70-31844

GIANT STARS

Isophote flattening functions of elliptical galaxies including identification of giant and dwarf galaxies 02 p0377 A70-12449

Hypotheses for symbiotic stars nature, emphasizing binary with late type giant and hot small star components 03 p0568 A70-13325

Horizontal branch and red giant stars ratio estimated in globular clusters for He abundance 05 p0906 A70-15894

Neutrino emission, mass loss and giant branch termination in young clusters with giants originating from intermediate mass main sequence stars 06 p1138 A70-17277

Red giants age and mass estimation based on K-line luminosities, noting role of metal abundance 06 p1139 A70-17416

Red giants and supergiants intrinsic radiation polarization characteristics 08 p1569 A70-20826

Gravitational radiation detection from pulsating neutron star, considering asymmetries in gravitational collapse of massive stars as origin 09 p1749 A70-21996

Metal-poor stars evolution during hydrogen and helium burning from main sequence to giant branch, estimating relative cluster ages 09 p1755 A70-22507

Free-free opacity of stellar interiors by ion correlations applied to red giant degenerate cores 09 p1755 A70-22510

Low mass star evolution from helium burning to white dwarf, describing red giant and mass loss stages in model 10 p1946 A70-24982

OH radio emission from IR stars, discussing spectra, polarization properties and red giant star model with expanding atmosphere 14 p2641 A70-30881

Red giant model, investigating inclusion of semirelativistic partially degenerate gas characteristics by perturbatory technique 14 p2651 A70-31290

Shock wave propagation through giant star atmosphere, using approximate analytical method 16 p2980 A70-34305

- Red giant star chromospheric activity, discussing Balmer absorption lines and emission lines
17 p3161 A70-34889
- Horizontal branch stars evolution based on mass distributions from comparison with giant branch, investigating evolutionary track characteristics during core helium burning
20 p3702 A70-39019
- Hyades giant stars epsilon and gamma Tau strong line profile analysis, obtaining effective temperatures
21 p3885 A70-40931
- Circumstellar dust cloud model of spectral distribution and anomalous excess emissions in IR T Tauri and red giant stars coincident with photometric measurements
23 p4239 A70-43868
- High velocity stars in Large Magellanic Cloud from spectroscopic observations, including A dwarfs and G-K giants
23 p4240 A70-44212
- Single normal main sequence stars rotational velocities compared with giant, supergiant, Be, A and metallic line stars and Population II objects
23 p4248 A70-44802
- Nitrogen abundance of subgiant nu Indi from observed and computed stellar spectra of CN violet bands
24 p4404 A70-45411
- Old open clusters red giant observations comparison with stellar evolution calculations, discussing proper motions, magnitudes, data acquisition and analysis, etc
24 p4404 A70-45418
- Massive star pulsational stability in He burning phase, investigating opacity variation effects on flux dissipation in outer layers
24 p4405 A70-45419
- Main sequence and giant stars atmospheric structure models, noting metal deficiency effects
24 p4413 A70-46159
- GIBBS FREE ENERGY**
Alloys stacking faults thermodynamics based on Gibbs treatment of interfacial free energy
22 p4124 A70-42726
- GIMBALLESS INERTIAL NAVIGATION**
Stable, soup-can size, field replaceable, plug in/out gyro unit strapped to vehicle body without gimbals
13 p2409 A70-29480
- Self alignment for gimballess inertial navigation system fixed base by generating computer programs from error signals derived from inertial sensors
16 p2946 A70-33302
- GIMBALS**
Flip-flop type intergimbal compensation system for gyroscopic integrators error reduction, obtaining natural oscillations constant amplitude
01 p0092 A70-10987
- Probability theory for gimbal errors in directional gyroscopes upon irregular rocking, using linearization of functions of random arguments
04 p0692 A70-15281
- Axial misalignment control of gimbal pivots and rotors in gyroscopes
04 p0692 A70-15282
- Dual cockpit wide angle visual cue simulator design, discussing sky-earth-sun projector with four axis gimbal drive
10 p1857 A70-24204
- [AIAA PAPER 70-360]
Gimbal influence on three axis gyro stabilized platform in spacecraft guidance during maneuvers
13 p2446 A70-28388
- Viscous friction force moments effect on gyroscope drift in gimbal suspension during base angular vibrations, obtaining drift velocity
15 p2738 A70-32153
- Mariner Mars 1971 gimbal actuator design and life test for autopilot system using hypergolic bipropellant rocket engine
17 p3022 A70-34758
- Gyroscope in gimbal suspension on free base of four solid bodies connected by flat hinges
18 p3259 A70-36593
- Control moment gyro /CMG/ for spacecraft attitude control, determining optimal gimbal angle rate for desired torque
19 p3433 A70-38857
- [AIAA PAPER 70-1042]
Freely spinning satellites gimbal and momentum wheel system, determining stable equilibrium states by analog computer simulations
20 p3714 A70-39547
- [AIAA PAPER 70-982]
Precision gimbaled sensor pointing system calibration data errors due to misalignments and inaccuracies in transducer readout
22 p4040 A70-43587
- GIRDER WEBS**
Rectangular plate girder webs buckling under partial edge loadings, using finite element method for flange-web interaction
08 p1589 A70-21247
- GLACIOLOGY**
Oxygen 18 concentration in Greenland ice core correlation to solar activity index, indicating earth temperature control by solar activity
13 p2489 A70-28909

- Fracture and degree of material removal of glassy body in hypersonic gas flow, considering radiant heat conduction inside body
03 p0516 A70-13391
- Bivalent cations effect on crystallization and viscosity of glazed glass
05 p0871 A70-16592
- Glass filled thermoplastics fabrication techniques and composites, discussing molding compounds and processes, reinforced thermoplastics properties and applications
05 p0873 A70-16605
- Glassy drops identity and moldavites sculpturing origin in Pannonian sediments in southern Moravia
05 p0916 A70-16838
- Silane coupling agents glass-catalyzed hydrolysis without presence of acid, discussing reaction kinetics
06 p1091 A70-17599
- Ar beam scattering and UV radiation from glass target surface with adsorbed gas layer
06 p1112 A70-18274
- Spectral broadening mechanisms for trivalent Eu ions in glass, considering fluorescence and absorption spectra measurements
06 p1127 A70-18640
- Laser pulse power effect on edge absorption of glass filter used for Q switching applications
07 p1299 A70-19855
- Thermal conductivities of glass reinforced polystyrene and polyethylene plastics measured over range of glass concentrations and sizes
07 p1320 A70-19958
- Thermoluminescent glass X ray dosimeter sensitivity tested as function of rigidity of gamma and X radiation, noting compensating filters for incident radiation
08 p1496 A70-21217
- Switching and memory phenomena in semiconductor glasses, thin films and variable threshold metal-oxide-nitride-semiconductor MNOS transistor
08 p1556 A70-21304
- Allende meteorite showing presence of Ca-Al-rich glasses associated with other crystalline phases
08 p1579 A70-21562
- Photolytic reactions mechanism in photochromic glass with silver halide crystals formed during glass manufacture, discussing properties and applications
08 p1499 A70-21683
- Mechanical properties and fracture behavior of chemically bonded glass matrix-metal composites
08 p1521 A70-21699
- Excitation energy transfer processes in oxide glasses containing trivalent Tb ions in combination with other rare earth activators
09 p1738 A70-22137
- F-104 jet windshield components research concerning plate glass optical deviation problems to meet quality standards
09 p1691 A70-22571
- Neodymium spectral line widths in various glasses, studying role of inhomogeneous broadening
10 p1900 A70-24266
- Quartz and alkaline glasses fracture stability in water vapor and aqueous solutions with enhanced surface activity as function of time
11 p2068 A70-25379
- Thermo-optical constant of laser neodymium glasses measured with interferometer
13 p2430 A70-29761
- Lasing characteristics of Nd glass, measuring efficiency, pump threshold energy and absorption under test conditions instability
13 p2431 A70-29873
- Tektite glass in lunar sample from Apollo 12, discussing chemical composition and possible volcanic origin
14 p2642 A70-30983
- Electric conductivity, thermal emf and EPR spectra of oxide semiconductor glasses based on vanadium and phosphorus oxides, correlating unpaired electron and charge carrier concentrations
15 p2784 A70-32201
- Glass bonding techniques for semiconductor strain gages, discussing outgassing minimization, hysteresis and repeatability and operational temperature range extension
15 p2739 A70-32325

- Radioisotopic and complementary surface chemical analysis of coupling agent films on glass surfaces
16 p2917 A70-33375
- Cone crack closure in brittle solids, discussing optical and X ray studies on glass and silicon during unloading
17 p3183 A70-34621
- Glass laser materials characteristics, discussing refractive index thermal coefficient, stress optical coefficients, spontaneous emission, etc
17 p3105 A70-35091
- Surface destruction of glass dielectric by pulsed laser beam, considering plasma clouds, shock waves, ablation and crack formation
18 p3266 A70-36153
- Spaceborne lightweight mirror blanks made from ceramics fabricated from glass crystallization
18 p3263 A70-36559
- Glass switching /Ovshinsky effect/, discussing various theoretical explanations
18 p3298 A70-36956
- Iron phosphate semiconducting glasses, determining electrical and magnetic properties dependence on thermal treatment
19 p3487 A70-37861
- Erasure fission tracks in soda-lime glass, tektite, biotite and apatite by shock loading, determining dynamic pressure and associated temperature effects
19 p3414 A70-38035
- Frequency dependent reversible switching characteristics of glass semiconductors, assuming current control
19 p3389 A70-38070
- Giant pulse neodymium glass laser emission spectrum structure, showing cavity geometry effect on fine structure
20 p3641 A70-39450
- Solid state laser glass filters for absorbing UV light emitted by pumping tubes
20 p3641 A70-39739
- Glass plastic composite electrically heated windshields for aircraft, discussing design, fabrication, qualification testing and service experience
21 p3750 A70-41137
- Petrologic analyses of minerals and glass spherules in Apollo 11 lunar rocks, indicating little fractionation and shallow-level differentiation
21 p3897 A70-41521
- Petrography and shock vaporization origin of Apollo 11 lunar breccias and glasses compared to terrestrial impactites and chondrites
21 p3898 A70-41524
- Compositions of lunar fines, crystalline rock and glass spherules, showing high normative anorthite
21 p3899 A70-41531
- Apollo 11 lunar igneous rocks minerals and glassy phases characteristics, using electron probe microanalysis
21 p3900 A70-41538
- Glass spherule lunar particles and breccia from Apollo 11 site, showing passage through impact generated cloud of hot fragmental material
21 p3901 A70-41541
- Microprobe analysis of glassy spherules from Apollo 11 lunar regolith, discussing zoning, composition and hypervelocity impact formation
21 p3903 A70-41558
- Apollo 11 lunar fines glass spherules magnetic properties, considering soft and hard ferromagnetic components
21 p3918 A70-41681
- Apollo 11 lunar dust small glassy spherules and cylinders examination by interferometry, discussing specular reflection, microcracking, chipping and origin
21 p3919 A70-41682
- High strength glass for aircraft structures, discussing applications to passenger cabin windows

- Glass fiber reinforced polyether composites long time strength under plane stress 07 p1321 A70-20187
- Elastic and optical properties anisotropy in fiberglass reinforced epoxy plates using photoelastic method 07 p1416 A70-20295
- Modulus of elasticity of fiber glass reinforced plastic under transverse bending as function of length-to-height ratio in laminates 08 p1526 A70-20532
- Glass filament reinforced plastics characteristics, considering filament protection during manufacture 08 p1526 A70-20717
- Thermoelastic characteristics of glass fiber reinforced plastic materials, determining temperature dependent deformation of composite plate 08 p1526 A70-21164
- Adhesion characteristics in composites, investigating correlation between short beam and torsion shear tests in glass and graphite reinforced epoxy materials 08 p1531 A70-21892
- Glass fiber reinforced epoxy laminate specimens tests in tension and flexure at various strain rates to determine geometry effect on strength 08 p1532 A70-21898
- Fiberglass-epoxy laminates mechanical behavior under biaxial loading, describing test equipment and procedures 08 p1532 A70-21904
- Fiberglass reinforced plastic laminates shear characteristics determination, giving expressions for shear modulus and tangential stress 09 p1709 A70-22300
- Failure analysis of unidirectionally reinforced fiberglass composites due to winding, using critical stress distribution function 09 p1710 A70-22462
- Single and clad glass fibers radii and refractive indices measurements on basis of laser light scattering 09 p1699 A70-23444
- Temperature fields and thermal stresses in FN fiberglass reinforced textolite under nonstationary unilateral heating, determining stress as function of time and heating rate 09 p1710 A70-23724
- Fiberglass reinforced textolite creep strains as function of stress, temperature and time, noting correlation with theory to 200 C 09 p1710 A70-23725
- Epoxy glass fiber composites pyrolyzates IR spectra as function of time, observing changes in fingerprint region 10 p1828 A70-24065
- Glass-epoxy composites failure mode dependence on matrix characteristics and fiber orientation, observing flexural strength increase with strain rate 10 p1908 A70-25174
- Glass epoxy cross ply laminates with brittle or ductile epoxy matrices tensile tested, comparing mechanical performance 11 p2068 A70-25686
- Heat flow comparator for nondestructive testing of resin-impregnated fiber glass, detecting nonuniformities leading to thermal properties variation 11 p2059 A70-25764
- Radiative heat transfer due to radiation conductivity and transmission in low density glass fiber insulations by heat flowmeter for hot and cold surfaces 11 p2148 A70-25769
- Thermoplastics reinforcement with glass and asbestos fibers taking into account fiber properties 11 p2070 A70-25825
- High strength glassy carbon fibers obtained by carbonizing extruded phenol hexamine polymers 11 p2071 A70-26672
- Elastic stiffness of unidirectional glass reinforced epoxy fiber composite determined from ultrasonic velocity measurements 11 p2071 A70-26692
- Residual stresses levels in glass fiber reinforced plastic components after production by compression or winding 12 p2325 A70-27534
- Orthotropic fiberglass reinforced plastic deformation during stretching with allowance for binder breakdown in transverse layer 12 p2259 A70-28283
- Fiberglass plastic reinforced high pressure balloons design and fabrication with oblated ellipsoid of revolution, discussing deformability, strength and cyclic loadings resistance 12 p2328 A70-28285
- Fiberglass content effects on reinforced polycarbonates long term dimensional stability during compression and tension creep tests 12 p2259 A70-28298
- Glass fiber reinforced resin structures and equipment quality and physical/mechanical conditions determined by plastographic analysis 13 p2404 A70-28665
- Fiberglass reinforcement effects on injection molded thermoplastics physical properties, noting role of binder and glass content 13 p2438 A70-29204
- S glass fibers strength characteristics at quasi-static strain rates, considering temperature effects on elastic modulus 13 p2439 A70-29707

Cutting speed, feed parameters and tool tip curvature effects on machined surface roughness of turned fiberglass reinforced epoxy laminates

14 p2590 A70-30873

Heat transfer through axially symmetric boundary layer on moving circular fiber at uniform temperature

15 p2825 A70-31819

Stress distribution in fiberglass unidirectionally reinforced composite material under uniaxial tension

15 p2765 A70-32180

Dangerous plane stressed state surfaces for fiberglass reinforced plastic pipes, using fourth degree polynomial

15 p2766 A70-32852

Stress rupture shear strength of fiberglass reinforced plastics under monotonic, prolonged and cyclic loading

15 p2766 A70-32853

Anisotropic glass fiber reinforced plastics strength and deformability under cyclic axial loads

15 p2766 A70-32897

Fiberglass reinforced anisotropic plastics heating during cyclic axial loading

16 p2934 A70-33215

Diluent resins properties for blending with glass fiber reinforced high density polyethylene concentrate

16 p2935 A70-33353

Friction properties of internally lubricated and glass-fortified thermoplastic resins for gears and bearings

16 p2935 A70-33354

Low cost flame retardant high service temperature glass reinforced electrical grade laminate tested for continuous use

16 p2935 A70-33355

High service temperature glass reinforced premix compound on Glastic grade electrical laminate, discussing optimum molding and applications

16 p2936 A70-33356

Glass fiber reinforced resin structures evaluation by plastographic analysis using visual, macrographic, stereomicroscopic, and scanning electron microscope methods

16 p2908 A70-33361

Moisture induced failure of glass-resin composites at interface, discussing water adsorption, crack propagation, wet strength and nonsilicate reinforcements

16 p2937 A70-33373

Interfacial chemistry of glass fiber reinforced thermoplastics, discussing matrix resin-reinforcement bond

16 p2937 A70-33378

Polymeric binders adhesion to glass fibers as function of type and chemical structure

16 p2938 A70-33379

Fiber reinforced prepreg properties measurements in high modulus graphite/epoxy and fiberglass/ epoxy prepreg sheets and tapes

16 p2938 A70-33386

Glass reinforced laminates fatigue characteristics, discussing differences from metals due to composites anisotropic structure

16 p2989 A70-33420

Joint design for fiberglass reinforced plastic aircraft composites regarding minimum weight and reliability [ASME PAPER 70-DE-56]

16 p2989 A70-33516

Mode locked He-Ne laser nsec pulses propagation along multimode clad glass fibers

16 p2865 A70-34039

Flexural creep deflections of glass fiber reinforced polycarbonate and Nylon thermoplastics

17 p3127 A70-34657

Fiberglass reinforced plastics fatigue properties, describing electric model and nondestructive testing

17 p3183 A70-34658

CH-47C helicopter fiberglass main rotor blade, discussing composite materials impact on design

17 p3013 A70-34702

Temperature and constant compressive loading effects on mechanical characteristics of fiberglass reinforced plastics

17 p3127 A70-35341

Composite wing section design and fabrication utilizing unidirectional glass reinforcement [AIAA PAPER 70-919]

17 p3193 A70-35813

Gliders made of glass fiber reinforced plastics, investigating thermodynamic properties under solar irradiation and surrounding warm air

19 p3454 A70-37370

Glass fiber reinforced cross ply and quasi-isotropic plastics, considering notches effect on fatigue behavior for comparison with metals

19 p3455 A70-37951

Light focusing glass fiber with variable refractive index using ion exchange process, discussing applications to laser communications and data processing

20 p3671 A70-39129

Soviet book on glass staple fibers covering classification, properties, composition, production, tests and industrial applications

20 p3655 A70-39399

Shearing strain in oriented fiberglass reinforced plastics under torsion, obtaining creep curves

20 p3655 A70-39768

Fiberglass reinforced plastics fatigue life, analyzing structural factors role

20 p3655 A70-39891

Glass reinforced plastics /GRP/ mechanical properties degradation by water, discussing effects of temperature, pressure, environment, etc

20 p3656 A70-40056

Contact shaped fiberglass-reinforced plastic tensile creep tests, showing strain property linearity dependence on direction

21 p3841 A70-40642

Multilayer three dimensionally woven fiberglass-reinforced materials, measuring strength and deformation under tension, compression, bending, torsion and shear tests

21 p3841 A70-40646

Unidirectional fiberglass-reinforced plastic, investigating binder content and porosity effects on strength

21 p3841 A70-40647

Thin walled fiberglass-reinforced plastic cylinders in torsion, calculating load carrying capacity as function of temperature

21 p3841 A70-40648

Orthotropic fiberglass-reinforced plastic cylindrical shell with allowance for material creep, calculating stress-strain state during bending under external pressure

21 p3842 A70-40649

Textolite and fiberglass-reinforced plastics relaxation parameters tabulation for viscoelasticity boundary value problems solution

21 p3842 A70-40650

Deformational characteristics of unidirectional glass epoxy composites with ductile and brittle matrices evaluated in flexure

22 p4059 A70-43101

Internal friction and shear modulus of thin glass fibers of sodium silicate, aluminosodium silicate and nonalkaline aluminoborosilicate

22 p4059 A70-43135

Clad glass fibers axial stress measurement by photoelastic techniques

22 p4060 A70-43415

Glass-epoxy composites, measuring embedding filaments effect on time-temperature relationship under ultimate stress conditions

22 p4118 A70-43549

Transverse bending of orthotropic glass fiber reinforced plastic plates under uniformly distributed loads

22 p4120 A70-43720

Mechanical properties and internal stress fields in composite materials reinforced by glass fibrous filler under transverse shear

22 p4061 A70-43724

Prestressed loadings on two layer fiberglass-reinforced plastic cylindrical shell under internal pressure

23 p4265 A70-43937

Stress-strain diagrams for oriented fiberglass-reinforced plastic under tension taking into account temperature and anisotropy effects

23 p4209 A70-43938

Fiberglass reinforced plastic strength and deformation properties under creep and stress relaxation, investigating temperature effects and load duration

23 p4209 A70-43980

Saturn Orbital Workshop experiment for testing chemically rigidized expandable materials and structures for space applications, discussing resin impregnated glass fiber cloth

23 p4264 A70-45012

German monograph on fiberglass, matrix and filler effect on service life of composites with low fiberglass content

24 p4365 A70-45084

German monograph on glass fiber reinforcement effect on soft thermoplastics strength, adhesion and slip properties

24 p4366 A70-45088

Natural dispersion effect on bandwidth of glass fiber transmission line using optical glasses

24 p4319 A70-46079

Thermosetting glass reinforced plastics fabrication and use for pressure vessels, vacuum vessels and pipes

24 p4350 A70-46388

GLASSWARE

Glass drainline development and marketing, describing technology transfer role

20 p3740 A70-39100

GLAUBER THEORY

Hydrogen atom excitation at various energy levels by electron impact, applying Glauber theory

16 p2954 A70-33287

GLAUERT COEFFICIENT

U AERODYNAMIC FORCES

U MACH NUMBER

GLAZES

Bivalent cations effect on crystallization and viscosity of glazed glass

05 p0871 A70-16592

Criticism of hypothesis regarding solar flash heating mechanism creating glaze within lunar craterlets at Apollo 11 landing site

13 p2489 A70-28912

GLIDE ANGLES

U GLIDE PATHS

GLIDE LANDINGS

Subsonic glide landing approach guidance for unpowered lifting vehicles, using perturbation feedback and approximation of heading and position coordinates

[AIAA PAPER 69-865] 09 p1725 A70-23253

Gliding parachute air cargo systems using nonproportional and proportional automatic manual control, estimating wind effects on ground track and impact computer simulation

[AIAA PAPER 70-1193] 21 p3753 A70-41823

Static and dynamic longitudinal stability of semirigid parafoil gliding descent system in pitching motion

[AIAA PAPER 70-1191] 21 p3753 A70-41825

Glide and landing performance of twin-keel parawings, discussing wind tunnel, radio flight and simulator tests

[AIAA PAPER 70-1186] 21 p3754 A70-41829

GLIDE PATHS

Geometrical model for characterizing instrument landing system /ILS/ null reference glide path utilizing CW measuring system

04 p0716 A70-15330

Planetary atmospheric entry optimal three dimensional glide paths, considering polar curve altitude dependence, flight path changes, braking maneuvers, etc

07 p1378 A70-18985

Integrated glide path localizer system for landing, takeoff and enroute guidance through rugged country, minimizing spurious reflection, required information bits, etc

09 p1720 A70-22222

Terminal area guidance for unpowered aircraft instrument approach relevant to manned space shuttle effort

14 p2614 A70-30465

Planetary atmospheric entry optimal three dimensional glide paths, considering polar curve altitude dependence, flight path changes, braking maneuvers, etc [DFVLR-SONDDR-49]

16 p2982 A70-33771

Airborne vertical glide path guidance computer for aircraft landing, using barometric altitude and DME data

16 p2871 A70-34053

ILS glide slope calibration using optically projected digital codes as reference

19 p3464 A70-37912

GLIDE SLOPES

U GLIDE PATHS

GLIDERS

NT BOOSTGLIDE VEHICLES

NT FLEXIBLE WINGS

NT HYPERSONIC GLIDERS

NT PARAWINGS

Wind tunnel comparative performance tests of glider laminar wing profile with fixed and flexible trailing-edge flap

02 p0304 A70-12800

German light aircraft construction industry situation and prospects regarding manufacture of gliders, sporting and touring aircraft and motor gliders

03 p0413 A70-13791

Sigma glider design for high cruising speed, using extensible wing to double area in flight

04 p0622 A70-14625

Schleicher AS-W15 glider wing span, weight, wing loading capacity and speed range, noting performance in international competition

05 p0793 A70-15905

Two place sport gliders development, design reliability and competition requirements

05 p0794 A70-16352

Level flight optimization in horizontal wind varying with altitude, using glider concept and induced drag correction

[ONERA-TP-700] 07 p1193 A70-19131

Favorable air mass type and season for long cross country soaring flights over eastern U.S. determined from record analysis

09 p1718 A70-23062

Motion equations and dynamic lateral stability of towed glider in steady horizontal flight treated by small perturbations method, including design and handling influence

09 p1611 A70-23063

Sailplane design standards concerning retractable undercarriage and trailing-edge flaps revised to achieve better performance

09 p1612 A70-23575

Statistical methods for flying quality research concerning sailplane dynamic stability, maneuverability, sensitivity, rolling and pilot induced oscillations

10 p1805 A70-24582

Glider pilots flight above cloudstreets in clear sky, discussing situation for wave soaring over flat ground

10 p1805 A70-24583

Spanwise distribution of aerodynamic torsion on sailplane wings in vertical dive, discussing wing twist and lift effects

12 p2156 A70-27721

- Glider longitudinal stability and control in symmetrical flight positions, determining flight characteristics 12 p2161 A70-27723

- GOGGLES**
- Laser radiation protective goggle design, investigating retinal energy density levels and attenuation 08 p1451 A70-21046
- GOLD**
- Calorimetric measurements determining total hemispheric emittance of thin gold films as function of temperature, demonstrating film thickness effect [AIAA PAPER 70-63] 06 p1180 A70-18140
- Crystalline structure effect on molecular beam reflection from rough polycrystalline Au surfaces 07 p1343 A70-20123
- Gold and iridium distribution in stony meteorites, discussing metal silicate fractionation process during chondrite formation 13 p2497 A70-29862
- Photoemission from evaporated gold films, measuring quantum yield, photoelectric energy distribution curves and optical density states 14 p2626 A70-30481
- Gold impurity photovoltaic effect in silicon, determining optical cross section for transition 14 p2627 A70-30528
- Au-Pd films boundary structure during diffusion annealing, noting polymerized oil vapor effect originating from vacuum pump 15 p2758 A70-32121
- Thermoelectric power measurement of thin Au films, relating results to transport parameters and internal stresses 15 p2785 A70-32582
- Lattice planes and interplanar spacings of small vapor deposited gold crystals, using transmission electron microscopy 16 p2961 A70-33644
- Shallow acceptor level in Au-doped n-type GaAs, using photoconductivity temperature dependence 17 p3143 A70-35702

- Gold foil surface thermal contact resistance, investigating temperature and pressure effects and elastic and plastic deformation of surface structure
21 p3953 A70-42166
- Crystal growth in polycrystalline Au, Ag and Au-Ag thin films annealing, observing by electron microscopy and electron diffraction
24 p4391 A70-45672
- GOLD ALLOYS**
Gold alloys electrocatalytic activity in cathodic reduction of oxygen in potassium hydroxide
12 p2182 A70-27760
- Specific heat measurements on disordered and ordered phases of Cu-Au alloys at low temperatures
14 p2626 A70-30497
- GOLD COATINGS**
GaAs-Au surface barrier n-type photodiode structure, electrical parameters and response characteristics
12 p2194 A70-26969
- Au films nucleation and growth on single crystal graphite substrates in ultrahigh vacuum, using transmission electron microscopy for examination
14 p2627 A70-30499
- GOLD PLATE**
U GOLD COATINGS
- GONADS**
Brain norepinephrine synthesis rate in gonadectomized and control rats treated with alpha-methyl paratyrosine
03 p0416 A70-12987
- GONDOLAS**
Balloon gondola azimuthal angle control by twisting suspension rope
17 p3090 A70-35315
- Reaction jet azimuth control system for balloon-borne gondola
17 p3018 A70-35316
- GONIOMETERS**
Ultrasonic methods for materials evaluation, discussing goniometry, measuring techniques and acoustic wave propagation in various materials
01 p0104 A70-10878
- GOSS [SUPPORT SYSTEM]**
U GROUND OPERATIONAL SUPPORT SYSTEM
- GOVERNMENTS**
DOD procurement practices for advanced weapon systems, discussing government errors in contracting policies
07 p1428 A70-19678
- Government environment challenges to government sponsored big technology management illustrated by space nuclear engine research program
09 p1792 A70-22494
- Data management functions of National Space Science Data Center (NSSDC), discussing data processing and information system for secondary usage
[AIAA PAPER 70-320] 09 p1641 A70-22866
- Data management functions of National Space Science Data Center (NSSDC), discussing data processing and information system for secondary usage
[AIAA PAPER 70-320] 23 p4285 A70-44514
- GOVERNORS**
U SPEED REGULATORS
- GRADIENTS**
NT ELECTRON DENSITY PROFILES
NT POTENTIAL GRADIENTS
NT PRESSURE GRADIENTS
NT TEMPERATURE GRADIENTS
Multiplier and gradient methods in computing variational and optimal control problems
07 p1325 A70-19267
- Gradient algorithm for sequential identification of features in dynamic linear systems
13 p2383 A70-29582
- High speed dynamic systems synthesis with optimal damping of elastic vibrations, using gradient method
14 p2617 A70-31354
- Sequential and combined gradient restoration algorithms for functional minimization in control theory
15 p2716 A70-32574
- Strain gradient theory for random media, considering equations for response to forcing field
19 p3456 A70-37382
- GRADIOMETERS**
U MAGNETOMETERS
- GRADUATION**
U CALIBRATING
- GRAIN BOUNDARIES**
Martensitic steel (AFC 77) austenite grain size refinement process, noting effects on yield strength, toughness, stress corrosion resistance and fatigue crack growth rate
01 p0120 A70-10739
- FeCo V plastic deformation and fracture, noting temperature and grain size effects on yield and flow stresses, ductile to brittle transition, etc
01 p0123 A70-11244
- TD-Ni low cycle fatigue properties at high temperature, discussing grain morphology, theta particles role and oxidation resistant coating effect
01 p0123 A70-11245

- Backreflection X ray microbeam camera with arrangement for positioning preselected area to study grain boundary during creep by Laue method
03 p0492 A70-13759
- Ductile-brittle transition temperature relation with grain size in polycrystalline Mo as function of annealing temperature
05 p0862 A70-15907
- Impurities effect on grain boundaries composition and brittle fracture of metals
06 p1087 A70-17608
- Ni-Cr alloys effects of grain size and surface deformation on oxidation properties at high temperature
06 p1088 A70-17610
- High melting point oxides effects on niobium alloys recrystallization temperature and grain growth
07 p1303 A70-18741
- Prestrain effect on cavity formation at grain boundaries causing creep strength decrease
07 p1307 A70-19392
- Heat resistant alloys creep ductility, considering grain boundary cavitation, sliding and migration
09 p1701 A70-22554
- Creep behavior transition analysis, considering activation energies and creep rate dependence on temperature, stress and grain size
09 p1704 A70-22720
- Cellular structure and grain size effects on mechanical properties of strained and recrystallized chromium
10 p1902 A70-23862
- Grain boundary grooves growth kinetics in pure CoO at high temperatures, determining diffusion species and mechanisms
12 p2255 A70-27603
- Al-aluminum oxide composite steady state creep due to grain boundary sliding, accounting for activation energy level
12 p2258 A70-28348
- Ceramics microcrack propagation control through small slab with simultaneous microscopic observation of path and force changes, considering grain boundaries effects
15 p2741 A70-32434
- Grain boundary sliding model subjected to shear strain, discussing effect on mechanical properties
16 p2932 A70-33789
- Elastic interactions between anisotropic crystal dislocations and twin and grain boundaries in Ti
17 p3115 A70-34386
- Unalloyed alpha titanium mechanical properties, emphasizing grain size and interstitial content effects on strain hardening and deformation dynamics
17 p3116 A70-34391
- Grain boundary allotriomorphs growth mechanisms in Al-Cu alloy at high temperatures, indicating interfacial and direct volume diffusion
18 p3271 A70-36027
- Ti-Al binary and Ti-Al-X ternary alloys grain boundary precipitation kinetics and correlation with mechanical properties
18 p3272 A70-36035
- Carbide precipitation and grain boundary migration in solution annealed duplex stainless steel as function of aging time
18 p3274 A70-36050
- Al-Zn-Mg alloys structural transformations by diffraction electron microscopy, investigating grain boundary and dislocation structure as function of heat treatment and chemical composition
20 p3646 A70-39044
- Al alloy stress corrosion susceptibility, examining grain size and anisotropy role
20 p3651 A70-40070
- Ti mechanical properties dependence on grain boundary size and hydride precipitation characteristics, considering transcrystalline and intercrystalline fracture
20 p3652 A70-40179
- Strain component determination for grain boundary sliding influence in creep of alpha iron
20 p3735 A70-40446
- Grain boundary damping characteristics of Cu-Ni alloys solid solutions, discussing height, temperature and activation energy of solute peak
22 p4053 A70-42729
- Intergranular brittleness in powder metallurgy W by Auger Electron Emission Spectroscopy for fracture surfaces chemical analysis
22 p4053 A70-42733
- Steady state creep behavior during multiple deformation process, developing grain boundary sliding relation to grain size
23 p4207 A70-44759
- Maraging steel grain size and externally applied shear stress effects on morphology of martensite formation
24 p4357 A70-45231
- 18-8 stainless steels pitting corrosion, examining grain boundaries influence
24 p4362 A70-46184
- Pure Ni recrystallization, noting stacking faults and parallel sided and thin annealed twins formation during boundary migration
24 p4363 A70-46192

- Grain growth abnormality in Al-Mg ingots with small amounts of Mn and Cr during secondary recrystallization
24 p4363 A70-46197
- Superplasticity, discussing strain rate-flow stress relationship and grain boundary sliding
24 p4363 A70-46218
- GRAINS**
Grain size, forging parameter and microstructure effect on stress-rupture properties of wrought Ni-base alloy
03 p0511 A70-13567
- GRAINS [FOOD]**
Wheat culture continuous subirrigation for life support system applications in spacecraft, discussing harvest yields
17 p3026 A70-35321
- GRAMMARS**
Descriptive pattern analysis methods, considering grammar formalism for broad application
12 p2193 A70-28102
- GRAND TOURS**
Ground-based and onboard guidance and navigation systems for outer planet flyby missions concerning direct, Jupiter swingby and Grand Tour trajectories [AIAA PAPER 70-71] 06 p1104 A70-18194
- Outer solar system exploration, discussing swingby and junction missions, Jovian satellite grand tours, mission energy requirements, etc [AIAA PAPER 70-58] 06 p1147 A70-18229
- Thermoelectric outer planet spacecraft (TOPS) project incorporating adaptable data handling system and self testing and repairing computer with triple redundancy subsystems
11 p1996 A70-25368
- Course correction requirements for ballistic grand tours and outer planet missions, considering trajectory disturbances by random nongravitational forces
13 p2448 A70-28707
- Deep space microwave and optical communications, describing grand tour requirements
21 p3784 A70-40546
- Grand tours navigation system consisting of deep space network radio and onboard TV for future TOPS/Thermoelectric Outer Planet Spacecraft applications
21 p3849 A70-41799
- Automated mission requirements for outer planets, discussing flyby spacecraft, orbiters, atmospheric entry and grand tour missions [AIAA PAPER 70-1246] 24 p4411 A70-45919
- Long life spacecraft design and reliability based on marine practices and advanced system technology project, considering grand tour outer planets mission [AIAA PAPER 70-1247] 24 p4412 A70-45964
- GRANULAR MATERIALS**
Thermal stability of graphite core-solid hydrogen mantle grains determined from temperature and evaporation rates calculated for interstellar space
04 p0743 A70-14398
- Metals, plastics and ceramic materials under erosion by irregular quartz particles, using vacuum whirling [ASME PAPER 69-WA/MET-6] 04 p0704 A70-14762
- Temperature dependence of thermal conductivity of granulated borazon powders measured in He and vacuum
07 p1319 A70-19803
- Decomposition of supersaturated solid solutions in granulated Al alloys with Mn, Cr, Zr, Ti, V and Mo, studying microhardness and electrical resistivity
12 p2258 A70-28274
- Grains impurities effect on interstellar extinction curve from graphite grain model, discussing dirty ice coatings
13 p2489 A70-28915
- Lunar anorthosites Ni-Fe grains from Mare Tranquillitatis, discussing contamination by meteoritic metal, magnetic fractionation and fractional crystallization
19 p3519 A70-38032
- Granular medium particles contact forces distribution measurement by absolute retardation method using photoelastic techniques
19 p3427 A70-38344
- H II region dust grains thermal emission, examining effect on diffuse nebulae
24 p4413 A70-46158
- GRAPHIC ARTS**
Graphic method for classifying EM waves directed by open waveguides, obtaining wave numbers from dispersion equation
05 p0812 A70-16245
- Digital and analog computers applicability to graphic arts noting lack of aesthetic theories
10 p1845 A70-24235
- Symbols design for machine displays based on Gestalt pattern perception theory, considering symbol learning, perceptibility, detail, boundaries, etc
10 p1827 A70-24771
- Regular and irregular line-drawing data processing, discussing quantization and encoding methods
12 p2193 A70-28104

Photographic patterns from brittle coatings, grids, photoelasticity and moire, considering variability, association with other images and esthetic value
19 p3546 A70-38343

Presentation styles of passenger emergency evacuation briefing cards, noting preference for sequential action graphic displays with minimum key wording
23 p4141 A70-44486

GRAPHITE

NT PYROLYTIC GRAPHITE

Relaxation time approximation formulas for galvanomagnetic effects in graphite based on energy spectrum model
01 p0126 A70-10181

Graphite fiber-epoxy resin composites interfacial bonding, describing various surface treatments for increased interlaminar shear strength
01 p0127 A70-10477

Liquid metals contact effect on mechanical strength of T shaped graphite specimens at high temperatures in argon atmosphere
01 p0129 A70-11038

Design allowable curves based on laminate test data for high modulus graphite fiber and resin systems, considering Wagner cantilever beam specimens
02 p0387 A70-11954

Friction and wear tests on solid lubricant graphite fluoride compared with molybdenum disulfide at specific temperatures, considering friction coefficient [ASLE PREPRINT 69-LC-9]
02 p0321 A70-12536

Interlaminar shear stress and fabrication of high modulus graphite-reinforced epoxy matrix composites
03 p0515 A70-13119

Graphite fiber content determination technique for plastic composites based on epoxy, polyimide and phenolic resins, using concentrated sulfuric acid
03 p0515 A70-13123

Graphite rocket engine nozzles chemical erosion at various temperatures, comparing reaction and diffusion rates
03 p0516 A70-13619

Graphite sphere mass erosion in low temperature hypersonic air plasma shock flow, determining breakdown temperature and mass entrainment rates
03 p0517 A70-13741

X ray diffraction method to determine degree of orientation of crystallites in extruded graphite
03 p0517 A70-13964

Rate and heat of vaporization of graphite filaments in 2500-3400 K range in vacuum and in He, using pulse heating techniques
03 p0517 A70-14004

Interstellar polarization by graphite-silicate grain mixtures, observing variability in wavelength dependence of polarization for various models
03 p0577 A70-14218

Thermal stability of graphite core-solid hydrogen mantle grains determined from temperature and evaporation rates calculated for interstellar space
04 p0743 A70-14398

Particle removal in ablation of artificial graphite linked to oxidation, using high speed motion pictures in analysis
04 p0787 A70-15610

Graphite yarn, cloth and fiber composites physical properties tabulated, discussing multiply laminates for graphite-epoxy composites
05 p0873 A70-16610

Creep, ductility and short term tensile and compression strength test facility for graphite in 300-3500 K temperature range
05 p0875 A70-17068

Graphite microstructure effect on ablation performance, discussing grain size, porosity and degree of graphitization
[AIAA PAPER 70-155]
06 p1092 A70-18147

Dynamic elastic modulus of graphites and composites measured as function of temperature using thin rod resonance method
06 p1070 A70-18447

Thermoelectric characteristics of graphite and titanium carbide compared with platinum after prolonged annealing at 2300 C
07 p1316 A70-19661

Interlaminar shear strength determination methods taking into account plastics composition, considering polyester and epoxy plastics, glass and graphite fiber reinforcing materials
07 p1410 A70-19767

Graphite shell molds for Al castings mass production
08 p1505 A70-21135

Solidification thermal conditions during Ti casting by melting out patterns in graphite molds, investigating heat accumulation coefficients in molds
08 p1506 A70-21142

Dynamic tensile properties of monolithic and pyrolytic graphite compared with static tensile strength
08 p1527 A70-21334

Microphotometric spectral reflectivity correlation to static Young moduli of carbon and graphite yarn filaments as optical testing method
08 p1497 A70-21350

Graphite crystals surface ribbed growth in Ni-C solutions due to B content observed by scanning electron microscope
08 p1520 A70-21552

Adhesion characteristics in composites, investigating correlation between short beam and torsion shear tests in glass and graphite reinforced epoxy materials
08 p1531 A70-21892

Creep and rupture of graphite-epoxy composites under unidirectional state of stress and controlled temperature environment, extrapolating long term loading behavior
08 p1531 A70-21897

Graphite fiber/resin matrix composites for airframe structures, studying tensile, compressive and in-plane shear strengths
08 p1532 A70-21901

Local heat transfer to gas mixed with graphite particles described for variable temperature differences and wall temperatures
09 p1787 A70-22174

Energy storage in creep deformed graphite from stress reduction tests, discussing negative creep, test procedures and results
09 p1709 A70-22386

Graphite IR radiator for radiative capacity and flame temperature measurements investigated for life time dependence on ambient pressure and temperature
10 p1888 A70-24257

High modulus graphite fiber structure using electron beam
11 p2071 A70-26845

Nonisothermal burn-up rates of graphite surfaces in turbulent air flow under neutral gas shield estimated by measuring channel diameter
12 p2331 A70-27323

Recrystallization effect on 3-D graphite orientation in carbon fibers under high temperature heat treatment
12 p2259 A70-27720

Reaction rates temperature dependence for artificial carbographites of various densities in oxidizing gas media
13 p2519 A70-28577

Artificial carbographites surface combustion processes using mercury porosimetry analysis
13 p2519 A70-28578

Graphite mass removal rates under ohmic heating in reacting gas turbulent flows
13 p2519 A70-28579

Surface erosion of sublimating graphite and naphthalene due to inequilibrium mass transfer in gas flows
13 p2437 A70-28580

Graphite-carbon dioxide interaction at high temperatures in presence of solid phase diffusion from bulk to reacting surface
13 p2520 A70-28581

Wool felt based carbon and graphite composite materials for orthogonally isotropic high shear strength compared with rayon felt based composites
13 p2437 A70-28776

Phosphorus compounds inhibition effect on oxidation and wear of graphite lubricants
13 p2437 A70-28854

Grains impurities effect on interstellar extinction curve from graphite grain model, discussing dirty ice coatings
13 p2489 A70-28915

Protective coatings with Si-Zr alloys for graphite, discussing wettability, spreading kinetics and impregnation
13 p2439 A70-29503

Nonsimilar ablation of graphite sphere cones under ballistic entry conditions, predicting steady state rate and surface temperature
13 p2523 A70-29975

Au films nucleation and growth on single crystal graphite substrates in ultrahigh vacuum, using transmission electron microscopy for examination
14 p2627 A70-30499

Ca atom-graphite grain model for interstellar absorption at 4430 A, calculating resonant line shift and width as functions of atom-surface distance
14 p2639 A70-30729

WC as densification aid for NbC-C composites, examining fabrication temperature, mechanical properties, solid solution composition, etc
15 p2757 A70-31797

Graphite Shore hardness measurement at high temperature on Joule heated specimens, describing apparatus and procedure
15 p2764 A70-31944

Graphite surface Debye temperature calculation based on crystal lattice dynamics
15 p2765 A70-32024

Carbon-graphite porous materials thermal conductivity at various temperatures
15 p2765 A70-32141

Rocket motor combustion chamber lining thickness distribution matching to effusor by designing effusor as multiple nozzle made of circular graphite plate
15 p2790 A70-32271

Chemical structure and room temperature tensile, flexural and compressive properties of metaphen-

ylene-diamine cured castings for graphite fiber reinforced epoxy resin matrices
16 p2936 A70-33358

Boron, silicon carbide and graphite fibers surface properties
16 p2937 A70-33376

Graphite fiber reinforced polyimide composites with low void content, high strength and modulus
16 p2938 A70-33384

Fiber reinforced prepreg properties measurements in high modulus graphite/epoxy and fiberglass/ epoxy prepreg sheets and tapes
16 p2938 A70-33386

Creep and tensile fatigue behavior of notched and unnotched graphite/epoxy composites
[ASME PAPER 70-DE-32]
16 p2938 A70-33503

Graphite oxidation on exposure to high temperature flow field based on surface coupled model
[AIAA PAPER 70-823]
16 p2940 A70-33941

High pressure ablation of plastic composites and graphites in arc heater, measuring erosion rate, shape change, surface roughness and physical characterization
[AIAA PAPER 70-770]
17 p3193 A70-34482

High strength graphite fiber reinforced polyimide resin composites fabrication
17 p3127 A70-34560

UV interstellar extinction from comparison of epsilon and zeta Persei, noting graphite features
17 p3159 A70-34877

Graphite fibers made from polyacrylonitrile yarn examining density-Young modulus relationship
17 p3127 A70-35149

Graphite modulus of elasticity as function of temperature, considering effects of moisture content in pores
18 p3278 A70-36470

Graphite-epoxy resin cross-plyed composites fabrication, analyzing residual thermal stresses role in cracking
[ASME PAPER 70-GT-84]
18 p3279 A70-36828

Graphite-polyimide composites development for high temperature environments, discussing mechanical properties
19 p3455 A70-38425

Dry face mechanical shaft seal operating on self generated graphitic film without boundary fluid lubrication
[ASLE PREPRINT 70AM 3C-2]
19 p3439 A70-38809

Graphite fiber reinforced polycarbonate composites interfacial adhesion improvement by controlled thermal treatment
20 p3652 A70-39168

High modulus graphite fiber tensile strength and structure, using X ray diffraction
20 p3653 A70-39205

Graphite filament composite structure shear strength decrease with modulus increase, examining fiber microstructure effect on interlaminar properties by short beam shear test
20 p3654 A70-39206

Carbons and graphites ablation tests for predicting performance under reentry conditions, considering microstructure effects
20 p3735 A70-39214

Short graphite fiber classification and orientation control in matrix by electrostatic methods
20 p3654 A70-39215

Graphites erosion by water and carbon dioxide at high temperatures, using liquid rocket simulator for kinetics study
[AIAA PAPER 70-638]
20 p3736 A70-39587

Quartz- and silicate-graphite mixtures carbothermal reduction in vacuum at 1400 C
20 p3583 A70-40425

High strength and modulus continuous graphite fibers from pitch, describing production process from asphalt and specifications
21 p3842 A70-40732

Magnetoresistance nonlinearity and Hall effect in graphite in magnetic field, observing temperature dependence below 4.2 K
21 p3862 A70-40945

High strength graphite fabrics evaluation for flexible structures, discussing temperature effects, fabrication, mechanical properties, oxidation and protective coatings
[AIAA PAPER 70-1183]
21 p3842 A70-41830

Direct electrical heating for high temperature thermal conductivity measurements of pure W, giving results for graphite
21 p3850 A70-42057

Nonisothermal burn-up rates of graphite surfaces in turbulent air flow under neutral gas shield estimated by measuring channel diameter
21 p3952 A70-42064

Ni-Cu-C solid solutions, measuring temperature dependence of graphite solubility by vapor transport method
21 p3841 A70-42149

Thermal variation of diamagnetism and susceptibility of rhombohedral graphite
21 p3845 A70-42268

Graphite fiber oxidation prevention in metal matrix composites, examining various thermodynamic parameters

22 p4126 A70-43676

Graphite and carbon fiber surfaces, correlating Raman spectrum and shear strength of composite

22 p4060 A70-43680

Chemical etching for revealing structure of carbon-graphite materials subjected to different graphitization stages

23 p4209 A70-44045

Interstellar dust clouds, discussing graphite, iron and silicate mixture, solid carbon material, starlight extinction and astrophysical processes

24 p4403 A70-45408

Thermoelectric power and Hall effect quantum resonances in graphite for locating majority carrier electron and hole Fermi Surfaces in Brillouin zone

24 p4389 A70-45597

Graphite dielectric constant as function of frequency, considering electron energy loss anisotropy in UV

24 p4380 A70-45668

Cool star atmospheric structure, discussing models with and without graphite particle inclusion opacity

24 p4410 A70-45765

High temperature coatings of high melting point alloys on graphite, determining optimum fabrication conditions

24 p4368 A70-46339

GRAPHITIZATION

Structural orientation and defects in graphitized coke crystallites, establishing relation between thermal expansion coefficient and macrostructure

03 p0514 A70-12868

Porosity in graphitized polyacrylonitrile-based carbon fibers determined from surface area increase during heat treatment in vacuum

04 p0711 A70-14400

Vacuum condensed thin carbon films graphitization stages using electron diffraction

11 p2068 A70-25381

GRAPHS [CHARTS]

NT PATTERSON MAP

Graphical method for determining sounding rocket altitudes from optical sensor and flux gate magnetometer data

01 p0196 A70-10841

Graphical display of diverse methods of flow predictions by various authors for turbulent boundary layers

02 p0287 A70-12363

Electron multiple scattering theory graphic approximation showing angular distribution in electron beam

03 p0527 A70-13053

Linear functionals over Sobolev spaces and elliptical boundary value problems generated by theorems on homeomorphisms

03 p0519 A70-13505

Graphical solution of optimum trajectories for third order systems depending on single control function, including maximum error and switching time

[ASME PAPER 69-WA/AUT-6] 04 p0661 A70-14828

Dynamical systems with three degrees of freedom, presenting slice cutting and stereoscopic views graphical techniques for restricted three body problem with perturbations

06 p1149 A70-18462

Thermal tolerance and comfort graph for air conditioned spaces with low air velocity, considering fighter plane cockpits

08 p1454 A70-21949

Periodic orbits in highly perturbed dynamical systems, studying characteristic curves of various families in galactic-type potential

09 p1760 A70-22916

Time-temperature charts for one dimensional unsteady conduction with uniform internal heat generation

09 p1791 A70-23567

Transistor bistable multivibrator design by graphic analytic method, considering effects of loading and supply voltages, temperature and component values on circuit performance

10 p1848 A70-23995

Geophysical measurement curves mechanical transformation by digitizing curve on punched tape followed by processing in computer

10 p1845 A70-24494

Optimal directed circuit and cycle elimination in weighted diagraphs by edge reversal orientation

11 p2072 A70-26219

Theorem formulation and proof for maximal length cycle classification by weight

11 p2073 A70-26309

Stratospheric clear air turbulence (CAT) vertical extent above thunderstorm graphically represented

12 p2265 A70-28095

Curve approximation quality by method of informative evaluation for determining minimum required number of measured points on ST interval of electrocardiogram

13 p2360 A70-29775

Graphical plotting of critical Preston tube diameter, allowing for Mach and Reynolds numbers effects and introducing limiting line

14 p2586 A70-30871

Auroral orientation curves evaluation, testing parameters by numerical integration and revised geomagnetic coordinate system

14 p2576 A70-30918

Graph theory in Soviet literature, applications and bibliographies

14 p2600 A70-31421

Euler graphs with special properties, discussing Hamiltonian lines existence and derivatives

14 p2601 A70-31424

Graphical data conversion into code for storage in computer memory

15 p2705 A70-31576

Nonlinear systems absolute stability by graphic methods, noting use of Nichol chart and analog computer

15 p2715 A70-31974

Thermodynamic diagram indicating enthalpy and entropy of oil combustion gases for any state and air excess value

16 p2997 A70-33295

Hazard plotting methods for analyzing service life data with different failure modes

16 p2921 A70-34024

Plane wave reflection decay rate representation by slowness diagrams

16 p2952 A70-34089

Hologram image construction by graphical method

16 p2915 A70-34216

Bulk negative resistance microwave oscillators efficiency calculation by graphical method

17 p3056 A70-35876

Graphical stability for linear systems in parameter plane with time delay

18 p3235 A70-36479

Cassegrain antennas design parameters using graphs for minimum blockage condition

19 p3376 A70-37690

Lunar crater number and density vs diameter graph, showing rhythmical deviations from mean asymmetrical cosine curve

19 p3517 A70-37990

Differential equations approximate solution by interval differential equations, obtaining graphs with analog computer

19 p3459 A70-38931

Nonlinear closed loop systems frequency response determination by graphical method

20 p3605 A70-40122

Functions of two variables, using digital method for curve family modeling

23 p4166 A70-44350

Image forming performance in photographic system design, considering Cobb chart resolution as figure of merit

24 p4334 A70-45449

Cobb chart resolution in photographic system including independent sources of image spread and single source of granularity

24 p4334 A70-45450

Defect size estimation, using ultrasonic angle beam probes and distance-gain-size (DGS) diagram

24 p4343 A70-45689

Ni/sulfuric acid AC voltage polarization curves for anodic dissolution region

24 p4364 A70-46220

Psychrometric chart for physiological research involving moist air thermodynamic properties

24 p4304 A70-46275

Galactic neutral hydrogen velocity distributions from 21 cm line profiles analysis

24 p4414 A70-46382

GRASHOF NUMBER

Free convective flows above flat horizontal plate demonstrating laminar boundary layer existence at intermediate Grashof numbers, using semifocusing color schlieren photography

04 p0780 A70-14456

Heat transfer at low Reynolds and Grashof numbers determined using constant temperature anemometric wire

13 p2521 A70-28952

GRASSES

Remote photometric and spectrometric measurements for plant structure and productivity of grass and shrub vegetation in desert environments

12 p2218 A70-26923

GRASSMANN ALGEBRA

U VECTOR SPACES

GRATINGS [SPECTRA]

NT ECHELETTE GRATINGS

Diffraction plates for classroom demonstrations of Fraunhofer patterns, Babinet principle and Rayleigh resolution by computer generation

01 p0093 A70-11292

Bleached diffraction gratings produced holographically on spectroscopic plates, describing processing and quality

02 p0297 A70-11929

Schlieren system converted into Kraushaar diffraction grating interferometer with isolated optical platform, considering applications to supersonic flow over airfoil shapes

04 p0689 A70-15016

Satellite lines from diffraction grating observed by densitometer tracings of plates connected with optical mixing in stimulated Brillouin scattering

04 p0701 A70-15030

Correctness of Meixner assumption of scattered light field singularity near grating edge due to diffraction

05 p0816 A70-16879

Displacement measurement using single reflecting phase grating

06 p1060 A70-17148

Schlieren system modification using diffraction grating to produce color applied to airfoil flowfield analysis

[AIAA PAPER 70-223] 06 p1029 A70-18165

Diffraction gratings produced by holographic techniques and vacuum metallization to provide high performance

07 p1279 A70-19049

Long wave IR spectrometer with two diffraction gratings for various micron ranges

08 p1493 A70-20544

Permittivity of thin films in millimeter and submillimeter wavelengths measured by diffraction grating method

08 p1464 A70-21985

Mirror-grating system optical properties emphasizing coma-type aberration elimination

09 p1729 A70-23528

Grate spectrometer with high resolution for 20-45 micron range, describing water vapor transmission spectrum

[ONERA-TP-782] 10 p1886 A70-23912

Optical modulation using rotating diffraction grating to obtain frequency shifts

11 p2049 A70-25633

Holographic dielectric gratings analyzed by Raman-Nath formalism modified for losses

11 p2050 A70-25640

Solar horizontal telescope performance improvement by adding birefringent monochromator and diffraction grating

11 p2057 A70-26590

Transmission diffraction grating for astronomical applications constructed holographically with laser light and photoresist films

12 p2234 A70-27589

Grating spectrometer performance in measuring earth IR radiance determined from balloon flights

12 p2235 A70-27752

Plane electromagnetic waves anomalous reflections from diffraction grating with periodic array of rectangular holes in dielectric layer, observing resonant character

12 p2191 A70-28175

Large diffraction gratings by interferometrically controlled commercial measuring machine

13 p2412 A70-29821

Plane parallel perfectly conducting grating by integral equation procedure, presenting equivalent network under multimode propagation conditions

14 p2562 A70-31317

Laser Doppler heterodyning system for velocity measurements without directional ambiguity, employing incident beams of different frequencies through rotating diffraction grating or Bragg cell application

15 p2751 A70-31986

Single beam grazing incidence spectrophotometer with concave diffraction grating for far UV region, emphasizing instrument adjustment

16 p2915 A70-34218

Holographic techniques, investigating ultrasonic fields in transparent media based on light separation by grating into optical moments

16 p2915 A70-34330

Visual contrast sensitivity adaptation to temporal frequencies using high modulation sinusoidal grating

17 p3034 A70-35898

Plane wave diffraction by periodic grating reduced to waveguide problem, determining asymptotic behavior of integral solution

18 p3291 A70-36286

Plane electromagnetic waves diffraction by periodic structure of infinite system of parallel strips, reducing problem to solution of linear algebraic equations

18 p3227 A70-36287

Hemispherical open resonators with plane mirror partially coated by reflecting diffraction grating

18 p3231 A70-36411

Efficiency of holographic gratings in instrumental spectroscopy

19 p3421 A70-37360

Plane electromagnetic wave diffraction by thin metal gratings, using mathematical method of elasticity theory

19 p3376 A70-37712

Plane polarized electromagnetic wave diffraction by dielectric grating, obtaining linear algebraic equations for field coefficients

19 p3376 A70-37713

Polarized plane EM wave diffraction by inclined half plane grating, obtaining transformation matrices coefficients
19 p3376 A70-37714

Wave diffraction by finite dimension grating, determining EM field strength distribution by approximate method
19 p3377 A70-37716

Diffraction grating systems resonance properties, obtaining transcendental equations for natural slow wave and radiation modes
19 p3377 A70-37717

Plane EM wave diffraction by ribbon periodic grating, determining diffraction spectrum wave amplitudes
19 p3377 A70-37718

Plane EM wave diffraction by bounded and unbounded periodic gratings
19 p3377 A70-37719

Diffraction-field structure on two-element gratings in near zone, calculating amplitude, phase and energy flux for normal and slant incidence of EM fields
19 p3377 A70-37720

Plane monochromatic EM wave diffraction by rectangular metal bar tapered grating, examining amplitude and polarization parameters
19 p3377 A70-37721

Ponderomotive forces of plane electromagnetic wave incident at arbitrary angle on metal grating, based on diffraction results
19 p3377 A70-37723

Strain transducer /optical diffraction grating/ for plastic wave propagation measurement along specimens subjected to impact
19 p3425 A70-37884

Strain analysis by moire technique, using triangular and square root of 2 gratings
19 p3432 A70-38720

Printing, electro etching and vacuum deposition stencil methods for preparing moire grids
19 p3432 A70-38721

Gratings as laser wavelength-selective end reflectors, noting application to carbon dioxide and dye lasers
20 p3639 A70-39083

Pulsed ruby free emission mode laser spectrum narrowing, using diffraction lattice adjusted in resonator transversely to beam axis
20 p3643 A70-39757

Electromagnetic wave diffraction at multilayer wire grating, discussing computer program for diffraction field calculation
22 p3985 A70-42399

Light generation by free electrons interaction with metallic diffraction grating, devising experiments for explaining incompatibility with simple electrostatic image theory
22 p4074 A70-42943

Time resolving X ray grating polychromator, discussing photoelectric attachment with surface barrier semiconductor detectors
[SMPT PREPRINT 75] 22 p4037 A70-43069

Wavelength selective carbon dioxide laser using stationary grating to correlate pulses for high J values and line number
22 p4050 A70-43153

Compression of laser pulses reflected from periodic and zone plate gratings
22 p3990 A70-43337

Transparent objects holographic interferometry with illumination derived from phase gratings to eliminate laser speckle
22 p4040 A70-43611

Optical transmission and reflection gratings formed by standing light waves evaporation of thin metallic films in ruby laser cavity
23 p4200 A70-43817

Soft X ray slitless spectrometer with gold-shadowed transmission gratings for rapid astronomical spectral surveys
23 p4196 A70-44418

Double beam diffraction grating spectrometer for vacuum operation over far IR from 40 microns to 1 mm
24 p4339 A70-46323

GRAVIMETERS

Microtopography effects on measuring horizontal gravity gradients by gravimeters
02 p0295 A70-11799

Stochastic processes for probabilistic error analysis in airborne gravimetry, using gravity sensing instruments
22 p4025 A70-43666

GRAVIMETRY

Earth gravity field intensity variations measured by orbiting two geometrically identical satellites, discussing sensitivity and cost
01 p0087 A70-10445

Gravimetric and satellite tracking data reduction for determining coefficients in mathematical expansion representing earth gravitational field
03 p0473 A70-13189

Earth potential errors from gravity and satellite motion measurements, discussing sectoral, tesseral and zonal harmonics with large and small second indices
03 p0473 A70-13190

Satellite surveys and astronomic-geodetic nets for joint terrestrial, space triangulation and gravimetric measurements, including laser distance determination
03 p0445 A70-13191

Geodetic vertical and geoidal height deflection calculated by gravimetric method, considering satellite orbits data
05 p0841 A70-16643

Vertical deflections errors statistical analysis by gravity anomaly measurements, determining autocorrelation functions
18 p3248 A70-36771

Vertical gravimetric deflections calculation based on linear interpolated gravity anomalies
19 p3410 A70-37461

Curvilinear orthogonal coordinates for gravimetric deduction related to Cartesian coordinates as solvability condition for Molodenskii problem
20 p3617 A70-39071

Gravitational experiments in manned spaceflight employing Eotvos balance in orbit and direct force technique
21 p3929 A70-41002

Dynamic gravimetry - Conference, Fort Worth, March 1970
22 p4024 A70-43656

Gravity error propagation in dynamic gravimetry associated with navigation and gradient measurement errors, emphasizing standard error limits in navigation data
22 p4068 A70-43660

DR-S Raydist radio location system in fixed wing aircraft for dynamic gravimetry
22 p4068 A70-43661

Gravity measurement errors in high speed aircraft parallel to undulating geoid attributed to associated vertical accelerations
22 p4025 A70-43662

Integrated helicopter gravity measuring system for various terrains, describing instrumentation and recording monitors
22 p4042 A70-43663

Airborne and surface downward continuation of gravity, discussing integral equations solutions and data filtering of noise interference
22 p4025 A70-43664

Stochastic processes for probabilistic error analysis in airborne gravimetry, using gravity sensing instruments
22 p4025 A70-43666

Gravity measurements and adjustments of First Order Gravity Network /FOGN/ in Iran
24 p4332 A70-46409

GRAVIRECEPTORS

NT OTOLITH ORGANS

GRAVITATION

NT ARTIFICIAL GRAVITY
NT GRAVITY ANOMALIES
NT HIGH GRAVITY ENVIRONMENTS
NT LUNAR GRAVITATION
NT PLANETARY GRAVITATION
NT REDUCED GRAVITY
NT SOLAR GRAVITATION

Air pressure, air density and gravity tables, including corrections for mercury barometer measurements
12 p2222 A70-27008

Gravitational force equation solution, using Levi scheme
13 p2394 A70-28851

Self gravitating three dimensional particles system evolution using water bag model
13 p2498 A70-30012

Gravitating sphere high speed rotation in monatomic gas, discussing viscous and thermal boundary layers, velocity fields, temperature effects and fluid motion
23 p4131 A70-43944

GRAVITATION THEORY

Gravitational theories scheme combining tetrad field with bimetric theories, including general relativity, space-time dependent Lorentz rotations, red shift and light deflection
01 p0141 A70-10232

Field equations in particle neighborhood for spherically symmetric metric in conformal gravitation theory, considering particle inertial mass as function of position
01 p0142 A70-10492

Linear field theory of gravitation by considering gravitational field functions decomposition into spin components
01 p0143 A70-10712

Solar motion effects on planetary orbits, discussing preferred coordinate systems of scalar theory of gravitation
01 p0186 A70-11104

Neutrino in nonquantum and quantum gravitation theories, neutrino sea, etc, discussing classical neutrino dynamics
02 p0341 A70-11669

PostNewtonian equations of Brans-Dicke scalar-tensor theory for n gravitating point masses, using obtained equations of motion for radar tracking
02 p0337 A70-11777

Gravitational theory for disk galaxies, considering radial velocity variations, spiral structure, heat equation verification, etc
02 p0378 A70-12688

Coefficients of Legendre polynomial expansion of earth gravitational potential, using Stokes problem solution
03 p0474 A70-13344

Relativistic tensor theories of gravitation in flat space with Neumann and Newton forms of gravitational potential, deriving expressions to estimate differences perceived by observer
03 p0526 A70-14305

Relativistic stellar structure equations for spherically symmetric configurations in slow motion, using Einstein gravitational field and conservation equations
05 p0912 A70-16454

Hydrostatic equilibrium in self gravitating core of rotating relativistic star, considering Newton and Einstein gravitation theories
05 p0914 A70-16648

Stellar configurations of cold static neutral plasma consisting of nuclei and degenerate electron gas, calculating integral parameters by Newton gravitation theory
07 p1376 A70-18912

Cosmological solution of Einstein gravitational equations with singularity in time
07 p1381 A70-19361

Cosmological gravitation theory for uniformly expanding universe model providing fundamental reference frame and acceleration field
08 p1563 A70-20497

General relativity equations of gravitation consistent with empirical data, discussing curvature tensor, scalar gravitational waves and solar mass difference
08 p1577 A70-21419

Einstein gravitational equations general solution having physical singularity with respect to time
08 p1546 A70-21424

Relativistic gravity theories testing, discussing experimental tools and relativistic effects in solar system
09 p1750 A70-22059

Baryon configurations in relativistic generalized theory of gravitation, discussing field equation transformations, mass distribution, central pressure, etc
09 p1753 A70-22454

Gravitating bodies quasi-stationary rotating systems, giving equations of state and evolution
09 p1753 A70-22457

Relativistic generalized gravity theory, studying polytropic models
09 p1754 A70-22458

Vortex and potential motions interactions in relativistic hydrodynamics, noting effects of gravitation equations nonlinearity
09 p1754 A70-22461

Nongravitational effects, systematic residuals and close Jupiter approach problems in motions of comets
09 p1759 A70-22913

Incompressible homogeneous fluid model in non-relativistic generalized gravitation theory using analytical solution
09 p1762 A70-23118

Maxwell electromagnetism analogy to Einstein gravitation inferred from asymptotic studies of electromagnetic and gravitational radiation
10 p1915 A70-24029

Particle escape from Newtonian gravitational system of positive energy
10 p1938 A70-24183

Physical singularity reduced to imaginary by introducing arbitrary function in form of perturbation into gravitational equations general solution
10 p1917 A70-25032

Milne special relativistic cosmology consistency with Birkhoff flat space gravitation theory, calculating red shift correction in galactic light
11 p2114 A70-26549

Field equations in conformal theory of gravitation, noting invariance
11 p2084 A70-26552

Rotation effect on singularities in general relativity from local observer standpoint, inquiring into gravitational collapse in ideal fluid
12 p2271 A70-26978

Coefficients of Legendre polynomial expansion of earth gravitational potential, using Stokes problem solution
14 p2573 A70-30719

Relativistic gravitation theory and experimentation, surveying literature on gravity waves, EM propagation, gyroscopic precession, etc
16 p2973 A70-33230

Newtonian gravity law in light of relativistic theories, considering deviations of quasars and red shift deviations from Newton theory
16 p2976 A70-33722

Cosmic time varying gravitational constant effects on stellar age determination
16 p2978 A70-33966

Gravitational force and potential within static metric spaces
17 p3136 A70-35597

- Spiral structure gravitational theory, discussing separation between linear and nonlinear effects
18 p3330 A70-37189
- Galactic spiral structure, discussing gravitational theory, pattern origin, radio and optical structure and magnetic field effects
18 p3332 A70-37201
- Gravitational experiments in manned spaceflight employing Eotvos balance in orbit and direct force technique
21 p3929 A70-41002
- Space-time Riemann metric for scalar-tensor gravitational theories with arbitrary omega parameter
22 p4104 A70-42991
- Einstein gravitational equations solution for expanding universe, discussing possible sudden collapse into zero volume with infinite density
22 p4105 A70-43215
- Gravitational equations with oscillatory physical singularity, noting Bianchi type IX homogeneous metric
22 p4063 A70-43477
- Static spherically symmetric charged mass distribution exact solutions derived for electrons in scalar tensor theory of gravity by Hamilton-Jacobi method
23 p4222 A70-44403
- Maxwell electromagnetism and Einstein gravitation analogy in vacuum field equations, showing metric analytical for inverse distance parameter r
24 p4377 A70-45142
- Hoyle-Narlikar gravitation theory, considering Bohr quantization of direct interparticle action over all pairs
24 p4403 A70-45405
- Newton and Einstein gravitation theories applied to light velocity in gravitational field
24 p4379 A70-45487
- Gravitational relativistic theory tests using tracking data from interplanetary spacecraft, orbiters and landers
[AIAA PAPER 70-1317] 24 p4414 A70-46326
- ### GRAVITATIONAL COLLAPSE
- White dwarf mass changes during cooling, describing white dwarf collapse-type I supernova outbursts relationship
01 p0174 A70-10197
- Faint, metal poor, subluminescent and red degenerate stars occurrence and properties, considering spectra of candidate degenerates
01 p0188 A70-11338
- Low mass protostar evolution in dynamic collapse, investigating opacity laws
01 p0190 A70-11345
- Two armed spiral galactic shock waves as triggering mechanism for gravitational collapse leading to star formation, considering gaseous disk motion using Schmidt model
02 p0363 A70-11781
- Protogalaxy formation and molecular processes in primeval hydrogen gas, discussing cold gas cloud cooling mechanism and contraction
03 p0577 A70-14153
- Brans-Dicke cosmological gravitational instability using Lagrangian gauge for galaxy formation, discussing density contrast growth in time
03 p0577 A70-14154
- Collapse of homogeneous fluid mass in stratified fluid with initially slender interface and ineffective internal wave motion, discussing internal wave generation
03 p0470 A70-14247
- Protogalaxy mass limits determined for galactic formation by thermal instability due to radiative cooling and followed by nonlinear gravitational contraction
04 p0744 A70-14469
- Envelope stars evaporation effects on star cluster contraction, discussing energy inflow from envelope to nucleus
04 p0745 A70-14475
- Light emission from collapsing nonrotating gas in general relativity, noting restrictions on range and frequency shift
04 p0719 A70-14702
- Experimental observations of neutrino in collapsing stars in Galaxy, showing detector capability of recording positrons or electrons from antineutrino-neutrino flux induced reactions
05 p0900 A70-15966
- Galactic expansion due to mass energy loss by gravitational radiation
05 p0913 A70-16557
- Statistical analysis of Zwicky catalog of galaxies and clusters of galaxies, interpreting very distant clusters in terms of intergalactic extinction
05 p0915 A70-16697
- NonJeans gravitational instability of stars and interstellar gas in Galaxy due to wave interaction with stars having velocity near wave phase velocity
05 p0917 A70-16906
- Stellar mass loss in gravitational contraction and variation of rotation law during transition to main sequence
05 p0917 A70-16909
- Cosmological theories taking into consideration gravitational collapse, discussing pulsars, quasars and X ray stars evolution
06 p1140 A70-17584
- Dense pulsating stellar core structure model for pulsars, discussing catastrophic collapse mechanism
07 p1380 A70-19278
- Collapse-anticollapse transition near Schwarzschild radius in multimode universe with arbitrary number of time-similar dimensions
07 p1381 A70-19286
- Model for gaseous proto-galaxy collapse and formation of spherical galaxy
07 p1390 A70-20287
- Interstellar gas clouds collapse using finite difference numerical methods in solving hydrodynamic equations involving gravitation
07 p1390 A70-20288
- Interstellar cloud models to investigate heating, cooling and density distribution effects on collapse and to suggest theory of stellar evolution
07 p1390 A70-20292
- Earth observations of collapsing star neutrinos and neutrino oscillations in Milky Way galaxy
07 p1371 A70-20331
- Space-time singularities of gravitational collapse and cosmology indicated by timelike or null geodesic incompleteness
08 p1575 A70-21353
- Relativistic gravitational stellar collapse calculations for stars exceeding neutron star limit, discussing results in terms of supernovae or neutrinos
09 p1749 A70-21991
- Late stage stellar evolution association with supernovae in terms of gravitational collapse and exploding light emission using evolutionary model
09 p1749 A70-21993
- Gravitational radiation detection from pulsating neutron star, considering asymmetries in gravitational collapse of massive stars as origin
09 p1749 A70-21996
- Gravitational collapse models with magnetic dipole and gravitational quadrupole, treating asymmetries as small perturbations
09 p1752 A70-22274
- Neutrino emission effect on collapse of supermassive stars, estimating energy radiated, discussing envelope explosion
10 p1938 A70-24022
- Pulsars nature based on hypothesis for main energy of novae and supernovae bursts equaling gravitational energy of collapse
11 p2117 A70-26708
- Gravitational collapse of star and general relativity role, considering Schwarzschild solution to Einstein vacuum equations
12 p2298 A70-27058
- State equations of matter at high density and zero temperature, considering neutron stars relationship to supernova explosions and collapse
12 p2298 A70-27059
- Gravitational forces accompanying radiation bursts of metric outside collapsing supernova core
12 p2300 A70-27393
- Collapsed spherical bodies equilibrium structure, considering density-pressure state equations for cold neutron gas and gas-radiation mixture
12 p2300 A70-27395
- Gravitational collapse of slightly spherical body with axial symmetry characteristics, taking linear approximation of equation for additions to metric in empty space
12 p2310 A70-28223
- Pulsar formation mechanism, showing core collapse to neutron star state
15 p2806 A70-32773
- Gravitational instability and collapse of thin spherical shell of charged fluid, using energy conservation law
16 p2952 A70-33787
- Disk shaped galaxy stationary spiral shock pattern, examining gas cloud gravitational collapse for star formation
18 p3331 A70-37198
- Gravitational collapse of slightly spherical body with axial symmetry characteristics, taking linear approximation of equation for additions to metric in empty space
20 p3710 A70-40098
- Gravitational collapse for astrophysical matter distributions, discussing differential geometry, relativity, Schwarzschild metric, static equilibrium and space-time geometries
22 p4098 A70-42579
- Einstein gravitational equations solution for expanding universe, discussing possible sudden collapse into zero volume with infinite density
22 p4105 A70-43215
- ### GRAVITATIONAL CONSTANT
- Geogravitational constants and mass determination, discussing Cavendish constant and measurement theory and technique
03 p0473 A70-13236
- Einstein equations for five dimensional spherically symmetric space solved using gravitational constant without singularities on Schwarzschild sphere
05 p0880 A70-15793
- Time variation of gravitational constant on structure of central solar region and neutrino luminosity
05 p0899 A70-15952
- Torsion balance for measuring gravitational constant based on Langevin resonance method
08 p1543 A70-20593
- Soviet monograph on constant of gravitation, mass and density of earth covering torsion balance, weight experiments and nonlinear vibration techniques
08 p1487 A70-20764
- Geogravitational constants and mass determination, discussing Cavendish constant and measurement theory and technique
08 p1491 A70-21669
- Decreasing gravitational constant effects on secular earth figure and dimension changes using Clairaut equation
14 p2568 A70-30143
- Cosmic time varying gravitational constant effects on stellar age determination
16 p2978 A70-33966
- Gravitational variable constant in celestial mechanics, considering theories based on vacuum Jordan Lagrangian
18 p3320 A70-37066
- Stokes earth constants from gravity anomalies
20 p3617 A70-39070
- Resonant satellites geodesy, determining orbit perturbation and gravity constant via mean Kepler elements high speed analysis
24 p4408 A70-45540
- ### GRAVITATIONAL EFFECTS
- Body motions containing cavity filled with viscous fluid under influence of gravity, formulating motion equations for fluid and body
01 p0068 A70-11576
- Lower bounds of Stekloff and free membrane eigenvalues for sloshing of incompressible inviscid fluid, subject to gravity in rigid tank with free surface
02 p0278 A70-11999
- Self gravitating galaxies theoretical properties, including structural and dynamic characteristics of interacting and colliding galaxies
02 p0376 A70-12444
- Stellar systems evolutionary stages, considering gravitational instability in rotating expanding gas, relaxation, viscosity, transition to metastable state and drift effect on geometry
02 p0376 A70-12445
- Stellar clusters equilibrium state in gravitational field, discussing dispersed clusters formation by gravitational instability in gas containing stars of various ages
02 p0376 A70-12446
- Gravitational finite propagation velocity effects in celestial mechanics, describing binary star motion studies
02 p0380 A70-12783
- Gravity effect on atoms, neutrons, electrons and photons, measurement techniques and comparison with macroscopic bodies
03 p0524 A70-13172
- Secular increase in pulsar periods attributed to gravitational emission, velocity effects and galactic escape
03 p0564 A70-13219
- Kinetic equation describing variation of distribution function of stellar residual velocities under action of gravitational field, discussing stellar diffusion in velocity field
03 p0564 A70-13227
- Multiple periodicities in beta Canis Majoris Star 16 Lacertae attributed to tidal perturbation effects on pulsation mode of structural changes
03 p0567 A70-13320
- Close spaced material points motion stability in gravitational field of attractive center using Liapunov theorem, assuming nongravitational forces action on points
03 p0524 A70-13369
- Circulation gas lens temperature distribution, considering effects of gravity, wall thermal conductivity, glass interlayer, etc
03 p0604 A70-13387
- Human motion coordination under acceleration followed by weightlessness during jet flights along Keplerian orbits, discussing initial disturbance and subsequent subsiding
03 p0425 A70-13897
- Stellar model surface convective zone using diffusion equation taking into account transport due to gravitational separation, noting role of turbulent diffusion
03 p0574 A70-13932
- Satellite motion in earth gravitational field under additional forces using Stockel theorem
04 p0760 A70-14432
- Thermal instability of uniformly rotating self gravitating homogeneous medium with perturbations in plane perpendicular to rotation axis
04 p0745 A70-14471
- Hypokinesia and nutrition deficiency effect on blood coagulation, noting combination with accelerations may lead to hypocoagulation
04 p0630 A70-14578
- Models of partially relaxed stellar disks in galaxies, discussing gravitational instability and stellar velocities
04 p0748 A70-14588

Gravity and size effects on film boiling from horizontal cylinders, recommending formulas for wavelength and minimum heat flux predictions [ASME PAPER 69-WA/HT-12] 04 p0784 A70-14821

Gravitational effects on heat transfer during evaporation and condensation processes in heat pipe, discussing conditions in Na filled heat pipe [DGLR-69-44] 04 p0785 A70-15171

Gravity influence on constitutive equations of elasticity for crystals treated as continuous body and particle system, taking into account lattice structure 05 p0925 A70-15869

Gravitational radiation damping effect on motion of two bodies, evaluating field components in approximation by Einstein-Infeld-Hoffman method 05 p0882 A70-16308

Hydrostatic equilibrium in self gravitating core of rotating relativistic star, considering Newton and Einstein gravitation theories 05 p0914 A70-16648

Gravitational instability of finitely conducting incompressible fluid layer of finite thickness surrounded by nonconducting medium 05 p0915 A70-16696

Hot star photogravitational acceleration determined from difference between apex and antipeak brightness, noting constant magnitude and direction of principal component of apex force 05 p0918 A70-16914

Hematologic changes in rats under hypergravity, effects of vitamin B12, folic acid and return to 1 g 06 p0991 A70-17283

Spacecraft level vibrations and gravity effects on blue-green algae Plectonema Boryanum proposed as gas exchange medium 06 p0999 A70-17292

Homogeneous gravitating sphere deformation by internal dislocations determined using Green dyad 06 p1055 A70-17605

Phase growth of free vapor bubbles in water, ethanol and isopropanol at uniform superheats under normal and zero gravity 07 p1418 A70-18646

Gravitational effects on organisms - Conference, Warsaw, March 1969 07 p1200 A70-18784

Dust growth, density distribution and collisions in interior of cometary head atmosphere, considering gravitational attraction to nucleus 07 p1379 A70-19039

Telescopic paraboloid mirrors optical distortion from surface deformation due to gravity loads 07 p1281 A70-19254

Radiation focusing properties of gravitational bodies associated with curving light trajectories analyzed by geometrical and waveguide optics approximations 07 p1384 A70-19411

Approximate method for celestial mechanics problems, considering particle motion under gravitation from central body in cylindrical coordinate system 07 p1387 A70-19626

Back reflection of zero-mass scalar or vector waves in gravitational fields produced by non-Lorentz part of spatial metric components 07 p1387 A70-19923

Photoelastic stress analysis of composite structures subjected to gravitational forces using immersion analogy, considering constant acceleration stresses 07 p1413 A70-20038

Hydromagnetic self gravitating galactic slab embedded in halo, deriving stability criteria using models of magnetic field 07 p1390 A70-20293

O star red shift considering gravitation interpretation effects on stellar masses 07 p1391 A70-20465

Visual analyser physiology under effects of gravitation, atmospheric pressure, mechanical vibrations, etc 08 p1444 A70-20740

Ideal fluid in lightly filled spherical vessel under gravitational force investigated for surface tension effect on vibration frequencies 08 p1482 A70-20853

Solar oblateness and gravitational quadrupole moment related under assumption of magnetic and velocity fields absence in surface layers, including rotation effects 08 p1570 A70-20902

Gas flow influence on wave characteristics of thin viscous liquid layers pulled by gravity vertical surface compared with water layer experiments 08 p1482 A70-20917

Steady motions and stability of gravitating gyrost and spheroid, considering dynamically asymmetrical and symmetrical conditions 08 p1544 A70-20965

Static deflection effect on harmonic vibration of system with restoring forces of hardening nonlinear spring, considering gravity effect 08 p1586 A70-21035

Momentum vector and spin tensor definitions for extended body moving in arbitrary gravitational and

electromagnetic fields, considering test body in de Sitter universe 08 p1545 A70-21352

Stresses and displacements in largely deflected cantilever beams subjected to gravity using photoelasticity 08 p1593 A70-21619

Secular increase in pulsar periods attributed to gravitational emission, velocity effects and galactic escape 08 p1580 A70-21652

Kinetic equation describing variation of distribution function of stellar residual velocities under action of gravitational field, discussing stellar diffusion in velocity field 08 p1580 A70-21660

Orbiting clock experiment for measuring gravitational red shift of earth by comparing ground based and satellite-borne hydrogen maser clocks 08 p1501 A70-21950

Optimal transfer ellipse obtained by complete rotation in gravitational field of axisymmetric planet 09 p1751 A70-22161

Uniformly rotating gas disk large scale spiral structure analysis, studying density waves due to gravitational disturbance by supersonic particle 09 p1755 A70-22503

Lunar surface luminescence considered for correlation with tidal forces of earth 09 p1758 A70-22748

Periodic solutions of restricted three body libration point perturbation due to fourth body gravitational and radiative influence using Huang model 09 p1761 A70-23053

Gravitational effects on heat transfer during evaporation and condensation processes in heat pipe, discussing conditions in Na filled heat pipe 09 p1789 A70-23427

Gravity and vertical magnetic anomalies interpretation to infer magnetization direction 09 p1729 A70-23601

Cavitational symmetric flow around wedge taking into account gravity and surface tension 10 p1868 A70-24162

Elongated rotating configuration evolution by gravitational radiation and secular instability using homogeneous figures of Maclaurin and Jacobi 10 p1916 A70-24404

Solar wind model with electrons, protons and alpha particles coupled by electric field and expanding due to pressure gradient and solar gravitation 10 p1931 A70-24433

Horizontal fluid layer heated from above or below analyzed for gravitational field sinusoidal modulation effects on stability 10 p1968 A70-24523

Gravitational instability theory for large density perturbations growth during expansion of matter without pressure 10 p1945 A70-24961

Dynamic orbital mixing in self gravitating spherical stellar system using water bag model 10 p1945 A70-24965

Luminous hot stars mass loss attributed to negative effective gravities in outer parts of reversing layers from ionic UV resonance lines 10 p1946 A70-24981

Reduced gravity effect on nucleate boiling using drop tower method with high speed motion pictures and telemetry 10 p1969 A70-25096

Rotating degenerate gravitating fluid cylinders equilibrium configuration 10 p1917 A70-25208

Solid body acceleration by ideally conducting gas in constant gravity field under magnetic field, considering rarefaction, reflected waves, motion equation, wall pressure, etc 11 p2082 A70-25389

Extraterrestrial gravitational effects on microorganisms, describing impulse-applied high g study of freeze dried Escherichia coli 11 p1987 A70-26028

Gravitational disturbance by exterior planets, considering Brown transformation of longitudinal perturbation problem in relation to planet Neptune discovery 11 p2117 A70-26658

Swirling and meridional flow induced by steady rotation of gravitating sphere in compressible monatomic gas, considering compressibility effects and surface layer [ASTM PAPER MR-69-714] 11 p1978 A70-26690

Critical thermal flux and heat transfer coefficients dependence on simulated gravity during bubble and film boiling in inclined flat containers 12 p2331 A70-27325

Inertial and gravitational mass equivalence related to observation of anomalous K-meson decay 12 p2272 A70-27391

Nonequilibrium self gravitating medium unified thermodynamics theory based on propagators, describing spatial and temporal fluctuations and coupling for galactic formation 12 p2310 A70-27978

Dynamics of gravity stabilized satellite having maximum damping rate 13 p2499 A70-28391

Satellite motion in earth gravitational field under additional forces using Stockel theorem 13 p2503 A70-28457

Gravity effect on positional alcohol nystagmus in man and rabbits, observing threshold value in weightless state 13 p2359 A70-29442

Longitudinal gravitational field effect on cavitational wedge flow, investigating characteristics by Zhukovskii-Roshko method 13 p2390 A70-29646

Density wave theory and spiral gravitational field effects in migrating stars orbits and origins in Milky Way spiral arm, using Schmidt model 13 p2495 A70-29801

Gravity dependent lung region emptying sequence effects on alveolar Xe 133 and nitrogen plateaus in pivoted subjects 13 p2356 A70-29944

Gravity effect on conical vortex separator, predicting body force effect on heavy fluid boundary layer flow for limiting condition determination 13 p2391 A70-29978

Book on thermal and gravitational atmospheric tides covering solar oscillations, lunar air tides, upper air data, ozone radiation absorption, etc 14 p2573 A70-30633

Thermal tidal friction and gravitation effects on Mercury libration after solidification, noting equilibrium with orbital and rotational periods locked in 3/2 resonant state 14 p2638 A70-30701

Interplanetary low thrust orbit transfer optimization by dynamic programming, including gravitational perturbation effects from earth, Mars and Jupiter 14 p2640 A70-30759

Vestibular threshold dependence on gravity, considering linear accelerations effect on canals sensitivity 14 p2539 A70-30916

Compressible plasma gravitational instability taking into account Hall effect 14 p2624 A70-31225

Synchronous satellite orbits determination using mathematical model for simulating gravitational perturbations induced by terrestrial globe and foreign bodies 14 p2651 A70-31279

Orbiting gyrostats equilibrium orientations under gravitational torques, considering internal angular momentum effects 14 p2655 A70-31364

Dynamic spectrum of density fluctuations and galaxy clustering in Einstein universe, considering self gravitation of medium 14 p2652 A70-31389

Elementary particles gravitational interactions, identifying tensor field with local gravitation 15 p2776 A70-31732

Hand-eye coordination in altered gravitational fields, using mirror viewed target in reaching test 15 p2689 A70-31886

Trail formation due to tidal effect in interacting galaxies during close approaches, considering mass flow hydrodynamics 15 p2801 A70-32481

Translational-rotational motion of axisymmetrical moon in earth gravitational field 15 p2803 A70-32496

Gravitational atmosphere thermally driven motions, noting expansion towards lower density regions in solar chromosphere 15 p2804 A70-32619

Gravitational compression of spherical cloud, determining asymptotic features of gas motion near center 15 p2808 A70-32882

Heterogeneous conducting fluid stability between fixed rigid cylinders with radiant gravitational force and magnetic field 16 p2894 A70-33784

Solar system Eotvos experiments for measuring gravitational to inertial mass ratio of celestial bodies 16 p2978 A70-34033

Fluid analog for lung tissue response to gravitational acceleration, examining lung density, transpulmonary pressure, expansion, etc 16 p2850 A70-34257

Weightlessness and gravitational effects on human pulmonary blood flow distribution, considering optimal gas exchange efficiency [AIAA PAPER 70-785] 17 p3035 A70-34472

Gravitational bremsstrahlung for small mass with relativistic velocity passing large mass in unbound trajectory, calculating energy flux of emitted waves 17 p3136 A70-34596

Artificial planetary satellites long term orbital evolution under strong perturbations, considering solar and lunar gravitational effects [AAS PAPER 70-038] 17 p3155 A70-34779

Interior ideal liquid flow of vertical jet under gravity, using differential equation to relate flow plane to unit half disk

17 p3069 A70-34979

Intermediate orbit calculation, allowing for spacecraft large gravitational perturbation during motion near planetary sphere of influence

18 p3312 A70-36166

Mascon effects on close lunar orbit, using short arc perturbation technique

18 p3314 A70-36518

Relativistic thermal equilibrium conditions in external gravitational field, considering heat with inertial and gravitational mass

18 p3291 A70-36552

Nomograms for meteor geocentric velocity and trajectory with correction for zenith attraction and radiant

18 p3315 A70-36605

Gravitational field effect on natural frequencies of rotating ring laser, using general relativity and electromagnetic fields theories in continuous media

18 p3267 A70-36622

Large planets mass determination based on Kepler law and gravitational effects

18 p3318 A70-37045

Lateral compression of rocks and global shells multilayers, using equations for buckling of single free stratum

18 p3255 A70-37076

Tightly wound spiral nonlinear density waves in pressureless self gravitating disk with external gravitational field, examining solid body and differential rotation

18 p3331 A70-37192

Gravitationally induced (Machian) magnetic field by rotating mass-shell with centrally located stationary charged sphere, using linearized relativity theory

19 p3471 A70-37815

Lunar basalt lava bed formations, examining vacuum and gravity effects during cooling

19 p3517 A70-37988

Many body gravitational problem, computing evolution of two groups by numerical integration with two different computers

19 p3523 A70-38692

Near parabolic trajectories between moon and cislunar libration point, considering earth perturbative influence

[AIAA PAPER 70-1059]

19 p3529 A70-38874

Gravity effects on impact damper performance, investigating dynamic stability and kinematic viability of various steady state motion solutions

20 p3717 A70-38974

Gravitational effects on impact damper performance, discussing dynamic stability and kinematically viable periodic motion and resonant conditions

20 p3717 A70-38975

Solid and hollow spheres gravitational and surface load stresses determination by freezing method of photoelasticity and mercury immersion

20 p3717 A70-38998

Maclaurin spheroid secular stability, examining energy dissipation of gravitational radiation

20 p3702 A70-39017

Auxin downward transport by gravity in leaves, examining ethylene inhibition

20 p3570 A70-39234

Steady motions and stability of gravitating gyrost and spheroid, considering dynamically asymmetrical and symmetrical conditions

20 p3672 A70-39387

Accelerometer calibration in low g range by mass attraction as equivalent acceleration input

[AIAA PAPER 70-1030]

20 p3631 A70-39507

Spinning missile gravity induced angular motion for various trajectory portions, considering quasi-steady state assumption validity

[AIAA PAPER 70-968]

20 p3715 A70-39561

Periodic collision orbits in plane elliptic three body problem of infinitesimal mass under gravitational field of two finite masses

20 p3705 A70-39603

Liquid fuel behavior in right circular cylindrical tank inclined to earth gravitational field, computing fundamental sloshing frequency

20 p3610 A70-39694

Stellar wind theory and related steady radial flows, discussing gravitating point mass, heat conduction, shocks, viscosity, outflows and inflows

20 p3706 A70-39928

Artificial earth satellite orbit perigee motion, calculating perturbation effect due to gravitational and magnetic fields on orientation and rotation

21 p3884 A70-40843

Optimum cryogenic heat pipe design, considering gravitational effects for spacecraft applications

21 p3946 A70-41044

Vapor volume entrained in liquid bulk from boundary layer boiling on vertical plate in low gravity field

21 p3947 A70-41055

Pluto space probe using swingby technique with Jupiter, Saturn and Uranus gravitation fields for acceleration

21 p3886 A70-41073

Gravity darkening of tidally and nonuniformly rotating Roche components of close binary systems, calculating surface temperature and spectral distributions

21 p3888 A70-41120

Heated surface orientation and reduced gravity effects on Freon 113 nucleate

21 p3948 A70-41204

Gravitational effects on laminar gas jet diffusion flame stability, including zero gravity environment

21 p3949 A70-41316

Critical thermal flux and heat transfer coefficients dependence on simulated gravity during bubble and film boiling in inclined flat containers

21 p3952 A70-42066

Cellular convection in fluid layers with parabolic temperature distribution, calculating stability effects of gravity and surface tension gradients

21 p3952 A70-42078

Fluid dynamics nonlinear equations for thermally driven motions in compressible, isothermal gravitational solar atmosphere, considering flow discontinuities and heat conduction

21 p3925 A70-42191

Lense-Thirring effect in test masses approaching in same orbit around rotating body, noting correction dependence on central body geometry and angular velocity

21 p3926 A70-42240

Stellar evolution, rotation and atmospheric motion, discussing gravity darkening, spectral lines, angular momentum, braking mechanisms and late stars

22 p4102 A70-42970

Computer model of self gravitating gas-stars system with spiral structure surviving galactic rotations

22 p4103 A70-42982

Earth gravity deforming effect on flexible crossed-dipole satellite configuration, considering dynamic stability and spin stabilization

22 p4110 A70-43434

Earth gravity effect on spin vector attitude stability of flexible crossed dipole satellite configuration

22 p4110 A70-43435

Earth quadrupole moment indirect effect on satellite gyroscope precession

23 p4217 A70-43799

Vertical force exertion on mass at ends of elongated rotating nonspherical asteroids calculated for man safety and mobility

23 p4239 A70-43849

Xanthine dehydrogenase activity in *Drosophila* and *Habrobracon* under hypogravity conditions onboard Biosatellite

23 p4144 A70-43863

Trail formation due to tidal effect in interacting galaxies during close approaches, considering mass flow hydrodynamics

23 p4240 A70-43906

Translational-rotational motion of axisymmetrical moon in earth gravitational field

23 p4240 A70-43917

Miles-Howard theorem extension to gravitationally stratified compressible fluid containing parallel shear flow, considering stability against adiabatic perturbations

23 p4179 A70-43976

Solar probe trajectory optimization, using Venus gravitational field for braking

23 p4243 A70-44506

Organism reactions to gravity forces, discussing experimental zero and hyper g simulation studies with frog and nematode eggs

23 p4146 A70-44630

Lawden intermediate rocket thrust arcs numerical integration and Kelley-Contensou optimality in Newton central force field

23 p4245 A70-44657

Artificial liquid satellite orbited to verify tidal theory

23 p4183 A70-44659

Ion acoustic wave propagation in collisionless gravity-supported plasma in static magnetic field calculated from linearized Vlasov equation

24 p4382 A70-45109

Gravity effects on perinatal organ growth in chicks

24 p4297 A70-45342

G-suit hazards in lower extremity thrombophlebitis in pilots

24 p4307 A70-45347

Big bang temperature problem, discussing galactic masses determination possibility by gravity-strong interactions interplay in early stages

24 p4403 A70-45402

Newton and Einstein gravitation theories applied to light velocity in gravitational field

24 p4379 A70-45487

Light velocity frequency dependence in variable stars gravitational fields suggested from yellow and UV NP 0532 observations

24 p4405 A70-45488

Artificial satellite motion theory, discussing gravitational and nongravitational force effects

24 p4406 A70-45527

Altered gravitational field effects on frog eggs centrifuged under various conditions after fertilization, noting time dependence of induced abnormalities

24 p4298 A70-45619

Galactic evolutionary models using disklike Riemann ellipsoids with internal motions and gravitational gas equilibria

24 p4410 A70-45759

Ionized matter stability in intense radiation field opposed to gravitation, explaining quasar properties

24 p4398 A70-46162

Peak pool boiling heat flux on horizontal cylinders, describing interactions of gravity and heater size effects

24 p4429 A70-46176

GRAVITATIONAL FIELDS

Elliptic integrals for plane motion of stars, assuming stationary gravitational potential of stellar system

01 p0174 A70-10138

Inertial gravitational fields described by Maxwell equations, showing potentials defining four vector velocity field of test particles

01 p0141 A70-10140

Gravitational field equations in flat space, using quaternion representation of general relativity Riemannian space time in terms of spinors

01 p0141 A70-10279

Oblate earth gravitational field effect on ballistic missile trajectories, including body range determination and quadratures expressed by elementary functions

01 p0178 A70-10423

Earth gravity field intensity variations measured by orbiting two geometrically identical satellites, discussing sensitivity and cost

01 p0087 A70-10445

Linear field theory of gravitation by considering gravitational field functions decomposition into spin components

01 p0143 A70-10712

Computer model for evolution investigation of disks of stars, discussing methods to obtain gravitational potential

01 p0185 A70-11065

Compressible gas flow problem in point body gravitational field solved with reference to sun and interstellar gas

01 p0172 A70-11489

Spacecraft horizontal maneuvers in homogeneous gravitational field to achieve soft landing on planetary surface, including optimal liftoff and orbital transfer

01 p0197 A70-11501

Gyrostabilized satellite steady state motions in Newtonian force field having displaced satellite center of mass orbital plane relative to center of attraction

01 p0198 A70-11577

Conformally plane solutions to Einstein equations derived with energy momentum tensor characteristics of pulverized material representing gravitational fields

01 p0193 A70-11629

Microtopography effects on measuring horizontal gravity gradients by gravimeters

02 p0295 A70-11799

Two step optimal motion of target and pursuer with thrust vector control in vacuum under arbitrary gravitational field, determining distance strategy

02 p0272 A70-12405

Stellar clusters equilibrium state in gravitational field, discussing dispersed clusters formation by gravitational instability in gas containing stars of various ages

02 p0376 A70-12446

Lunar gravitational field determination from analysis of Lunar Orbiter spacecraft tracking data

03 p0562 A70-12915

Satellite observations for determining earth shape and gravitational field zonal harmonics, using dynamic methods

03 p0473 A70-13188

Gravimetric and satellite tracking data reduction for determining coefficients in mathematical expansion representing earth gravitational field

03 p0473 A70-13189

Steady motions stability of gyrost satellite in central Newtonian gravitational field

03 p0579 A70-13343

Close spaced material points motion stability in gravitational field of attractive center using Liapunov theorem, assuming nongravitational forces action on points

03 p0524 A70-13369

Heat transfer and flux density during bubble boiling of liquid oxygen employing simulated weak gravitational fields

03 p0605 A70-13393

Lagrangian gravitational field density related to contraction to expansion transition in terms of cosmological model, discussing quadratic corrections and singularity

03 p0524 A70-13412

Energy analysis of unstable gravitational oscillations in galaxies, using two component model for normal spiral galaxies

03 p0570 A70-13532

Relativistic tensor theories of gravitation in flat space with Neumann and Newton forms of gravitational potential, deriving expressions to estimate differences perceived by observer

03 p0526 A70-14305

Gravitational wave propagation velocity determined by laboratory measurement of spin-spin coupling of two rotating masses

04 p0718 A70-14397

Translational-rotational motion of long dumbbell in Newtonian central force field, analyzing plane center of mass trajectory with perpendicular kinetic moment vector

04 p0744 A70-14427

Optimal impulse orbital transfer in ring between coplanar orbits intersecting ring boundaries in central Newtonian force field

04 p0744 A70-14429

Galactic mass loss by gravitational radiation, discussing galactic expansion and nucleus mass

04 p0752 A70-15068

Stellar systems dynamics, discussing dynamic interactions of point masses, forces in gravitational field, galactic model construction, etc

04 p0754 A70-15353

Formula for energy radiated from particles system applied to electromagnetic and gravitational radiation and illustrated by charged particle motion in magnetic field

05 p0882 A70-16309

Large spacecraft in circular earth orbit calculated for internal gravitational field

05 p0924 A70-16637

Geodetic vertical and geoidal height deflection calculated by gravimetric method, considering satellite orbits data

05 p0841 A70-16643

Gravitational-repulsion forces of interstellar vacuum, investigating relations between magnitudes and red shift of galactic objects and quasars

05 p0920 A70-16968

Pulsed gravitational radiation emitted by dense star clusters

05 p0921 A70-16977

Shear-free gravitational radiation described by Einstein equations, analyzing physical properties including energy, angular momentum, radiation flux and trapped surfaces

06 p1104 A70-17185

Second vertical derivative of gravity field, using formulas based on Taylor series expansion method

06 p1055 A70-17604

Time-similar and isotropic geodetic curves simulating paths of test bodies in Riemann space corresponding to gravitational field

06 p1107 A70-18564

Hypothesis concerning initial spectrum of metric perturbations in Friedman model, discussing long wavelength gravitational waves energy

07 p1383 A70-19406

Gaseous spheres gravitational stability in proper field, considering convection and radial perturbations effects

07 p1383 A70-19408

Radiation focusing properties of gravitational bodies associated with curving light trajectories analyzed by geometrical and waveguide optics approximations

07 p1384 A70-19411

Potential and gravity distributions on lunar surface, showing presence of harmonics of all orders

07 p1385 A70-19425

Meteorological satellites motion parameters long term prediction, using final analytic relationships with allowance for zonal harmonics of gravitational field

07 p1329 A70-19650

Signal reception possibly due to gravitational radiation of cosmic origin, estimating energy

07 p1387 A70-19699

Axial-vector current divergence in external gravitational field, using perturbation approach in Minkowski space

07 p1336 A70-20167

Gravitating particles systems equilibrium states, solving kinetic equations for sphere and cylinder in isotropic and anisotropic cases

07 p1389 A70-20207

Electromagnetic and gravitational fields classification methods using spinor techniques, introducing five dimensional complex linear space with Weyl tensors elements

07 p1337 A70-20302

Cosmological gravitation theory for uniformly expanding universe model providing fundamental reference frame and acceleration field

08 p1563 A70-20497

Matter distribution and motion in conformally flat gravitational fields, analyzing Friedmann solution to Einstein equations

08 p1544 A70-20991

Gravitational waves in general relativity theory, discussing Kaigorodov exact solution to Einstein equations

08 p1545 A70-20993

Gravity long wave variations correlation with crust and upper mantle geological activity, describing anomaly distribution

08 p1488 A70-21014

Statistics and coincidences of Argonne-Maryland gravitational radiation detector array with and without time delays

08 p1545 A70-21271

Schwarzschild metric properties in synchronous reference system, using succession of Schwarzschild interval holonomic transformations as function of gravitational radius

08 p1545 A70-21406

Magnetothermal instability and radiative effects on incipient fragmentation of rotating gravitating interstellar fluid forming condensations

08 p1578 A70-21545

Einstein power transfer theory used for demonstrating energy transfer rate by gravitational radiation from emitter to absorber

08 p1546 A70-21742

Unified geometric description of gravitational and electromagnetic fields, determining electromagnetic field influence on geometry from dimensional constant

08 p1546 A70-21811

Gravitational radiation detection from pulsating neutron star, considering asymmetries in gravitational collapse of massive stars as origin

09 p1749 A70-21996

Geogravitational field correlations to geomagnetic fields emphasizing displacements in longitude

09 p1667 A70-22381

Spherically symmetric galaxies dynamic evolution analysis, emphasizing irregular motions description using fluctuating gravitational field hypothesis to construct Markov process

09 p1758 A70-22747

Static gravitation field of spherical mass immersed in cosmological gas, using combined model of Einstein and de Sitter static universes and Schwarzschild solutions

09 p1763 A70-23312

Stellar wind theory based on spherically symmetric isothermal and stationary stellar atmosphere with non-negligible gravitational potential

09 p1747 A70-23605

Maxwell electromagnetism analogy to Einstein gravitation inferred from asymptotic studies of electromagnetic and gravitational radiation

10 p1915 A70-24029

Eclipsing binary beta Aurigae effective temperature and surface gravity determination from photoelectric spectrum and abundance analyses

10 p1938 A70-24100

Gravitational waves and radiation study based on relativity theory, discussing outer space sources and antenna recording design and properties

10 p1916 A70-24384

Milky Way expansion, explaining Weber gravitation signals by collisions between neutron and normal star

10 p1943 A70-24698

Different gravitational force fields effecting optimal rocket trajectories and queried validity of Newtonian law

10 p1943 A70-24820

Errors estimation arising in inertial navigation equations solution while neglecting terms dependent on earth asphericity and gravitational field

11 p2077 A70-25558

Gravitational field and ellipsoidal gravitational waves anisotropy, deriving gravitistics results from electrostatics

11 p2083 A70-25944

Asymptotic model for stationary radiative stationary transitions using Newman-Penrose spin coefficient approach to gravitational radiation for Riemann spacetime

11 p2084 A70-26547

Optimal pulsed orbital transfer between close nearly circular orbits in central field of gravity realized by geometrical solution

11 p2118 A70-26778

Gravitational and magnetic anomaly interpretation by regression analysis including geological field discrimination, inverse gravimetry and magnetometry, etc

12 p2223 A70-27318

Second order self conjugate elliptical differential equation for modulus of gravitational field strength, giving geometrical interpretation of coefficient

12 p2223 A70-27349

Terrestrial external gravitational field approximation using sphere and ellipsoid attraction, showing mass, angular velocity and size dependence

12 p2300 A70-27477

Orbital perturbations earth satellite due to zonal and tesseral earth gravitational harmonics and external body fields

12 p2302 A70-27671

Einstein equations derivation in comoving reference frame for spatially homogeneous gravitational fields

12 p2310 A70-28221

Coplanar transfer orbits optimal trajectories in central Newtonian gravitational field, using Krotov sufficient criteria

12 p2310 A70-28252

Rendezvous trajectory control problems solution by regularization techniques, emphasizing equations of motion in gravitational field

13 p2446 A70-28380

Translational-rotational motion of long dumbbell in Newtonian central force field, analyzing plane center of mass trajectory with perpendicular kinetic moment vector

13 p2485 A70-28452

Optimal impulse orbital transfer in ring between coplanar orbits intersecting ring boundaries in central Newtonian force field

13 p2485 A70-28454

Geogravity-geomagnetic fields correlation due to lateral temperature variations in upper mantle

13 p2393 A70-28620

Convection effects in mantle on earth gravitational field using hydrodynamic model

13 p2488 A70-28764

Gravity radiation detector insensitivity to cosmic rays

13 p2405 A70-28835

Einstein-Maxwell equations for monopolar point electrical charge, calculating proper energy for electromagnetic and gravitational fields

13 p2451 A70-28956

Stellar light pressure and gravitational force ratios for spherical water, quartz and graphite particles in interstellar space, considering refractive dependence on wavelength

13 p2493 A70-29396

Two body system with Newtonian force interaction, calculating gravitational wave energy losses and spectral decomposition

13 p2453 A70-29668

Upper atmospheric temperature-gravitational potential relationship for sun, earth and several planets

13 p2495 A70-29765

Frequency dependence of gravitational-electromagnetic fields interaction assumption inconsistent with general relativity and consistent with data on deflection of radiation by massive bodies

14 p2573 A70-30616

Steady motions stability of gyrostat satellite in central Newtonian gravitational field

14 p2653 A70-30718

Gravitational field representation in satellite geodesy by simple layer potential, comparing with geopotential expansion in spherical harmonics

15 p2722 A70-31548

Triaxial earth attraction potential from expanding certain elliptical functions into series, noting consistency with concepts of astronomy and geodesy

15 p2731 A70-32148

Vertical gravity gradient effect on calculations accuracy of earth figure, deriving corrections for anomalies

15 p2731 A70-32149

Electrodynamical-gravitational model of radio galaxies and quasars accounting for complex field, particle acceleration, angular momentum, luminosity and line emission

15 p2807 A70-32811

Neutron stars gamma and radio emission in gas accretion state, determining surface gravitational potential

15 p2808 A70-32883

Secular variations in osculating orbital elements of particle in Saturn ring gravitational field, considering motion in both external and internal space

16 p2973 A70-33226

Pulsar gravitational waves detection by lunar mascons, discussing resonant standing vibrations

16 p2980 A70-34306

Frequency spectra of gravitational waves radiated from celestial phenomena, suggesting mass exchange in binary containing neutron star

17 p3067 A70-34619

Horizontal gravity gradient components in outer space from Stokes function expansion, using sphere as model

17 p3154 A70-34682

Earth gravity field from successive satellite passages, introducing direction and range observations of first passage

17 p3154 A70-34683

Large anisotropy observed for gravitational radiation detector intensity as function of sidereal time, suggesting source from galactic center

17 p3137 A70-35725

Energy transfer in convective envelope of rotating star and solar differential rotation, using Lucy gravity-darkening law

18 p3313 A70-36214

Equilibrium form shapes of fluid free surface in vessel under gravitational and magnetic field with tension

18 p3240 A70-36269

Parametric representation of brachistochrones of mass point in centrosymmetrical gravitational field

18 p3283 A70-36387

Self interaction of nonsingular sourceless first order pulse of gravitational radiation imploding from infinity to focus point and exploding to infinity

18 p3291 A70-36475

Relativistic thermal equilibrium conditions in external gravitational field, considering heat with inertial and gravitational mass

18 p3291 A70-36552

Near earth motion equations for electrically charged dust particles in gravitating dipole magnetic fields, using zero-relative-velocity surfaces and energy integral

18 p3315 A70-36606

Artificial satellite orbital motion numerical integration, computing spherical harmonic terms for earth gravitational potential

18 p3334 A70-37063

Gravitational field on Liapunov surface approximating earth relief, using double sphere solution

19 p3407 A70-37299

Autocorrelation functions of anomalous gravitational and magnetic fields for ocean lines, relating Mohorovičić boundary and Curie isotherm

19 p3408 A70-37318

Insular system energy and momentum definition in external gravitational field, using dynamic equations and Einstein theory

19 p3513 A70-37412

Stress energy tensor equal time commutation, observing metric dependence inability to satisfy relations for linearized gravitational fields

19 p3536 A70-37550

Quantum gravity and UV infinities in quantum electrodynamics, describing constant gravitational length from nonperturbative calculations for self mass and self charge

19 p3473 A70-37575

Fundamental equations of physical geodesy for earth figure by oceanic and continental parts via external gravity field

20 p3617 A70-39069

Integral equations for gravity field and plumb line deflections solved by Neumann and Molodenskii methods

20 p3617 A70-39073

Gaussian gravity field structure, calculating gravity correlation function using differential equation from density correlation function

20 p3617 A70-39075

Upper atmospheric temperature-gravitational potential relationship for sun, earth and several planets

20 p3710 A70-40090

Einstein equations derivation in comoving reference frame for spatially homogeneous gravitational fields

20 p3710 A70-40096

Plane horizontal fluid film convective stability with free boundaries in vertical circular cylinder for periodic modulation of vertical temperature gradient or gravitational field

21 p3941 A70-40608

Gravitational radiation scattering by Schwarzschild horizon, discussing odd parity waves of angular momentum

21 p3878 A70-40731

Emission and escape of light from inside spherically symmetric gravitational mass, examining escape cone

21 p3923 A70-42106

Chronometrically invariant formulation of Petrov gravitational fields algebraic classification at spacetime fixed point in general relativity

21 p3851 A70-42239

Stellar system statistical mechanics, discussing collisionless gas in gravitational field, galaxy formation, stellar dynamics, double stars and bounded isothermal spheres

22 p4098 A70-42577

Quasi-Maxwellian equations of inertial-gravitational fields

22 p4075 A70-43223

Airborne and surface downward continuation of gravity, discussing integral equations solutions and data filtering of noise interference

22 p4025 A70-43664

Geodetic boundary value problem reformulation based on geometric satellite geodesy involving gravity measurements

22 p4025 A70-43667

Interplanetary mission propellant reduction by using earth-moon-sun gravity field properties, discussing swingby techniques, low energy trajectories, etc

23 p4244 A70-44607

Doppler effect simplification to classical Laplacian orbit determination, deriving equations in perturbed gravity field for initial point determination

23 p4246 A70-44697

Gravitational radiation detectors design and components, discussing background noise and thermal fluctuations

23 p4198 A70-44850

Gravitational field fine structure representation near earth surface as sum of global model in spherical harmonics and local model in harmonic B functions

24 p4328 A70-45287

Satellite motion deviations from reference orbit by generalized Fourier analysis, discussing earth gravitational field parameters determination and errors

24 p4408 A70-45546

Interorbital optimum trajectories with specified transfer angle in inverse square gravitational field, examining minimum velocity increment

24 p4412 A70-46003

Gravitational wave associated radio pulse observations using long baseline spaced receivers

24 p4412 A70-46136

GRAVITATIONAL POTENTIAL

U GRAVITATIONAL FIELDS

GRAVITATIONAL RADIATION

U GRAVITATIONAL FIELDS

GRAVITONS

Photon pair annihilation process in graviton pair, examining IR emission in two scalar particle collision

19 p3472 A70-38172

GRAVITY

U GRAVITATION

GRAVITY ANOMALIES

Mare Orientale positive gravity anomaly

17 p3158 A70-34865

Cylindrical body with gravitational and magnetic anomalies, selecting point coordinates for body parameters

19 p3407 A70-37298

Vertical gravimetric deflections calculation based on linear interpolated gravity anomalies

19 p3410 A70-37461

Stokes earth constants from gravity anomalies

20 p3617 A70-39070

Gravity and magnetic geophysical prospecting methods, discussing data acquisition, reduction and analysis in terms of underground geologic anomalies

22 p4018 A70-43086

Gravity gradiometer in moving vehicle for gravity anomaly surveying

22 p4041 A70-43657

Gravity gradiometry for fine structure of gravity influenced by local anomalies

22 p4108 A70-43659

Gravity measurement errors in high speed aircraft parallel to undulating geoid attributed to associated vertical accelerations

22 p4025 A70-43662

Gravity measurements and adjustments of First Order Gravity Network /FOGN/ in Iran

24 p4332 A70-46409

GRAVITY GRADIENT SATELLITES

NT APPLICATIONS TECHNOLOGY SATELLITES

NT ATS 1

NT ATS 3

NT ATS 5

NT ORBITAL SATELLITE

Satellite attitude control, discussing passive, active and hybrid stabilization methods including spin, gravity gradient and magnetic stabilization

01 p0197 A70-11264

Three-body gravity gradient satellite orbital plane motion analysis, studying transient damping of proposed tethered orbiting interferometer /TOI/

02 p0383 A70-12781

Satellites gravity-gradient stabilization by flywheels in elliptical orbits, designing control system for orientation and optimal motion damping

03 p0582 A70-14321

Deployable STEM /storable tubular extendible member/ booms for aerospace gravity gradient stabilization, noting interlocked BI-STEM

04 p0761 A70-14725

Optimal iterative weighted least squares estimation of rotation-coupled flexural oscillations of boom stabilized satellites in earth orbits

04 p0763 A70-15413

Semiactive gravity gradient attitude stabilization system /SAGS/ providing active pitch control and semipassive roll/yaw control, discussing design, development and testing

05 p0923 A70-15863

Attitude performance of GEOS 2 gravity gradient spacecraft, discussing prelaunch design and post-launch analyses

06 p1154 A70-17162

Capture and gravity gradient stabilization of LIDOS satellite in eccentric orbit

06 p1154 A70-17175

Stochastic Liapunov stability of satellite motion influenced by aerodynamic and gravity gradient torques, considering atmospheric density uncertainty

06 p1159 A70-18185

DODGE satellite launched into near-synchronous orbit to demonstrate gravity-gradient stabilization at high altitude and to experiment with damping techniques

06 p1159 A70-18218

Gravity gradient satellites equilibrium attitude error analysis showing relative effects of error sources

10 p1951 A70-24825

Orbit eccentricity effect on gravity gradient system with single damping boom, investigating optimum steady state and transient response conditions

11 p2123 A70-26129

Librational motion of damped gravity oriented satellite in circular orbit

12 p2313 A70-27201

Attitude-translation motion coupling effect on stability of gravity-stabilized drag-free satellites

13 p2501 A70-28424

DODGE satellite gravity gradient stabilization at synchronous altitude by flywheel and magnetic sample-and-hold damping, noting boom bending

13 p2501 A70-28425

Gravity gradient stabilization systems for earth-pointing satellites, noting long term reliability and accuracy

13 p2507 A70-29828

Gravity gradient ATS program experiments including spin scan cloud cover and stabilization research

14 p2654 A70-31145

Attitude dynamics of slowly spinning axisymmetric satellites under influence of gravity gradient torques, using analytical and numerical techniques

15 p2809 A70-31778

Book on passive gravity gradient libration dampers covering design, flight experience, evaluation criteria, performance monitoring, failure prevention, etc

16 p2983 A70-33954

Spacecraft gravity gradient stabilization by damping out oscillatory motions by energy dissipation, using combined eddy current and hysteresis dampers /Combination Passive Damper/

16 p2985 A70-34133

Torsion wire libration damper for satellite gravity-gradient stabilization at near synchronous altitudes

16 p2985 A70-34134

Two axis eddy current and single axis gravity gradient dampers for satellite stabilization

16 p2985 A70-34135

Low thrust station keeping guidance scheme for gravity gradient stabilized 24-hour satellite, solving equations of motion for near circular equatorial orbit

18 p3289 A70-36676

Gravity stabilized gyrostat satellite attitude motion stability, using three dimensional diagram and Liapunov functions

18 p3334 A70-37061

Gravity gradient attitude control for satellites near lunar far side libration point

19 p3528 A70-38868

Gravity stabilized drag free satellites attitude instabilities due to coupling between attitude and translational motions

20 p3714 A70-39535

Magnetic compensation for attitude control of gravity gradient stabilized satellite using environmental torques and moment gyro damping

20 p3668 A70-39537

Radio Astronomy Explorer satellite boom deployment method resulting in gravity gradient capture, emphasizing role of predeployment attitude and antenna Vee angle

21 p3931 A70-41856

Sliding mass and damper boom damping mechanisms for gravity-oriented satellites, using method of characteristic roots coalescence

22 p4110 A70-43436

Aerodynamic and gravitational torque effects on orbiting satellites attitude stability, applying Liapunov direct method in case of conservative aerodynamic torque

23 p4258 A70-44559

Structure and systems design of large gravity gradient stabilized orbiting tethered satellites structure for radio astronomy

23 p4259 A70-44603

Parameter optimization of gravity gradient stabilized satellite in circular orbit, considering minimum transition time and eccentricity oscillation

23 p4264 A70-45014

GRAVITY GRADIOMETERS

Microtopography effects on measuring horizontal gravity gradients by gravimeters

02 p0295 A70-11799

Dynamic gravimetry - Conference, Fort Worth, March 1970

22 p4024 A70-43656

Gravity gradiometer in moving vehicle for gravity anomaly surveying

22 p4041 A70-43657

Error sources and magnitudes in dynamic gradiometer using inertial grade pendulous accelerometer, discussing compensating modifications

22 p4042 A70-43658

Gravity gradiometry for fine structure of gravity influenced by local anomalies

22 p4108 A70-43659

Rotating gravity gradiometer for simulated terrain mapping with subsurface density fluctuations

22 p4007 A70-43668

GRAVITY WAVES

NT BAROCLINIC WAVES

Vertical wind observations during lower ionosphere wind measurements by Na release method, discussing gravity effects and standing waves

01 p0078 A70-11213

Internal gravity waves theory to interpret large amplitude oscillations in electron density and temperature and ion temperature and velocity observed in thermosphere

01 p0079 A70-11215

- Atmospheric gravity waves in F region, discussing neutral gas-ionization interaction and detection by electron density profile measurements
01 p0079 A70-11216
- Resonance amplification theory of standing interfacial gravity waves in viscous fluids applied to obtain wavelengths prediction of atmospheric bow waves
01 p0081 A70-11299
- Dispersion relation governing hydromagnetic gravity waves propagation in rotating nonisotropic medium, discussing effects of constant entropy gradient
04 p0745 A70-14473
- Steady gravitational waves produced by variable pressure in fluid channel flow assuming small perturbed flow velocity components
05 p0836 A70-16969
- Signal reception possibly due to gravitational radiation of cosmic origin, estimating energy
07 p1387 A70-19699
- Atmospheric gravity wave generation, propagation and dissipation, considering stratospheric tides
07 p1275 A70-20276
- Gravity waves generated by heating in auroral regions and propagating toward lower latitudes possibly causing thermospheric heating
08 p1491 A70-21675
- Stratified atmosphere boundary layer motions, studying turbulence and internal gravity waves characteristics
09 p1716 A70-22369
- Acoustic gravity waves horizontal ducting in atmosphere with spatially periodic wind shears
09 p1671 A70-23498
- Nonlinear oscillations averaging method applied to resonant interactions of acoustic gravity waves
09 p1729 A70-23666
- Field strength correlation with micropressure variations caused by internal gravity waves propagating in lower troposphere
10 p1883 A70-25252
- Gravity wave attenuation in F region investigated for role of ohmic losses
10 p1885 A70-25264
- Gravitational field and ellipsoidal gravitational waves anisotropy, deriving gravistatics results from electrostatics
11 p2083 A70-25944
- Gravity waves structure simultaneous determination from airborne ozone and temperature sensors and satellite observations data
11 p2076 A70-26072
- Gravity radiation detector insensitivity to cosmic rays
13 p2405 A70-28835
- Hydromagnetic coupling between neutral and ionized atmosphere perturbations, noting role of gravity waves
13 p2397 A70-29191
- Auroral currents as source of atmospheric gravity waves and associated traveling ionospheric disturbances
13 p2399 A70-29234
- Vertical momentum flux correction for planetary scale gravity waves in equatorial lower stratosphere
13 p2445 A70-29623
- Two body system with Newtonian force interaction, calculating gravitational wave energy losses and spectral decomposition
13 p2453 A70-29668
- Lower stratosphere temperature and wind periodic variations associated with shear flow gravity waves
14 p2601 A70-30124
- Nonlinear diurnal tide and gravity wave interactions at meteor heights below mesopause
14 p2579 A70-31251
- Atmospheric turbulence effects on acoustic-gravity waves propagation, deriving dispersion relation for phase velocity and propagation constants
14 p2579 A70-31252
- Neutral particle and electron density measurements by Explorer 32 proving thermospheric gravity waves association with wave-like structure in F region electron density
15 p2727 A70-31907
- Gravity wave generation during solar eclipse confirmed by satellite observation on Faraday rotation angle of ionospheric VHF transmissions
16 p2898 A70-33836
- Pulsar gravitational waves detection by lunar mascons, discussing resonant standing vibrations
16 p2980 A70-34306
- Long and short period internal gravity waves in atmosphere observed by high resolution radar, investigating generation mechanisms
17 p3075 A70-34609
- Frequency spectra of gravitational waves radiated from celestial phenomena, suggesting mass exchange in binary containing neutron star
17 p3067 A70-34619
- Zonal wind component in lower ionosphere observed for gravity waves partial reflections by temperature discontinuities, using least mean square method for reflection coefficient
17 p3077 A70-34946
- Self interaction of nonsingular sourceless first order pulse of gravitational radiation imploding from infinity to focus point and exploding to infinity
18 p3291 A70-36475
- Internal gravity waves reflection, inspecting differential equations for behavior of two wave parameters
19 p3471 A70-37779
- Maclaurin spheroid secular stability, examining energy dissipation of gravitational radiation
20 p3702 A70-39017
- Jacobi ellipsoid quasi-static evolution by gravitational radiation, discussing direction of increasing angular velocity toward nonradiating state at bifurcation point with Maclaurin sequence
20 p3702 A70-39018
- Gravitational radiation scattering by Schwarzschild horizon, discussing odd parity waves of angular momentum
21 p3878 A70-40731
- Geostationary beacon satellite recording of gravity wave influence on ionospheric electron content
21 p3815 A70-40943
- Lower thermosphere minor gaseous constituents vertical transport by nonlinear gravity wave process, showing density scale height decrease from diffusive equilibrium
21 p3818 A70-41098
- Internal gravity waves mathematical model for atmosphere with arbitrary distributions of temperature, molecular weight, viscosity and conductivity, deriving wave propagation into thermosphere
21 p3821 A70-42257
- F 2 region anisotropic response to individual internal gravity waves as function of propagation azimuth
23 p4185 A70-43844
- Lower atmosphere gravity wave motions due to cooling by solar eclipse shadow
23 p4185 A70-43845
- ELF acoustic gravity wave arrival from Apollo launches recorded by Doppler shift ionospheric sounder channeled near mesopause and lower thermosphere
23 p4187 A70-43859
- CAT origin in unstable atmospheric shear and gravity waves, using ultrahigh resolution radar for observation of transition process
23 p4214 A70-44032
- Internal gravity wave shape at temperature inversion in lower atmosphere from high resolution vertically pointing FM/CW radar sounding
23 p4162 A70-44038
- Gravity waves produced in liquid electric conductor by piston subjected to sinusoidal pulsation, calculating magnetic field effect on amplitude and phase velocity
23 p4225 A70-44208
- Gravitational acoustic wave emission in isothermal stellar atmosphere with mass sources
23 p4242 A70-44267
- GRAY GAS**
- Differential equation with associated boundary conditions constructed for radiative transfer with spherical symmetry, applying to gray gas between concentric black spheres
03 p0603 A70-12904
- Two dimensional approximate formulation for radiant heat flux applied to radiative equilibrium in gray gas
03 p0603 A70-12905
- Thermal radiation shield influence on stationary radiative heat transfer in closed arbitrarily shaped two gray surface system
10 p1966 A70-23865
- Radiative transfer effect on thermal instability and critical Rayleigh number in gray transparent fluid layer heated from below
10 p1967 A70-23952
- Radiative heat transfer through gray gas in equilibrium between concentric spheres, using variational method
13 p2521 A70-29137
- Radiative heat transfer in optically thick gas between concentric spheres treated by matched asymptotic expansions, comparing results with Rosseland approximation and numerical solution
14 p2663 A70-30266
- Nomogram for true and apparent radiometric temperatures of remote graybodies in presence of atmosphere
14 p2577 A70-31231
- Temperature distributions and heat flux for gray gas in radiative equilibrium bounded by walls with different temperatures, using differential approximation [AIAA PAPER 70-834]
16 p3001 A70-33929
- Nonadiabatic self absorbing radiative flow of gray gas around sharp cornered blunt body at hyperbolic speed by integral relations method
17 p3010 A70-34974
- Steady state radiative heat transfer through gray gas in spherical cavity, solving transport equation by singular integral equations for uniform heat generation
23 p4283 A70-44784
- GREASES**
- Thermal conductivity temperature dependence measured in greases bulk and thin layers at liquid helium temperature
05 p0874 A70-16842
- Thickening of fluids with tetrafluoroethylene polymer to provide physically and chemically stable grease type lubricants for military applications
07 p1292 A70-18863
- Liquid and solid lubricants, discussing properties, temperature ranges, costs, environmental effects and outlook
07 p1316 A70-18953
- Apiezon N grease thermal conductivity at liquid helium temperatures noting behavior as insulator
12 p2258 A70-27024
- Temperature and long term effects on volatility of perfluoroalkyl ether and polysiloxane greases [ASME PAPER 70-HT-31]
22 p4058 A70-42435
- GREAT BRITAIN**
- UK aeronautics R and D, attributing competitive technology lag in military and subsonic civil fields to failure in aims and targets and program cost justification
02 p0402 A70-12306
- Intelsat 4 communications satellite design and manufacture, discussing European participation with emphasis on British involvement
02 p0383 A70-12649
- Royal Air Force air reconnaissance function, discussing cameras, films, processing and printing, photointerpretation, etc
03 p0495 A70-14144
- British military and civilian aircraft and flying between World War I and II, discussing weapons systems and accidents
05 p0794 A70-16113
- Guided weapons management techniques applied to Rapier light weight anti-aircraft weapon system
08 p1601 A70-21037
- Aviation maintenance in Britain, discussing continuing airworthiness techniques, development and international aspects
08 p1436 A70-21256
- UK UHF telemetry command station capabilities for Skyenet satellites control, discussing equipment [AIAA PAPER 70-415]
11 p2030 A70-25420
- Edwards Inquiry Report into British Civil Air Transport based on cost effective economic study, involving airlines and regulatory system
11 p2153 A70-25855
- Edwards Report on UK domestic air services, considering unprofitability, trunk route competition and V/STOL development exploitation
11 p2153 A70-25860
- British air transport from aircraft manufacturing industry viewpoint, discussing governmental organization of air industries and aircraft design negotiation atmosphere
11 p2153 A70-25861
- British national and Commonwealth collaborative sounding rocket programs, discussing organization, scope and range facilities
13 p2523 A70-28685
- Air traffic in 1980s in UK, considering domestic services, V/STOL operation and private and executive aviation
14 p2667 A70-30102
- Commercial aircraft manufacturing industry in UK, discussing SST, wide cabin aircraft, turboprop replacement, engine influence on airframe industry, etc
14 p2668 A70-30936
- Military aviation economics in UK emphasizing aircraft industry and government cooperation in meeting RAF requirements
14 p2668 A70-30938
- COSPAR report on UK space research /1969/ covering neutral atmosphere, ionosphere, solar radiation, etc
15 p2831 A70-31723
- RAF aircraft damage due to bird strikes in U.K., discussing preventive measures at airfields
18 p3211 A70-35978
- British government technological partnership with domestic industry and other countries
21 p3956 A70-41892
- British National and Commonwealth collaborative sound rocket programs, discussing organization, scope and range facilities
24 p4431 A70-46124
- GREAT CIRCLES**
- Great circle vector formula in space triangulation, discussing topocentric and geocentric position of satellite and tracking stations and absolute distance determination
03 p0445 A70-13193
- Rayleigh and Love wave phase velocities for great circle paths from ordinary seismograms of World Wide Standard Seismographic Network /WWSSN/ stations
09 p1672 A70-23702
- GREAT POLAR CAPS**
U POLAR CAPS

GREECE

Report to COSPAR on Greek space research /1969/ covering big planets observations, solar activity, ionospheric propagation, airglow measurements, satellite trackings, etc

15 p2830 A70-31714

GREEN FUNCTION

Energy spectrum of electrons and holes in semiconductors under strong electromagnetic wave field, calculating electron-phonon interaction Green function

01 p0155 A70-10184

Green function type solutions of shell equations by small parameter technique for case of free terms consisting of Dirac delta function

01 p0212 A70-11565

Premature saturation in strongly magnetic systems explained by model with nonuniform magnon modes, applying time dependent Green functions

02 p0338 A70-11886

Rectangular anisotropic beam torsion using Green function combined with wide step network method

03 p0593 A70-13471

Reflection coefficients of circular posts in rectangular waveguides computed by Green function and method of moments

05 p0820 A70-16384

Existence and uniqueness of nonlinear boundary value problem solutions formulated by fixed point theorem and Green function

05 p0876 A70-16562

Green operator structure and eigenvalue approximation of boundary value problems regarding vibrations and buckling of clamped plates using orthogonal invariants

05 p0876 A70-16563

Homogeneous gravitating sphere deformation by internal dislocations determined using Green dyad

06 p1055 A70-17605

Boundary value problems in nonlocal elasticity, considering two one dimensional media coupling with microstructure by Green function analog

07 p1399 A70-18665

Green function of region near circle approximation by matrix method, considering Laplace differential equation solution, conjugate harmonic function and conformal transformation

07 p1253 A70-18924

Crystals nonlinear permittivity related to temperature-time Green function for electromagnetic radiation, determining crystal polarizability by light-excitation method

07 p1335 A70-19868

Green matrices construction for joint shells by method of arbitrary constants variation, considering strained state symmetrical with joint lines

07 p1413 A70-20144

Quadrature solution for elastic sphere deformation by axisymmetric normal loads, writing Green function of boundary value problem in finite form

08 p1585 A70-20956

Boundary value problems in one speed transport theory, applying Green function technique to neutrons with spherical symmetry

08 p1542 A70-21253

Asymptotic distribution of operator eigenvalues for self adjoint elliptic boundary value problem in unbounded region using Green function

09 p1711 A70-22148

Ferromagnetic crystal weakly coupled spin Green and correlation functions calculated for wide temperature range

09 p1740 A70-23193

Mixed boundary value problems with radiation-type boundary conditions solved by complex Green function, discussing water waves in irrotational motion

13 p2452 A70-29536

Monograph on nonlinear oscillation equations resonance solutions and solution stability, considering Green matrix, differential equations reduction to integrodifferential equations, etc

14 p2618 A70-31417

Electromagnetic field determination from oscillating vertical and horizontal electric dipoles above flat earth, demonstrating Sommerfeld formulation and dyadic Green function technique equivalence

16 p2861 A70-32974

Transient heat and mass transfer in adiabatic regenerator, solving mathematical model in terms of Green functions

17 p3197 A70-35542

Quadrature solution for elastic sphere deformation by axisymmetric normal loads, writing Green function of boundary value problem in finite form

20 p3719 A70-39379

Time harmonic waveguide scattering involving metallic obstacles, obtaining numerical solution by finite difference Green function method

20 p3586 A70-39469

Periodic boundary value problems with cyclic totally positive Green functions, considering applications in vibrating physical systems and spline theory

23 p4213 A70-44899

Green function theory of evaporation of He 3 atoms from liquid He 3/He 4 mixtures, determining energy distribution

24 p4377 A70-45255

GREEN THEOREM

U GREEN FUNCTION

GREENHOUSE EFFECT

Greenhouse effect in Venusian atmosphere, discussing cause of vertical temperature distribution established by Venera 4 probe

01 p0192 A70-11506

Radiative-convective equilibrium model to investigate photodissociation of water in Venus atmosphere, considering greenhouse effect

04 p0757 A70-15516

IR absorption properties of CO, HCl and sulfur dioxide measured for role in Venus greenhouse effect

08 p1579 A70-21567

Venus atmosphere and surface conditions, describing temperature, accumulation of carbon dioxide and runaway greenhouse effect

15 p2806 A70-32771

GREENLAND

Oxygen 18 concentration in Greenland ice core correlation to solar activity index, indicating earth temperature control by solar activity

13 p2489 A70-28909

GRIDS

Precision machining and repair of radioactive Plum Brook Reactor core fuel grid

01 p0140 A70-10322

Spectral energy transfer measurements in isotropic grid turbulence to determine validity of dynamical equation

03 p0468 A70-13785

Pulsed grid modulation for ion cyclotron resonance spectrometer

07 p1286 A70-19974

Ion-burst excited by pulsed mesh grid in plasma in connection with sheath structure

10 p1922 A70-23989

Grid turbulence unified analysis, estimating turbulence intensity, dissipation length and integral scale for any grid flow

10 p1871 A70-24976

Error propagation in rectangular grid leveling networks assuming fixed height of center of mass

11 p2045 A70-25798

Monograph on axially symmetric tandem grids for supersonic flow deceleration to subsonic speeds, using schlieren optical tests and pressure measurements

11 p1977 A70-26525

Alouette plasma resonance stimulated perpendicularly to magnetic field by planar dipole charge sheet and permeable grids

13 p2467 A70-29907

Dynamic stiffness, natural frequencies and mode shapes of prismatic and thin walled open grids, including warping and shear flange deformation

14 p2659 A70-31132

Closed form difference equations for finite element models in structural mechanics, noting plate and grid applications

16 p2990 A70-33672

Transonic compression grid functions, considering shock wave configurations

16 p2836 A70-33752

Plane diffuser grid profiles for subcritical velocities of oncoming flow, using wind tunnel test data

18 p3205 A70-36129

Plane electromagnetic wave diffraction by infinite grid above finite dielectric layer, calculating field distribution

19 p3375 A70-37281

Sheaths effect on capacitance of plane grid capacitor in plasma, discussing satellite aerials admittance

21 p3792 A70-42046

Rectangular and triangular grids with variably sized mesh elements for finite difference analysis of shell structures

23 p4272 A70-44709

GRIFFITH CRACK

Quasi-brittle fracture of plastic materials based on Griffith theory and crack propagation, analyzing real surface energy and work of plastic strain

01 p0212 A70-11562

Vacancies influence on macrodefect nucleus formation in single metal crystals under uniaxial strain explaining Griffith crack initiation

05 p0861 A70-15784

Stress distribution in vicinity of stress-free Griffith crack in elastic solid acted upon by symmetric distribution of body forces

05 p0930 A70-16084

Surface stress distribution to maintain Griffith crack in prescribed shape, using theorems of Fourier transforms and dual integral equations

05 p0930 A70-16086

Mixed boundary value problems of plane elasticity, solving stress field of central Griffith crack in wedge using singular integral equations

05 p0932 A70-16173

Equilibrium cracks in elastic bodies on basis of atomic interaction law, using Griffith problem to estimate bearing capacity

07 p1400 A70-18666

Elastic equilibrium of semiinfinite two dimensional medium with Griffith crack under axisymmetric load and free and rigidly clamped edges

08 p1594 A70-21771

Viscoelastic plate crack growth analysis within continuum mechanics framework as analog to Griffith problem

13 p2510 A70-28671

Griffith flaws limitation effect on glass matrix-tungsten composites strength, considering dispersed phase with wide particle size distribution

13 p2437 A70-28827

Brittle rupture cracks theory, discussing unstable /Griffith/ crack, stress intensity coefficient, propagation criterion, etc

13 p2517 A70-29715

Impact loaded Griffith-Irwin, Charpy and drop weight tear tests of fracture toughness for design, screening and materials acceptance

15 p2819 A70-32233

Rigid inclusion effect on stress distribution in isotropic infinite solid with Griffith crack under plane strain

16 p2994 A70-34250

Three dimensional stress fracture criterion for initial microcracking derived by generalizing Griffith flow theory

19 p3540 A70-37955

GRINDING [COMMINUTION]

Pulverization effects on lunar rocks albedo under full moon conditions for different grain sizes, noting inverse relation to absorption coefficient

14 p2649 A70-31214

GRINDING [MATERIAL REMOVAL]

NT METAL GRINDING

Temperature field in work piece generated by grinding wheel face investigated for cylindrical and surface grinding

10 p1894 A70-24291

Wear intensity of abrasives during fine grinding of Armo Fe, Ti and Ti alloys, comparing friction and chemical composition effects

15 p2743 A70-31640

Grinding by abrasive tape, superimposing transverse vibrations to improve performance and life

22 p4046 A70-42816

Automatic TV radioscopic X ray control for mass NDT of refractories and grinding wheels

24 p3468 A70-45723

GRINDING MACHINES

Tangential cutting force measurements during Ti grinding by microtools, noting properties of W, aluminum boride and zirconium carbide

04 p0697 A70-14466

Roller bearings convex conical surfaces grinding using centerless grinder

08 p1506 A70-21192

GROOVES

Radiant heat exchange for rectangular groove represented by integral equations using rapid iteration method

08 p1600 A70-21835

Capillary grooves effect on surface wetting and evaporation using heat transfer coefficients for grooves with triangular, semicircular and square cross sections

09 p1790 A70-23559

[ASME PAPER 69-HT-19] LF plane wave scattering from semielliptic groove in conducting ground plane noting validity for arbitrary polarization, incidence, directions and eccentricity

13 p2453 A70-29822

GROOVING

Teflon crosshatched ablation patterns elimination by grooving or glass filler addition

17 p3193 A70-34483

GROUND BASED CONTROL

NT AIR TRAFFIC CONTROL

NT RADAR APPROACH CONTROL

Terminal area approach control sequencing, using digital computer to allocate identification mode and landing time slot

02 p0332 A70-11971

Display/control system and key technical decisions at Manned Space Mission Control Center, discussing command consoles

05 p0829 A70-16194

Air traffic control system using ground controlled satellite-borne phased array antenna to overcome UHF downlink path loss

11 p2077 A70-25421

[AIAA PAPER 70-497] Ground ATC facilities, discussing landing, automation, surveillance, communication and navigation

11 p2079 A70-25723

V/STOL aircraft ground guidance systems using microwave instruments for approach and landing

12 p2266 A70-27458

[SAE PAPER 700322] Intermittent positive control system for issuing commands to normally uncontrolled aircraft for midair collision avoidance, discussing aircraft and conflict detection

12 p2267 A70-27634

Intermittent positive control (IPC) role in midair collision avoidance, using mathematical model to determine command frequency and implementation 12 p2269 A70-27913

Ground controlled remote manipulator spacecraft system through wideband radio link for satellite maintenance and repair 15 p2810 A70-31780

Apollo lunar landing flight control functions, organization, disciplines and activities at Mission Control Center 17 p3134 A70-35292

Computerized automatic ground equipment (CAGE) as intelligence system for checkout and control of launch vehicles and spacecraft 19 p3397 A70-37915

Lunik 16 lunar soft landing technique, discussing automatic and ground controlled mission phases 22 p4110 A70-43210

Upper Air Space Control Center Automatic Data Processing and Display System for air traffic control 24 p4323 A70-46238

GROUND CREWS

Aviation medicine, discussing pilots physical fitness and training, spatial orientation, ground crew, data flow, etc 08 p1451 A70-20977

Flying safety and human factors from job dissatisfaction in Japan Air Self Defense Force 08 p1453 A70-21794

Human engineering in weapon systems development, considering flying and ground personnel training plans 12 p2177 A70-27038

GROUND EFFECT

Ground proximity effect on rectangular wing, studying lift and pitching coefficients dependence on angle of attack 03 p0407 A70-13493

Pitching moment coefficient changes due to ground effect in fixed wing aircraft flight test method, considering constant angle of attack approach 04 p0619 A70-15394

Ram wing vehicles aerodynamics application to high speed ground transportation, studying effect on passenger ride quality [AIAA PAPER 70-142] 06 p0973 A70-18145

Ground reflection effect on plane uniform sound source distribution applicable to compressor and fan noise under far field conditions 09 p1726 A70-22240

Atmospheric model for flow crossing ground obstacle using nonlinear differential equation 09 p1718 A70-22848

Integral equation for radiation patterns from vertical antenna over variable impedance surface [AFCRRL-69-0315] 09 p1639 A70-23670

Super sonic booms occurrence and propagation, discussing aircraft operating conditions for prevention of effect on ground 10 p0000 A70-24130

Numerical solutions of thick cambered jet flap in ground effect for flat plate and diamond shaped airfoil [AIAA PAPER 69-738] 12 p2155 A70-27199

Ground effect for increasing lift during aircraft landing 13 p2345 A70-28973

Multiple jet flow exhausting into arbitrary crossflow in ground effect, solving continuity and momentum equations for jet path and induced velocity field 13 p2387 A70-29011

Lifting surface problem for finite span wing in ground effect using matched asymptotic expansions method 14 p2527 A70-30280

Ground effect visualization at low speed flow around aircraft models, discussing airbus, VTOL aircraft and Concorde 14 p2528 A70-30291

Aperture antennas admittance calculation, considering upper bound on error involved in approximating finite ground plane conductivity by perfect conductivity 20 p3599 A70-40316

Planar wing with end plates in ground effect, calculating minimum induced drag by approximation theory 21 p3743 A70-40919

GROUND EFFECT MACHINES

NT HOVERCRAFT GROUND EFFECT MACHINES

International agreement to govern hovercraft use covering application range, registry, rights, owner or user responsibility, leasing and goods transportation 01 p0220 A70-10373

Forward air cushion performance of tracked hovercraft entering tunnel, determining arrival of reflected expansion wave at vehicle front 02 p0226 A70-12313

Two seater hovercraft development, considering lift system, fan, transmission and structural designs and construction steps to keep within automobile cost range 03 p0414 A70-14148

NASA research studies supporting tracked air cushion vehicle (TACV) program illustrating

aerospace technology application to ground transportation [AAS PAPER 69-565] 04 p0622 A70-14639

Multiple skirt air cushion vehicle (ACV) pitch and heave dynamic characteristics, describing mathematical modeling and analog computer simulation 04 p0624 A70-15389

Water tests with N 300 Naviplanes confirming flexible skirt concept regarding speeds and stability 08 p1435 A70-20622

Wave resistance of pressure field of hovercraft drifting over water surface determined as definite integral based on Wehausen expression 09 p1609 A70-22219

Camber and twist distributions for closed ground effect wing optimum design for zero induced drag, employing linearized theory 10 p1801 A70-24158

Inviscid flow theory for ACV high speed peripheral jets, considering component inefficiencies, pressure losses, nozzle geometry, etc 12 p2156 A70-27211

Plenum-chamber air-bearing and labyrinth-seal types air cushion lifting mechanisms performance in simulated hovering flight 12 p2162 A70-27981

High speed commercial transport hovercraft economic factors, considering traffic needs, fares, service frequency, reliability, etc 13 p2347 A70-29158

Pneumatic suspension systems for air cushion skirts 16 p2841 A70-33759

Ground effect machine, discussing tactical transport support role 16 p2843 A70-34265

External aerodynamics role in handling qualities of amphibious hovercraft, discussing tests of hull shape, air cushion efflux and hollow models 17 p3017 A70-34919

Tracked air cushion vehicle dynamic heave response, examining flow characteristics, active lip control, guideway contact, acceleration response, etc 17 p3017 A70-35178

Hydrofoil and hovering craft design by fiber technology, discussing composite materials, whisker mechanical properties, polycrystalline fibers, matrix materials, etc 19 p3456 A70-38941

Hovercraft wind directional stability and control by cam operated fin-tab assembly 19 p3357 A70-38942

Bearing force and moment produced by motion of inclined plate supported by compressed air in ground effect machines with small angle of attack 20 p3557 A70-39140

Static and dynamic spring constants of peripheral jet air cushion vehicle in heaving motion, obtaining sinusoidal input response characteristics 22 p3960 A70-42279

Nonlinear heaving motion of plenum-chamber air cushion vehicles induced by sinusoidal ground irregularity 22 p3961 A70-42280

Peripheral jet ground effect machine model heaving motion, investigating static hover and forced and free vibration characteristics 22 p3961 A70-42281

Ground Effect Takeoff and Landing (GETOL) aircraft, evaluating energy absorption capability of air cushion landing gear in touch-down condition 22 p3961 A70-42282

Horizontal flight speed effects on aerodynamic characteristics of air cushion vehicles with elliptical planform 22 p3959 A70-42801

Hovercraft operational advantages and legal status 22 p4127 A70-43499

GROUND HANDLING

AIRLORD system consisting of central data processing and I/O units for predeparture handling of passengers and freight at airports 11 p2013 A70-25365

Performance standards for intra-airport batch type people-moving systems, discussing seating requirements, platforms and stations, communications and power systems, etc [SAE PAPER 700260] 12 p2206 A70-27432

Air terminal and ground transfer design to provide improved access to aircraft and total transportation time reduction 12 p2208 A70-27992

Aircraft ground damage during maintenance and servicing 15 p2675 A70-32210

Mobile lounges and airport productivity concepts for optimal handling of passengers at airport terminal [AIAA PAPER 70-918] 17 p3064 A70-35830

C-5 aircraft cargo loading system for terminals minimizing ground time 17 p3064 A70-35831

Airport terminal design, describing electromechanical baggage handling and sorting systems [SAE PAPER 700261] 18 p3237 A70-36822

Jet fuels ground handling at airfields, describing flow monitors, filters, fueling techniques, etc 22 p4006 A70-43093

Air cargo management problems, discussing economics, ground handling, Jumbo jets, terminal facilities, mechanization, document handling, information flow, data systems, etc 22 p4006 A70-43269

Centralized terminal air cargo handling capacity, discussing Jumbo aircraft, airside ramp system, container movement, computer control and automation 22 p4006 A70-43270

Automated air cargo and data flow system with on-line computers, discussing handling, document management, load planning, information transmission, storage and mechanized freight systems 22 p3994 A70-43271

Computerized air cargo clearing, discussing London Airport Cargo Electronic-data-processing Scheme 22 p4007 A70-43272

GROUND OPERATIONAL SUPPORT SYSTEM

Integrated logistic support for cost effectiveness of ground communication system 01 p0220 A70-10114

GROUND RESONANCE

U GROUND EFFECT

U RESONANCE

GROUND RUN-UP

U ENGINE TESTS

U GROUND TESTS

GROUND SPEED

Doppler memory mode of ground speed and drift angle calculations analyzed by operators for possible errors 04 p0716 A70-14629

GROUND SQUIRRELS

Carbohydrate-phosphorus metabolites content in gophers brains under normal conditions during hypothermia and spontaneous warming at room temperature 01 p0012 A70-10055

GROUND STATE

Adiabatic and distortion approximations to two state treatment of ground state H atoms collisions at low energies 01 p1146 A70-10284

Ammonia spectral lines positions, intensities and half widths under Jovian conditions calculated, including ground state rotation and rotation inversion bands 02 p0368 A70-11820

Quadrupole moment matrix elements in adiabatic approximation for transition bands of hydrogen, HD and deuterium molecules in ground electronic state 02 p0342 A70-11822

Rotation-vibration matrix elements of quadrupole moments and absorption coefficients of ground electronic states of hydrogen, HD and deuterium 02 p0902 A70-11823

Excitation of ground configuration of Fe XIII for density and temperature range in solar corona, using proton collisions, electron collision strengths, etc 05 p0902 A70-16434

Radiative lifetimes of transitions to ground state for CS, SO and diatomic sulfur, showing relationship to absolute transition probabilities in terms of physiochemical applications 05 p0885 A70-16456

Self gravitating bosons or fermions equilibrium configuration in ground state, confirming Oppenheimer-Volkoff treatment approximation 08 p1581 A70-21741

Quasi-bound levels determination method for molecular hydrogen ground state 10 p1919 A70-24395

Molecular I ground state dissociation energy value, proposing spectroscopic reassignment 12 p2180 A70-26861

Quantum mechanical model of electron scattering by homonuclear diatomic molecule at ground state, calculating differential and integral cross sections for elastic scattering 14 p2618 A70-30113

Vibrational energies, rotational constants and inter-nuclear potential of ground state molecular iodine, using reanalyzed spectroscopic data 16 p2954 A70-33056

Carbon ground state correlation energy calculation, emphasizing assessment of truncation error sources 16 p2954 A70-33277

Li ion elastic scattering by He, calculating ground state interaction potential 16 p2956 A70-34310

Nitrogen deactivation by ground state atomic oxygen resulting in metastable oxygen atom as auroral green line source 17 p3080 A70-35770

Steepest descent method for determining lowest ground state eigenvectors for molecular wave configurations 22 p4062 A70-42747

GROUND STATIONS

NT DEEP SPACE FACILITY

NT INTEGRATED MISSION CONTROL CENTER

Gain, noise temperature and gain to noise temperature ratio measurement techniques for electrically large earth station antenna, recommending radar star technique

01 p0051 A70-11121

Automatic picture transmission (APT) ground station design for reception of weather satellite cloud cover photographs, discussing SNR

01 p0059 A70-11451

Receiving station geodetic coordinates computed from Doppler curves of artificial satellite, using method of differential corrections

02 p0254 A70-11757

Ground station geocentric coordinates from intersection of spatial directions in Baker-Nunn network determined by satellites

02 p0254 A70-11758

Automatic camera theodolite at Sophia satellite tracking station, discussing instrument constants

02 p0273 A70-11774

Azimuth between two stations of triangulation net determined by simultaneous observation of two satellites, discussing mathematical principles and applications in Europe

02 p0289 A70-11797

Satellite international system chain consisting of down path, receiving earth station and domestic receiver for Europe, North Africa and Middle East TV distribution

02 p0258 A70-12420

Intelsat satellites telemetry and telecontrol (TTC), describing Fucino plant design and operation

02 p0263 A70-12647

Small read-out stations for automatic picture reception from meteorological satellites, detailing design

02 p0382 A70-12648

Faraday rotation observations on Explorer 22 signals at two receiving stations, discussing comparative evaluation procedures and results

03 p0472 A70-12874

Synchronization of ground stations clocks by time scale comparison with overflying aircraft

[ONERA-TP-759] 03 p0487 A70-13642

Ground stations and low orbiting satellite system for automatic collection of meteorological data over Italy

03 p0581 A70-13832

Channels demand assignment between earth terminals of international satellite communication systems, examining multiple access problems

03 p0453 A70-14323

Data transmission from automatic space stations on Mars and Venus, considering relaying via artificial planet satellite or direct transmission to ground station

04 p0648 A70-14931

Ground station location, equipment and function for radio communication with German research satellites, noting NASA and ESRO cooperation

04 p0664 A70-15304

Second antenna at Pleumeur-Bodou /France/ for satellite transmissions reception in Intelsat network program

05 p0826 A70-15981

Antenna-central building connecting equipment at Pleumeur-Bodou space telecommunication center, discussing frequency compression demodulators

05 p0819 A70-15985

Satellite communications influence on ground stations design, describing steerable antenna and receive and transmit configurations for domestic station

05 p0811 A70-16095

Spacecraft telecommunication and tracking systems in Gemini, Mercury and Apollo programs, emphasizing Apollo command and lunar modules equipment and mission ground stations

05 p0813 A70-16326

Earth resources survey aircraft system producing optical spectrum imagery of continental U.S. with photometric and photogrammetric fidelity

05 p0850 A70-16686

Magnetic storm /14 September 1966/ observation by Explorer 33 in geomagnetic tail and by polar stations, studying relation in magnetosphere and on earth

05 p0843 A70-16764

Microelectronic L-band phase-lock loop receiver for data transmission between earth stations and satellites

06 p1017 A70-17338

Simultaneity circle for calculating spatial direction of straight line joining satellite observation stations, noting time factor role

06 p1139 A70-17548

Spatial direction Riga-Cairo determined using simultaneous photographic observations of Pageos A satellite

06 p1054 A70-17550

Airborne and ground based radar data on thunderstorm echoes compared within framework of storm reflectivity model and radar theory

06 p1010 A70-18246

Gokhberg magnetovariational sounding method for single location analysis of magnetic storms early phases, comparing ground station network observations

07 p1277 A70-20440

Positive and negative correlations in F 2 layer perturbations by network of paired conjugate ionospheric stations at low latitude

07 p1277 A70-20450

Optimal distance between satellite communication system ground stations for surface network cost equivalent, analyzing economic efficiency for various cases

08 p1456 A70-20569

Optimal satellite communication system design concerning station spectrum and interference limits

08 p1459 A70-20805

Operational figure of merit of high performance antennas in communication satellite earth stations as function of design

08 p1471 A70-20825

German satellite ground station system central station design, discussing cooperation between aerospace institute and electronic company

08 p1481 A70-21368

Digital data display system designed for central station of German ground station system

08 p1462 A70-21369

ARCOM earth terminal for Domestic Satellite Communication System bringing telephone, TV and data service to northern Canada

09 p1656 A70-22945

Digital record message communication satellite network system involving synchronous satellites and small earth terminals

10 p1834 A70-24327

Satellite communication system using delta modulation for telephone service to large number single channel earth stations

10 p1834 A70-24329

Demand assignment economics relative to ground stations in satellite telecommunication systems

10 p1838 A70-24360

Intermeshed TDMA systems efficiency in interconnecting ground stations in communications satellite systems, discussing rigid and variable burst lengths

10 p1839 A70-24363

Satellite capacity utilization for mixed earth stations network using SPADE concept/digital satellite communication system employing demand assignment and voice-activated carrier techniques

[AIAA PAPER 70-420] 11 p1996 A70-25404

Earth station antenna radiation diagrams with respect to interference isolation capability

11 p2015 A70-25414

UK UHF telemetry command station capabilities for Skynet satellites control, discussing equipment

[AIAA PAPER 70-415] 11 p2030 A70-25420

Low cost earth station and antenna for Canadian domestic satellite, bringing color TV to northern territories

[AIAA PAPER 70-432] 11 p2000 A70-25458

Plumeur-Bodou satellite telecommunications center, discussing antennas

11 p2031 A70-26009

SHF tactical satellite communications ground terminals, discussing system concepts, relationship to satellites and design problems

11 p2031 A70-26259

Cassegrain antenna feed system for satellite communication earth stations, noting low noise characteristics

11 p2011 A70-26716

Earth resources satellite ground data handling system providing initial processing, reproduction, indexing, storage, retrieval and dissemination functions

12 p2191 A70-26943

Atmospheric refractivity role in range errors from ground station to stationary satellite and in range rate measurement

12 p2189 A70-28058

Ground stationed automatic orbital operations system /AOOSY/ for satellites and space probes, discussing flow diagram and Siemens computer programming

13 p2372 A70-28398

Wind measurement with two spaced coherent-pulse radar stations for probing same region of meteor zone

14 p2582 A70-30317

Meteor observation station design and operation, describing calibration difficulties and reflecting points coordinates determination

14 p2583 A70-30331

Space-surface path loss due to atmospheric gases, rain and clouds, considering military ground site location for space communication

14 p2608 A70-30596

Lidar for cloud height measurements from ground and meteorological satellites

14 p2611 A70-31155

Electronically tracking antenna system for satellite reception in VHF range suitable for unmanned receiving stations

14 p2558 A70-31196

Cosmic rays geomagnetic bending and effective angles of approach for various ground stations

14 p2633 A70-31313

Ground sounding of ionization variations and vertical distribution using model, integral and normal laminar methods

15 p2729 A70-32078

Sirio satellite SHF transponder for experiments in atmospheric propagation and communication between ground stations

15 p2709 A70-32285

Spatial vectors determination by two laser measurements and one optical observation of artificial satellite

16 p2926 A70-33118

Low noise wideband amplifier design for Intelsat 3 satellite ground stations

16 p2877 A70-33415

Ground based photographic experiments using portable equipment during 7 March 1970 solar eclipse in North Carolina

16 p2977 A70-33840

Luminous emissions related to Apollo 12 mission observed in Belgium, discussing flight chronology, gas ejection, stage separation, etc

16 p2981 A70-34318

High power TWT for satellite communications ground stations, including Intelsat experience

17 p3054 A70-35282

Radar receiving station equipment for studying upper atmosphere by radio meteor echoes

17 p3047 A70-35605

Navigation aids evolution and trends, noting ground stations, Intelsat 3 and navigation satellites

17 p3048 A70-35879

Loran C principles, ground station operation and navigation equipment

17 p3135 A70-35881

Small earth stations to link isolated areas with Intelsat network, discussing costs

18 p3229 A70-36957

Solar flare of 25 February 1969 ground observations comparison to satellite data, measuring magnetic fields, radio emission, sunspots, ionospheric effects, etc

19 p3513 A70-37497

Ground station to retrieve and process data recorded on airborne digital magnetic tape instrumentation system for Hawker Siddeley Harrier flight development

19 p3384 A70-38550

Earth resources ground data processing in image formats from sensors in aerospace platforms, discussing collection control, image storage, retrieval, etc

20 p3591 A70-39058

Communication satellites systems for civil application, considering ground stations design, regional communication, ATC and maritime communications and navigation

20 p3585 A70-39409

SKYNET PCM telemetry and command station, discussing system design, pseudomonopulse feed, command and computer subsystems, etc

20 p3589 A70-40322

Small ground stations in communication satellite systems involving regional telecommunication, TV distribution, air traffic and maritime applications, data exchange, weather and education service

21 p3785 A70-40764

Multistation observations of long range field aligned backscatter irregularities in F layer, using ray path calculations

21 p3814 A70-40940

Fences and pits effectiveness for shielding satellite earth stations from local terrestrial facilities interference

21 p3789 A70-41342

Transportable earth station for satellite communications system, describing antenna design and transportation modes

21 p3798 A70-41344

Ground station requirements for transition to multitransponder INTELSAT 4 satellite, discussing interference filtering, group delay distortion, etc

21 p3789 A70-41346

Multiple beam earth station torus microware antenna for satellite communication with nonplanar field of view over geostationary arc

21 p3798 A70-41357

Interference coupling between satellite ground station and radio relay station due to rain scattering at SHF

22 p3990 A70-43201

Pc-1 and IPDP pulsations propagation characteristics from ground based measurements, discussing spectral structure, waveforms, polarization, time delay between different observation stations, etc

22 p4021 A70-43277

Eurospace Symphonie satellite communication system and ground facilities, discussing international and regional coverage

22 p4111 A70-43504

Communications satellites for offshore systems, noting development of small earth station

22 p3991 A70-43576

Electromagnetic interference reduction between communication satellite earth stations and microwave radio relay stations by pit shielding
22 p3991 A70-43577

Ground TV station network operating with communication satellites in remote areas
23 p4159 A70-43758

Low noise dual receiver system for satellite communication earth station using parametric and transistor amplifiers
23 p4169 A70-43791

Satellite orbital elements determination by differential correction procedure, considering observation stations distribution influence on accuracy
24 p4406 A70-45530

Doppler satellite measurements in semidynamic geodesy using data from Mediterranean ground stations
24 p4312 A70-45543

GROUND SUPPORT EQUIPMENT
NT GROUND OPERATIONAL SUPPORT SYSTEM

Power supply equipment with automatic control for category 2 airport lighting, discussing reliability and economic efficiency
01 p0055 A70-10300

Orbital space station operations requirements and interactions, considering experimentation, support vehicles, ground support and follow-on growth [AIAA PAPER 69-1062]
01 p0195 A70-10636

Airborne instrument landing systems and ground facilities analysis and specifications, examining future use of microwave frequencies
02 p0333 A70-11982

Large aircraft servicing, describing equipment and procedures
02 p0276 A70-12762

Superjets demands on airport fuel handling facilities [SAE PAPER 690559]
03 p0463 A70-13263

Digital telemetry systems for geophysical satellites, describing onboard and ground systems design criteria and experimental results
03 p0451 A70-13837

Airport fog attenuation systems design and operation consisting of power and communication cables linking diffusers to central control and command
05 p0830 A70-17092

Selection criteria for nonturbocharged air or liquid cooled reciprocating type prime movers used in aircraft ground support equipment [SAE-ARP-1052]
07 p1248 A70-18801

Propellant transfer unit for weapon or space vehicle systems, specifying aerospace ground equipment criteria [SAE-AIR-1129]
07 p1248 A70-18806

Aerospace ground air conditioning design, discussing ground support equipment, manuals, manufacturer catalogs, etc
07 p1248 A70-18808

Onboard and ground checkout systems for space station and space shuttle operations [AIAA PAPER 70-245]
07 p1251 A70-20373

Ground and onboard electronics systems for space shuttle vehicles, discussing role in equipment reliability and maintainability, life cycle costs, management control, etc [AIAA PAPER 70-261]
07 p1398 A70-20391

Real time simulation of space vehicle and ground support equipment by digital computer for launch programs checkout
16 p2870 A70-33733

PCM telemetry transmitters, command receiver and ground control for German research satellite Azur
16 p2890 A70-34349

Boeing 747 ground operations and airport services, discussing computerized check-in, baggage handling equipment, etc
17 p3019 A70-35808

Flight test and airborne data recovery and processing, discussing data format, recorder characteristics, ground equipment and time requirement
19 p3429 A70-38517

GROUND SUPPORT SYSTEMS
Aircraft ground support system analysis from airplane designers viewpoint [SAE PAPER 690561]
03 p0463 A70-13265

Exit geometry effects on peripheral jet device lift, considering operating height, curtain thickness, base extension, etc
04 p0619 A70-15388

Ground truth calibration for aircraft and spacecraft earth resource sensors, discussing ground truth instrumentation, procurement procedures, reduction techniques, etc [AIAA PAPER 70-296]
09 p1678 A70-22887

Space navigation for Apollo 11 mission, emphasizing ground and onboard systems, interfaces with guidance and use in phases of lunar landing
13 p2447 A70-28547

Ground support real time operating system 360 for manned spaceflight, discussing system features and performance
13 p2375 A70-29937

Real time computer complex /RTCC/ supporting role in Project Apollo, describing mission control center data interfaces, equipment configuration, software, etc
17 p3060 A70-35295

Space vehicle and mission control center telecommunications networks for Apollo lunar landing program, considering NASCOM relay system
17 p3047 A70-35585

Radio astronomy Explorer A attitude determination via disk-oriented programming ground support system for reducing and calibrating telemetry data, attitude prediction and command, etc [AIAA PAPER 69-983]
21 p3795 A70-41857

GROUND TESTS
NT COLD FLOW TESTS
NT PRELAUNCH TESTS
NT STATIC FIRING

Ground based space simulation of arc-type electrothermal propulsion systems, discussing test facilities
01 p0161 A70-10225

Shock tunnel type differential sensor for low range base pressure measurements on full scale flight reentry vehicles, discussing ground tests
01 p0089 A70-10843

Ground-based biological experiments on insects and frog eggs to investigate effects of space flight weightlessness and radiation on mitosis and meiosis
04 p0631 A70-14942

Altitude simulation equipment for third stage Europa 1 booster rocket
04 p0664 A70-15302

Design and qualification test criteria for components derived by enveloping peaks of shock response spectra in ground tests of missile stages explosive separation [SAE PAPER 690616]
05 p0922 A70-15849

Vitiated contamination effect on airbreathing engine ground testing, considering equilibrium, vibrational and chemical relaxation, condensation, combustion, mixing and engine performance [AIAA PAPER 69-456]
06 p1172 A70-17172

Air backflow in nuclear exhaust system duct for ground testing of NERVA engines, noting overpressure effect [AIAA PAPER 69-325]
06 p1027 A70-17174

Noise field from ground testing of nuclear rocket engines operated at various reactor power levels
06 p1133 A70-18234

Simulated Concorde kinetic heating system for ground studies of thermal stresses
07 p1250 A70-19744

Space transportation system booster and orbiter development ground and flight tests, considering vehicle size and reusability requirements [AIAA PAPER 70-276]
07 p1397 A70-20385

Ground and flight tests in aeronautical system development process as transfer of basic technology into cost effective operational systems [AIAA PAPER 70-381]
10 p1857 A70-24172

Ground-based and in-flight simulation using variable stability aircraft, investigating pilot rating [AIAA PAPER 70-354]
10 p1858 A70-24209

Aircraft ground and flight tests effectiveness planning, preparation and conduct for operational safety, noting Flight Controls Development Test Stand [AIAA PAPER 70-371]
10 p1806 A70-24843

Rocket plume effects impulsive ground test technique under simulated high altitude pressure conditions, discussing hardware simplifications [AIAA PAPER 70-399]
10 p1951 A70-24906

Ground based simulation for hypersonic reusable lifting reentry vehicle design with pilot-in-loop, discussing six degree of freedom simulation [AIAA PAPER 70-385]
10 p1861 A70-24920

Space station program development requirements, describing ground and flight tests synthesis [AIAA PAPER 70-377]
10 p1952 A70-24926

Integrated Test Program for S-3A Weapon System, detailing test sequence flow and interfaces to assure vehicle and avionics systems reliability and maintainability [AIAA PAPER 70-370]
10 p1959 A70-24931

Space shuttle program, considering vehicle configurations mission capabilities and cost estimates with emphasis on ground and flight tests [AIAA PAPER 70-739]
10 p1953 A70-25074

Optimum sequence integration and ground testing of Defense Communication System Phase II Satellite, considering vibration, shock, space simulation, spin/despin, RF and acoustic requirements [AIAA PAPER 70-447]
11 p2030 A70-25444

Ground testing apparatus with three degrees of freedom for artificial satellites attitude control systems, establishing mathematical model by digital and analog techniques
11 p2031 A70-26290

Italian polyvalent data acquisition system for ground space tests, discussing electronic instrumentation system
11 p2032 A70-26293

Aircraft equipment automatic test methods, comparing in-flight, on ground and second line testings
13 p2348 A70-29681

Mission simulation testing in thermal vacuum environment for Apollo Lunar Module, noting conformal skin heaters [AIAA PAPER 69-991]
15 p2718 A70-32515

Ground test reactor design based on colloid fueled reactor concept [AIAA PAPER 70-688]
16 p2950 A70-33587

Ground environmental simulation test for captive carrying cycling of air launched missiles
17 p3060 A70-35182

Ground test noise measurements accuracy and repeatability on JT8D turbojet engine
17 p3060 A70-35183

Ground vibration testing for aircraft and missile flutter prevention [ONERA-TP-816]
18 p3339 A70-36508

Mariner 1969 test and operations program evaluated by ground tests and flight results, giving flight acceptable spacecraft recommendations
19 p3533 A70-38819

Noise field from ground testing of nuclear rocket engines operated at various reactor power levels
20 p3689 A70-39688

SERT 2 spacecraft ion thruster ground tests and flight operation, tabulating performance data [AIAA PAPER 70-1125]
20 p3691 A70-40220

Flight simulation as aircraft design tool, discussing ground and in-flight simulation techniques [ICAS PAPER 70-41]
23 p4178 A70-44139

GROUND TRACKS
Baseline length and orientation of closely co-orbiting satellites estimated by combined onboard sensor and ground tracking data [AIAA PAPER 70-39]
06 p1146 A70-18186

High speed track facility for V/STOL aircraft tests, discussing characteristics and design
21 p3803 A70-40581

Baseline length and orientation of closely co-orbiting satellites estimated by combined onboard sensor and ground tracking data [AIAA PAPER 70-39]
23 p4243 A70-44505

GROUND TRUTH
Coastal areas remote sensing instrumentation and techniques, discussing data handling and analysis and ground verification of color and multispectral imagery [AIAA PAPER 70-299]
09 p1669 A70-22885

Nonimaging remote sensor data display in spatial registration with ground scene to determine sensor bore-sight position accuracy
12 p2229 A70-26940

GROUND WAVE PROPAGATION
Self contained and ground referenced radio systems combination for tactical air navigation, including Loran D and hybrid Loran /HYLO/
04 p0716 A70-14628

Ground wave electric field intensity prediction model in EMC applications, discussing soil conditions and polarization effects
07 p1336 A70-20217

Electromagnetic ground wave propagation, deriving exact solution from two dimensional cylindrical earth model with any number of homogeneous sections
23 p4164 A70-44405

GROUND-AIR-GROUND COMMUNICATIONS
Transistorized lightning protected VHF ground antenna for air traffic communication providing high operational safety standards
03 p0459 A70-14297

Pilot emotional state during stressful situations from tape recorded vocal utterances of air to ground radio communications using spectrographic analysis
06 p1000 A70-17297

Spot III satellite-supported system for transoceanic aircraft navigation, traffic control, voice and data communication, etc
07 p1331 A70-19291

Secondary radar application to assist ATC achieving air to ground communications reduction
08 p1541 A70-21020

Independent burst and burst coherent TDMA methods compared for ground station-satellite communication
10 p1836 A70-24340

Position location and aircraft communication equipment concept and Experimental PLACE System providing ATC two-way voice and digital data communications via geostationary satellites
12 p2269 A70-27921

Ground stationed automatic orbital operations system /AOOSY/ for satellites and space probes, discussing flow diagram and Siemens computer programming
13 p2372 A70-28398

Pictorial display area navigation system for air traffic control in terms of cockpit utilization, interface with ground navigation aids, parallel multiple routes, etc [AIAA PAPER 69-798]
13 p2449 A70-29171

Multifunctional multimode avionics design integrating communications, navigations and identification subsystems /ICNI/
13 p2368 A70-29619

- Space-to-ground link wideband digital laser communications system design and performance tests
21 p3787 A70-41331
- Millimeter wave space-to-space and space-to-ground satellite communication links frequency allocation problems
21 p3787 A70-41335
- Ground station requirements for transition to multitransponder INTELSAT 4 satellite, discussing interference filtering, group delay distortion, etc
21 p3789 A70-41346
- ATC data link communications system speeding information flow between controller and pilot
21 p3789 A70-41348

GROUND-TO-AIR MISSILES U SURFACE TO AIR MISSILES

GROUP THEORY

NT HOMOMORPHISMS

- Explicit spinor basis states for irreducible unitary representations of spinor covering group of deSitter group $SO(4,1)$
02 p0344 A70-12282

- Invariant group study of free atmospheric convection equations at combination of Grashof numbers, Prandtl numbers and boundary conditions, noting infinite flux velocity
02 p0328 A70-12387

- Poincare invariance compatibility with general relativity, discussing Brandt groupoid, decomposition and local groups
06 p1106 A70-17540

- Group theory investigation of three photon light scattering tensor for all vibration modes of specific crystal classes
07 p1299 A70-19861

- Genetic theory application to selection of partial descriptions for algorithms group handling
08 p1466 A70-20875

- Locally compact topologies on group G and corresponding continuous irreducible unitary representations, noting existence of subgroup
08 p1534 A70-21276

- Zeta-Kleinian functions derived from Abelian functions
[ONERA-TP-800] 09 p1712 A70-22837

- Maximum principle optimality for nonlinear two group parameter control applicable to plants described by integrodifferential and delay equations
10 p1911 A70-25184

- Multidimensionality in complex control systems, discussing circuit and oscillation theory, decomposition, variational problems, finite automata and group theory
11 p2023 A70-25602

- Fourier transform calculations on finite Abelian groups
12 p2261 A70-27423

- Tensor and torsion functors on Abelian semigroups
13 p2440 A70-29076

- Boundedness of solutions and higher derivatives for degenerate matrices, showing dependence on characteristic numbers and linear groups
13 p2443 A70-29744

- Semigroup B , uniquely divisible range space for compact divisible commutative semigroups
16 p2941 A70-33095

- Matricial group representation theory for constructing elastic vibration equations of symmetric flexible mobile controlled members
17 p3180 A70-35293

- Linear representations of symmetry groups and use in discrete automatic control systems
18 p3290 A70-36070

- Group variational procedure for first integrals of nonconservative dynamical systems
19 p3458 A70-38060

- Power law fluid flow past suddenly accelerated wall, applying group theory to similarity solutions
19 p3406 A70-38444

- Cyclic q -ary codes invariant under linear group substitutions using polynomial method
24 p4313 A70-46062

GROUP VELOCITY

- Group delay characteristics of C band nondegenerative parametric amplifier determined by Nyquist method and compared to phase frequency derivative measurement
03 p0458 A70-14037

- Radially nonsymmetric stress wave propagation from tip of moving crack in infinite plates, deriving minimal group velocity
05 p0941 A70-16516

- Group velocity of spiral density waves propagating in disk galaxies implying self destruction, discussing possible replenishment sources
05 p0919 A70-16929

- Electromagnetic waves phase modulation index during propagation in nonlinear media found dependent on mismatch between interacting waves group velocities, relaxation time and losses
07 p1227 A70-18763

- Group velocity and propagation of hydromagnetic waves in ionospheric duct, comparing calculations and measured values
10 p1875 A70-24442

- Refractive index and group velocity in moving dispersive half space/cold plasma or dielectric/ under incident wave from vacuum
16 p2859 A70-32936

- Wave propagation and group velocity in warm magnetoplasma, using adiabatic theory for ionosphere and far magnetosphere models
16 p2859 A70-32937

- Electromagnetic waves phase modulation index during propagation in nonlinear media found dependent on mismatch between interacting waves group velocities, relaxation time and losses
18 p3229 A70-37107

- Electrostatic ion waves in uniform magnetic field, calculating phase and group velocities as function of propagation angle for comparison with dispersion measurements
20 p3678 A70-39659

- Transmission factors of microwave filters with prescribed attenuation and group delay
22 p3997 A70-43173

- Phase and group velocity variations of LF transmission compared against crystal oscillator
23 p4163 A70-44228

GROUP 1A COMPOUNDS

U ALKALI METAL COMPOUNDS

GROUP 2A COMPOUNDS

U ALKALINE EARTH COMPOUNDS

GROUP 4A COMPOUNDS

- Group 4A difluorides vaporization thermodynamics and bond dissociation energies, tabulating mass spectra, vapor composition, reaction enthalpies, heats of polymerization and thermodynamic functions
07 p1319 A70-19889

- Combined solubility of group IVA metals and carbon in solid state molybdenum at various temperatures
09 p1704 A70-22754

- Preferred disorder and shock histories of chemical group 4A meteorites from metallographic and X ray diffraction, discussing preterrestrial shock loading
21 p3920 A70-41940

GROUP 6A COMPOUNDS

- Laser induced vaporization of Bi compounds with group VIA elements, analyzing vapor species, condensed phase and molecular configurations by mass spectroscopy
08 p1455 A70-21338

- Vapor composition and condensed phase structure of As and Sb compounds with group VIA elements analyzed by laser mass spectrometer
08 p1455 A70-21339

GROUP 7A COMPOUNDS

U HALOGEN COMPOUNDS

GROWTH

- NT CROP GROWTH
NT CRYSTAL GROWTH
NT CZOCHRALSKI METHOD
NT EPTAXY

- Single and combined hypoxia and hypercapnia effects on growing rats, discussing body weights, blood and histological measurements
13 p2357 A70-29948

- Involuntary vectorcardiographic signs of right ventricular hypertrophy
17 p3025 A70-34859

- Serum growth hormone response to hypoglycemia in man following insulin administration, reviewing lumped parameter model
19 p3360 A70-38006

- Unicellular hot spring acidophilic alga *Cyanidium cadarium* cultured in pure carbon dioxide, examining packed cell volume, oxygen production and growth rate
20 p3572 A70-39492

- Microgram 2-nitro-1-butyl pyridinium sulfate /NBPS/ inhibition of growth of *Bacillus subtilis* by blocking thymidylate synthetase
23 p4158 A70-44998

- Homogeneous magnetic fields effects on growth rate of *Saccharomyces cerevisiae* and *Micrococcus denitrificans*
24 p4306 A70-45102

GRUMMAN AIRCRAFT

- NT F-111 AIRCRAFT
GRUMMAN MILITARY AIRCRAFT
U MILITARY AIRCRAFT

GRUNEISEN CONSTANT

- Gruneisen parameter for metal and semiconductor single crystals obtained from measuring one dimensional thermoelastic response during exposure to pulsed electron beam
07 p1357 A70-20020

- Gruneisen ratios for polymeric materials, comparing values determined by ultrasonic and thermal studies
11 p2069 A70-25805

- Hydrostatic pressure derivatives of adiabatic elastic moduli of single crystal zirconium, noting high temperature Gruneisen-thermal expansion deviation
19 p3486 A70-37763

GUANIDINES

- Metabolism and biological activity of urea, citrulline, argininosuccinic acid in organism ornithine cycle, discussing role in brain and liver
01 p0019 A70-10513

- NN dimethylguanidine for prevention of arterial lesions induced by cholesterol in rabbits
01 p0020 A70-10707

- Methylating agents and nitrosoguanidine actions on polynucleotides, including ribonucleic acid
03 p0440 A70-13550

GUIDANCE [MOTION]

- NT AIRCRAFT GUIDANCE
NT COMMAND GUIDANCE
NT INERTIAL GUIDANCE
NT INJECTION GUIDANCE
NT MIDCOURSE GUIDANCE
NT REENTRY GUIDANCE
NT RENDEZVOUS GUIDANCE
NT SATELLITE GUIDANCE
NT SPACECRAFT GUIDANCE
NT STRAPDOWN INERTIAL GUIDANCE
NT TERMINAL GUIDANCE

- Book on optimal control and guidance theory covering state and transition equations and canonical forms of linear systems, systems stability, servo loops, etc
07 p1246 A70-19668

- Rapid guiding system for high resolution astronomical observations using thermal expansion of electrically conducting wires
09 p1721 A70-22741

- Dual flow turbojet engines automatic control and guidance characteristics
17 p3147 A70-34687

- Satellite launching rocket guidance and control based on implicit measurement
17 p3133 A70-35283

- Guidance and control and propulsion technology, discussing fluidic systems, digital computers and structural materials, solid and liquid propellant engines
17 p3179 A70-35284

- Second order approximations to velocity required concept for boundary value problems in guidance, deriving Riccati equation and position required concept
20 p3666 A70-39518

- [AIAA PAPER 70-1015] ACRA supersonic antitank missile with IR laser beam guidance system
22 p4110 A70-43212

GUIDANCE SENSORS

- Inertial navigation system with gyrocompass sensor, deriving equations for continuous orientation determination within gimbal system, estimating errors
03 p0522 A70-13372

- Flight test evaluation program for airborne multisensor electro-optical display systems performance in TV mode under variety of optical conditions
07 p1289 A70-20403

- Strapdown redundant experimental sensor inertial navigation package containing gyros and accelerometers, discussing signal real time processing by digital computer
21 p3849 A70-41858

GUIDANCE STABILITY

- U CONTROL STABILITY
U GUIDANCE [MOTION]

GUIDE VANES

NT JET VANES

- Two stage axial flow compressor with variable pitch guide vanes, discussing HF vibration reduction of rotor blades
01 p0166 A70-11419

- Axial flow compressor off-design performance optimization by adjustable inlet guide vanes with variable trailing edge flaps
18 p3304 A70-36846

GUIDED MISSILES

U MISSILES

GUINEA PIGS

- Guinea pig cochlear hair cell damage after exposure to impulse noise
02 p0236 A70-12322

- Local stress effect on immunocompetent cells differentiation in guinea pigs lymphatic ganglia, noting increase in number of antibody producing cells
05 p0803 A70-17114

- Sinusoidal vertical vibration effect on adrenocortical function in guinea pigs
06 p0992 A70-17424

- Quantitative characteristics of central compensatory process, investigating nystagmus responses in guinea pigs subjected to bilateral labyrinthectomy
06 p0995 A70-17806

- Z axis acceleration and high temperature effects on guinea pig carbohydrate metabolism, discussing blood and muscle tissues composition
07 p1202 A70-18798

- Cochlear microphonics in guinea pigs using analog equivalent electrical circuit
11 p1992 A70-26494

GULF STREAM

- Satellite IR measurements of surface horizontal temperature structure of Gulf Stream compared with ship and aircraft data
05 p0844 A70-17104

GUMBEL THEORY

U RANGE [EXTREMES]

GUN LAUNCHERS

Global meteorological sounding network requirements, restraints and sensors, considering gun launched meteorological probe role

01 p0054 A70-10082

Meteorological guns for synoptic sounding of stratospheric circulation, discussing system characteristics and operations

07 p1250 A70-20280

Optimum drogue gun firing angle of stabilization times for MEW [Minimal Envelope and Weight] ejection seat system, considering zero and high velocities [AIAA PAPER 70-1208]

21 p3751 A70-41810

GUNFIRE

Protection methods for increasing ground fire survivability of military aircraft hydraulic systems classified by cost, system and component design criteria

05 p0797 A70-15777

GUNN EFFECT

Planar Gunn effect devices using various surface electrode configurations, discussing limitations by breakdown on Ga arsenide exposed surface

01 p0049 A70-10287

Delay times elimination in pulse operated X band Gunn effect oscillators, using RF power injection

01 p0050 A70-10463

Microwave circuit for increasing Gunn oscillators injection locking capabilities and reducing FM resulting from bias-voltage fluctuations

01 p0050 A70-10783

Gunn effect bibliography supplement [1960-1968/]

01 p0159 A70-10799

Microwave generation and amplification using Gunn effect semiconductor devices

01 p0160 A70-11289

IR light beam modulation in Gunn oscillator near fundamental edge of GaAs, investigating mechanism

03 p0539 A70-13160

N-GaAs pulsed Gunn effect oscillators for decimeter band, discussing synchronization by external sinusoidal current

03 p0499 A70-13204

Cavity resonator linear excitation by Gunn diode, considering external circuit effects on oscillation conditions and GaAs single crystal parameters

03 p0457 A70-13965

GaAs microwave diode Gunn oscillator subharmonically injection phase locked at low frequency ratios

03 p0459 A70-14041

Frequency shift and FM noise of uncontrolled Gunn effect diode and reflex klystron oscillators

05 p0818 A70-15774

Self excited microwave mixer and transmitting oscillator using Gunn diode applied to short distance Doppler radar

05 p0822 A70-16678

Step recovery frequency shift keyed retimer using Gunn effect FSK pulse regenerator for microwave communication

07 p1237 A70-20285

Millimeter wave CW Gunn oscillators construction by packaging free from spurious resonance, using sapphire ring and Au cap

08 p1468 A70-20482

Wideband tunable CW Gunn effect oscillator design, discussing microwave circuit effects on performance

08 p1471 A70-20788

Gunn diode parallel combinations fabricated for X band with n-type GaAs crystals, discussing output power at CW operation

08 p1477 A70-21296

Negative differential conductivity effects in Gunn domain GaAs semiconductors, discussing physical properties and microwave applications

08 p1556 A70-21303

P-n junction avalanche and bulk Gunn effect microwave oscillators, analyzing IMPATT and TRAPATT modes

09 p1644 A70-22224

Microwave Gunn oscillators loaded Q factors determined on basis of frequency changes resulting from constant-depth probe movement along output line

09 p1645 A70-22601

X band Gunn oscillators amplitude modulation by pulse signals from another Gunn diode

09 p1646 A70-22707

Microwave conductivity and limiting frequency in Gunn effect GaAs using drifted Maxwellian

09 p1739 A70-22849

Broad band power amplification with Gunn effect diodes, describing frequency response and saturation characteristics and FM/AM noise spectrum measurements for reflection amplifier in X band

10 p1847 A70-23886

Gunn oscillator current noise correlation with frequency modulation noise

10 p1848 A70-24230

Impact ionization effects in electric field domain on stability of current-voltage characteristics of Gunn diodes

11 p2020 A70-26813

Temperature effects on width of current-voltage characteristics of GaAs Gunn oscillators

11 p2020 A70-26819

GaAs vapor phase epitaxial growth characteristics noting applications to Gunn diodes

11 p2020 A70-26826

Epitaxial or bulk GaAs for Gunn diodes in high power microwave oscillators

11 p2021 A70-26828

Dispersion relation derived for space-charge waves propagating in thick Gunn diode, showing validity limit of one dimensional approach

12 p2194 A70-27164

Tapered Gunn effect microwave oscillators frequency tuning by resistive quenching of high field domain

12 p2199 A70-27986

X band Gunn oscillators for binary FSK regenerator operation employing signal injection triggering

12 p2199 A70-28015

High speed linear phase and amplitude modulation of X band Gunn oscillators

12 p2199 A70-28016

Shielded-cathode mode Gunn oscillators to eliminate constraints on operating frequency

12 p2200 A70-28056

HF quenched-domain mode [Q mode] Gunn effect oscillator in single frequency operation using signal analysis, obtaining instantaneous I-V transfer characteristics

12 p2202 A70-28162

Gunn oscillator voltage supply influence on domain capacity, considering frequency stability

13 p2377 A70-29302

Gunn diodes I-V characteristics with as function of carrier concentration/mobility and diode length, noting role of impact ionization in strong electric field

13 p2378 A70-29408

Millimeter waves generation by tunnel, Gunn and avalanche diodes, tabulating frequency, efficiency and power data

14 p2548 A70-30435

GaAs Gunn devices oscillatory modes under various operating conditions

14 p2557 A70-31158

Gamma radiation effects on GaAs Gunn diodes, measuring Hall effect, low field resistance, output power and FM noise in X band cavity

14 p2558 A70-31322

Gunn diode simulation with variable cross section, showing subthreshold and mode oscillograms

15 p2707 A70-31510

High pulse repetition rate digital systems signal processing using Gunn effect diodes

15 p2710 A70-32583

GaAs microwave devices including diffused varactor, Schottky barrier and Gunn diode, discussing single crystals preparation and epitaxial growth layers

16 p2873 A70-33293

SHF pulsed Gunn effect GaAs oscillators for nsec pulse length radar applications

16 p2875 A70-33398

Gunn oscillator external negative differential [END]/conductance broadband measurement noting effect of cavity control

16 p2875 A70-33398

Terminal negative resistance of X band Gunn diodes, discussing frequency conditions for modulation and parametric amplification

16 p2877 A70-33417

Doped Gunn diode domain field width, nucleation and annihilation dependence on electron drift velocity

16 p2879 A70-34044

Transverse magnetic field influence on Gunn effect characteristics of n-type GaAs

17 p3142 A70-34622

Phase control of locked negative resistance [Gunn]/oscillator under operational conditions, noting coupled varactor diode use

17 p3055 A70-35630

Wideband UHF amplification in bulk n-type GaAs during domain generation, comparing cut-off and Gunn frequency

17 p3143 A70-35684

Hysteresis effects during retuning of n-type GaAs Gunn oscillator with bias source and LCR circuit, showing range of domain damping by low field

17 p3055 A70-35689

Current oscillations of GaAs Gunn diodes over wide voltage range, discussing diode behavior dependence on polarity and applied voltage

18 p3230 A70-36197

Gunn phenomenon, discussing GaAs Gunn diodes preparation and applications

18 p3231 A70-36198

Equivalent circuit of Gunn oscillators for quenched domain mode operation, noting optimal working conditions

18 p3229 A70-36668

Magnetic surface loading of Gunn oscillators domain state for use as logic gates, pulse function generator, etc

19 p3387 A70-37819

Gunn effect pulse regenerators, describing random domain triggering rate voltage dependence comparison with Johnson noise predictions

19 p3387 A70-37820

Gunn effect devices with concentric cylindrical electrodes, examining oscillation natural frequency-applied voltage relation

19 p3392 A70-38900

Gunn effect in two-valley semiconductors with traps explained by model, assuming field-dependent trapping times and field-independent carrier generation rates

20 p3686 A70-39116

In-Au contacts for GaAs, discussing fabrication and performance tests on transverse Gunn mode oscillator

20 p3686 A70-39118

Ga-as Gunn diodes small signal admittance in dipole oscillation mode, analyzing RC model

20 p3598 A70-40062

Semiconductor diodes, discussing characteristics and applications of Schottky barrier, varactor, tunnel, Gunn and field effect diodes, etc

20 p3600 A70-40500

GaAs Gunn diodes design and fabrication, discussing material selection and operating heat removal

21 p3799 A70-41424

Microwave frequency marginal oscillator for electron spin resonance spectrometer, using Gunn diode in sample cavity

21 p3827 A70-41460

Microwave parameters for Gunn devices with low electric field, obtaining data on characteristics and operating mode

21 p3863 A70-41989

Gunn diode oscillators in domain suppression mode, showing dynamic I-V curve shape relationship to donor concentration and crystal thickness

22 p3997 A70-43128

Gunn microwave oscillators I-V characteristics in quenched and retarded modes, using piecewise linear approximation

23 p4168 A70-43778

Gunn effect, comparing intervalley scattering model to diffusion model for dynamic domain equilibrium

23 p4229 A70-43794

High stability phase locked Gunn microwave oscillator with internal crystal reference, discussing applications as signal generator, low noise Doppler radar sources, etc

23 p4172 A70-44013

Gunn oscillation stabilization in layered semiconductors based on space charge growth reduction via two-stream interaction between GaAs diode and passive bias semiconductor

23 p4230 A70-44196

Frequency dependence of Gunn oscillator maximum negative conductance

23 p4172 A70-44198

Impact ionization effects in electric field domain on stability of current-voltage characteristics of Gunn diodes

24 p4317 A70-45185

Temperature effects on width of current-voltage characteristics of GaAs Gunn oscillators

24 p4318 A70-45191

Carrier injection-limited Gunn diode wideband performance, deriving expression for admittance

24 p4319 A70-46081

GUNS [ORDNANCE]

NT ARTILLERY

GUST ALLEVIATORS

Free wing aircraft dynamic characteristics, discussing gust alleviation and handling qualities

[AIAA PAPER 70-947] 20 p3561 A70-39580

Self adjusting autopilot system based on invariance principle for stabilization against wind gusts

20 p3670 A70-39840

GUST LOADS

Slender delta wing aircraft dynamic behavior under vertical and lateral gusts, particularly during landing approach

[DGLR-69-52] 04 p0623 A70-15145

Incompressible flow past airfoils with oscillating jet flaps used as rapid lift and momentum generators in aircraft gust load alleviation and mode stabilization

[AIAA PAPER 70-79] 06 p0975 A70-18196

Empennage loads on T tail transport determined for combined vertical and lateral gust loads using real time analog-digital computer simulation

12 p2160 A70-27113

Gust response calculations compared with flight measurements for two fighter aircraft and jet transport to determine accuracy

[AIAA PAPER 68-892] 12 p2162 A70-28077

Load generation on two dimensional thin airfoil by yawed sinusoidal gust in incompressible flow, using lifting surface theory

13 p2344 A70-30025

Preliminary aircraft wing design for gusts or landing impacts inducing vibrations, inertia effects and dynamic overloads

14 p2655 A70-30177

- Wind gust data analysis for spacecraft design using power spectrum approach 14 p2607 A70-30580
- Helicopter gust response at high forward speed for various rotor loads noting effects of gust shape, gradual penetration, nonsteady aerodynamics and blade aerelasticity [AIAA PAPER 68-981] 14 p2531 A70-30855
- Sears function and lifting surface theory for harmonic gust fields in incompressible flow, modifying function for accurate interpolation of large numbers 14 p2528 A70-30860
- Flat plate airfoil unsteady lift due to chordwise velocity perturbations, using Horlock frozen gust pattern theory 22 p3957 A70-42303
- Similarity rules for sinusoidal gust loads on thin two dimensional wing in nonstationary subsonic flows 23 p4131 A70-43970

GUSTATORY PERCEPTION

U TASTE

GUSTS

- Numerical method for calculating gust effect on wing of complex platform at subsonic speeds by converting continuous to discrete processes 04 p0618 A70-15242
- Power spectral density functions of vertical gust velocities, comparing theoretical results and C-141A flight test measurements 04 p0624 A70-15384
- Maximum gust correlation with gust mean distribution within given hour determined from high speed anemometer 06 p1096 A70-17414
- Aircraft design formulas for equivalent gust velocity compared with vertical acceleration form, discussing design problems for large jets and T-tailed configurations 06 p0988 A70-18589
- Time averaging and length of record effects on horizontal wind speed variance, determining maximum wind gusts as function of height and averaging time 10 p1909 A70-23928
- Wind field statistical properties using model incorporating quasi-steady state speed, shear, gusts and small scale motions [AGARDGRAPH-115] 13 p2444 A70-28752
- Deformable and rigid wings aerodynamic characteristics with subsonic leading and trailing edges, calculating action of gust 15 p2671 A70-31486
- Radiosonde technique for locating atmospheric turbulence regions and estimating vertical air movement component in associated gusts 19 p3427 A70-38246
- Gust field in lowest atmospheric layer over homogeneous terrain, deriving statistical models and simulating effects on XV-5 V/STOL aircraft 21 p3750 A70-40784
- Mathematical modeling of atmospheric gusts in stratosphere, mountain wave and thunderstorm conditions relevant to aircraft design 24 p4371 A70-45420

GUTENBERG ZONE

- Gutenberg-Bullen interior model applied to fading of earth spheroidal oscillations 14 p2568 A70-30153

GYMNASTICS

U EXERCISE [PHYSIOLOGY]

GYRATION

- NT AUTOROTATION
- NT EARTH ROTATION
- NT LARMOR PRECESSION
- NT MOLECULAR ROTATION
- NT PRECESSION
- NT ROTATION
- NT SATELLITE ROTATION
- NT SOLAR ROTATION
- NT STELLAR ROTATION

GYRATORS

- NT MICROWAVE FILTERS
- Integrated directly coupled gyrator operating mode via comparison with switching elements, considering behavior under capacitance load and high pass filter application 21 p3797 A70-40793

GYRO HORIZONS

- Exact solutions class of nonlinearized equations of motion of adjustable two rotor gyrohorizon compass 07 p1288 A70-20176
- Drift of two platform gyroazimuth with stabilized base under harmonic or random vibrations 15 p2734 A70-31622
- Independent integrals of perturbed motion equations of spatial gyrohorizon compass 17 p3090 A70-35344

GYROCOMPASSES

- Gyrocompass composed of angular velocity integrators and interconnected by correction amplifiers, analyzing behavior during roll on vessel, determining error components 03 p0484 A70-13371

- Inertial navigation system with gyrocompass sensor, deriving equations for continuous orientation determination within gimbal system, estimating errors 03 p0522 A70-13372

- Dead zone initial disturbance of sensitive element dynamic coordinate in two rotor gyrocompass determined using method of averages 03 p0484 A70-13419

- Optimal damping time required for gyrocompass oscillations, allowing for maximum initial deflections 04 p0692 A70-15280

- North seeking declination gyrocompass design and operation with directing moment induced through bifilar suspension 05 p0844 A70-15775

- Drift error of correctable three degree of freedom free-floating astatic gyrocompass mounted on aircraft flying straight course at uniform speed 05 p0848 A70-16224

- Error analysis for pendulum type gyrocompass with indirect correction during irregular rolling, taking into account second infinitesimal order terms of equations of motion 07 p1278 A70-18735

- Rectilinear oblique harmonic vibration effect on gyrocompass with torsional suspension 07 p1278 A70-18737

- Gyrocompass with sensitive element mounted on horizontally stabilized platform and aligned with meridian by applied correcting moments, deriving equations of motion 07 p1282 A70-19532

- Differential equations of motion for sensitive element of gyrocompass with torsional suspension under small amplitude spatial vibrations, taking into account torsional and flexural rigidities 07 p1282 A70-19534

- Exact solutions class of nonlinearized equations of motion of adjustable two rotor gyrohorizon compass 07 p1288 A70-20176

- Two rotor gyrocompass unperturbed motion nonasymptotic stability as function of vessel speed and cruising latitudes 09 p1681 A70-23299

- Torsional vibration effect on gyrocompass with torsion suspension from studying sensing element forced motion, determining dynamic equilibrium position of sensor 11 p2048 A70-25578

- Unmanned Mars roving vehicle navigation subsystem feasibility study covering inertial and gyrocompass-odometer systems 11 p2080 A70-26211

- Time optimal control synthesis of fast acting gyrocompass mounted on fixed foundation and with hydraulic damper and torsional suspension of sensor 12 p2233 A70-27564

- Energy dissipation effect on complex parametric resonance and stability of two rotor gyrocompass on ship in motion 13 p2408 A70-29295

- Independent integrals of perturbed motion equations of spatial gyrohorizon compass 17 p3090 A70-35344

- Gyrocompassing for self contained lunar surface vehicles navigation, proposing local vertical determination method [AIAA PAPER 70-1003] 20 p3667 A70-39528
- Guidance and navigation systems precision azimuth measurement by star sighting and gyrocompass techniques 22 p4067 A70-42663

GYROFREQUENCY

- Electron gyrofrequencies computed from split pair bursts in 1966 compared with results from type II bursts in 1967 04 p0738 A70-14510

- Magnetospheric VLF emissions properties at frequencies below electron gyrofrequency 06 p1117 A70-17374

- Plasma instabilities in solar wind for frequencies near proton gyrofrequency, driving instabilities by electron and proton thermal anisotropies 08 p1561 A70-21261

- Whistler instability examined on gyrating electron beam interaction with cold background plasma propagating parallel to magnetic field 13 p2468 A70-29932

- Adiabatic bounce periods of particle gyrophase coherence in earth field for cyclotron echo and triggered emission analyses 20 p3621 A70-39343

GYROINTERACTION

U MAGNETIC RIGIDITY

GYROMAGNETISM

- NT GYROFREQUENCY
- Electromagnetic wave propagation in gyromagnetic medium, solving for field vectors in degenerate hypergeometric form 09 p1637 A70-23158
- Gyrotron efficiency increment at fundamental gyroresonance by applying magnetostatic field variable along length of interaction space 12 p2233 A70-27535

- NT TUNING FORK GYROSCOPES

- Two axis spherical gas bearing gyro for accurate measurements of space vehicle position and attitude rates while maintaining compatibility with exotic environments 01 p0086 A70-10308

- Conventional inertial gyro modified to provide specification performance for aircraft environments 01 p0086 A70-10312

- Floated single degree of freedom gyroscope and pendulous integrating gyroscope accelerometer, discussing design features as inertial sensors for future space missions 01 p0086 A70-10313

- Gyroscope bearing cross-torque control techniques, noting ball-group misalignment coupling [ASME PAPER 69-LUB-17] 01 p0101 A70-10388

- Solid state ring laser properties as oscillator, waveguide, interferometer and mechanical gyro considered for potential as rate gyro 01 p0108 A70-10417

- Flip-flop type intergimbal compensation system for gyroscopic integrators error reduction, obtaining natural oscillations constant amplitude 01 p0092 A70-10987

- Book on gyroscopic theory, design and instrumentation covering reference frames, Coriolis theorem, mechanical laws, etc 02 p0294 A70-11692

- Gyrotheodolites application to azimuth determination, discussing use for directional control, photogrammetry in geodetic measurements, etc 02 p0295 A70-11800

- Nonlinear gyroscopic navigation system intrinsic error derived as function of linear operator 03 p0522 A70-13373

- Probability theory for gimbal errors in directional gyroscopes under irregular rocking, using linearization of functions of random arguments 04 p0692 A70-15281

- Axial misalignment control of gimbal pivots and rotors in gyroscopes 04 p0692 A70-15282

- Optimal stabilization of spinning body motion about dynamic symmetry axis by controllable gyroscope 05 p0923 A70-16221

- Vertical gyroscope with nonlinear compensation circuit under random distortion of signal spectral composition 05 p0880 A70-16223

- Self acting, hydrostatic and squeeze-film gas lubricated bearings applications to gyroscopes, accelerometers, torque testers, etc 05 p0855 A70-16446

- Precession of aircraft mounted astatic gyroscope under constant and periodic moments of external forces, discussing roll angle and rotor axis deviations from inertia axes 07 p1282 A70-19533

- Finite structural rigidity of statically unbalanced three degree of freedom gyroscope influence on operation, discussing instrument error 07 p1282 A70-19535

- Steady motions and stability of gravitating gyrostat and spheroid, considering dynamically asymmetrical and symmetrical conditions 08 p1544 A70-20965

- Differential equations of motion for body with stationary point, allowing for Kovalevskaya conditions and assuming nonzero gyrostatic moment 09 p1726 A70-22149

- Combined gyromotors optimal starting and operating conditions, considering size and weight characteristics 09 p1680 A70-23146

- Three degrees of freedom astatic gyroscopes dynamic characteristics determination by vibration tests 09 p1681 A70-23300

- Fluid sphere gyro satellite nutation sensor 11 p2057 A70-26504

- Oscillating gyroscopes in satellite testing general relativity and earth gravitational field relation to stars 11 p2057 A70-26706

- Helicopter rotor, discussing conventional, semirigid, gyro and ABC systems in relation to roll balance and control 13 p2344 A70-28849

Stable, soupcan size, field replaceable, plug in/out gyro unit strapped to vehicle body without gimbals 13 p2409 A70-29480

Cost effective reliability prediction techniques, discussing precision gyros procurement by NASA 15 p2736 A70-31964

Motion and small vibration frequency stability of correctable gyroscope with correction moment at arbitrary angle with mismatch plane 15 p2738 A70-32154

Gyroscopic navigation systems errors as function of sensor errors in terms of arbitrary operators requiring optimization 15 p2773 A70-32155

Wearout life and reliability of rate gyros from field service test data 15 p2748 A70-32668

Apollo lunar module rendezvous radar redundant gyro system for reliability enhancement, discussing principles and logic 16 p2983 A70-34066

Gyroscopic drifts associated with angular support motions 17 p3133 A70-34960

Small swing angle detector for balloon payloads, using rate gyro principle 17 p3090 A70-35314

Satellite optimal guidance, discussing gyroscope application for stabilization and orientation control 17 p3181 A70-35691

Astatic gyroscope subjected to steady random translational vibration, optimizing parameters by mathematical model 18 p3257 A70-36136

Gyroscope in gimbal suspension on free base of four solid bodies connected by flat hinges 18 p3259 A70-36593

Gravity stabilized gyrostatt satellite attitude motion stability, using three dimensional diagram and Liapunov functions 18 p3334 A70-37061

Gyroscope dissipative function, using quasi-elastic gyroscope model and forced oscillation method 19 p3420 A70-37260

Test data interpretation by design margin techniques in poststorage reliability of high quality gyro assemblies 19 p3441 A70-38822

Reliability enforcement in design by competition and test program, using gyroscope example 19 p3433 A70-38842

Steady motions and stability of gravitating gyrostatt and spheroid, considering dynamically asymmetrical and symmetrical conditions 20 p3672 A70-39387

Ring laser gyro angular rate sensor for strapdown inertial systems [AIAA PAPER 70-1025] 20 p3631 A70-39510

Self calibrating TRIM gyromonitor inertial platform with gyroflex gyro, describing operation and performance [AIAA PAPER 70-1012] 20 p3667 A70-39521

Small low angular momentum /SLAM/ gyro for inertial guidance systems, discussing drift performance, float suspension, signal generator, flex leads, etc [AIAA PAPER 70-1011] 20 p3631 A70-39522

Fluidic gyro compatible with PDM missile guidance system, discussing spherical gas bearing design [AIAA PAPER 70-1008] 20 p3631 A70-39524

Seismic measurements at inertial test facilities, considering vibration environment relevant to single degree of freedom gyroscope performance tests [AIAA PAPER 70-951] 20 p3606 A70-39576

Hollow test platform for gyros and accelerometers used in inertial navigation [AIAA PAPER 70-952] 20 p3606 A70-39577

Beryllium use in inertial navigation as stable platform structure and control gyro, discussing physical properties, design concept, fabrication, service, cost and tradeoffs 20 p3639 A70-40451

Single degree of freedom gyroscope design factors applicable to strapdown guidance system, discussing torque-to-balance loop, multiple pulse bursting and error sources [AIAA PAPER 69-848] 21 p3849 A70-41859

Gyro drift rate mathematical modeling based on stationary and nonstationary time series analysis techniques with random process reduction to white noise residuals [AIAA PAPER 69-838] 23 p4197 A70-44557

Freely spinning gyrostatt satellites with dissipation, deriving rotational motion equations by osculating elements method 23 p4261 A70-44681

Gyroscope system steady states, showing dynamic couplings centering in finite angular precession rate case 24 p4335 A70-45630

GYROSCOPIC COUPLING

Gyroscopes orientation cross coupling effect on dynamic drift of three axis gyrostabilizer solved by method of successive approximation 07 p1278 A70-18736

Book on gyroscope couple stabilizing role on ships, satellites and stabilized platforms, discussing kinetic motion, gyroscopic precession, degrees of freedom, etc 07 p1283 A70-19665

Gyro system determining aerodynamic moment integral vector in wind measurements 24 p4340 A70-46402

GYROSCOPIC DRIFT

U GYROSCOPES
U GYROSCOPIC STABILITY
GYROSCOPIC PENDULUMS

Floated single degree of freedom gyroscope and pendulous integrating gyroscope accelerometer, discussing design features as inertial sensors for future space missions 01 p0086 A70-10313

Pendulous integrating gyro accelerometer float bearing wheel characteristics at high slew rates monitored by differential varmeter [ASME PAPER 69-WA/LUB-3] 04 p0698 A70-14770

Sectional gyroscopic pendulum stability in space of system parameters reduced to determining periodic motions regions by Hamiltonian equations 08 p1496 A70-21206

Vertical position stability of gyropendulum mounted on vibrating platform, showing foundation induced gimbal rotor parametric vibrations 12 p2233 A70-27563

Pendulous integrating gyro accelerometer float excursions minimization in random vibration environment /Saturn 5 launch/ by statistical technique 14 p2589 A70-31344

Nonperturbability conditions and equations of motion of bigyroscopic vertical below escape velocity 18 p3259 A70-36592

Pendulous integrating gyro accelerometer gas bearing wheel characteristics at high slew rates monitored by differential varmeter [ASME PAPER 69-WA/LUB-3] 19 p3436 A70-37618

Gyro pendulum mounted on randomly vibrating platform, calculating stability of rotor axis vertical position 22 p4039 A70-43557

GYROSCOPIC STABILITY

Single axis gyrostabilizer drifting motion mounted on aircraft subjected simultaneously to roll, pitch and yaw, deriving motion equations 01 p0091 A70-10986

Mobile hodograph in problem of gyrostatt motion about fixed point 01 p0094 A70-11430

Motion of body with fixed point reduced to single second-order differential equation, analyzing special cases of gyrostatic motion 01 p0145 A70-11437

Kirchhoff kinematic analogy applied to solution of gyrostatt motion, noting elastic rod deformation under torsion, using Kharlamov equations 01 p0094 A70-11441

Two degree of freedom gyroscopes stability with hydrodynamic grooved rotor bearings, describing parallel and conical whirling rotor oscillations 02 p0307 A70-12163

Steady motions stability of gyrostatt satellite in central Newtonian gravitational field 03 p0579 A70-13343

Optimal nonlinear correcting of vertical gyro obtainable with correction containing nonlinear elements with variable linearized coefficients 03 p0483 A70-13363

Power gyrostabilizer stability with dry friction at bearings, using point mapping to obtain system phase image 03 p0484 A70-13365

Gyrostatt motion stabilization with respect to unperturbed circular orbit vector radius, considering gravitational, aerodynamic, perturbation moments action and zero dry friction moment 03 p0484 A70-13370

Stability characteristics of two degree of freedom gyroscope having hydrodynamic grooved journal rotor bearings, discussing frequency of self excited oscillation [ASME PAPER 69-LUB-H] 04 p0689 A70-14872

Randomly oriented vibration effect on noncompensated three degree of freedom gyroscope with displaced center of gravity 04 p0692 A70-15278

Two degree of freedom gyroscope sensitivity threshold during gimbal vibration with respect to casing 04 p0692 A70-15279

Error sources affecting data comparison accuracy between gyro measurements and reference solutions and due to gyro axes misalignment and gimbal angular movement 04 p0692 A70-15327

Rotor-driven vibrational gyroscopic device dynamic characteristics, stability, transient delta function, signal response and sensitivity assessment 05 p0848 A70-16222

Drift error of correctable three degree of freedom free-floating astatic gyrocompass mounted on aircraft flying straight course at uniform speed 05 p0848 A70-16224

Weighting function of optimal correctable gyroscopic servosystem in random narrow band noise 05 p0880 A70-16225

Dynamic characteristics from equations of motion of gyroscope with allowance for structural damping forces between inner gimbal and rotor 05 p0852 A70-16961

Two degrees of freedom differentiating gyroscope response time decrease and phase and amplitude error reduction, using differential feedback 05 p0853 A70-17003

Closed form variational synthesis of optimally fast acting stabilization systems for rigid single axis gyroscopic platforms using integrating nonanalytic equations 06 p1103 A70-17860

Gyrostatt satellite equilibrium positions in circular equatorial orbit under action of gravitational magnetic and aerodynamic moments based on gyrostabilized satellite equations of motion 06 p1155 A70-17884

Rectilinear oblique harmonic vibration effect on gyrocompass with torsional suspension 07 p1278 A70-18737

Linear vibrations in gimbal suspension rotor and base, estimating gyroscope drift during base and rotor vibrational coincidence 07 p1279 A70-18738

Precession of aircraft mounted astatic gyroscope under constant and periodic moments of external forces, discussing roll angle and rotor axis deviations from inertia axes 07 p1282 A70-19533

Book on gyroscope couple stabilizing role on ships, satellites and stabilized platforms, discussing kinetic motion, gyroscopic precession, degrees of freedom, etc 07 p1283 A70-19665

Phase shift effect on astatic gyro axis drift and stability during periodic perturbations, describing motion by nonlinear differential equations 08 p1493 A70-20489

Sectional gyroscopic pendulum stability in space of system parameters reduced to determining periodic motions regions by Hamiltonian equations 08 p1496 A70-21206

Perturbed gyroscopic system consisting of disk hinged by rigid weightless rod, investigating stability condition at axial and equatorial inertia moments 08 p1496 A70-21210

Cyclic bending stresses in web of precessing disk-type gyroscope rotor, considering fatigue failure and forced vibration response 09 p1770 A70-22270

Directional gyroscopes with accelerated rotors on moving bases, deriving gyro errors as base motion functions 09 p1680 A70-23145

Two rotor gyrocompass unperturbed motion nonasymptotic stability as function of vessel speed and cruising latitudes 09 p1681 A70-23299

Space vehicle attitude stabilization by passive control moment gyros, discussing viscous and Coulomb friction effects 10 p1950 A70-24054

Moments equations for electrostatic gyroscope drift caused by rotor asphericity 11 p2048 A70-25559

Torsional vibration effect on gyrocompass with torsion suspension from studying sensing element forced motion, determining dynamic equilibrium position of sensor 11 p2048 A70-25578

Three degrees of freedom astatic gyroscope drift due to base vibrations according to harmonic law 11 p2048 A70-25579

Adjustable gyroscope errors under compensating-loop linearity zone limitation, showing saturation filtering influence on sensing element 12 p2233 A70-27562

Vertical position stability of gyropendulum mounted on vibrating platform, showing foundation induced gimbal rotor parametric vibrations 12 p2233 A70-27563

Quasi-linear elastic gyroscopic systems with distributed and lumped parameters, studying periodic solutions stability 12 p2238 A70-28194

Energy dissipation effect on complex parametric resonance and stability of two rotor gyrocompass on ship in motion 13 p2408 A70-29295

Doppler radar aircraft navigation system with gyroscopic reference platform and computer, showing error propagation dependence on velocity and latitude 13 p2449 A70-29621

Steady motions stability of gyrostatt satellite in central Newtonian gravitational field 14 p2653 A70-30718

- Open loop TV image motion compensation by image transducer with gyro demodulator analyzing errors in rate and rate-integrating gyros and AC pick-offs
14 p2588 A70-31190
- Pendulous integrating gyro accelerometer float excursions minimization in random vibration environment /Saturn 5 launch/ by statistical technique
14 p2589 A70-31344
- Orbiting gyrostats equilibrium orientations under gravitational torques, considering internal angular momentum effects
14 p2655 A70-31364
- Viscous friction force moments effect on gyroscope drift in gimbal suspension during base angular vibrations, obtaining drift velocity
15 p2738 A70-32153
- Optimal distributed feedback surface temperature control of inertial grade floated rate integrating gyroscope, minimizing instrument degradation
16 p2908 A70-33347
- Vibrational motion equations of interconnected bodies based on Newtonian approach, investigating gyroscopic vibration absorber
16 p2992 A70-34020
- Gyroscopic drifts associated with angular support motions
17 p3133 A70-34960
- Dual spin satellites considered as deformable flexible gyrostats, obtaining stability criteria
17 p3177 A70-35234
- Single axis gyroscopic stabilizer with floating-type integrating gyro, describing natural oscillations by differential equations of motion
17 p3096 A70-35701
- Error reduction methods for linear acceleration gyrointegrators measuring linear velocities
19 p3420 A70-37257
- Strapdown inertial guidance systems critical dynamic errors mathematical modeling and verification [AIAA PAPER 70-1029]
20 p3666 A70-39508
- Quasi-linear elastic gyroscopic systems with distributed and lumped parameters, studying periodic solutions stability
22 p4038 A70-43319
- Correctable gyroscope stability estimation by energy method taking into account nutation and precession motions
22 p4039 A70-43556
- Gyro pendulum mounted on randomly vibrating platform, calculating stability of rotor axis vertical position
22 p4039 A70-43557
- Earth quadrupole moment indirect effect on satellite gyroscope precession
23 p4217 A70-43799
- Gyro drift rate mathematical modeling based on stationary and nonstationary time series analysis techniques with random process reduction to white noise residuals [AIAA PAPER 69-838]
23 p4197 A70-44557
- ### GYROSTABILIZERS
- Inertial damper optimum parameter selection for achieving maximum nutation damping factor for gyroscopic stabilizer
01 p0091 A70-10985
- Single axis gyrostabilizer drifting motion mounted on aircraft subjected simultaneously to roll, pitch and yaw, deriving motion equations
01 p0091 A70-10986
- Airborne cartographic azimuthal instrument with reflecting prism type optomechanical assembly and trihedral pyramid gyroscope for stabilization
01 p0093 A70-11269
- Gyrostabilized satellite steady state motions in Newtonian force field having displaced satellite center of mass orbital plane relative to center of attraction
01 p0198 A70-11577
- Navigation system with twin gyro platform and Doppler sensor, discussing performance and cost advantage over inertial systems
02 p0334 A70-11987
- Optimal stabilization of free solid body equilibrium state with gyroscope, using solution of three flywheel system stabilization
03 p0484 A70-13364
- Power gyrostabilizer stability with dry friction at bearings, using point mapping to obtain system phase image
03 p0484 A70-13365
- Gyroplatform angular position with respect to reference stars from solving nonlinear differential equations, applying Liapunov method
03 p0524 A70-13366
- Gyrostabilized attitude reference platform for high altitude rotating research rocket payload alignment with preselected star
03 p0579 A70-13606
- Gyrostat satellite equilibrium positions in circular equatorial orbit under action of gravitational magnetic and aerodynamic moments based on gyrostabilized satellite equations of motion
06 p1155 A70-17884
- Gyroscopes orientation cross coupling effect on dynamic drift of three axis gyrostabilizer solved by method of successive approximation
07 p1278 A70-18736
- Kinematic drifts of three axis gyrostabilizer platform associated with angular oscillations using theory of finite rotations
07 p1282 A70-19531
- Stability of three axis indicator gyrostabilizer system consisting of stabilized platform mounted in three degree of freedom Cardan suspension
07 p1288 A70-20179
- Double axis gyrostabilizer with auxiliary tracking system of subtracking ring, analyzing system stability and operation
09 p1676 A70-22629
- Nutation damping in gyrostabilization for multispin satellites in terms of energy momentum and damping torque arguments
11 p2119 A70-25357
- Low sensitivity optimal controls synthesis for gyrostabilizer stabilization circuit using variable structure systems theory
11 p2048 A70-25580
- Gyroscopic platform stabilizers /GPS/ dynamic properties improved by compensation of perturbing torques
12 p2237 A70-28155
- Molniya 1 communication satellite attitude control involving automatic solar panel and antenna orientation, using powered gyroscopic stabilizers
13 p2499 A70-28387
- Gimbal influence on three axis gyrostabilized platform in spacecraft guidance during maneuvers
13 p2446 A70-28388
- Gyrostabilized platforms for astronomical observations, minimizing position errors
13 p2403 A70-28441
- Satellite orientation control and stabilization by gyro with statically and dynamically balanced rotors, showing steady motions and stability region augmentation
13 p2507 A70-29769
- Gravity stabilized gyrostat satellites internal angular momentum effect on nonlinear resonant attitude motions
15 p2810 A70-31785
- Gyroplatform for controlling rocket motion during rotation about longitudinal axis
19 p3420 A70-37258
- Small parameter effects on absolutely invariant systems under transient perturbation, analyzing gyrostabilizer performance
20 p3603 A70-39831
- Invariance conditions for inertial gyrostabilizer with powered stabilization system in presence of dynamic imbalance, noting improvement via compensating loop
20 p3670 A70-39846
- Satellite steady state motion and relative equilibrium position optimal stabilization by additional forces application
21 p3849 A70-40606
- Gyrostabilizer design based on composite optimal controls with respect to different regional criteria
22 p4040 A70-43559
- ### GYROSTATS
- ### U GYROSCOPES
- ### GYROTROPISM
- Direction fluctuations in radio wave scattering in turbulent gyrotropic medium using Einstein-Fokker-Kolmogoroff equation
04 p0653 A70-15722
- Magnetic field equation for gyrotropic and anisotropic turbulence, observing large scale magnetic field generation
12 p2210 A70-27546
- Direction fluctuations in radio wave scattering in turbulent gyrotropic medium using Einstein-Fokker-Kolmogoroff equation
14 p2550 A70-30806
- Gyrotropic waveguides parameters computer calculation based on inhomogeneous isotropic region, taking into account discontinuities
19 p3378 A70-37736
- Electromagnetic scattering by homogeneous gyrotropic cylinder, discussing matrix equations formulation and solution by reciprocity theorem
23 p4165 A70-44959
- ## H
- ### H ALPHA LINE
- Chromospheric average velocity field near sunspots determined from M alpha line absorption elements wavelength shifts
01 p0176 A70-10247
- High reflectivity mirror construction for H Lyman alpha line using vacuum deposited Al layer coated by magnesium fluoride
02 p0299 A70-12367
- Night airglow emission intensities during IQSY concerning Na, OH and H alpha lines compared with intensities during IGY
02 p0292 A70-12433
- Classical path methods for treating Stark spectral line broadening in plasmas illustrated by Lyman alpha line of hydrogen calculations
04 p0726 A70-14670
- Excitation of H-alpha and H-beta lines in night sky, calculating solar L radiations variation with altitude
04 p0679 A70-15075
- Chromospheric fine structure photographed at H alpha line center, discussing size, lifetimes and relationship between dark and bright mottles
05 p0910 A70-16428
- High resolution observations of low chromosphere beyond limb at H-alpha line center revealing fine structures, identifying chromospheric spicules with dark mottles
05 p0910 A70-16429
- H alpha line for emission nebulae analyzed by Fabry-Perot etalon, noting Doppler profile
05 p0917 A70-16907
- Transition probability and Stark profile of H alpha standards for absolute intensity calibration of spectroscopic data from thermal shock tube plasma
05 p0853 A70-17083
- Solar flare H alpha brightness measurement from photograph taken through birefringent filter, deriving flare morphological changes from isophotes
06 p1135 A70-18004
- X ray and H alpha emissions associated with solar proton flares, correlating rise time with solar cosmic rays
06 p1137 A70-18547
- H alpha brightening areas related to sunspot magnetic fields configuration and solar proton flares
07 p1369 A70-20072
- Spectral line intensities in hydrogen plasma, calculating relative intensities and Balmer line width for various electron temperatures and optical thicknesses in H alpha line
07 p1389 A70-20205
- Longitudinal magnetic field measurement along H alpha line of solar prominence
08 p1560 A70-20838
- Hydrogen 109 alpha recombination line emission in galactic H II regions surveyed at National Radio Astronomy Observatory
10 p1936 A70-23942
- Cygnus X region surveyed with NRAO radio telescope, estimating visual absorption by comparing radio and H alpha emission
10 p1937 A70-23943
- Alpha recombination line emission from galactic center detected, discussing possible origins in continuum source or interstellar medium
10 p1947 A70-24995
- Supergranules /convective cells/ development shown in quiet sun filtergrams of H alpha chromospheric network taken above Arctic Circle
11 p2109 A70-25741
- Onset, mass motion and flash phase in B2 solar flares observed in filtergrams spanning H alpha line
11 p2105 A70-25748
- Continuum spectra of well-resolved thermal and nonthermal galactic sources compared with H-alpha recombination line
12 p2296 A70-26898
- Absorption at solar H Lyman alpha line by earth hydrogen atmosphere measured as function of altitude from Aerobee flight spectrograms
12 p2222 A70-27182
- Dark band in H alpha solar chromosphere above photospheric limb, outlining approaches to obtain spectrally pure observational results
13 p2486 A70-28627
- Stark broadening calculations of H alpha and H gamma hydrogen lineshapes
14 p2620 A70-31303
- Cygnus loop nebula H alpha line halfwidths and radial velocities
15 p2802 A70-32482
- H alpha and H beta lines electrodynamic broadening with linear Stark effect, calculating relative intensity
15 p2777 A70-32490
- H alpha and Fe I lines, calculating velocity effects on profiles for differentially moving atmosphere
15 p2804 A70-32616
- Orion Nebula photographed at H alpha line with half angstrom filter
15 p2807 A70-32805
- Orbiting solar telescope design for solar disturbances location and monitoring in H alpha line
16 p2907 A70-33188
- Coronal structures relationship to chromospheric features in H alpha and Ca II K
16 p2977 A70-33843
- H alpha filtergrams of sun during solar eclipse of 7 March 1970, showing bright plage area
16 p2980 A70-34226
- Luminosity effects in Balmer lines of early type stars, noting H alpha equivalent width decrease
17 p3170 A70-35388

- Solar atmosphere vortex ring observation in H alpha light / 2 December 1969/ 20 p3703 A70-39022
- Particle ejections in solar atmosphere and chromosphere structure, discussing dark halo exhibited by H alpha line in active region 20 p3699 A70-39464
- H alpha chromospheric network lifetime from time lapse photographs 20 p3711 A70-40409
- H alpha flares occurrence in plages with little or no spots 21 p3880 A70-40964
- Solar X-ray bursts correlation with H alpha flares and microwave bursts observed by Explorer 34 experiment 21 p3880 A70-40970
- Particle acceleration phase in solar flare development, discussing H alpha maximum, hard X ray burst and bremsstrahlung 21 p3880 A70-40971
- Carina nebula NGC 3372 continuum map at 5 GHz compared to optical photographs, discussing H alpha lines 21 p3887 A70-41109
- Radio search for formaldehyde rotational transition and H 109 alpha recombination line in comet Bennett during perihelion passage 21 p3921 A70-41976
- Instrumental and atmospheric observational problems regarding dark mottles, fibrils and H alpha solar limb photographic interpretations 21 p3926 A70-42199
- Orion nebula H alpha/forbidden N II ratio measurement using wide field multislit spectrograph 22 p4101 A70-42857
- H alpha emission objects in Southern Milky Way, discussing positions, photometric data and relation to galactic structure 22 p4101 A70-42865
- Alpha hydrogen recombination lines 156, 166, 167 and 168 from galactic center, using radio telescope 22 p4103 A70-42980
- H alpha and H beta lines electrodynamic broadening with linear Stark effect, calculating relative intensity 23 p4221 A70-43912
- UV Cet type flare star rotational velocity upper limits from H alpha emission line width in chromospheres 23 p4251 A70-44824
- Coherent motion effects on brightness of clouds moving above photosphere, describing H alpha Doppler brightening and Lyman alpha Doppler dimming in solar prominences 24 p4400 A70-45313
- H alpha solar spray-like prominence ejected in association with bright limb flare, determining knots trajectories and velocities from coronagraph observations 24 p4396 A70-45323
- Hydrogen I region anomalous alpha lines recombination in Orion B spectrum, identifying carbon emitter by measured frequency separation 24 p4410 A70-45773
- H BETA LINE**
- Solar radiation pressure effects on zodiacal dust particle orbital velocity, computing Doppler shift of H-beta absorption line as function of elongation 01 p0070 A70-10348
- Photoelectric line photometry used to study H beta/gamma and He I 4471 absorption line intensities of early B stars, determining projected rotational velocity 02 p0369 A70-12072
- Plasma jet temperature and density determination from intensity ratio of H beta line and continuous spectrum 04 p0725 A70-14535
- Excitation of H-alpha and H-beta lines in night sky, calculating solar L radiations variation with altitude 04 p0679 A70-15075
- Intensity and altitude profile of H beta light emission and energetic hydrogen fluxes during auroral breakup using rocket soundings 08 p1489 A70-21383
- Stark effect He II and H beta on lines observed for transverse and longitudinal fields, using beam-foil light source 09 p1731 A70-22779
- Stark broadening of neutral helium line in plasmas for electron densities measurements accuracy, comparing to H beta determined densities 13 p2456 A70-29225
- H alpha and H beta lines electrodynamic broadening with linear Stark effect, calculating relative intensity 15 p2777 A70-32490
- Luminous nebulae near Sco X-1 indicating H beta emission 17 p3156 A70-34829
- Delta Scuti stars, determining consistent absolute magnitudes by Stromgren intermediate band colors and Crawford photoelectric H beta indices 17 p3171 A70-35443
- Open star h and chi Persei cluster four color and H beta photoelectric photometry, discussing interstellar reddening, ages and distances 21 p3922 A70-41982
- H alpha and H beta lines electrodynamic broadening with linear Stark effect, calculating relative intensity 23 p4221 A70-43912
- Hydrogen cluster beam discharges, determining transient plasma ion density from Stark broadening measurements of H beta line 23 p4228 A70-44939
- H GAMMA LINE**
- Photoelectric line photometry used to study H beta/gamma and He I 4471 absorption line intensities of early B stars, determining projected rotational velocity 02 p0369 A70-12072
- Stark broadening calculations of H alpha and H gamma hydrogen lineshapes 14 p2620 A70-31303
- H gamma profiles of B type supergiants, discussing electron density levels, Stark effect, Balmer and Paschen series breaks, etc 14 p2652 A70-31385

- Measured and theoretical stark-broadened line profiles and asymptotic wing approximation of hydrogen Balmer lines at specific electron density and temperature 09 p1732 A70-22782
- Hydrogen 21 cm emission line in Perseus region observed for motion of neutral hydrogen connected with II Per, discussing stellar radial velocity 10 p1937 A70-23944
- Elongated neutral-hydrogen emission feature in Sco-Oph region, comparing with interstellar sodium lines for distance from sun 10 p1945 A70-24966
- Violet K2 emission in H and K line cores of solar calcium ions using atmospheric model in state of motion 12 p2303 A70-27701
- Calcium H and K lines core residual intensities in stars with quiet and active chromosphere, suggesting activity due to thermal gradient 12 p2303 A70-27702
- Solar Ca II H and K lines formation, discussing double reversal, limb darkening, plage and spot lines and anomalous line ratios 13 p2494 A70-29481
- Molonglo pulsars H line absorption and dispersion in interstellar medium 13 p2495 A70-29788
- Polar auroral hydrogen emission intensity dependence on K index of geomagnetic activity 14 p2569 A70-30213
- Galactic longitude interval region radio telescope observations, obtaining isophotes of brightness distribution of RF spectral line of neutral H and continuous spectrum 15 p2805 A70-32706
- Hyades stars between F4 and K5, measuring chromospheric H and K emission lines dependence on bolometric luminosity 17 p3157 A70-34832
- Solar chromosphere resonance lines, observing H and K line profiles of Mg ions 17 p3161 A70-34893
- Auroral protons and resonant concept of substorm, eliminating discrepancy between hydrogen emission spectroscopic and direct measurements 18 p3307 A70-36177
- Galactic center region lunar occultations in 21 cm neutral hydrogen line 18 p3313 A70-36328
- Hydrogen and helium emissions in upper atmosphere, observing amplifications towards geomagnetic poles and in winter hemisphere 18 p3249 A70-36913
- Hydrogen line absorption at 21 cm from Centaurus A / NGC 5128/ radio galaxy 18 p3318 A70-37017
- Galactic spiral structure from atomic hydrogen line intensity longitudinal distribution 18 p3328 A70-37168
- Neutral hydrogen distribution in galactic region surveyed with radiotelescope 18 p3328 A70-37169
- Radial velocities of neutral hydrogen in anticenter region of Galaxy 18 p3328 A70-37170
- O type stellar clusters hydrogen line observation revealing associated gas clouds 18 p3328 A70-37172
- Galactic spiral structure from optical radial velocities of H II regions 18 p3329 A70-37179
- Near collisions approximation in Stark broadening of hydrogen Lyman alpha line 18 p3296 A70-37227
- Vacuum UV laser action in molecular hydrogen Lyman bands, examining stimulated emission in P branch lines and light pulse duration 20 p3643 A70-40496
- Atomic hydrogen 21 cm line intensity distribution in Carina arm of Milky Way galaxy 22 p4100 A70-42851
- Be stars hydrogen emission lines widths measurement 22 p4101 A70-42867
- Microwave recombination H lines, deriving electron temperature, electron density and emission measure sequentially 24 p4402 A70-45388
- Polar auroral hydrogen emission intensity dependence on K index of geomagnetic activity 24 p4331 A70-46288
- Neutral hydrogen 21 cm line profiles in galactic plane, tabulating terminal positive velocity and brightness temperatures 24 p4414 A70-46381
- Galactic neutral hydrogen velocity distributions from 21 cm line profiles analysis 24 p4414 A70-46382
- H WAVES**
- Anomalous H wave absorption in circular waveguide by dense collisionless plasma, connecting to instability excitation with subsequent plasma heating 03 p0537 A70-14379

- Eigenvalue and eigenfunction of H01 wave in bend of cross shaped waveguide, determining field components and propagation constant change
04 p0651 A70-15291
- Symmetrical H mode wave propagation in inhomogeneous plasma filled circular waveguide solved by hypergeometric functions, noting use for microwave diagnostics and computer programs verification
06 p1009 A70-17825
- HE sub 11 mode launching in optical communication system, considering fiber tapering effect on excitation efficiency
16 p2875 A70-33400
- H and E waves diffraction in circular waveguide by diaphragm thickness, using linear equations and Fourier-Bessel series for representation
19 p3378 A70-37731
- H-56 HELICOPTER**
Electron beam welding of AH-56A helicopter rotor hubs outside of vacuum chamber, discussing modifications of machine
04 p0699 A70-15651
- HABITABILITY**
Underwater saturation habitats application as behavioral workshops for mission planning and human engineering of manned space flight, discussing Project Teklite
[AIAA PAPER 69-1120] 01 p0034 A70-10611
- Habitability factors in space station crew quarter design, discussing hygiene and dining facilities
17 p3036 A70-34803
- Long term space flight crew habitation emphasizing food management, station housekeeping, personal hygiene and waste handling
23 p4154 A70-44622
- HABITUATION [LEARNING]**
Vestibular nystagmic and electrical responses facilitation, inhibition and habituation, noting modulation by subcortical and cortical systems
14 p2538 A70-30909
- Pattern center hypothesis for habituation to centrifugal and linear accelerations in man, investigating aftereffects by nystagmography
14 p2538 A70-30913
- Vestibular habituation among pilots and flying staff from training and seniority standpoint
14 p2538 A70-30914
- Vestibular habituation acquisition, retention and transfer correlation with stimulation, discussing alertness and arousal effects
14 p2539 A70-30915
- Habituation and dishabituation in semimaintained Aplysia preparation with central nervous system removed
18 p3217 A70-36517
- HADRONS**
Cosmic ray muon source implied from hadrons X pairs produced in primary cosmic ray collisions
02 p0360 A70-12845
- Muonic and hadronic component arrival time distribution in EAS measured under rock compared to Monte Carlo computation
03 p0562 A70-14187
- Electromagnetic component of extensive air showers to three dimensional Monte Carlo simulations of hadronic component using electromagnetic cascade theory
07 p1368 A70-19967
- Extensive air shower simulation for determining inelasticity effect on electrons, hadrons and muons variation at sea level
08 p1563 A70-21674
- Equation of state for cold matter at neutron star densities, deriving equilibrium equations for nuclear interactions among hadrons
09 p1764 A70-23606
- Hadron energy levels description by Lorentz invariant wave equation in form of supermultiplets
15 p2776 A70-31736
- Deep inelastic lepton-hadron scattering cross sections universality properties based on Wilson theory
20 p3674 A70-39150
- Three dimensional Monte Carlo simulation of extensive air shower processes, comparing with hadrons and electrons energy spectra
20 p3699 A70-39442
- Ionization spectrometer for hadron energy measurement, analyzing instrument accuracy by Monte Carlo model for nuclear-EM cascade in iron absorber
20 p3635 A70-40456
- Friedmann universe evolution after big bang via Hagedorn hadronic equation of state, noting primordial He abundance criterion
21 p3888 A70-41122
- HAFNIIUM**
High temperature Hf oxidation in air and oxygen using thermogravimetry, X ray diffraction and electron microscopy
05 p0863 A70-16522
- Chondritic and achondritic meteorites Zr and Hf abundances, distributions and ratios, using thermal and neutron activation analyses
18 p3310 A70-35968

HAFNIIUM ALLOYS

- Internal nitriding kinetics of W-base alloys containing Hf, investigating morphology of resulting Hf nitride dispersion
02 p0317 A70-12319
- Omega transformation in Hf-Nb alloys, investigating aging at various temperatures
18 p3273 A70-36044
- Oxygen solubility in Nb-Hf alloys at elevated temperatures, using isothermal sections for Nb-rich part
19 p3453 A70-38708

HAFNIIUM CARBIDES

- Temperature dependence of Vickers pyramid hardness for Ti, Zr and Hf carbides at wide temperature range in vacuum
08 p1516 A70-20986

HAFNIIUM COMPOUNDS

- NT HAFNIUM OXIDES**
Ti, Zr and Hf diborides electrophysical properties, discussing temperature effects and electronic structures
23 p4205 A70-43991
- Thermal and electrical conductivities of zirconium and hafnium diborides polycrystalline powders at 300-1300 K
23 p4209 A70-44443

HAFNIIUM OXIDES

- Microstructure and composition of hafnium dioxide stabilized with Ca, Y and Mg oxides using metallographic, X ray and microprobe
20 p3654 A70-39242

HAIL

- High speed hail impact damage on flat Al alloy plates observed for effects of impact angle and velocity, plate material properties and thickness
01 p0056 A70-10690
- Aircraft structural damage due to high speed hailstone impact, considering aircraft design modifications
02 p0386 A70-11938
- Reliability of Doppler radar hail detection, discussing corrupting effects of turbulence and shear, size-sorting and vertical air motions
03 p0443 A70-13167
- Cloud base updraft field, three dimensional reflectivity pattern and rain and hailfall pattern for thunderstorms in Alberta, discussing shear
06 p1099 A70-18569
- Radar model of shower and hail clouds as two phase system of independently scattering spherical particles, stressing radar properties dependence on particle properties
08 p1536 A70-21097
- Electric field effects on electrification of colliding ice spheres, discussing relaxation time of sphere charges and charge exchange
08 p1538 A70-21114

HAILSTONES

- U HAIL**
Guinea pig cochlear hair cell damage after exposure to impulse noise
02 p0236 A70-12322
- Chemically treated rolled hair properties following long term use in hair hygrometers
24 p4333 A70-45138
- Sonic boom effects on guinea pigs Corti organ, comparing auditory damage in cochlea with hair cell damage
24 p4305 A70-46374

HALF CONES

- Transonic dynamic stability of free flight half angle cones in wind tunnel for high drag planetary entry vehicles, discussing Mars entry trajectories
[AIAA PAPER 69-105] 06 p1154 A70-17164

HALF LIFE

- Half life of Mn53 calculated from measured activity in sample from Fe meteorite and isotopic ratio Mn53/Mn55
07 p1337 A70-19226

HALF PLANES

- Fourier transform applied to Riemann boundary value solution to biharmonic equation governing elastic theory for half plane with circular protrusion or indentation
01 p0199 A70-10155
- Boundary value problems for orthotropic half plane and infinite orthotropic plane with cuts, considering loads at various points
03 p0593 A70-13497
- Stress distribution in anisotropic half plane with reinforced circular hole under external loads applied at plane infinity and ring edge
04 p0765 A70-14417
- Displacements and stresses obtained for elastic half plane with variable Poisson ratio under certain traction boundary conditions, using Fourier transform method
05 p0940 A70-16512
- Contact stresses between elastic half planes and elastic cover plates determined by integrodifferential equation with Hilbert kernel
07 p1400 A70-18667
- Isotropic elastic body occupying half plane assuming elasticity coefficients of certain class
07 p1407 A70-19376

- Singular part of half plane stress field solution using Cosserat elasticity theory
07 p1409 A70-19570

- Steady temperature field and stresses produced by thermal sources in infinite elastic plane containing insulated rectilinear crack, determining thermoelastic state of half plane
08 p1587 A70-21172

- Thermoelasticity problem for plane with rectilinear cut with constant temperature at initial moment of time, using approximating kernel of integral equation
10 p1965 A70-25296

- Contact stresses in elastic half plane with boundary connected to rod and moment applied at arbitrary point
10 p1965 A70-25324

- Viscoelastic half plane creep under discontinuous boundary conditions, obtaining exact closed-form solution based on Fourier transforms and distribution theory
10 p1965 A70-25325

- Plane electromagnetic wave diffraction by perfectly reflecting half plane calculated by elementary method
12 p2184 A70-27234

- Closed form solutions of boundary value problems for Burger equation within half plane from zero to infinity
14 p2598 A70-30492

- Elastic half plane with crack perpendicular to free surface and under arbitrary pressure distribution, obtaining exact solution for stress and displacement fields
15 p2767 A70-31854

- Wave diffraction by half plane limit of parabolic cylinder and wedge, using Fresnel integral and Heaviside step function
15 p2700 A70-32409

- Plane wave diffraction by cylinder tipped half plane, demonstrating localized behavior by geometrical theory
16 p2872 A70-32975

- Monochromatic electromagnetic wave diffraction on moving ideally conducting half plane, deriving parameters and spectral composition after diffraction
16 p2863 A70-33216

- Elastic Cosserat half plane, analyzing wave propagation of small amplitude thermoelastic disturbances and uniform motion of concentrated line load along surface
18 p3338 A70-36434

- Polarized plane EM wave diffraction by inclined half plane grating, obtaining transformation matrices coefficients
19 p3376 A70-37714

- Half plane with stress-free surface deformed by protrusions or notches, deriving edge force or screw dislocation by linear elastic analysis
21 p3939 A70-42028

HALF SPACES

- Time dependence of contact zone radius of rigid sphere pressed against viscoelastic half space by normal force
02 p0384 A70-11738

- Stress distribution in half space of inhomogeneous media, studying scale and edge effects relation for elastic and ideally plastic media
03 p0590 A70-13376

- Elastokinetic three dimensional boundary value vibration problem, involving rectangular area on surface of elastic half space under periodic normal stress
03 p0601 A70-14319

- Linear nonaxisymmetric bending of infinite plate coupled to elastic half space under concentrated loads using double Fourier transforms
04 p0766 A70-14480

- Plane Lamb problem in semiinfinite micropolar elastic body solved by transformation to one dimensional wave propagation problem in elastic half space
05 p0925 A70-15785

- Unloading wave in elastic-plastic half space with rigid unloading for two parameter loads, discussing deformation body model
05 p0925 A70-15825

- Axial compression of elastic circular cylinder in contact with identical elastic half spaces, determining interfacial surface stresses for frictionless and adhesive contacts
05 p0930 A70-16082

- Adhesive rocking and parallel translation contact for circular cylindrical punch indenting elastic half space solved using simultaneous equations
05 p0932 A70-16139

- Mixed boundary value problems of isotropic elastic half space with ring shaped separation region
05 p0935 A70-16232

- Plane and cylindrical elastic waves dynamic characteristics propagating in half space with holes, reducing boundary value problem and deriving formulas for interacting waves
05 p0946 A70-16858

- Model for impact behavior of elastic body at elastic half space, measuring gas molecule impulse exchange at metal surfaces
06 p1171 A70-18260

Large Froude number solution for nonseparative impact of elliptical cylinder floating on incompressible fluid surface in half space extended to small Froude numbers

07 p1253 A70-18770

Plane electromagnetic wave penetration into ferromagnetic half space solved for nonlinear parabolic equations using difference method

07 p1227 A70-18992

Torsion of elastic half space containing circular crack with symmetry axis coinciding with annular stamp rigidly coupled to half space

07 p1414 A70-20183

Inhomogeneous elastic half space surface response to moving line loads

08 p1584 A70-20645

Half space elasticity problems solved by operator method

08 p1586 A70-21013

Dynamic response of joined elastic quarter spaces of solids to time varying free surface shear tractions parallel to plane of juncture

[ASME PAPER 69-APMW-16] 08 p1591 A70-21467

Transient waves propagation in homogeneous isotropic linearly elastic half space excited by traveling normal point load on surface, deriving displacements

[ASME PAPER 69-APMW-12] 08 p1592 A70-21468

Monochromatic plane electromagnetic wave incident from vacuum on plane boundary of plasma half space, discussing specular reflection and diffuse scattering boundary conditions

08 p1553 A70-21611

Steady harmonic oscillations of half space with circular holes, deriving algebraic equations for boundary value problems

09 p1782 A70-23296

Reissner-Sagoci transient mixed boundary value problem concerning displacement of infinite half space of isotropic elastic material, deriving surface displacement and reactive torque

09 p1784 A70-23571

Point electric dipole EM radiation in presence of moving dispersive dielectric half space

09 p1639 A70-23669

Nonstationary thermoelasticity in half space with moving boundary condition described in Cartesian rectilinear coordinates allowing for time term in heat conduction equation

10 p1954 A70-24012

Vertical tubular dipole antenna input admittance and current distribution above infinite dissipative half space

12 p2197 A70-27953

Coherent wave reflection from random half space, solving scalar Dyson equation in bilocal approximation for oblique incidence

12 p2189 A70-27972

Concentrated force action inside transversely isotropic half space analyzed by mirror image method

13 p2512 A70-28865

Plane harmonic wave steady state diffraction at cylinder in elastic half space, applying method of images

13 p2366 A70-29320

Nonlinear wave propagation in continuous media involving stress-strain state of half space under pressure or load expanding over boundary

13 p2517 A70-29770

Time harmonic waves propagation in elastic half-space with submerged cylindrical cavity, assuming linear plane strain conditions

13 p2518 A70-30010

Elastoviscoplastic medium filled half space motion under pressure front moving along surface with time varying velocity, analyzing penetrating wave fronts form

16 p2990 A70-33780

Wave propagation from two dimensional expanding load on liquid half space with load fronts decelerating monotonically from initial supersonic speed

17 p3069 A70-34976

Ideal fluid contained in half space with circular or strip-like aperture, formulating mathematical model to determine sloshing frequencies

18 p3238 A70-36057

Forced vibration in Cartesian half space filled with elastic medium, investigating uniqueness conditions

18 p3337 A70-36289

Half space nonstationary temperature field with mobile heating at edges, using integral transformations

18 p3348 A70-36725

Dipole antenna radiation in compressible anisotropic electron plasma overlying imperfectly conducting half space, solving for lunar environment

19 p3381 A70-38407

Dipole antenna radiation in compressible anisotropic electron plasma overlying imperfectly conducting half space, evaluating Fourier-Bessel integrals for lunar environment

19 p3381 A70-38408

Skin effect for unsteady radio waves emitted into homogeneous nonmagnetic isotropic half space, calculating electric field

19 p3381 A70-38571

Pair correlations effect in equilibrium and nonequilibrium theory, taking Coulomb collisions into account for ionized plasmas confined to half space by reflecting boundary

20 p3679 A70-39662

Thermodynamics of LiBr in anhydrous dimethyl sulfoxide determined at several temperatures using EMF method

06 p1003 A70-17219

Thermal decomposition of acetate ion in potassium halide matrices, using IR spectroscopy

22 p3981 A70-42453

Al purification by subhalide reaction, discussing contamination sources and thermodynamics

24 p4349 A70-46187

HALL ACCELERATORS

Coaxial electrodes with electric and magnetic fields to study instability in MPD arcs
[AIAA PAPER 69-230] 04 p0737 A70-15542
Low density Hall ion thruster with application to Van Allen probe and orbit-to-orbit transfer
[AIAA PAPER 69-281] 13 p2475 A70-29957
Electrical characteristics of high current two stage DC Hall accelerator for use in controlled thermonuclear fusion 24 p4383 A70-45117

HALL COEFFICIENT

U HALL EFFECT

HALL CURRENTS

U ELECTRIC CURRENT

U HALL EFFECT

HALL EFFECT

Electrothermal instability and critical Hall parameter growth rates in closed cycle linear plasma generators with variable electron mobility, discussing perturbation effects

01 p0151 A70-10655

Geomagnetic field directed hydromagnetic waves propagation in lower ionosphere noting inhomogeneous conductivity, Hall effect and lines of forces role

01 p0083 A70-11546

Hall current effect on steady boundary layer flow of incompressible viscous electrically conducting fluid past semiinfinite flat plate in transverse magnetic field

03 p0469 A70-14183

Current stream function, Hall current density, force densities and pressure distribution for typical MPD thruster

03 p0552 A70-14372

Electron temperature and particle density measurements in annular MHD duct, demonstrating Hall effect existence

04 p0725 A70-14532

Plasma acceleration by induced Hall currents, discussing Hall-to-current ratio maximum at critical magnetic field

04 p0729 A70-15596

Compressible fluid flow satisfying perfect gas equation in presence of thin foil, developing operators characterizing incompressible and compressible flows without Hall effect

05 p0790 A70-16158

Hall voltage measurements on Ta thin films using square wave generator current, discussing parasitic effects and suppression possibilities

05 p0863 A70-16366

Hall effect measurements in liquid semiconductors and metals

06 p1127 A70-17919

Critical Hall parameter indicating instability in alkali-seeded noble gases in nonequilibrium MHD generators

[AIAA PAPER 70-40] 06 p1122 A70-18107

Hall voltage and electric conductivity measurements in alternating magnetic field and current by narrow band amplifier with synchronous detector

07 p1279 A70-18944

Hall current effects on anisotropic plasma magnetogravitational instability under uniform magnetic field, considering electron inertia role and plasma perturbations

07 p1348 A70-19228

Hall effect and electric conductivity of cadmium arsenide at high temperatures as function of carrier concentration dependence on temperature and phase transformation

07 p1357 A70-20314

Tensor conductivity, magnetic field and electric field effect on heat transfer in MHD channel flow, solving for temperature and Nusselt number

08 p1554 A70-21773

Hall effect on MGD flow past axisymmetric body by studying incompressible inviscid fluid past body of revolution at zero incidence

09 p1661 A70-23074

Boundary layer of MGD flow past axisymmetric insulator body analyzed to determine torque due to Hall effect

09 p1663 A70-23579

Ionospheric current flow past circular inhomogeneous spot with Pedersen and Hall conductivities, calculating earth surface magnetic field by Lipschitz-Hankel integral

10 p1873 A70-24309

Nonequilibrium plasma MHD generator critical pressures determination, applying electron energy balance equation and relation between plasma conductivity and Hall parameters

10 p1809 A70-25142

Thermoelectric power and Hall effect quantum resonances in pressure annealed pyrolytic graphite crystals for carrier locations evidence

11 p2097 A70-25616

Hall effect influence on HF traveling magnetic field penetration into solid cylinder plasma device compared to magnetically contained plasma

11 p2088 A70-25712

Hall constant and carrier mobility in semiconductor diamond films doped by boron ion injection, observing temperature dependence of mobility

12 p2287 A70-27480

Compressible fluids Alfvén flow with Hall effect presence of thin foils, reducing problem to Fourier integral equation

13 p2442 A70-29484

Hall, polarization and Pedersen charged particle drift velocities in static magnetic and time dependent electric field

14 p2624 A70-31046

Compressible plasma gravitational instability taking into account Hall effect

14 p2624 A70-31225

Acceptor level formation kinetics from measuring Hall constant as function of temperature after diffusion of copper into n-type GaAs

15 p2782 A70-31633

Equilibrium and steady state Hall and thermoelectric effects in inhomogeneous semiconductor materials

15 p2783 A70-31760

Coaxial electrode arc discharge plasma accelerators at reduced pressure under crossed fields, employing Hall effect

15 p2779 A70-32104

Continuously working plasma thrusters, describing operating principles of Hall current and self magnetic acceleration systems

15 p2790 A70-32277

MAGFET devices for integrated circuits, calculating magnetic sensitivity as function of channel aspect ratio and Hall electrode position

15 p2710 A70-32572

Micro-Hall device as tool for evaluating epitaxial silicon in integrated circuit processing

15 p2710 A70-32573

Near cathode magnetic field effect on instability in linear Hall current accelerators, using geometry of field extending from anode to cathode region

[AIAA PAPER 69-381] 16 p2959 A70-33870

Electrical conductivity, Hall constant and differential thermal emf n-type GaAs-CdS solid solutions

18 p3298 A70-36596

Magnetite and ferrite spinels Hall effect, magnetoresistance and electrical conductivity over wide temperature range

19 p3485 A70-37627

Helicon electromagnetic wave attenuation control by steady current of uniform density in propagation direction, considering Hall effect role

20 p3585 A70-39396

Homopolar device electric arc dynamics dependence on gas type, noting flow geometry-Hall effect competition

20 p3681 A70-40009

Nonequilibrium plasma stability, conductivity and Hall parameter influenced by current flow parallel to magnetic field, discussing Ar-Cs and He-Cs plasma data

20 p3682 A70-40019

Magnetoresistance nonlinearity and Hall effect in graphite in magnetic field, observing temperature dependence below 4.2 K

21 p3862 A70-40945

Drift reducing NMR stabilization of Hall regulated electromagnet, applying error signal to bias coil

21 p3827 A70-41456

Rb and Cs ions implanted Si analyzed by Hall effect and sheet resistivity measurements and channeling techniques

22 p4087 A70-43143

Hall effect on incompressible electroconducting viscous fluid motion past finite conducting flat plate, discussing boundary conditions

23 p4225 A70-44247

Critical Hall parameter for linear development of MHD electrothermal instability in bounded nonequilibrium plasma

23 p4227 A70-44555

Analog three dimensional electrical signal multiplier circuit based on Hall effect, considering division and square root extraction

24 p4319 A70-45484

Thermoelectric power and Hall effect quantum resonances in graphite for locating majority carrier electron and hole Fermi Surfaces in Brillouin zone

24 p4389 A70-45597

Inviscid conducting incompressible fluid steady motion past thin airfoils, presenting crossed and aligned fields and Alfvén motion with Hall effect

24 p4289 A70-46033

HALL GENERATORS

Hall generator DC brushless motor operation and applications, obtaining motor action by rotor and stator magnetic fields interaction

02 p0228 A70-12053

Hall MHD generator with supersonic flow instability to magnetoacoustic waves propagating antiparallel to steady electric current in dense weakly ionized gas

12 p2281 A70-27805

Hall generator measurement of impulse currents, noting error sources and compensation

16 p2900 A70-33072

Combustion driven Hall configuration MHD generator, discussing boundary layer analysis, gas density nonuniformity and electrode drop

20 p3566 A70-40003

Performance comparison of diagonal conducting wall MHD generator and Hall generator of equal dimensions, investigating wall temperature effect

20 p3566 A70-40004

Eddy currents in Hall generator with conducting side wall, studying velocity and temperature effects for turbulent boundary layer and laminar flows

21 p3859 A70-41733

Optimal load circuits number for maximum power extraction from Hall MHD generator with nonuniform gas flow along channel

23 p4143 A70-44900

NT SULFUR FLUORIDES
NT TITANIUM CHLORIDES

Chemiluminescence in alkali metals and halogenated methanes diffusion flames, studying diatomic Cs spectral bands

02 p0250 A70-12018

Fire extinguisher compounds/bromochloromethane and bromotrifluoromethane/pyrolysis products inhalation toxicities for rats

07 p1219 A70-19223

Tetrafluorodibromo-ethane and bromomethyl inhibiting effects on explosion development in constant volume container and flame expansion rates in hydrogen-air mixtures

18 p3345 A70-36241

HALOGENATION

NT CHLORINATION

NT FLUORINATION

HALOGENS

NT BROMINE

Work function measurement for adsorption of diatomic I, Br and Cl on W crystal using electron beam retarding potential method

05 p0891 A70-15973

HALOPHILES

Purification and reversible inactivation of isocitrate dehydrogenase /ICDH/ of Halobacterium cutirubrum, overcoming difficulties in purifying halophilic enzymes

01 p0021 A70-10792

Nicotinamide adenine dinucleotide phosphate /NADP/ specific isocitrate dehydrogenase /ICDH/ inactivation from obligate halophile at low NaCl levels

15 p2685 A70-32671

Halophilic bacteria electron transport chain, examining hydrophobic forces role in menadiene reductase structure

21 p3772 A70-40574

HALOS

Ice crystal density in Martian atmosphere from brightness of Martian polaric halo

08 p1564 A70-20547

Galactic halo origin and evolution postulated from chemical evolution assuming stellar evolution details

09 p1758 A70-22742

Scattering particle distribution relation to halo formation in polydisperse clouds, using Kirchhoff approximation for halos theory construction

12 p2264 A70-27522

Cosmic rays origin, discussing choice between galactic halo and radio disk models for trapping region

12 p2295 A70-27883

Halo rings at hexagonal ice crystals in Martian atmosphere, analyzing via bright formations with respect to planetary phase angles

13 p2493 A70-29397

Angular distribution of diffusely reflected solar rays over spherical shell planetary atmosphere, determining halo brightness

14 p2632 A70-31222

Ice crystal density in Martian atmosphere from brightness of Martian polaric halo

15 p2796 A70-31456

HAMBURGER AIRCRAFT

NT HFB-320 AIRCRAFT

Monograph on HFB 600 V/STOL transport for civil and military air traffic, discussing intercity travel, military dispersal requirements, systems performance, cockpit layout, etc

07 p1194 A70-19605

Hansa 330 fan jet design for executive and commuter market, discussing forward-swept wing concept and standardized structures and systems

07 p1194 A70-19619

HAMBURGER HFB-320 AIRCRAFT

U HFB-320 AIRCRAFT

HAMILTON-JACOBI EQUATION

MHD wave propagation through plasma in magnetic field of current filament, developing Hamilton-Jacobi equation by geometrical optics

01 p0151 A70-10466

Optimal control synthesis in flight dynamics, solving Hamilton-Jacobi-Bellman equation by finite difference technique

02 p0336 A70-12403

Spherical pendulum equations of motion solved using Hamilton-Jacobi theory

08 p1546 A70-21465

Collisionless plasmas strong turbulence in terms of mixing length and Hamilton-Jacobi theories

13 p2458 A70-28562

Optimal control in nonlinear systems, discussing conditions for analytical solutions for Hamilton-Jacobi equations

16 p2886 A70-33335

Classical approach to quantum mechanics, emphasizing Schroedinger equations and starting from Hamilton-Jacobi equations

16 p2990 A70-33778

Optimal trajectories analysis by canonical transformation for obtaining solution to Hamilton-Jacobi equation without quadratures

16 p2943 A70-33899

Hamilton-Jacobi theorem for nonlinear dynamic system moving with holonomic Cetaev constraints, investigating necessary and sufficient conditions

23 p4210 A70-44024

Static spherically symmetric charged mass distribution exact solutions derived for electrons in scalar tensor theory of gravity by Hamilton-Jacobi method

23 p4222 A70-44403

HAMILTONIAN FUNCTIONS

Lagrange and Hamilton equations of motion of mass point in physical space of general theory of relativity based on least action principle

01 p0146 A70-11444

Final motions of Hamiltonian conservative systems, analyzing Liouville type, homogeneous and similar systems

01 p0146 A70-11561

Autonomous two degrees of freedom Hamiltonian system triangular libration points found stable for all mass ratios in circular restricted three body problem

01 p0192 A70-11575

Bounded operator functionals used for deriving nonlocal interaction Hamiltonian of quantum electrodynamics corresponding to converging series for scattering matrix in perturbation theory

05 p0883 A70-16876

Bounded nonlocal operator used in deriving series of subtracting Hamiltonians representing S matrix in perturbation theory after transition to local limit

05 p0883 A70-16877

Magnetoelastic spin Hamiltonians applied to magnetostriiction of Yb in YIG

06 p1128 A70-18642

Hamiltonian methods applied to homogeneous cosmological models, obtaining Einstein equations, passing to quantum theory by imposing canonical commutation relations

07 p1336 A70-19921

Periodic orbits for reduced problem of conservative Hamiltonian system with two degrees of freedom, discussing emergence from resonant equilibrium

10 p1939 A70-24187

Euler graphs with special properties, discussing Hamiltonian lines existence and derivatives

14 p2601 A70-31424

Bilinear scalar spin Hamiltonian inadequacy to describe electron exchange in systems containing orbitally degenerate ions, considering cobalt magnon spectra

15 p2777 A70-32399

Gaseous diatomic molecules quantum mechanical treatment, calculating Hamiltonian matrix elements for interpretation of electron resonance spectra

16 p2955 A70-33799

Delaunay reduced Hamiltonian verification in lunar ephemeris theory based on Lie transforms

16 p2978 A70-33972

Perturbation theories based on canonical transformations, examining von Zeipel theory and Hamiltonian functions

22 p4109 A70-43749

Three body problem periodic solutions, considering near equilibrium conservative Hamiltonian system consisting of two harmonic oscillators with rationally related frequencies

23 p4213 A70-44897

German monograph on Hamilton principle and Hermetian polynomials for solving linear and nonlinear differential equations via computer method

24 p4369 A70-45091

Lunar theory literal solution for average node and perigee movements compared with Delaunay results, using Lie transforms for Hamiltonian function

24 p4399 A70-45141

HAMSTERS

Mice and hamster infection resistance following short term acceleration stress, eliminating low hydrocortisone level as protective agent

03 p0428 A70-14067

Experimental procedure for investigating radioprotective effectiveness of chemical compounds against X ray irradiation, discussing Cysteamine protection for golden hamsters and fetuses

06 p0993 A70-17429

HAND (ANATOMY)

Monograph on systematically disturbed sensorimotor coordination, studying various parameters effects on eye-hand system recorelation

09 p1618 A70-22529

Hand-eye coordination in altered gravitational fields, using mirror viewed target in reaching test

15 p2689 A70-31886

Hand held device for finger /thumb/ strength measurements
24 p4309 A70-46121

HANDBOOKS
Planetary trajectory handbooks for mission and system analysis covering opportunities for Mercury, outer planets and Mars, contour charts, etc
13 p2486 A70-28525

HANDLING
U MATERIALS HANDLING
HANDLING EQUIPMENT
NT CRANES
Personnel/cargo lowering and retrieval system requirements, design approach and effects on performance for CH-47 helicopter, discussing fabrication and testing on mockup
06 p0985 A70-17711
Pressure chamber with inserted holder for adjusting Fabry-Perot interferometer
09 p1681 A70-23337
Automated baggage handling and processing, requiring total aviation community participation [AIAA PAPER 70-917]
17 p3204 A70-35829

HANDLING QUALITIES
U CONTROLLABILITY
HANGARS
Equation for disturbance of ILS localizer signals by reflection from flat hangar wall, discussing computer program
04 p0652 A70-15344

HANKEL FUNCTIONS
Radial vibration of cylindrical shell of transversely isotropic material determined using finite Hankel transform
03 p0595 A70-13904
Hankel integral transforms of half orders for solving boundary value problems in terms of spherical coordinates
09 p1712 A70-22834
Influence coefficients for toroidal shells under axisymmetric edge loads, taking one term in asymptotic expansion of Hankel function
11 p2132 A70-25693

HANSEN LUNAR THEORY
Iterative Hansen method of general perturbations programmed for digital computer, evaluating major and minor planetary theory
18 p3320 A70-37060

HARDENERS
Ternary Al-Mn alloys precipitation hardening with Cr, V and Ti, investigating ferro and ferrimagnetic phases
07 p1307 A70-19390
Gamma-gamma prime mismatch effects on stress rupture of Ni and Fe-Ni based alloys with Al and Ti hardeners
08 p1521 A70-21701

HARDENING [MATERIALS]
NT CARBURIZING
NT COLD HARDENING
NT HOT PRESSING
NT NITRIDING
NT PRECIPITATION HARDENING
NT PULSE HEATING
NT SHOT PEENING
NT SILICONIZING
NT STRAIN HARDENING
NT WORK HARDENING
Calorimetric analysis and hardness test to investigate low temperature aging behavior of maraging stainless steels
01 p0125 A70-11642
Radiation hardened fiberglass reinforced plastics rupture, bending, compression and tensile strength and elastic modulus, considering gamma ray doses effect
02 p0323 A70-12811
Mechanical properties of ordered Ni-Cr alloys, establishing hardening effect of annealing
03 p0505 A70-13105
Case hardened steels structure and properties, intermetallic phases, hardness variation with depth and hardening techniques by Be and B
03 p0510 A70-13351
Titanium alloys case hardened by diffusion of various metals at high temperatures, measuring increase in wear resistance
03 p0513 A70-13858
Elastic interaction energy involved in Ti solution hardening by oxygen determined using anisotropic elasticity, presenting atomistic calculations and chemical bonds breaking role
05 p0862 A70-15906
Stress kinetics and breakdown time of hardening Al alloys and steels under cyclic loads, noting dependence on plastic deformation
06 p1162 A70-17391
Thin walled tubular aluminum specimens hardening by temporary reduction of temperature during creep under torsion
06 p1089 A70-17795
Alloying elements effects on vanadium alloys case hardening by boronizing
07 p1303 A70-18742

Stainless steels case hardening in hydrogen, nitrogen, propane and butane mixture, showing temperature and process duration effects
07 p1291 A70-18831
Ni-Cr alloys hardened by complex alloying with Ti-Al or Ti-Zr-C additions, improving strength at elevated temperatures in oxidizing atmosphere
10 p1904 A70-24836
Ta solid solution hardening by nitrogen and oxygen, noting yield stress variation with interstitial gas concentration
13 p2434 A70-29084
Alloying elements and austenization conditions effects on hardenability of steels, investigating critical cooling rates based on TTT diagrams
15 p2744 A70-31929
Axisymmetric elastoplastic deformation of compressible plate with arbitrary hardening under uniform load, solving in quadratures
15 p2817 A70-32167
Ti-Al-V-Sn hardenability, using high temperature solution treated Jominy bars tests
15 p2762 A70-32393
Fracture of failed tensile impact and compression test pieces of hardened SAE 52100 steel, using scanning electron microscope
15 p2745 A70-32443
Quench hardening and Ni content relationship in Ti-Ni intermetallic compounds, investigating heat treatment effect on mechanical properties
16 p2930 A70-33084
High strength Ti alloys depth hardenability, discussing mechanical properties and use in aircraft components
17 p3121 A70-34434
Al single crystals hardening under low temperature reactor irradiation, emphasizing yield phenomenon associated with Luders bands
17 p3123 A70-34647
Strain rate effect on cyclic behavior of materials with hardening and softening characteristics
17 p3187 A70-34988
Structural hardening of nickel maraging steels related to Portevin-Le Chatelier effect in necking zone of stress-strain curves
17 p3124 A70-35141
Mn and Ti effects on hardening of Fe-Ni-Mn-Ti and Fe-Ni-Mn maraging martensitic steels
17 p3125 A70-35145
Alloy hardening statistical theory, applying flow stress to second phase randomly dispersed particles
17 p3191 A70-35458
Oxygen pressure effect on stainless steel cyclic hardening during vibration tests at resonant frequency
18 p3273 A70-36042
Ultrasonic irradiation effects on steel hardenability and carbon diffusion rate during annealing, noting microstructure
18 p3273 A70-36049
Deformable Al alloys hardening, emphasizing heat treatment in solid state
18 p3276 A70-36308
Maraging steels heat treatment, measuring hardness as function of temperature for various heating rates
19 p3452 A70-37807
Metallurgical changes induced by planar shock wave propagation through metals and alloys, describing shock-hardened metals macro and substructure
20 p3652 A70-40142
Ta single crystal inherent lattice and interstitial solution hardening, discussing impurity doping effect on flow stress thermal component
21 p3839 A70-40902
Maraging steels hardening mechanisms, discussing dislocations density and distribution and Ni, Mo and Co additives effects
23 p4208 A70-44919

HARDENING (SYSTEMS)
Nuclear environments determination methodology for ground military equipment hardening, considering personnel and equipment responses to detonation in atmosphere
12 p2271 A70-27097

HARDNESS
NT KNOOP HARDNESS
NT MICROHARDNESS
NT ROCKWELL HARDNESS
Carbon effect on high temperature elasticity modulus and long term hardness of Nb, indicating diffusion enhancement and counteractive Zr addition
03 p0509 A70-13252
Al and Ti single additions effects on recrystallization of Ni-Cr alloys, noting phase transformation and hardness variations
03 p0513 A70-14300
Titanium carbide based cermets with steel matrices, studying heat treatment effects on hardness
04 p0696 A70-14462
Hard alloy mixture shaping by free vibrational compacting of powders
07 p1296 A70-19801
Temperature dependence of Vickers pyramid hardness for Ti, Zr and Hf carbides at wide temperature range in vacuum
08 p1516 A70-20986

Metal and alloys hardness measuring devices at high temperatures in ultrahigh vacuum based on use of synthetic sapphire pyramidal indenter
09 p1675 A70-22566
Isomorphous beta type Ti-Mo alloy omega phase transformations and morphology by electron microscopy, relating hardness to aging
10 p1902 A70-23817
Microconstituents effect on wear behavior of high hardness steels on basis of crossed-cylinder testing, discussing intermetallic compounds influence
10 p1895 A70-24853
Residual stresses effect on strength and hardness of tungsten carbide-cobalt alloy by application of small plastic deformations, observing crack formation anisotropy
10 p1904 A70-25168
Fe-Mo-C and Fe-Ti-C alloys microstructure and hardness after rapid cooling from melt, considering phase dispersion and particle size, spacing and shape
11 p2065 A70-25774
Titanium alloys quench hardenabilities, determining variations with distance from end of Jominy bars after annealing
17 p3119 A70-34415
Friction coefficient dependence on hardness of softer element of friction pair determined at constant values of shear strength, using external friction concepts
17 p3102 A70-35672
Carbon effect on high temperature elasticity modulus and long term hardness of Nb, indicating diffusion enhancement and counteractive Zr addition
19 p3453 A70-38470
W-Mo-Nb-Ta system with constant 30 percent W, discussing specific weight and hardness
19 p3453 A70-38714
Heating conditions effect on microstructure, hardness, transformation temperatures and dimensional anisotropy of maraging steel
20 p3649 A70-39941

HARDNESS TESTS
Rockwell hardness tester attachment design for studying temperature dependence in various multiphase alloys at high temperature
01 p0121 A70-11110
Hardness measuring instrument by dynamic method at high temperatures in vacuum, using magnetic or nonmagnetic indenter balls
01 p0092 A70-11111
Steel objects microstructure and hardness tested by continuous magnetic technique, describing experimental apparatus model
02 p0300 A70-12479
Ferroprobe coercimeter with attached electromagnets for nondestructive hardness testing, describing components and mounting
02 p0301 A70-12489
Aged Al-Cu alloys hardness test data normalized and correlated for interpretation in terms of physical metallurgy
08 p1525 A70-21967
Graphite Shore hardness measurement at high temperature on Joule heated specimens, describing apparatus and procedure
15 p2764 A70-31944
Ti-Al-V-Sn hardenability, using high temperature solution treated Jominy bars tests
15 p2762 A70-32393
Pure Fe and Ta hot hardness using ultrahigh temperature hardness tester
17 p3124 A70-34659
Pure Fe and Ta hot hardness tests by ultrahigh temperature tester involving use of electron microscope
21 p3840 A70-41900

HARDWARE
Large wall display system for USAF command and control with central computer and seven color projector, discussing hardware and operational features
05 p0828 A70-16193
Hardware and system testing mathematical model assuming stochastic design and manufacturing defects detection and nondetection probability equations analogous to reliability function
10 p1896 A70-24915
Air traffic control procedures pertaining to personnel, hardware and regulations
11 p2078 A70-25720
ATC ground hardware technology implementation, considering national air space system, airports, cost estimates and capacity increase
11 p2078 A70-25722
Manufacturing error rate and inspection efficiency relevance to hardware product reliability
12 p2244 A70-28014
Low thrust mission simulation dependence on hardware definition, discussing power plant characteristics, jet velocity and thrustor efficiency
13 p2486 A70-28517
Navigation correction systems for space missions, discussing prelaunch analysis, design and mission operations, hardware, etc
13 p2448 A70-28705

Interactive computer graphics applied to continuous system modeling program /CSMP/, describing hardware system configuration

16 p2870 A70-33727

Apollo J mission hardware modification for lunar exploration, describing systems engineering role

21 p3928 A70-40979

Aerospace digital computer family structural commonality, considering architecture, hardware and support software

21 p3794 A70-41687

HARMONIC ANALYSIS

NT TESSERAL HARMONICS

NT ZONAL HARMONICS

Harmonic analysis of upper atmospheric wind periodic data from radar sounding of meteor trails, defining principal diurnal wind variations

01 p0134 A70-10201

Underground and surface telescope measurements of second harmonic of primary cosmic ray daily variation and upper solar modulation limit

01 p0170 A70-10405

Geomagnetic potential optimal representation in frame of reference of eccentric inclined dipole using conversion formulas to determine harmonic coefficients

01 p0081 A70-11230

Harmonic analysis of magnetic storms initial phases having steep leading edges and distinct steady portions, showing homogeneity in first approximation

01 p0084 A70-11558

Geomagnetic field representation in terms of spherical harmonics, analyzing data for spherical and oblate models of earth

03 p0476 A70-13906

Harmonic equilibrium method applied in dynamic problems analysis of autopilot electrohydraulic servomechanisms stability

03 p0415 A70-13930

HF expansions of harmonic solutions concentrated at waves propagating in inhomogeneous medium to dynamic equations in elasticity theory

04 p0767 A70-14499

Modified harmonic balance method applied to critical values determination of nonlinear automatic control system parameters

04 p0661 A70-14555

Continuum, harmonic and finite element perturbation studies of elastica to yield postbuckling path derivatives from nonlinear energy formulation

05 p0927 A70-16011

Geomagnetic normal fields determination using spherical harmonic analysis, including extension to local fields

05 p0842 A70-16749

Three dimensional boundary layer on body in external harmonic flow with HF velocity fluctuations

07 p1252 A70-18711

Potential and gravity distributions on lunar surface, showing presence of harmonics of all orders

07 p1385 A70-19425

Harmonic analysis of ionospheric electron density oscillation spectra, noting density fluctuations classes due to internal gravity wave propagation and N/h profiles calculation errors

07 p1266 A70-19449

Magnetic storms effect on cosmic ray neutron component diurnal variation, determining amplitudes and phases of harmonics by harmonic analysis

07 p1372 A70-20341

Geomagnetic field lines coordinates calculation based on coefficients obtained in spherical harmonic analysis

07 p1278 A70-20460

Dispersion equation harmonic analysis for three dimensional periodic structure

09 p1637 A70-23156

Periodic solution existence theorem using harmonic linearization method

11 p2023 A70-25725

First harmonic of diurnal variation in pressure corrected cosmic ray neutron monitor rate, discussing amplitude variation with height and observed time dependence

12 p2291 A70-27177

Sinusoidal signal harmonics measurement to determine nonlinear resistance junction I-V equation, discussing applications to circuit analysis

12 p2204 A70-28132

Cosmic radiation periodic variations measurements noting second harmonic importance of daily variations

13 p2478 A70-29230

Harmonic analysis of digital data from satellite measurements of periodic phenomena with unknown periodicity

14 p2554 A70-31415

Controlled libration point satellite limit cycle motion, deriving solution in infinite series by harmonic analysis

17 p3181 A70-35752

Elastic plate vibration with damping under random load, calculating linear response by harmonic analysis

18 p3334 A70-35958

Harmonic analysis of ionospheric electron density oscillation spectra, noting density fluctuations classes due to internal gravity wave propagation and N/h profiles calculation errors

18 p3249 A70-36923

DC-to-sinusoidal inverter employing PWM waveform, analyzing circuit parameters effect on harmonic content

19 p3358 A70-37854

Low temperature anharmonicity in thorium dioxide with Co 57 impurities, using Mossbauer effect of Fe 57

21 p3862 A70-40975

Spherical harmonic analysis of declination and secular geomagnetic variation

21 p3820 A70-41884

Soviet papers on harmonic linearization method in design of nonlinear automatic control systems

22 p3999 A70-42826

Harmonic linearization method for nonlinear automatic control systems, describing theoretical fundamentals

22 p4000 A70-42827

Harmonic linearization of nonlinear hysteretic elements in automatic control systems

22 p4000 A70-42828

Harmonic linearization method for periodic regimes in nonlinear control systems based on periodic solution sensitivity to higher harmonics and small parameters

22 p4000 A70-42829

Harmonic linearization equations for frequency and amplitude of self oscillations in nonlinear automatic control systems

22 p4001 A70-42832

Harmonic linearization method for periodic regimes in discrete nonlinear automatic control systems performing signal quantization with respect to level or time

22 p4001 A70-42833

Harmonic linearization for nonsearching self adaptive automatic control systems described by nonlinear differential equations

22 p4001 A70-42835

Harmonic linearization method for nonlinear automatic control systems with finite automata, discussing self oscillating modes of operation

22 p4001 A70-42836

Satellite orbital elements calculation using ellipsoidal harmonics for geopotential representation

24 p4406 A70-45531

Virtual work equations steady state subharmonic solutions by Newton-Raphson method, developing generalized iterative procedure for nonlinear differential equations

24 p4423 A70-45577

HARMONIC EXCITATION

Flexural vibrations of rotor resting on nonlinear elastic bearings under action of exciting forces harmonics using variational method based on Hamilton principle

07 p1403 A70-19112

Laser emission from organic molecules under neodymium laser harmonics excitation, describing absorption and photochemical inversions effects and emission spectra characteristics

07 p1300 A70-19866

Selective harmonic excitation in one dimensional collisionless plasma conforming to Vlasov equation by counterstreaming electron beams, noting velocity distribution conditions

07 p1353 A70-20202

Hysteretic linear damping theory applied to representation of structural damping under harmonic excitation

10 p1961 A70-25060

Fluid motion in cylindrical tank with arbitrary sector annular cross section subjected to harmonic longitudinal excitation

12 p2211 A70-27818

Floating resonance spike on Alouette 2 ionograms after sounder pulse transmission at half upper hybrid frequency, noting harmonic excitation role

13 p2370 A70-29905

Time decay of higher order cyclotron harmonic resonances with decreasing perpendicular wave number

13 p2467 A70-29908

Linear dynamic systems under nonconservative and harmonic forces, examining stability conditions

16 p2952 A70-33896

Nonlinear systems excitation by two harmonic forces, analyzing vibration by linearization of differential equation of motion

16 p2995 A70-34286

Aeroelastic test equipment for Concorde SST using harmonic method and electromagnetic shakers

19 p3402 A70-38548

Organic laser spectral and energy characteristics, discussing practical operation principles, low generation threshold and harmonic energy

20 p3642 A70-39754

Ideal limiter with polyharmonic signal input, calculating output spectral composition by Fourier series expansion

20 p3587 A70-40143

Elastic body steady forced oscillations under monoharmonic excitation, investigating hereditary nonlinearity effects on systems dynamic characteristics

20 p3733 A70-40395

Dynamic response of simply supported non-homogeneous beam and triangular pulse loads

21 p3933 A70-40584

Linear elastomechanical systems natural vibration parameters by harmonic excitation method

22 p4116 A70-43200

Nonlinear systems subharmonic oscillations under polyharmonic disturbance and viscous damping

24 p4427 A70-46378

HARMONIC FUNCTIONS

Zero crossings of signal harmonic function with normal phase distribution, deriving relations with spectrum and modulating process parameters

03 p0447 A70-13289

Soviet monograph on method of functional equations for solving boundary value problems, discussing computer programs and various applications

09 p1712 A70-23548

Thin airfoil theory, discussing harmonic Dirichlet problem for complex plane

10 p1798 A70-24105

Harmonic functions defining geopotential and gravity derived from satellite orbit dynamics, applying to earth shape parameters

13 p2398 A70-29208

Boundary geometry of region with fluid motions harmonic functions obeying Bernoulli law containing free surface curvature

23 p4218 A70-44337

Homotopic classification of boundary value problems with directional derivatives for harmonic functions

23 p4212 A70-44348

Gravitational field fine structure representation near earth surface as sum of global model in spherical harmonics and local model in harmonic B functions

24 p4328 A70-45287

HARMONIC GENERATIONS

Harmonic generation in scattering of electromagnetic waves by anharmonically bound electrons, noting light source intensity

01 p0141 A70-10278

Nonlinear optical properties of lithium niobate single crystals, considering optically induced index inhomogeneity and second harmonic generation

01 p0157 A70-10422

Third harmonic generation detection for strongly absorbing media in reflection with neodymium-glass mode-locked laser, measuring nonlinear susceptibilities of semiconductors and metals

03 p0501 A70-13649

Laser emission intensity fluctuations influence on optical second and higher harmonic production and optical mixing arising from multimode oscillation

04 p0701 A70-14688

Time dependent variation of first and second harmonics amplitudes of diurnal cosmic ray variations during SC magnetic storms

05 p0898 A70-15942

High power giant pulse YAG laser using nonlinear material to achieve complete second harmonic conversion in intracavity experiment

05 p0859 A70-16470

Optical harmonic generation by doubling picosecond laser pulse frequency under nonstationary conditions

06 p1080 A70-17494

Optical third harmonic generation in ADP crystals using mode locked and nonmode locked lasers

06 p1082 A70-17943

Harmonics generated in hot-wire anemometers responses by wires thermal lag and amplitude of flow velocity fluctuations using computerized simulation

08 p1498 A70-21586

Second harmonic generation and frequency conversion efficiencies for laser beam shaping in nonlinear medium

08 p1514 A70-21984

Two photon fluorescence and second harmonic generation methods for studying picosecond structure of laser output signals

09 p1699 A70-23362

Q switched laser pulses lengthened using internal second harmonic generator

10 p1898 A70-23981

Neodymium glass laser fundamental frequency spatial structure effects on KDP crystal second harmonic generation efficiency, describing optimal system for laser beam shaping

10 p1899 A70-24262

Molecular-statistical theory of second-harmonic light generation by isotropic bodies immersed in external AC or DC electric field

10 p1916 A70-24379

Synchronous harmonics generation of sinusoidal signal with given frequency for vibration analysis of linear and nonlinear structures

10 p1860 A70-24550

Second and third harmonic simultaneous generation in ammonium oxalate crystals achieved by three frequency interactions

10 p1901 A70-25159

Intensity and photocounts statistical distribution of harmonic generated in nonlinear crystal by laser and thermal radiation

12 p2248 A70-27547

Alternating electric field effect on weakly ionized gases, analyzing electronic temperature and harmonics generation

13 p2458 A70-28560

Optical second harmonic generation internal to laser cavity, discussing nonlinearity magnitude for optimum coupling for all power levels

13 p2425 A70-28795

Cosmic radiation periodic variations measurements noting second harmonic importance of daily variations

13 p2478 A70-29230

Microwave oscillator providing transition to stable emission at harmonics with power levels comparable to fundamental frequency, considering gallium arsenide oscillation mode

13 p2471 A70-29413

Boltzmann equation in circular magnetic field solved by Fourier series and Legendre polynomials, correcting distribution function due to free electron harmonics

13 p2464 A70-29485

Non Q switched Nd laser light intensity correlation function measurement, using optical gate for producing second harmonic light

13 p2430 A70-29706

Microwave harmonic generation by nonlinear plasma-metal junctions noting calcium, gallium, molybdenum, gold, copper and platinum cathodes

14 p2549 A70-30438

Third harmonic generation using hot electron nonlinearity characteristics of semiconductors, considering plane-polarized electromagnetic wave nonlinear interaction with sample

15 p2783 A70-31970

Far IR second harmonic generation and frequency mixing in CdTe using pulsed water vapor laser

15 p2751 A70-31983

Intensity correlations in optical parametric noise and second harmonic generation measured by two photon delayed coincidence counting

15 p2753 A70-32603

Ruby laser second harmonic radiation generation efficiency, using cylindrical lens beam forming optical system

16 p2929 A70-34212

Pulsed GaAs injection lasers second harmonic generation with nonlinear crystal alpha iodine acid phase matched by angular tuning

18 p3269 A70-36737

Nonlinear effects of harmonic generation and mixing in lithium niobate microwave acoustic surface wave delay lines measured using laser light deflection

19 p3485 A70-37698

CW second harmonic He-Ne laser light second order intensity correlation function measurements

20 p3640 A70-39153

Harmonic generation and small signal mixing in thin magnetic films subjected to static and time varying fields, generating output voltage expressions

21 p3864 A70-42012

EM wave second harmonic generation by plasma wave, discussing decay processes in inhomogeneous plasma layer

22 p4083 A70-43381

Laser light pulse interaction with solid targets, observing second harmonic generation in induced plasma from time resolved spectra

22 p4084 A70-43673

Ruby laser second harmonics generation in low loss lithium iodate crystal with high conversion efficiency

24 p4355 A70-46085

HARMONIC GENERATORS

Repetitively Q switched Nd-YAG laser operated with interactivity second harmonic generator to produce one watt average power

13 p2340 A70-29831

Nonlinear resistance and reactance type harmonic generator diodes performance with output in millimeter wave decade

14 p2548 A70-30436

Harmonic generation in gas discharge by frequency multipliers, assessing multipliers capabilities for millimeter wavelength operation

14 p2549 A70-30437

Ferrites as harmonic generators, discussing physical reasons for generation of double frequency magnetization

14 p2549 A70-30439

Multiple remote control systems effectiveness increased via controlled rectifier as even voltage harmonics generator

18 p3235 A70-36427

HARMONIC MOTION

Frequency equation for harmonic waves propagating in fluid filled circular cylindrical cavity in infinite isotropic solid medium

07 p1253 A70-18846

Longitudinal vibrations propagation in nonlinear elastic beam under harmonic kinematic disturbance solved by harmonic linearization method

09 p1773 A70-22541

Elastic harmonic waves propagation in cylinder with longitudinal cavities and in space with cylindrical cavities solved using series method

09 p1783 A70-23387

Membrane theory for thin single layer orthotropic cylindrical shells experiencing harmonic axisymmetric motion

11 p2136 A70-26084

Harmonic fields with boundary flow losses, discussing similarity on basis of dimensional analysis and pi theorem

12 p2271 A70-26877

Artificial satellite orbital motion numerical integration, computing spherical harmonic terms for earth gravitational potential

18 p3334 A70-37063

Linear damping theory, discussing simple harmonic motion model extension to transient motion

19 p3472 A70-38041

HARMONIC OSCILLATION

Optimal dynamic design of system consisting of elastic cantilever rod with two concentrated masses subjected to harmonic vibrations under force at free end

02 p0384 A70-11739

Two dimensional wing model with harmonically oscillating control surface in transonic range, comparing theoretical with experimental results on unsteady pressure distribution

06 p0966 A70-17252

Rectilinear oblique harmonic vibration effect on gyrocompass with torsional suspension

07 p1278 A70-18737

Pressure drop at slender profile performing harmonic vibrations near interface between two media of different density solved by numerical method

07 p1254 A70-19079

Quasi-biennial, annual and semiannual zonal wind and temperature harmonic amplitudes and phases in tropical and extratropical latitudes in stratosphere and low mesosphere

07 p1269 A70-19949

Interference kernel discontinuities in integral equations relating amplitude of angle of attack and pressure distribution on T tail harmonically oscillating in subsonic flow

07 p1416 A70-20210

Integral equation for time development of harmonic oscillations in finite one dimensional chain of elastically coupled discrete elements, using Bessel functions for solution

08 p1547 A70-20535

Static deflection effect on harmonic vibration of system with restoring forces of hardening nonlinear spring, considering gravity effect

08 p1586 A70-21035

Steady harmonic oscillations of half space with circular holes, deriving algebraic equations for boundary value problems

09 p1782 A70-23296

Steady state analysis of harmonic oscillations in HF synchronized transistor autooscillators, considering transistor inertial properties

09 p1649 A70-23341

Unsteady supersonic flow past tail-body system with harmonic oscillatory motions

10 p1803 A70-24789

Monograph on numerical treatment method for harmonically oscillating wings covering pressure distributions, logarithmic singularity, etc

11 p2129 A70-25497

Automatic phase control of demodulating signal in one dimensional extremal system with harmonic tracking oscillations

12 p2205 A70-28338

Drift of two platform gyroazimuth with stabilized base under harmonic or random vibrations

15 p2734 A70-31622

Monograph on harmonic and random vibrations filtering, discussing objects protection from ground vibrations produced by mechanical source

15 p2774 A70-31693

Dynamic response of simply supported elastic bodies due to oscillating point mass executing longitudinal harmonic motion based on linear theory

16 p2993 A70-34092

Nonlinear vibrations of beam harmonically excited by periodic motion of supporting base, using Galerkin method

17 p3185 A70-34962

Heat pipe performance tests under longitudinal harmonic vibration

17 p3193 A70-35751

Steady state ultraharmonic oscillations of first and third order in yielding systems with linear work hardening law

19 p3542 A70-38059

Undamped forced two degree of freedom system with one linear and one nonlinear spring, analyzing subharmonic vibrations by Ritz averaging method

19 p3544 A70-38329

Oscillation harmonics in rods under loads, giving inequalities to obtain algorithm for determination of overtones

20 p3721 A70-39781

Quasi-harmonic friction induced near sinusoidal form vibration, calculating amplitude dependence on sliding velocity

22 p4044 A70-42445

Harmonic linearization method for automatic control systems having hydraulic or pneumatic actuating device with two nonlinear elements

22 p4002 A70-42841

Harmonically oscillating wing linearized motion in subsonic flow, calculating generalized aerodynamic forces

22 p4105 A70-43118

Conducting viscoelastic fluid flow near harmonically oscillating nonconducting flat plate under uniform transverse magnetic field, considering stress-strain rate relationship

23 p4226 A70-44375

Thick wedge large amplitude harmonic oscillations in hypersonic flow

23 p4270 A70-44609

Aerodynamic interferences of lifting surfaces harmonically vibrating in subsonic flow

23 p4136 A70-44765

Pressure measurements on harmonically vibrating sweptback wing with two control surfaces in incompressible flow

23 p4274 A70-44768

Harmonic oscillations recurrence in linear systems with lumped and distributed parameters, obtaining amplitudes by least squares estimator

24 p4379 A70-45483

Oscillatory motion of triangular wing with conical body of arbitrary cross section in supersonic flow, considering wing-body interference effects

24 p4288 A70-45592

Nonlinear systems subharmonic oscillations under polyharmonic disturbance and viscous damping

24 p4427 A70-46378

HARMONIC OSCILLATORS

Coulomb, Gaussian and harmonic oscillator potentials for particle pairs in three body system, using S wave expansion

01 p0147 A70-10519

Linear physical chains with Sturm-Liouville characteristic polynomials used for natural frequency determination of coupled harmonic oscillators or electrical analog

01 p0142 A70-10520

Vibrational energy exchange between colliding diatomic molecules modulated by harmonic oscillators with insignificant frequency difference

01 p0147 A70-11035

Simple harmonic oscillator vibrations due to local random processes in spacecraft launching, calculating oscillator displacement variance

04 p0774 A70-15102

Basis functions with harmonic oscillator radial dependence in Hartree-Fock calculations for light deformed nuclei

04 p0723 A70-15635

High efficiency oscillator using avalanche square wave diode, considering case of silicon p-i-n diode

05 p0819 A70-15815

Vibrational energy exchange between colliding diatomic molecules modulated by harmonic oscillators with insignificant frequency difference

10 p1920 A70-25004

Simple harmonic scotch yoke mechanical oscillator for strain gauge accelerometer calibration in VLF range

16 p2900 A70-32995

Automated programmed device for fatigue tests based on harmonic oscillator, presenting schematic diagram

16 p2900 A70-33068

Coupled simple harmonic oscillators with almost degenerate energy levels, comparing partitioning perturbation techniques with Rayleigh-Schrodinger approach

16 p2955 A70-34002

Harmonic oscillator with exponentially decreasing spring constant, obtaining closed form solution for equation of motion

17 p3137 A70-35602

Reduced dissipation of biharmonic oscillations, examining dynamic model under force and kinematic harmonic perturbation

18 p3344 A70-37070

Three body problem periodic solutions, considering near equilibrium conservative Hamiltonian system consisting of two harmonic oscillators with rationally related frequencies

23 p4213 A70-44897

Harmonic radiation

P-n structure dynamic I-V characteristics at high injection levels mathematically determined, showing rectifying capability decrease with increasing harmonic signal frequency

05 p0892 A70-16196

Single mode neodymium laser second harmonic radiation self focusing resulting in filamentary fractures in solid dielectrics

06 p1080 A70-17496

Frequency equation for harmonic waves propagating in composite circular-cylindrical rods consisting of circular core and circular casing of different material

11 p2145 A70-26693

Second harmonic emission from GaAs injection laser and from stimulated KDP crystal at room temperature

12 p2245 A70-27306

Interference holograms of low temperature nitrogen plasma jet using fundamental and second harmonic ruby laser emissions

13 p2464 A70-29384

Microwave oscillator providing transition to stable emission at harmonics with power levels comparable to fundamental frequency, considering gallium arsenide oscillation mode

13 p2471 A70-29413

Time harmonic waves propagation in elastic half-space with submerged cylindrical cavity, assuming linear plane strain conditions

13 p2518 A70-30010

Circular cylindrical cavity in elastic space, calculating stresses due to incident plane harmonic compression wave

15 p2819 A70-32204

Plane harmonic sound wave reflection and transmission in flowing medium by infinite set of arbitrary spaced and staggered flat plates

16 p2971 A70-34016

Two dimensional positions of fundamental and harmonic type 2 solar bursts, using coronal streamer plasma and backward refracted radiation model

21 p3891 A70-41179

Two dimensional position measurements of harmonic type 2 solar bursts, using 80 MHz observations

21 p3891 A70-41180

Electron beam interaction with external harmonic microwave field in planar diode gap, calculating electric field current and voltage distribution functions

22 p3995 A70-42396

Forced harmonic vibrations of clamped circular plate in inviscid fluid, calculating radiation pressure and power distributions

22 p4073 A70-42646

HARMONICS

NT HARMONIC EXCITATION
NT HARMONIC GENERATIONS
NT HARMONIC OSCILLATION
NT SPHERICAL HARMONICS
NT SUPERHARMONICS
NT TESSERAL HARMONICS
NT ZONAL HARMONICS

Diurnal cosmic ray intensity variations first and second harmonics amplitudes during sudden phase variations diagrammed from neutron monitor data during IGY

05 p0898 A70-15936

Relation between Fourier harmonics equilibrium distribution and bulk viscosity and second thermal conductivity established in critical regions of liquid-vapor condensation and mixing

05 p0958 A70-16550

Parametric coupling between space-time harmonics of electromagnetic wave propagating in dielectrics modulated by pump wave

05 p0815 A70-16660

First harmonic precision improvement of dual input describing function, applying to self oscillation of nonlinear systems

14 p2560 A70-30625

Periodically strip loaded dielectric slab guided electromagnetic waves, discussing attenuation and space harmonics amplitudes relationship

16 p2861 A70-32960

Nd glass laser ultrashort light impulse optical rectification, presenting lower harmonics angular dependence

19 p3443 A70-37287

Harmonic mixed boundary value problem with singularity, deriving approximate solution by dual series technique with conformal transformation and finite difference method

22 p4062 A70-42642

HARRIER AIRCRAFT

Harrier navigation/attack system to provide successful single pass attack for close support and strike roles, noting target finding optimization

10 p1914 A70-24847

Harrier armament system design for ordnance carriage to full combat load factors, describing Weapon Control Panel

10 p1807 A70-24848

Harrier communications and radio navigation aid VLF/UHF and TAC/VHF equipment

10 p1841 A70-24849

Harrier maintainability for reliability with minimum down-time and man hours, discussing servicing, turn-round, role change, inspection and engine changes

10 p1806 A70-24850

Harrier short takeoff fighter aircraft cockpit design, describing layout, lighting, warning and escape systems, etc

12 p2162 A70-27888

Harrier fighter aircraft hydraulic systems and flying controls

12 p2166 A70-27889

Harrier fighter aircraft cabin air conditioning and pressurization system

12 p2166 A70-27890

Harrier fighter aircraft electrical supply system, considering generator design and installation

12 p2166 A70-27891

Harrier aircraft flight test program considering instrumentation, data acquisition, airframe, avionics, systems engineering, etc

13 p2344 A70-28922

Harrier V/STOL trainer aircraft design features including fuselage, cockpit, power plant, etc

13 p2345 A70-28923

Harrier aircraft in Marine Corps close air support role

[AIAA PAPER 70-885] 17 p3018 A70-35804

Magnetic tape instrumentation system installed aboard Hawker Siddeley Harrier for flight development, discussing digital format recording system

19 p3384 A70-38549

Ground station to retrieve and process data recorded on airborne digital magnetic tape instrumentation system for Hawker Siddeley Harrier flight development

19 p3384 A70-38550

Harrier flight testing in terms of V/STOL capability compared with conventional aircraft

22 p3962 A70-42975

Harrier aircraft development history, discussing V/STOL constraints on transonic flight properties

[ICAS PAPER 70-51] 23 p4139 A70-44148

Harrier aircraft operation in Marine Corps for fast reaction close support based near maneuver units

[SAE PAPER 700835] 24 p4290 A70-45887

HARTMANN FLOW
Heat transfer to insulator wall of linear MGD accelerator attached to shock tube, comparing measurements with Hartmann boundary layer analysis

[ASME PAPER 69-WA/HT-53] 04 p0781 A70-14796

Electrical conductivity variations effects in subsonic Hartmann plasma flow under transverse magnetic field in channel with cooled walls

07 p1352 A70-19986

HARTMANN NUMBER
Magnetohypersonic boundary layer interactions, discussing boundary layer thickness relationship to Hartmann and Reynolds numbers

04 p0729 A70-15564

Conducting fluids flow instabilities characterized by incipience at critical electric Hartmann number and convection rate proportional to electric Reynolds number

07 p1348 A70-19265

MHD flow in rectangular duct with arbitrary conductivity via modified Fourier method, obtaining magnetic induction and current for various Hartmann numbers

[ASME PAPER 69-WA/APM-17] 08 p1551 A70-21308

HARTREE APPROXIMATION
Electromagnetic wave propagation in homogeneous plasma waveguide satisfying Appleton-Hartree approximation without collisions in presence of longitudinal magnetic induction

02 p0349 A70-12724

Hartree-Fock method to study doubly even nuclei in 2s-1d shell, generating basis functions by Wood-Saxon well

04 p0722 A70-15318

Basis functions with harmonic oscillator radial dependence in Hartree-Fock calculations for light deformed nuclei

04 p0723 A70-15635

Hartree model to study superfluid He film bound to uniform substrate

05 p0883 A70-16469

Scattering matrix noniterative integral solutions applied to singlet and triplet s-wave Hartree-Fock phase shifts for electron-H-atom scattering

06 p1108 A70-17486

Localized one electron states in perfect crystals of widely separated atoms, using thermal single determinant/Hartree-Fock/ approximation

14 p2626 A70-30488

Coupled channel calculation of inelastic proton scattering from Ne 20 using Hartree-Fock wave functions

17 p3137 A70-34517

HARTREE-APPLETON APPROXIMATION
U HARTREE APPROXIMATION

HARTREE-FOCK APPROXIMATION

U HARTREE APPROXIMATION

HASTELLOY (TRADEMARK)

Elevated isothermal and low cycle thermal fatigue of Hastelloy X, investigating test temperature, cycle frequency and stress temperature effects

06 p1087 A70-17457

HATCHES

Side access hatch system for Apollo command module

16 p2986 A70-34153

HAWAII

Cosmic ray latitude survey in western U.S. and Hawaii in summer 1966 using neutron and muon monitors

01 p0167 A70-10228

HAWK MISSILE

Beaded-doubler reinforced skin design concept for Improved HAWK Missile wing, considering compression stress, weight, cost and field service characteristics

02 p0380 A70-11946

HAWKER SIDDELEY AIRCRAFT

NT AVRO 707 AIRCRAFT
NT BUCCANEER AIRCRAFT
NT DH 121 AIRCRAFT
NT DH 125 AIRCRAFT
NT VULCAN AIRCRAFT

Hawker Siddeley/Smith Trident Autoland Program, discussing flight test data for Smith autopilot and autothrottle certification

03 p0522 A70-13349

Harrier G.R. Mk 1 VTOL vectored thrust aircraft for attacking targets at conventional strike aircraft speed, discussing design and combat effectiveness

06 p0985 A70-17157

Hawker Siddeley Harrier structural design, power plant, rear fuselage, wing tail unit structures, undercarriage features, weight control, fatigue testing, etc

08 p1435 A70-20620

Harrier engine nozzle actuation system role in short ground takeoff run facility, discussing pneumatic system, air motor servo unit and pilot control

09 p1610 A70-22606

HAZARDS

NT AIRCRAFT HAZARDS
NT FLIGHT HAZARDS
NT METEOROID HAZARDS
NT OPERATIONAL HAZARDS
NT RADIATION HAZARDS
NT TOXIC HAZARDS

Occupational and medicative hazards in ophthalmology - Conference, Amsterdam, June 1968

01 p0022 A70-10855

Static electricity hazards and problems in electronics and aerospace industries

07 p1333 A70-18930

Graphite-polyester plastic material with electrical resistance for eliminating static charges leading to explosions

07 p1295 A70-19764

Hazards in manufacturing solid propellants evaluated to design tests and suggest process conditions

07 p1361 A70-19915

HAZE

Venusian atmosphere low reflectivity reinterpretation based on spectrophotometric data indicating constituents of yellow and upper UV haze layers

02 p0377 A70-12555

Haze model atmospheres scattering characteristics by computer simulation concerning optical contrast reduction by aerosols for direct and diffuse radiation

06 p1057 A70-18156

Absorption lines in hazy planetary atmosphere with isotropic scattering, examining phase variations of equivalent width

08 p1571 A70-20910

Critique of blue haze negative hypothesis in preliminary Mariner 6 data report

08 p1578 A70-21556

Blue haze hypothesis of Martian atmosphere using Mariner 6 and 7 blue filter photographs, reviewing topographic observations

10 p1943 A70-24841

Surface haze and vertical aerosol attenuation for various meteorological ranges within 1.2-15 km, tabulating for UV, visible and IR wavelengths

20 p3661 A70-39082

Refractive index complex part effect on polarization and radiance of reflected and transmitted light for continental haze and nimbostratus cloud models

21 p3847 A70-41724

HC-1 HELICOPTER

U CH-47 HELICOPTER

HD-1 GROUND EFFECT MACHINES

U HOVERCRAFT GROUND EFFECT MACHINES

HEAD [ANATOMY]

NT CRANIUM

NT OCCIPITAL LOBES

NT SKULL

Helmet loss and failure role in major and fatal head injuries of USAF ejections

01 p0032 A70-10370

Human head model for craniocerebral trauma analysis, studying fluid filled spherical shell free vibrations axisymmetric response

07 p1219 A70-19243

High risk factors for posttraumatic epilepsy /head injury complicated by subdural hematoma and spike EEG abnormality/ precluding return to flying
09 p1622 A70-23470

Carbohydrate metabolism disorders in head injury cases, comparing incidence with EEG abnormalities
10 p1810 A70-24037

Squid head cartilage properties in terms of light and electron microscopic appearance, amino acid composition and X ray diffraction
24 p4305 A70-46348

HEAD (PRESSURE)
U PRESSURE HEADS
HEAD MOVEMENT
Vestibular sensing system role in providing information concerning vertical, linear and angular head movements to central organs
02 p0246 A70-12191

Mathematical elastodynamic model for parametric dynamic study of forced resonance solution of motion equations during head trauma
02 p0238 A70-12548

Visual vertical related to head tilts, observing location of gravitational vertical
04 p0645 A70-15445

Head movement effect on accuracy of visual and kinesthetic localization for free and fixed head conditions
05 p0803 A70-16669

Monograph on directional hearing in meridian plane with head in fixed position, noting extended concept of sound
08 p1452 A70-21299

Human head-up tilt circulatory stress effects on left ventricular systolic time intervals
10 p1820 A70-24937

Vibration mode response and impact time sensitivity of mechanical impedance of human skull, relating head injury factors
15 p2682 A70-31934

Psychophysical adjustment methods effect on visual vertical orientation during head tilt
15 p2683 A70-32455

Nystagmic response to directional inert shift of endolymph in semicircular canals in frontal plane head subject rotation
18 p3220 A70-36635

Visual target tracking with active head rotation, indicating independent eye response due to vestibulo-ocular reflex
22 p3979 A70-43492

Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station
24 p4297 A70-45341

HEADACHE
Headache and personality traits related to visual acuity and brightness sensitivity increases from sea level to high altitude
04 p0633 A70-15444

Nocturnal headache relationship to REM sleep stage from EEG, EOG and EMG data
20 p3569 A70-38994

Occipital migraine in flying personnel, discussing diagnosis and flight status disposition
24 p4297 A70-45344

HEADERS
Oblique flow headers design for heat exchangers based on one dimensional momentum and continuity
08 p1598 A70-21482

HEALTH
NT HEALTH PHYSICS
Health conditions and operational efficiency of Italian military paratroopers during air transportation analyzed from questionnaire data
05 p0807 A70-16494

HEALTH PHYSICS
Health hazards and physiological effects of atmospheric infrasonic waves, discussing sources, ear protecting devices and electrochemical detectors
02 p0247 A70-12467

Infectious disease hazards on space flight, discussing internal environmental factors including resistance and etiologic agents transmission
14 p2537 A70-30366

HEARING
NT ACOUSTIC FATIGUE
NT BINAURAL HEARING
Pilots hearing level based on pure tone threshold audiograms compared with personnel not exposed to job noise
04 p0631 A70-14982

Hearing threshold and ear canal pressure levels, using circumaural enclosure with varying acoustic field
06 p0994 A70-17598

Collection of papers on human hearing, source book in psychoacoustics
06 p0995 A70-17822

Temporary and permanent threshold shifts in hearing of guinea pigs exposed to intense rocket booster engine noise
07 p1214 A70-19931

Auditory averaged evoked potentials to clicks in man subjected to selective listening task, comparing effect on attended and rejected ear
07 p1215 A70-20213

Monograph on directional hearing in meridian plane with head in fixed position, noting extended concept of sound
08 p1452 A70-21299

Functional model of signal analysis and pulse sequence conversion in nervous system at periphery of hearing
10 p1827 A70-25127

Pulse duration dependent threshold intensity difference for sine tones related to dynamic properties of hearing
23 p4155 A70-44699

Information theory of hearing, considering subjective properties of nonsteady sound signals and discernibility relations
23 p4155 A70-44700

HEARING LOSS
U AUDITORY DEFECTS
HEART
NT CARDIAC AURICLES
NT CARDIAC VENTRICLES
NT EPICARDIUM
NT MYOCARDIUM
Piezoelectric ultrasonic crystal on cardiac catheter tip measuring cardiac diameter in vitro and in excised canine hearts
01 p0038 A70-11025

Model for simulating normal/abnormal depolarization and repolarization of heart and to reproduce electrocardiograms, describing design and programming
03 p0432 A70-12889

Book on engineering in heart and blood vessels stressing technological aspects of artificial internal organs
06 p1001 A70-17649

Nucleic acid and protein synthesis dynamics in rat brain and heart during adaptation to high altitude hypoxia
07 p1209 A70-19518

Geometrical model of human cardiac excitation stages based on normal heart anatomy, discussing application to study of QRS loop in vectorcardiogram
07 p1211 A70-19592

P wave and P loop changes during transvenous pacing of specific locations in coronary sinus and left atrium in dogs and man
08 p1445 A70-21266

Biochemical and histoenzymochromic parallels of enzymatic activity in blood, cardiac muscle and liver under hypoxia
08 p1446 A70-21445

Heart dipole moment calculation error due to deletion of individual electrode contributions to surface potential map, analyzing multielectrode grids
08 p1453 A70-21753

Diastolic and equivocal fluttering of mitral valve in aortic insufficiency by echocardiography
09 p1615 A70-22209

Heart dimension measurement by miniature implantable ultrasonic sonomicrometer, describing system design and operation
12 p2174 A70-26897

Chronic hypoxia effects on heart size and hematocrit ratios tested in pigeons
12 p2172 A70-28075

Electrocardiography electrical bridge type leads system based on potential quenching phenomenon, determining electric dipole displacement of heart in transverse plane of body
19 p3369 A70-38208

Electric dipole displacement of heart estimation by supplementing orthogonal with precordial lead, discussing stationary and moving point dipole hypotheses
19 p3369 A70-38209

HEART DISEASES
Mitral stenosis and atrial flutter with atrial sounds heard and recorded, discussing sound generating mechanism
01 p0013 A70-10271

Vascular anatomy correlation with human heart conduction tissue structures to study coronary artery disease cases exhibiting major conduction disturbances by ECG
01 p0013 A70-10273

Oral potassium chloride usefulness and toxicity in EKG nonspecific T wave abnormality evaluation
01 p0014 A70-10274

Serologic evidence of immune mechanisms, including heart muscle antibodies in patients with idiopathic cardiomyopathy, showing no autoimmune disease in majority
01 p0014 A70-10276

Atrial and ventricular gallops incidence during acute myocardial infarction by serial auscultation and phonocardiograms
01 p0014 A70-10277

Intermittent left anterior hemiblock as natural experiments for changes induced by conduction disturbance on human electrocardiograms
01 p0015 A70-10435

Atrial high gain and HF recordings on three plane vector cardiograms for magnitude and direction for normal and heart diseased patients
01 p0015 A70-10436

Right and left atrial polarization time sequence as guide to p wave origin in heart diseased patients following electrical stimulation of atria and ventricles
01 p0015 A70-10437

Autoimmunity to heart tissues in cardiac diseases, reviewing immune mechanisms in rheumatic fever, postcardiomy and postinfarction syndromes
01 p0016 A70-10438

Patients with/without coronary heart disease inhaled various gas mixtures to induce arterial hypoxemia and hyperoxia, noting O availability for myocardial metabolism
01 p0016 A70-10440

Lipid and carbohydrate behavioral abnormalities in patients with angiographically documented coronary artery disease observed by glucose tolerance tests
01 p0016 A70-10441

Reciprocal rhythm occurring with impulses of atrial or atrioventricular (A-V/ nodal or ventricular origin, noting role of A-V nodal pathways
01 p0016 A70-10442

Prospective epidemiological recognition of clinical coronary heart disease, discussing effects of habitual physical inactivity, excessive dietary fat, socioeconomic stresses, etc
01 p0023 A70-10865

External environmental factors, life habits and personality structure effects on development of coronary artery disease, discussing psychosomatic aspects of myocardial infarction
01 p0023 A70-10866

Radio telemetry of athlete hearts, noting strenuous physical stress induction of transient serum potassium increase, metabolic acidosis, T-wave amplitudes, etc
02 p0230 A70-11694

Left ventricular function during paired pulse and single pulse stimulation in dogs, sheep, goats and calves before and after induced heart failure
02 p0233 A70-11719

Valvular aortic stenosis severity estimation using digital computer program and tape recorder for determining valve area
02 p0243 A70-12094

Left ventricle wall forces and dimensional measurements during cardiac cycle based on stress-strain terms, including results for mitral, aortic and myocardial disease
02 p0238 A70-12512

Readers interpretation and applications of Starr criteria for ULF ballistocardiograms, showing uniformity for patients with coronary heart disease
02 p0248 A70-12680

Chronological age correlations with ballistocardiographic modalities /stroke volume and minute volume indices/ for patients with no cardiovascular disease
02 p0248 A70-12682

Intermittent EKG recordings during hypoxia test for detection and diagnosis of heart disorders in airmen
02 p0242 A70-12850

Phonocardiographic and ultrasound observations of acute rejection following cardiac transplantation, considering rejection treatment at early stage
03 p0415 A70-12888

Electrocardiographic criteria for left ventricular hypertrophy diagnosis, using chamber dissection technique
03 p0432 A70-12890

Electrocardiac events observed in cardiac transplant recipient emphasizing unique finding
03 p0433 A70-12893

Functional and organic systolic murmur differentiation using phonocardiography test
03 p0420 A70-13478

Hypercholesterolemia chemotherapy experimental results with five hypocholesterolemic drugs /nicotinic acid, triparanol, aluminum nicotinate, Atromid and nonfenimizing estrogen/
03 p0426 A70-13937

Coronary thromboses age estimation based on comparison of blood cells, fibrin, collagenous tissue and neocapillaries quantitative changes
03 p0426 A70-13938

Pathological Q waves in various diseases in absence of myocardial infarction, discussing electrophysiological mechanism
03 p0426 A70-13941

Pathologic findings of left ventricular papillary muscle related to electrocardiogram, discussing papillary muscle dysfunction syndrome
03 p0426 A70-13942

Phonocardiographic and mechanocardiographic features of patients with nonejection clicks and mid- or late-systolic murmurs
03 p0427 A70-13944

Airline stewards cardiovascular and ischaemic heart disease statistics compared with civilian pilots and general population
03 p0438 A70-14070

QRS and ST-T areas in multiple bipolar chest leads during normal and abnormal activation in patient measured for checking ventricular gradient concept
04 p0632 A70-15307

Hemodynamic determinants of gallop sounds in patients with aortic valve disease based on clinical, hemodynamic and angiographic observations

04 p0633 A70-15308

Ejection click of valvular pulmonic stenosis by external phonocardiograms and intracardiac pressure recordings during successive respiratory cycles

04 p0633 A70-15440

Pathological manifestations of acute myocardial ischemia without acute myocardial necrosis and myocardial infarction, discussing subjects with chronic occlusive coronary atherosclerosis

04 p0634 A70-15456

Platelet function in coronary artery disease and myocardial infarction, considering thrombosis, atherosclerosis, emboli in microcirculation, etc

04 p0635 A70-15458

Myocardial infarction therapeutic prevention possibilities on basis of epidemiologic and dietary studies involving hypercholesterolemia and hyperlipemia in coronary disease

04 p0635 A70-15463

Heparin role in anticoagulant therapy for myocardial infarction based on proved application to other venous thrombotic diseases, noting hemorrhagic complications controllability

04 p0636 A70-15465

Exercise relation to acute myocardial infarction, coronary thrombosis, stenosis and obstruction, discussing prevention value of physical reconditioning in heart patients

04 p0636 A70-15466

Familial aggregation for coronary artery disease and familial similarities in coronary anatomy, considering possible genetic analysis of myocardial infarction

04 p0636 A70-15467

Myocardial metabolism in ischemic heart disease using arterial and coronary sinus catheterization

04 p0636 A70-15469

Sudden and early death in acute myocardial infarction, discussing prophylactic measures

04 p0637 A70-15472

Cardiac echography applied to diagnosis and therapy evaluation in idiopathic hypertrophic subaortic stenosis

05 p0800 A70-16103

Myocardial scarring sites localized in human subjects by HF ECG components

05 p0800 A70-16104

Computer program for on-line analysis of exercise ECG considered for improved diagnosis of ischemic heart disease

05 p0805 A70-16105

Diurnal and seasonal variations of mortality due to cardiac and regulatory failure using model representing daylight regulation of human organism

05 p0802 A70-16663

Hemodynamics in cardiosclerosis patients and healthy subjects under hypoxia, investigating heart activity and blood circulation

06 p0994 A70-17667

Acute myocardial ischemic injury and infarction in dogs related to changes in man using oxygraph tracings

06 p0997 A70-18405

Ventricular ectopic beats and bradyarrhythmia associated with myocardial infarction, discussing enhanced automaticity, reentry activity, drugs and heart pacing

06 p0998 A70-18407

Bradycardic rhythms in acute myocardial infarction, investigating pathophysiologic, hemodynamic and electrophysiologic aspects and ECG interpretation

06 p0998 A70-18408

Arrhythmia monitor for cardiac distress prediction, using small hybrid computer for detection of abnormal rhythm and ECG complex comparison

07 p1221 A70-19604

Exercise habits and environmental emotional stresses role in origin and prevention of degenerative heart disease

07 p1212 A70-19692

Physical activity and epidemiology of coronary heart disease

07 p1212 A70-19694

Epidemiologic investigation of physical activity and fitness effect on prevention of premature clinical coronary heart disease

07 p1212 A70-19695

Myocardium, endocardium and/or epicardium disease characteristics, discussing primary and secondary cardiomyopathy groups

09 p1616 A70-22277

Postinfarction noncoronarygenic afflictions of myocardium in flight personnel, discussing clinical record, atherosclerotic differentiation and ECG variation

09 p1617 A70-22474

Idiopathic myocardial disease patients investigated for serological anomalies and markers of immunopathology

09 p1621 A70-23301

Vectorcardiographic diagnosis of left ventricular hypertrophy based on changes in MQV magnitude and other QRS vectors

09 p1629 A70-23626

Ischemic heart disease /IHD/ prognosis using abnormal electrocardiographic stress test

10 p1820 A70-24940

Cardiovascular model for closed loop analog simulation of congenital heart defects hemodynamics

11 p1990 A70-25705

Arteriographic determination of severe coronary artery disease in presence of normal resting electrocardiogram

12 p2170 A70-27775

Air transport of cardiac patients with auriculoventricular blocks, noting feasibility due to portable surveillance and treatment apparatus

12 p2172 A70-28041

Heart rhythm disorders among flying personnel, noting occurrence frequency of sinus bradycardia and arrhythmia

12 p2180 A70-28362

Intrinsic heart rate /IHR/ range and variability in healthy subjects measured showing age as important determinant in absence of heart disease

15 p2678 A70-31433

Asymptomatic myocardial infarction in USAF flyers detected by annual electrocardiograms

15 p2690 A70-31889

Primary myocardial disease, describing hemodynamic and angiographic observation of left ventricular volume and wall changes

16 p2848 A70-33110

Coxsackie B virus as cause of myopericarditis in adults

17 p3025 A70-34860

Hemodynamic response to dopamine before and after myocardial infarction in dogs

17 p3026 A70-35200

Single ventricle and hypoplastic left and right heart syndromes, investigating with reflected ultrasound

17 p3032 A70-35472

Continuous murmur due to combination of rheumatic mitral stenosis and rare type of partial anomalous pulmonary venous drainage

17 p3032 A70-35473

In-flight coronary occlusions role in aircraft accidents, discussing need for full autopsies, Double Masters ECG and full medical histories

17 p3033 A70-35570

Focal myocarditis associated with aircraft accidents, discussing difficulties in diagnosis and assessment

17 p3033 A70-35571

Electrocardiograms amplitude probability densities, noting variations for different heart diseases

17 p3034 A70-35877

Cutaneous liquid crystal temperature sensors for thermographic patterns of angina pectoris induced by treadmill exercise

19 p3364 A70-38361

Circadian rhythms from electrocardiogram and cardiostachogram of patient with human heart transplant, noting P waves relationship between donor and recipient tissues

20 p3570 A70-39166

Pathophysiology of congenital heart disease - Conference, University of California, Los Angeles, July 1967

20 p3570 A70-39361

Pulmonary hypertension in congenital heart diseases as function of blood flow

20 p3571 A70-39367

Multifocal atrial tachycardia, discussing arrhythmia progression to atrial fibrillation and association with acute and chronic diseases

21 p3761 A70-41134

ULF ballistocardiogram amplitudes relationship to blood flow velocity for cardiovascular disease diagnosis

21 p3763 A70-41234

Postexercise electrocardiogram detection of latent coronary heart disease in flyers prior to myocardial infarction

21 p3771 A70-41494

Epidemiological investigations of coronary disease in Finland, relating customary loads and working capacity

22 p3969 A70-42903

Coronary heart disease risk factors and prevention, discussing blood pressure, cholesterol, body weight, smoking, etc

22 p3975 A70-43693

Flying personnel fitness, discussing Wolff-Parkinson-White syndrome

22 p3975 A70-43695

Indirect serial determination of left ventricular systolic ejection time changes in human patients with acute transmural and nontransmural myocardial infarctions

23 p4144 A70-43946

Coronary heart disease prediction based on clinical suspicion, age, total cholesterol and triglyceride, using relationships established by cinearteriographic studies

23 p4145 A70-43947

Cinecoronary arteriographic investigation of chest pain patients, establishing correlations of clinical symptoms, coronary artery narrowing, arterial lesions, serum cholesterol levels, etc

23 p4145 A70-43948

Optimum bed rest time schedules for cardiovascular patients from neurological, dynamometric, electromyographic and myogenic-tonus tests

23 p4149 A70-45077

Human atrial systole timing influence on mitral valve closure and on first renewed heart sound following blockage

24 p4302 A70-46077

HEART FUNCTION

NT HEART MINUTE VOLUME

Cardiac activity temperature coefficients in dogs, specifying physical and chemical cardiac functions

01 p0012 A70-10052

Bioelectrically controlled system for indirect heart massage, noting dynamic simulation of system on digital computers using block oriented programming languages

01 p0047 A70-10261

Artificially induced heart rate changes effect on atrial circumference and pressure in anesthetized cats, showing increase with tachycardia and bradycardia

01 p0017 A70-10473

Physiological interpretation of blood velocity curves recorded in right heart cavities of dogs by ultrasonic directional probe, using Doppler effect

01 p0035 A70-10709

Canine aortic flow as function of simultaneous mean aortic and mean right atrial pressures

02 p0233 A70-11723

Physiological signals of cardiovascular system transducing methods applied to vector ECG, heart sounds, peripheral pulse waves, chest microphone and plethysmography

02 p0243 A70-12095

Absolute ULF ballistocardiogram /BCG/ values as pulsatile fluid pumping values in cardiodynamic function before and after exercise

02 p0248 A70-12677

Stroke volume formula depending on blood density and viscosity, indicating Hagen-Poiseuille law nonapplicability to ballistocardiography

02 p0248 A70-12681

Release-recovery and dynamic stiffness phenomenon in frog heart muscle at various Ca ion concentrations and temperatures

02 p0241 A70-12771

Controlled premature atrial stimulation effects on atrioventricular conduction in man, using electrode catheter technique to record electrical activity of specialized conducting fibers

03 p0415 A70-12886

Arterial counterpulsation effect on mechanics of left ventricular contraction and myocardial oxygen consumption in normal and abnormal animals

03 p0416 A70-13009

Myocardial changes in rabbits after general chronic ionizing irradiation attributed to lower cardiac activity, hypotrophy and dystrophy

03 p0425 A70-13888

External work and energy expenditure relations of heart, including myocardial oxygen consumption

03 p0426 A70-13940

Cardiac output and coronary blood flow changes in patients at rest and during peak exertion, stating correlation coefficients

03 p0428 A70-14065

Acidosis effects on anoxic rat heart cardiac performance and anaerobic energy generation

04 p0635 A70-15461

Ventricular performance as function of infarcting myocardium, discussing dynamic characteristics

04 p0637 A70-15470

Glucagon infusion effect on human coronary circulation, relating changes in cardiac dynamics to myocardial oxygen consumption and blood flow

05 p0800 A70-16101

Propranolol effects on human cardiac conduction and intraventricular conduction in dogs studied by recording His bundle electrograms, noting P-H interval prolongation

05 p0800 A70-16102

Cardiac work limiting factors during exercise under hypoxia, studying cardiac output and coronary blood flow capacities

06 p0991 A70-17282

Alpha-methyl-DOPA inhibitor effect on catecholamines and cardiac spontaneous activity in pacemaker fibers in rabbits

06 p0992 A70-17422

Cranioerebral hypothermia effects on phase structure of cardiac thrust in dogs

07 p1204 A70-19140

Left ventricular function myocardial infarction induced acute depression and subsequent recovery in intact conscious dogs

07 p1211 A70-19615

Exercise influence on cardiac output and coronary blood flow during hypoxia, correlating CO and systolic pressure with blood flow changes

07 p1214 A70-19928

Cardiovascular control system mathematical model incorporating fundamental properties of heart muscle for digital simulation using FORTRAN program

08 p1453 A70-21513

- Strong magnetic field effects on squirrel monkeys electrical and mechanical cardiac functions determined from vectorcardiogram and aortic blood flow characteristics 09 p1617 A70-22524
- Hyperbaric oxygen effect on heart muscle contractions in mammals, considering cells enzymatic activity and substrate utilization 09 p1623 A70-23586
- Left ventricle pressure rise rate as function of heart contractility and hemodynamics 09 p1623 A70-23587
- Soviet book on nervous stress and cardiac activity covering hypothalamus and cardiovascular reactions and cardiac component of complex conditioned reflexes and emotional reactions 10 p1809 A70-23873
- EKG and cardiac rhythm changes during prolonged hypodynamia /bed rest/ with restricted physical activity 10 p1814 A70-24669
- Prolonged hypodynamia effect on human cardiac cycle phases using poly- and kinetocardiographic data 10 p1814 A70-24672
- Prolonged hypodynamia effect on heart size and myocardium function obtained from human chest X ray studies 10 p1814 A70-24673
- Electrocardiac activity, myocardium and hemodynamic disorders in subjects after prolonged hypodynamia with or without physical exercises and during orthostatic test 10 p1817 A70-24692
- Human head-up tilt circulatory stress effects on left ventricular systolic time intervals 10 p1820 A70-24937
- Ultrasonic echography for ventricular size determination, calculating stroke volume and valvular regurgitation severity 10 p1820 A70-24938
- Oxygen transport after cardiopulmonary resuscitation from asystole and ventricular fibrillation in dogs 10 p1822 A70-25085
- Cardio-respiratory functions preceding syncope induced by combined lower body negative pressure and head-up tilt 11 p1988 A70-26510
- Respiratory syncope with cardiac ineffectiveness and numerous complications during and after flight at high altitude clinically observed for causes 12 p2171 A70-28040
- Microwave radiation effects on radar operators myocardium functions 12 p2180 A70-28358
- Periodic high temperature effects on human systolic phase dynamics 12 p2174 A70-28359
- X ray irradiation effects on phonocardiograms, EKGs, cardiac activity phases and Kunos-Garan mechano-electric coefficient in dogs 13 p2350 A70-28890
- Intrinsic heart rate /IHR/ range and variability in healthy subjects measured showing age as important determinant in absence of heart disease 15 p2678 A70-31433
- Comparative cardiac output measurements in dogs using left/right heart dye injections and pulmonary/aortic electromagnetic flow probes 15 p2688 A70-31434
- Isolated human heart measurements for time course and instantaneous distribution of normal heart excitatory process 15 p2683 A70-32471
- Cardiac structure-functional relations, discussing muscle strand continuum, basal fibrous skeleton, epicardial, endocardial and myocardial layers 15 p2685 A70-32834
- Contractile mechanics of cat papillary muscle during hypoxia and reoxygenation recovery 15 p2686 A70-32836
- Autonomic drugs induced contractures of cardiac muscle of frogs, relating inotropic action with Ca influx during low membrane potential 15 p2686 A70-32837
- Oxygen uptake and cardiac output in males during submaximal and maximal treadmill and bicycle exercise 17 p3039 A70-35428
- Glucose-free fatty acid interactions in working heart, noting increase in glucose uptake, oxidation and glycogenolysis with physiologic work increment 17 p3031 A70-35429
- Minnesota Impedance Cardiograph method evaluated by applying to cardiac output measurements in postural stress studies 17 p3031 A70-35431
- Human cardiac flow during acceleration as function of time with and without anti-g suit, using electric plethysmograph 17 p3040 A70-35915
- Left ventricle pumping function self regulation mathematical model, obtaining transfer function 18 p3217 A70-36080
- Soviet book on isolated animal heart autoregulation, considering cardio-pulmonary preparations, functional capacity, biometrics and computer technology for heart activity simulation models 19 p3359 A70-37404
- Cardiac rhythm, respiration and rhythmical processes of alimentary tract, using digital data device 19 p3370 A70-38214
- Cardiac contraction rhythm autocorrelation and spectral analysis in healthy subjects and patients with disturbed sinus node functional states 20 p3578 A70-38963
- Mechanical analysis involving clamping apparatus for cardiac muscle contractile response 20 p3570 A70-39362
- Muscular mechanics of intact heart contraction, discussing effects of altered fiber length, afterload and inotropic state 20 p3571 A70-39363
- Cardiac ventricular function in compression pump terms, relating mechanical activity to end-diastolic fiber length 20 p3571 A70-39364
- Ultrasonic nonsearch Doppler cardiography for cycle phase analysis, recording single functions 20 p3581 A70-40199
- Heart stroke volume estimation at submaximal exercise using blood hemoglobin content and heart rate 20 p3576 A70-40328
- Ethanol ingestion effect on human response to submaximal and maximal exercise, measuring cardiac output and intraarterial pressure 21 p3761 A70-41135
- Hypoxia and hyperoxia effect on ballistocardiogram of healthy males, determining systolic and minute cardiac forces 21 p3763 A70-41231
- Ballistocardiogram relationship to cardiac performance index in hypoxia and hyperoxia conditions, investigating systolic and minute cardiac forces 21 p3770 A70-41232
- Blood velocity in ascending aorta in man by transcutaneous ultrasonic Doppler technique, investigating heart hemodynamic performance and systemic perfusion 21 p3770 A70-41235
- Contractive function of myocardium in middle and advanced age individuals under high physical loads during prolonged periods 22 p3970 A70-42907
- Atrioventricular conduction in the human heart, analyzing electrocardiogram response patterns recorded by electrode catheter in unanesthetized man 22 p3970 A70-42942
- Space flight effects on dogs cardiac activity, brain circulation and systemic-tissue circulation interactions 22 p3972 A70-43635
- Atherosclerosis and latent coronary insufficiency diagnosis in flight crews, evaluating various tests 22 p3975 A70-43696

- Heat accumulation, oral temperature and heart rate recovery of subjects in various thermal environments 10 p1810 A70-24034
- Ballistographic psychological evaluation of heart and circulatory system by recording displacement, velocity, acceleration and total forces imparted during each beat 10 p1810 A70-24039
- Arterial oscillograms, pressure and heart beat rate during prolonged hypodynamia, noting neurocirculatory dystonia 10 p1817 A70-24693
- Left ventricular volumes, pressure and heart rate in patients and dogs after diagnostic coronary arteriography 10 p1820 A70-24939

Conditioned reflexes, respiration and heart beat rate changes in white rats under hypothermia

11 p1985 A70-25517

Rats heart rate change during running at simulated altitude, discussing respiratory-circulatory training effect

11 p1985 A70-25671

Rhesus monkeys tolerance to graded increase in closed environment carbon dioxide, examining heart rate and cardiac rhythm

11 p1988 A70-26517

Civil airlines training captains heart rate response to simulator stress, base conversion and line training

11 p1992 A70-26519

Canoe paddlers physical training effect on cardiac output and local blood flow and metabolism at and during exercise and recovery

12 p2169 A70-27653

Respiratory gas exchange, heart rate, arterial acidemia and hypoxemia responses to physical work in hyperbaric environments and hyperoxia conditions

12 p2169 A70-27655

Autonomic effects on heart rate, portal, renal, cutaneous and muscle blood flows during arterial hypoxia in unanesthetized sham operated thalamic and pontine rabbits

12 p2170 A70-27899

Paced respiration and selective attention effects on heart rate and finger pulse amplitude in adult females subjected to visual stimuli

13 p2350 A70-29241

Cardiac cycle and phases shortening observations from analyzing electro- and phonocardiographic data recorded during Gemini flights

13 p2359 A70-29437

2000 meter race for endurance testing, using heart rate radiotelemetry before, during and after

14 p2543 A70-31173

Actoballistocardiography based on piezoelectricity for biorythmic activity, respiratory movements and heart rate of small animals

14 p2543 A70-31321

Intrinsic heart rate /IHR/ range and variability in healthy subjects measured showing age as important determinant in absence of heart disease

15 p2678 A70-31433

Sleep intensity and stages from EEG studies concerning rapid eye movements, vegetative nervous system, heart/respiration rate, blood pressure, body temperature and stomach motility

15 p2680 A70-31743

Heart rate elicitation and blood pressure increase, considering parasympathetic and sympathetic nervous outflows adjustments of initial cardiovascular response to muscular contraction

15 p2684 A70-32535

Heart rate variations due to influence of body position rapid changes, emphasizing oxygen consumption in crouching position

17 p3024 A70-34591

Oxygen uptake capacity, ventilation, heart rate and acid base values during bicycle ergometer exercise

17 p3036 A70-34594

Centrifugation effects on human peripheral arterial pulse behavior

17 p3037 A70-35126

Serum calcium-digitalis synergism effect on dogs heart excitability, noting hypoxia role in arrhythmia production

17 p3026 A70-35325

Aldosterone effects on hemodynamics of dogs under restricted motor activity, observing cardiac activity stimulation

17 p3030 A70-35358

Sheep cardiac rate, respiration rate, hematocrit, erythrocytes per cubic mm and hemoglobin concentration responses to elevated ambient carbon dioxide

17 p3030 A70-35421

Intact femoral artery pressure-diameter relationship in man, discussing noradrenaline infusions effects

18 p3222 A70-37222

Heart stroke volume estimation at submaximal exercise using blood hemoglobin content and heart rate

20 p3576 A70-40328

Athletes ventilation and heart rate dynamic responses to supine leg exercise with sinusoidal work load

20 p3576 A70-40329

Myocardial blood flow response to cardioacceleration by right atrial pacing in normal subjects, using coincidence counting

21 p3760 A70-40576

Cardiac glycosides and beta receptor blocking agent effect on ULF displacement ballistocardiogram in healthy young men, measuring heart rate and blood pressure

21 p3763 A70-41227

Heart rate-time curves before, during and after step-up exercise in relation to physical fitness

22 p3978 A70-42873

Mathematical model of heart beat control during muscular activity in aging individuals, reflecting neural and hormonal control circuits

22 p3969 A70-42901

Valsalva maneuver beat-to-beat effects on systolic cardiac intervals compared with time based measurements

22 p3972 A70-43484

Safety standards and biological effects of microwave radiation, investigating cataractogenesis and heart rate in rabbits

23 p4144 A70-43790

Real time contourgraphic electrocardiographic display determining heart rate from CRT face on beat-by-beat basis

23 p4150 A70-44377

Pilot heart rate during in-flight simulated ILS approaches in general aviation aircraft

24 p4306 A70-45333

HEAT

NT DRY HEAT

Systematization of thermodynamic cycles from elementary reversible evolutions concerning exchange of work, heat and combined relations

06 p1173 A70-17470

HEAT ACCLIMATIZATION

U ACCLIMATIZATION

U HEAT TOLERANCE

HEAT BALANCE

Gas flow in pipe with uniform wall heat flux, analyzing turbulent heat transfer using heat balance equation [ASME PAPER 69-HT-11]

08 p1486 A70-21834

Hydrogen-oxygen fuel cell reaction water removal and heat loss using reconcentration device

12 p2163 A70-27066

ESRO-I satellite attitude stabilization and thermal balance

13 p2505 A70-28842

Earth radiation balance climatological characteristics based on satellite and published data, analyzing earth-atmosphere albedo on global scale

14 p2603 A70-30402

Matter and heat balance of cosmic grains surrounded by plasma and neutral gas under radiation

22 p4097 A70-42473

HEAT EXCHANGERS

NT TUBE HEAT EXCHANGERS

CH-54 engine air inlet antice system design, manufacture and testing, solving heat balance equations describing tapered gap heat exchanger

01 p0165 A70-10693

Length calculation method for nonadiabatic imaginary tip extension of heat exchanger fins, predicting heat conduction rate

01 p0215 A70-10842

Heat exchange unit for low thrust attitude control propulsion system evaporator designed for converting liquid propellants to gas

01 p0216 A70-10969

Monograph on laminar flow heat transfer in thermal entrance region of flat and profiled ducts, treating construction and efficiency of plate heat exchangers

03 p0603 A70-12988

Heat exchangers efficiency taking into account surface, weight and cost

05 p0958 A70-16551

Heat transfer coefficients for heat exchangers rotating in air at various velocities computed from skin friction coefficients in laminar and turbulent flow regime

06 p1177 A70-17701

Oblique flow headers design for heat exchangers based on one dimensional momentum and continuity

08 p1598 A70-21482

Whirl effect on heat exchanger efficiency and reliability, discussing tests with transparent models and defective filling of circuits by feeding system

10 p1968 A70-24400

Heat transfer in Z shaped regenerative heat exchangers with/without air mixing, determining parameters defining thermal efficiency

13 p2520 A70-28857

Flow nonuniformity effects on heat exchangers efficiency

15 p2827 A70-32140

Book on heat transfer covering conduction, convection, thermal radiation and heat exchange equipment

19 p3550 A70-37231

Diathermic heat exchange cooling systems, analyzing volume boiling in terms of separation into convective and radiative components

19 p3550 A70-37239

Pin fin coldplate heat exchanger for cooling Apollo spacecraft electronic equipment, calculating forced convection heat transfer and fluid pressure drop

21 p3797 A70-41025

Thermal efficiency of ceramic and metal heat exchangers for biowaste resistojet thrusters

[AIAA PAPER 70-1135] 21 p3868 A70-41779

Aerobee rocket-borne cryogenic air samplers heat exchanger design by mathematical model and computer solution

23 p4280 A70-44365

Cryogenic fluid heat exchanger flow oscillation automatic feedback control, discussing design and simulation

23 p4280 A70-44370

HEAT FLOW

U HEAT TRANSMISSION

HEAT FLUX

Solid bodies unsteady thermal conductivity in presence of quasi-steady heat transfer under combined radiant and thermal fluxes, presenting thermodynamic nomograms

01 p0213 A70-10215

Hot junctions nonuniform heating influence on thermoelectric generator efficiency, taking into account temperature dependence of thermoelement materials properties

01 p0009 A70-10753

Power and location prediction at critical heat flux onset under nonuniform axial heating conditions, using local approach method

01 p0219 A70-11303

Diffuse soft X ray photoionization and heating of H I regions compared to cosmic ray heating

02 p0364 A70-11784

Radiative transfer in nongray gas between parallel walls, solving heat flux and temperature distribution

02 p0392 A70-11907

Nonsteady thermal decomposition of plastics subjected to large heat flows, introducing equations governing char layers and pyrolysis zones

02 p0397 A70-12021

Low temperature high sensitivity temperature compensated heat flux transducers to measure conductive, convective and radiative heat transfer

02 p0303 A70-12740

Periodic shock fronted longitudinal pressure wave effect on instantaneous heat flux rates at tube end wall

02 p0400 A70-12860

Two dimensional approximate formulation for radiant heat flux applied to radiative equilibrium in gray gas

03 p0603 A70-12905

Transverse magnetic field effects on electrode heat fluxes in heavy-current discharge, discussing anodic space thermal ionization

03 p0531 A70-13205

Extrapolation formulas to calculate temperature gradients and heat fluxes in solid heated by variable heat flux, estimating errors

03 p0606 A70-13521

Measured heat flux conversion into average radiation incident on convex satellite surfaces in test chambers

03 p0606 A70-13536

Transient and steady state radiation heat flux sensors calibration by developing and evaluating heat flux source

03 p0606 A70-13558

Turbulent reattachment of supersonic axisymmetric jet on cylindrical wall in air, investigating wall temperature effect on cavity pressure and heat flux

03 p0467 A70-13643

Radiative heat flux between two parallel copper disks at cryogenic temperature, showing dependence on emitter temperature and spacing

04 p0784 A70-14823

Matrix analysis of steady state temperature field and heat flux through multilayer, plane, cylindrical or spherical partitions with internal heat sources

04 p0785 A70-14924

Heat fluxes, shear stresses and pressures distribution at spike on body in supersonic flow from asymptotic solutions of Navier-Stokes equations

04 p0673 A70-15232

Response characteristics of asymptotic or Gardon type thin foil heat flux transducer, discussing heat transfer coefficient effect on response time and curve

04 p0694 A70-15548

Laminar flow in circular pipe with arbitrary axial variation of wall temperature or heat flux, using integral type approximation

05 p0957 A70-16519

Heat transfer boundary conditions determination in studying heat protective coatings effectiveness, discussing measurement methods for stagnation temperatures and heat fluxes from exhaust gases

06 p1173 A70-17662

Bulk and wall temperature measurements for natural fluid convection in container with and without baffles for various heat flux and aspect ratios

06 p1175 A70-17684

Heat radiation effect on set-up and scale of cellular convection in atmosphere

06 p1097 A70-17789

- Unsteady inverse heat conduction of semibounded body solved by least squares method 06 p1178 A70-17856
- Convective and radiative heat fluxes measurement on charring ablative materials surface in rocket nozzle environment 06 p1070 A70-18444
- Microsecond-response bolometer for measuring thermal fluxes as function of time in high explosion driven shock tubes and plasma jets 06 p1070 A70-18445
- Heat flux, electrical and thermal conductivity of H measured on plasma in cascade arc chamber of high power load at 1 atm pressure 06 p1107 A70-18525
- Time dependent relaxation model for heat flux in metals from quantum mechanical form of Boltzmann transport equation, yielding damped wave equation for temperature 06 p1090 A70-18612
- Electrically heated wire diameter and orientation on heat flux in saturated pool and surface boilings of water and aqueous binary mixtures 07 p1417 A70-18643
- Empirical method for calculating critical thermal flux density during boiling of underheated liquid-vapor systems 07 p1420 A70-19068
- Heat exchange in laminar and turbulent boundary layers on plate for arbitrary heat flux distribution allowing for initial unheated plate segment 07 p1423 A70-19657
- Specific radiant heat flow and spectral blackness degree of tungsten with different surface finish 07 p1309 A70-19662
- Steady temperature field of two dimensional periodic contact surface in vacuum, using conjugate harmonic functions for thermal flux lines, isotherms and thermal resistance 07 p1423 A70-19820
- Turbulent thermal flux in Venus atmosphere estimated from amplitude fluctuation dispersion of Venera 4 and Mariner 5 radio signals 07 p1390 A70-20305
- Gas flow in pipe with uniform wall heat flux, analyzing turbulent heat transfer using heat balance equation [ASME PAPER 69-HT-H] 08 p1486 A70-21834
- Atmospheric momentum and heat flux height variations in surface boundary layer, stressing instrument performance and measurement techniques 09 p1715 A70-22359
- Heat, moisture and momentum fluxes measurement in atmospheric boundary layer, discussing instrumental accuracy necessary for various measuring techniques 09 p1717 A70-22379
- Temperature distribution in infinite and finite circular hollow cylinders, considering surface heat flux and linear heat transfer 09 p1788 A70-22595
- Anode energy transfer model for measurement of circumferential current and heat flux distributions of MPD arc thruster 09 p1736 A70-23203
- Flux equations of single velocity Boltzmann type for unsteady transport problems applied to concentration discontinuity propagation through plane layer 10 p1966 A70-23871
- Heat radiation effect on set-up and scale of cellular convection in atmosphere 10 p1882 A70-25021
- Empirical method for calculating critical thermal flux density during boiling of underheated liquid-vapor systems 10 p1970 A70-25219
- Temperature and heat flux in plane, cylindrical and spherical multilayer diaphragms with boundary conditions, assuming harmonic temperature variation 10 p1970 A70-25321
- Energy equations solved for step change of wall temperature and heat flux, determining turbulent heat transfer in tube, discussing asymptotic solutions validity 11 p2146 A70-25334
- Transient heat flux measurement with surface thermocouples, thin film resistance thermometers and mathematical computation programs 11 p2065 A70-25768
- Gas passing through shock wave, investigating constitutive relations for stress and heat flux using Maxwell moment method 11 p2036 A70-26015
- Remote monitoring of atmospheric wind and turbulence by cross correlation passive techniques, measuring heat and humidity fluxes 12 p2230 A70-26948
- Laminar boundary layer and heat flux at forward stagnation point of indestructible body in partially ionized air flow calculated as function of enthalpy 12 p2156 A70-27287
- Critical thermal flux and heat transfer coefficients dependence on simulated gravity during bubble and film boiling in inclined flat containers 12 p2331 A70-27325
- Turbulent heat transfer in concentric annuli entrance region with uniform wall heat flux 12 p2333 A70-28117
- Pulsed plasma jet radiant heat flux effect on cellophane film coated, polished and etched metals, noting erosion destruction 12 p2282 A70-28287
- Nucleate pool boiling, calculating sinusoidal and square wave pressure variations effect on heat flux for comparison with measurements 14 p2616 A70-30254
- Surface temperature fluctuations during dropwise condensation at various heat fluxes 14 p2663 A70-30256
- Atmospheric airflow model above changes in surface roughness, temperature and heat flux, using boundary layer approximations and Businger-Dyer and mixing length hypotheses 14 p2602 A70-30368
- Radiant heat flux for standard model, dry and humid atmosphere, calculating temperature variations with altitude for entire IR spectrum 14 p2603 A70-30401
- Heat transfer coefficient from circular cylinder subjected to uniform surface heat flux and cooled by ring of holes 14 p2667 A70-31427
- Heating rate effect on parameters of resistance wire strain gages subjected to temperature gradients 15 p2733 A70-31536
- Heat flux measurements in hypersonic rarefied gas flow by thin film surface thermometer 15 p2825 A70-31820
- Heat stress levels in cockpit of AH-1G Hueycobra helicopter parked in sunlight with closed canopy, using sweating copper mannikin 15 p2689 A70-31881
- Atmospheric radiation and heat fluxes calculations comparison with satellite and ground station actinometric measurements 15 p2770 A70-32067
- Heat exchange in laminar and turbulent boundary layers on plate for arbitrary heat flux distribution taking into account initial unheated plate segment 15 p2828 A70-32694
- Ablative materials performance in high radiative heat flux environments produced by CW carbon dioxide laser [AIAA PAPER 70-864] 16 p2939 A70-33907
- Temperature distributions and heat flux for gray gas in radiative equilibrium bounded by walls with different temperatures, using differential approximation [AIAA PAPER 70-834] 16 p3001 A70-33929
- Mathematical model of heat flux absorbed by heated part in radiant heating reflector systems, considering shape, spectral, directional and polarizing effects [AIAA PAPER 70-818] 16 p3002 A70-33945
- Surface temperature or heat flux density estimation for nonlinear inverse heat conduction problem involving temperature dependent thermal properties 16 p3002 A70-34195
- Heat exchange in dissociating partly ionized gas flow over critical point on permeable surface with injection into laminar boundary layer 17 p3011 A70-35347
- Nonaxisymmetric thermal stress distribution in infinite elastic solid containing external stress-free crack with prescribed heat flux 17 p3196 A70-35437
- Ballistical transport in collisionless exosphere, discussing heat flux of ballistical oxygen and model temperatures for day and night conditions 17 p3080 A70-35765
- Laminar free convection near two dimensional and axisymmetric nonisothermal bodies, examining surface temperature distribution and heat flux 18 p3345 A70-35999
- Critical heat flux density during annular channel internal heating, examining transfer crisis under forced motion of unheated water 18 p3345 A70-36111
- Adiabatic calorimeter for heat flux sensor contact calibration, describing operational principles and design 18 p3257 A70-36115
- Error sources in carbon black coating on thin foil heat flux sensors accounting for false altitude effects in vacuum calibration 18 p3262 A70-37100
- Heat transfer behind shock wave in air, oxygen or carbon dioxide flow past wedge, determining thermal fluxes vs wave velocity 19 p3405 A70-38188
- Mode-generated average variables of atmospheric horizontal heat flux by transient cyclonic eddies used in mean motion circulation model 20 p3664 A70-40063
- Isoperibol calorimetry for laser power and energy measurements, discussing boundary value problem for heat flow 21 p3838 A70-42021
- Critical thermal flux and heat transfer coefficients dependence on simulated gravity during bubble and film boiling in inclined flat containers 21 p3952 A70-42066
- Turbulent air flow measurements through heated pipe, determining local heat flux from simultaneous velocity and temperature fluctuation 21 p3811 A70-42091
- Dynamic nonstationary thermal convection in closed region with heat input from lateral surface for high Rayleigh and Fourier numbers 21 p3954 A70-42214
- Nonstationary axisymmetric thermal convection in spherical cavity with boundary heat flux proportional to temperature, using difference scheme and networks method 21 p3954 A70-42215
- Sphere and axisymmetric body with spherical blunting in low density gas flow, measuring local heat transfer flux 21 p3748 A70-42218
- Stationary turbine blades heat flux measurements, considering heat exchange coefficients and turbulent boundary layer [ONERA-TP-871] 22 p4126 A70-43459
- Static pressure effects on heat flux critical density for free convection and forced flow in circular pipes 23 p4282 A70-44726
- Critical heat flux during forced pipe flow of boiling ethanol-water and acetone-water binary mixtures 23 p4283 A70-44730
- Thermal flux surface distribution lifting bodies, discussing aerodynamic efficiency dependence on drag and zero angle of attack Mach number 23 p4136 A70-45019
- Plate temperature jump and heat flux in Knudsen layer using Bhatnagar-Gross-Krook model 24 p4429 A70-45997
- Controllable states with prescribed heat flux for incompressible isotropic thermoelastic bodies with temperature dependent response functions 24 p4426 A70-46041
- Peak pool boiling heat flux on horizontal cylinders, describing interactions of gravity and heater size effects 24 p4429 A70-46176
- Heat flux exchange by natural convection along flat vertical isothermal plate in laminar, transition and turbulent flows, using fluxmeters 24 p4429 A70-46207

HEAT GAIN U HEATING HEAT GENERATION

- Steady state heat conduction problems solved by finite element method, with examples involving internal heat generation and various boundary conditions 01 p0215 A70-10558
- Esthesiometric analysis of cutaneous thermoreceptors reaction dependence on heat production rates of human organisms 07 p1206 A70-19472
- Transient temperature distribution in flow through channel with arbitrary cross section, taking into account internal heat generation and viscous dissipation 08 p1599 A70-21767
- Time-temperature charts for one dimensional unsteady conduction with uniform internal heat generation 09 p1791 A70-23567
- Temperature field in work piece generated by grinding wheel face investigated for cylindrical and surface grinding 10 p1894 A70-24291
- Insulators, ablators, reflectors and computer analyses for aerodynamic and engine heat for aerospace thermal design 11 p1980 A70-25874
- Solid fuel steady combustion regime stability dependence on heat generation in reaction zones and temperature and velocity fields inhomogeneity 13 p2522 A70-29423
- High argon plasma temperatures via pulsing constricted electric arc 14 p2621 A70-30504
- Thermal degradation of anhydride-cured epoxy resin by carbon dioxide laser heating through platinum crucible 15 p2695 A70-32828
- Plastic deformation zones at crack tip considered as distributed heat sources, using stress and strain distribution solutions 17 p3191 A70-35463
- Localization and functional topology of thermosensible central nervous structures in rats cervical spinal cord, discussing role in generating heat to avert coldness 22 p3967 A70-42316
- Heat generation effects in air hydrostatic journal bearing, including shaft and housing thermal deformation and lubricant viscosity changes [ASME PAPER 70-LUBS-19] 22 p4044 A70-42442
- Human body heat production and transfer through convection, radiation and evaporation under normal and reduced atmospheric pressure 23 p4154 A70-44654

- Steady state radiative heat transfer through gray gas in spherical cavity, solving transport equation by singular integral equations for uniform heat generation 23 p4283 A70-44784
- Ruby laser in repetitive pulse operation, determining temperature, heat generation and transfer coefficient from spectrum shift measurement 23 p4203 A70-45071
- Surface temperature distribution of heat generating solid body in contact with parallel viscous fluid flow 24 p4430 A70-46368

HEAT MEASUREMENT

- Cycloheptane and mixture of exo- and endo-cycloheptene heats of combustion and formation, isomerization and hydrogenation 01 p0213 A70-10134
- Calorimetric measurement of electron temperature in collisionless shock wave propagating in plasma column, discussing role of H beta line Stark broadening 01 p0153 A70-11589
- Calorimetric analysis and hardness test to investigate low temperature aging behavior of maraging stainless steels 01 p0125 A70-11642
- Frog sartorius muscle heat production and work effect measured under isotonic and isometric conditions, using gradient layer calorimetry 02 p0232 A70-11715
- Kinetic energy of atomic motions for vitreous and crystalline high polymers measured by differential scanning calorimetry and thermal analysis 02 p0253 A70-12522
- Thin film heat gauge for measuring thermal transport from plasma to end wall of shock tube, discussing measurements in high temperature Ar 03 p0496 A70-14381
- Alpha beryllium nitride enthalpy and thermodynamic properties measured between 273-1173 K using drop calorimetric method 04 p0646 A70-14582
- Radiative heat transfer through dust clouds in radiative equilibrium and isothermal clouds between parallel plates measured with heat flowmeter [ASME PAPER 69-WA/HT-41] 04 p0781 A70-14802
- Sweeping W wire probe in rotational high temperature plasmas for local heat transfer measurement 06 p1120 A70-17699
- Reaction heat for flameless combustion of double-base propellant using differential scanning calorimetry and thermogravimetric analysis, noting pressure effects [AIAA PAPER 70-125] 06 p1179 A70-18045
- Measurement error associated with heat conduction in temperature sensor, using mathematical model 06 p1070 A70-18443
- Convective and radiative heat fluxes measurement on charring ablative materials surface in rocket nozzle environment 06 p1070 A70-18444
- Liquid nitrogen tetroxide enthalpy measured by indirect heating techniques, obtaining data at supercritical temperatures 06 p1005 A70-18560
- Wind tunnel study of heat transfer on smooth plate surfaces in longitudinal air flow using intermittently insulated calorimeter 07 p1279 A70-19065
- Caloric data determining saturated vapor pressure of nitrogen tetroxide and heat of sublimation for sublimation curve 07 p1358 A70-19206
- Enthalpy of nitrogen tetroxide in liquid phase using direct heating of test substance in calorimeter 07 p1358 A70-19207
- Heat transfer from composite propellant burning zone to regressing surface measured using multimirjet burner 07 p1359 A70-19587
- Natural heat convection measurements in vertical annular spaces, noting importance of local density and velocity product 08 p1433 A70-21671
- Segmented anode current and heat distribution in MPD engine measured with current shunts and calorimetric methods [AIAA PAPER 69-244] 09 p1613 A70-23238
- Wind tunnel study of heat transfer on smooth plate surfaces in longitudinal air flow using intermittently insulated calorimeter 10 p1970 A70-25216
- Guarded disk type emissometer for hemispherical emittance measurements of sample materials in 88 to 420 K range based on steady state calorimetry [AIAA PAPER 69-600] 13 p2404 A70-28524
- Linear high polymers heat capacity measurements theory emphasizing simple mechanical systems and contribution of lattice vibrations 13 p2438 A70-28997
- Nucleate pool boiling, calculating sinusoidal and square wave pressure variations effect on heat flux for comparison with measurements 14 p2616 A70-30254

Calorimetric measurements for Re specific heat in normal and superconducting states, comparing to theoretical calculation 14 p2626 A70-30478

Specific heat measurements on disordered and ordered phases of Cu-Au alloys at low temperatures 14 p2626 A70-30497

Specific heat, thermal pressure and molar volume of liquid krypton measured with adiabatic calorimeter, discussing thermal expansion coefficients 14 p2617 A70-31016

Heat exchange measurements between solid body and high enthalpy gas flow at stagnation point using electric arc heater 15 p2826 A70-32102

Steady state temperature dependence of heat conduction coefficient using arc approximation 15 p2826 A70-32106

Heat flow measurement, discussing operation principles, heat conduction and stationary and transient temperature conditions 17 p3082 A70-34681

Measurement methods for forces, pressure and heat flow in hotshot hypersonic wind tunnels 17 p3057 A70-34773

Natural convection heat transfer from vertical cylinder outer surface to liquids, discussing apparatus design and measurements 17 p3197 A70-35540

Turbine engine combustion chambers with various frontal devices, investigating burnout mechanism and heat yield in secondary air flow injection zone 19 p3489 A70-37246

Convective and radiative heat flux measurement incident on ablative surface in solid rocket nozzles 21 p3824 A70-40858

Microsecond response bolometer for measuring thermal radiation fluxes in shock tube, discussing design, calibration and performance 21 p3824 A70-40859

Thick film thermocouple gages for roughened solid surface heat flux measurements in high Reynolds number shock tunnel 21 p3824 A70-40860

Turbulent air flow measurements through heated pipe, determining local heat flux from simultaneous velocity and temperature fluctuation 21 p3811 A70-42091

Fluorine specific heat derived from measurements on two phase liquid vapor system at constant volume by PVT properties at coexistence 23 p4157 A70-44001

Differential scanning calorimetry and thermogravimetric analysis combination for thermochemical kinetic measurements, matching analytical and experimental curves for data accuracy 23 p4196 A70-44429

Al and W specific heat and Al heat of fusion by quasi-adiabatic calorimetry, estimating anharmonic lattice vibrations role via atomic thermodynamic analysis 23 p4208 A70-44931

HEAT OF COMBUSTION

Reaction heat for flameless combustion of double-base propellant using differential scanning calorimetry and thermogravimetric analysis, noting pressure effects [AIAA PAPER 70-125] 06 p1179 A70-18045

Two body collisions reaction mechanisms with small heats of reaction for Be and Al gaseous oxidation, noting low free energy properties of polymerization 10 p1928 A70-24089

Excess air ratio and heat release efficiency in combustion of kerosene mixture determined by volumetric gas analysis 10 p1968 A70-24283

Turbine engine combustion chambers with various frontal devices, investigating burnout mechanism and heat yield in secondary air flow injection zone 19 p3489 A70-37246

Physicochemical properties of monomer and associated aluminokalks, determining heats of combustion 22 p4124 A70-42677

Heats of combustion and free isomerization energies of exo- and endo-isomers of 2- and 1-methylbicyclo heptane 22 p3982 A70-42680

Computerized calculation of gas turbine cycles thermal efficiency, using hydrocarbon fuel, considering fuel composition and heat of combustion changes 22 p4125 A70-43439

HEAT OF DISSOCIATION

Diatomic fluorine dissociation energy by mass spectrometry 20 p3582 A70-39615

HEAT OF FORMATION

Polymerization reaction kinetics investigated with differential scanning calorimeter at isothermal conditions, determining heat of polymerization 11 p1994 A70-25810

Gas phase stabilities of bicyclic cations, establishing heats of formation limits by ion- molecule reactions identification 16 p2848 A70-33091

Titanium base binary systems phase diagrams, describing component activity and compound phases heat of formation 17 p3114 A70-34379

Oxygen isotope fractionation and formation temperature of minerals from Apollo 11 rocks, including plagioclase-clinopyroxene-magnetite concordancy diagram 21 p3776 A70-41597

Oxides compounds heats of formation isocomponent and primary product composition relationship in binary systems 22 p3982 A70-42679

Al-Mg alloys solid phases free energy, entropies and formation heats determination by electromotive force measurement 24 p4357 A70-45230

HEAT OF SOLUTION

Solubilities and heats of solutions of Mo, W, V, Ti and Zr in liquid K 04 p0710 A70-15632

HEAT OF VAPORIZATION

Rate and heat of vaporization of graphite filaments in 2500-3400 K range in vacuum and in He, using pulse heating techniques 03 p0517 A70-14004

Solar radiation effects on evaporation of dust with high latent heat of vaporization, considering particles in comets and zodiacal cloud 11 p2117 A70-26648

Heat of evaporation of sweat measured in human calorimeter at various air and dew-point temperatures, finding value 7 percent above water 17 p3031 A70-35423

HEAT PIPES

Na heat pipe with wick structure consisting of wire rods observed for ease of wick rewetting, dryout limit reproducibility, etc [AICHE PREPRINT 7] 01 p0216 A70-10967

Unsteady heat transfer equations for laminar fluid flow in pipe with varying wall temperature 03 p0604 A70-13207

Gravitational effects on heat transfer during evaporation and condensation processes in heat pipe, discussing conditions in Na filled heat pipe [DGLR-69-44] 04 p0785 A70-15171

Heat pipe structural alloys compatibility with different working fluids using capsule tests at high temperatures, noting corrosion behavior [AIME PAPER F-69-2] 07 p1304 A70-18812

Heat pipes to cool electronic circuitry, discussing design and operation 09 p1786 A70-22015

Gravitational effects on heat transfer during evaporation and condensation processes in heat pipe, discussing conditions in Na filled heat pipe 09 p1789 A70-23427

Unidirectional heat pipe system design to control temperature of high power traveling wave tubes in synchronous orbit communication satellite, dissipating waste heat 11 p2127 A70-26362

Quasi-isothermal heat transfer pipe design and operation 12 p2330 A70-27275

Radiative heat transfer in channel with unsteady radiating medium temperature, assuming absolutely black walls with zero temperature 13 p2522 A70-29725

Lithium vapor fueled applied field MPD arc jet performance using open end heat pipe vaporizer and hollow cathode [AIAA PAPER 69-241] 13 p2475 A70-29959

Heat pipes design for rocket engines cooling, discussing connections to space radiator and to heat rejection device and heat transfer capability [AIAA PAPER 69-582] 15 p2791 A70-32517

Heat pipe cooled thrust chambers for space storable propellants, discussing design feasibility for radiation and regeneratively cooled concepts [AIAA PAPER 70-942] 16 p2965 A70-33541

Heat pipes in nuclear aircraft propulsion system, describing core, heat exchangers, and reactor to jet engine heat transport system [AIAA PAPER 70-662] 16 p2950 A70-33623

Liquid metal corrosion of heat pipe refractory alloys at high temperatures, noting oxygen role 16 p2933 A70-34208

Heat pipe performance tests under longitudinal harmonic vibration 17 p3193 A70-35751

Aircraft electronic equipment cooling techniques, discussing natural and forced convection, phase change and heat pipes 18 p3232 A70-36763

Flexible heat pipe test for heat flux and wick pumping capacity under vibration and evaporator-condenser modification 21 p3945 A70-41040

Heat transfer mechanism during fluid evaporation in porous wick structure contacting heat pipe surface 21 p3946 A70-41042

Working fluids liquid property variations effects on cryogenic heat pipe performance 21 p3946 A70-41043

Optimum cryogenic heat pipe design, considering gravitational effects for spacecraft applications 21 p3946 A70-41044

Heat pipes in OAO 3 spacecraft for minimizing structural temperature gradients and validating thermal control approach 21 p3946 A70-41045

Liquid metal heat pipes in magnetic fields of controlled fusion reactors, considering geometry, compound wick structure and vapor flow 21 p3946 A70-41046

Liquid or vapor phase working fluids penetration effects on steady state and transient performance of hot reservoir gas controlled heat pipes 21 p3946 A70-41047

Thermal scale modeling of heat pipe in deep space, using material and heat flux preservation techniques 21 p3946 A70-41048

Accelerated failure tests of ammonia-Al-stainless steel heat pipes for fluid loss or energy transport degradation 21 p3947 A70-41049

Heat pipe performance map with ammonia as working fluid, comparing thermal transport efficiency with water pipe 21 p3947 A70-41050

Mercury as stainless steel heat pipe working fluid, determining wetting characteristics and heat transfer capability 21 p3947 A70-41051

Static pressure effects on heat flux critical density for free convection and forced flow in circular pipes 23 p4282 A70-44726

Critical heat flux during forced pipe flow of boiling ethanol-water and acetone-water binary mixtures 23 p4283 A70-44730

HEAT RADIATORS

NT SPACECRAFT RADIATORS

Thermal efficiency of modified transtage of Titan 3C spacecraft, discussing environmental simulation, heat rejection system and test firing [AIAA PAPER 70-171] 06 p1156 A70-18027

Finned tube radiators with constant longitudinal specific heat flow, determining thermal efficiency and optimal thermal and structural parameters 06 p1184 A70-18556

Solar energy exchange with radiator surface recessed within specular axisymmetric cylindrical spinning cavity, using deterministic ray tracing scheme 11 p2150 A70-26353

Variable reproducible black radiator of resistance heated carbon tube designed for temperatures between carbon glowing and sublimation point 12 p2329 A70-27090

Conical heat radiator system for cooling short cylinders 15 p2827 A70-32142

Al radiator with thin stainless steel tube liner using liquid metal coolant tested for heat rejection system of SNAP-8 Rankine cycle power system [AIAA PAPER 70-855] 16 p3000 A70-33922

NT WAPALLOY

Heat resistant alloys for gas turbine blades observed for long term heating effects on changes of hardness, tensile, impact and stress-rupture properties and microstructure 01 p0116 A70-10149

Transmission electron microscope study of deformation mode during rapid tensile testing of Ni-base superalloy, discussing twinning and stacking fault modes 01 p0118 A70-10705

Tungsten effect on phase transformations and carbide reactions to attain equilibrium at 850 C in Ni-base superalloys 01 p0118 A70-10727

Precipitation in Ni-base superalloy analysis with dark field electron microscopy and electron and X ray diffraction 01 p0119 A70-10730

Ni-based superalloys microstructure, describing composition, formation and characteristics of various phases 01 p0124 A70-11448

Mo coated with Ni-base Nimonic and Co-base heat resistant alloys, for working degree effect on creep rupture strength 01 p0126 A70-11646

Carrying capacity of heat resistant steel turbomachine elements, discussing plastic deformation and cyclic load effects, breakdown load determination, stress analysis, etc 02 p0352 A70-11659

Brazed plate-fin superalloy panels suitable for hydrogen-cooled structures, discussing fabrication techniques, performance tests and pressure containment and fatigue characteristics 02 p0306 A70-11930

Heat and creep resistant Ni- and Fe-base alloys application in gas turbines, superheaters, steam pipes, chemical and petrochemical plants and heat treatment equipment 02 p0319 A70-12711

Chromium refractory alloys, discussing production difficulties, mechanical properties, engineering applications, etc 02 p0320 A70-12760

Oxidation and sulfidation resistant diffusion coatings for superalloys, discussing processing methods, composition, properties and application [SAE PAPER 690479] 03 p0509 A70-13266

Carbide phase in Cr-Mn heat resistant steels at annealing temperatures, isolating gamma, chromium carbide and niobium carbide phases 03 p0509 A70-13279

Heat treatment effects on phase components of Cr-Mn-B alloys with W and Nb additions, discussing heat resistance 03 p0510 A70-13280

Cr alloys applications in high temperature environments, describing alloying elements effects on strength and ductility 03 p0511 A70-13566

Heat resistant alloys densities calculated from chemical composition, estimating error 03 p0512 A70-13778

Prealloyed powders of Ni base alloys, made by inert gas atomization for improved strength and ductility 04 p0706 A70-14951

Nickel base alloy, WAZ-20 with improved strength in 2000-2200 F range for application to gas turbine engine stator vanes 04 p0706 A70-15097

Ni addition effects on Mg-Nd and Mg-Nd-Mn alloys structure and heat resistance 04 p0706 A70-15189

Chromoluminizing process protecting alloys for gas turbines against oxidation at high temperatures by diffusion mechanism 04 p0711 A70-15683

High temperature properties mechanisms in aluminate coated vacuum cast nickel base superalloys 04 p0711 A70-15705

Mechanical properties of eutectic superalloys compared with commercial superalloys, noting thermal stability applicability to gas turbine engines [SAE PAPER 690689] 05 p0861 A70-15827

Internal friction method for studying dislocation, stacking points and strengthening processes in steels and heat resisting austenitic steel behavior at high temperatures 05 p0864 A70-16870

E1617 alloy breakdown resistance tests under multiple alternating static tension-compression and vibrational loads at 800 C 05 p0867 A70-17044

Heat resistant steel and nickel alloys stress rupture strength at operating temperatures, discussing endurance diagrams under cyclic bending loads 05 p0868 A70-17047

Fatigue life tests for heat resistant gas turbine blade alloys under power and thermal loads simulating aircraft flight 05 p0953 A70-17051

Cylindrical Al, high strength pig iron and heat resistant steels elastoplastic deformation diagrams for cyclic compression tension loads 06 p1084 A70-17387

Temperature cycle duration effects on heat resistant alloys thermal fatigue resistance, noting stress relaxation occurrence 06 p1085 A70-17398

Coating and coating processes for superalloys in hot section components of gas turbine engines for aircraft, industrial, marine and vehicular applications 07 p1362 A70-18929

Fe-Cr-Ni alloys for use in high temperature oxidizing environments 07 p1305 A70-18966

Oxidation, hot corrosion resistance and mechanical properties of aluminate coated superalloys, discussing failure analysis instruments and methods 07 p1305 A70-18969

Alloying elements effect on polymorphic alpha-beta transformation temperature of Ti systems, discussing heat resistance 07 p1307 A70-19555

Soviet book on mechanical properties of heat resistant steels and alloys at room and elevated temperatures 08 p1515 A70-20691

Hydrogen penetrability in heat resistant steels subjected to high temperature creep, observing activation energy decrease with increased stress 08 p1515 A70-20923

Energy dissipation in heat resistant Ni steels under cyclic tension and compression at room temperature 08 p1516 A70-20981

Cyclic creep and relaxation of heat resistant alloys at high temperatures, showing inapplicability of static load conditions 08 p1516 A70-20982

Carburization resistance of refractory steels, emphasizing chemical composition effect on corrosion rate 08 p1519 A70-21434

Tungsten alloy fiber reinforced Ni-base superalloy composites evaluated for high temperature turbojet engine applications, considering stress-rupture strength, oxidation and impact resistance 08 p1523 A70-21907

Plasma beam welding of light metal and heat resistant alloys, discussing weld characteristics, beam I-V characteristics, etc 09 p1690 A70-22077

Sigma and mu phase formations in Ni heat resistant alloys x ray analysis using phase isolation by anodic dissolution 09 p1700 A70-22079

Cyclic heating and thermal stresses effect on fatigue strength and durability of turbine blade alloys and structural elements 09 p1771 A70-22463

Powder metallurgy all-inert processing method for producing nickel base superalloys forgings, discussing microstructure, reproducibility, mechanical properties, etc 09 p1701 A70-22553

Heat resistant alloys creep ductility, considering grain boundary cavitation, sliding and migration 09 p1701 A70-22554

Heat resistant cast alloys creep strength reporting criteria, comparing U.S. and European practices [ASM PAPER P9-15.2] 09 p1702 A70-22558

Internal nitridation temperature effect on dispersion hardening of austenitic stainless Fe-Cr-Ni-Ti steels, investigating interparticle spacing and layer thickness effects 09 p1705 A70-22810

Ni-Cr superalloys hot corrosion, studying sulfidation-oxidation in various synthetic controlled gas mixtures 09 p1706 A70-22944

Plane disks and turbine disks of complex profile made of heat resistant Cr-Ni alloys studied for rupture strength under various temperature conditions 09 p1785 A70-23599

Heat resistant materials strength characteristics with long service periods, formulating equation for time dependence of rupture resistance 10 p1903 A70-24237

Long time static strength, durability and thermal stability relations determined for heat resistant alloys at operational temperatures 10 p1903 A70-24238

Long time strength and creep rectilinear diagrams constructed for heat resistant alloys to obtain extrapolation values 10 p1903 A70-24239

Test results extrapolation for heat resistant alloys long time strength using exponential relation between time to rupture and value for initial stress decrease 10 p1903 A70-24240

Yield point temperature dependence in heat resistant austenitic alloys, showing tendency to brittle failure under short term overloads 10 p1906 A70-25291

Heat resistant alloys low cycle fatigue tests between 20-800 C, establishing residual strain change patterns as function of stress and temperature 10 p1906 A70-25294

Powder base superalloy with superplastic behavior, ascribing mechanism to migration of second phase gamma prime particles 12 p2252 A70-26889

Short time tensile properties of thermomechanically treated astrolloy showing improvement due to refined gamma precipitate and grain boundary carbides 12 p2256 A70-27610

Superplastic nickel superalloys fabrication by controlled densification during direct extrusion 12 p2257 A70-28020

Structural stability of friction welded joint between high temperature low alloy weld metal from CrMoV electrode and high temperature Cr steel 12 p2244 A70-28349

Ni alloys hardening by solid solution precipitation and insoluble particles dispersion, emphasizing heat resistant alloys and mechanical properties

13 p2433 A70-28762

Ni-based heat resisting alloy /Inconel 700/ investigated for hot corrosive environment effect on stress rupture and fatigue strengths

13 p2434 A70-29157

Oxygen motion velocity effect at various pressures on heatproof and heat resistant steels and alloys ignition, noting minimum ignition temperature

13 p2434 A70-29168

Ni-Fe base superalloy notch and rupture properties as function of thermal and chemical changes, using electron microscopy

13 p2437 A70-29829

Superalloys commercial development, investigating strength, heat resistance and weldability of Fe- and Ni-based alloys

[ASM PAPER W70-9.4]

15 p2760 A70-32335

Glass bead blast induced residual stress and surface cold work effects on Ni base superalloy fatigue crack initiation and propagation

15 p2761 A70-32381

Co base superalloys for aircraft structures and parts, discussing temperature stability, corrosion resistance, creep, fatigue and strength

16 p2932 A70-33705

Al effects on B and Cr diffusion in protective coating on Cr-Ni heat resistance alloy, noting thermochemical kinetics for homogeneous layers

17 p3125 A70-35405

Sodium sulfate induced accelerated oxidation of Ni and superalloys, investigating thermodynamics and reaction mechanism

18 p3272 A70-36037

Ni-Al-Nb superalloy, determining temperature effect on phase relationships in Ni-rich portion of phase diagram

18 p3273 A70-36041

Heat resistant alloys technology, surveying various metals, mechanisms and characteristics

18 p3276 A70-36307

Ni superalloys for gas turbine engines, discussing chemical composition, microstructure, strength, solidification, etc

[ASME PAPER 70-GT-24]

18 p3278 A70-36831

Fluxless paste for thermomodification calorizing stainless and heat resistant steels and alloys

19 p3434 A70-37459

High vacuum effects on creep properties of single crystal low carbon nickel base superalloy

19 p3451 A70-37705

Long structural shape production for titanium and super alloys, discussing rolling, extrusion, drawing, frictionless forming and filler techniques

19 p3437 A70-38420

Carrying capacity of heat resistant steel turbomachine elements, discussing plastic deformation and cyclic load effects, breakdown load determination, stress analysis, etc

19 p3547 A70-38432

Soviet papers on heat resistant alloys and steels structure by electron microscopes

20 p3644 A70-39036

Ni-Cr heat resistant alloys structural transformation kinetics under aging, creep and operational conditions, discussing solid solution decomposition, hardening phases coagulation and dissolution, etc

20 p3645 A70-39037

Solidification and composition model of macroscopic freckles in nickel base superalloys single crystals

20 p3646 A70-39101

Optimum conditions and methods for vacuum diffusion welding of heat resistant alloys, removing thermodynamically stable surface oxide films by gaseous reaction products

20 p3636 A70-39197

Hot corrosive environment effect on stress rupture and fatigue strength of Ni heat resistant alloy used in gas turbine rotating blade

20 p3647 A70-39241

High temperature Ni base superalloy stress-rupture life dependence on casting variables and section size

20 p3648 A70-39413

Creep resistant Ni-base superalloys ductility and thermal shock resistance improvement by precision casting technique, producing columnar grain and single crystal structures

20 p3648 A70-39415

High temperature Ni, Co and Fe alloys for gas turbines, examining sulfidation-oxidation corrosion test methods

20 p3651 A70-39971

Cold metal working techniques, describing electromagnetic, explosive, ultrasonic, high velocity hammering, stretch forming, deep drawing and superalloy shaping

20 p3639 A70-40445

Stacking faults in gamma prime precipitation hardened high temperature Ni base alloys, relating fault energy to strength

22 p4053 A70-42728

Ni base superalloy for gas turbines, describing heat treatment for precipitation hardening

22 p4055 A70-43099

Surface degradation by oxidation, temperature fluctuations and hot corrosion of Ni- and Co- base superalloys in gas turbine engines

22 p4057 A70-43574

Light rare earth metals improving Mg alloys, Al alloys, Cu alloys and superalloys

22 p4057 A70-43575

Step-amplitude stress cycle program effects on durability of heat resistant alloy for turbine blades under cyclic loading

23 p4204 A70-43934

Statistical analysis of durability data of heat resistant alloys for gas turbine engines, using long term strength tests of melts in mass production

23 p4204 A70-43940

Ni base superalloys gamma prime phase long range order parameter measured by X ray diffraction

23 p4207 A70-44423

Superalloys dispersion strengthening and age hardening by mechanical alloying

24 p4341 A70-45246

Notch sensitivity dependence on plastic strain in Al alloy, heat resistant steels and Ni alloys under tensile tests at room temperature

24 p4360 A70-45827

High purity Cr-Ni heat resisting steels, investigating phase transformations with microhardness measurements magnetic analysis, X ray diffraction and microstructure examination

24 p4362 A70-46181

High temperature coatings of high melting point alloys on graphite, determining optimum fabrication conditions

24 p4368 A70-46339

Heat resistant alloys with metal coatings applied by diffusion in vacuum, investigating structure and fatigue strength at high temperatures

24 p4364 A70-46342

HEAT SHIELDING

NT REENTRY SHIELDING

Ultrasonics inspection applied to reentry vehicle heat shields and composite materials, verifying anomalies by microscopic area examination

01 p0097 A70-10016

Blunt and conical body optimum heat shield shapes for Jupiter atmospheric entry, noting shallow flight path

[AIAA PAPER 68-1150]

01 p0195 A70-10827

Quartz-Fiberfrax heat shield tests for Thor booster at high radiative heating rates, noting optimum material performance dependence on loose stitching

01 p0129 A70-10850

Energy partitioning process under strong shielding with debris acting as energy sink

06 p1130 A70-17181

Elastomeric silicone ablator reinforced by carbon cloth or fibers for Venus entry heat protection

[AIAA PAPER 70-201]

06 p1157 A70-18086

Ablation of heat shielding materials subjected to superorbital reentry conditions, noting dependence on heating rate to surface

[AIAA PAPER 70-202]

06 p0970 A70-18100

Massive blowing effect on stagnation point radiative energy transfer of ablative heat shield during planetary entry at hypersonic velocities

[AIAA PAPER 70-203]

06 p0971 A70-18101

Full scale R/V flight test base pressure data for slender cones with ablative heat shields, considering mass flow and addition effects

[AIAA PAPER 70-109]

06 p0973 A70-18148

Ablation, transmission transparency and embrittlement of heat shield materials for Voyager tested under simulated Mars entry conditions

07 p1395 A70-19885

Refurbishable ablative thermal protection for reusable lifting reentry vehicles

[AIAA PAPER 70-277]

07 p1397 A70-20386

Thermal control coatings as solar reflectors for spacecraft heat dissipation

08 p1527 A70-21357

Thermal radiation shield influence on stationary radiative heat transfer in closed arbitrarily shaped two gray surface system

10 p1966 A70-23865

Line source technique for ablative heat shield materials thermal conductivity measurements, comparing vacuum and atmospheric test results

[AIAA PAPER 69-1013]

11 p2051 A70-26142

Nonisothermal burn-up rates of graphite surfaces in turbulent air flow under neutral gas shield estimated by measuring channel diameter

12 p2331 A70-27323

Blunt heat shield effectiveness for trailing payload in reentry capsules, discussing dynamic instability effect

[AIAA PAPER 70-563]

13 p2341 A70-29028

Boundary value problem of nonlinear one dimensional conduction in radiating heat shields, using perturbation and numerical methods

15 p2824 A70-31450

Heat shield analysis covering high temperature ablation interactions in conical anisotropic structure immersed in hypersonic environment

20 p3738 A70-40054

Dynamic response of distended carbon materials to shock loading defined by measuring equation of state, unloading behavior and spallation strength

20 p3657 A70-40263

Full scale R/V flight test base pressure data for slender cones with ablative heat shields, considering mass flow and addition effects

[AIAA PAPER 70-109]

21 p3745 A70-41753

Nonisothermal burn-up rates of graphite surfaces in turbulent air flow under neutral gas shield estimated by measuring channel diameter

21 p3952 A70-42064

Nonlinear one dimensional conduction in radiating heat shields, solving two point boundary value problem by asymptotic and numerical solutions

[ASME PAPER 70-HT-E]

22 p4121 A70-42422

Cracked Teflon heat shields ablative behavior for laminar and turbulent boundary layers in supersonic flow, describing heat transfer to substructure

23 p2827 A70-44585

Space shuttle structural design concepts and fabrication, tabulating structural and heat shield materials

[SAE PAPER 700768]

24 p4415 A70-45867

Environmental heat shielding for various sized Jupiter atmospheric entry probes

[AIAA PAPER 70-1324]

24 p4429 A70-45941

Heat transport conduction mode and earth as heat sink in solar atmosphere, discussing mesopause coldest region, turbulence and solar plasma-earth electromagnetic interactions

[AAS PAPER 69-622]

04 p0677 A70-14644

One dimensional Navier-Stokes equations solution for viscous heat conducting gas flow involving spherical sink for finite pressure at infinity

10 p1865 A70-24104

Local heat sink thermal processes on convectively cooled solid surface, noting applications to temperature measurement errors

12 p2333 A70-28112

Thermal anchoring of wire or rod components to heat sinks in cryogenic equipment in vacuum

14 p2584 A70-30501

Finned tube-sheet spacecraft radiator transient response for perturbations caused by power supply and heat sink temperature changes

22 p4123 A70-42519

Hypersonic airbreathers aerodynamic, structural and propulsive system interactions, discussing hydrogen fuel heat sink, airframe and engine cooling and airframe materials

[ICAS PAPER 70-16]

23 p4138 A70-44127

Thermal preconditioning using radioisotope heat source to eliminate inertial sensor warmup time by maintaining aircraft navigation system at constant temperature

01 p0140 A70-10310

Heat sources in E region from electron temperature data analysis recorded by rockets during eclipses in July 1963

01 p0082 A70-11491

Aeronomy of Jovian upper atmosphere at pressures below 25 mb, discussing stratospheric heat sources, thermal emissivity, photochemistry of methane, ammonia, etc

02 p0366 A70-11804

Mean volume heat transfer coefficient, mean thermal head and coolant temperature determined for gas flowing through porous wall with internal heat source

03 p0605 A70-13474

Transient and steady state radiation heat flux sensors calibration by developing and evaluating heat flux source

03 p0606 A70-13558

Thermal model for Venus ionosphere, considering photoionization and solar wind influx for possible heat sources

03 p0575 A70-13981

Transient temperature distribution, thermal stresses and deformations in thin finite circular disk due to continuous point heat source, using linear thermoelasticity

[ASME PAPER 69-WA/PVP-6]

04 p0768 A70-14789

Chemical heat source combined with metals ignition properties considered for spacecraft heating during Mars nighttime landing

04 p0628 A70-15426

One dimensional stress waves propagation in elastoplastic medium, determining stress and velocity fields due to heat sources motion by characteristics method

04 p0776 A70-15447

Heat source temperature distribution on surface of infinite cylinder with zero temperature, presenting solution to boundary value problem

05 p0957 A70-16296

Heat conduction in anisotropic materials to measure thermophysical parameters, using pulsed point or line heat source

05 p0957 A70-16457

Temperature of contact surface between two homogeneous isotropic solid bodies determined by calculating plane heat source of steady three dimensional temperature field
05 p0958 A70-17014

Steady free convection over point and horizontal line heat sources in vertical magnetic field
06 p1120 A70-17519

Temperature distribution law for semiinfinite and infinite solid bodies under steady heat conduction in presence of concentrated heat source
06 p1178 A70-17872

Workpiece temperature during asymmetrical plane polishing by wheel face, deriving temperature distribution formulas for maximum heat source intensity
07 p1291 A70-18828

Reinforced graphite cloth composite for reentry heat shielding of SNAP 27 isotopic heat sources, describing structure, thermal and mechanical properties and ablative characteristics
07 p1332 A70-18933

Temperature stress in ring-like plate caused by point heat source, discussing thermoelastic problem
07 p1413 A70-20147

Thermoelastic state of plate near foreign circular inclusion, assuming heating by uniformly distributed sources and ideal plate-inclusion thermal contact
08 p1587 A70-21171

Transient thermal stresses in plates with distributed heat source and heat exchange with arbitrary time dependent surroundings
08 p1593 A70-21623

Solar wind heating, determining roles of various energy sources from Explorer 34 observations
09 p1755 A70-22511

Temperature field in infinite plate with disk shaped inclusion and stationary point heat source determined, allowing for heat transfer conditions
09 p1778 A70-23082

Temperature field distribution in long thin narrow plate composed of materials differing in thermophysical characteristics, creating field by moving heat source on plate
09 p1791 A70-23723

High power CW carbon dioxide laser design and operation for use as heat source in metal fusing, welding and cutting
10 p1897 A70-23816

Heat sources effect on pressure and velocity of supersonic flow, discussing iteration procedure and asymptotic expansion
10 p1799 A70-24125

Integrated circuits involving long-strip heat source surrounded by multiple layers, expressing temperature distribution by Fourier transformation obtained in integrals
10 p1850 A70-24620

Venus clouds self consistent radiative-convective model with sun as heat source
11 p2107 A70-25647

Waves and mean currents excitation in stratified fluid due to moving heat source, studying effect on mean motion
11 p2036 A70-26167

Semiinfinite elastic body with instantaneous heat source on surface, analyzing temperature and thermal stress distributions
11 p2139 A70-26406

Two dimensional dynamic thermoelastic problem for thin plates with internal heat sources solved by integral Laplace and Fourier transforms
12 p2323 A70-27337

Radiative energy transfer in hydrogen plasma having uniform heat source and bounded by parallel black plates
12 p2278 A70-27695

Radiating drop unsteady vaporization or growth for uniformly distributed internal heat sources, discussing gas temperature distribution and diffusion thermal effect
13 p2521 A70-29417

Real time Apollo lunar module thermal mission data analysis using computer programs
14 p2653 A70-30774

Natural convection wake from heated horizontal line source in liquids and in air, determining temperature field in plume above wires
15 p2825 A70-31817

Positive/negative curvature shells local stresses due to concentrated loads and heat sources, deriving approximate solutions
15 p2817 A70-32161

Point heat source generation of thermal stresses in elliptical plate with circular hole, using functions of complex variable for stress field determination
15 p2818 A70-32182

Plastic deformation zones at crack tip considered as distributed heat sources, using stress and strain distribution solutions
17 p3191 A70-35463

Stationary heat conduction model of two cylinders abutting at ends with internal nonuniform temperature distribution
18 p3345 A70-36128

Venus atmospheric visible clouds circulation, determining zonal flow induced by moving heat sources
19 p3519 A70-38252

Unsteady temperature field in cylinder surrounded by thin shell under uniformly distributed heat sources
20 p3737 A70-39640

Thermal preconditioning unit using radioactive isotope heat source for temperature control of inertial navigation system
20 p3671 A70-40059

Radiative heat transfer between concentric spheres separated by absorbing-emitting medium with heat sources, deriving approximate solution
20 p3739 A70-40294

Laminar convective flow from linear heat source along vertical plate, solving numerically for incompressible fluid by boundary layer approximation
20 p3614 A70-40403

Apollo 11 fines thermal conductivity under vacuum, using line heat source technique
21 p3913 A70-41647

Reentry protection for radioisotope heat sources, using thermal switch of composite ceramic foam with metal impregnants
22 p4054 A70-42958

Nonlinear distributed sources induced diffusion, calculating relationship between source intensity and maximum temperature or mass concentration field
24 p4380 A70-46034

HEAT STORAGE
Orbital mission solar energy power conversion system, discussing heat transfer processes for storage feasibility
21 p3951 A70-41852

HEAT TESTS
U HIGH TEMPERATURE TESTS
HEAT TOLERANCE
Vasopressin antidiuretic hormone effects on evaporative body weight loss during heat exposure
01 p0020 A70-10516

Gas chromatography study of fatty acids and polar lipids of thermophilic filamentous bacterial masses from hot Yellowstone Park springs
01 p0021 A70-10791

Cross adaptations of physiological functions, discussing results for heat, altitude and cold adapted animals
02 p0242 A70-12824

Cardiovascular responses to sustained high skin temperature in resting men noting dizziness, impaired vision and extracutaneous vasodilatation
03 p0429 A70-14162

Evaporative weight losses by sweating in man exposed to warm environment as function of time, including graphical method for heat storage prediction
03 p0430 A70-14164

High temperature effects on pilots psychomotor performance and physiological function, discussing measurements taken during complex tasks
06 p0999 A70-17290

Heat accumulation, oral temperature and heart rate recovery of subjects in various thermal environments
10 p1810 A70-24034

Physiological reactions of humans to orthostatic heat tolerance and natural acclimatization in summer and winter using tilt-table test and bicycle ergometer
12 p2169 A70-27656

Thermostability and survival rates of white mice in ambient medium with temperature variations
13 p2351 A70-29332

Physiological indices criteria for human thermal stress tolerance, discussing rectal temperature, body surface condition, body temperature and local cooling effects
13 p2351 A70-29332

Solid state laser active element lateral surface microprofile effect on heat endurance
16 p2929 A70-34220

Soviet papers on physiological adaptation to heat and cold covering thermoregulatory reflexes, bionics, temperature gradients, hypothalamus, gas exchange, heat generation, etc
18 p3217 A70-36526

Extreme heating effects on polypnea reaction in aquatic birds
18 p3219 A70-36537

Respiratory activity of internal organs and skeletal muscles in rats exposed to long term heat and cold
18 p3220 A70-36546

Thermal thermesthesiometer for skin heat sensitivity studies
19 p3368 A70-37806

Heat stress effects on serial reaction time in subjects performing visual tasks
19 p3361 A70-38053

Astronauts medical examination, using thermal load as functional and diagnostic test
20 p3575 A70-40195

Intracellular shifts in body fluids and dehydration tolerance in burro, comparing water content of desert animals
21 p3766 A70-42157

Syncope prevention in orthostatic heat test by inflating cuffs around legs and lower abdomen
24 p4306 A70-45331

HEAT TRANSFER
NT AERODYNAMIC HEAT TRANSFER
NT CONDUCTIVE HEAT TRANSFER
NT CONVECTIVE HEAT TRANSFER
NT HYPERSONIC HEAT TRANSFER
NT LAMINAR HEAT TRANSFER
NT RADIATIVE HEAT TRANSFER
NT SUPERSONIC HEAT TRANSFER
NT TURBULENT HEAT TRANSFER
Heat and mass transfer in Couette flow of partially ionized symmetric diatomic gas for chemical equilibrium and chemically frozen flow cases
01 p0060 A70-10290

Laminar boundary layer analysis of heat and mass transfer in dispersed two phase flow over heated surface
01 p0214 A70-10293

Wet vapor flow with/without inert diluent, assuming momentum and heat transfer between phases according to Stokes law and Nusselt number of unity
01 p0061 A70-10332

Transient heat transfer near two dimensional stagnation point in viscous incompressible fluid steady flow
01 p0002 A70-10457

Hypersonic dissociated laminar boundary layers with/without heat transfer calculated by integral method for case of thermodynamic equilibrium
01 p0003 A70-10933

Aerodynamics, heat and mass transfer in vapor condensation from humid air on flat plate in longitudinal flow in asymmetrically cooled slot
01 p0004 A70-11178

Organic liquid nucleate pool boiling experiments determining stresses, surface tension, viscosity and gravitation relationships to bubble shape and microlayer formation
01 p0218 A70-11180

Unsteady heat transfer from porous flat plate with impulsive motion and rising temperature, analyzing compressible boundary layer equations using Laplace transform
01 p0067 A70-11390

Weak shock waves relaxation time and amplitude and acoustic velocity as functions of thermorelaxing media
01 p0068 A70-11588

Structural support strut design for cryogenic propellant tanks to optimize load carrying capability and heat transfer characteristics
02 p0306 A70-11942

U-shaped combustion chamber two dimensional model for studying factors influencing flame spread and stabilization and heat transfer in gas turbines
02 p0355 A70-12257

Heat transfer, three dimensional boundary layers and high speed flow calculations, utilizing original entrainment equation
02 p0284 A70-12341

Low temperature high sensitivity temperature compensated heat flux transducers to measure conductive, convective and radiative heat transfer
02 p0303 A70-12740

Monograph on application of semiclosed thermopion system to gas turbine blade cooling, covering heat transfer and temperature distribution analysis, etc
03 p0551 A70-12992

Book on flow and thermal boundary layers covering laminar and turbulent flow velocity profiles, Prandtl equation, heat transfer problems, etc
03 p0465 A70-13015

Heat transfer effects on corrosion behavior of stainless steel in boiling water, noting stress corrosion cracking increase with chloride ion contamination
03 p0507 A70-13137

Soviet bibliography on heat and mass transfer covering thermodynamics, heat conduction, convection and radiation, phase and chemical transitions, aerodynamics, geophysics, etc
03 p0605 A70-13392

Heat transfer and flux density during bubble boiling of liquid oxygen employing simulated weak gravitational fields
03 p0605 A70-13393

Unsteady heat transfer theories reviewed to assess steady state heat transfer relations applicability
03 p0605 A70-13401

Incompressible gas turbulent jet flow characteristics in subsonic wind tunnel, stressing pressure distribution in recirculation region for interpreting heat transfer in separated flows
03 p0593 A70-13495

HF pressure oscillations during heat transfer to n-heptane at various flow rates and pressures, studying film or bubble boiling associated with oscillations
03 p0605 A70-13516

Heat transfer under conditions of forced convection from flat plate in laminar flow, considering plate surface temperature arbitrary variation in time
03 p0605 A70-13518

Integral method for studying wall heat transfer influence on compressible boundary layer on cone at angle of attack in supersonic flow
03 p0409 A70-13953

Free stream turbulence effect on heat transfer in circular cylinder stagnation region 03 p0469 A70-14216

Heat transfer in steady state flow of electrically conducting incompressible viscous fluid in annular channel between coaxial circular cylinders under magnetic field 03 p0608 A70-14335

Ablative throat nozzle performance, plotting change in thrust, exit pressure and Mach number as function of ablated to initial area ratio 03 p0410 A70-14336

Thermochemical relaxation influence on shock heated plasma gases via heat transfer experiments on ionized Ar, molecular nitrogen and carbon dioxide 03 p0536 A70-14366

Thin film heat gauge for measuring thermal transport from plasma to end wall of shock tube, discussing measurements in high temperature Ar 03 p0496 A70-14381

Electron heat transfer to spherical body in nonequilibrium quiescent plasma by asymptotic solution [ASME PAPER 69-WA/HT-56] 04 p0727 A70-14793

Heat transfer in partially ionized argon plasma flowing in water cooled circular tube as function of temperature, Reynolds number and tube entrance diameters [ASME PAPER 69-WA/HT-54] 04 p0780 A70-14795

Heat transfer to insulator wall of linear MGD accelerator attached to shock tube, comparing measurements with Hartmann boundary layer analysis [ASME PAPER 69-WA/HT-53] 04 p0781 A70-14796

Heat transfer rates to stagnation point of hemisphere in supersonic high enthalpy low density nitrogen plasma flow [ASME PAPER 69-WA/HT-49] 04 p0614 A70-14799

Nonlinear rarefied Couette flow with heat transfer in polyatomic gases, using kinetic theory of gases [ASME PAPER 69-WA/HT-39] 04 p0781 A70-14803

Transient heat conduction solution by finite element methods application to nonlinear boundary condition problems [ASME PAPER 69-WA/HT-36] 04 p0781 A70-14804

Interpolation method for predicting and correlating heat transfer in rarefied gases, yielding correct limiting results in free molecular and continuum regimes [ASME PAPER 69-WA/HT-30] 04 p0782 A70-14808

Hypersonic blunt body heat transfer prediction, including coupled effects of real gas behavior and slip boundary conditions [ASME PAPER 69-WA/HT-28] 04 p0614 A70-14809

Nonlinear boltzmann equation for heat transfer in rarefied gases between parallel plates at different temperatures using Monte Carlo method [ASME PAPER 69-WA/HT-23] 04 p0782 A70-14811

Heat transfer to absorbing fluid by coupled thermal radiation and laminar forced convection at pipe entry region, considering gray and nongray absorption [ASME PAPER 69-WA/HT-16] 04 p0783 A70-14818

Thermal damping in gas-filled composite materials during impact loading due to heat transport, discussing role in impact energy dissipation [ASME PAPER 69-APM-V] 04 p0712 A70-14867

Thermal steady state characterization of isotopic radioisotope thermoelectric generator, discussing design features and heat transfer models for operating temperatures and output performance [ASME PAPER 69-WA/ENER-12] 04 p0717 A70-14897

Heat transfer from two dimensional hypersonic low density stream to wedges and sharp flat plates at expansion angles of attack 04 p0615 A70-14944

Semifocusing color schlieren systems for quantitative investigations of flows in fluid mechanics and heat transfer, including photographs of boundary layers 04 p0690 A70-15029

Gravitational effects on heat transfer during evaporation and condensation processes in heat pipe, discussing conditions in Na filled heat pipe [DGLR-69-44] 04 p0785 A70-15171

Viscous gas self similar channel flow with heat transfer at wall corresponding to fixed Mach number profile in all channel cross sections 04 p0673 A70-15231

Circulation model of joint ocean-atmosphere system constructed with ocean and atmospheric models, discussing heat transfer by ocean currents 04 p0680 A70-15297

Equations and techniques to analyze transient heat and mass transfer characteristics of packed adsorption beds for spacecraft life support systems 04 p0786 A70-15316

Transient one dimensional heat transfer analysis demonstrating infiltrant melting effect on self heat-retarding porous metal composite during surface melt layer formation 04 p0709 A70-15414

High temperature thermal transport and ionization relaxation in Ar from measurements by thin film surface thermometer in high pressure shock tube end wall 04 p0787 A70-15607

Heat transfer in MHD Couette flow influenced by wall electrical conductances with suction 05 p0886 A70-15823

Heat and momentum transfer efficiency of thermal convection, calculating eddy coefficients for vertical transfer 05 p0831 A70-15876

Heat and mass transfer in reacting laminar boundary layer over porous cylinder with propane injection in wind tunnel experiments 05 p0956 A70-16289

Vorticity effects on drag friction and heat transfer near stagnation point of supersonic jet impinging on obstacle 05 p0833 A70-16290

Soviet bibliography on heat and mass transfer covering thermodynamics, heat conduction, convective and radiant heat transfer, phase and chemical transformations, combustion, etc. 05 p0957 A70-16297

Heat transfer data for rotary piston and conventional piston engines, studying compression energy losses due to working fluid leakage 05 p0897 A70-17002

Flow disturbance calculation for heat transfer between boundary layer flows and adjacent walls modified to allow for wall attachment of thermal boundary layer 05 p1032 A70-17228

Skin friction law for compressible boundary layer allowing calculation of coefficient of friction for isothermal walls with heat transfer 06 p1033 A70-17232

Heat transfer boundary conditions determination in studying heat protective coatings effectiveness, discussing measurement methods for stagnation temperatures and heat fluxes from exhaust gases 06 p1173 A70-17662

Collection of papers on heat and mass transfer theories, measurements and applications 06 p1174 A70-17676

Heat transfer to hydrogen calculated with reference to design of cooled rocket nozzles and combustion chambers 06 p1174 A70-17677

Laminar sublayer resistance to momentum and heat transfer, noting effects of Prandtl number and surface roughness using mathematical model and experiments 06 p1034 A70-17680

Collection of papers on heat and mass transfer, Volume 2, covering free convection, forced fluid flow, nozzle flow, boundary value problems, etc. 06 p1174 A70-17682

Heat transfer from constant temperature and heat flux surfaces to viscous fluids with high Prandtl numbers, considering transient and steady state flow 06 p1176 A70-17687

Skin friction and heat transfer on flat plate in high velocity laminar motion with mass transfer for any free stream and injected gas combination 06 p1176 A70-17689

Unheated solid starting length effect on skin friction and heat transfer characteristics in incompressible transpired laminar boundary layer on flat plate 06 p1035 A70-17691

Heat and mass transfer in passive transpiration cooling system with two moving boundaries, observing porosities and radius of curvature effects 06 p1176 A70-17692

Heat and mass transfer across laminar boundary layer around stagnation line of cylinder in crossflow affected by free stream turbulence intensity 06 p1176 A70-17693

Heat transfer during nucleate boiling, discussing transfer from heated surface to superheated liquid layer and exchange on gas-liquid interface 06 p1176 A70-17695

DC electric arc with superimposed axial subsonic gas flow breakdown voltage and anode heat transfer using high speed photography 06 p1177 A70-17697

Sweeping W wire probe in rotational high temperature plasmas for local heat transfer measurement 06 p1120 A70-17699

Heat transfer in dense high temperature plasma due to drift waves instability at trapped electrons 06 p1121 A70-17802

Melting zone evolution in thermal history of earth, investigating upper mantle heat transfer effect on layer motion due to radioactive decay 06 p1056 A70-17804

Unsteady calorimetric sensor for measurement of heat transfer between gas jets and solid targets 06 p1064 A70-17857

Ignition of single particles of light metal hydrides, considering combustion stages and heat transfer [WSCIPAPER 69-47] 06 p1179 A70-17984

Static pressure, temperature profiles, heat transfer and optical data for turbulent boundary layer-shock interaction with/without injection [AIAA PAPER 70-91] 06 p1042 A70-18210

Unsteady nonlinear molecular flow problems concerning plane Couette flow, heat transfer between parallel plates and density discontinuity propagation solved by Monte Carlo method 06 p1113 A70-18321

Plane Couette flow and heat transfer between parallel plates problems treated by generalizing BGK model and applying variational principle to linearized Boltzmann equation 06 p1048 A70-18323

Monte Carlo method applied to Boltzmann collision integral in solving heat transfer between plates at different temperatures in elastic spheres gas 06 p1183 A70-18324

Plane Couette flow and heat transfer problem numerical solution, using Krook kinetic equation and Maxwell boundary condition 06 p1048 A70-18326

Rarefied gas flows and heat transfer between parallel plates, concentric cylinders and spheres in presence of fractionally accommodating boundaries 06 p1049 A70-18330

Transition regime gas flows using Navier-Stokes equations and boundary conditions set, considering heat transfer, torque and drag in spherical geometry 06 p1049 A70-18331

Aerodynamic forces and heat transfer on shielded flat plates in free molecular flow calculated by Monte Carlo technique 06 p0981 A70-18358

Free molecular heat transfer from sphere at rest in rarefied monatomic gas solved for Krook model of Boltzmann equation 06 p1183 A70-18375

Drag and heat transfer predicted by kinetic theory for rarefied gas flow over sphere at low Mach numbers, analyzing flow field 06 p0984 A70-18381

Wall roughness effects on model heat transfer in high Reynolds number shock tunnel milliseconds flow using thick film fast response calorimeter 06 p1070 A70-18446

Heat transfer effects during solidification on mechanical properties of Al alloy castings compared with sand castings [ASM PAPER W9-7.2] 07 p1293 A70-18998

Heat transfer at inlet edge of turbine blade based on wind tunnel study of cylinder in air flow 07 p1362 A70-19061

Velocity fields and turbulent pulsations effects on heat transfer in gas flow past plate with rectangular protrusion using wind tunnel tests 07 p1254 A70-19063

Wind tunnel study of heat transfer on smooth plate surfaces in longitudinal air flow using intermittently insulated calorimeter 07 p1279 A70-19065

Turbulence effect on heat transfer in flow carrying section of turbine engines, considering flow velocity pulsations frequency characteristics 07 p1362 A70-19067

Heat transfer from composite propellant burning zone to regressing surface measured using microjet burner 07 p1359 A70-19587

Heat exchange in laminar and turbulent boundary layers on plate for arbitrary heat flux distribution allowing for initial unheated plate segment 07 p1423 A70-19657

Heat transfer measurement in ionized high temperature gas flows with discharge shock tube and thermal sensors 07 p1283 A70-19663

Flow properties and heat transfer of wall jet spreading over permeable surface with suction and blowing 07 p1258 A70-19720

Streamwise directed vortices and crosshatched surface roles in heat transfer and ablation processes of reentry vehicles 07 p1394 A70-19729

Heat transfer during plane air jet impact into concave surface with parabolic profile, determining specific thermal fluxes by electrocalorimetry 07 p1189 A70-19810

Radiation effect on heat transfer during film boiling in forced convection boundary layer of liquid flow past plate, noting vaporization temperature 07 p1423 A70-19812

Functions describing spatial-temporal temperature distribution in hyperbolic partial differential equations for nonstationary heat exchange between fluid flow and boundary wall 07 p1423 A70-19839

Heat transfer from impinging gas jets on enclosed concave surface, noting self recirculation currents within cavity 07 p1425 A70-20413

Heat transfer from inner wall of annular ducted cylindrical body cooled by liquid nitrogen, discussing effects of Teflon, asbestos and vaseline coating and thickness effects 08 p1596 A70-20577

Multiple pass tube heat exchangers efficiency, solving energy and heat transfer equations from fluids homogeneity and constant thermal capacity considerations 08 p1596 A70-20613

Heat exchange at stagnation point of subsonic and supersonic axisymmetric jets interacting with perpendicular plane partition, allowing for turbulence 08 p1482 A70-20919

Time dependent height of lower boundary of subinversion stratus clouds using atmospheric moisture and heat transport equations 08 p1537 A70-21102

Vertical motions and turbulent exchange influence on height variation of stratus clouds based on atmospheric moisture and heat transport equations 08 p1537 A70-21103

Heat exchange during solidification of castings in molds, studying thermal properties effect for achieving constant mold surface temperature 08 p1506 A70-21141

Variational problem of determining optimal heat transfer from gas flow to porous plate boundary layer 08 p1597 A70-21176

Computer program predicting thermal response of fusion welding tooling chill bars and holding fixtures, simulating moving heat source and contact 08 p1508 A70-21487

Thermal boundary layer thickness and Nusselt number approximations for heat transfer in laminar flow along flat plate with power law heat flux distribution 08 p1599 A70-21583

Transient thermal stresses in plates with distributed heat source and heat exchange with arbitrary time dependent surroundings 08 p1593 A70-21623

Heat transfer in axially symmetric laminar viscous boundary layer flow due to rotating bodies of revolution, obtaining temperature distribution 08 p1485 A70-21698

Heat transfer in MHD channel flow of viscous incompressible rarefied gas with slip flow and temperature jump boundary conditions 08 p1554 A70-21769

Tensor conductivity, magnetic field and electric field effect on heat transfer in MHD channel flow, solving for temperature and Nusselt number 08 p1554 A70-21773

Boiling heat transfer enhancement inside tubes using integral fins, discussing water film retention on walls 08 p1599 A70-21825

Tape-generated swirl flow of single phase water investigated for heat transfer and pressure drop characteristics [ASME PAPER 68-WA/HT-3] 08 p1600 A70-21829

Heat transfer augmentation in tubes by surface roughness and twisted tape generated swirl flow 08 p1600 A70-21830

Correlation functions for resistance to heat and momentum transfer in viscous sublayer at rough walls defined for varied geometry flows [ASME PAPER 69-HT-2] 08 p1486 A70-21833

Diabatic mean profile forms in atmospheric surface layer, establishing profile relationships based on log-linear analysis 08 p1540 A70-21973

Local heat transfer to gas mixed with graphite particles described for variable temperature differences and wall temperatures 09 p1787 A70-22174

Heat and mass transfer in binary turbulent boundary layer during natural convection on vertical surface, allowing for diffusive heat conduction 09 p1787 A70-22267

Two dimensional supersonic wake transition characteristics noting effect of heat transfer from vehicle or model body 09 p1605 A70-23184

Gravitational effects on heat transfer during evaporation and condensation processes in heat pipe, discussing conditions in Na filled heat pipe 09 p1789 A70-23427

Taylor-Goertler vortex formation effect on heat transfer through boundary layer on concave wall [ASME PAPER 69-HT-3] 09 p1790 A70-23556

Boundary layer equations with heat transfer for laminar and turbulent incompressible flows about two dimensional and axisymmetric flows, using finite difference method [ASME PAPER 69-HT-7] 09 p1663 A70-23560

Heat transfer from circular cylinder in rarefied gas flow at low Mach number, using B-G-K model of Boltzmann equation 09 p1791 A70-23582

Heat and mass transfer during liquid surface evaporation in vacuum, calculating temperature field on basis of heat balance level 09 p1791 A70-23717

Unsteady heat transfer on electronic analog model, using installation prescribing variable boundary conditions of third kind 10 p1966 A70-23872

Air flow turbulence intensity and plug effect influence on local heat exchange on cylinder surface 10 p1797 A70-24028

Supersonic flows over flaps and backward facing steps, using steady state heat transfer measurement

technique involving uniform heat flux dissipation at model surface 10 p1798 A70-24120

Wall heat transfer effect on expansion following Chapman-Jouget detonation wave, calculating pressure and gas velocity profiles from friction coefficient 10 p1869 A70-24423

Heat transfer influence on three dimensional boundary layer separation on walled ellipsoid of revolution 10 p1870 A70-24781

Heat transfer from gas to gas turbine buckets, determining angle of attack and rotation influences by extending transfer equation 10 p1930 A70-25140

Heat transfer at inlet edge of turbine blade based on wind tunnel study of cylinder in air flow 10 p1930 A70-25212

Velocity fields and turbulent pulsations effects on heat transfer in gas flow past plate with rectangular protrusion using wind tunnel tests 10 p1871 A70-25214

Wind tunnel study of heat transfer on smooth plate surfaces in longitudinal air flow using intermittently insulated calorimeter 10 p1970 A70-25216

Turbulence effect on heat transfer in flow carrying section of turbine engines, considering flow velocity pulsations frequency characteristics 10 p1930 A70-25218

Naphthalene rotating disk with confronting stationary disk, investigating heat and mass transfer dependence on shroud dimensions, measuring flow types 11 p2060 A70-26410

Flat plate normal to two dimensional impinging air jet, investigating heat /mass/ transfer structure using naphthalene method 11 p1977 A70-26411

Gas-filled composites under impact loading, studying thermal damping due to heat transfer between compressed gas and solid structure 11 p2140 A70-26480

Dimensionless parameters associated with heat transport within living tissues using biothermal model 11 p1992 A70-26513

Heat exchange in linear vortex plasmatron with bilateral ejection, noting dependence on electrodes geometry and gas flow rates 11 p1984 A70-26737

Coaxial plasmatron pulsation on intensity of heat exchange between high temperature nitrogen jet and axisymmetric body near critical point region of spherical bluntness 11 p1984 A70-26739

SAE aerospace applied thermodynamics manual covering aerodynamics, fluid dynamics, heat transfer, materials properties, aerospace application engineering, etc 12 p2329 A70-26872

Quasi-isothermal heat transfer pipe design and operation 12 p2330 A70-27275

Electromagnetic effects on separation of turbulent MHD boundary layers allowing for heat transfer 12 p2278 A70-27324

Compressible turbulent plane Couette flow solution with variable heat transfer based on von Karman model extended to arbitrary wall temperature 12 p2211 A70-27839

Three-nodes analysis for thermal design of spinning spherical satellite using heat transfer equations in mathematical model 12 p2332 A70-28061

Heat transfer research /1968/ literature covering channel flow, boundary layer flow, separated flow, transfer mechanisms, convection, measurement techniques, etc 12 p2333 A70-28109

Unsteady heat or mass transfer to translating fluid sphere thermal boundary layer, determining analytical solution method accuracy 12 p2333 A70-28116

Heat transfer and flow stabilization dependence on initial shock wave reflection from conducting wall 12 p2213 A70-28228

Laminar multicomponent boundary layer for large injection and heat transfer, with particular reference to vehicle entry into planetary atmosphere 12 p2159 A70-28234

Transient heat transfer considered for thermal boundary layer over rotating disk following temperature change 13 p2519 A70-28493

Increased heat transfer for thermal coupling by interleaving fins in space applications 13 p2519 A70-28522

Mechanical seals ringing sound relationship with heat transfer and interfacial conditions, noting sliding surfaces temperature effect 13 p2417 A70-28611

Heat transfer in dense high temperature plasma due to drift waves instability at trapped electrons 13 p2460 A70-28653

Heat transfer in Z shaped regenerative heat exchangers with/without air mixing, determining parameters defining thermal efficiency 13 p2520 A70-28857

Heat energy transport mechanism in metallic plasma deposited coating, investigating role of elastic crystal lattice vibrations, electrons, molecules, etc 13 p2419 A70-28858

Heat transfer mechanism in foil-vacuum insulations, analyzing factors responsible for point of inflection on experimental temperature field curves 13 p2521 A70-28861

Heat transfer increase near stagnation point for turbulent jet impinging on paraffin coated plates used for flow visualization 13 p2521 A70-28866

Heat transfer at low Reynolds and Grashof numbers determined using constant temperature anemometric wire 13 p2521 A70-28952

Pressure distributions and heat transfer at wall calculated to investigate supersonic laminar reattachment 13 p2338 A70-28953

Steady diabatic complex lamellar gas flow, obtaining parameters by extending geometric theory of surfaces and curves in fluid flow theory 13 p2387 A70-29122

Free convection flow and heat transfer from semi-finite horizontal flat plate with time-oscillating temperature, using successive approximations process 13 p2522 A70-29537

Heat transfer and fluid mechanics - Conference, Stanford, California, June 1970 14 p2662 A70-30251

Strongly accelerated turbulent boundary layer, investigating free stream turbulence effect on heat transfer 14 p2564 A70-30252

Two dimensional incompressible turbulent boundary layer with mass addition and heat transfer, calculating temperature and velocity profiles by marching integration 14 p2564 A70-30261

Radiation effects on heat transfer in turbulent channel flow for small optical depths and optically thin limit 14 p2665 A70-30548

Heat transfer from acceleration induced boundary layer reverse transition, considering free stream turbulence effects 14 p2667 A70-31169

Supercritical pressure system heat transfer characteristics for cryogenic space oxygen storage and supply 14 p2667 A70-31342

Surface, volume and body center temperature of convex polyhedrons under steady heat transfer 15 p2825 A70-31624

Monograph on momentum, heat and mass transfer rates to vertical continuous cylinder moving through quiet fluid in forced and free convection 15 p2825 A70-31694

Heat transfer through axially symmetric boundary layer on moving circular fiber at uniform temperature 15 p2825 A70-31819

Heat exchange measurements between solid body and high enthalpy gas flow at stagnation point using electric arc heater 15 p2826 A70-32102

Rheological calculation of plate resistance and heat transfer in laminar flow of structurally viscous fluids 15 p2827 A70-32126

Heat transfer between incompressible fluid flow and insulated walls with time varying temperature at channel inlet, applying Laplace transforms 15 p2827 A70-32175

Heat exchange in laminar and turbulent boundary layers on plate for arbitrary heat flux distribution taking into account initial unheated plate segment 15 p2828 A70-32694

Swirling flow in unbounded space, investigating swirl intensity effect on heat transfer 15 p2828 A70-32857

Gas-particle mixture cascade flow over turbine blades, considering momentum/heat transfer and particle trajectories [AIAA PAPER 70-712] 16 p2835 A70-33569

Cryogenic single tubes transient cool-down by liquid hydrogen, deriving film boiling heat transfer correlation 16 p2998 A70-33621

Nuclear rocket nozzle cooling passages, discussing heat transfer and friction correlations for single-phase hydrogen turbulent flow [AIAA PAPER 70-661] 16 p2950 A70-33622

Gas phase chemical reactions effect on heat transfer to charring ablator, deriving numerical solution for multicomponent stagnation point flow [AIAA PAPER 70-869] 16 p2999 A70-33912

Lateral heat transfer along parallel conducting and radiating plates spaced by absorbing and isotropically scattering dielectric [AIAA PAPER 70-849] 16 p2939 A70-33916

Heat transfer in tungsten-tungsten and Armo Iron-Armo Iron specimens, confirming Bowden-Tabor model of elastoplastic events during cyclic engagement of surfaces
[AIAA PAPER 70-853] 16 p3000 A70-33920

Heat transfer and pressure drag of axisymmetric body in hypersonic flow, obtaining minimum energy nose and leading edge shapes by Pontryagin principle
[AIAA PAPER 70-825] 16 p3001 A70-33940

Instantaneous burning rates prediction methods based on flame structure model and steady state burning rate data as pressure and initial temperature functions
[AIAA PAPER 70-667] 16 p2971 A70-33949

Film boiling heat transfer from horizontal wires to water, using Nusselt condensation model
16 p3003 A70-34198

Turbulent flow in stratified fluids over flat plate, relating density profile curvature and heat transfer
16 p2895 A70-34242

Equilibrium air boundary layer flows at three dimensional stagnation points, discussing flow characteristics and real gas heat transfer parameters
[AIAA PAPER 70-806] 17 p3002 A70-34455

Two dimensional solidification of forced viscous flow over flat plate with constant heat removal
17 p3194 A70-34634

Convergent-divergent nozzle flow under influence of friction drag, determining heat transfer rate as function of nozzle geometry
17 p3194 A70-34694

Heat and mass transfer in flowing fluid, deriving conservation and constitutive equations, with application to boundary layer flow of gases
17 p3069 A70-35033

Anodes heat transfer in xenon short arc lamps
17 p3023 A70-35154

Atmospheric reentry nosetip shape changes supersonic flow, considering rough surface effects on heat transfer
[AIAA PAPER 70-827] 17 p3196 A70-35193

Optimum nozzle geometry for minimum heat transfer to convergent-divergent nozzle wall from high enthalpy flow
17 p3196 A70-35238

Nonstationary temperature fields and stresses in wedge shaped strip and thin plates with heat transfer for discontinuous boundary conditions
17 p3189 A70-35342

Transient heat and mass transfer in adiabatic regenerator, solving mathematical model in terms of Green functions
17 p3197 A70-35542

Fluid flow longitudinal temperature profiles for inclusion in heat transfer computer program
17 p3198 A70-35659

Sonic boom minimization through airstream alteration by force or heat fields and aircraft body shaping
[AIAA PAPER 70-903] 17 p3019 A70-35817

Critical heat flux density during annular channel internal heating, examining transfer crisis under forced motion of unheated water
18 p3345 A70-36111

Explicit differences scheme for heat and mass transfer differential equations
18 p3345 A70-36114

Steam-water jet discharge heat transfer features, examining critical region parameters from nozzle into submerged space with large counterpressure
18 p3345 A70-36117

Heat transfer across boundary between two stationary fluids, applying elastic wave theory in isotropic media
18 p3345 A70-36118

Heat transfer at flat melting surface under forced convection and laminar boundary layer solved by Karman-Pohlhausen method
18 p3347 A70-36502

Biophysical model of heat transfer from organism, describing adaptation to ambient temperature
18 p3218 A70-36531

Prolonged cold adaptation effect on heat transfer during recovery period after hypothermia in white rats
18 p3220 A70-36543

Repeated snow cooling effect on heat transfer in white rats during temperature homeostasis recovery after hypothermia
18 p3220 A70-36544

Ideal relativistic fluids adiabatic flow, investigating heat exchange effects within framework of special relativity
18 p3347 A70-36554

Heat transfer rates in short flow duration facilities /shock tubes/ from surface temperature measurement of solid exposed to flow
18 p3348 A70-36715

Heat transfer characteristics of flows between high speed rotating disk and parallel stationary shroud, discussing experimental facility and procedures
[ASME PAPER 70-GT-20] 18 p3349 A70-36865

Optimal control for one dimensional compressible gas flow, combustion and heat exchange, described by first order partial differential hyperbolic equations
19 p3402 A70-37240

Soviet papers on transfer phenomena in low temperature plasmas
19 p3480 A70-38180

Heat transfer in plasma flow incident normally on cylinder, examining laminar boundary layers in presence of turbulence
19 p3552 A70-38187

Heat transfer behind shock wave in air, oxygen or carbon dioxide flow past wedge, determining thermal fluxes vs wave velocity
19 p3405 A70-38188

DC plasma generator with Ar stabilized arc, investigating heat and mass transfer in jet discharge channel
19 p3481 A70-38189

Unsteady flow and heat transfer in viscous incompressible fluid due to infinite porous cylinder oscillations about axis with suction at surface
19 p3406 A70-38445

Heat transfer in boiling liquid from temperature field and temporal changes in liquid above heating surface, determining isotherms by laser interferometry
19 p3447 A70-38455

Radiation effect on heat transfer during film boiling in forced convection boundary layer of liquid flow past plate, noting vaporization temperature
20 p3736 A70-39259

Heat transfer during plane air jet impact into concave surface with parabolic profile, determining specific thermal fluxes by electrocalorimetry
20 p3736 A70-39260

Heat transfer from cylinder in axial air flow with induced turbulence of incident boundary layer, noting temperature effects
20 p3736 A70-39264

Heat exchange and temperature distribution between two liquids divided by plate, discussing possible errors
20 p3737 A70-39634

Heat fluxes from shock-heated gas to shock tube wall and wedge surface as function of Mach number, using platinum resistance thermometers
20 p3613 A70-40343

Heat transfer from gas to gas turbine buckets, determining angle of attack and rotation influences by extending transfer equation
20 p3694 A70-40345

Ducted laminar and turbulent diffusion flames, examining electric fields effect on heat transfer, geometry and velocity field
20 p3739 A70-40471

Stagnation point heat transfer of spherical cylinder in argon and air, developing electrically insulated calorimeter gage theory
21 p3941 A70-40774

Fusion welding cooling rates, peak temperatures and heating duration relationships to distance from fusion line predicted by theory for comparison with experiment
21 p3832 A70-40791

NonNewtonian fluids flow and heat transfer characteristics past flat plate, determining velocity and temperature distributions
21 p3806 A70-40900

Space technology and heat transfer - ASME Conference, Los Angeles, June 1970, Part I
21 p3927 A70-40976

Wall heat transfer for partially ionized argon laminar flow within square channel conducting walls with and without transverse magnetic field
21 p3856 A70-41032

Reentry vehicle with multicomponent gas mixture injection, calculating heat and mass transfer correlations for stagnation point flow
21 p3945 A70-41033

Local heat transfer between heated circular cylinder and air in transverse slip flow at low Reynolds and Mach numbers
21 p3945 A70-41035

Two dimensional compressible laminar MHD boundary layer flow across flat plate with heat transfer, considering continuity, momentum and energy equations
21 p3856 A70-41039

Heat transfer mechanism during fluid evaporation in porous wick structure contacting heat pipe surface
21 p3946 A70-41042

Pt and Ag surface effects on LOX nucleate boiling heat transfer, considering embedded abrasives relationship to hysteresis
21 p3947 A70-41056

Interfacial instability effect on heat transfer to liquid nitrogen drops undergoing film boiling on flat Al surface, obtaining vaporization rates and times
21 p3948 A70-41203

Nucleation phenomena associated with boiling heat transfer in pure liquids at solid heating surfaces
21 p3948 A70-41205

Water and alkali metal boilers, predicting helical-flow-promoting inserts effect on pressure drop penalties by constant slip model
21 p3949 A70-41308

Pool film boiling heat transfer data from small spheres, noting curvature effects and similarities of flat plate, cylinder and sphere theoretical analyses
21 p3949 A70-41310

Tube heat transfer augmentation by helical vane inserts, noting Reynolds number and mass flow rate effects
21 p3949 A70-41318

Book on heat transfer covering supersonic flows with imbedded separated regions, unsteady convection and thermodynamics in channels, friction in turbulent pipe flow, etc
21 p3949 A70-41371

Heat transfer measurements based on optical methods with temperature dependence of refractive index making temperature field visible
21 p3826 A70-41373

Heat transfer and skin friction in quasi-steady axisymmetric turbulent pipe flow of incompressible fluid with variable physical properties
21 p3808 A70-41375

Mass force fields effects on flow phenomena from heat transfer and hydraulic resistance analyses
21 p3951 A70-41764

Heat transfer and friction effects on flow parameters in nozzle with independent cooling
21 p3951 A70-41769

Orbital mission solar energy power conversion system, discussing heat transfer processes for storage feasibility
21 p3951 A70-41852

Arc ignition and cathode spot movement dynamics of thermionically emitting cathode surfaces in heat feedback plasma
21 p3859 A70-41903

Electromagnetic effects on separation of turbulent MHD boundary layers allowing for heat transfer
21 p3860 A70-42065

Thermal design of high altitude balloons and instrument packages, analyzing vertical motion dependence on heat transfer and radiation environment
21 p3755 A70-42077

Upstream mass injection effects on downstream heat transfer of supersonic reacting boundary layer
21 p3952 A70-42079

Charge separated and quasi-neutral solutions of electron heat transfer to spherical body in quiescent nonequilibrium plasma, noting diagnostic applications
21 p3860 A70-42080

Heat transfer in closed partially liquid filled steady state porous systems, testing linear flux force equation validity
21 p3952 A70-42081

Wall recombination heat transfer in rarefied flow with velocity slip near leading edge
21 p3952 A70-42083

Surfaces separated by radiatively nonparticipating medium, determining absorptivities and heat transfer boundary conditions in gray surface problems by irradiation factor method
21 p3953 A70-42085

Heat transfer from thin plate in compressible gas flow, considering interface temperature as nonanalytic function
21 p3953 A70-42086

Free stream turbulence effect on heat transfer to stagnation point of sphere
21 p3953 A70-42095

Heat and mass transfer in plane inductionless and dissipationless incompressible MHD boundary layer with longitudinal pressure gradient
21 p3861 A70-42231

Downstream heat transfer and wall friction predictions for quasi-developed strongly heated turbulent pipe flow, using mixing length model
[ASME PAPER 70-HT-8] 22 p4008 A70-42439

Comparative analytic and experimental film boiling heat transfer for horizontal cylinders in helium II
[ASME PAPER 70-HT-3] 22 p4122 A70-42441

MHD channel flow of suspension for prescribed wall heat flux and temperature, determining flow and heat transfer characteristics
22 p4080 A70-42670

Effective pressure ratio nomographs for mechanical energy conversion and heat transfer of closed regenerative Stirling engines, using isothermal theory
22 p4091 A70-42757

Heat transfer in heated wire in supersonic flow near molecular transition zone, estimating anemometer sensitivity to motion fluctuations
22 p3959 A70-43240

Stepwise heat removal for increased continuous combustion gas turbine engine cycle efficiency, deriving equations describing cycles
22 p4092 A70-43372

Ablative heat transfer to nonstagnation surfaces of high speed rocket vehicle in continuum atmosphere, using finite difference theory
22 p4125 A70-43433

Heat transfer measurements compared in free flight and in hypersonic wind tunnel at similar Reynolds number and temperature ratios
[ICAS PAPER 70-06] 23 p4275 A70-44115

Pressure distribution, force and heat transfer measurements on varied-configurations of lifting reentry vehicles in hypersonic flow [ICAS PAPER 70-03] 23 p4132 A70-44117

Wave-riders aerodynamics and heat transfer, investigating lift to drag ratios for supersonic and hypersonic vehicles [ICAS PAPER 70-18] 23 p4276 A70-44129

Sandwich multilayer structures temperature fields and heat transfer characteristics at high temperature [ICAS PAPER 70-38-BIS] 23 p4277 A70-44136

Heat and mass transfer for liquid film evaporation during two phase two component flow in vertical steel tube under adiabatic and nonadiabatic conditions 23 p4276 A70-44215

Temperature gradient effect on Couette flow heat transfer and stability 23 p4181 A70-44250

Time optimal problems involving parabolic equations in heating of rod with piecewise continuous thermophysical characteristics and temperature distribution constraints, deriving iterative solution 23 p4277 A70-44306

Capillary boiling and heat transfer for coolant fluids, using motion photography and visual observations 23 p4277 A70-44320

Near critical heat transfer in cryogenic fluids, discussing thermodynamic and transport properties 23 p4279 A70-44357

Liquid He II, determining correlation of depth effect on film boiling heat transfer with vapor film geometry from motion pictures 23 p4279 A70-44363

Cracked Teflon heat shields ablative behavior for laminar and turbulent boundary layers in supersonic flow, describing heat transfer to substructure 23 p4282 A70-44585

Heat transfer and viscous flow pedagogy, discussing classroom use of remote time sharing computer terminals 23 p4166 A70-44642

Human body heat production and transfer through convection, radiation and evaporation under normal and reduced atmospheric pressure 23 p4154 A70-44654

Heat exchange during flat plate transverse vibrations in water, discussing frequency and amplitude effects and natural convection role 23 p4282 A70-44728

Transition zone heat exchange during air mixed flow in pipes with conical duct or Vitoshinski nozzle inlets 23 p4283 A70-44729

Heat exchange on turbine blade profiles, examining boundary layer flow transition region coordinates 23 p4283 A70-44732

Heat transfer at air cooled gas turbine blade trailing edges at various wall temperatures and Reynolds numbers 23 p4283 A70-44737

Bodies of revolution optimal configuration, considering minimum head drag coefficient and low heat transfer at hypersonic speeds, using modified Newtonian and hypersonic flow theories 23 p4136 A70-45021

Heat transfer in chemically reacting gases boundary layers, obtaining approximate solution by film theory 24 p4428 A70-45101

Local or surface boiling phenomenon under triangular channel laminar flow conditions, investigating heat transfer with and without phase change 24 p4429 A70-46089

Diabatic steady gas flow vorticity, examining various kinematic and kinetic properties 24 p4328 A70-46365

HEAT TRANSFER COEFFICIENTS

Heat transfer coefficients for mesh simulating porous parachute cloth, measuring Nusselt number as function of sonic Reynolds number 01 p0004 A70-10292

Conductive heat transfer coefficients of densely packed electronic subassemblies 01 p0051 A70-10990

Electronic wafer packages heat transfer coefficients determined analytically, considering roles of geometrical and physical parameters 01 p0051 A70-10991

MHD entrance region compressible flow characteristics, determining velocity pressure and temperature distributions, friction and heat transfer coefficients, etc 01 p0067 A70-11136

Heat transfer coefficients in transpiration cooled gas turbine blades, using two dimensional theory covering porous wall and internal cooling passages 01 p0166 A70-11392

Wall temperatures and heat transfer coefficients for solid-vapor mixtures of para hydrogen and nitrogen flowing in heated tube 03 p0604 A70-13018

Thermoelastic stresses in plate due to arbitrary temperature variations of heat transfer agent calculated in second approximation, allowing for transfer coefficient time dependence 03 p0590 A70-13400

Mean volume heat transfer coefficient, mean thermal head and coolant temperature determined for gas flowing through porous wall with internal heat source 03 p0605 A70-13474

Equilibrium temperature and heat transfer of sphere in supersonic flow of rarefied air 03 p0409 A70-13874

Heat transfer coefficient in turbulent duct flow of fine particles suspension, using coupled similar equations 03 p0608 A70-14382

Plume-induced flow separation effect on thermal environment using Saturn 5 film and instrument data, attributing heating rate increase to recirculated exhaust gases [ASME PAPER 69-WA/HT-18] 04 p0761 A70-14815

Dominant and small parameters determination through sensitivity coefficients in heat transfer problem [ASME PAPER 69-WA/AUT-4] 04 p0713 A70-14829

Response characteristics of asymptotic or Gardon type thin foil heat flux transducer, discussing heat transfer coefficient effect on response time and curve 04 p0694 A70-15548

Heat exchanges between man and environment due to incidents or accidents during aircraft operation evaluated by combined heat transfer coefficient 05 p0799 A70-15764

Heat transfer coefficients for heat exchangers rotating in air at various velocities computed from skin friction coefficients in laminar and turbulent flow regime 06 p1177 A70-17701

Local heat transfer coefficients determined from temperature distribution on porous walls, deriving mathematical expressions for various surface geometries and transfer modes 06 p1184 A70-18555

Meteoroids atmospheric drag and heat transfer coefficients, considering weak shielding by repelled and vaporized molecules 08 p1572 A70-20945

Heat exchange coefficient during Ti melting in lined arc furnace, determining relation between heat flows to side walls and bottom of graphite crucible 08 p1506 A70-21140

Local heat transfer coefficients for unsteady conditions in tube determined by gradient method, noting use in reacting flow and jet nozzle protection 08 p1598 A70-21189

Forced convection heat transfer between two parallel plates analyzed numerically for effect of constant heat transfer coefficient boundary condition 08 p1598 A70-21425

External convective heat transfer coefficients from quartz-coated cylindrical hot film anemometer probes in mercury 08 p1599 A70-21582

Film heat transfer coefficients and thicknesses for condensation and evaporation and two phase flow inside circular tubes [ASME PAPER 67-HT-1] 08 p1599 A70-21827

Local heat transfer coefficients determination for unilaterally heated rectangular coolant duct by approximation and experiment applicable to circular tubes 09 p1787 A70-22170

Heat transfer coefficient to gas in tube under unsteady heat flow conditions, studying Nusselt number dependence on Reynolds and Prandtl numbers 09 p1787 A70-22173

Heat and mass transfer coefficients in binary laminar boundary layer convection obtained with integral equations and Karman-Polhausen method 09 p1787 A70-22264

Rectangular fins arrangement on horizontal surfaces for optimum free convection heat transfer coefficient, considering fin weight, height and spacing effects [ASME PAPER 69-HT-44] 09 p1789 A70-23551

Turbulent pipe flow with wall suction, calculating friction factor, pressure gradient, heat and mass transfer coefficients, velocity and temperature profiles [ASME PAPER 69-HT-4] 09 p1790 A70-23558

Capillary grooves effect on surface wetting and evaporation using heat transfer coefficients for grooves with triangular, semicircular and square cross sections [ASME PAPER 69-HT-19] 09 p1790 A70-23559

Fluid boiling heated nonuniformly in pipe, deriving formulas for unsteady temperature field by integrating energy equation 09 p1791 A70-23716

Heat conduction analysis for plane body with boundary condition and time variable heat exchange coefficient, applying automatic control technique 10 p1966 A70-23869

Temperature gradient method for determining local heat transfer coefficients in variable cross section channel 10 p1968 A70-24290

Transient thermal stresses in restrained-in-bending slab with surfaces heated and cooled with finite heat transfer coefficients 10 p1964 A70-25095

Radiant heat exchange local and angular coefficients determined allowing for absorbing and scattering medium between bodies 10 p1969 A70-25141

Simultaneous heat and mass transfer coefficients in laminar free convection boundary layers on horizontal cylinders or vertical axisymmetric bodies 11 p2151 A70-26559

Nusselt numbers of nonstationary and stationary heat transfer between metal spheres and liquid flow, showing bulk heat and geometry dependence 12 p2330 A70-27288

Critical thermal flux and heat transfer coefficients dependence on simulated gravity during bubble and film boiling in inclined flat containers 12 p2331 A70-27325

Iron and stony iron meteorite cooling rates and thermal models, showing melting, radioactive heat source redistribution and surface heating effects 13 p2497 A70-29861

Surface heat transfer coefficients under perforated plate of multiple square array round impinging air jets [ASME PAPER 69-GT-4] 14 p2666 A70-31025

Heat transfer coefficient from circular cylinder subjected to uniform surface heat flux and cooled by ring of holes 14 p2667 A70-31427

Laminar natural convective heat transfer along outer surface of vertical cylinder, giving coefficients nondimensionally by approximate formulas 15 p2826 A70-31821

Laminar boundary conditions for heat transfer in gradient flow region for plane turbulent jet impingement on plate normal to flow 15 p2721 A70-32134

Meteoroids atmospheric drag and heat transfer coefficients, considering weak shielding by repelled and vaporized molecules 15 p2806 A70-32757

Thin cylinder longitudinal two phase dispersed flow, examining heat transfer coefficient 18 p3345 A70-36112

Environmental heat stress indices of human subjects in bicycle ergometer experiment 18 p3224 A70-36226

Free convection boundary layer on two dimensional or axisymmetric body with sudden temperature increase, determining skin friction and heat transfer coefficients 18 p3346 A70-36487

Burning rate theory applied to heat and mass transfer rates of monopropellant droplets in heat-up and steady burning at wet bulb temperature 18 p3348 A70-36696

Heat transfer coefficient of chemically reacting gas mixture as function of Lewis-Semenov number, discussing nitrogen dioxide decomposition 19 p3550 A70-37251

Cooling rate effect on Al-Mg equilibrium state during heat treatment after annealing 20 p3644 A70-38959

Stagnation point heat transfer coefficient to elliptical model taking into account pressure, model blunting and diameter, Mach number, etc 20 p3737 A70-39699

Uniqueness theorem for first boundary value problem of heat conduction equation with discontinuous coefficient 20 p3737 A70-39710

Dimensionless heat transfer and resistance coefficients during stabilized nonNewtonian fluid flow in circular pipe 20 p3613 A70-40176

Temperature gradient method for determining local heat transfer coefficients in variable cross section channel 20 p3739 A70-40348

Turbulent gas boundary layer at finite Reynolds numbers, investigating relative changes in friction and heat transfer coefficients and temperature factor 20 p3614 A70-40390

Heat transfer between wall and liquid and vapor films in internal regenerative cooling of thrust chambers 21 p3867 A70-41027

Flow field, heat transfer rates and reattachment surface wall temperature of planar supersonic turbulent flow 21 p3744 A70-41036

Critical thermal flux and heat transfer coefficients dependence on simulated gravity during bubble and film boiling in inclined flat containers 21 p3952 A70-42066

Linear corrections formulas for shear stress and heat transfer coefficients associated with boundary layer blowing in binary gas mixture 21 p3748 A70-42207

Cylindrical wall nonstationary heat conductivity for time variable heat transfer coefficient 22 p4125 A70-43358

Tube heat exchangers operation at low transfer coefficient, calculating unsteady temperature field in wall and heat transfer agent 22 p4125 A70-43364

Heat exchange coefficients on side surfaces of constant thickness gas turbine disk, using temperature distribution method and integral transformations

22 p4125 A70-43367

Stationary turbine blades heat flux measurements, considering heat exchange coefficients and turbulent boundary layer

[ONERA-TP-871]

22 p4126 A70-43459

Thermal conductivity coefficient calculation by multiple temperature measurements of plate-shaped sample, using iteration process

23 p4276 A70-44166

Forced convection heat transfer to liquid nitrogen near critical point, determining coefficients from given wall temperature and heat flux

23 p4279 A70-44358

Liquid nitrogen drops undergoing film boiling on Al surface, measuring heat transfer coefficient

23 p4279 A70-44360

Cylindrical heaters in corresponding-states fluids, estimating film boiling heat transfer coefficients by correlation procedure using least squares expression

23 p4279 A70-44361

Saturated nitrogen vapors condensing coefficients measurement by cryostat, comparing results with theoretical prediction

23 p4218 A70-44364

Powdered flat steel plates cooling by air blown through pores, determining internal heat exchange coefficients

23 p4283 A70-44731

Viscous compressible gas flows in pipe initial section, calculating friction and heat transfer coefficients

23 p4135 A70-44734

Turbulent heat exchange coefficient and Prandtl number in turbulent air flow through heated pipe with constant heat flux

23 p4183 A70-44740

Ruby laser in repetitive pulse operation, determining temperature, heat generation and transfer coefficient from spectrum shift measurement

23 p4203 A70-45071

HEAT TRANSMISSION

NT AERODYNAMIC HEAT TRANSFER

NT CONDUCTIVE HEAT TRANSFER

NT CONVECTIVE HEAT TRANSFER

NT HEAT TRANSFER

NT HYPERSONIC HEAT TRANSFER

NT LAMINAR HEAT TRANSFER

NT RADIATIVE HEAT TRANSFER

NT SUPERSONIC HEAT TRANSFER

NT TURBULENT HEAT TRANSFER

Combustion instability in gas turbine main combustors, noting heat release and inlet air flow rates coupling

02 p0353 A70-12012

Diffusive transport term in hydrodynamic equations describing flow over strongly ablating entry objects, discussing charge separation and pressure diffusion

03 p0405 A70-12926

Thermal stresses of semiinfinite plate with circular hole filled with elastic inclusion and subjected to uniform heat flow

03 p0601 A70-14317

Heat transmission by current carriers to cryogenic region, ascribing heat flux to Joule effect in conductor

05 p0881 A70-16025

Crack stability under tension and thermal stresses caused by uniform disturbed heat flow, using Barenblatt fracture criterion

05 p0939 A70-16483

Negative pressure gradients effects on wall heat flow and characteristic patterns for turbulent boundary layer profiles

06 p1033 A70-17231

Transient heat flow in three dimensional rectangular panels, developing criterion for problem dimensionality

[AIAA PAPER 70-16]

06 p1182 A70-18212

Thermal molecular flow kinetic theory, discussing anisotropic distribution function, thermal transpiration, thermal conduction, entropy production, etc

06 p1113 A70-18369

Thermal conductivity of arbitrarily inhomogeneous bodies, considering vectorial field isotropy and temperature gradients dispersion

09 p1789 A70-23103

Partial differential equation describing one dimensional heat transmission problems solved by eigenvalues for initial and boundary conditions

10 p1969 A70-25098

Linear heat propagation in rarefied and non-homogeneous atmospheres, considering Green function behavior and various boundary and initial value problems

11 p2107 A70-25542

Heat flow comparator for nondestructive testing of resin-impregnated fiber glass, detecting nonuniformities leading to thermal properties variation

11 p2059 A70-25764

Apollo 13 lunar surface heat flow experiment to measure vertical temperature gradients as function of time and soil thermal conductivity

11 p2118 A70-26747

Heat removal influence on dynamic errors of cylindrical temperature sensors using electric models

14 p2662 A70-30183

Quasi-stationary analysis of thermophysical characteristics of materials, considering cylinder and plate samples under unsteady heating

15 p2826 A70-32105

Thermodynamically perfect fluids in general relativity, considering heat transmission paradox and wave propagation velocities

16 p2997 A70-33103

Heat flow measurement, discussing operation principles, heat conduction and stationary and transient temperature conditions

17 p3082 A70-34681

Heat conduction from sliding solids, discussing restrictions effect on temperature field near interface

17 p3197 A70-35543

Knudsen effusion in free molecular flows in supersonic jet during expansion through circular orifice, discussing power and heat transmission

18 p3346 A70-36379

Heat flowmeters calibration by conductive method, reducing error due to radiative, conductive and convective losses

19 p3430 A70-38522

Linear heat propagation in rarefied and non-homogeneous atmospheres, considering Green function behavior and various boundary and initial value problems

21 p3892 A70-41292

Temperature distribution and thermal constriction resistance due to steady heat flow in laminated composite

22 p4126 A70-43689

Closed cell polyurethane foam for cryogenic insulation, determining thermal conductivity and net heat flow by analytical model and test

23 p4280 A70-44367

Temperature dependent materials heat flow analysis using perturbation method for nonlinear boundary value problems

23 p4282 A70-44589

HEAT TREATMENT

NT ANNEALING

NT NITRIDING

NT PULSE HEATING

NT STRESS RELIEVING

NT TEMPERING

Nimonic Ni-Cr based alloys fracture characteristics used to determine temperature and time effects on equicohesive points positions

01 p0116 A70-10073

High temperature heat treatment effects on Mo, W, Ta and Re crystal surface order and faceting observed by electron diffraction, noting contamination role

03 p0538 A70-13097

Heat treatment effects on phase components of Cr-Mn-B alloys with W and Nb additions, discussing heat resistance

03 p0510 A70-13280

Residual stresses in cylindrical shells eliminated by local heat treatment, determining temperature field in elastic strain regions

03 p0497 A70-13739

Beta III Ti alloy cold formability, mechanical properties and heat treatment noting use for fasteners, sheet metal parts, honeycomb sandwich sections and metal matrix composites

03 p0512 A70-13776

Heat treatment effects on mechanical properties of Ti-Fe and Ti-Fe-Al alloys

03 p0512 A70-13855

Electro-pyrotechnic initiators for space applications subjected to dry heat sterilization cycles and to post-sterilization mechanical and electrical environments

03 p0495 A70-14131

Titanium carbide based cermets with steel matrices, studying heat treatment effects on hardness

04 p0696 A70-14462

Induction furnace for thermal treatments and melting of solid and liquid metals, alloys and sintering and degassing ceramic and metallic systems in vacuum

04 p0664 A70-15371

Cold working with subsequent heat treatment increased creep rupture and creep behavior of V alloys

04 p0708 A70-15372

Cobalt alloys physical properties and heat treatment, discussing service conditions and critical problems

04 p0711 A70-15684

Maraging steel mechanical properties with Mn, Mo and Co additions in heat treated condition

05 p0865 A70-16874

Mechanical properties of nickel steels with carbon after suitable heat treatment found similar to high strength nickel steels properties without carbon

05 p0865 A70-16875

Thermophysical characteristics of annealed Ta and Mo alloy welded joints under electron beam and ray heating, noting use for short term tests

05 p0865 A70-17028

Microstructure effects on smooth and notched fatigue and room temperature tensile properties of Ti-Al-V alloy using heat treatment combinations

06 p1087 A70-17458

Al-Zn-Mg alloys anodic corrosion behavior under various heat treatment regimes using potentiostatic method

06 p1090 A70-17922

Interrelation of precipitation state, mechanical properties and electrical conductivity of wrought aluminum age hardened alloy under varied heat treatment conditions

07 p1294 A70-19389

Optimal localized heat treatment of welded products, analyzing temperature fields and stresses during heating and cooling of ferromagnetic materials

07 p1294 A70-19477

Ti-based alloys with Al and Mo investigated for chemical composition and heat treatment effects on mechanical properties

08 p1518 A70-21200

High temperature thermomechanical treatment effects on stainless steels and Ti alloys microheterogeneity, noting corrosion resistance improvement

08 p1519 A70-21444

Martensitic transformations during quenching and tempering of maraging steels

08 p1520 A70-21495

Softening of cold worked alloy by high speed electrical heating, noting supersaturation before natural aging

08 p1520 A70-21496

Cobalt modified Ti-6Al-4V plate and billet, testing effects on heat treatment response, microstructure, tensile and fatigue properties, fracture toughness, etc

08 p1523 A70-21852

Silicon containing alpha matrix Ti alloy with high creep strength and stability at elevated temperatures, studying processing and heat treatment effects on properties

08 p1509 A70-21853

Fatigue testing and thermal mechanical treatment effects on uni- and biaxial Al alloy-B composites tensile strength at room and elevated temperatures

08 p1523 A70-21893

Vacuum melting and heat treating equipment for high melting point metals from phase equilibria studies viewpoint

09 p1655 A70-22562

Heat treatment effects on hardened steels acoustic constants, calculating sound velocity in liquid metals

09 p1692 A70-22643

Thermal treatment function of austenitic grain size and mechanical properties of 18 pct Ni maraging steels

09 p1704 A70-22803

Internal stresses and substructures dependence on thermomechanical histories of stainless steel during creep, noting subgrain orientation

09 p1705 A70-22805

Saturn booster Ti alloy pressure vessel forging, heat treatment and welding, discussing machining, cleaning and tooling

[SME PAPER AD-70-733]

12 p2241 A70-27085

Ti alloys tensile properties correlated with microstructure for multiple heat treatment cycle variations for high strength and adequate ductility

12 p2252 A70-27107

Resistivity anomalies of nickel-chromium alloy with Al additions subjected to deformation and heating, studying K-state

12 p2254 A70-27496

Short time tensile properties of thermomechanically treated astroloy showing improvement due to refined gamma precipitate and grain boundary carbides

12 p2256 A70-27610

Undoped GaAs lattice constants and electrical properties before and after heat treatment

13 p2471 A70-29504

Heat treatment induced shape distortions measurements in maraging steel bars, plates and sheets, noting dependence on number of anneals and product form

14 p2595 A70-30544

Al heat treatable alloys for welded structures, considering stress corrosion resistance, aging effects, brittle and delayed rupture resistance, etc

14 p2596 A70-30961

Al-Mg-Zn alloy composition, mechanical properties and structure for various heat treatments, discussing welded structures stability, stress relief, corrosion resistance and tensile strength

14 p2597 A70-30966

Transient overloads effect on long term fatigue strength of notched and smooth steel samples, emphasizing heat treatment effect on notch sensitivity at high temperatures

15 p2814 A70-31546

Heat treatment effect on maraging steel fracture toughness and subcritical crack growth loaded at slow strain rate in laboratory air

15 p2760 A70-32377

Thermal-mechanically treated stainless steels structure and properties, discussing stress relief aging effects

15 p2761 A70-32380

- Electron paramagnetic resonance of Mn ions in single crystal and powder forsterite, testing heat treatment and proton irradiation effect on ordering
16 p2960 A70-33008
- Composition and heat treatment effects on Fe-Ni alloys structure, using micrographic, autoradiographic and potentiokinetic methods
16 p2916 A70-33080
- Quench hardening and Ni content relationship in Ti-Ni intermetallic compounds, investigating heat treatment effect on mechanical properties
16 p2930 A70-33084
- Al-Mg alloys creep characteristics dependence on Ag, Si and Zn additions during aging heat treatments, establishing activation energy and stress exponents
16 p2930 A70-33086
- Heating effect above beta transus at intermediate and final stages of processing on Ti alloys properties
17 p3097 A70-34359
- Solution heat treatment temperature effects on strength and age hardening of Ti alloys
17 p3120 A70-34419
- Heat treatment effect on strength and ductility of Ti-Al-V-Sn alloy by optical and electron microscopy and X ray diffraction
17 p3122 A70-34437
- Heat treatment and composition effect on mechanical properties of alpha Ti-base alloy, discussing creep resistance, tensile strength, etc
17 p3122 A70-34439
- Forming Ti-Al-V sheet metal in heat treated conditions, showing mechanical properties improvement over mill annealed parts
17 p3098 A70-34445
- Pyrolyzed tetraethoxysilane for carburizing steels and Ti alloys at 850-1050 C
17 p3102 A70-35409
- Cobalt addition to Ti-Al-V alloys, examining yield strength, heat treatment, ductility and microstructure
18 p3271 A70-35964
- Binary Co-Cr alloy open circuit potential and microstructure, examining effects of composition, heat treatment, allotropic transformation and precipitation
18 p3271 A70-35966
- Automatic dilatometers for volume variations in steel and Co-W alloy during aging and heat treatment, noting microstructural changes
18 p3257 A70-36202
- Fe-Ni alloy alpha-gamma phase transformation after heating, noting deformation planes and directions in martensite
18 p3275 A70-36204
- Deformable Al alloys hardening, emphasizing heat treatment in solid state
18 p3276 A70-36308
- Papers on cracking during postweld heat treatment of Ni alloys covering Rene 41 mechanical properties and resistance to strain age cracking
18 p3277 A70-36522
- Rene 41 resistance to strain-age cracking during postweld heat treatment
18 p3277 A70-36523
- Rene 41 ductility reduction by environmental oxygen promoting intergranular cracking at high temperatures
18 p3277 A70-36524
- Oxygen role in crack initiation and growth in Ni alloys postwelding heat treatment
18 p3277 A70-36525
- Plates and rods tendency to warp and form nonsymmetrical stress systems during heat treatment
19 p3433 A70-37272
- Soviet monograph on bimetal and refractory metals production by rolling in vacuum or inert media
19 p3433 A70-37402
- Wear resistant titanium carbide based cermet material production by impregnation techniques, discussing grain size and heat treatment effects
19 p3450 A70-37453
- Maraging steels heat treatment, measuring hardness as function of temperature for various heating rates
19 p3452 A70-37807
- Low temperature electrical resistivities of Al, Ni, Cu, Ti and Fe alloys for different heat treated conditions
19 p3452 A70-37825
- Iron phosphate semiconducting glasses, determining electrical and magnetic properties dependence on thermal treatment
19 p3487 A70-37861
- Cooling rate effect on Al-Mg equilibrium state during heat treatment after annealing
20 p3644 A70-38959
- Heat treatment and alloying element influence on phase and structure transformations in Ti alloys, investigating mechanical properties and creep resistance
20 p3645 A70-39039
- Ti alloys fine structure, mechanical properties and alloying elements diffusion mobility during heat treatment, observing chemical and structural inhomogeneities
20 p3645 A70-39040
- Ti alpha alloys subjected to heating in beta region, investigating plate-like precipitates by electron transmission microscopy
20 p3645 A70-39042
- Graphite fiber reinforced polycarbonate composites interfacial adhesion improvement by controlled thermal treatment
20 p3652 A70-39168
- Ti alloy bolts mechanical properties improvement by beta heat treatment
20 p3650 A70-39965
- Al alloy products heat treatment, using synthetic quenchant for distortion control
20 p3650 A70-39967
- Lithium-diffused silicon, investigating heat treatment and electron irradiation effects on electrical resistivity at high temperatures
20 p3687 A70-40164
- Al alloys heat treatment methods and equipment, discussing quenching, stress relief, incubation, postquench working and aging
21 p3834 A70-41722
- Heat treatment and photovoltaic properties of copper disulfide-cadmium sulfide heterojunctions, measuring I-V characteristics, capacitance and spectral response
21 p3862 A70-41911
- Ni base superalloy for gas turbines, describing heat treatment for precipitation hardening
22 p4055 A70-43099
- Silicon precipitation in nonrefined annealed Al, examining heat treatment effects
22 p4057 A70-43550
- Impurities and heat treatment effects on W internal friction at high temperatures, considering relaxation processes, recrystallization and microstructure
24 p4357 A70-45227
- Nondestructive thermal and thermochemical treatment penetration depth measurement in metal, examining magnetic test and ultrasonic techniques
24 p4346 A70-45721
- Metal and nonmetal thermal nondestructive tests based on surface temperature distribution produced by heat treatment
24 p4348 A70-45744
- Heat treatment effects on dispersion strengthening of Ni alloys, showing enhanced long term creep strength at 1100 C
24 p4360 A70-45828
- Nonequilibrium solidification and metastable phase transformation during heating of Al-Mo and Al-Cr alloys
24 p4360 A70-45829
- Heat treatable beta Ti alloys cold workability, fracture toughness, tensile ductility and applications [SAE PAPER 700856]
24 p4361 A70-45880
- ### HEATING

NT SHOCK HEATING
NT SOLAR HEATING
NT SUPERHEATING
NT TRANSIENT HEATING
- Liquid heating in thin walled porous shells under various boundary conditions, deriving formulas for temperature fields
03 p0604 A70-13208
- Numerical analysis of low-g fluid flow and heating problems encountered with liquid propellant storage and supply
07 p1394 A70-19719
- Temperature fields in cylindrical shell under axisymmetric heating, ensuring optimal stressed state
09 p1778 A70-23081
- Heating rate effect on Ti-V martensite decomposition, discussing elastic properties effects of partial tempering
16 p2931 A70-33256
- Brayton cycles in gas turbines, investigating intercooling or reheat and pressure ratio proportioning influence on efficiency and specific work
18 p3304 A70-36856
- Al-Mg alloys recrystallization, investigating heating rate and annealing time effects on sheet grain size
19 p3450 A70-37372
- Heating rate effect on Ti-V martensite decomposition, discussing elastic properties effects of partial tempering
23 p4206 A70-44285
- ### HEATING EQUIPMENT
- NT BOILERS
NT EVAPORATORS
NT FURNACES
- NT SOLAR FURNACES
NT VACUUM FURNACES
- MHD high temperature heating equipment, describing power generation and conversion and magnetic field-working fluid interactions
02 p0348 A70-12418
- Natural convection flow interactions from individual surfaces in closely spaced array of heated elements, discussing effect on heat transfer, induced flow and temperature field
07 p1418 A70-18644
- High temperature, electrically heated convective gas heating system for high velocity atmospheric flight simulation using air-nitrogen working fluids
12 p2205 A70-27100
- Supersonic flight simulation in hypersonic wind tunnels for developing hypersonic air breathing propulsion, describing ceramic storage heaters
13 p2384 A70-28666
- Electrothermal helicopter rotor blade deicing system, discussing design, operation and solutions for mechanical and reliability problems
13 p2348 A70-29552
- Microwave feeding system for heating and cooking prepackaged meals during extended space missions
19 p3368 A70-37747
- Al alloys heat treatment methods and equipment, discussing quenching, stress relief, incubation, postquench working and aging
21 p3834 A70-41722
- Direct electrical heating for high temperature thermal conductivity measurements of pure W, giving results for graphite
21 p3850 A70-42057
- Cylindrical heaters in corresponding-states fluids, estimating film boiling heat transfer coefficients by correlation procedure using least squares expression
23 p4279 A70-44361
- ### HEAVING
- Multiple skirt air cushion vehicle [ACV] pitch and heave dynamic characteristics, describing mathematical modeling and analog computer simulation
04 p0624 A70-15389
- Tracked air cushion vehicle dynamic heave response, examining flow characteristics, active lip control, guideway contact, acceleration response, etc
17 p3017 A70-35178
- Static and dynamic spring constants of peripheral jet air cushion vehicle in heaving motion, obtaining sinusoidal input response characteristics
22 p3960 A70-42279
- Nonlinear heaving motion of plenum-chamber air cushion vehicles induced by sinusoidal ground irregularity
22 p3961 A70-42280
- Peripheral jet ground effect machine model heaving motion, investigating static hover and forced and free vibration characteristics
22 p3961 A70-42281
- ### HEAVY COSMIC RAY PRIMARIES
- U HEAVY NUCLEI
U PRIMARY COSMIC RAYS
- ### HEAVY ELEMENTS
- NT PLUTONIUM ISOTOPES
- Electromagnetic showers fluctuations produced by electrons and photons in heavy materials, determining moments of particle numbers and bremsstrahlung differential cross sections
01 p0171 A70-11026
- Theoretical and experimental cascade curves comparison for heavy materials used for particle absorption in tracking experiments, discussing Coulomb scattering
03 p0527 A70-13051
- Globular clusters in M31, discussing metallicity and heavy element enrichment in Andromeda
06 p1138 A70-17306
- Solar core opacity, investigating individual heavy elements influence and effect of changes in abundances
18 p3317 A70-37005
- Heavy elements critical energy calculation, taking into account low energy electrons effects on losses in electromagnetic cascade
20 p3674 A70-39303
- Heavy elements diffusive separation as explanation of metallic and magnetic A stars abundance anomalies at outer convective envelope bases
24 p4410 A70-45775
- ### HEAVY IONS
- Heavy positive ions pulse counting by spiral-type continuous channel electron multiplier, noting long pulse rise time composed of numerous after pulsing
07 p1286 A70-19970
- VHF wave interference from heavy ion layers in lower ionosphere
14 p2574 A70-30737
- Heavy ions traces in crystals of lunar rocks, discussing applications as detectors
18 p3321 A70-37084
- Uranium ion impact ejection and electronic excitation of thin foil particles, observing optical spectra of Be, carbon and Al atoms and ions
20 p3674 A70-39135

HEAVY NUCLEI

Iron group nuclei abundance relative to oxygen determined for solar cosmic ray event of 2 September 1966

01 p0167 A70-10042

Meteorites fossil tracks due to cosmic radiation heavy nuclei

02 p0361 A70-11748

Heavy nuclei survival in cosmic rays Colgate supernova acceleration model, assuming plasma wave instability in shock wave

02 p0357 A70-11788

Electron loss in heavy body collisions from free scattering model and Born approximation

02 p0342 A70-11879

Ionization losses effect on energy spectra of cosmic ray heavy nuclei with Fermi acceleration, using transfer equation

04 p0742 A70-15201

Interstellar propagation effect on spectra and charge ratios due to ionization energy loss and nuclear spallation during traversal of matter

05 p0897 A70-15762

Pulsars as possible sources of superheavy nuclei in primary cosmic radiation, evaluating flux and mean power

05 p0901 A70-16314

Cosmic protons and high energy heavy nuclei interaction with radiation in expanding universe, including estimates of light radiation influence on cosmic ray spectra

05 p0904 A70-16903

Iron peak nuclei synthesis by charged particles under supernova mechanism conditions predicted by hydrodynamic conditions

09 p1749 A70-21994

Energy spectra and composition of heavy nuclei in primary cosmic rays during low solar activity by nuclear emulsion stacks exposure in balloon flights

11 p2105 A70-26295

Charge spectrum of heavy relativistic cosmic ray nuclei, using tracks from balloon-borne photographic emulsions

18 p3308 A70-36781

Charge spectrum of high and low energy heavy cosmic ray nuclei, using balloon-borne nuclear emulsions

19 p3507 A70-38130

Heavy cosmic ray abundance attributed to thermal nucleosynthesis during silicon burning at high temperature and density

19 p3507 A70-38132

Cosmic ray heavy nuclei charge composition from satellite-borne emulsion stacks exposure

19 p3507 A70-38134

Highly charged cosmic ray heavy nuclei primaries, examining charge spectra and solar elements abundances

19 p3508 A70-38136

Super heavy cosmic ray nuclei charge composition and track identification, using LEXAN polycarbonate, cellulose triacetate /CTA/ and nuclear emulsion

19 p3508 A70-38137

Primary cosmic ray particles with Z greater than 40 identified by tracks in balloon-borne nuclear emulsions and plastic detectors

19 p3508 A70-38138

Very heavy primary cosmic ray particles propagation calculation, using fragmentation parameters

19 p3508 A70-38139

Heavy and super heavy nuclei steady state spectra, comparing propagation parameters of light and medium nuclei

19 p3508 A70-38140

Cosmic ray track sources in meteoritic minerals, considering heavy primaries, secondary spallation and fission products

19 p3508 A70-38142

Explosive nucleosynthesis as heavy nuclei source for stars

20 p3712 A70-40426

Low energy cosmic ray heavy primary particles composition from nuclear emulsion stack observation

21 p3879 A70-40930

Optically thin plasma population and ionization equilibrium, taking into account heavy particle collisions

22 p4082 A70-43219

HEAVY WATER REACTORS

Third body coefficients of water and heavy water reactions in KCl coated and aged boric acid coated vessels with vibrational-vibrational exchanges

14 p2546 A70-31091

HEIGHT

NT SCALE HEIGHT

Seasonal variations of sporadic E virtual height at middle latitudes attributed to homospheric expansion depending on ozone amount

03 p0476 A70-13907

Vertical motions and turbulent exchange influence on height variation of stratus clouds based on atmospheric moisture and heat transport equations

08 p1537 A70-21103

Erroneous height correlation coefficients in physical optics formulation of rough surface scatter

16 p2859 A70-32938

Ionospheric disturbances heights at subauroral latitude from Explorer 22 satellite beacon signals recorded at spaced receivers

20 p3624 A70-40492

Transition zone height in corona-chromosphere interface from high resolution disk spectra near limb

21 p3926 A70-42198

HEISENBERG THEORY

Laser with nonresonant feedback calculated for single mode and total radiation fields correlation functions from Heisenberg equations

03 p0503 A70-14175

Kolmogoroff constant determined by Heisenberg turbulence formula and model for transfer of turbulent energy between different wave numbers

06 p1034 A70-17467

Spin-spin correlation in Heisenberg magnet linear chain at infinite temperature, discussing non-monotonic frequency dependence

14 p2619 A70-30486

Heisenberg uncertainty principle in communications technology, discussing variance products deficiencies and limits in carrier frequency pulses application

20 p3584 A70-39160

Uncertainty principle in optimum communication theory, discussing existence and value of minimum product of pulse duration in terms of calculus of variations and differential equations

20 p3584 A70-39161

Anisotropic Heisenberg antiferromagnet theory, developing nonlinear spin-wave approximation

24 p4388 A70-45131

HELICAL ANTENNAS

Current distribution in finite length helical antenna in HF field, using cylindrical model of infinitely good conductivity

01 p0050 A70-10713

Antenna biasing with DC field to improve power handling capacity tested on U-slot and helical antennas

02 p0269 A70-12595

Normal mode helical antennas performance in medium and short wave regions, discussing advantage over log periodic antennas and maximum radiation angle achieved by phase shift

02 p0270 A70-12735

Helicone antenna /axial mode helix combined with conical horn/ compared to conical horn in pattern and polarization characteristics [AAS PAPER 69-623]

04 p0655 A70-14662

Spacecraft phased array antenna techniques, discussing tape helix radiators design for applications in navigation, TV broadcasting and data relay systems [AIAA PAPER 70-425]

11 p2015 A70-25452

Spacecraft high efficiency phased arrays with deployable helix radiating elements, considering gain and weight factors

12 p2197 A70-27930

Axial mode helical antenna design with built-in impedance transformer for airborne applications

21 p3796 A70-40758

Radar cross section and current distribution of dipole deformed into low pitch angle helix

23 p4166 A70-44974

HELICAL FLOW

Stability conditions for helical motions of body bounded by multiply connected surface in fluid

01 p0145 A70-11439

Kinetic equation of helicons interactions in electron-hole plasma, discussing turbulence spectrum and effect on current carrier drift velocity

03 p0531 A70-13407

Helicon wave dispersion in cold multicomponent plasma of n-type Si and Ge semiconductors in linear hydrodynamic approximation

10 p1928 A70-24832

Helical propagation in multivalley semiconductors of n-Ge type, obtaining polarization anisotropy

10 p1928 A70-24842

Helical vortex generation in rotating flow in straight tube having angular momentum flux sufficiently large relative to linear momentum flux

14 p2565 A70-30277

Screw flows in fluid dynamics, showing helicoidal type flow for constant flow velocity on stream lines

15 p2718 A70-31447

Plasma helix equilibrium and stability in transverse magnetic field, considering oscillation damping by ohmic heating

15 p2781 A70-32910

Galactic spiral arm helical magnetic fields related to interstellar gas flow, using magnetohydrodynamic models

18 p3331 A70-37200

HELICAL INDUCERS

Plasma equilibrium in stellarator type magnetic trap /vintatron/ with magnetic configuration created by strong longitudinal field

12 p2277 A70-27313

HELICAL WINDINGS

Axial stress pulse induced elastic waves propagation in thin anisotropic circular cylindrical shell of helical wrap construction allowing for shear coupling

03 p0587 A70-13118

Fast neutron transport characteristics of helical ducts using Monte Carlo code FASTER, computing neutron fluxes and attenuation

05 p0884 A70-16163

Plasma stabilizing effect of shear and magnetic flux minimum in asymmetric conductors and currents in helical stellarator winding

11 p2088 A70-25711

Helical engraving influence on aerodynamic stability of bullets at long range, discussing wind tunnel tests [AIAA PAPER 70-557]

13 p2340 A70-29022

HELICOPTER ATTITUDE INDICATORS

U ATTITUDE INDICATORS

U HELICOPTERS

HELICOPTER CONTROL

Automatic flight control and instrumentation in civil helicopters, examining military developments and Ferranti automatic stabilization system

02 p0329 A70-11834

Helicopter automatic hybrid navigation system for increased accuracy over unfamiliar terrain and above-human performance, comparing navigating pilot performance with machine

02 p0335 A70-12134

Simplified aircraft instrument landing system /SAILS/ employing lightweight helicopter-borne radar for tracking radio beacon at touchdown point

02 p0337 A70-12768

Optimum automatic system for controlling helicopter formation flight, stressing transient response Q factor and transmission ratios

03 p0413 A70-13859

Helicopter tail rotors aerodynamic characteristics, using statistical methods for planning experiments and interpreting results

05 p0793 A70-15900

Blind flight and helicopter navigation during prolonged maritime survival operations

07 p1193 A70-19132

Soviet book on control systems for single rotor helicopters covering automatic stabilization system design, autopilots, pilot operation within closed control circuit, etc

08 p1435 A70-20769

Helicopter rotor, discussing conventional, semirigid, gyro and ABC systems in relation to roll balance and control

13 p2344 A70-28849

Dual controlled elastically twisting rotor blade performance during flight with azimuthal and collective variations compared to direct control rotor

13 p2345 A70-29012

Soviet book on practical aerodynamics of Mi 6 helicopter covering engine/rotor power balance, control, flight characteristics and solutions to in-flight emergencies

14 p2532 A70-31414

Automatic flight control and instrumentation in civil helicopters, examining military developments and Ferranti automatic stabilization system

15 p2772 A70-31771

High powered high speed helicopters autorotation entry characteristics, noting capability of meeting control time delay requirement

17 p3014 A70-34715

Gallium arsenide laser ranging system for helicopters obstacle warning

17 p3103 A70-34720

Crane helicopter controllability, discussing load stabilization and precision hovering

17 p3015 A70-34723

Hingeless rotor helicopter airborne and ground resonance characteristics, noting feedback stability control interference with rotors aerodynamic damping

17 p3015 A70-34733

Dynamic control model of lift helicopters with two cable sling loads using multiple part motion equations [AIAA PAPER 70-929]

17 p3020 A70-35839

Helicopter gas turbine governor systems for engine and rotor speed control, minimizing pilot activity [ASME PAPER 70-GT-37]

18 p3214 A70-36835

Helicopter radar approach aid for serving oil rigs

19 p3466 A70-38621

Computer simulated decision hierarchical model of helicopter and VTOL pilot for multiloop closure and tracking characteristics of man-vehicle system

19 p3372 A70-38921

Comfort plane switch mounting design for helicopter collective controls, noting mock-up evaluation by test pilots

19 p3372 A70-38922

Helicopter stabilization systems design, synthesizing controllers by modal control theory [AIAA PAPER 70-1036]

20 p3560 A70-39501

Single and coaxial dual rotor helicopter piloting characteristics during turning flight, discussing operational problems in snow

22 p3962 A70-43530

Main rotor wake adverse effects on tail rotor directional control in low velocity wind
23 p4140 A70-44323

Tail rotor thrust increase for yaw control via increased blade area, higher tip speeds and cambered airfoils
23 p4140 A70-44324

Helicopter automatic approach and hover coupler systems, discussing cockpit display devices, handling qualities, pilot workload and fatigue and external load stabilization
23 p4140 A70-44464

HELICOPTER DESIGN

Composite fibrous materials applicability to V/STOL rotor blades design and fabrication confirmed by structural analysis
02 p0225 A70-11953

Helicopter avionics systems man machine capability estimation based on pilot workload, applying results to design evolution
02 p0244 A70-12136

Helicopter engineering covering structure, rotor systems, aerodynamics, vibration and applicability to fixed wing aircraft
02 p0225 A70-12309

Helicopters for injured or sick persons transportation as compared with ambulance use based on West Germany experience
03 p0436 A70-13822

Mil-10 Soviet giant helicopter cargo and altitude record, VTOL and STOL capability and weight design
03 p0414 A70-14286

Rotor noise reduction in helicopter design for increased blade loadings and higher tip speed
[SAE PAPER 690684] 05 p0792 A70-15865

High speed helicopter with fixed wings and longitudinal axis tail rotor
05 p0794 A70-16349

Sound radiated by fluctuating forces on helicopter rotor analyzed, predicting noise output variation as function of helicopter design parameters
05 p0796 A70-16792

Proximity Warning System/Pilot Warning Indicator for helicopters, discussing applications to fixed wing aircraft
06 p0985 A70-17710

YANKEE escape system adapted for helicopters using tractor rocket, noting modular concept advantages
06 p0986 A70-17712

Twinjet helicopter design for business transport, emphasizing redundant systems for safety and bad weather flight capability
07 p1191 A70-18844

Bolkow BO-105 twin turbine rigid rotor helicopter flight tests
08 p1437 A70-21731

Circulation-controlled lifting rotor built and tested on hovering rig, analyzing performance
09 p1611 A70-23284

Compound helicopter in civil aviation to alleviate air traffic congestion, discussing design and operative capacities of S-65-200
10 p1804 A70-24046

Bifilar pendulum vibration absorber for counteracting helicopter main motor vibratory forces
10 p1805 A70-24657

Crane helicopters characteristics, history and projected applications to petrochemical, shipping, construction and power transmission industries
[SAE PAPER 700284] 12 p2160 A70-27427

Noise reduction design of Enstrom F-28A helicopter, noting operation at lower tip speeds and blade loading
12 p2162 A70-28096

Rotorcraft design and aerodynamics, discussing structural vibrations and all-weather operation
13 p2344 A70-28545

SA-330 Puma tactical support helicopter design and performance
14 p2530 A70-30286

Analog/digital system for full scale airframe fatigue amplitude and phase signature measurements on CH-46D tandem rotor helicopter
15 p2739 A70-32323

Fatigue characteristics of Ti alloy forgings for rotary wing vehicles, discussing effects of welding, annealing, reduction, surface finish and shot peening
17 p3122 A70-34441

Aircraft, helicopters and rockets aviation systems design and components service life problems, emphasizing maintenance intervals
17 p3100 A70-34686

CH-47C helicopter fiberglass main rotor blade, discussing composite materials impact on design
17 p3013 A70-34702

Composite tail rotor driveshaft for next generation helicopter, discussing materials, fabrication and tests
[AHS PREPRINT 451] 17 p3100 A70-34703

Pressure jet helicopter with tipjet propelled rotor system, discussing power available calculation, mission performance, power management, etc
17 p3013 A70-34707

VTOL aircraft power plants optimization for future helicopter missions without restrictions of limited off-shelf inventory
17 p3147 A70-34708

Vortex visualization applications in helicopter noise research, using smoke generator in rotor blade tip
17 p3057 A70-34712

Helicopter structural weight statistical prediction and evaluation, discussing comparable fixed wing experience
17 p3015 A70-34728

Heavy lift helicopters cockpit display problems, describing photographic flight research program for data acquisition
17 p3082 A70-34731

Helicopter vibration reduction techniques, considering antivibration devices design and comfort crossover speed increase
17 p3015 A70-34735

Swept tip rotor blade design, discussing wind tunnel-whirl stand correlations
17 p3015 A70-34736

Second generation helicopter design, considering compound, convertible and electrically powered configurations
17 p3018 A70-35549

Convertible helicopter rotor technology, discussing materials, blade configurations and variable diameter concept
17 p3018 A70-35550

H3-E Sprinter semicompound helicopter with pneumatic rotor drive and side mounted fans for forward flight
17 p3018 A70-35626

Cross section deformation effect on helicopter rotor blade torsional vibration, using differential equations of vibrating beam
18 p3334 A70-35959

Helicopter engine rotor matching for tip propulsion efficiency, comparing with conventional shaft drive propulsion
[ASME PAPER 70-GT-68] 18 p3215 A70-36842

Soviet book on helicopter aerodynamics covering main rotor operation, types classification and various flight characteristics
19 p3355 A70-37390

Rotor drive systems for rotary wing aircraft, indicating mechanical hub drive advantages over reaction blade drive
21 p3755 A70-41850

Soviet helicopter development after World War II, discussing Mi-8, Mi-2, Ka-26 and MI-10K helicopters
23 p4137 A70-43895

Armor airframed helicopter for aerial armored reconnaissance vehicle, noting design, fabrication and weight
23 p4137 A70-44095

Fenestron shrouded tail rotor for SA 341 Gazelle helicopter eliminating ground contact during approach and landing
23 p4140 A70-44322

Tail rotor thrust increase for yaw control via increased blade area, higher tip speeds and cambered airfoils
23 p4140 A70-44324

NACA/NASA rotary wing aircraft research covering autogyro and helicopter development, noting flight safety
23 p4142 A70-44851

SA-341 Gazelle French military helicopter configuration, performance, flight characteristics, technological particulars and design
23 p4142 A70-44854

Helicopter personnel escape capsule system feasibility by UH-25B helicopter, discussing incorporation into CH-46 and UH-1
[SAE PAPER 700832] 24 p4290 A70-45890

Military helicopter test program application to commercial VTOL operations, discussing military-civil design and development relationships
[AIAA PAPER 70-1242] 24 p4292 A70-46327

Helicopter hazards elimination measures, considering crash resistant fuel systems, flotation devices, redesigned seats, in-flight escape, etc
24 p4292 A70-46383

HELICOPTER ENGINES

Boeing inertial separator system for eliminating air dust taken by CH-46 helicopter engines during takeoff and landing on unprepared areas
01 p0162 A70-10677

Inertial particle separator-type turbine engine air cleaner for OH-6A light observation helicopter, describing evolution
01 p0164 A70-10682

CH-54A engine air particle separator/EAPS/field experience, discussing engine removal times due to erosion, environment evaluation and design improvements
01 p0164 A70-10684

CH-54 engine air inlet antice system design, manufacture and testing, solving heat balance equations describing tapered gap heat exchanger
01 p0165 A70-10693

Helicopter turbine engine bleed air requirements obtained by compressor extraction for engine designers
01 p0167 A70-11462

U.S. rotorcraft research regarding materials and engine technologies of conventional and compounded helicopters
02 p0226 A70-12314

Development trends, design and gas dynamic characteristics of turbine engines for helicopter propulsion systems including pressure, turbofan and integral engines
05 p0896 A70-16350

Aerodynamic and mechanic design of gas turbine for light helicopters, including flight tests and performance objectives
08 p1558 A70-20686

Helicopter turboshaft engines design and performance
08 p1559 A70-21517

Soviet book on practical aerodynamics of Mi 6 helicopter covering engine/rotor power balance, control, flight characteristics and solutions to in-flight emergencies
14 p2532 A70-31414

Soviet book on gas turbine engines for helicopters covering aircraft design and flight dynamics
15 p2787 A70-32199

Pressure jet helicopter with tipjet propelled rotor system, discussing power available calculation, mission performance, power management, etc
17 p3013 A70-34707

VTOL aircraft power plants optimization for future helicopter missions without restrictions of limited off-shelf inventory
17 p3147 A70-34708

Helicopter gas turbine governor systems for engine and rotor speed control, minimizing pilot activity
[ASME PAPER 70-GT-37] 18 p3214 A70-36835

Flight test program for helicopter gas turbine engines, considering engine-airframe-control systems integration and environmental tests
[ASME PAPER 70-GT-38] 18 p3303 A70-36836

Helicopter engine rotor matching for tip propulsion efficiency, comparing with conventional shaft drive propulsion
[ASME PAPER 70-GT-68] 18 p3215 A70-36842

Helicopter gas turbine engines protection against salt spray, dust, sand, ice, cut grass, etc
[ASME PAPER 70-GT-96] 18 p3263 A70-36843

CH-54A helicopter gas turbine engine air particle separator/EAPS/field service in Vietnam, noting time before engine removal for erosion
[ASME PAPER 70-GT-97] 18 p3303 A70-36844

Helicopter gas turbine engine protection against sand and dust erosion using particle separators, screens and coatings
[SAE PAPER 700705] 22 p4090 A70-42671

HELICOPTER PERFORMANCE

Flight test experiments for H-19 helicopter to evaluate aided inertial system performance for terminal guidance
01 p0136 A70-10303

Marine safety aspects of helicopters with flotation equipment, considering effects of severe winds and waves, aircraft abandonment procedure, etc
01 p0007 A70-11316

Blade forces of helicopter rotor in forward flight calculated by unsteady lifting-line theory
01 p0004 A70-11366

Helicopter vibrations recording on magnetic tape for subsequent frequency analysis, describing frequency spectrogram
02 p0304 A70-12761

Helicopters for injured or sick persons transportation as compared with ambulance use based on West Germany experience
03 p0436 A70-13822

Mil-10 Soviet giant helicopter cargo and altitude record, VTOL and STOL capability and weight design
03 p0414 A70-14286

Helicopter tail rotors aerodynamic characteristics, using statistical methods for planning experiments and interpreting results
05 p0793 A70-15900

Helicopters usefulness in rescue service via test flights, discussing rescue cars and centers for emergency patients
05 p0806 A70-16325

High speed compound helicopters with rigid and hinged rotors noting features, advantages and construction
05 p0794 A70-16351

Personnel/cargo lowering and retrieval system requirements, design approach and effects on performance for CH-47 helicopter, discussing fabrication and testing on mockup
06 p0985 A70-17711

Optimality criteria for selecting flight conditions for civil aviation helicopters, considering scheduled speed and efficiency, commercial load factor, wind rose, vertical separation, etc
06 p1185 A70-17874

Rotation and forward flight effects on separation line of laminar incompressible boundary layer along helicopter blade of airfoil shape
[AIAA PAPER 70-49] 06 p0973 A70-18151

Tuft position on rotating helicopter blade in hovering and forward flight, calculating tip path plane and tuftlines 08 p1438 A70-21868

Helicopter hoist rescue system, considering helicopter power, cable length, pilot visibility, etc 09 p1610 A70-22341

Flight test experiments for H-19 helicopter to evaluate aided inertial system performance for terminal guidance 13 p2449 A70-29622

Patients emergency transportation by helicopter, discussing vehicle types and onboard medical treatment 14 p2540 A70-30191

Real time analog simulation of helicopter rotor, calculating lift and drag coefficients along blade 15 p2672 A70-31775

Helicopter aerodynamic problems, discussing rotor performance improvement for increased cruising speed 16 p2841 A70-33758

AH-1G helicopters combat flight loads from on-board oscillograph data recording, defining performance in terms of critical variables 17 p3013 A70-34706

Airborne flight test data acquisition and ground based automatic bulk data processing system for helicopter test and development programs 17 p3014 A70-34713

AH-1G Hueycobra helicopter stability, control, performance, vibration and structural loads characteristics during controlled steady state maneuvers 17 p3014 A70-34716

UH-1C, AH-1G and UH-1H helicopters combat operational flight profiles, considering airspeed, altitude, rotor speed, load factor, etc 17 p3014 A70-34717

Helicopter rotors noise intensity prediction for high tip Mach number, including compressibility and thickness effects 17 p3015 A70-34729

Modeling techniques based on Froude scaling laws for helicopter ditching and flotation stability characteristics 17 p3016 A70-34738

Helicopter rotor blade differential pressure and structural load characteristics in transient and steady state maneuvers 17 p3016 A70-34739

STOL takeoff trajectory optimization for heavily loaded helicopter, using optimal control theory 17 p3021 A70-35841

Aerodynamics theory for separated flow effects on helicopter lift-drag capability, taking into account three dimensional flow and blade aeroelasticity 18 p3205 A70-35956

Soviet book on helicopter aerodynamics covering main rotor operation, types classification and various flight characteristics 19 p3355 A70-37390

Model testing for helicopters, considering scaling, ditching and rotor performance 19 p3402 A70-38610

Structural reliability testing methods and loads prediction for rotary wing vehicle components, considering AH-56A compound helicopter 19 p3356 A70-38612

Flight characteristics and performance calculation of single rotor helicopters by digital computers, considering wobble plate steering margin, compressibility, ground effects, separation and autorotation 20 p3561 A70-39716

Helicopter parts and assemblies fatigue life estimation and testing, discussing loading spectra, service conditions, etc 22 p4046 A70-43119

Helicopter rotor tests in large wind tunnel for increased flight speed, noting pressure and noise measurements 23 p4132 A70-44142

[ICAS PAPER 70-44] SA-341 Gazelle French military helicopter configuration, performance, flight characteristics, technological particulars and design 23 p4142 A70-44854

HELICOPTER PROPELLER DRIVE

V/STOL power drive systems structural efficiency, comparing mechanical and pneumatic components from weight-optimal viewpoint 04 p0622 A70-14901

[ASME PAPER 69-WA/AV-7] Helicopter mechanical power transmission design, describing gearing, shaft bending, bearings, lubrication, weight factors, etc [SAWE PAPER 844] 20 p3563 A70-40367

HELICOPTER ROTORS

U ROTARY WINGS

HELICOPTER WAKES

Rotor blade flutter in forward flight accounting for wake unsteady aerodynamic effect 17 p3184 A70-34727

Main rotor wake adverse effects on tail rotor directional control in low velocity wind 23 p4140 A70-44323

Prototype inspection equipment for automatic detection of fatigue damage in helicopter transmission gears teeth by magnetic perturbation method 01 p0097 A70-10011

Helicopter all-visibility operation realized by using main rotor blade as scanning radar antenna 05 p0793 A70-16040

Collision safety standards in helicopter services for shore-to-ship transportation of pilots, stores and spares 06 p1103 A70-17639

Helicopter dynamics structural model extended to LF longitudinal motions by including stabilizing feedback loop representing forward velocity influence on main rotor 06 p0987 A70-17910

Helicopter utilization in emergency transportation of civilian patients, discussing questionnaire results from medical and police agencies 08 p1454 A70-21937

Metabolic and heart rates determined in experienced and inexperienced pilots during Hiller 12-E and 12-EL helicopters flight through standard maneuvers 09 p1627 A70-23455

Visual search activity decrease observed as function of time-on-task for skilled and unskilled helicopter pilots, recording eye movements and blinks 09 p1628 A70-23463

Helicopter blade flapping torsion flutter behavior analysis showing stabilization effect in forward flight 10 p1958 A70-24559

Helicopter flight test and evaluation tools including data processing facilities to improve test validity [AIAA PAPER 70-373] 10 p1806 A70-24929

Helicopters for short haul intercity transport, discussing power failure safety, weather factors and costs 12 p2161 A70-27596

Helicopter gust response at high forward speed for various rotor loads noting effects of gust shape, gradual penetration, nonsteady aerodynamics and blade aeroelasticity 14 p2531 A70-30855

[AIAA PAPER 68-981] Soviet book on practical aerodynamics of Mi 6 helicopter covering engine/rotor power balance, control, flight characteristics and solutions to in-flight emergencies 14 p2532 A70-31414

Heat stress levels in cockpit of AH-1G Hueycobra helicopter parked in sunlight with closed canopy, using sweating copper mannikin 15 p2689 A70-31881

Corporate-executive market for helicopters related to fixed wing business air transportation problems [SAE PAPER 700285] 18 p3350 A70-36814

Soviet book on helicopter aerodynamics covering main rotor operation, types classification and various flight characteristics 19 p3355 A70-37390

Helicopter operations integration into civil air traffic system, noting special requirements for mixed fixed and rotary wing terminal environments 19 p3465 A70-38230

Helicopter cost reduction by transmission overhaul frequency reduction, discussing savings with on-condition maintenance 19 p3441 A70-38824

Comparative demand forecasting for military helicopter spare parts, stressing exponential smoothing model 20 p3740 A70-39643

Helicopter vibration measurement techniques, discussing in-service fault diagnosis 21 p3749 A70-40582

Helicopter dynamic tests for aeroelastic and mechanical instabilities and forced vibration problems 21 p3749 A70-40583

Integrated helicopter gravity measuring system for various terrains, describing instrumentation and recording monitors 22 p4042 A70-43663

He camera with reduced linear absorption coefficient for contact microradiography, relating exposure, X ray wavelength and atmosphere 01 p0084 A70-10013

Multistate impact parameter treatment of hydrogen-helium excitation collisions, considering distortion, back- and rotational-coupling and virtual transition sequence 01 p0147 A70-10285

Helium-cadmium laser operation, using DC cathaporesis to maintain spatially uniform optimal Cd vapor concentration 01 p0110 A70-10562

Gaseous He bubbles injection into liquid propellant launch vehicle fuel lines to reduce vehicle pogo oscillations by lowering feed system natural frequencies 01 p0196 A70-10851

Ferritic stainless steel embrittlement caused by He injected into tensile samples by alpha particle cyclotron irradiation tested at elevated temperatures 01 p0122 A70-11235

High temperature ductility improvement in stainless steels containing He, analyzing lattice damage and interphase cavities after fast neutron irradiation 01 p0123 A70-11246

Photoelectric line photometry used to study H beta/gamma and He I 4471 absorption line intensities of early B stars, determining projected rotational velocity 02 p0369 A70-12072

Helium gas shaft seal for spacecraft electrically driven LOX pump, noting advantages of floating carbon face seal type [ASLE FICFS PREPRINT 24] 02 p0308 A70-12168

He isoelectronic sequence 3d-nf transitions, determining UV wavelengths and oscillator strengths 04 p0739 A70-14601

Stark broadening of ionized helium lines by collective electric fields in theta pinch 04 p0722 A70-14684

Helium properties and utilization in NASA projects, discussing pressurization of fuel tanks cooling of superconducting magnets 04 p0720 A70-15633

Al foil exposed to solar wind on moon during Apollo 11 mission examined for helium particles, finding lunar solar wind albedo 05 p0900 A70-16093

Transient emissions on He I wavelength during breakup phase of auroral events, discussing observational interference by OH bands 05 p0907 A70-16277

He excitation by low energy He ions giving support for Rosenthal-Foley postcollision-interaction model, testing model predictions 05 p0885 A70-16556

He to carbon fusion reaction rate enhancement in dense matter by inelastic scattering processes, discussing C 12 deexcitation to ground state 05 p0885 A70-16934

Variational and Z-expansion calculations for magnetic quadrupole transitions decay rates of He sequence 05 p0920 A70-16942

Gaseous He measured for thermal conductivity along isotherms to observe pressure dependence 06 p1174 A70-17678

Hypersonic corner flow in He investigated by heat transfer, surface pressure, pitot surveys, oil and electron beam flow measurements [AIAA PAPER 70-227] 06 p1039 A70-18110

Charged particles and He nuclei spatial distribution from recordings in cosmic ray equator region by Cerenkov counter mounted on Proton 2 satellite 07 p1367 A70-19490

Mean lives measurement for excited levels in singlet system of neutral He using beam foil technique 07 p1338 A70-19821

Energy dependence of elastic total collision cross section of identical He molecules, using velocity selected primary beams at low target temperature 07 p1345 A70-20137

Anodic precursors of convergent cylindrical shock wave of z-pinch discharges in He and Ar 07 p1261 A70-20357

O and B type stars neutral He lines, studying UV line blanketing effects on predicted departures from LTE

Note on Bell-Kingston paper on Born total and differential cross sections for proton impact ionization of He

Axisymmetric helium jet transition to turbulent flow in air slipstream, measuring temperature and velocity profiles

Solar wind properties and helium abundance determined from satellite-borne electrostatic analyzers

Electron and proton impact excitations of He using Born two and four state versions of impact parameter treatment

Energy dependence and threshold behavior of ion Ar lines excited in low-energy He ion-Ar collisions

Neutral helium line profiles for line-blanketed model atmospheres grid

Ar ion lasers investigated for effect of added He on pulse output intensity

Correction factor for free stream Reynolds number errors resulting from low temperature viscosity in He wind tunnels

Potential energy curves for diatomic He molecules constructed by Rydberg-Klein-Rees procedures

H and He intraatmospheric migration and dissipation, considering MHD waves, ionospheric plasma motions, chemical reactions, etc

Nuclear reactions and elementary particle reactions in Friedman universe with positive lepton abundance and degenerate electrons, discussing prestellar helium synthesis

Non-LTE and LTE line profiles and equivalent widths for transitions in singlet and triplet systems of neutral He in hot stars, explaining anomaly

Exospheric density at opposite hemispheres, showing variations from winter helium bulge

CW Cd vapor laser oscillation achieved with slotted hollow cathode discharge containing He carrier gas at pressures of several Torr

Solar disk 10830 A He absorption line, attributing depression at blue wing to triplet

Schlieren optical method for measuring He jet penetration into supersonic flow

Charged particles and He nuclei spatial distribution from recordings in cosmic ray equator region by Cerenkov counter mounted on Proton 2 satellite

Long term helium-oxygen atmosphere effects on rats and mice, investigating biochemical and metabolic changes

Li ion elastic scattering by He, calculating ground state interaction potential

Excitation cross sections for Ar I and He I spectral lines in low energy He ion-Ar collisions

Solar neutrino fluxes, calculating capture rates and primordial helium abundance

He-Cd laser discharge, determining population densities and lifetimes for levels of Cd ion excited by He metastables

Compressibility factors and virial coefficients for He-N mixture, He and nitrogen at low temperatures and high pressures

He-Cd pulsed laser mode locking at 4416 and 3250 A using intracavity acoustic loss modulator

Argon and helium breakdown induced by ruby laser 50-picosec pulse at various pressures

Na I 5889 A pressure broadening by high temperature neutral He, allowing damping constant direct measurements

Helium abundance in unevolved main sequence eclipsing binaries by comparing to homogeneous models in mass luminosity plane

Closed coupled partial wave calculation of cross section for fine structure transitions in Na in collisions with He

Helium to electron excitation ratios for population inversion in helium-neon laser

Primary cosmic ray He nuclei rigidity measurement with magnetic spectrograph

P autoionization states of helium and hydrogen negative ions, calculating widths and shifts

Stellar interiors and cosmic He abundance observations, discussing B stars, sun galactic and globular clusters, planetary nebulae, interstellar medium, novae, etc

Carbon dioxide-helium laser hollow cathode negative glow discharge amplifier, discussing construction and advantages compared to other excitation media and discharge structures

Methane IR filter for monochromatizing He-Ne laser

Optimum tube diameter for maximum radiation output of single and multimode He-Ne lasers

Southern objective prism plates B stars with strong neutral He I absorption lines

High transmission Mylar window He cryostat for Mossbauer measurements

Carbon dioxide-He-nitrogen gas mixture pulsed discharge system afterglow gain measurements up to one atmosphere, using CW laser

Helium and nitrogen role in carbon dioxide laser excitation, discussing optimum gas mixture

Corona and voltage breakdown for spacecraft electrical components in low pressure helium-oxygen atmospheres, measuring between parallel plates

He-Ne gas laser, construction, operation and characteristic mode patterns

Threshold parameters of liquid and gaseous helium breakdown caused by ruby laser beam, noting Mandelstam-B Brillouin scattering in liquid phase

Solar disk 10830 A He absorption line, attributing depression at blue wing to triplet

H and He intraatmospheric migration and dissipation, considering MHD waves, ionospheric plasma motions, chemical reactions, etc

HELIUM AFTERGLOW

Microwave transmission through afterglow of RF excited electrodeless He discharge approximating low collision frequency plasma slab of uniform electron density in magnetic field

Hydrogen and helium emissions in upper atmosphere, observing amplifications towards geomagnetic poles and in winter hemisphere

Flowing afterglow system below 300 K for rate constants of certain gases association with helium third body, investigating oxygen cluster ions formation and reactions

Hydrogen and helium emissions in upper atmosphere, observing amplifications towards geomagnetic poles and in winter hemisphere

Electron attachment rate to sulfur hexafluoride in He buffered flowing afterglow

HELIUM ATOMS

Upper atmospheric atomic H and He concentration height distribution, considering L alpha and H alpha emissions, He emission, light components and direct measurements

Inelastic He atom-ion collisions provide understanding of capture and excitation cross sections

Born wave for atom-atom inelastic cross sections, calculating He excitation from ground state to higher states by H atom collision

Population of P level He excitation in solar prominences in H luminescence regions, noting ionization-recombination mechanism by UV radiation

Three body atomic systems with He atom and H negative ion on basis of scattering experiments dealing with resonance and threshold behavior

Born approximation used in calculating wave functions of helium atom for determining generalized oscillator strengths in first ionized continuum of helium

Helium excitation from ground to excited state by electron impact, determining differential and integral scattering cross sections

Solar prominences monochromatic images in He I D3 and He II 4686 lines allowing for contamination in 4686 images

Population of P level He excitation in solar prominences in H luminescence regions, noting ionization-recombination mechanism by UV radiation

Mean lives of excited levels in neutral He by beam foil method testing calculations for radiative transition probabilities

Cosmic X rays interstellar absorption, giving atomic He total photoionization cross section

HELIUM FILM

Hartree model to study superfluid He film bound to uniform substrate

Liquid He II, determining correlation of depth effect on film boiling heat transfer with vapor film geometry from motion pictures

HELIUM IONS

Solar helium-like ion line intensities, determining electron densities and excitation rate ratios

Inelastic He atom-ion collisions provide understanding of capture and excitation cross sections

He excitation by low energy He ions giving support for Rosenthal-Foley postcollision-interaction model, testing model predictions

Dissociative charge-transfer reactions of positive He ions with molecular N and O measured in drift tube-mass spectrometer

Inelastic scattering of He ions by Ne as function of angle, initial energy and energy loss using collision spectroscopy

Binary star spectrum analysis establishing seasonal and season-to-season variations in He II emission band intensity and shift toward long wave region

Oxygen enhancement ratio and relative biological effectiveness of accelerated helium nuclei on mouse tumor cells, discussing applicability in radiation therapy

Stark effect He II and H beta on lines observed for transverse and longitudinal fields, using beam-foil light source

D-pattern changes of helium ions irradiated polycrystalline Mo and Ni specimens, observing line splitting

Born approximation used in calculating wave functions of helium atom for determining generalized oscillator strengths in first ionized continuum of helium

Helium ions diffusion perpendicular to magnetic field in He gas, measuring coefficients as function of field strength and for various gas pressures

Helium ion bombardment activated tungsten crystal surface migration using field emission microscopy

Cross sections for electron impact excitation of positive helium and hydrogen ions, using non-relativistic Coulomb-Born-Oppenheimer reactance matrices

Metastable He ion two photon decay, observing photon coincidence angular correlation in spectral distribution

He II 3s and 3d states mean lives and initial population as function of energy, analyzing emitted radiation intensity

Lifetimes and fine structure of differentially metastable autoionizing states of negative He ion in axial magnetic field, using time of flight techniques

Short period Pc-1 pulsations frequency spectra relationship to magnetospheric He ion concentration

Helium II line broadening in high temperature plasma, measuring profile for comparison with theoretical prediction

He/plus/-H/minus/ collisional charge exchange cross sections, using modulated inclined ion beams technique

He/plus/-H/minus/ collisional charge exchange cross sections, using modulated inclined ion beams technique

HELIUM ISOTOPES

Cosmic ray origin in high energy H and He isotropic abundances and energy spectra observed by IMP 4 satellite during solar quiet times

02 p0358 A70-12250

He 4 and Ar 40 abundance in lower Venus atmosphere, underlining He 4 dominance in upper atmosphere

03 p0575 A70-13982

Energy accommodation coefficients for He³-W and He⁴-W, comparing results with classical gas-solid interaction theory

04 p0721 A70-14388

Accommodation coefficients ratio of He 4 to He 3 measured on W and K clean surfaces

06 p1183 A70-18257

Velocity distribution of atoms evaporating from superfluid He II at low temperatures, noting roton shifting and multiscattering processes

06 p1108 A70-18639

Carbonaceous chondrites primordial He and Ne isotopes variations

07 p1388 A70-20037

Cross sections measured for symmetric $p, 2p$ reactions on deuterium and He, discussing nonsymmetric $p, 2p$ events in He

08 p1548 A70-21233

Helium melting pressure curve to calibrate cerium magnesium nitrate or NMR low temperature thermometers

09 p1728 A70-22999

High energy proton-He 3 elastic scattering cross section measurement, comparing result with Glauber model calculation

13 p2456 A70-29459

Thermonuclear reactions in interior of sun, discussing models for He isotope concentration and flow to interpret solar neutrino generation

13 p2494 A70-29573

Polarized Co⁵⁹ target using He³-He⁴ dilution refrigerator, analyzing fast neutron scattering

14 p2584 A70-30508

Galactic abundances and cosmic ray spectra by IMP-4 satellite, obtaining He ratio

15 p2793 A70-31794

Microscopic quantum theory of liquid He isotopes emphasizing method of correlated basis functions

16 p2951 A70-32997

Light He isotope effect on He-Ne laser power output

20 p3641 A70-39737

Friedmann universe evolution after big bang via Hagedorn hadronic equation of state, noting primordial He abundance criterion

21 p3888 A70-41122

Criticism of theory for cosmogenic tritium produced oceanic He 3 excess

21 p3920 A70-41883

Differential elastic cross sections of 42 MeV alpha particles scattering from He 3, using optical model with spin-orbit potential

22 p4076 A70-42722

Green function theory of evaporation of He 3 atoms from liquid He 3/He 4 mixtures, determining energy distribution

24 p4377 A70-45255

HELIUM PLASMA

Local thermodynamic equilibrium conditions in superhigh pressure He plasma produced by laser action, obtaining threshold electric field relationship with gas pressure and temperature

02 p0312 A70-12078

Satellite lines of forbidden transition in laser-produced He plasma attributed to longitudinal plasma oscillations

02 p0379 A70-12717

Acoustic wave excitation and damping in cryogenic He plasma produced by HF pulse discharge, considering nonadiabatic heating and dissipation during reflection

03 p0529 A70-13056

Solar flare induced interplanetary shock and helium enriched driver gas observed on 13 February 1967, discussing wind velocity and plasma acceleration

06 p1152 A70-18526

Intense quasi-steady He plasma discharge stability in magnetic field measured by Langmuir and optical techniques

07 p1354 A70-20321

Thermal properties associated with temperature gradients in He-K plasma, studying mass motions initiated by cold wall contact

09 p1735 A70-22844

Electron temperature and concentration in decaying He and Ar plasmas with cesium vapor additions

11 p2092 A70-26733

Magnetically constrained steady state plasma production by hot cathode DC arc discharge in He

13 p2465 A70-29819

Excited atoms transfer mechanism in helium plasma, using He-Ne laser

17 p3106 A70-35102

Plasma satellites near He I forbidden lines during turbulent heating

19 p3475 A70-37441

Helium plasma ionization rate in positive column with DC discharge, considering gas pressure, electron density, electric field strength and plasma radius

19 p3476 A70-37559

Stationary DC discharge positive column in helium, determining production balance and loss of charge carriers

19 p3476 A70-37560

Equilibrium compositions of helium-nitrogen, argon-nitrogen and xenon-nitrogen plasmas at atmospheric pressure between 5000 and 35,000 K

19 p3552 A70-37831

Homogeneous helium plasma column LF wave propagation in uniform magnetic field

22 p4082 A70-43216

Local thermal equilibrium validity for electron temperature and density determination in reflected shock waves in He plasma, comparing laser scattering and spectroscopic methods

23 p4229 A70-44986

Temperature, densities and electric field strength of cascaded arcs burning in He under normal pressure

24 p4384 A70-45425

Theta pinch He plasma stability using cusp coils added to mirror coil ends

24 p4386 A70-45611

Density correlation measurements for diffusion coefficient in magnetized He plasma

24 p4386 A70-45614

HELIUM 2

U HELIUM ISOTOPES

HELIUM 3

U HELIUM ISOTOPES

HELIUM 4

U HELIUM ISOTOPES

HELIXES

U CURVES [GEOMETRY]

HELLMANN-FEYNMAN THEOREM

Integral Hellmann-Feynman formula for dissociation energies in H, Li and LiH molecules, discussing transition densities and dissociation energy

12 p2275 A70-27569

Integral Hellmann-Feynman formula applied to binding energy of molecular H and LiH, using SCF wavefunctions for atomic states

12 p2276 A70-27570

HELMETS

Helmet loss and failure role in major and fatal head injuries of USAF ejections

01 p0032 A70-10370

Army aviation personnel ear protection, evaluating APH-5 and SPH-4 helmets

06 p1002 A70-17703

Fleet evaluation program of AOH-1 helmet for replacement of standard flight helmet, oxygen mask retainer kit and oxygen regulator

06 p1002 A70-17709

Foamed-in-place polyurethane for form fitting pilot helmet shock absorbing liner noting medical applications

07 p1218 A70-19015

Pilot helmets, discussing sound attenuation, noise protection and speech intelligibility

12 p2177 A70-27040

Testing laboratory for safety, survival and life support equipment concerning parachutes, aircrew protective helmets and maintenance manuals

23 p4141 A70-44488

HELLMOLTZ EQUATIONS

Summary representation formulas for solving boundary value problems for Helmholtz and Poisson equations in rectangle

03 p0518 A70-13076

Two dimensional wave diffraction problems involving discontinuity line, analyzing instability behavior of geometrically induced singularities by applying integral transform on Helmholtz equations

03 p0525 A70-14199

Helmholtz integral for radio waves scattering from surfaces expanded for reflection from terrain or atmospheric layers

04 p0648 A70-14964

Modified method of cross sections applied to solution of scalar Helmholtz equation in infinite symmetrical waveguides

12 p2272 A70-27296

Nonhomogeneous Helmholtz vibration equation for sectorial-annular membranes and plates under arbitrary load, using Fourier method

19 p3535 A70-37343

Helmholtz equation initial value problem solution by integral operators

19 p3459 A70-38680

Multidimensional correspondences between Helmholtz equation eigenfunctions and eigenvalues, including involutorial transformations

23 p4218 A70-44211

HELLMOLTZ VORTICITY EQUATION

Unsteady hydrodynamic coefficients of supercavitating hydrofoil in harmonic oscillation in Helmholtz flow with free surface, investigating frequency, angle of attack and submergence depth

07 p1255 A70-19134

First vorticity theorem of Helmholtz derived in general relativistic and covariant differential form, proving invariant kinematical identity

10 p1916 A70-24498

HEMATITE

Lamellae stresses and magnetostrictive effects on magnetic properties of titanomagnetite and ilmenohematite series minerals

15 p2728 A70-31993

HEMATOCRIT

Haematocrit variations effect on electromagnetic blood flowmeter sensitivity, discussing blood specific impedance changes

07 p1217 A70-18951

HEMATOCRIT RATIO

Chronic hypoxia effects on heart size and hematocrit ratios tested in pigeons

12 p2172 A70-28075

HEMATOLOGY

Hematologic changes in rats under hypergravity, effects of vitamin B12, folic acid and return to 1 g

06 p0991 A70-17283

Peripheral blood and structural changes in hemopoietic organs of rabbits and mice exposed to microwave radiation

07 p1216 A70-18730

Maximum isovolemic hemodilution by volume substitution determined by plasma expanders infusion in dogs

10 p1821 A70-25083

Hematologic responses of mice subjected to continuous hypoxia in subatmospheric pressure

11 p1989 A70-26666

Hematologic changes in mice associated with meningovirus infection and hypobaric hypoxia during barometric pressure changes

15 p2681 A70-31878

Hematology of sea level and high altitude native Sonoran deer mice, correlating hemoglobin electrophoretic patterns with oxygen affinity

15 p2686 A70-32835

Portable battery operated system for rapid measurements of blood plasma electrolytes during aeromedical evacuation

20 p3579 A70-39433

HEMATOPOIESIS

Peripheral blood, neutrophil myeloid hematopoiesis, phagocytic activity and serotonin level in gamma irradiated dogs

03 p0423 A70-13706

Peripheral blood, neutrophil myeloid hematopoiesis, phagocytic activity and serotonin level in gamma irradiated dogs

11 p1985 A70-25506

HEMATOPOIETIC SYSTEM

Gnotobiotic techniques for human hematopoietic cell culture establishment and maintenance, considering culture transfer

01 p0027 A70-11311

HEMISPHERE CYLINDER BODIES

Stagnation point velocity gradients for spherical segment models with bluntness ranging from hemisphere to flatnose cylinder in hypersonic flow

03 p0406 A70-12947

HEMISPHERES

Heat transfer rates to stagnation point of hemisphere in supersonic high enthalpy low density nitrogen plasma flow

[ASME PAPER 69-WA/HT-49] 04 p0614 A70-14799

HEMISPHERICAL SHELLS

Structural vibration of ring stiffened and mass-attached hemispherical shells

08 p1593 A70-21618

Thermal radiation absorption in hemispherical cavity, determining apparent absorptivity for diffuse and parallel irradiation

09 p1790 A70-23565

Hemisphere model flow field investigations in low density plasma wind tunnel, considering flow regimes of transition and shock formation

15 p2673 A70-32838

Metallic diaphragms design, fabrication and testing for cryogenic fluid and positive expulsion systems [AIAA PAPER 70-683]

16 p2918 A70-33582

Oscillations of rigidly clamped elastic liquid filled hemispherical shell with gas bubble

18 p3242 A70-36583

Hollow spheres and hemispheres nonlinear axisymmetric deformation, using shell theory reduced to two point boundary value problem for differential equations

22 p4112 A70-42288

HEMODYNAMIC RESPONSES

Acceleration component in pelvis to head direction found influencing hyperemia of brain at various g forces

04 p0630 A70-14579

Hemodynamic determinants of gallop sounds in patients with aortic valve disease based on clinical, hemodynamic and angiographic observations

04 p0633 A70-15308

Rat body fluids displacement during positive centripetal accelerations by radioisotope tracer com-

- pounds, freezing rates in liquid nitrogen to fix hemodynamic changes 07 p1202 A70-18796
- Prolonged hypodynamia effect on human blood serum mineral content and enzyme activity 10 p1815 A70-24677
- Electrocardiac activity, myocardium and hemodynamic disorders in subjects after prolonged hypodynamia with or without physical exercises and during orthostatic test 10 p1817 A70-24692
- Position dependent variations in intrapericardial, pleural and esophageal pressures and cardiac output in thorax of dogs 13 p2356 A70-29946
- Primary myocardial disease, describing hemodynamic and angiocardigraphic observation of left ventricular volume and wall changes 16 p2848 A70-33110
- Hemodynamic response to dopamine before and after myocardial infarction in dogs 17 p3026 A70-35200
- Blood platelets aggregation and release reaction in thromboembolic disease due to injury 17 p3032 A70-35471
- Atropine effects on circulatory responses to diminished effective blood volume and vasodepressor syncope, noting heart rate increase 17 p3032 A70-35562
- Hemodynamic changes in Andean native after two years at sea level, measuring intravascular pressures, cardiac output, heart rate and stroke index 20 p3571 A70-39427
- Renal hemodynamic response of unanesthetized dogs to positive accelerations within physiological tolerance range, measuring pressure and blood flow velocity 20 p3577 A70-40332
- Myocardial blood flow response to cardioacceleration by right atrial pacing in normal subjects, using coincidence counting 21 p3760 A70-40576
- Human elbow induced forearm and hand vessels tachyphylaxis to angiotensin, noradrenaline and acetylcholine compared to vascular response of vasopresin 21 p3761 A70-40577
- Hemodynamic indices of aged individuals engaging in physical exercises over long period of time 22 p3970 A70-42906
- Age determined hemodynamic reactions in men and women performing walking motions in lying position 22 p3970 A70-42908
- Hypothermia and body rewarming effects on renal hemodynamics in anesthetized dogs 24 p4301 A70-45998
- Dynamic response of peripheral blood flow to hypothalamic temperature waveforms in baboon, using implanted thermodes 24 p4303 A70-46116
- ### HEMODYNAMICS
- Renal hemodynamics and clearances alterations in owl monkey, using hemorrhagic shock procedure 02 p0234 A70-11732
- Hemodynamics in cardiosclerosis patients and healthy subjects under hypoxia, investigating heart activity and blood circulation 06 p0994 A70-17667
- Left ventricle pressure rise rate as function of heart contractility and hemodynamics 09 p1623 A70-23587
- Sodium balance effect on intrarenal distribution of blood flow in normal man determined with Xe washout method 10 p1810 A70-24005
- Human vascular tonus and hemodynamics during prolonged hypokinesia, observing changes in reaction to cold and reduced vascular tonicity 10 p1814 A70-24670
- Prolonged hypodynamia effects on hemodynamics using dye dilution method, noting adaptability in cardiovascular system 10 p1814 A70-24671
- Arterial oscillograms, pressure and heart beat rate during prolonged hypodynamia, noting neurocirculatory dystonia 10 p1817 A70-24693
- External respiration, hemodynamics, oxygen transport and consumption in lungs during static load tests 10 p1822 A70-25176
- Cardiovascular model for closed loop analog simulation of congenital heart defects hemodynamics 11 p1990 A70-25705
- Unanesthetized dogs renal hemodynamic response to negative centrifugal acceleration 15 p2681 A70-31883
- Aldosterone effects on hemodynamics of dogs under restricted motor activity, observing cardiac activity stimulation 17 p3030 A70-35358
- Hemodynamic effect of lidocaine given by infusion and bolus injections in myocardial infarction, examining cardiac output, heart rate, systolic left ventricular and aortic pressures 19 p3366 A70-38575
- Circulating blood volume and heart minute and stroke volumes in rabbits, using isotope-labeled albumin 19 p3366 A70-38724
- Human arterial hypertension, correlating ECG changes with systemic hemodynamics 20 p3573 A70-40069
- Continuous blood oxygen analyzer standardized with atmospheric air, demonstrating on dogs during occlusion of left anterior descending coronary artery 21 p3772 A70-42162
- Blood circulatory system and hemodynamic interdependencies simulation by analog computer, using Warner model 23 p4155 A70-44862
- Sea sickness symptoms in relation to reduced minute blood volumes in human after Coriolis acceleration 23 p4149 A70-45079
- Conduit arteries viscoelastic properties in normal and hypertensive dogs from recorded pressure and diameter waves 24 p4299 A70-45808
- Arterial hemodynamics in hypertension, discussing pulse changes mechanism as consequence of decreased arterial distensibility via disturbed relationship between ventricular ejection wave and impedance characteristics 24 p4299 A70-45809
- ### HEMOGLOBIN
- NT CARBOXYHEMOGLOBIN
NT OXYHEMOGLOBIN
- Hemoglobin concentration in red blood cells in men of various ages as function of altitude, discussing correlations with body weight and plasma protein 01 p0024 A70-10978
- Separate gamma irradiation effect of enzyme and hemoglobin-albumin-globulin substrates on proteolysis dynamics 03 p0419 A70-13308
- Temperature and hemoglobin concentration effect on oxygen solubility in blood, constructing table for Bunsen solubility coefficients 03 p0428 A70-14156
- Nomograms for correlation of dose to methemoglobinemia or plasma monomethylhydrazine /MMH/ concentration observed on dogs, considering human skin contact evaluation 06 p0992 A70-17298
- Oxygen diffusion in presence of hemoglobin taking into account chemical kinetics, showing approximate and computer solutions 10 p1819 A70-24772
- Oxygen diffusion facilitation in vivo and nonsteady state conditions under physiological circumstances, emphasizing hemoglobin in red cells and myoglobin in muscle 12 p2171 A70-28024
- Xenon absorption by myoglobin at various temperatures and pressures, presenting evidence for HpXe formation 14 p2545 A70-30927
- Hematology of sea level and high altitude native Sonoran deer mice, correlating hemoglobin electrophoretic patterns with oxygen affinity 15 p2686 A70-32835
- Oxygen-hemoglobin reaction rate constants in red cells obtained by applying in vitro blood data to solutions of differential equations describing intracellular oxygen transport 15 p2686 A70-32846
- Carbon dioxide content of dialyzed human hemoglobin measured at specific pressure and varying pH values as function of 2,3 diphosphoglycerate 19 p3364 A70-38367
- Heart stroke volume estimation at submaximal exercise using blood hemoglobin content and heart rate 20 p3576 A70-40328
- Human hemoglobin chain, noting zeta chain synthesis during embryonic development 24 p4297 A70-45406
- Temperature gradient spectra on complexes of met-myoglobin and methemoglobin with ligands, discussing boundary forms equilibria for various electron spin configurations 24 p4301 A70-45985
- ### HEMOLYSIS
- Prolonged hyperoxia effect on red blood cell survival and hemolysis in rats on normal diet 15 p2681 A70-31786
- Erythrocyte suspension subjected to gas bubble ultrasonic oscillation, investigating hemolysis mechanism 20 p3573 A70-39981
- ### HEMORRHAGES
- Renal hemodynamics and clearances alterations in owl monkey, using hemorrhagic shock procedure 02 p0234 A70-11732
- Blood pH effects on adrenomedullary response to hemorrhage, studying catecholamines release in anesthetized dogs 02 p0235 A70-11733
- Blood volume and circulation rate in dogs subjected to traumatic shock and hemorrhage under high mountain conditions 07 p1198 A70-18708
- Pneumatic compression effects on canine cardiovascular dynamics after hemorrhage tested in G-suit inflation 11 p1988 A70-26516
- G suit application to clinical therapeutics, noting intraabdominal bleeding control 21 p3767 A70-40737
- Oxygen transport, arterial resistance and consumption in normovolemic and hypovolemic dogs in hemorrhagic shock 24 p4302 A70-46106
- ### HEOS A SATELLITE
- HEOS 1 satellite project management, discussing costs, supervision problems and roles of experimenters, contractors, NASA and ESRO 01 p0221 A70-11112
- Interplanetary space investigation by HEOS 1 satellite during maximum solar activity, discussing orbital apogee, mission and technical requirements 01 p0186 A70-11113
- HEOS 1 satellite for interplanetary space exploration, describing eccentric orbit, structure, power supply, attitude measurement and control, spin rate control, telemetry and telecommand systems 01 p0196 A70-11114
- HEOS 1 satellite telemetry, telecommand and tracking systems, noting data transmission degradation due to high solar activity 01 p0045 A70-11115
- HEOS 1 launch operations, discussing test and checkout phase, mating with Thor Delta launch vehicle, countdown phase and launch 01 p0196 A70-11116
- Postlaunching operations putting HEOS 1 satellite into orbit, verifying subsystem functions, starting experiments and tracking for data recovery 01 p0197 A70-11117
- European Space Operations Center activities in observing HEOS 1 satellite, discussing launch, data processing and S-11 experiment involving ionized Ba cloud creation 01 p0197 A70-11118
- HEOS-1 satellite development for ESRO to investigate interplanetary magnetic fields, cosmic radiation, solar wind outside magnetosphere and earth shock wave 02 p0382 A70-12646
- ESRO German-built satellite HEOS 1 planned scientific space measurements, required orbit and technical concepts 03 p0580 A70-13798
- ESRO 1, ESRO 2 and HEOS 1 satellites solar arrays orbital performance 09 p1765 A70-22648
- HEOS 1 low energy proton measurements in interplanetary space, discussing particle direction during solar event and anisotropy time history 19 p3495 A70-37505
- High energy solar electrons observed by HEOS-A1 satellite, discussing semitransparent barrier existence at distance from sun 19 p3497 A70-37521
- Electron energy spectra range from HEOS A1 satellite mounted Cerenkov counter with shower telescope 19 p3503 A70-38103
- Heos 1 research satellite space simulation tests at ESTEC test facility 19 p3399 A70-38292
- ### HEOS SATELLITES
- NT HEOS A SATELLITE
- Test program preceding first German satellite experiment using HEOS satellite for Ba ion cloud injection into deep space 02 p0380 A70-12081
- Satellite HEOS-1 S 73 experiment launched during solar maximum to determine flux and energy distribution of solar wind positive component 05 p0900 A70-16077
- HEOS-A2 project development plan for investigating unexplored interplanetary space in eccentric orbit 05 p0923 A70-16588
- Reliability and environmental testing of residual magnetic field measurements of satellite HEOS-A1 electronic equipment, using Rb vapor magnetometers 13 p2380 A70-30031
- ESRO-1, ESRO-2 and HEOS-1 simultaneous observation of solar event of 25 February 1969, describing satellite and experiments 19 p3531 A70-37496
- ESRO satellite projects IRIS/ESRO 2, Aurorae/ESRO 1, HEOS-A1 and future TD-1 and HEOS-A2 23 p4264 A70-45004
- ### HEPARINS
- Heparin role in anticoagulant therapy for myocardial infarction based on proved application to other venous thrombotic diseases, noting hemorrhagic complications controllability 04 p0636 A70-15465
- ### HEPTANES
- Cycloheptane and mixture of exo- and endo-cycloheptene heats of combustion and formation, isomerization and hydrogenation 01 p0213 A70-10134

- HF pressure oscillations during heat transfer to n-heptane at various flow rates and pressures, studying film or bubble boiling associated with oscillations
03 p0605 A70-13516
- N-heptane and Freon-13 droplets vaporizing size and temperature at supercritical pressures in heated air stream
06 p1182 A70-18204
[AIAA PAPER 70-6]
- Heats of combustion and free isomerization energies of exo- and endo-isomers of 2- and 1-methylbicyclo heptane
22 p3982 A70-42680
- Specific heat and thermodynamic functions of endo- and exo-isomers of 2-methylbicyclo heptane in 12-310 K temperature range
22 p3982 A70-42681
- HERCULES NOVA**
Stellar system DQ Herculis photometry by synchronous signal averaging, indicating sinusoidal light curve with increasing binary period
02 p0373 A70-12392
- HEREDITY**
Familial aggregation for coronary artery disease and familial similarities in coronary anatomy, considering possible genetic analysis of myocardial infarction
04 p0636 A70-15467
- Long rhythms of periodic disparate heritable diseases in man
19 p3365 A70-38414
- HERMETIC SEALS**
Electroexplosively powered release valve for high pressure N stored in hermetically sealed container of missile, discussing design and performance tests
03 p0546 A70-14106
- Hermetically sealed miniature strain gages /tensometers/ design and testing, noting insensitivity to effects of fuels and oils
11 p2054 A70-26430
- Microcircuit packaging /primarily hermetic/ and assembly techniques, considering cost reduction
20 p3597 A70-39443
- HERMITIAN POLYNOMIAL**
Spatially homogeneous Boltzmann equation containing initial distribution functions expandable into Hermitean polynomials, using ordinary differential equations
03 p0526 A70-14302
- Multiplication theorem for Shtraus characteristic functions of quasi-Hermitean operators, including open systems coupling
05 p0877 A70-16880
- One dimensional steady neutral shock wave structure, using expanded Boltzmann equation distribution function in terms of Hermite polynomials
07 p1260 A70-19984
- Incompressible homogeneous isotropic turbulence velocity expanded in Hermite functionals of Gaussian white noise random function advected by fluid
11 p2040 A70-26543
- HERTZSPRUNG-RUSSELL DIAGRAM**
Red subluminescent stars and high UV excess stars in region between main sequence and white dwarfs, tabulating observations of stellar color and magnitude
01 p0182 A70-10795
- Horizontal branch and red giant stars ratio estimated in globular clusters for He abundance
05 p0906 A70-15894
- HR diagram calibration based on proper motions and radial velocities, deriving absolute magnitudes and statistical parallaxes
06 p1149 A70-18456
- Three color photometry of RW Auriga stars, discussing UVB curves, H-R diagram and UV emission excess
15 p2797 A70-31612
- Two dimensional quantitative spectral classification of F-G5 stars, using meniscus telescope with preobjective prism at Abastuman observatory
15 p2797 A70-31613
- Stellar evolution in globular clusters, considering H-R diagrams of age, He abundance and thermal instability
16 p2973 A70-33076
- H-R diagram stellar spectra interpretation using model atmospheres describing temperature, gravity and chemical composition
17 p3169 A70-35381
- Initial horizontal branch metal poor star models, examining opacities, luminosity and cluster ages of RR Lyrae stars
18 p3317 A70-37006
- Dispersed stellar clusters color excesses and distance moduli from color-magnitude diagram, considering evolutionary deviation from main sequence
18 p3323 A70-37138
- Stellar ring 373, comparing color-magnitude and color-color diagrams to adjacent star fields
21 p3888 A70-41121
- Globular cluster color-magnitude diagram parameters, examining giant branch and metal content
21 p3889 A70-41153
- Color-magnitude diagram of star cluster Kron 3 in Small Magellanic Cloud, using electronographic photometry
22 p4102 A70-42978
- Globular cluster M5 giant, asymptotic and horizontal branches, determining color-magnitude diagram and luminosity
22 p4109 A70-43745
- Red supergiants location in H-R diagram, discussing significance of mass loss, rotational mixing and neutrino emission as stellar model mechanisms
24 p4403 A70-45393
- HERZBERG BANDS**
Chemiluminescent reaction rates measurements for emission of diatomic oxygen molecules Herzberg bands in oxygen and oxygen-inert-gas afterglows
03 p0440 A70-13579
- Photoelectric intensity measurements on emission bands of oxygen Herzberg I system excited in argon-oxygen afterglow
03 p0528 A70-14350
- Excitation and layers heights for 5577 A and O2 bands of atmospheric and Herzberg systems in night airglow estimated, suggesting Chapman reaction for emission
08 p1492 A70-21755
- HETEROCYCLIC COMPOUNDS**
NT ACETAZOLAMIDE
NT ADENOSINE DIPHOSPHATE [ADP]
NT ADENOSINE TRIPHOSPHATE [ATP]
NT ADENOSINES
NT ASCORBIC ACID
NT ATROPINE
NT AZINES
NT AZOLES
NT AZULENE
NT CAFFEINE
NT CYANOCOBALAMIN
NT FOLIC ACID
NT INDOLES
NT MORPHINE
NT NICOTINAMIDE
NT OXAZOLE
NT PHTHALOCYANIN
NT PYRIDOXINE
NT PYRROLES
NT RDX
NT RETINENE
NT THYMININE
NT THYMIDINE
NT TOCOPHEROL
NT TRYPTOPHAN
NT URIC ACID
NT XANTHINES
- Cyclization of N-allylamides to disubstituted-2-oxazolines, giving melting points, yields, picrate melting points and NMR spectra
02 p0249 A70-11681
- Red bicyclic condensation product from reaction of acetone with sym-trinitrobenzene and diethylamine
02 p0251 A70-12278
- Protonation mechanism in acid catalyzed cyclization reactions of 2-acetamido 3-methylbicyclo-heptene
02 p0253 A70-12523
- Polymers with high temperature oxidation resistance, discussing problems caused by aromatic heterocyclic structures and manufacturing methods
05 p0873 A70-16604
- Ionene polymers, investigating cyclic and linear compounds and reaction products from tetramethyldiaminoalkanes and dibromoalkanes using NMR, IR and mass spectroscopy
06 p1004 A70-17511
- Photochromism of dihydroquinoline compounds and absorption spectra of color forms, noting color development upon UV light irradiation and thermal eradication
09 p1629 A70-22334
- IR Raman and vibrational spectra and structure of gaseous and liquid 1-pyrazoline
16 p2857 A70-34007
- Oxadiazolone pyrolytic and photolytic fragmentation, noting intramolecular cyclizations and intermediate azomethine nitrene production
17 p3041 A70-34771
- Photolysis of 3-phenyl-oxadiazol-5-one by UV irradiation, eliminating carbon dioxide
17 p3041 A70-34772
- Heterocyclic polymer BBB properties, discussing IR absorption studies of structure
21 p3783 A70-42131
- HETERODYNING**
NT OPTICAL HETERODYNING
- Three frequency heterodyne system for acquisition and tracking of radar and communications signals, noting applicability in optical and microwave ranges
06 p1010 A70-17948
- Relaying interferometer design consisting of heterodyne frequency diversity antennas with coherent mixer, relaying transmitter and receiver
08 p1495 A70-21071
- Heterodyne conversion transducer large signal internal parameters dependence on heterodyne, signal amplitudes and intermediate voltage
16 p2873 A70-33240
- Superheterodyne EPR spectrometer microwave bridge using single X band klystron
23 p4170 A70-43798
- HETEROGENEITY**
Composite orthotropic cylindrical shells linear thermoelastic equations solution for fixed end boundary conditions, noting heterogeneity effects on stress distribution
17 p3184 A70-34909
- Metalized solid propellant, calculating condensed phase distribution heterogeneity effect on performance
18 p3300 A70-37207
- Heterogeneous materials statistical theory, evaluating bounds for effective elastic constants by cell model using variational principles and perturbation solution
20 p3729 A70-40033
- Thin circular cylindrical panels in supersonic gas current parallel to generatrices, calculating heterogeneity effect on flutter
22 p4113 A70-42603
- HETEROTROPHS**
Biogeocenosis applicability to artificial closed ecological systems consisting of plants creating organic matter and heterotrophic organisms
13 p2353 A70-29501
- HEURISTIC METHODS**
Human performance evaluation and data acquisition as requirements for heuristic analytical models in systems engineering
05 p0805 A70-16008
- Heuristic principles for self organization algorithm of cognitive automation system with active learning strategy
08 p1466 A70-20874
- Group Method of Data Handling based on heuristic self organization for solving complex system problems, with applications to random processes prediction
10 p1845 A70-24869
- Heuristic programs and approaches in artificial intelligence
15 p2706 A70-32565
- Fluid turbulence unified heuristic model, defining determinate solutions for Navier-Stokes equations numerical integration at high Reynolds numbers
17 p3074 A70-35884
- Photoelimination reactions of macromolecules, emphasizing intermediate pathways heuristic description via energy level diagrams
23 p4157 A70-44391
- Heuristic self organizing systems role in technical cybernetics
24 p4321 A70-45645
- Turbulent flow mechanics heuristic exposition, discussing random processes, instability, nonlinear interactions, energy exchange, intermittency dependence on reynolds number, fluid properties and boundary conditions effects, etc
24 p4326 A70-45948
- HEUS ROCKET ENGINES**
HEUS solid rocket motor impulse control, describing liquid quench concept development through full scale test firing
[AIAA PAPER 70-1308]
16 p2969 A70-33600
- HEXAGONAL CELLS**
Extended chain crystals of hexagonal Se temporary superheating before final melting, presenting melting equation
01 p0126 A70-10222
- Surface energy data calculated for bcc and hcp metals and high melting point compounds
06 p1090 A70-17845
- Superconductivity in noble metal rich hexagonal close packed phases and fcc solid solutions ascribed to Fermi surface-Brillouin zone interaction
15 p2785 A70-32398
- Twinned hexagonal martensites crystallography in Ti alloys, discussing alpha-beta and beta-fcc transformations
17 p3118 A70-34405
- Hexagonal crystal dislocations treatment based on anisotropic elasticity theory, obtaining formulas for displacement and stress fields
19 p3454 A70-38954
- Crystallography of euhehedral single crystals from lunar troilite indicating hexagonal forms consistent with high temperature NiAs type structure
21 p3898 A70-41522
- HEXENES**
Cyclohexene oxide mass spectral fragmentation by means of deuterium labeled analogs
09 p1630 A70-23397
- HEXOGENES (TRADEMARK)**
Accelerating shock wave fronts by detonating passive troyl and hexogen using high speed photography
09 p1658 A70-22103
- HFB-320 AIRCRAFT**
Flutter investigation on model designed and constructed for tail unit of HFB 320 Hansa jet aircraft, discussing classical and statistical methods
04 p0775 A70-15180
- HIBERNATION**
Physiology of hibernation and hypothermia, noting potential use for metabolic need reduction during long interplanetary flight
10 p1943 A70-24757

Norepinephrine synthesis inhibition effect on arousal triggering and maintenance in hibernating golden hamsters, examining sympathetic activity
23 p4148 A70-44874

Hibernation and glycerol production in wasps *Ichneumonidea*, discussing possible physiological cryoprotective function
24 p4304 A70-46140

HIERARCHIES
NT DICHOTOMIES
Lines and letters identification and localization relationships to stimulus attributes in visual perception supporting hierarchical processing hypothesis
03 p0425 A70-13825

HIGH ACCELERATION
Human tolerance to short duration high acceleration in centrifuge concerning peripheral or central vision trouble or synopses
09 p1626 A70-23112

HIGH ALTITUDE
Mesoscale slope limits in constant pressure surfaces relation to g-forces on aircraft at SST altitude, using radiosonde measurements
14 p2530 A70-30607

High altitude neutron supermonitor investigation of cosmic ray microvariations
18 p3307 A70-36104

High altitude humidity from millimeter-band water vapor lines, using EHF atmospheric spectral transparency calculation
19 p3461 A70-37633

Atmospheric humidity measuring equipment and procedures for high altitudes, considering hygrometers, mass spectrometers, sondes, absorption spectra, etc
19 p3461 A70-37635

HIGH ALTITUDE BALLOONS
Twilight brightness measurements with balloons, scattering coefficient and indicatrix for high altitudes and comparison with Rayleigh-Cabann theory
01 p0079 A70-11218

Cosmic gamma radiation sources above 50 Mev investigated by high altitude balloons in Northern Hemisphere with spark chamber system
05 p0904 A70-16930

Cryostat design and performance for use with optical telescopes in high altitude balloons
09 p1674 A70-22294

Multiplexer-interface system for digital nuclear and position control data transfer from high altitude balloons to earth monitoring instruments
12 p2233 A70-27407

Galactic cosmic rays high altitude measurements by balloon-borne Sparmo type multidirectional detectors, revealing azimuthal anisotropy
14 p2632 A70-31309

Balloon systems characterized by day to night altitude variations for permanent atmospheric sounding
14 p2531 A70-31312

Constant altitude helium filled zero pressure polyethylene balloon for stratospheric meteorological data and atmospheric tides studies
17 p3075 A70-34607

Hypsometer design for accurate pressure measurements at high balloon altitudes
17 p3090 A70-35313

High energy electrons in near space excess radiation from high altitude balloon and satellite data
18 p3307 A70-36170

Cygnus constellation energetic gamma ray emission by nuclear emulsion and spark chamber telescope on high altitude balloon
19 p3501 A70-38086

PCM command control system for high altitude ballooning operations, discussing component equipment
20 p3587 A70-40085

Liquid hydrogen balloon inflation system for use at remote locations, discussing characteristics and economy
20 p3607 A70-40086

Thermal design of high altitude balloons and instrument packages, analyzing vertical motion dependence on heat transfer and radiation environment
21 p3755 A70-42077

HIGH ALTITUDE BREATHING
High altitude acclimatization effects on cardiovascular system, external respiration, blood composition, optical and vestibular analyzers in human subjected to various stresses
04 p0630 A70-14576

Dogs breathing air or oxygen during slow and rapid decompression, measuring intraocular and cardiovascular pressure changes and retinal responses
09 p1621 A70-23460

HIGH ALTITUDE ENVIRONMENTS
High altitude clear air turbulence /HICAT/ occurrence frequency, showing effects of altitude, wind and temperature fields, terrain features, etc
01 p0006 A70-10696

High altitude scale model experiment to evaluate rocket plume impingement effects on Manned Orbital Workshop pressures, heating rates, forces and moments
03 p0579 A70-13646

High altitude environmental effects on adrenal glands and hypothalamic neurosecretion in rats
04 p0629 A70-14568

Physiology of high altitude, studying animal and man adaptation and changes in body processes due to life stresses and hypoxia
08 p1441 A70-20469

Rocket plume effects impulsive ground test technique under simulated high altitude pressure conditions, discussing hardware simplifications
[AIAA PAPER 70-399] 10 p1951 A70-24906

Mountain climbing and prolonged stays at high altitudes effects on blood composition
13 p2352 A70-29355

Viper Dart Robin System high altitude data reduction program accuracy, discussing winds and density errors
14 p2606 A70-30566

Albumin and IgG degradation, studying high altitude effect on hepatic function in man
15 p2683 A70-32532

Blood plasma and red cell volumes simultaneous measurement in native group living at high altitude
15 p2684 A70-32537

Human bioclimatology at high altitude, discussing energy balance in terms of net solar and terrestrial radiation balance in mountain area
19 p3367 A70-37369

High altitude wind measurement during daytime using photometer for detection of Li trail
20 p3630 A70-39486

Acute mountain sickness symptomatology and cognitive performance, using standardized General High Altitude Questionnaire
20 p3581 A70-40025

Mice immunobiological reactivity at simulated high altitude
20 p3575 A70-40189

Myocardial Na and K content of rats exposed to high altitude, preparing isolated right ventricular strip
20 p3577 A70-40541

Velocity ballistocardiogram modifications during high altitude stay, observing amplitude and RJ and RI variations
21 p3763 A70-41228

Parachutes for low density atmospheres, describing low and high altitude test results
[AIAA PAPER 70-1164] 21 p3755 A70-41846

Growth and caloric intake of rats exposed to high altitude dependence on high carbohydrate, protein and fat diets
22 p3967 A70-42458

Protein catabolism increase during high altitude exposure to hypoxia in rats, noting amino acid incorporation into tissue proteins
22 p3967 A70-42459

High altitude outer radiation zone boundary region electron energy measurement by satellite Injun 3, noting angular distribution dependence on local time, latitude, etc
23 p4236 A70-43833

Atmosphere and earth-reflected solar radiation pressure effects on high altitude satellite orbits
24 p4408 A70-45555

HIGH ALTITUDE FLIGHT
U HIGH ALTITUDE
HIGH ALTITUDE TESTS
Net thrust determination for high bypass ratio engines in cruise, suggesting performance evaluation in actual flight tests
[SAE PAPER 690652] 05 p0895 A70-15841

Ionosphere disturbances due to high altitude thermonuclear explosions, discussing experimental proof by cosmos satellites short wave transmitter radio signal scintillation statistical evaluation
06 p1057 A70-17888

UV radiation effects on pea plant chloroplasts photosynthesis at high altitudes, noting disruption of electron-transport chain reactions and cyclic phosphorylation
08 p1445 A70-21216

Human sea-level natives physiological changes during high altitude physical exercise, considering carbon dioxide arterial pressure, plasma cortisol, adrenal function indexes, etc
08 p1453 A70-21873

Personnel protection against accidental decompression in transport aircraft at high altitudes, recommending flight stations with capsule to achieve ground level oxygen equivalent
09 p1627 A70-23459

High altitude liver function and blood flow, determining bromsulphophthalein transport maximum and storage capacity and galactose elimination
15 p2683 A70-32531

Nitrogen and nitric oxide production and diffusion, examining photochemistry and transport at high altitudes
20 p3620 A70-39339

HIGH ASPECT RATIO
Three dimensional turbulent boundary layers on high aspect ratio bodies /swept wings/, discussing shear stress direction determination
02 p0286 A70-12354

HIGH ASPECT RATIO WINGS
U SLENDER WINGS
HIGH EFFICIENCY
U EFFICIENCY
HIGH ENERGY
U ENERGY
HIGH ENERGY ELECTRONS
Normal and anomalous Doppler shifted cyclotron power radiated by energetic electrons spiralling along geomagnetic line considered as VLF source from magnetosphere
01 p0080 A70-11227

Explorer observations of large temporal variations of midlatitude outer zone energetic electron intensities interpreted as redistribution during geomagnetic disturbances
03 p0560 A70-13989

Spectral intensity recording facility design for high energy electrons and hard gamma quanta in upper layer and beyond atmosphere
05 p0846 A70-15959

Astrophysical plasmas radio emission interpreted as collective bremsstrahlung due to ultrarelativistic electron trails, discussing Crab Nebula, quasars and Jupiter
05 p0904 A70-16932

Cosmic ray electron spectrum above 200 Gev based on pure nuclear emulsion stack using horizontal sandwich assembly
06 p1135 A70-17473

Metric type I and decametric type III bursts relationship, suggesting common generation by high energy electron outward streams from photosphere or low chromosphere
06 p1150 A70-18466

IR spectra excited by fast electrons in nitrogen, oxygen, carbon monoxide, carbon dioxide, nitrogen oxide, methane, ammonia and water molecules
07 p1337 A70-19045

VLF and LF auroral or polar hiss as generated by incoherent Cerenkov radiation from high energy electrons
07 p1264 A70-19190

Outer radiation belt high energy electron fluxes correlated with VLF hiss ground observations
07 p1367 A70-19498

Inverse Compton collisions of relativistic electrons with universal black body photons for diffuse component of cosmic X rays
07 p1369 A70-20166

Contraction and expansion in solar region producing synchrotron emission of relativistic electrons to explain solar burst behavior
08 p1560 A70-20841

Fast electron ionization losses due to multiple scattering with atoms during passage through thin layer, calculating spatial energy distribution function
08 p1547 A70-20989

High energy electrons elastic scattering from 2s-1d shell nuclei based on Dirac equation solution in Glauber approximation
09 p1730 A70-22043

High energy electron and gamma quanta flux measurement in atmosphere at different heights by high altitude balloons
09 p1747 A70-23728

Primary cosmic rays electron-positron component, considering relative roles of collision-produced and directly accelerated electrons
12 p2292 A70-27382

Van Allen radiation belts energetic electrons injection and distribution due to magnetic storms, using satellite-borne spectrometers
13 p2483 A70-30090

High energy electron temperature in beam plasma discharge pulsed laser measured by bremsstrahlung X radiation spectrum
15 p2752 A70-32194

Outer radiation belt high energy electron fluxes correlated with VLF hiss ground observations
15 p2795 A70-32743

Acceleration and precipitation of Van Allen outer zone energetic electrons, using correlation experiment between magnetosphere and auroral zone
18 p3306 A70-36010

High energy electrons in near space excess radiation from high altitude balloon and satellite data
18 p3307 A70-36170

Degenerate relativistic electrons in intense magnetic field, computing transverse electrical conductivity
18 p3296 A70-36896

Cosmic ray high energy electron component intensity and spectra, using nuclear emulsion detector with counter triggered spark array
19 p3502 A70-38095

High energy primary electron flux measurements by Cerenkov counter onboard ESRO 2 satellite
19 p3504 A70-38107

Primary cosmic ray electron flux above 30 GeV, using nuclear emulsion plate chamber
19 p3504 A70-38110

Excess galactic X rays, discussing synchrotron emission of high energy cosmic ray electrons
24 p4398 A70-46161

High energy electron proton and heavy nuclei absorption in pulsar vicinity, discussing implications for cosmic rays 24 p4398 A70-46170

HIGH ENERGY INTERACTIONS

High energy nuclear interactions defined by computerized determination of sea level lateral distribution of muons from primary cosmic ray air showers 01 p0171 A70-10667

Cosmic ray nuclear interactions under paraffin and lead, using counter controlled multiple cloud chamber 03 p0553 A70-12877

Nucleons and high energy pions inelastic interactions with complex nuclei involving external diffraction production of pions 03 p0526 A70-13029

Charged particles distribution according to multiplicity during pion-nucleon and nucleon-nucleon interactions at high energies 03 p0555 A70-13033

High energy primary cosmic ray and proton spectra measurements from Proton satellites 03 p0555 A70-13036

High energy muon production and interaction, analyzing ionization burst spectra 03 p0555 A70-13037

Cosmic ray particles high energy interactions during extensive air showers, noting inelastic superhigh energy collisions 03 p0556 A70-13040

Light-gathering amplitude and intrinsic resolution of large-area flat scintillation detectors used for cosmic rays-nuclear interaction experiments at high energies 03 p0484 A70-13466

Electron-electron and electron-atom bremsstrahlung, giving graphical expressions for one and two electron atoms cross sections 04 p0721 A70-14667

Extensive air showers with nuclear particle interactions using ionization calorimeters, neutron monitor, scintillation and Cerenkov radiation counters 05 p0846 A70-15958

Cosmic protons and high energy heavy nuclei interaction with radiation in expanding universe, including estimates of light radiation influence on cosmic ray spectra 05 p0904 A70-16903

Three dimensional model for high energy scattering of inert gas atoms from solid surfaces, calculating trapping, accommodation and flux and velocity distributions 06 p1110 A70-18261

Quark search in cores of air showers with four million GeV mean energy, deducing rough production rate 07 p1368 A70-19925

Localized high energy flaring of active center monitored with time-associated radio bursts in spot umbrae 08 p1561 A70-20905

Cosmic ray air showers simulation, discussing high energy nuclear interaction and linear relation of primary particle energy to number 09 p1744 A70-22048

Pion and nucleon interactions, tabulating average multiplicity and inelasticity values for various primary cosmic ray energy levels 09 p1745 A70-22775

K-mesons role in high energy cosmic ray muons angular distribution and nuclear interaction 09 p1748 A70-23731

High energy oxygen positive-ion reaction with molecular nitrogen, presenting semiempirical model with assumed crossing of potential energy surfaces 10 p1920 A70-25146

Fireball role in N-N interactions at primary cosmic ray energies, using fireball model to explain particle production 13 p2476 A70-28913

High energy proton-He 3 elastic scattering cross section measurement, comparing result with Glauber model calculation 13 p2456 A70-29459

High energy proton flux variations in inner belt during solar cycle and magnetic storm, using satellite and balloon measurements 13 p2483 A70-30091

Primary cosmic ray flux and p-carbon cross sections measurements by satellites showing heavy particle production at high energies 15 p2792 A70-31733

Energy loss of high energy cosmic rays traversing isotropic radiation field of arbitrary energy spectrum in pair producing collisions with ambient photons 17 p3150 A70-34598

Electrons lateral distribution in large air showers determining inelasticity of high energy nuclear interactions 18 p3305 A70-35947

Asymptotic high energy behavior of Feynman integrals in scalar field theory models for elastic scattering 19 p3457 A70-37549

Syrovatkii mechanism of high energy particle production near neutral line of magnetic field, noting solar flares occurrence conditions 19 p3478 A70-37581

High energy electron and photon cascades in Metagalaxy, considering electromagnetic radiation density and cosmic ray origin estimation 19 p3500 A70-38081

Energy spectrum distortion of ultrahigh energy cosmic rays due to interactions with photons and neutrinos in universe 19 p3510 A70-38155

High energy cosmic ray-photon interactions, discussing ion production, nuclear fission, proton energy loss, red shift, etc 20 p3696 A70-39283

Secondary cosmic ray muon inelasticity in high energy neutrino interactions for deep mine experiments, using lepton current 21 p3845 A70-41139

Cosmic ray research role in high energy physics, discussing elementary particle interactions 22 p4096 A70-43398

HIGH ENERGY PROPELLANTS

Adiabatic calorimeter for exothermic chemical reactions determining heats of polymerization, curing rate and thermal decomposition rates as temperature function for high energy propellants 04 p0688 A70-14711

Analytical model for liquid fluorine no-vent loading operations noting application to lightweight upper stage systems [AIAA PAPER 69-579] 09 p1662 A70-23251

Chemical high energy rocket propellants, discussing metal combustion, hybrid and tribrid engines, combustion chambers, etc 11 p2100 A70-26282

HIGH EXPLOSIVES

U EXPLOSIVES

HIGH FIELD MAGNETS

Uniform bulk magnetization concept in superparamagnets related to physical statistics of magnetic first order phase transitions 15 p2785 A70-32400

High magnetic fields applications, emphasizing metal forming and superconducting rings levitation 19 p3471 A70-37948

HIGH FREQUENCIES

VLF phase disturbances and HF absorption during solar proton events of 28 August and 2 September 1966 related to proton intensities, energies and cut-off latitudes 04 p0741 A70-15124

Two frequency electron beam modes produced by O-type TWT at simultaneous input of HF signals of different amplitudes and frequencies 05 p0824 A70-16894

Aspect sensitivity of HF backscatter auroral echoes in F layer, utilizing F supported ground scatter echo to account for ionospheric refraction 06 p1012 A70-18541

Ray tracing in ionospheric HF communications, describing computational method for ray paths and ionospheric absorption 07 p1230 A70-19166

HF radio noise environment, discussing local storm effects, noise power estimation, noise measurement methods, etc 07 p1231 A70-19172

Field strength prediction for vertical horizontal broadside and horizontal end-on HF antennas, noting necessary polarization corrections 07 p1232 A70-19177

Oblique incidence HF pulse ionospheric sounding, discussing propagation modes, seasonal and diurnal effects, frequency spectra, etc 07 p1233 A70-19182

Ionospheric HF radio wave propagation, describing oblique backscatter sounding during IQSY 07 p1233 A70-19183

HF cylindrical waves propagation by line source in stratified medium, investigating refraction and diffraction at plane boundary using mathematical and ray methods 07 p1335 A70-19683

HF arc anemometer for subsonic and supersonic gas flow turbulence measurement 07 p1285 A70-19837

Surface oscillations of plasma in external HF field derived from hydrodynamics and Maxwell equations 07 p1355 A70-20367

Solar meter wave emissions enhancement or emission centers, comparing radio and optical coronal enhancements 08 p1576 A70-21402

Sinusoidal modulated HF pulse signal, deriving parametric envelope and power density function 10 p1833 A70-24086

Ionospheric effects and transmitter characteristics observed on HF standard and time stations, discussing spurious emissions arising from frequency overcrowding 10 p1842 A70-25050

HF energy nonresonance dissipation in polycrystalline yttrium-garnet ferrites subjected to constant magnetizing field 11 p2097 A70-25384

Spatial-temporal distribution of wind swell HF components measured by two dimensional antenna array fed by DC signals 12 p2263 A70-27516

MOS-FET HF noise quantities computed in terms of substrate doping, angular frequency and gain-bandwidth product 12 p2196 A70-27672

HF electrostatic waves generation by electrons in magnetosphere 13 p2482 A70-30083

Wave polarization effects on ionospheric HF radio wave transmission and reception in communication and broadcasting networks 14 p2550 A70-30650

Ionospherically reflected HF radio signal frequency spread measurement involving phase difference crossings counting between antennas 14 p2550 A70-30743

Ionospheric electron distribution by true height analysis of oblique incidence HF radio wave sounding data, applying to forward and ground backscatter 14 p2550 A70-30745

Noise sources and identification in low noise RF amplifiers via noise temperature or factors 15 p2708 A70-31952

HF geomagnetic micropulsations recordings by two component induction magnetometer, relating diurnal frequency and occurrence variations to local K-index 19 p3412 A70-37996

Canadian HF T array radio telescope at Dominion Radio Astrophysical Laboratory, discussing design and performance 19 p3397 A70-38275

Current and vector potential in thin superconducting film in HF field, considering high and low temperatures 22 p4088 A70-43467

Transistor circuit analysis at high frequencies and large signals, considering collector current, inertia and conductance conditioned by diffusion and recombination 23 p4161 A70-43779

VLF phase disturbances, HF absorption and solar protons in 1967 PCA events, using ionization model 24 p4314 A70-46128

HIGH GAIN

High gain Xe laser effects on longitudinal mode splitting, noting increased frequency of radiation propagation through highly dispersive medium 23 p4201 A70-44918

HIGH GRAVITY (ACCELERATION)

U HIGH GRAVITY ENVIRONMENTS

HIGH GRAVITY ENVIRONMENTS

Extraterrestrial gravitational effects on microorganisms, describing impulse-applied high g study of freeze dried *Escherichia coli* 11 p1987 A70-26028

HIGH IMPULSE

NERVA Xe-Prime test series, discussing computer simulation, full power and high specific impulse operation and startup under varying initial conditions [AIAA PAPER 70-709] 16 p2951 A70-33950

Low thrust high impulse nuclear and electric space propulsion systems, discussing performance capability for space missions 18 p3290 A70-36566

HIGH LATITUDES

U POLAR REGIONS

HIGH LIFT DEVICES

U LIFT DEVICES

HIGH MELTING COMPOUNDS

U REFRACTORY MATERIALS

HIGH PASS FILTERS

Fighter aircraft firing accuracy improved by high pass filter to automatically compensate sideslip induced by rudder through follow up slideslipping by aileron 11 p1979 A70-25820

Quasi-optical filters with bandpass and pseudohigh pass structures for millimeter wave and far IR frequencies 14 p2558 A70-31318

Integrated directly coupled gyrator operating mode via comparison with switching elements, considering behavior under capacitance load and high pass filter application 21 p3797 A70-40793

HIGH POLYMERS

Kinetic energy of atomic motions for vitreous and crystalline high polymers measured by differential scanning calorimetry and thermal analysis 02 p0253 A70-12522

Yield criteria for plastic deformation on glassy high polymers induced by stress field, noting crazing and shear yielding dependence on first stress invariant 15 p2764 A70-31787

Plasticized high polymers mechanical and optical properties, studying birefringence phenomena interrelation with applied external stresses 24 p4424 A70-45590

HIGH PRESSURE

- Liquid propellant spray injection into high pressure gaseous environment noting geometric, dynamic and thermal characteristics
[AIAA PAPER 70-8] 06 p1182 A70-18211
- Permittivity cell and encapsulation for liquids subjected to high pressures and temperature extremes
14 p2533 A70-30502
- Teflon bucket and Be-Cu cap seal against hydrostatic pressure, discussing applications for high pressure superconductivity measurements
18 p3262 A70-37097
- Nitrogen viscosity coefficient at high pressure, describing viscosimeter operation and kinetic theory calculations
20 p3738 A70-40140
- Gas transport properties at high temperatures and pressures, discussing Ar plasma arc characteristics
23 p4226 A70-44433

HIGH PRESSURE OXYGEN

- White rats parenchymatous organs morphological changes following convulsion-producing exposure to pure hyperbaric oxygen
07 p1207 A70-19503
- Vascular and dystrophic disturbances in rat parenchymatous organs in hyperbaric pure oxygen atmospheres, observing increased tissue eosinophilia
07 p1207 A70-19504
- Protective ability of various compounds against hyperoxia at 5, 7, 9 and 11 atmosphere of pure oxygen
08 p1441 A70-20629
- Preventive measures against fire and blast hazards in high oxygen concentration chambers
08 p1599 A70-21795
- Hyperbaric oxygenation treatment physiology and techniques, discussing limitations of equipment
09 p1620 A70-23017
- Hyperbaric oxygen effect on heart muscle contractions in mammals, considering cells enzymatic activity and substrate utilization
09 p1623 A70-23586
- White rats parenchymatous organs morphological changes following convulsion-producing exposure to pure hyperbaric oxygen
11 p1987 A70-26102
- Respiratory gas exchange, heart rate, arterial acidemia and hypoxemia responses to physical work in hyperbaric environments and hyperoxia conditions
12 p2169 A70-27655
- Altitude acclimatization protection against lung damage from exposure to oxygen at high partial pressures experimented on rats
12 p2170 A70-27659
- Rats cardiac aerobic and anaerobic pathways response to hyperbaric oxygen exposure
13 p2349 A70-28833
- High oxygen pressure effect on consumption rate constant for in vivo tissues
15 p2679 A70-31608
- Prolonged hyperbaric oxygen breathing effect on human physical performance at rest and during severe exercise
19 p3364 A70-38369
- Human and animal tolerances to hyperbaric oxygen, discussing response variation, toxicity modification, etc
22 p3976 A70-43701
- Hyperbaric oxygen effects on Coxsackievirus infection in mice
24 p4296 A70-45338

HIGH Q

U Q FACTORS

HIGH RESISTANCE

- Band model of switching effects between conducting and high resistance states of amorphous semiconductors
18 p3297 A70-35952

HIGH RESOLUTION

- High resolution silver halide photoemulsions by holographic resolvometry using Ne-He laser to obtain interference patterns
01 p0095 A70-11633
- Millimeter and nanosecond resolution of fast neutrons in pulse dense high temperature deuterium plasma discharge with polyethylene collimators and photomultipliers
02 p0303 A70-12739
- Optical performance of image intensifier system with good resolution for exposure times down to 1 nsec
04 p0695 A70-15568
- Return Beam Vidicon /RBV/ system compatibility with requirements for Earth Resources Observation Satellite /EROS/, featuring high resolution image sensor for decreasing signal noise
07 p1280 A70-19231
- Celestial X ray sources resolved against diffuse nearly isotropic background radiation by rocket and balloon experiments, noting brightness
09 p1745 A70-22895
- High resolution multiple spark photography, discussing facility
09 p1680 A70-23070

- Transmission diffraction grating for astronomical applications constructed holographically with laser light and photoresist films
12 p2234 A70-27589
- Two inch high resolution vidicon for TV line processing of printed documents
16 p2906 A70-33173
- High resolution electron return beam vidicon cameras, comparing transfer functions and SNR with photographic films
20 p3630 A70-39496
- High resolution electron beams application to electron spectroscopy, discussing elastic and inelastic scattering, resonances and atomic and diatomic molecular ionization
20 p3676 A70-40156
- High resolution observation of compact radio sources at 13 cm, using long baseline dual antenna interferometer
22 p4102 A70-42976
- High resolution ultrahigh speed continuous-writing framing camera with extended spectral range [SMPT PREPRINT 36]
22 p4033 A70-43042
- HIGH SENSITIVITY**
U SENSITIVITY
HIGH SPEED
Angular contact bearing balls track position on aero gas turbine engines shaft measurement in test rig at high speeds
20 p3638 A70-40141
- Stretch fabric materials for personnel high speed escape parachute systems
23 p4141 A70-44482
- HIGH SPEED CAMERAS**
NT FRAMING CAMERAS
Optimum procedure for high speed cinematography of holographic interferograms permitting microsecond exposures while retaining picture quality
02 p0298 A70-12213
- Drum-type, high-speed, frame or streak photographic camera, discussing film mounting and operating specifications
03 p0485 A70-13531
- High speed photography for instability onset and subsequent buckling process in photoelastic circular cylindrical shells under axial compression
03 p0594 A70-13659
- Development and characteristics of inexpensive and reliable detonator for precise synchronization with high speed photographic or electronic experiments
03 p0547 A70-14110
- Automatic measurement of frequency-contrast characteristics of photographic films using linear, photoelectric and high speed comparator devices
05 p0852 A70-16865
- High speed camera synchronization by frame reference pulses for strobe triggering
06 p1060 A70-17147
- Initial vapor bubble growth on horizontal heated wall during saturated nucleate boiling using combined streak and high speed frame photography
08 p1542 A70-21584
- Holographic recording of three dimensional rapid events, using Q switched laser pulses with sufficient coherence length for illumination
09 p1676 A70-22786
- High resolution multiple spark photography, discussing facility
09 p1680 A70-23070
- High speed instrumentation camera system for recording rapid motions during Apollo landing impact
09 p1688 A70-23770
- Atmospheric particles photographed in situ by cameras using microsecond flash lamps, discussing required mechanical motion compensation at aircraft speed
10 p1886 A70-23930
- Ultrahigh speed photographic equipment with electronic systems, investigating integral images and slit cameras
14 p2589 A70-31401
- Electronic systems for high speed photography, noting application to data processing and storage
14 p2589 A70-31402
- Microchannel electron multiplier and optical focusing output shutter tubes for high speed photography
14 p2589 A70-31403
- Photographic still and high speed cameras, using Kerr effect electro-optical shutters with transmission line structure
14 p2589 A70-31404
- High speed electron cameras with opening time below one nsec, discussing shutter types
14 p2589 A70-31405
- Electron camera with two stage image intensifier control electrode tube for rapidly evolving and slightly luminous phenomena, discussing exposure times
14 p2590 A70-31406
- Ultrahigh speed camera with high optical resolution for dense plasma diagnosis
14 p2590 A70-31407
- Hologram camera system recording hypervelocity particles by velocity synchronized Fourier transform method, employing interferometer
15 p2737 A70-32039

- Holographic interferometry combination with high speed photography, obtaining time resolved record of event
15 p2737 A70-32051
- Reactive stream separation high speed color photography for impinging streams of nitrogen tetroxide and hydrazine
16 p2998 A70-33605
- High speed pulsed ruby laser holography, discussing transmission-reflection holocameras and applications
17 p3085 A70-35007
- High speed photographic recording of bursting rotor in fragment control device
17 p3063 A70-35523
- Systematic errors in rotating mirror framing cameras and film records for quantitative high speed motion analysis
17 p3095 A70-35632
- Event-triggered high speed spectrograph shutter, studying shock tube plasmas
20 p3630 A70-39484
- Rapid exposure scanning camera for high speed cinematography, discussing optical system and operation principles
20 p3632 A70-39748
- High speed cameras for submicrosecond exposures in plasma research involving theta and zeta pinches
20 p3635 A70-40526
- High speed photographic systems for ballistic studies, describing high intensity lighting systems
20 p3635 A70-40527
- Superradiant light /SRL/ converted from electron beam energy by semiconductor targets applied to nanosecond photography
20 p3635 A70-40529
- Artificial rain erosion effects on missile and spacecraft recorded via high speed photography
20 p3635 A70-40531
- Ultrahigh speed ballistic-synchrophotography, using Imacon image converter camera for framing and streak modes
22 p4031 A70-43028
- High speed cinematographic recording of wake behind hypervelocity projectiles
22 p4032 A70-43033
- Spark photography of models in free flight in hypersonic shock tunnel
22 p4032 A70-43035
- Pulsating light source afterglow increasing high speed film information content, discussing streak image, tearing process and impact stress tests
22 p4032 A70-43036
- High speed three-frame electronic camera with storage tube, slow scanning and magnetic recording [SMPT PREPRINT 55]
22 p4033 A70-43038
- Electronographic camera for ultrahigh speed photography, using nuclear emulsion as recording medium [SMPT PREPRINT 54]
22 p4033 A70-43039
- High speed camera rotating mirror dynamic surface deformations, discussing reflected waves, astigmatism, gas turbulence and pressure effects [SMPT PREPRINT 34]
22 p4033 A70-43043
- Partial frame shutter for high speed rotating mirror camera, using explosively driven opaque dust cloud [SMPT PREPRINT 33]
22 p4033 A70-43044
- Phase locked solid state laser with picosecond pulses applied to high speed cinematography [SMPT PREPRINT 22]
22 p4034 A70-43051
- Real time holographic interferometry for flame propagation research, using high speed camera [SMPT PREPRINT 9]
22 p4035 A70-43053
- Rotating mirror hologram camera for high speed phenomena, using Q switched ruby laser pulses [SMPT PREPRINT 7]
22 p4035 A70-43054
- Acoustic Bragg diffraction for laser light deflection, solving high speed photography and holography motion problems [SMPT PREPRINT 5]
22 p4035 A70-43055
- High speed holographic recording of transient events by single shot ruby and Nd-doped pulsed lasers, applying to shock tubes and wind tunnels [SMPT PREPRINT 3]
22 p4035 A70-43056
- Shock wave propagation studies by grating spectrograph with high speed camera, computing equilibrium detonation gases temperature from emitted light [SMPT PREPRINT 98]
22 p4035 A70-43057
- Liquid jet breakup in supersonic airstream, using high speed photographic techniques [SMPT PREPRINT 90]
22 p4036 A70-43063
- High speed pic registered intermittent camera, discussing film transport, magazines operating speed, motor drive and boreighting provisions [SMPT PREPRINT 78]
22 p4036 A70-43066
- High speed X ray flash motion picture installation for ballistic photography [SMPT PREPRINT 76]
22 p4037 A70-43068
- Cantilever beam transient response measurement by stored beam /real time/ holographic interferometry combined with high speed motion picture photography
22 p4039 A70-43452
- Hologram rapid sequence recording, using scatter plate holographic system
23 p4198 A70-44947

- Highspeed raster motion picture cameras with high aperture ratios 24 p4335 A70-45651
- SFR high speed photochronograph for visible and UV raster, stereoscopic and spectral photography 24 p4335 A70-45652
- HIGH SPEED FLIGHT**
- U HIGH SPEED**
- HIGH STRENGTH**
- Solvents and chemicals resistant thermosetting resin producing high strength glass reinforced laminates based on polyanhydride crosslinked with monoepoxide 16 p2938 A70-33382
- High strength and modulus continuous graphite fibers from pitch, describing production process from asphalt and specifications 21 p3842 A70-40732
- High strength graphite fabrics evaluation for flexible structures, discussing temperature effects, fabrication, mechanical properties, oxidation and protective coatings [AIAA PAPER 70-1183] 21 p3842 A70-41830
- HIGH STRENGTH ALLOYS**
- NT HIGH STRENGTH STEELS**
- NT MARAGING STEELS**
- Thermal conductivity, electrical resistivity, Lorentz ratio and thermopower of aerospace alloys at cryogenic temperatures, considering Inconel, Hastelloy, Ti and Al alloys 03 p0512 A70-13807
- Nickel base alloy, WAZ-20 with improved strength in 2000-2200 F range for application to gas turbine engine stator vanes 04 p0706 A70-15097
- Cylindrical Al, high strength pig iron and heat resistant steels elastoplastic deformation diagrams for cyclic compression tension loads 06 p1084 A70-17387
- Mo effect on structure and properties of Ni-Al-Nb system alloys in gamma and gamma prime solid solutions range, discussing high temperature strength 08 p1514 A70-20549
- Wrought aluminum based high strength alloys structure and mechanical properties 08 p1522 A70-21708
- Linear and nonlinear rupture mechanics applied to thick walled pressure vessels of high strength materials 09 p1769 A70-22184
- High strength stress corrosion resistant aluminum alloy die forgings, evaluating tensile, tensile fatigue and fracture toughness properties 09 p1702 A70-22556
- Vacuum rolling of high strength hard-workable dispersion-hardened Nb base alloys excluding recrystallization 09 p1692 A70-22756
- Titanium high strength alloys, considering hardening by interstitials, precipitation, solid solution, etc 10 p1904 A70-24425
- Mechanical notches and saltwater corrosion effects on flexural fatigue behavior of high strength structural alloys, investigating yield strength to density ratio 11 p2066 A70-26097
- Carbide-strengthened Mo alloys dynamic strain aging processes 12 p2255 A70-27605
- Al-Zn-Mg high strength weldable alloys rupture characteristics, analyzing crack distribution, stress raisers and weld defects 14 p2591 A70-30971
- Ti alloy suitability for fastener applications noting cold workability, high strength and stress corrosion resistance [ASM PAPER W70-17.3] 15 p2760 A70-32338
- Phase diagrams of high strength metastable Ti beta alloys, showing minimum quantity of alloying elements for solid solution retention 17 p3119 A70-34418
- Ultrahigh strength alpha-beta titanium alloys, examining carbon and oxygen effects on mechanical properties 17 p3121 A70-34429
- High strength Ti alloys depth hardenability, discussing mechanical properties and use in aircraft components 17 p3121 A70-34434
- High strength Ti alloys for aircraft gas turbine engines, determining critical properties for compressor fan blades 17 p3122 A70-34436
- High strength Ti alloy for cryogenic applications, comparing plane strain fracture toughness 17 p3122 A70-34438
- High strength ferrous alloys susceptibility to stress corrosion in seawater environment, tension loading single edge notched and fatigue cracked specimens in NaCl solution 17 p3123 A70-34554
- Porosity effects on mechanical properties of high strength Al alloy weldments 18 p3265 A70-37204

- High strength and stress corrosion resistant materials, considering Ti, Ni, Al alloys, metal-matrix composites and polymers 20 p3655 A70-39666
- Double linear damage rule applicability to dual type alloys from two-stress level rotating bending and axial fatigue tests [ICAS PAPER 70-39] 23 p4267 A70-44137
- Low energy fracture of high strength Al alloys with void nucleating particles, using microprobe fractography 23 p4206 A70-44194
- HIGH STRENGTH STEELS**
- NT MARAGING STEELS**
- Thermomechanical processing of high strength low alloy steels to evaluate effects of composition, coiling temperature and cooling rate on mechanical properties and microstructures 01 p0118 A70-10726
- Fatigue crack growth rate for high strength steels from crack length during cyclic loading and striation spacings after fracture 01 p0119 A70-10732
- Correlation between sustained-load and fatigue crack growth in high strength steels for aggressive environment effects 02 p0318 A70-12544
- Ti alloys, high strength steels and plastics for aircraft and spacecraft constructions, including aging behavior of lap joints and prepreg laminates in vacuum [DGLR-69-58] 04 p0699 A70-15162
- Silicon effect on stress corrosion resistance of low alloy high strength steels in NaCl solution for different tensile strength ranges 04 p0707 A70-15272
- Delayed failure due to hydrogen embrittlement of structural high strength steels, discussing stress corrosion 04 p0710 A70-15678
- Hydrogen embrittlement as delayed rupture origin in high strength steels 04 p0711 A70-15682
- Flight type pressure vessels fabricated with quenched and tempered Ni-Cr-Mo-V structural steel, discussing fracture toughness, design, fabrication techniques [SAE PAPER 690680] 05 p0853 A70-15866
- Cryogenic temperature effect on short life torsional fatigue properties of Ni-Cr-Mo steel, discussing cyclic strain range effects 05 p0864 A70-16807
- Reverse-bend and tension-tension fatigue properties of high strength Cr-Mn-N stainless steel sheet in notched and unnotched conditions 07 p1305 A70-18993
- Stress corrosion-fatigue crack propagation in high strength structural steels, relating growth rates to crack tip stress intensity factor [ASME PAPER 69-MET-5] 08 p1519 A70-21452
- Recrystallization in austenite phases of vanadium and columbium HSLA steel alloys determined in high temperature deformation tests 08 p1521 A70-21704
- Ultrahigh strength Ni steels fracture toughness analysis, studying effects of chemical composition, yield strength, air melting, vacuum melting, etc 09 p1701 A70-22552
- Microconstituents effect on wear behavior of high hardness steels on basis of crossed-cylinder testing, discussing intermetallic compounds influence 10 p1895 A70-24853
- Brittle fracture strength of welded joints in high strength steels 11 p2059 A70-25663
- Fatigue crack propagation in high strength steels during fatigue cycling in dry and wet environment containing NaCl 11 p2067 A70-26100
- Fracture toughness and cyclic crack propagation of surface cracked high strength aircraft structure steels 12 p2254 A70-27467
- Fatigue crack growth dependence on load profile, temperature, test frequency and environment and stress in high strength Al and Ti alloys and steels 13 p2431 A70-28604
- Ultrahigh strength stainless steel for light gage springs and satellite antennas 13 p2420 A70-29248
- Hardened steel embrittlement in low pressure hydrogen caused by crack growth as function of temperature 13 p2436 A70-29804
- High temperature transformation of high speed steel low temper hardened in vacuum or atmosphere quench 15 p2756 A70-31568
- Precrack Charpy slow rate straining sensitivity of high strength steel at increased temperatures, comparing fracture energy of impact tests 15 p2758 A70-32238
- Stress corrosion cracking of high strength structural, tool and maraging steels due to hydride, diffusion controlled and mixed embrittlement 16 p2934 A70-34301

- Fractography of fatigue and delayed fracture of hydrogenated, unplated and Cd-plated ultrahigh strength steel 17 p3124 A70-34654
- Aircraft structural materials, considering high strength steels Al and Ti alloys 17 p3124 A70-34675
- F-111 high strength steel design experience concerning wing, fuselage and empennage support structure [AIAA PAPER 70-884] 17 p3018 A70-35803
- Transformation induced plasticity (TRIP)/TRIP high strength steels resistance to hydrogen embrittlement 18 p3273 A70-36047
- Fatigue resistance of high yield strength steel weldments under uniaxial loading, describing cyclic behavior by S-N curve 18 p3278 A70-37114
- Nondestructive ultrasonic measurements of crack depth in high strength steel plate weldments, studying low cycle fatigue 21 p3834 A70-41943
- Scale factor effect on brittle fracture resistance for Ti and Al alloys and high strength steels 23 p4265 A70-43936
- Papers on plane strain fracture toughness testing covering metallic materials, steels and aluminum alloys 23 p4205 A70-44189
- Crack length and bend specimen thickness effects in plane strain fracture toughness tests of high strength steels 23 p4268 A70-44192
- Crack and thickness effects on fracture toughness tests of high strength steel in precracked sheet and bend specimens 23 p4206 A70-44193
- High strength low-alloyed steel for solid propellant rocket engine case, discussing high temperature production and test methods 23 p4208 A70-45046
- High strength martensitic stainless steel stress corrosion resistance and fatigue crack growth rate, considering austenite content, strain aging and tempering temperatures 24 p4359 A70-45245
- Thread parameters effect on steel and Ti high strength fasteners fatigue life [SAE PAPER 700851] 24 p4425 A70-45881
- HIGH TEMPERATURE**
- Soviet book on creep of structural elements at high temperature noting metals, concrete and polymer materials, buckling, variety of structural elements and creep resistance 09 p1781 A70-23266
- Variable reproducible black radiator of resistance heated carbon tube designed for temperatures between carbon glowing and sublimation point 12 p2329 A70-27090
- High temperature dislocation model based on dislocation dynamics, rate theory and varying back stress ratio 13 p2436 A70-29563
- High temperature fuel cell with thin disk solid electrolyte, evaluating performance as function of electrolyte, electrode and current collector resistance ratio 22 p3964 A70-42499
- HIGH TEMPERATURE AIR**
- Compact 4 micron radiation band from high temperature air and gases measured on arc jet and shock tube, noting molecular O and N source 02 p0392 A70-11901
- State equation for entropy of dissociated air with enthalpy and pressure as independent variables for calculating gas dynamic processes on computers 10 p1966 A70-23839
- Film cooling protecting axisymmetric nozzle slot surface exposed to high temperature Mach 6 air injection 18 p3242 A70-36695
- Shock tube high temperature air viscosity from laminar boundary layer heat exchange data 20 p3608 A70-39633
- Approximate calculations of thermal and viscous transport in high temperature air based on empirical transport equations 21 p3951 A70-41750
- Hot air temperature decay, discussing relaxation process of lightning channel behavior 22 p4016 A70-42781
- HIGH TEMPERATURE ALLOYS**
- U HEAT RESISTANT ALLOYS**
- HIGH TEMPERATURE ENVIRONMENTS**
- Continuous measurement and automatic recording of metals electrical resistance during fatigue testing in vacuum at elevated temperatures 01 p0092 A70-11108
- Hardness measuring instrument by dynamic method at high temperatures in vacuum, using magnetic or nonmagnetic indenter balls 01 p0092 A70-11111
- Temperature measuring devices design for ultrahigh/ultralow temperatures, examining heat effects on gases, liquids and solids 02 p0295 A70-11864

High temperature thermometer using pulsed excitation ultrasonic resonance with ruthenium sensor, discussing resonator types, transmission lines and transducer

02 p0300 A70-12468

Cr alloys applications in high temperature environments, describing alloying elements effects on strength and ductility

03 p0511 A70-13566

Scout missile destruct charge system premature operational response to high temperature environment caused by combustion gas leak during stage separation

03 p0550 A70-14140

Material evaluation and selection for compact nuclear reactor control bearings operating at high temperature in vacuum

[ASME PAPER 69-WA/LUB-11]

04 p0697 A70-14765

Stress rupture strength of turbine blades fir tree type root joints under prolonged loads at high temperatures, studying disk teeth shearing

05 p0953 A70-17055

High temperature effects on pilots psychomotor performance and physiological function, discussing measurements taken during complex tasks

06 p0999 A70-17290

Heart rate-body temperature relationship during walking in hot environment

06 p0993 A70-17431

Heat pipe structural alloys compatibility with different working fluids using capsule tests at high temperatures, noting corrosion behavior

[AIME PAPER F-69-2]

07 p1304 A70-18812

Static loading effect at high temperatures in argon and liquid lithium on mechanical properties stability of steel

08 p1515 A70-20920

Matrix optimization of boron filament reinforced polymeric for short duration high temperature aerospace applications

08 p1530 A70-21891

High temperature, electrically heated convective gas heating system for high velocity atmospheric flight simulation using air-nitrogen working fluids

12 p2205 A70-27100

Thermal stresses in solid nonhomogeneous sphere in high periodic temperature field, assuming temperature dependent Young modulus and linear thermal expansion coefficient

13 p2512 A70-28979

Electropneumatic actuation systems for rocket engines in extreme environment applications involving high nuclear radiation levels and high and cryogenic temperatures

14 p2535 A70-31343

Beryllium fibers and Al matrix interactions at high temperatures and various durations, investigating diffusion by X ray diffraction, electron microscope and microprobe analysis

15 p2757 A70-31812

High temperature oxidation of Ni-Cr alloys and stainless steels in molten salt, observing grain boundary corrosion with electron probe

15 p2757 A70-31875

Inconel 600 high temperature high strain rate fracture process by hot torsion tester, noting temperature effects

15 p2762 A70-32389

Cooling hood effect on physiological responses to work in hot environment, discussing body temperature

17 p3031 A70-35422

Gas metabolism, chemical thermoregulation, body temperature and weight of rats during adaptation to repeated high temperature exposure

18 p3219 A70-36538

High temperature adaptation, gas exchange and thermoregulation in dogs during repeated overheatings in open sunshine

18 p3219 A70-36539

Adaptive recession of gas metabolism in rats during multiple high temperature exposures

18 p3220 A70-36545

White rats adaptation to multiple high temperature exposures, examining oxygen tension in skeletal muscles

18 p3220 A70-36549

Unsteady temperature fields in heat conduction problems associated with high temperature effects on abutted cylinders

18 p3348 A70-36572

Graphite-polyimide composites development for high temperature environments, discussing mechanical properties

19 p3455 A70-38425

Reinforced plastic composites thermal protection and ablative performance in high temperature environments for reentry vehicle applications

20 p3656 A70-40029

Hypoxia and high ambient temperature effects on altitude tolerance in animals

20 p3575 A70-40186

Liquid metal hydraulic servoactuation packages for flight control in high temperature environments without coolant systems

21 p3750 A70-40785

Titanium dicarbide and tetracarbide vaporization at high temperatures, using Knudsen effusion method with mass spectroscopy, determining dissociation energies

21 p3773 A70-41274

Sandwich multilayer structures temperature fields and heat transfer characteristics at high temperature [ICAS PAPER 70-38-BIS]

23 p4276 A70-44136

HIGH TEMPERATURE FLUIDS

NT HIGH TEMPERATURE AIR

NT HIGH TEMPERATURE GASES

End support cooling in hot-wire anemometry of low density high temperature flows

[AIAA PAPER 70-589]

13 p2412 A70-29882

Thermal radiative transfer and magnetic field effects on hydromagnetic stability of hot electrically conducting fluid

14 p2623 A70-30996

HIGH TEMPERATURE GASES

NT HIGH TEMPERATURE AIR

Injected B particles burning in hot gas stream of oxidant mixture with Ar and H, observing trace widening by motion picture technique

01 p0218 A70-11016

Characteristics method for calculating steady supersonic flow of burning gas mixture past wedge and rotating cones

01 p0218 A70-11018

Strong shocks and high temperature gases production using multistage gaseous detonation driven shock tube

02 p0274 A70-11855

Heat resistant coatings in high temperature gas flow, studying external layer deformation kinetics during shrinkage

03 p0483 A70-13250

Ultrasonic beam scanning measurements in high temperature axisymmetric gas flow, discussing errors and use of numerical transformation methods

04 p0685 A70-14536

Equilibrium composition and thermodynamic functions calculated for mixtures of dissociating and ionizing high temperature gases from standard data

04 p0780 A70-14538

Heat resistant silicate enamel coatings to protect steels and alloys against high temperature gas corrosion, studying properties by various methods

05 p0872 A70-16600

Phenolic nylon ablative thermal effectiveness in arc heated nitrogen, air and nitrogen-carbon dioxide streams

[AIAA PAPER 70-154]

06 p1183 A70-18233

Heavy particle impact ionization in hot gases analyzed for ionization rates relationships

06 p1113 A70-18278

Heat transfer measurement in ionized high temperature gas flows with discharge shock tube and thermal sensors

07 p1283 A70-19663

Transport properties of high temperature gases compared with room temperature differences, considering chemical equilibria, heat conduction and atom-free radical forces

07 p1424 A70-19880

Analog computing spectral photometer for high temperature measurements in gas flames

07 p1285 A70-19896

Water vapor high temperature dissociation kinetics in dilute mixtures with argon in shock waves

09 p1629 A70-22319

Fluidic vortex valve to modulate solid propellant generated hot gas flow

[AIAA PAPER 69-424]

09 p1743 A70-23249

Thermodynamic and transport properties of high temperature and pressure gases measured with ultrasonic pulse technique

11 p2147 A70-25753

Hydrogen, nitrogen and argon electrical and thermal conductivity measured at high temperature using electric arc as plasma source

11 p2148 A70-26016

Monograph on relaxation processes at high temperatures for thrust nozzle calculation and optimization covering real gas effects, reaction kinetics, heat transfer, etc

11 p2103 A70-26475

High temperature gaseous molecular beams impingement on Cu surfaces at cryogenic temperatures measured for condensation rates

12 p2271 A70-27265

Spectral absorption characteristics for C atom radiative processes in carbon dioxide-nitrogen mixtures at high temperatures corresponding to Venusian atmosphere

12 p2275 A70-27317

Ionization kinetics of Ar, Xe and Hg monatomic gas behind shock wave front at high temperatures

12 p2210 A70-27319

High temperature kinetics of pyrolytic silicon carbide oxidation and nitridation in dissociated gases

13 p2361 A70-29077

Simulated Venusian atmosphere effects on polymeric plastic and rubber materials, comparing with high temperature air and nitrogen exposures

14 p2640 A70-30781

HIGH TEMPERATURE LUBRICANTS

High temperature molecules matrix isolation in saturated vapor over refractory solids, discussing optical spectroscopy of VO, metal oxide and halide molecules

14 p2545 A70-30903

Molecular beams formation from high pressures, discussing detection, diagnosis and applications in high temperature chemistry

14 p2545 A70-30904

High temperature inviscid flow of ideal radiating gas, analyzing effects of radiation pressure and energy on flow field

14 p2666 A70-30999

Shock waves structure in radiating gases at high temperatures, taking into account radiation anisotropy in shock front

15 p2720 A70-31645

Graphite oxidation on exposure to high temperature flow field based on surface coupled model

[AIAA PAPER 70-823]

16 p2940 A70-33941

Nitric oxide gas IR radiation properties at high temperatures, determining spectral mean fine structure and total band absorbance correlations

16 p3003 A70-34253

Radiation gas dynamics, investigating thermal radiation effects on flow field of high temperature gas

17 p3195 A70-35038

High temperature and pressure hot gas source for testing fluidic temperature sensor used in gas turbine engine inlet simulation

17 p3058 A70-35157

High temperature radial turbine design for small gas turbine engines, discussing aerodynamic, structure and thermal analyses

18 p3301 A70-36450

Electronic excitation contribution to frozen properties and cut-off criteria of high temperature gas plasma

18 p3296 A70-36955

Vacuum brazed stainless steel hot gas actuators for guided weapons

18 p3265 A70-37202

High temperature gas boundary layer flows with or without magnetic fields, discussing measurement by X ray absorption technique

19 p3405 A70-38192

Heat resistant coatings in high temperature gas flow, studying external layer deformation kinetics during shrinkage

19 p3428 A70-38468

Hot gas pipe thermoelastic reduction factors, determining elastic support, material and dimensions

20 p3720 A70-39624

Metal vapors electrical conductivity and density measurement at high temperatures and supercritical pressures

20 p3648 A70-39637

Relativistic high temperature gas asymptotic solutions with or without body force, comparing flow field with photon gas

20 p3673 A70-39654

High temperature gases radiative heat exchange, evaluating approximation methods

20 p3739 A70-40293

Local variables in boundary layer of high temperature ionized gas flowing in magnetic field, using X ray absorption

20 p3613 A70-40344

Liquid or vapor phase working fluids penetration effects on steady state and transient performance of hot reservoir gas controlled heat pipes

21 p3946 A70-41047

Spectral absorption characteristics for C atom radiative processes in carbon dioxide-nitrogen mixtures at high temperatures corresponding to Venusian atmosphere

21 p3854 A70-42058

Ionization kinetics of Ar, Xe and Hg monatomic gas behind shock wave front at high temperatures

21 p3854 A70-42061

High temperature gas turbine blades cooling by liquid Na-K alloy

[ONERA-TP-872]

22 p4125 A70-43458

Intermolecular forces at close approach distances in calculating thermodynamic and transport properties of high temperature dilute gases, using molecular beam methods

23 p4222 A70-44430

Gas transport properties at high temperatures and pressures, discussing Ar plasma arc characteristics

23 p4226 A70-44433

Phenolic nylon ablative thermal effectiveness in arc heated nitrogen, air and nitrogen-carbon dioxide streams

[AIAA PAPER 70-154]

23 p4282 A70-44520

Warm gas reaction control thrusts via solid propellant exhaust products for ballistic missiles attitude control

[SAE PAPER 700780]

24 p4295 A70-45863

HIGH TEMPERATURE LUBRICANTS

Aliphatic diesters as high temperature lubricants, discussing viscosity range extension, oxidation inhibition and thermal stability

13 p2438 A70-29125

- High temperature organic resin binders and solid lubricant thermal and oxidative behavior examined by thermogravimetric analysis
[ASME PAPER 70-HT-30] 22 p4058 A70-42436
- HIGH TEMPERATURE MATERIALS**
- U REFRACTORY MATERIALS**
- HIGH TEMPERATURE NUCLEAR REACTORS**
- High temperature energy systems with plasma reactors and inductive MPD converters, discussing spacecraft propulsion and ground based pollution-free power generation
15 p2791 A70-32278
- High temperature liquid metal cooled nuclear reactor for military aircraft with long flight endurance and range
22 p4071 A70-43188
- HIGH TEMPERATURE PLASMA**
- Sweeping W wire probe in rotational high temperature plasmas for local heat transfer measurement
06 p1120 A70-17699
- Stationary collisionless shock waves in hot initial plasma produced by theta pinch discharge, discussing magnetic field, density and electron temperature profiles
10 p1924 A70-24697
- Plasma transport properties at temperatures up to 15000 K, considering electrical and thermal conductivity, radiation source strength and viscosity
11 p2089 A70-25759
- Stellar and nebular magnetic fields formation, considering role of high temperature plasma random charge and current fluctuations
12 p2307 A70-27864
- Laser radiation interaction with hot nonuniform plasma, determining thermal and electromagnetic forces for various temperatures and densities
13 p2460 A70-28643
- Circularly polarized emission from types I and 4 bursts and noise storms, considering mode coupling in warm plasma, gyroradiation and Cerenkov radiation
13 p2479 A70-29851
- Whistler mode wave packets propagation in hot inhomogeneous collisionless plasma immersed in nonuniform ambient magnetic field
13 p2468 A70-29931
- Helium II line broadening in high temperature plasma, measuring profile for comparison with theoretical prediction
20 p3677 A70-39115
- Passive corpuscular diagnostics of high temperature plasma based on charge exchange neutrals, calibrating stripping chamber
20 p3685 A70-40398
- HIGH TEMPERATURE PLASMAS**
- Electron quench additives electrophilic effects in high temperature air plasma flow, simulating reentry flight conditions
04 p0664 A70-15561
- NO ion dissociative recombination rate coefficient determined in high temperature air plasma from electron temperature and number density measurements
04 p0675 A70-15583
- Transpiration-cooled electric arcs for high temperature high density plasma generation, considering uncertainties in plasma transport properties and temperature distributions
04 p0729 A70-15591
- Plasma nature, properties and applications, discussing echoes, shocks, phase mixing and hot plasma containment
05 p0887 A70-16130
- Fields and power transfer for electromagnetic waves in hot plasma calculated using Fourier integral and Fourier series methods
05 p0888 A70-16165
- HF electromagnetic field penetration of plasma with finite conductivity and Hall constant for containment of hot plasmas, formulating nonlinear electrodynamic problem
05 p0889 A70-16490
- RF probe impedance variations with magnetic field strength in hot plasma for electron gyrofrequencies less than plasma frequency explained by model
06 p1117 A70-17371
- Heat transfer in dense high temperature plasma due to drift waves instability at trapped electrons
06 p1121 A70-17802
- Heat flux, electrical and thermal conductivity of H measured on plasma in cascade arc chamber of high power load at 1 atm pressure
06 p1107 A70-18525
- Electromagnetic wave scattering from charged particle in hot electron plasma in magnetic field, considering relativistic corrections for scattered radiation spectra
07 p1352 A70-19992
- Free plasma column discharge in HF field in high pressure deuterium atmosphere, discussing high plasma temperature inside column and reliable thermonuclear reaction achievement
08 p1551 A70-21417
- Stark broadening of singly ionized nitrogen lines measured in dense high temperature plasma behind reflected shock wave in T tube
09 p1731 A70-22776

- Continuum radiation of nitrogen plasma at atmospheric pressure at high temperatures
10 p1923 A70-24472
- Transfer impedance measurement for HF quadrupole probe immersed in hot magnetoplasma
10 p1877 A70-24709
- Thermally ionized cesium plasma viscosity at high temperatures in vacuum using capillary tube assembly
11 p2092 A70-26731
- Heat transfer in dense high temperature plasma due to drift waves instability at trapped electrons
13 p2460 A70-28653
- Alouette spikes decrease with time equivalent to antenna transient response during hot plasma immersion
13 p2371 A70-29921
- High argon plasma temperatures via pulsing constricted electric arc
14 p2621 A70-30504
- Convective or absolute electrostatic instability in weakly inhomogeneous hot magnetoplasma, determining density and frequency for onset
14 p2622 A70-30695
- Bounded hot plasmas with/without steady magnetic field, discussing ion-electron resonances
15 p2779 A70-31997
- High temperature plasmas of mixtures of nitrogen with rare gases, calculating equilibrium thermodynamic properties
17 p3195 A70-34932
- Vlasov high temperature plasmas numerical analysis, using Hamilton variational principle
18 p3296 A70-36793
- High radiation intensity neodymium glass laser, describing installation for heating plasmas to high temperatures
20 p3643 A70-39758
- Exponential kernel approximation effect on radiative energy transfer in high temperature hydrogen plasma
20 p3684 A70-40278
- Lagrange formulation for deriving energy-conserving numerical approximations for Vlasov plasmas
22 p4080 A70-42750
- Solar X-ray data from rocket and satellites, discussing hot dense plasmas and correlation with H alpha flares, calcium plages and microwave emission
22 p4096 A70-43300
- Hot plasmas physics - Conference, Newbattle Abbey, Scotland, July-August 1968
23 p4224 A70-44176
- Plane plasma waves in homogeneous conducting fluid with magnetic field, considering oscillations of two-fluid, cold and hot plasmas
23 p4224 A70-44179
- HIGH TEMPERATURE RESEARCH**
- Be oxidation in carbon dioxide at high temperatures, explaining observed kinetic discontinuity in terms of oxide morphology
01 p0124 A70-11638
- High temperature heat treatment effects on Mo, W, Ta and Re crystal surface order and faceting observed by electron diffraction, noting contamination role
03 p0538 A70-13097
- Temperature dependence of sputtering coefficient of quartz and chondrites at 2000 K and mass decrease prior to evaporation
03 p0569 A70-13357
- Applied MHD and high temperature gas dynamics - Conference, Prague, May 1968
04 p0724 A70-14526
- Torsion testing apparatus for refractory materials at 2400 C, measuring applied torsion moment, twisting angle and second order modulus of elasticity
05 p0825 A70-15881
- Collection of papers on high temperature physics and chemistry covering shock tube chemistry, plasmas, exploding wires, etc
06 p1063 A70-17726
- High temperature technology - Conference, Pacific Grove, California, September 1967
07 p1311 A70-19876
- High temperature techniques, measurement and data methodology noting refractory materials
07 p1312 A70-19877
- Reentry thermal protection materials technology, discussing thermophysical, thermomechanical and kinetic effects, noting interdisciplinary approach
07 p1319 A70-19878
- Laser characteristics and applications in high temperature research including metal heating, welding, machining, surface particle emission and plasma production
07 p1301 A70-19881
- Chemical bonding of high temperature molecular species, discussing ab initio calculations for diatomic atoms
07 p1225 A70-19882
- Temperature dependence of sputtering coefficient of quartz and chondrites at 2000 K and mass decrease prior to evaporation
11 p2118 A70-26722
- Alloy oxidation at high temperatures emphasizing binary and ternary alloys
12 p2257 A70-28005

- Collection of papers on high temperature chemistry covering gaseous dissociation, molecular beams, thermal plasmas, solids sublimation, solar furnace, etc
14 p2545 A70-30901
- High temperature solid-solid reactions and solid-liquid or condensed phase-gas equilibria, using solar furnace
14 p2545 A70-30907
- High temperature transformation of high speed steel low temper hardened in vacuum or atmosphere furnace
15 p2756 A70-31568
- Specific heat and enthalpy of body centered cubic refractory metals at high temperatures
15 p2757 A70-31943
- Soviet papers on high temperature thermophysics covering body-gas heat exchange, plasma jet breakdown of subliming materials, electric arc heaters, plasmatron regime, etc
15 p2826 A70-32101
- High temperature elastic moduli in polycrystalline Al rods from propagation velocity of elastic waves generated by Q switched laser
[SESA PAPER 1641] 15 p2759 A70-32304
- Compressibility factors and virial coefficients for He-N mixture, He and nitrogen at low temperatures and high pressures
18 p3290 A70-36250
- Product distribution of organic nitrogen compounds plasma sources computed by assuming high temperature limited thermodynamic equilibrium
18 p3226 A70-36764
- High temperature systems - Conference, Pasadena, December 1964, Volume 2
22 p4090 A70-42751
- High temperature specific heat terms for refractory metals and ceramics from room temperature to near-melting point
23 p4207 A70-44440
- HIGH TEMPERATURE TESTS**
- Loads effects on refractory alloy fatigue strength and life at high temperatures, describing aircraft turbine blade tests
01 p0115 A70-10069
- Refractory and heat resistant materials thermal diffusivity coefficient, discussing theoretical basis and technical implementation for measurement at high temperature
01 p0085 A70-10178
- Projector with paraboloid mirror solar radiation condensing lens for studying heat resistant materials mechanical properties at high temperatures
01 p0055 A70-10179
- Thermal diffusivity coefficient and conductivity of Cr at high temperatures determined by plane temperature wave method
01 p0117 A70-10190
- Air lubricated foil bearing support design with external pressurization for high speed rotor in high temperature turbomachinery
[ASME PAPER 69-LUB-D] 01 p0100 A70-10377
- Apparatus for continuous creep measurement at high temperature for fine wire and thin tubular samples with small cross sectional areas
01 p0088 A70-10746
- Quartz-Fiberfrax heat shield tests for Thor booster at high radiative heating rates, noting optimum material performance dependence on loose stitching
01 p0129 A70-10850
- Liquid metals contact effect on mechanical strength of T shaped graphite specimens at high temperatures in argon atmosphere
01 p0129 A70-10338
- Annular metal specimens protection against oxidation during high temperature relaxation testing by covering specimens with Al powder thinned with alcohol
01 p0121 A70-11109
- Rockwell hardness tester attachment design for studying temperature dependence in various multiphase alloys at high temperature
01 p0121 A70-11110
- TD-Ni low cycle fatigue properties at high temperature, discussing grain morphology, thoria particles role and oxidation resistant coating effect
01 p0123 A70-11245
- High temperature ductility improvement in stainless steels containing He, analyzing lattice damage and interphase cavities after fast neutron irradiation
01 p0123 A70-11246
- Reinforced metals properties and applications including fibers and lamination, notch sensitivity, brittle fracture, failure and heat resistance characteristics
01 p0124 A70-11619
- Co-Cr alloy oxidation behavior at high temperatures and various oxygen pressures
02 p0319 A70-12720
- Strain gauge data obtainable on rosettes used for measuring test component stresses at 550 F in inert atmosphere
03 p0482 A70-12965
- B-C alloys chemical composition effect on high temperature stability in pure oxygen
03 p0514 A70-12978

Oxidation resistance of mixed silicon nitride and silicon carbide refractory materials at high temperatures 03 p0514 A70-12979

Aluminum oxide solid state reaction with Ta at high temperatures using chemical analysis 03 p0511 A70-13487

Titanium carbide hemispherical and spectral emissivity and electrical resistivity measured at high temperature 03 p0512 A70-13752

Rate and heat of vaporization of graphite filaments in 2500-3400 K range in vacuum and in He, using pulse heating techniques 03 p0517 A70-14004

High temperature effects on mechanical properties of recrystallized Ta relating strength, hardness and yield point 04 p0707 A70-15267

Surface work hardening and stress concentrations effects on fatigue strength of alloy under asymmetric tension and compression load cycles at high temperatures 04 p0707 A70-15270

Binary system Mo-C determined in temperature range 1250-2270 C, using microscopical and thermal analyses and microhardness testing 05 p0862 A70-16198

Creep in single crystal and polycrystalline Nb between 1300-1900 C under stresses, showing stress independent activation energy 05 p0862 A70-16202

High temperature Hf oxidation in air and oxygen using thermogravimetry, X ray diffraction and electron microscopy 05 p0863 A70-16522

Deformation and failure of refractory metals at high temperatures under constant and variable thermal loads concerning turbomachine components 05 p0865 A70-17027

Strength and plasticity of Mo and Nb sheet in oxidizing medium at high temperatures and pressure range 05 p0865 A70-17029

Stress rupture tests with Nb-based alloys in 1273-1673 K temperature range 05 p0952 A70-17039

E1617 alloy breakdown resistance tests under multiple alternating static tension-compression and vibrational loads at 800 C 05 p0867 A70-17044

Heat resistant materials damping properties at high temperatures under distributed stresses measured in thin walled tubular specimens with vibrogram 05 p0952 A70-17049

Creep, ductility and short term tensile and compression strength test facility for graphite in 300-3500 K temperature range 05 p0875 A70-17068

Test facilities for studying materials thermophysical properties and stress relaxation, including dynamic hardness measurement and torsion tests up to 2500 K 05 p0830 A70-17074

Creep effects on structural failure under low cycle fatigue at high temperatures, noting role of plastic deformation 06 p1164 A70-17409

Fatigue at high temperatures - ASTM Conference, San Francisco, June 1968 06 p1086 A70-17451

Creep-low cycle fatigue interactions in Udimet alloy at elevated temperatures, investigating cumulative damage 06 p1086 A70-17455

Creep deformation resistance decrease in pure Al tubular specimens at high temperatures under multiple stress reversals 06 p1087 A70-17456

Elevated isothermal and low cycle thermal fatigue of Hastelloy X, investigating test temperature, cycle frequency and stress temperature effects 06 p1087 A70-17457

Book on optimization by variational methods covering use of differential equations, Pontryagin minimum principle, optimal and feedback control, dynamic programming, etc 06 p1093 A70-17650

Strain gage high temperature performance in rocket engines tested by spot welding to turbine manifold, noting installation and position influence 06 p1069 A70-18440

Material inhomogeneity during high temperature fatigue tests taking into account probability density of random failure coordinate distribution 07 p1401 A70-18839

Ni influence in high temperature oxidation of austenitic Fe-Cr-Ni alloys investigated thermogravimetrically, metallographically and by electron probe microanalysis 07 p1305 A70-18965

Soviet book on structures design for stability at high temperatures with large gradients, discussing thermoelasticity, thermoplasticity and creep equations for shells, plates, etc 07 p1409 A70-19601

Creep rupture and residual tensile strength tests to evaluate long time properties and structural stability of Inconel 718 alloy, performing phase analysis 07 p1310 A70-19731

Phase equilibria, crystallization and solidus surface in transition conode triangle of ternary system Mo-Ti-C at high temperatures 07 p1310 A70-19804

High temperature creep rupture tests of arc cast and powder metallurgy wrought unalloyed W sheets 07 p1313 A70-19884

Ablation, transmission transparency and embrittlement of heat shield materials for Voyager tested under simulated Mars entry conditions 07 p1395 A70-19885

Ablation products and high temperature boundary layer chemistry of polytetrafluoroethylene (Teflon) in arc jet streams using mass spectrometer 07 p1319 A70-19886

Gas phase thermal decomposition of ammonium perchlorate at elevated temperatures using mass spectrometer 07 p1362 A70-20009

Electrically conductive ablative materials rapidly heated to 7000 F in test facility, discussing heating method and high strain rate testing 07 p1250 A70-20042

Hall effect and electric conductivity of cadmium arsenide at high temperatures as function of carrier concentration dependence on temperature and phase transformation 07 p1357 A70-20314

Hydrogen penetrability in heat resistant steels subjected to high temperature creep, observing activation energy decrease with increased stress 08 p1515 A70-20923

Cyclic creep and relaxation of heat resistant alloys at high temperatures, showing inapplicability of static load conditions 08 p1516 A70-20982

Phase diagram of dysprosium oxide-chromium oxide system constructed by microstructural analysis in 1600-2400 C range in argon atmosphere 08 p1556 A70-21118

Nickel alloy based metal fiber reinforced composites long-time structural stability at high temperatures 08 p1517 A70-21150

Dynamic creep rupture of stainless steel tested at high stress levels and temperatures 08 p1518 A70-21333

Inert gases and nitrogen determined at high temperature, discussing revision of existing functions representing intermolecular energy 08 p1598 A70-21525

Metals thermal conductivity at high temperatures determined by direct electrical heating method, considering specimen geometry effects on radiation losses 08 p1497 A70-21526

Recrystallization in austenite phases of vanadium and columbium HSLA steel alloys determined in high temperature deformation tests 08 p1521 A70-21704

Microstructure of wrought arc-cast polycrystalline W sheet after high temperature creep deformation at various stress levels 08 p1525 A70-21962

Co-based alloy mechanical properties and physical parameters at high temperatures, discussing oxidation and hot corrosion resistance 09 p1700 A70-22025

Gas saturation and inhomogeneity in surface layer of Ti alloys with alpha and beta stabilizers after high temperature heating 09 p1700 A70-22078

Free radicals role in high temperature surface reactions of solid metal oxide particles interacting with unburned flame gases 09 p1629 A70-22320

Metal and alloys hardness measuring devices at high temperatures in ultrahigh vacuum based on use of synthetic sapphire pyramidal indenter 09 p1675 A70-22566

Magnesium solubility in titanium from X ray analysis of Mg distribution in diffusion zones at high temperature and pressures 09 p1703 A70-22567

Creep failure fatigue life prediction methods involving hold period effects on high temperature fatigue properties 09 p1775 A70-22594

Fatigue strength tests of alloy during static and programmed loading at high temperatures from statistical standpoint 09 p1703 A70-22620

High temperature fatigue crack growth in metal, suggesting condensation of vacancies at crack front after each loading cycle 09 p1776 A70-22644

Internal nitridation temperature effect on dispersion hardening of austenitic stainless Fe-Cr-Ni-Ti steels, investigating interparticle spacing and layer thickness effects 09 p1705 A70-22810

Molybdenum heat capacity, electrical resistivity and thermal radiation measurements at high temperatures with millisecond resolution 09 p1706 A70-22955

Gages for static strain measurements at high temperatures, discussing resistivity temperature coefficient compensation 09 p1680 A70-23109

Austenitic steels and alloys high temperature softening under conditions of stress relaxation and creep, noting hardening action of plastic deformation 09 p1709 A70-23785

High temperature creep of prestrained molybdenum single crystals as function of physical treatment and crystal orientation 10 p1902 A70-23860

Gas viscosity high temperature measurement method in shock tube using boundary layer equations for velocity and static temperature distributions 10 p1867 A70-24151

Bismuth oxide resistivity and structural characteristics at high temperature and during transformation from solid to liquid state 10 p1927 A70-24272

Thermal conductivity coefficient of metals and alloys above 1000 C by longitudinal heat flow method 11 p2065 A70-25761

Thermal diffusivity of opaque materials by phase shift method, using modulated radiation beam from carbon arc to heat material 11 p2068 A70-25767

Thermal dissociation kinetics in chlorine pentafluoride over high temperature range 11 p1994 A70-25823

Axial strain controlled fatigue tests at elevated temperature, discussing specimen gripping, alignment and break detection for mechanical and closed loop hydraulic test machines 11 p2033 A70-26611

Procedures for conducting fatigue studies at high temperatures on servocontrolled testing machines using stress, axial, transverse or plastic strains 11 p2033 A70-26612

High temperature fatigue tests of materials under uniaxial controlled strain, describing equipment, failure interpretation and data reduction 11 p2033 A70-26613

Cross sensitivity errors effect on stress determination by free-filament wire strain gages used at high temperature 11 p2058 A70-26838

Nitrogen transport properties to 26,000 degrees K, measuring current-field intensity properties and radial temperature distributions in molecular nitrogen cascade 11 p2151 A70-26841

Airframe structural tests in elevated temperature environment by applied load ratios and room temperature static results 12 p2205 A70-27134

High temperature compressive creep tests at constant stress, describing strain measurement techniques and servocontrolled compressive equipment 12 p2206 A70-27214

Metals thermal properties simultaneous determination at high temperatures, describing measuring equipment operation and circuitry 12 p2206 A70-27219

Materials absorption coefficients determination at high temperatures based on spectrophotometric analysis of emission from samples of different thicknesses 12 p2331 A70-27305

Congruent vaporization rates of niobium monocarbide phase at high temperatures in vacuum, using method of least squares 12 p2254 A70-27320

Grain boundary grooves growth kinetics in pure CoO at high temperatures, determining diffusion species and mechanisms 12 p2255 A70-27603

Molten lithium sodium carbonate electrolyte decomposition and evaporation at high temperatures in various atmospheres, noting water and carbon dioxide additives effects 12 p2166 A70-27763

Shock ionized xenon electrical conductivity measurement at high temperatures as function of Mach number, noting equilibrium effects 12 p2281 A70-27807

Vacuum annealing treatments effect on oxidation rate of Co-Cr alloy at high temperatures 12 p2257 A70-28007

Elastomeric seals and sealants selection for SST, describing tests in air, fuel vapors and hydraulic fluids at elevated temperatures 13 p2418 A70-28668

Phase transformations of molybdenum carbide under elevated temperature in vacuum, using X ray and differential thermographic analysis 13 p2433 A70-28852

Hot torsion test for Al alloys workability assessment, noting test temperature and specimen geometry effects on fracture strain values 13 p2436 A70-29816

Interatomic bond strength in solid solutions of Ti-Sn-O with respect to heat resistance at elevated temperatures 14 p2595 A70-30170

Creep properties of torsion-tension metal members subjected to nonproportionate loading at high temperatures 14 p2656 A70-30637

High temperature elastic moduli of slender polycrystalline aluminum rods with elastic waves generated by Q switched laser energy 14 p2595 A70-30638

Alloy high temperature creep and long term strength, determining exponential relations between stress, strain rate and durability 15 p2755 A70-31529

Measuring apparatus for cyclic plastic strains at high temperatures, discussing data processing techniques 15 p2733 A70-31538

Eutectic NiAl-Cr structure and high temperature tensile strength as function of solidification rate 15 p2755 A70-31560

Electrical conductors specific heat measurement at high temperatures, using optical techniques and digital systems 15 p2826 A70-31942

Graphite Shore hardness measurement at high temperature on Joule heated specimens, describing apparatus and procedure 15 p2764 A70-31944

High temperature metal fatigue crack growth monitoring by ultrasonic detection (SESA PAPER 1622) 15 p2744 A70-32321

Stainless steels creep behavior under long term tensile loads at high temperature 15 p2764 A70-32898

Massive eutectic and fine gamma phases precipitation in cast nimonic 100 alloy at 900 C aging 16 p2930 A70-33083

Al-Mg alloys creep characteristics dependence on Ag, Si and Zn additions during aging heat treatments, establishing activation energy and stress exponents 16 p2930 A70-33086

Polycrystalline NaCl-KCl solid solution alloy, considering high temperature creep under constant compression stress 16 p2961 A70-33275

Low cost flame retardant high service temperature glass reinforced electrical grade laminate tested for continuous use 16 p2935 A70-33355

Iron, Ni, Cr and Co corrosion and mass transfer in high temperature Na, examining properties of stainless steels and cobalt base alloys 16 p2933 A70-34209

Ti alloys embrittlement, investigating time temperature dependence of brittle subsurface layer formation during elevated temperature air exposure 17 p3112 A70-34365

Ti-Al-Sn-Zr system high temperature creep strength and ductility retention 17 p3120 A70-34424

Oxidation and atmospheric contamination protective coatings for high temperature materials, using burner ring tests 17 p3127 A70-34519

Pure Fe and Ta hot hardness using ultrahigh temperature hardness tester 17 p3124 A70-34659

Cyclic strain effects on creep for steel at elevated temperatures, discussing overload frequency effects on plastic strain buildup 17 p3127 A70-35719

Grain boundary allotriomorphs growth mechanisms in Al-Cu alloy at high temperatures, indicating interfacial and direct volume diffusion 18 p3271 A70-36027

High temperature reaging in Ni-Cr-Ti austenitic steel following reversion and interrupted quenching 18 p3274 A70-36054

Ceramic materials for low cost high inlet temperature gas turbine engine components [ASME PAPER 70-GT-105] 18 p3279 A70-36889

Welded Al plates high temperature bend tests, describing materials and procedures 18 p3278 A70-37115

Plastic deformation in Ni-Cr-Nb alloy precipitation hardened at different long terms of high temperature 19 p3451 A70-37706

Sulfidation kinetics and scale morphology of Cr and Cr-Mo alloys at high temperatures in hydrogen/hydrogen sulfide atmosphere 19 p3452 A70-37827

High temperature convective heat transfer in vortex chamber as function of Reynolds number and geometry, measuring pressure variations 19 p3552 A70-38186

High temperature transducer for engine vibration measurement, discussing piezoelectric accelerometers mechanical design, jet engines material evaluation, crystallographic considerations, etc 19 p3430 A70-38527

High temperature acoustic waves, examining solid and fluid properties, weld integrity nondestructive material tests and nondisruptive process measurement 20 p3628 A70-39170

High temperature endurance strength of temper finished bolt connections under cyclic loads, using programmed fatigue testing machines 20 p3718 A70-39223

Graphites erosion by water and carbon dioxide at high temperatures, using liquid rocket simulator for kinetics study [AIAA PAPER 70-638] 20 p3736 A70-39587

Nb single and polycrystalline thermal properties at high temperatures 20 p3648 A70-39639

Thermal stress and changes in modulus of elasticity and expansion coefficient effects on dynamical properties of turbine disks at high temperatures 20 p3721 A70-39783

Lithium-diffused silicon, investigating heat treatment and electron irradiation effects on electrical resistivity at high temperatures 20 p3687 A70-40164

Al yield surfaces in stress space at elevated temperatures for virgin and prestressed material in torsion 21 p3840 A70-41436

Metal cracking and fracture mechanics under creep conditions at elevated temperatures, discussing notch rupture testing 21 p3937 A70-41437

Surface ablation patterns in subliming materials tested in high temperature structures tunnel 21 p3951 A70-41755

Pure Fe and Ta hot hardness tests by ultrahigh temperature tester involving use of electron microscope 21 p3840 A70-41900

Recrystallized and nitrided Mo alloy microstructure under plastic deformation by tension at high temperatures 22 p4038 A70-43122

Mo microstructure changes at high temperatures, noting polygonization, grain migration and crack propagation during failure 22 p4055 A70-43125

Ti alpha alloy fracture characteristics at high temperatures, discussing strain rates, deformation resistance and grain growth 22 p4056 A70-43343

Strain gage stress measurement under elastic-plastic strain conditions at high temperature 22 p4117 A70-43454

German monograph on refractory materials softening under bending and compression at high temperatures 22 p4061 A70-43742

Mg high temperature creep mechanism in high and low stress regions, using isothermal tensile creep tests 23 p4204 A70-43885

Compressibility, viscosity and thermal conductivity of dense gases, examining high temperature and pressure effects 23 p4222 A70-44431

High speed photoelectric pyrometry of Ta heat capacity at high temperatures induced by pulse heating 23 p4207 A70-44441

Spectral absorption of 2.7 micron water vapor band under various high temperature and pressure conditions, using black body radiation 23 p4220 A70-44444

Boiling point method for alkali metals vapor pressure at high temperatures, estimating data accuracy 23 p4281 A70-44448

Cs high temperature vapor and critical pressure and temperature determination for predicting thermodynamic and transport properties, liquid phase nature and state relations 23 p4281 A70-44449

Cesium high temperature saturated liquid and vapor phase density and critical temperature and pressure 23 p4281 A70-44450

High temperature aluminum species in vapor over solid alumina, determining thermodynamic properties, composition and accommodation coefficient by Knudsen effusion and mass spectroscopy 23 p4281 A70-44451

Extremely high temperature deuterium examination, using coaxial plasma accelerators to determine neutron production and vorticity 23 p4227 A70-44452

Directional emissivity and thermal diffusivity of solids at 1000-3000 K by radiation comparison method, applying to sintered and plasma sprayed Mu, Ta and W 23 p4207 A70-44661

Zr-Cu alloys corrosion resistance in carbon dioxide at high temperatures, noting composition effect on behavior 23 p4208 A70-44875

Servo-hydraulic testing machine for measuring cyclic stress-strain behavior of materials subjected to fatigue and creep at elevated temperature 23 p4178 A70-44912

Atmospheric pressure Ar plasma viscosity measured over heavy particle temperature range 3500-8500 K, using DC wall stabilized cylindrical arc 23 p4229 A70-44983

Impurities and heat treatment effects on W internal friction at high temperatures, considering relaxation processes, recrystallization and microstructure 24 p4357 A70-45227

Ti single crystals plastic deformation in axial compression at high temperatures 24 p4358 A70-45239

Longitudinal phenomena and two phase structures effect on ductility of low carbon steel-chromium subjected to high temperature torsion 24 p4361 A70-46173

Al and liquid Al-Mg alloys oxidation at high temperatures, noting Mg content effect 24 p4361 A70-46174

High temperature solar furnace for investigating heat resistant protective coatings thermal stability 24 p4350 A70-46331

HIGH THRUST

Analytical method for design of supersonic flow and maximum thrust nozzles for chemically reacting gases, noting surface geometry [AIAA PAPER 70-129] 06 p0971 A70-18108

HIGH VACUUM

Thin high vacuum gate valve design for use with UV grating spectrograph 19 p3357 A70-37687

Arc welding in space under high vacuum weightless conditions, describing equipment design and Soyuz 6 experiments 19 p3436 A70-37803

HIGH VACUUM ORBITAL SIMULATOR

Thermal vacuum simulator for testing manned Lunar Module Test Vehicle, using conformal skin heaters to control heating rates and skin temperature 09 p1656 A70-23241

HIGH VOLTAGES

High sawtooth voltage generator with semiconductor triodes, giving circuit parameters and diagrams 16 p2873 A70-33212

High voltage MOST silicon integrated circuits, using dielectric isolation and field plate techniques 21 p3798 A70-41214

High voltage solar array with integral power conditioning, discussing weight factors, panel design and layout, mechanization, performance prediction, etc [AIAA PAPER 70-1158] 21 p3759 A70-41787

High voltage solar array operational problems in earth orbit environment, discussing conducting surfaces, power loss, plasma effects, leakage, etc 22 p3967 A70-43544

HIGHWAYS

Urban development detection by remote sensing imagery of highway and rail linkage 12 p2216 A70-26908

Spaceborne photography for detecting and identifying road networks, using color separation plates and photograph enlargement 12 p2216 A70-26910

Multipolarized radar imagery for detecting high return linear cultural features in geographic areas including channel markers, bridges, railroad and power-line networks, etc 12 p2228 A70-26911

Short haul transportation needs in multimodal transportation systems planning, discussing modeling in Northeast Corridor Project [AIAA PAPER 70-1265] 24 p4431 A70-45925

HIJACKING

U AIR PIRACY

HILBERT SPACE

NT BANACH SPACE

Solution existence of linear unsteady Boltzmann equation for single space variable in Hilbert space defined by scalar product 01 p0143 A70-10673

Residual stress determination in elastoplastic body with known plastic strains, using Hilbert space for symmetric tensor fields 01 p0209 A70-11399

Causality and analyticity related for case of separable complex Hilbert space, using algebra characterization of causal maps 03 p0461 A70-14168

Hilbert space stability theory over locally compact Abelian groups developed to obtain spectral theory and positivity conditions 03 p0461 A70-14169

Self adjoint boundary value problems with interior point boundary conditions using differential operator in Hilbert space 05 p0876 A70-16423

Multidimensional stochastic approximation theorems useful for infinite-dimensional Hilbert space or Banach space 07 p1324 A70-19029

Hilbert transform as operator in function space defined on harmonic analysis groups, noting application to noise stability, modulation and signal detection 07 p1235 A70-19644

Operator originated by Schroedinger equation having inhomogeneous boundary conditions on portion of boundary of Hilbert spaces orthogonal sum, defining region of self conjugation

13 p2442 A70-29514

Mixed boundary value problems for pseudoparabolic partial differential equations solved in Hilbert space, demonstrating solution existence and uniqueness

14 p2599 A70-30635

Radiation patterns Hilbert spaces for solving inverse problem of antenna theory

19 p3386 A70-37438

Approximate bounds for differential eigenvalues of self adjoint linear operators in Hilbert space

23 p4211 A70-44245

HILBERT TRANSFORMATION

Transverse nonrecursive digital filters for Hilbert transformation, investigating ideal quadrature filters with Chebyshev approximation errors

05 p0822 A70-16772

Hilbert transform as operator in function space defined on harmonic analysis groups, noting application to noise stability, modulation and signal detection

07 p1235 A70-19644

Computational load reduction in aircraft tracking, comparing sensitivity and Hilbert norm methods

11 p2025 A70-26212

Soviet book on conjugate functions and trigonometric series covering Hilbert transform, Fourier series properties, Cesaro methods, etc

19 p3459 A70-38799

HILL CURVES

U HILL METHOD

HILL DETERMINANT

Phase plane method for Hill equation in problems involving EM wave expansion in elliptical waveguides or single circuit parametric systems analysis

18 p3227 A70-36424

Dynamic systems stability with periodically varying parameters analyzed by Hill type infinite determinant, exemplifying helicopter rotor aeroelastic stability in forward flight

23 p4220 A70-44556

HILL METHOD

Polymers yield criterion determination using Hill method exemplified by polyvinyl chloride, discussing effects of transversal anisotropy and rheological properties

02 p0320 A70-11740

Planetary motion zero-rank effects numerical integration, using Hill secular perturbation method and trace of dyadics

14 p2639 A70-30704

HILLER MILITARY AIRCRAFT

U MILITARY AIRCRAFT

HILSCH TUBES

State and velocity distribution measurements for air in counterflow vortex tube to determine axial variation of flow quantities

05 p0831 A70-15884

Optimum low temperature two circuit vortex refrigerator using compressed air precooled in heat exchanger

22 p3965 A70-42808

HINDRANCE

U CONSTRAINTS

HINGE MOMENTS

U TORQUE

HINGED ROTOR BLADES

U HINGES

U ROTARY WINGS

HINGLESS ROTORS

U RIGID ROTORS

HINGES

Rotational stability of spacecraft with hinged inelastic rods determined in first approximation from motion equations

04 p0759 A70-14426

High speed compound helicopters with rigid and hinged rotors noting features, advantages and construction

05 p0794 A70-16351

Matrix method for calculating aerodynamic loads, shearing forces, bending moments, torques, etc, in hinged main rotor helicopter blades during hover and vertical flight

06 p1167 A70-17914

Dynamic synthesis of hinged four-element mechanism with respect to driven link position, transmission relations and allowance for transmission angle

11 p1983 A70-25934

Rotational stability of spacecraft with hinged inelastic rods determined in first approximation from motion equations

13 p2503 A70-28451

HIPPOCAMPUS

Direct links existence between rabbit temporal cortex neurons and neurons in each division of hippocampus, discussing topographic arrangement and axons quantity

03 p0417 A70-13071

Small amplitude discharges and neuron activity in dorsal hippocampus of cats recorded simultaneously with pyramid cell activity

04 p0632 A70-15221

Hypothalamus stimulation effect on electrical activity of hippocampus at threshold and super-threshold levels in cats

08 p1446 A70-21448

Hippocampus nerve cells protein fractions synthesis in rats, noting relation to learning process during transfer of handedness

12 p2172 A70-28217

Conditioned reflex type fear reaction by electric stimulation of hippocampus in cats

14 p2535 A70-30184

Sleep-wakefulness cycle electroencephalogram of auditory and visual portions of neocortex and hippocampus activity in cats, using spectral analysis and integration

14 p2536 A70-30185

Desynchronized sleep phase in cats, discussing activation and hippocampal theta and hippocampal delta rhythm predominance stages

20 p3574 A70-40171

Peripheral stimulations of various modalities effect on neurons impulse activity in hippocamp dorsal area of rabbits, noting excitation and latent periods

23 p4145 A70-44311

Mesencephalic reticular formation influence on threshold stimulation of cortex, hippocampus, amygdala, thalamic nuclei and caudatum in rabbits

24 p4300 A70-45839

HISS

VLF and LF auroral or polar hiss as generated by incoherent Cerenkov radiation from high energy electrons

07 p1264 A70-19190

Outer radiation belt high energy electron fluxes correlated with VLF hiss ground observations

07 p1367 A70-19498

Outer radiation belt high energy electron fluxes correlated with VLF hiss ground observations

15 p2795 A70-32743

VLF radiation observation at conjugate points, discussing hisses, choruses and geomagnetic effects

19 p3416 A70-38587

Lower hybrid resonance frequency propagation ducts in multiton upper ionosphere, showing association with VLF hiss bands

20 p3584 A70-39331

HISTAMINES

Cerebral histamine distribution in rat brains, noting highest concentrations in hypothalamus and thalamus

01 p0020 A70-10708

HISTIDINE

Quantitative gas-liquid chromatography of histidine, using N-TFA n-butyl ester derivatives and histidine converted trimethylsilyl derivative

22 p3983 A70-43524

HISTOGRAMS

Physiological data analyzer modification for simultaneously estimating scaled interval histograms /SIHs/ written in one memory subgroup

14 p2542 A70-30799

Radio sources angular dimensions estimation based on shifts in histograms of scintillation quasi-periods

19 p3525 A70-38766

Stellar axial rotational velocity statistical analysis to break-up limit, obtaining velocity distribution approximation from observed histogram

23 p4251 A70-44823

HISTOLOGY

Phosphopentomutase activity in rabbit tissue, reporting probable PG-mutase subsidiary function and activity of previously unrecognized enzyme

01 p0012 A70-10091

Vascular anatomy correlation with human heart conduction tissue structures to study coronary artery disease cases exhibiting major conduction disturbances by ECG

01 p0013 A70-10273

Coronary atheroma in hyperlipemic dog occurring in arterial tree at most intense physical stress exposure period, discussing interfacial tissue permeation

04 p0635 A70-15460

HISTORIES

NT CASE HISTORIES

HIVOS [SIMULATOR]

U HIGH VACUUM ORBITAL SIMULATOR

HO-6 HELICOPTER

U OH-6 HELICOPTER

HODOGRAPHS

Mobile hodograph in problem of gyrostat motion about fixed point

01 p0094 A70-11430

Kharlamova solution for solid body motion in Newtonian force field represented as rolling, without slipping, of mobile hodograph of angular velocity vector

01 p0145 A70-11431

Three dimensional picture of wave system of single headed spin detonation constructed by simultaneously considering wave mapping in real and hodograph planes

02 p0278 A70-12028

Compressible flows with circular sector hodographs, discussing Chaplygin equation for simple wedge flow and theorem on sonic jets

04 p0613 A70-14612

Chaplygin equation solution for wedge flows applied to Rethy flows, evaluating drag coefficient and approximate hodograph equations for subsonic and transonic regimes

04 p0614 A70-14613

Approximation for axisymmetric hodograph equation for nozzle calculation

07 p1188 A70-19347

Hodographic determination of required velocity changes for space vehicle transfer orbit, involving only launching point and trajectory plane

08 p1577 A70-21505

Hodograph or Riemann invariants method generalization for nonelliptic systems, discussing three dimensional potential supersonic flows

10 p1863 A70-24087

Riemann invariants, discussing method characteristics in physical and hodograph space applications and multidimensional hyperbolic systems

10 p1865 A70-24103

Chaplygin approximate hodograph method variants diagrams and tables with numerical values for proper application

13 p2442 A70-29486

Hodograph theory for family of almost vertical ballistic trajectories

14 p2617 A70-31355

Baecklund transformations applications to hodograph equations for steady two dimensional nondissipative MGD flows with aligned velocity and magnetic fields

15 p2781 A70-32453

Baecklund type matrix transformations application to hodograph equations system for aligned nondissipative MGD flows

16 p2958 A70-33747

Hodograph equations for relativistic irrotational steady plane flows, investigating transformation to physical plane

19 p3406 A70-38664

Turbine blade profiles calculation by hodographs, obtaining compatibility with continuous flow velocity distribution and improved boundary layer stability

19 p3491 A70-38949

Hodography of compressible fluids three dimensional irrotational isentropic flow

21 p3808 A70-41439

Perfect gas circular subsonic flow around convex obstacle, using hodographic method for boundary problem

22 p3958 A70-42608

Plane transonic flow around airfoils, using hodograph based methods for shock free flow and finite difference methods for flow with shock waves [ICAS PAPER 70-12]

23 p4132 A70-44123

Lifting quasi-elliptical airfoils with supercritical shock free flow, discussing Nieuwland hodograph theory to compute profile number [ICAS PAPER 70-15]

23 p4132 A70-44126

HODOSCOPES

Scintillation counters hodoscopic system for studying spatial distribution of muon and muon-number fluctuations in extensive air showers

03 p0482 A70-13042

Cosmic ray experiment for detecting quarks in low density showers, using hodoscope of wire proportional counters

16 p2972 A70-33048

Cosmic ray muon intensity deep underground vs depth measured with liquid scintillation detector hodoscope

18 p3308 A70-36897

HOHMANN TRAJECTORIES

U ELLIPTICAL ORBITS

U TRANSFER ORBITS

HOHMANN TRANSFER ORBITS

U ELLIPTICAL ORBITS

U TRANSFER ORBITS

HOLDERS

NT FLAME HOLDERS

Biplanar photocell in various holders noting intrinsic properties, emphasizing rise time characteristics

04 p0695 A70-15572

Specimen holder for 300 K/4.2 K resistance ratio measurement

09 p1655 A70-22645

Pressure chamber with inserted holder for adjusting Fabry-Perot interferometer

09 p1681 A70-23337

HOLE DISTRIBUTION [ELECTRONICS]

Edge luminescence effect in doped p-GaAs single crystals with various hole concentrations, determining band structure at liquid nitrogen and room temperature

01 p0154 A70-10097

Four layer semiconductor device triggering by X or gamma radiation calculated by transport equations for electron and hole distribution motion and electric field distribution

04 p0657 A70-14731

- Diffusion coefficient of charged particles in HF stabilization of current-convective instability measured in Ge semiconductor electron hole plasma
07 p1355 A70-20365
- SnTe of various nominal hole concentrations measured for longitudinal piezoresistance effect along different crystallographic directions
10 p1927 A70-23993
- Photon lifetime dependence on hole and electron concentration in GaAs from IR reflection spectra analysis
13 p2470 A70-28882
- Metallic state basic parameters determined by electron transfer technique, discussing ion charges, electron and hole concentrations current scattering cross sections, etc
13 p2433 A70-28886
- Electric field finite amplitude oscillations of electron hole plasma during pinch effect, considering impurities stabilizing effect
22 p4084 A70-43468
- Intraband absorption in p-type GaAs associated with carrier transitions between heavy and light hole in valence band
23 p4232 A70-45066
- HOLE DISTRIBUTION [MECHANICS]**
- Curvature and hole spacing effects on stress concentration of isotropic plate weakened by two curvilinear holes, applying small parameter method
01 p0212 A70-11447
- Two asymptotic dimensional moment theory of elasticity, analyzing stress concentration at curvilinear holes and fluctuating boundary loads
01 p0212 A70-11563
- Error estimates of stress concentration at free hole determined by two dimensional elasticity theory of thick plates
01 p0212 A70-11564
- Al alloy strips weakened by holes, analyzing limiting tensile load-carrying capacity
02 p0384 A70-11741
- Stress state of brittle alloy turbine disks with eccentric hole distributions, studying stress concentrations, hole number effects, etc
03 p0588 A70-13243
- Shells with holes using Neumann method, obtaining Fredholm alternative for singular integral equations
03 p0589 A70-13347
- Spherical shell elasticity having circular hole at apex using asymptotic method, calculating stress concentration at hole
03 p0590 A70-13381
- Stress-strain state of infinite isotropic perforated plate under cyclic symmetry, assuming finite strains and nonlinear material
03 p0592 A70-13445
- Membrane stress concentration near circular cutouts in uniaxially stressed sheets reduced by predeforming immediate surroundings of hole
05 p0940 A70-16515
- Plane and cylindrical elastic waves dynamic characteristics propagating in half space with holes, reducing boundary value problem and deriving formulas for interacting waves
05 p0946 A70-16858
- Stress concentration of circular cylindrical shell weakened by elliptic hole under torsion
05 p0947 A70-16965
- Effect of uniformly distributed circular holes in infinite double row on stress distribution in transversely bent strip, based on Kirchhoff bending theory
07 p1407 A70-19385
- Boundary value problems solution for infinite elastic isotropic plane weakened by arbitrarily distributed circular holes based on using series in Taylor functions
07 p1408 A70-19549
- Hole reinforcement in flat plate under uniaxial load with high stress region at boundary, resulting in weight savings
07 p1414 A70-20174
- Stressed state in region of strain raisers /round holes/ in plate subjected to two axial tension associated with plastic yield
09 p1771 A70-22464
- Thermal stress concentrations at arbitrary holes for nonlinearly elastic materials, developing small deformation theory for two dimensional problem
09 p1779 A70-23093
- Stress analysis for cylindrical shells with reinforced circular holes by collocation method
09 p1781 A70-23280
- Stress concentration at elliptical hole of arbitrary eccentricity in shallow sandwich shells with hard and soft fillers
09 p1783 A70-23385
- Stress distribution in strip with asymmetrically positioned infinite row of equal and equally spaced circular holes subjected to longitudinal tension or transverse bending
10 p1955 A70-24082
- Stresses in dynamically loaded struts with one or three holes by photoelasticity, using Fastax camera
12 p2315 A70-26878

- Plane periodic diffraction of elastic waves propagating in medium with infinite sequence of circular holes
12 p2325 A70-27557
- Stress concentration in fiberglass reinforced plastic composite cantilever cylindrical shell in round hole region subjected to concentrated load on free supported end
12 p2328 A70-28286
- Critical loads for brittle bodies weakened by sharp holes under combined diffuse thermal fluxes and crack crossing
12 p0000 A70-28321
- Stress concentrations and optimum shape minimum-weight reinforcement of circular holes in plates determined by polarization-optical technique
13 p2512 A70-28864
- Thermoelastic stresses in sphere with cylindrical cut under axisymmetric temperature field and constant surface temperature
14 p2655 A70-30135
- Shells with holes using Neumann method, obtaining Fredholm alternative for singular integral equations
14 p2657 A70-30721
- Surface heat transfer coefficients under perforated plate of multiple square array round impinging air jets [ASME PAPER 69-GT-4]
14 p2666 A70-31025
- Strength and critical load determination for spherical shells with reinforced hole under internal pressure based on stress-strain state analysis during deformations
15 p2814 A70-31543
- Stress analysis of polystyrene plate weakened by doubly periodic system of equal circular holes
15 p2817 A70-32166
- Stress concentration problems for partially strengthened circular hole in plate under uniaxial tension
15 p2819 A70-32185
- Elastic equilibrium of unbounded body with central hole and concentric cracks under symmetric load
15 p2819 A70-32188
- Stress distribution around oblique holes in uniaxially loaded plate using three dimensional photoelastic analysis
15 p2820 A70-32305
- [SESA PAPER 1618] Membrane and bending stresses at crack tip in cylindrical shell weakened by elliptic hole with major axis perpendicular to shell axis
17 p3186 A70-34981
- Shallow shell theory boundary value problems, calculating stress concentration for domes and shells with holes
17 p3192 A70-35694
- Circular cylindrical shell with round holes along generatrix subjected to internal pressure, determining stress concentration with aid of computer
18 p3335 A70-36131
- Elastic bending of perforated inhomogeneous plane with circular holes or inclusions
18 p3340 A70-36579
- Stress state of brittle alloy turbine disks with eccentric hole distributions, studying stress concentrations, hole number effects, etc
19 p3548 A70-38461
- Aerostatic journal bearings with double plane admission feeder holes, determining maximum load and stiffness by numerical method
19 p3443 A70-38898
- Infinite elastic plate with pair of insulated unequal circular holes, calculating thermal stresses
20 p3720 A70-39672
- Creep and breakdown of thin walled cylindrical shells with circular holes subjected to internal loads at high temperature, discussing time to failure
20 p3721 A70-39777
- Stress distribution at hole in orthotropic cylindrical sandwich shell under internal pressure
20 p3734 A70-40440
- Perforated steel strip axial tension load limit, considering various hole diameters and numbers
21 p3936 A70-41415
- Isotropic nonlinear elasticity problems of stress concentration near spherical cavity in field of triaxial tension, using small parameter method
22 p4120 A70-43714
- Free and supported curvilinear holes with random roughness, investigating stress concentration by conformal mapping
23 p4265 A70-43984
- Anisotropic media weakened by elliptical holes, using doubly periodic solution for stress concentration
23 p4266 A70-43986
- Stress concentration near holes in nonlinear viscoelastic plate, using elastic theory
23 p4266 A70-43989
- Steel and duralumin strips with circular holes tested under axial tension, determining relationship between strength weakening and ultimate stress
24 p4420 A70-45272

HOLE MOBILITY

- Hole mobility in n-type InSb semiconductors determined from solving kinetic equation for minority carriers allowing for scatterings
01 p0155 A70-10185

HOLES

- Spherical shell of variable thickness, calculating stress-strain state around reinforced circular hole during elastoplastic deformation
18 p3336 A70-36138
- Stresses around circular hole in shallow conical shell under torsional load, using perturbations in parameters for curvature and cone angle
21 p3934 A70-40779
- Circular cylindrical hole in uniaxial tension field of elastic media, solving plane strain problem for stress concentration factors
21 p3941 A70-42107
- Cylindrical boreholes as reference defects in ultrasonic inspection, discussing geometrical parameters effects on echo height
24 p4343 A70-45691
- Infinite plate perforated with rounded corner square hole under uniform partial loading, examining elasticity with conformal mapping
24 p4427 A70-46367
- HOLES [ELECTRON DEFICIENCIES]**
- Energy spectrum of electrons and holes in semiconductors under strong electromagnetic wave field, calculating electron-phonon interaction Green function
01 p0155 A70-10184
- Negative resistance mechanism model with larger electron accumulation in conduction band than free holes
03 p0539 A70-13212
- Kinetic equation of helicons interactions in electron-hole plasma, discussing turbulence spectrum and effect on current carrier drift velocity
03 p0531 A70-13407
- Photoconductivity growth and decay curves green edge emission and integral flux in optical flare of cadmium sulfide crystals due to hole trapping process
03 p0540 A70-13503
- Magnetic field effect on recombination radiation intensity under pinch effect in semiconductor non-degenerate electron hole plasma with recombination time exceeding carrier lifetime
03 p0540 A70-13508
- Electrical properties of Cu-diffused GaAs, studying temperature effects on acceptor concentration and electron population growth
03 p0541 A70-13730
- Electron-hole pair creation in semiconductors /Zener effect and impact ionization/ defined from qualitative study of electron-phonon collisions
10 p928 A70-24624
- Electron-hole transitions in GaAs obtained by sulfur diffusion, noting capacitance dependence on voltage at 293 and 77 K at various frequencies
12 p287 A70-27481
- Degenerate pinch in bipolar electron-hole plasma in semiconductors
13 p2472 A70-29760
- Photoemission of electrons and holes from Al into aluminum oxide, giving approximate energy band diagram of Al-aluminum oxide interface
15 p2783 A70-31759
- Average triton energy required to produce electron-hole pair in silicon measured, describing precision charge calibration of amplifier system
15 p2784 A70-32198
- Pinch effect in degenerate and nondegenerate electron hole plasma in semiconductors during bimolecular bulk recombination
18 p3298 A70-36620
- MOS field effect transistor, measuring electrons and holes thermal emission rates and activation energies at gold centers in Si
22 p3997 A70-43016

- HOLLAND**
U NETHERLANDS

- HOLMIUM**
- Spectral emission in trivalent Ho doped Yb-Al garnet single crystals grown by optical zone melting
15 p2784 A70-32198

- HOLOGRAPHY**
- Holographic interferometry as stress analysis technique for crack propagation studies, discussing advantages over classic interferometric and conventional photoelastic methods
01 p0198 A70-10002
- Holographic relationship of coherent optical processing applications to coherent or side-looking radar, discussing seismic holography concept
01 p0086 A70-10414
- Microwave holography, discussing zone plate lens design, coherent side-looking radar, large antennas, three dimensional radar display applications
01 p0086 A70-10415
- Optical reconstruction of microwave holograms recorded by liquid crystal detectors, emphasizing dependence on IR heat bias provided by incandescent bulb
01 p0086 A70-10421
- Holographic spectroscopy design and development, discussing components and recording yellow Na doublet
01 p0087 A70-10659

Holographic interferometry for determining optical path variations resulting from photographic plate emulsion thickness and refractive index changes during development
01 p0087 A70-10666

Ultrasonic holography in nondestructive testing, discussing metal block with simulated defects
01 p0089 A70-10882

Holographic techniques for extended high resolution images with resolved elements less than 0.5 micron in image field of 10 cm or more
01 p0090 A70-10886

Holographic two beam real-time Fizeau interferometer for recording and reconstructing reflected light waves in silvered flat surfaces measurement
01 p0090 A70-10905

Interference fringe in Fraunhofer hologram reconstruction of tapered glass fibers related to fiber profiles
01 p0090 A70-10906

Fourier transform applied to power spectral distribution determination for two dimensional Fraunhofer holographic data of thin spherical lenses
01 p0090 A70-10907

Holographic color schlieren flow visualization system for three dimensional photography, variable focus shadowgraph, knife edge schlieren, etc
01 p0091 A70-10908

Book on coherent optics and holography covering image restoration, holographic interferometry, lensless Fourier transform holography, etc
01 p0144 A70-11074

IR holography using thermochromic material and cuprous mercuric iodide to record on-axis interference pattern, reconstructing in visible range with He-Ne laser
01 p0092 A70-11170

High resolution silver halide photoemulsions by holographic resolvometry using Ne-He laser to obtain interference patterns
01 p0095 A70-11633

Holograms of light scattered by clouds of water droplets to determine drop size, noting agreement with Mie theory
02 p0296 A70-11890

Diffuse illumination in holography indicating spread increase dependence on product of phase mean-square value and spatial frequency bandwidth
02 p0296 A70-11891

Hologram image resolution, finding angular alignment of reconstruction wavefront as limiting factor
02 p0297 A70-11923

Bleached diffraction gratings produced holographically on spectroscopic plates, describing processing and quality
02 p0297 A70-11929

Anamorphic holograms in optical and radar holography and reconstruction, discussing formation and fundamentals
02 p0298 A70-12182

Optimum procedure for high speed cinematography of holographic interferograms permitting microsecond exposures while retaining picture quality
02 p0298 A70-12213

Sandwich structures nondestructive testing by holographic interferometry, discussing system operation, specimen stressing, acoustic vibration, etc
02 p0309 A70-12274

Photographic relief images with arbitrary profile produced by using image relief height as spatial frequency function
02 p0300 A70-12462

Quantitative interpretation of three dimensional weakly refractive phase objects using holographic interferometry, determining index of refraction
02 p0300 A70-12464

Microwave holography using probe scanning, analyzing causes of distortion and effects on image reconstruction
02 p0302 A70-12618

RF holographic vision through rain, fog or darkness, discussing cholesterol ester-coated Mylar sheets and pyroelectric hot plates detectors and antenna sensory matrix
02 p0305 A70-12843

Holographic interferometry with pulsed ruby laser holocamera for examining flow distribution in supersonic free jet wind tunnel
03 p0480 A70-12948

Holographic interferometry applications in experimental mechanics, illustrating nondestructive testing by flaw detection in bonded honeycomb
03 p0481 A70-12959

Hologram interferometry to study stresses in fixed two dimensional photoelastic models and three dimensional slice qualitative analysis
[SESA PAPER 1530] 03 p0482 A70-12964

Displacement interferograms and schlieren pictures of optical inhomogeneities in transparent media obtainable from single exposure hologram, using monochromatic and laser light for reconstruction
03 p0483 A70-13258

Double exposure holograms in diffuse radiation used to reconstruct in white light interferogram images localized in hologram plane
03 p0483 A70-13259

Interferogram contrast as spatial frequency function measured for photographic materials used in holography by He-Ne laser
03 p0485 A70-13530

Transillumination holography in environmental tests, discussing camera design, particle field and applications, including flow visualization in wind tunnel tests
03 p0486 A70-13539

Three dimensional structure determination for weakly scattering semitransparent objects from holographic data, discussing inverse scattering problem and refractive index calculation
03 p0487 A70-13647

Hologram interferometry accuracy, reliability, application to plate deformation and translation measurements, using moire method and correction factors
03 p0493 A70-13945

Holographic method for measuring optical instruments transfer function, using laser light source and beams interference
03 p0493 A70-13946

Image conversion scheme to obtain holograms of three dimensional objects illuminated with IR light, using nonlinear optics
04 p0685 A70-14406

Real image holography of complex organism or body organs as teaching aid and research tool in medicine and biology
04 p0685 A70-14558

Holographic wavefront reconstruction variants and applications to instrumentation, process engineering and information techniques
04 p0688 A70-14717

Hologram recording materials properties and limitations, discussing diffraction efficiency of thick and thin amplitude and phase holograms, silver and non-silver halide noise effects, etc
04 p0690 A70-15026

Transient hologram recording with fluorescein-boric acid glass organophosphor, noting effects of dye concentration, sample thickness, laser power and excited state lifetime
04 p0690 A70-15027

Dichromated gelatin holographic films preparation, sensitization, exposure and development, giving diffraction efficiencies and reconstruction SNR
04 p0691 A70-15031

Wave front reconstruction for perfectly bleached holograms not achievable by simple coherent illumination due to remaining amplitude variation
04 p0691 A70-15033

Holographic technique for transferring phase perturbation of subject waves onto spherical waves focusable through aperture and examinable by interferometric and schlieren methods
04 p0691 A70-15034

Image formation from wave front sampling in holography by spatial filtering, comparing Monte Carlo sampling to spaced sampling
04 p0692 A70-15365

Scaling and angular resolution for sequential type holographic stereogram, comparing results with conventional hologram
04 p0695 A70-15574

Information transmission capability of hologram without distortion, considering confocal resonator reconstructible transparencies for bounded hologram
05 p0848 A70-16265

Object visualization in phase contrast using nonlinear interferential holography by successive recording of intensities on photographic plate
05 p0848 A70-16273

Standing wave ratio of ultrasonic field determined by holographic method, using acoustic transmission lines with termination impedances
05 p0848 A70-16403

Gabor holography producing interference phenomena, discussing far field fringes, circular fringes, diffuser, etc
05 p0849 A70-16529

Hologram constructed with microwaves with image reconstruction at optical wavelengths using laser
05 p0849 A70-16659

Holography by fixing detector and scanning source based on reciprocity theorem for diffraction field
05 p0849 A70-16677

Optical wave front reconstruction principles applied to sonic and seismic wave holography for mapping earth subsurface structure
05 p0850 A70-16685

Double giant pulse ruby laser with 1.5 m coherence length for producing double exposure holograms of stress wave propagation in solids
05 p0861 A70-16850

Aircraft visual flight control displays development, considering liquid crystals in alpha numeric data output devices and holograms for three dimensional structures reproduction
05 p0853 A70-17090

Holographic method for reconstructing polarization of light emitted by photoelastic model, obtaining isochromatic and isoclinic fringe patterns
06 p1063 A70-17643

Image contrast in holographic reconstructions, discussing influence of given surface intensity recording and oblique reference wave on hemigram
06 p1067 A70-18398

Holographic interferometry applied to amplitude measurement of periodic mechanical surface vibration
06 p1069 A70-18436

Hologram storage and retrieval in photochromic SrTiO crystals at ruby laser wavelengths
06 p1072 A70-18519

Bleach process giving high efficiency low noise holograms using potassium ferricyanide, noting drying procedure and developer
06 p1072 A70-18520

Nonlinear system theory for optimal linearization in holography, discussing generalized method for photographic emulsion and first order amplitude transmittance
06 p1072 A70-18521

Optical properties of Gabor holograms with pure reference beam, discussing image reconstruction using He-Ne laser
06 p1072 A70-18565

Holography history and applications to interferometry, contour mapping and three dimensional photography
07 p1279 A70-18900

Diffraction gratings produced by holographic techniques and vacuum metallization to provide high performance
07 p1279 A70-19049

Body displacement and deformation measurement by fringe separation in holographic interferometry
07 p1280 A70-19143

Hologram interference fringes formation and location using grating model of diffusely reflecting surface
07 p1280 A70-19144

Multiple beam interferometer coherence analyzer for temporal and spatial study of laser beams, emphasizing application to pulsed lasers, holography and nonlinear optics
07 p1297 A70-19145

Holographic recording of information contained in evanescent wave fields in high resolution photographic emulsions
07 p1281 A70-19367

Book on lasers and holography covering coherence, wave diffraction, zone plates, etc
07 p1282 A70-19598

Book on holography principles and applications, discussing imaging properties, coherence, photographic emulsions, optical analog computers, etc
07 p1283 A70-19739

Holography without reference beam for two and three dimensional interferential wave front recording and reconstruction
07 p1285 A70-19858

Holographic recording and reconstruction for wide angle three dimensional displays noting limitations
07 p1287 A70-20085

Holo-diagrams for simplified evaluation of amplitude and direction displacement in double exposed holograms for interferometric measurements
07 p1287 A70-20086

Front lit holograms of transient events and live subjects obtained with reflected light pulsed laser system
07 p1287 A70-20087

Holograms produced with pulsed argon-ion lasers operating in singly oscillating transverse modes
07 p1287 A70-20088

Holograms in thick absorption recording media in terms of diffraction efficiency, angular orientation and wavelength sensitivities
07 p1287 A70-20093

Optical data processing systems with spatial filters for two dimensional signals detection, using film nonlinearities to record Fourier transform hologram
07 p1287 A70-20094

Holographic system to obtain time-bandwidth product improvement in spectral analysis without sacrificing multichannel processing capability
07 p1288 A70-20098

Zoom effect in magnification of reconstructed image in incoherent holography achieved by varying fringe scale via rotation of interferometer components
07 p1288 A70-20099

Word organized photodetector array design for holographic read-only optical memories
07 p1288 A70-20148

Laser focused hologram reconstruction in passing white light
07 p1289 A70-20320

Coherence improvement of ruby laser emission in free mode using corrective holograms in resonator
07 p1303 A70-20323

Holography for visualization and analysis of aerodynamic flow fields in wind tunnel experiments, recreating events in space and time
08 p1493 A70-20650

Light beam deflection for three dimensional fixed and time varying visual displays, discussing mechanical, acousto-optic, electro-optic, digital and holographic techniques

08 p1449 A70-20673

Holographic technique of coherent light field transformation with desirable phase distribution from laser light beams of arbitrary wavefront characteristics

08 p1497 A70-21410

Holographic pulse compression technique employing amplitude modulation to circumvent need of matched filter in chirp process

08 p1498 A70-21593

Laser display systems, discussing mechanical, diffractive and refractive beam deflection techniques, electro-optical polarization devices, holographic displays, etc

08 p1499 A70-21687

Scattered field amplitude and phase determined from hologram light intensity distribution, noting biological applications

08 p1500 A70-21786

Hologram data efficiency improvement by spatial offset removal, analyzing plane and spherical reference waves and plane and solid objects

08 p1500 A70-21787

Interferograms taken by phase difference amplification technique with nonlinear hologram, considering amplified image accuracy

08 p1500 A70-21788

Reconstructed holographic image complex amplitude expression derived, showing effects of film optical transfer function, size and shape

08 p1500 A70-21789

Holographic image reconstruction analysis based on two beam interferometry by spatially incoherent light source, obtaining optical transfer function

08 p1514 A70-21790

Hologram spatial bandwidth reduction by space-time multiplexing

09 p1673 A70-22074

Plasma discharge studies by holographic interferometry using ruby laser pulse for light source

09 p1674 A70-22171

Holography in terms of photogrammetry, reviewing interferometry role, wave construction and reconstruction, etc

09 p1674 A70-22260

Pulsed microwave spectrum analyzer using holography and Fourier spectroscopy compared with frequency methods

09 p1675 A70-22485

Photographic image reconstruction of spatially incoherent illuminated object using twofold holography

09 p1675 A70-22486

Real time hologram-interferometry application to optical aspheric surfaces testing explained by geometrical optics

09 p1676 A70-22717

Photographic emulsion nonlinear response effect on image quality, discussing holography for multiple exposures

09 p1676 A70-22718

Holographic recording of three dimensional rapid events, using Q switched laser pulses with sufficient coherence length for illumination

09 p1676 A70-22786

Inexpensive live stroboscopic holographic interferometry, discussing time averaged and stroboscopic methods

09 p1676 A70-22787

Holographic recording of Q switched neodymium laser beam achieved through lens testing on reconstituted beam

09 p1697 A70-22845

Two beam Fraunhofer holography noting effect of spatially coherent source

09 p1678 A70-22968

Stetson-Powell time fringe hologram technique of vibration analysis applied to nodal patterns in compressor blade and turbine disks

09 p1679 A70-22979

Rig using holographic techniques for vibration testing and aircraft engine components inspection

09 p1680 A70-23069

High resolution holography with pulsed radiation source, testing various emulsions for sensitivity and reciprocity behavior

09 p1681 A70-23175

Transient partially ionized plasmas observation by two wavelength holographic interferometry, describing electron density measurements

09 p1736 A70-23186

Sensitivity of nondiffuse double exposure holographic interferometry with transparent medium increased via multiple beam passage through medium placed in optical cavity

09 p1682 A70-23360

Computer-generated holography involving three dimensional object perspective projections computation for incremental rotations

09 p1683 A70-23529

Edge smear in far field holography as function of interference orders, using short-cut trace technique

09 p1684 A70-23532

Holographic 3D movie of front-lighted opaque objects, recording diffuse reflection with CW laser and high resolution film

09 p1684 A70-23533

IR holograms real time visual reconstruction by frequency stabilized carbon dioxide lasers

09 p1684 A70-23534

Velocity synchronized Fourier transform hologram camera system for recording hypervelocity particles

09 p1688 A70-23775

Holographic optical memory feasibility for digital data storage using Ar ion laser, acousto-optic beam deflector system, hologram storage plane and photodetector array

09 p1642 A70-23780

Holographic flow visualization system retaining all information in light wave passing through flow field, noting reconstruction as shadowgram, schlierens or interferograms

09 p1689 A70-23781

Motion picture holography using continuously pumped ruby laser illumination system in repetitive Q switched mode

09 p1689 A70-23782

Longitudinal distortion reduction in ultrasonic holograms

09 p1689 A70-23805

Holography application in engineering, discussing strains and distortions detection, vibration testing, design optimization, etc

10 p1887 A70-24198

Spatial frequency spectra of three dimensional phase object and three dimensional hologram, discussing interaction characteristic for monochromatic illumination

10 p1888 A70-24263

Lens aberrations compensations in partially coherent image holography

10 p1891 A70-24838

Hologram resolution and information storage along depth of reconstructed image related to maximum track density of bubble chamber

10 p1892 A70-25113

Holographic optical memory systems operational principles and potential advantages, discussing feasibility of 100 million bit memory capacity and one microsecond random access time

10 p1892 A70-25245

Image contrast and diffraction efficiency of dielectric hologram made from diffuse signal beam, bleaching photographic emulsions

11 p2048 A70-25359

Structural detail in transparent object through holographic measurement of scattered monochromatic light, noting similarity to crystal structure reconstruction in X ray diffraction experiments

11 p2048 A70-25360

Transient and steady state thermal stresses measured by holographic extension of photoelastic analysis

11 p2049 A70-25592

Photoelasticity stress analysis, determining principal stress differences and orientation, using holographic interferometry to obtain sum and separation

11 p2049 A70-25596

Real nonnegative function representing transmittance of computer synthesized Fourier transform hologram displayed on flying spot scanner and recorded on film

11 p2049 A70-25631

Random phase mask for Fourier Transform hologram recording of data mask, noting minimum space bandwidth required

11 p2049 A70-25637

Holographic compensation for atmospherically induced phase distortion of IR laser beam

11 p2049 A70-25638

Scanned beam holography reducing system stability time for hologram production with CW gas laser

11 p2050 A70-25639

Holographic dielectric gratings analyzed by Raman-Nath formalism modified for losses

11 p2050 A70-25640

Recording nonlinearities effect on image reconstruction from hologram of diffuse object

11 p2050 A70-25641

Modified holographic technique for three dimensional display of X ray pictures

11 p2050 A70-25644

Laser-light spatial-domain scanning function for deconvolution of blurred photographs using point-spread and holographic Fourier transform division filter

11 p2050 A70-25832

Pulsed laser holographic interferometry of density field created by high speed projectile motion in air [AIAA PAPER 69-347]

11 p2051 A70-25987

Microwave illuminated aperture near radiation field mapped and processed for microwave hologram suitable for optical imaging for far field pattern simulation

11 p2051 A70-26025

Moiré-holographic technique for deformed plane spatial displacements determination, describing diffraction patterns generation and stress analysis

11 p2140 A70-26487

Spatial domain deconvolution by laser scanning of blurred photographs, using holographic Fourier transform division filter and photoelectric integration

12 p2230 A70-26979

Blurred photographic image restoration by combining computer generated holographic phase and photographic amplitude filters

12 p2230 A70-26981

Holographic dynamic head-up display system for aircraft carrier deck landings in low visibility

12 p2232 A70-27371

Brightness distribution in hologram generated image modulated by square of temporal-spatial coherence modulus of laser emitting longitudinal and transverse modes

12 p2233 A70-27503

Wave fronts averaging by holographic technique to eliminate distortions arising in inhomogeneous media

12 p2233 A70-27504

Holograms formation without reference beam by illuminating transparency with coherent laser light

12 p2233 A70-27505

Transmission diffraction grating for astronomical applications constructed holographically with laser light and photoresist films

12 p2234 A70-27589

Plasma diagnostics by high sensitivity holographic interferometry

12 p2235 A70-27794

Coherent light holographic and incoherent interferometric imaging analogy, noting three dimensional image formation

12 p2236 A70-28120

Mutual coherence functions for quasi-monochromatic illumination measured by image holography

12 p2237 A70-28124

Holographic identification of similar two dimensional images by linear transformation of space by spherical lens using white light correlator

12 p2238 A70-28185

Holographic method for recovery of complete image/ghost/ from partial hologram and entire diffraction picture

12 p2238 A70-28186

Holographic achromatic reconstruction of laser holograms in transmitted white light using zonal plate

12 p2238 A70-28297

Holographic method for reconstructing polarization of light emitted by photoelastic model, obtaining isochromatic and isoclinic fringe patterns

13 p2405 A70-28726

Holographic memory devices design for information storage

13 p2405 A70-28792

Field distribution determination in holographic image space, obtaining ideal image and aberration terms

13 p2405 A70-28826

Laser beam photography utilization in engineering for optical pointers, interferometers and holographic visualization of surface strain and vibration

13 p2406 A70-28914

Wavefront reconstruction by holograms of focused images illuminated by white light, analyzing spatial coherence

13 p2408 A70-29364

Interference holograms of low temperature nitrogen plasma jet using fundamental and second harmonic ruby laser emissions

13 p2464 A70-29384

Microwave holography with artificial reference wave and receiver multiplier, improving linear resolution in image

13 p2408 A70-29407

Electronic heterodyne astronomical spectroscopy, using lasers for absolute monochromatic flux and polarization measurements on star-like objects

13 p2408 A70-29473

Hologram interferometry using moiré method to determine bending moments of object surface

13 p2409 A70-29474

Displacement component in chosen direction on deformed object surface, using hologram interferometry with double illumination

13 p2409 A70-29475

Heterogeneous combustion observation by motion picture holography, considering light source requirements and hologram separation at higher sampling rates [WSC1 PAPER 70-10]

13 p2409 A70-29610

Holography patents, books, conference reports and articles, discussing applications to interferometry, portraits, Cassette tv, computer storage, etc

13 p2411 A70-29782

Holographic display requirements anticipating applications to motion pictures and TV

13 p2411 A70-29791

Three dimensional images reconstruction with coherent light, facilitating transmission by holographic information volume reduction

14 p2581 A70-30146

Nondestructive bond inspection by interferometric holography of ultrasonically excited plates

14 p2588 A70-31166

- Off-axis nonlinear holograms, defining spurious distortion and SNR 14 p2588 A70-31206
- Coherent or spatially incoherent light recordings of Fourier transform holograms, investigating resolution cells film grain and signal to noise ratio 14 p2588 A70-31207
- Planar sandwich hologram recording 4 pi steradians with preservations of object spatial perspective by representing entire wave front 14 p2588 A70-31209
- Scattering function and image quality in sharp edge holography using single mode laser, analyzing coherent and diffuse light 15 p2733 A70-31556
- Three dimensional holographic optical imaging system, examining resolution factors 15 p2734 A70-31595
- Hologram superposition on photosensitive surface for multiimage successive recording, examining resolution, SNR, etc 15 p2734 A70-31596
- Photoelastic stress analysis, discussing holographic interferometry for main stresses separation and polyester resins application to birefringence pattern superposition elimination 15 p2815 A70-31809
- Wave front reconstruction from blazed holograms, noting wave front distortion for nonconstant amplitude case 15 p2736 A70-32011
- Holographic technique to record hypervelocity projectile with front light resolution, discussing image blurring 15 p2736 A70-32031
- Hologram camera system recording hypervelocity particles by velocity synchronized Fourier transform method, employing interferometer 15 p2737 A70-32039
- Plotter induced reconstruction errors minimization in computer generated binary Fourier transform holograms 15 p2737 A70-32044
- Holographic interferometry combination with high speed photography, obtaining time resolved record of event 15 p2737 A70-32051
- Scanning technique for allowing whole vibration cycles storage on one hologram 15 p2738 A70-32052
- Holography technique for dual real images reconstruction of transparent objects with all planes in focus 15 p2738 A70-32053
- Wave front multiplexing on spatially distinct area of single piece hologram 15 p2738 A70-32054
- Fringe interpretation in stress-holo- interferometry, emphasizing isopachic-isochromatic interaction effects in photoelastic analysis [SESA PAPER 1642] 15 p2739 A70-32309
- Photoplastic material thickness change from mechanical and holographic measurements, showing correlation with isochromatics during plastic yielding 15 p2821 A70-32314
- Semiclamped strut supported rectangular plate deflection determined holographically, mechanically and analytically [SESA PAPER 1650] 15 p2740 A70-32331
- Fringe visibility and localization in double exposure holographic interferometry of diffusely reflecting flat objects 15 p2740 A70-32340
- Rayleigh type holographic interferometer featuring production method for base pattern of variable fringe density 15 p2741 A70-32438
- Air cell optical phase shifter for holography based on refractive index variation with air pressure 15 p2741 A70-32439
- Holography for nondestructive testing, describing theory, equipment and applications 15 p2742 A70-32779
- Holography without reference waves, describing image characteristics of spherical waves from point source 15 p2743 A70-32893
- Aircraft turbine engine components vibrational testing by holographic interferometry methods 16 p2903 A70-33134
- Holographic data storage for random information display and retrieval in wide range consumer credit network 16 p2903 A70-33135
- Holographic recording of wideband pulsed carrier electric signals in Fourier transform, Fraunhofer, Fresnel and image formats 16 p2903 A70-33136
- Phase modulated holography for inherent noise reduction using thicker recording media, increasing signal beamwidth or beam ratio 16 p2904 A70-33137
- Holographic interferometry for evaluating bond between diaphragm and base in pressure transducer 16 p2904 A70-33138
- Holographic interferometry for moire strain analysis, discussing theory and applications 16 p2904 A70-33149
- Holographic device for satellite attitude determination, providing three axis reference information in analog or digital form from single star field sampling 16 p2946 A70-33158
- Holographic stereo model, comparing stereoscopic perception of phase and amplitude to model consisting of overlapping photos 16 p2908 A70-33228
- Book on holography covering principles, applications, spatial and temporal coherence, interference and diffraction theory and optical filtering 16 p2908 A70-33266
- Turbulent wakes density fluctuations measurement using pulsed laser holographic interferometry in ballistic range [AIAA PAPER 70-727] 16 p2834 A70-33494
- Holocamera holographic system for wide angle panoramic view, discussing dual laser beam illumination, side and top view diagrams, etc 16 p2913 A70-33984
- Optical images from microwave far field /Fourier transform/ holograms, noting carrier fringe dependence 16 p2913 A70-34043
- Hologram image construction by graphical method 16 p2915 A70-34216
- Image distortion in reconstructions from phase only holograms, noting savings in collection and processing of acoustic holographic data 16 p2915 A70-34324
- Holographic techniques, investigating ultrasonic fields in transparent media based on light separation by grating into optical moments 16 p2915 A70-34330
- Time-average holographic interferometry applied to HF transverse vibrations of uniform cantilever beam, noting correlation with Timoshenko beam theory 17 p3083 A70-34961
- Engineering uses of holography - Conference, University of Strathclyde, Glasgow, September 1968 17 p3083 A70-35001
- Holography techniques, discussing fringe pattern formation, various systems advantages and optical elements 17 p3084 A70-35002
- Photographic materials for holography, discussing spectral sensitivity, grain size, resolution, transfer functions, diffraction efficiency, etc 17 p3084 A70-35003
- Holodiagram for making and evaluating holograms for large objects dimension, deformation and vibration measurement 17 p3084 A70-35004
- Holographic interferometry measurements, including low frequency quartz vibration and relaxation effects in materials following strain or impacts 17 p3085 A70-35005
- Computer generated holograms, using binary transmittance for wave fronts and three dimensional images construction 17 p3085 A70-35006
- High speed pulsed ruby laser holography, discussing transmission-reflection holocameras and applications 17 p3085 A70-35007
- Holographic measurement of transient behavior of structures under unsteady or impulsive loading, using pulsed lasers 17 p3085 A70-35008
- Hologram interferometry for measuring surface deformation under force and anisotropy in transparent objects 17 p3085 A70-35009
- Pressure transducer diaphragms displacement measurement by holographic interferometry 17 p3085 A70-35010
- Normally loaded thin plate displacements, bending moments and stresses determined by hologram interferometry and indirect moire and superposition of grilles 17 p3085 A70-35011
- Axially loaded cylindrical shells prebuckling deformation behavior measurement by holographic interferometry 17 p3086 A70-35012
- Hologram interferometry with birefringent objects, showing advantages over polariscope and classical interferometers 17 p3086 A70-35013
- Fatigue and surface crack detection using holographic techniques 17 p3086 A70-35015
- Fraunhofer holography for recording small particles to determine size distribution without disturbing sample 17 p3086 A70-35016
- Vibration measurement by hologram interferometry, discussing wave front reconstruction and fringe theory based on Rayleigh integral formulation of light propagation 17 p3086 A70-35017
- Vibration amplitude measurement by holographic wave front reconstruction 17 p3087 A70-35018
- Engineering components vibration mode studies by time averaged holographic interferometry 17 p3087 A70-35019
- Zero order Bessel function fringe shape measurement for holographic sinusoidal vibration fringes 17 p3087 A70-35020
- Precision components engineering inspection and sonic transducer surface vibration modes analysis by hologram interferometry 17 p3087 A70-35021
- Holographic motion measurement verification of constant velocity, sinusoidal vibration and both, using interferometer 17 p3087 A70-35022
- Partial coherence theory in holography with photogrammetry applications, reconstructing images with fringes representing constant range contours 17 p3087 A70-35023
- Combined lens-hologram system for strain measurements by moire technique 17 p3087 A70-35024
- Shadow moire method for comparing diffusely reflecting component against holographically recorded master shape, noting turbine blade measurement 17 p3088 A70-35025
- Four dimensional recording using synchronous multiple pulse ruby laser holography 17 p3088 A70-35027
- Holographic projection for electronic microcircuit manufacture 17 p3088 A70-35028
- Optimum receiver for acoustical holography using discrete transducers arrays for image conversion 17 p3088 A70-35029
- Acoustical holography with single stationary point detector noting reciprocity between detector and point source illuminator 17 p3088 A70-35030
- Pulsed laser holography for liquid rocket combustion studies, describing apparatus and techniques 17 p3092 A70-35477
- Interferometric holograms of vibrating body via numerical analysis of oscillations amplitude and phases 18 p3258 A70-36303
- Real time holographic reconstruction by electro-optic light modulation through crystal 18 p3258 A70-36312
- Pulsed laser holographic nondestructive testing optimization technique, monitoring honeycomb panel surface temperature during thermal stressing 18 p3259 A70-36754
- Holographic projection to print etching patterns on semiconductor wafers, discussing development, basic principles and uses 18 p3233 A70-36773
- Holographic interferometry applications in stress analysis of photoelastic resins, describing holographic interferometry assembly 18 p3262 A70-37209
- Radio wave holography with unequal reference to signal frequency, recording linear object with superheterodyne receiver 19 p3420 A70-37290
- Efficiency of holographic gratings in instrumental spectroscopy 19 p3421 A70-37360
- Holographic registration of isochromatic and isopachous diffraction patterns of photoelastic birefringent objects, showing stress concentrations 19 p3422 A70-37649
- Holographic interferometry of rapid phase objects by two wavelengths from ruby laser and KDP crystal filter, noting application to dense plasmas 19 p3422 A70-37650
- Equivalent interferometer existence theorem in holography 19 p3423 A70-37830
- Holographic velocity data recording /velocimetry/, discussing axial resolution enhancement by spherical wave illumination 19 p3423 A70-37859
- Pulsed ruby laser holography with coherent light, discussing applications 19 p3425 A70-37886
- Acoustical holography forming optical wavefield analog for nondestructive testing, medical diagnosis, underwater and seismic imaging 19 p3425 A70-37887
- Holographic flow and sound visualization, determining three dimensional density distributions in aerodynamic flows 19 p3425 A70-37888
- Piezoelectric controlled device as standard for holographic interferometry, providing continuously variable subject plate displacement and/or rotation 19 p3425 A70-37890
- Holography, discussing light propagation, basic principles, skew reference wave, diffused illumination interferometry, character recognition, microscopy, high density information storage, etc 19 p3427 A70-38449
- Stress and vibration effects measurement by holographic interferometry, comparing results with direct measurements 19 p3427 A70-38450

Membrane attachment for pressure transducer with help of holographic interferometry, describing optical system 19 p3427 A70-38453

Bubble chamber photography and track image reconstruction by holography, discussing measurement apparatus, accuracy and tolerances 19 p3428 A70-38510

Holographic ultrasonic imager using liquid surface detector for real time imaging of test objects moving through viewfield, discussing nondestructive test applications 19 p3433 A70-38829

Holographic bandwidth reduction by periodic dispersion structures, noting large viewfield and compact data recording 20 p3627 A70-39096

Efficiency, low noise and photochromic effects suppression in bleached silver halide holography with various films 20 p3627 A70-39097

Computer generated holograms production, reducing memory size and plotter resolution 20 p3627 A70-39098

Diffraction-limited scalar image formation with large angle point reference hologram arrangement of arbitrary surface shape, point reference source and object 20 p3628 A70-39131

Water droplet size measurement by forward light scatter holography, evaluating reconstructed wave front by Fresnel transform 20 p3628 A70-39132

Characteristic functions for frequency analysis of fringes obtained by time-average holographic interferometry of generalized time dependent optical phase function 20 p3628 A70-39133

Microwave hologram recording for surface displacement, with laser beam illumination for optical reconstruction of image 20 p3628 A70-39152

Laser holography for nondestructive testing of C composite structures, reducing fringe patterns to radial deformation and surface strain for cylinders and cones 20 p3718 A70-39212

Spacecraft position determination by holographic approach involving single star formation 20 p3665 A70-39422

Double holography on phase objects in diffused light using pulsed ruby laser 20 p3630 A70-39499

Mach-Zehnder interferometer for holographic investigation of inhomogeneities in transparent media, discussing photointerpretation error reduction 20 p3633 A70-39749

Hologram line scattering function dependence on light source spatial coherence, presenting quantitative evaluation, theoretical and experimental data 20 p3633 A70-39760

Optical image hologram production, investigating gas flows around body by means of Mach-Zehnder interferometer 20 p3633 A70-39761

Holographic recording in transparent bodies with optical characteristics changeable under intensive light 20 p3633 A70-39999

Acoustic/microwave/ holography for large masses by crossed linear array of microphones, discussing computer simulation of virtual holograms and image reconstruction 21 p3822 A70-40715

Objective and subjective laser speckle noises in holography, discussing causes and methods of elimination 21 p3835 A70-40716

Two dimensional and volume diffuse signal beam dielectric holograms, calculating and measuring diffraction efficiency and signal to noise ratio 21 p3835 A70-40717

Subsonic air flow around airfoil in wind tunnel, detecting density gradients by pulsed ruby laser holographic visualization 21 p3822 A70-40809

Holographic measurement of general forms of motion based on reconstructed images dependence on coherence 21 p3822 A70-40810

Fraunhofer holography for small spherical particles three dimensional position and velocity measurements 21 p3822 A70-40811

Photographic emulsions and photosensitive materials for holography, measuring noise spectral power density at high spatial frequencies by scattered light method 21 p3822 A70-40812

Rigid cylinder rotation and flexible shaft torsion observation by holographic interferometry 21 p3822 A70-40813

Multiple wavelength desensitized hologram interferometry to extend displacement measurement range 21 p3822 A70-40814

Holography application to marine ecological studies, using laser beam reduction techniques for image recording and reconstruction of large areas and volumes 21 p3823 A70-40821

Holographic interferometry measurements of surface amplitudes distribution under periodic mechanical vibration 21 p3824 A70-40864

Holography application to high capacity permanent memory systems 21 p3825 A70-41125

Holographic photopolymer recording systems, discussing sensitivity, reconstruction, fixing, etc 21 p3829 A70-41926

Time average holographic interferometry of circular plate vibrating simultaneously in rationally related modes 21 p3829 A70-41927

High velocity source and receiver scanning effect on holographic image, observing rotation and distortion 21 p3829 A70-41928

Diffraction theory of sideband holography with transmission objects, discussing geometrical construction of image location and disappearance conditions 21 p3830 A70-41998

Microwave antenna array irregularity location from hologram by optical signal processing, using far field spatial filter 21 p3792 A70-42048

Passive and cooperative active hologram radar extended from stationary coherent radar, considering use in airport surveillance of aircraft 21 p3792 A70-42119

Photographic processing methods for high efficiency low noise phase holograms on silver halide emulsions 22 p4025 A70-42286

Combined hypersensitization and rapid in situ processing for time-average observation in real time hologram interferometry 22 p4025 A70-42321

Holographic recording on n-type Si single crystal surface by photoanodic engraving 22 p4026 A70-42332

Plasma diagnostics by two-beam optical interferometry and holographic techniques, discussing plasma parameter spatial distribution recording insensitivity to radiation and variable sensitivity interferometry 22 p4079 A70-42382

Three dimensional hologram diffractive efficiency measurement by spectrographic attachment 22 p4026 A70-42508

Ultrasonic holography for nondestructive testing, discussing reference beams and analogies to optical and electronic methods 22 p4028 A70-42586

Laser application to nondestructive testing via holography and hologram interferometry 22 p4028 A70-42587

Time average hologram interferometry, calculating light beam modulation effects on fringe loci and localization 22 p4030 A70-42950

Image holography nonlinearities analysis, using photographic film characteristics for phase deviation enhancement 22 p4031 A70-42951

Real time holographic interferometry for flame propagation research, using high speed camera [SMPT PREPRINT 9] 22 p4035 A70-43053

Rotating mirror hologram camera for high speed phenomena, using Q switched ruby laser pulses [SMPT PREPRINT 7] 22 p4035 A70-43054

Acoustic Bragg diffraction for laser light deflection, solving high speed photography and holography motion problems [SMPT PREPRINT 5] 22 p4035 A70-43055

High speed holographic recording of transient events by single shot ruby and Nd-doped pulsed lasers, applying to shock tubes and wind tunnels [SMPT PREPRINT 3] 22 p4035 A70-43056

High speed holographic methods for supersonic phase objects movement and replacement of conventional optical processes in shock tubes, firing tunnels, etc [SMPT PREPRINT 77] 22 p4037 A70-43067

Holographic interferometry sensitivity augmentation by use of nonlinear properties of photoemulsion 22 p4038 A70-43140

Recording of inhomogeneous mutual coherence functions in one hologram by combining image with Fourier/Fresnel/ holography 22 p4038 A70-43151

Doppler effect in interference fringe formation in holographic vibration analysis, discussing path length variation 22 p4038 A70-43152

Cantilever beam transient response measurement by stored beam/real time/ holographic interferometry combined with high speed motion picture photography 22 p4039 A70-43452

Holographic interferometry for study of transparent media, noting application to aerodynamic phenomena [ONERA-TP-851] 22 p4039 A70-43455

Holographic interferometry by backscattering, considering displacement and deformation problems [ONERA-TP-852] 22 p4039 A70-43456

Modulation transfer function applied to optimal holographic nondestructive testing systems, using edge gradient analysis 22 p4039 A70-43520

Nondestructive measurement of elastic and plastic deformation in soldered joints and printed circuit boards by holographic interferometry 22 p4047 A70-43521

Optical read-write mass memory based on holographic storage and light addressable matrix array, discussing significance to computer design and usage 22 p3994 A70-43606

Optical system for read-write holographic memory capable of high storage density 22 p3994 A70-43607

Magnetic holography, considering Faraday and polar Kerr effect reconstructions and potential as computer storage 22 p3994 A70-43608

Integrated ferroelectric photoconductor device for hologram storage, discussing improved phase readout technique for reconstruction 22 p3994 A70-43609

Holo-diagrams for predicting fringe patterns in hologram interferometry caused by translation motion and rotation 22 p4040 A70-43610

Transparent objects holographic interferometry with illumination derived from phase gratings to eliminate laser speckle 22 p4040 A70-43611

Holographic exposure and reconstruction processes, considering illumination beam polarization effects on image brightness 22 p4040 A70-43616

Acoustic and scanned holography for nondestructive testing, showing defects in metal samples 22 p4041 A70-43620

Photographic image deblurring method, using image forming holography and amplitude weighting transparency 22 p4042 A70-43670

Microwave holography coherent radar with improved focusing, applying to side-looking, bistatic, passive and pulse compression radars 23 p4161 A70-43874

Holographic primary and conjugate images properties, considering applications in moving scenes recording and multiple images storage and retrieval 23 p4193 A70-43924

Hologram interferometry as noncontact tool for vibration mode measurements of turbine blade groups 23 p4193 A70-43925

Laser applications in length measurement and holography, describing principles and techniques, modulated laser beams and pulse transit time 23 p4201 A70-43998

Soviet book on holography covering laser characteristics, scatterers for image enhancement, photoemulsion requirements, etc 23 p4194 A70-44100

Three dimensional holographic optical imaging system, examining resolution factors 23 p4195 A70-44279

Hologram superposition on photosensitive surface for multiimage successive recording, examining resolution, SNR, etc 23 p4195 A70-44280

Automatic shutter for recording holograms with laser light, controlling exposure time by photoconductor cell 23 p4197 A70-44472

Hologram rapid sequence recording, using scatter plate holographic system 23 p4198 A70-44947

Focused image holographic interferometry by double exposure with reconstruction in white light applied to flat rotating subject 23 p4199 A70-45058

Holographic interferometry of phase object by double exposure method, showing no effect of photographic emulsion compression on order of interference 24 p4334 A70-45368

Light scatterers use behind phase object in double exposure holography, determining laser radiation wave front dynamics effect on image quality 24 p4334 A70-45461

Turbine compressor blades vibration mode measurements by holographic interferometry 24 p4334 A70-45563

Information theory in physics and engineering, considering data processing, error correction codes, space communication, optical data transmission, noise effects and holography 24 p4379 A70-45616

Optical image reconstruction from holograms, discussing photographic materials resolution, response linearity, spatial noise, etc 24 p4335 A70-45654

Holographic interference pattern interpretation, measuring object rotation 24 p4336 A70-45666

Fourier hologram synthesis using laser point source and Wollaston birefringent prism 24 p4336 A70-45667

Holographic interferometry for NDT inspection of adhesive bonded honeycomb sandwich aerospace structures 24 p4338 A70-45754

Holographic nondestructive testing of laminate structures, honeycomb-bonded panels and rubber-to-metal bonds 24 p4338 A70-45755

Sideband Fresnel and lensless Fourier transform holographic images elongation and contraction 24 p4339 A70-45817

Acoustic holographic system producing two dimensional picture in real time, using stationary linear transducer arrays 24 p4339 A70-46080

Seeding particles motion recording in fluid flow by holographic velocimetry, using optical matched spatial filtering to determine particle location 24 p4340 A70-46350

HOMOMORPHISM

U ANALYTIC FUNCTIONS

HOMEOSTASIS

Compartmented physiological system dynamics by bilinear control model, relating homeostasis to system 15 p2693 A70-32571

Repeated snow cooling effect on heat transfer in white rats during temperature homeostasis recovery after hypothermia 18 p3220 A70-36544

Axiomatic approach to homeostasis, discussing living systems as oscillators with input-output and transit variables in duration and elongation 19 p3365 A70-38411

HOMING

Missile homing on moving target, assuming closing velocity vector angular rate proportional to line of sight 16 p2949 A70-34054

HOMING DEVICES

Design concept and operation of electronically lobed homing system providing commands to pilot for flying aircraft directly to transmitting emergency beacon 06 p0987 A70-17725

Roll induced cross coupling evaluation in two dimensional homing systems based on defining roll transfer matrix 11 p2122 A70-25681

Digital simulation of complex dynamic systems using homing missile as example, basing algorithm on I transforms for linear systems 11 p2013 A70-25692

Tracking of goal seeking attack vehicles, discussing error improvement and destination estimating by tracking station observer 11 p2080 A70-26243

Electronically lobed direction finder homing system for location and rescue of airmen downed on aircraft with emergency locator transmitter 13 p2449 A70-29170

Terminal kinematic variables prediction for missile homing, discussing line of sight angle, rate and acceleration 15 p2773 A70-32525

Homing radar tracking accuracy improvement by glint reduction using frequency diversity [AIAA PAPER 70-992] 20 p3586 A70-39538

HOMOGENEITY

Temperature fields and universal motions in homogeneous isotropic thermoelastic body in absence of body forces and external heat supply 02 p0387 A70-12000

Elastoplastic bending of rectangular plates by finite difference and variational methods assuming homogeneity in elastic region 05 p0946 A70-16962

Additive elements effect on structure and properties of sintered powdery Al-Cr and Al-Fe alloys obtained by atomization method, analyzing homogeneity 09 p1707 A70-23124

Wave propagation in bounded homogeneous elastic anisotropic media solved as sum of eigenvalue and static problems without transform calculus 10 p1915 A70-24058

Book on three dimensional problems of linear elasticity of homogeneous and isotropic solids, discussing prismatic bodies, bodies of revolution, notch effect, etc 12 p2326 A70-27669

Linear theory of homogeneous and anisotropic elastic media with microstructure, establishing reciprocity and variational theorems 13 p2512 A70-28951

Shell homogeneity theory, considering uniform states, spheres and circular cylinders 14 p2600 A70-31280

Homogeneity of commercially pure Ti and Ti-Al-V ingots, discussing oxygen distribution uniformity over cross section 17 p3112 A70-34353

Electron beam welding, explaining high fusion zone homogeneity and weld defect formation by dynamic model 17 p3100 A70-34637

Transient wave propagation in homogeneous anisotropic media, using hyperbolic equations and unitary operator 17 p3137 A70-35607

Homogeneity criteria for semiconductor materials, considering variation coefficient, goodness factor and overshoot density 18 p3298 A70-36468

Isomorphous mixed ammonium perchlorate and potassium perchlorate crystals structural homogeneity by X ray diffraction and differential thermal and thermogravimetric analyses 21 p3784 A70-42262

HOMOGENEOUS TURBULENCE

Burger one dimensional model equation for homogeneous turbulence treated by Fourier transform in space and time, using Bogoliubov expansion method 05 p0833 A70-16331

Anisotropic turbulent energy spectral distribution approximated assuming homogeneous and axisymmetric turbulence with vertical axis of symmetry 09 p1717 A70-22374

Turbulence model with level and scale functions for flows including homogeneous turbulence, logarithmic boundary layer, duct center flow, linear shear layer and viscous sublayer 11 p2035 A70-25685

Homogeneous turbulence multipoint multitime correlations for fluctuating velocity 11 p2036 A70-26014

Energy spectrum of homogeneous isotropic incompressible turbulence, discussing eddy relaxation and direct interaction approximation 11 p2040 A70-26541

Incompressible homogeneous isotropic turbulence velocity expanded in Hermite functionals of Gaussian white noise random function advection by fluid 11 p2040 A70-26543

Nonlinear viscoelastic turbulence model with monotone increasing time scale to predict behavior in homogeneous shear and in pure strain 11 p2040 A70-26544

Homogeneous turbulent velocity effect on magnetic field distribution in electrically conducting fluid with no external source, observing dynamo action 11 p2091 A70-26545

Eulerian space-time correlations of velocity and pressure for universal homogeneous turbulence by separating kinematic convection effects of large eddies from velocity assumption 13 p2386 A70-28645

Propeller in axial motion through homogeneous turbulence, studying forces and moments by statistical analysis [AIAA PAPER 70-549] 13 p2339 A70-29014

Homogeneous isotropic turbulence velocity field space-time variable correlation functions in fluid flow 15 p2719 A70-31487

Initial condition effects on weak homogeneous turbulence with uniform shear, studying energy transfer and dissipation 19 p3403 A70-37537

High Reynolds number isotropic homogeneous turbulence fine scale structure heuristic model, relating spatial intermittency to vorticity generation 20 p3609 A70-39665

HOMOGENIZATION

U HOMOGENIZING

HOMOGENIZING

Metal powder mixtures homogenization time calculation, using Fick equation and matrix model 13 p2433 A70-28845

HOMOLOGY

Optical and radio homologies of solar flares, studying correlation from astronomical telescope pictures 11 p2105 A70-25747

HOMOMORPHISMS

Homomorphic filters, discussing nonlinear filters for generalized linear system 15 p2710 A70-32580

HOMOTOPY THEORY

Homotopic classification of boundary value problems with directional derivatives for harmonic functions 23 p4212 A70-44348

Coupling components in homotopic classification of elliptic systems of second-order equations with independent variable 23 p4212 A70-44349

HONEYCOMB CORES

Attachment loads and beam bending moments design curves for linear and right angle fittings on honeycomb inserts to determine internal loading 02 p0386 A70-11949

Shear modulus of sandwich structure tubular core derived by virtual work principle and matrix approach, comparing results with honeycomb core [DGLR-69-64] 04 p0774 A70-15156

Rectangular waffle plates minimum-weight design efficiency with multiple rib sizes in stiffening direction compared to honeycomb core sandwich construction 04 p0777 A70-15526

Supersonic aerial target wing synthesis using sandwich construction with graphite-epoxy laminate skins bonded to Al honeycomb, achieving significant weight reduction 12 p2160 A70-27118

Potting material applicability to attaching honeycomb sandwich assemblies to structures, describing pre- and postpotting methods 13 p2418 A70-28667

HONEYCOMB STRUCTURES

NT HONEYCOMB CORES

Electrical discharge machining showing close tolerance sizing capability on honeycomb panels 02 p0310 A70-12665

Honeycomb structure fracture initiation flow detection method using liquid crystal determination of stress concentration sites, noting absence of external heat source 03 p0515 A70-13121

Crushable honeycomb regulating operating pressure of propellant actuated devices applied to recovery parachute catapult in F-111 crew module 03 p0546 A70-14108

Honeycomb and sandwich construction design, discussing optimal material selection, filament wound technology, panels fabrication, destructive and non-destructive test methods, etc 05 p0941 A70-16616

Adhesive joints design, considering layer type, pipe connections and honeycomb structures for application in aircraft and automotive industries 08 p1585 A70-20894

Nondestructive test procedures development and implementation for bond strength of honeycomb sandwich and metal-metal adhesive bonded structures of F-5 and T-38 aircraft 09 p1692 A70-22798

Honeycomb shock absorbers, noting landing gear applications 13 p2512 A70-28772

IR NDT bond inspection system for helicopter rotor blade honeycomb box assemblies, using closed circuit slow scan video system to detect bondline voids 17 p3101 A70-35184

Honeycomb panels with fiber reinforced facings, obtaining acoustic fatigue design criteria [AIAA PAPER 70-897] 17 p3064 A70-35814

Pulsed laser holographic nondestructive testing optimization technique, monitoring honeycomb panel surface temperature during thermal stressing 18 p3259 A70-36754

Simple high level shock machine producing trapezoidal and terminal peak sawtooth pulses with Al honeycomb impact material 19 p3396 A70-37832

Optimum light construction design of glider wings, considering spar weight, aluminum honeycomb structure and repair 22 p3962 A70-42961

Concorde downstream thrust reversal nozzle, noting weight saving by use of welded stainless steel honeycomb construction 22 p4092 A70-43213

Spacecraft landing gear shock attenuation systems using crushable honeycomb, draw-die tubes and retrorocket skirt jet 23 p4262 A70-44695

Thermal IR nondestructive testing of adhesively bonded boron composite/Al honeycomb structures, discussing surface, cross section and instrumentation sensitivity effects 24 p4341 A70-45570

Holographic interferometry for NDT inspection of adhesive bonded honeycomb sandwich aerospace structures 24 p4338 A70-45754

Holographic nondestructive testing of laminate structures, honeycomb-sandwich panels and rubber-to-metal bonds 24 p4338 A70-45755

Bonded honeycomb sandwich structure fastening techniques in aerospace design, noting application to aircraft and spacecraft structures [SAE PAPER 700850] 24 p4425 A70-45882

HOOKES LAW

Relativistic simple shear of slab of neo-Hookean material 05 p0929 A70-16067

Incremental stress distribution near circular crack with internal pressure in neo-Hookean solid under

deformation due to triaxial compression, illustrating initial stress effect

05 p0956 A70-17108

Fundamental integral for small deformations superposed on finite triaxial extension of neo-Hookean elastic material

07 p1409 A70-19563

Reinforced plastics underframe design based on hooks law, noting middle layer loaded laminates and shell advantages

07 p1410 A70-19762

Elastic waves propagation in finite thickness elastic plate under transient load, assuming material behavior in conformity with nonlinear Hooke's law

15 p2814 A70-31544

Decelerator fabric elastic constants for structural analyses using generalized Hooke's law

[AIAA PAPER 70-1179] 21 p3843 A70-41834

HOOKS

Aircraft arresting hook response to impact regarding beam flexibility and internal damping using numerical wave propagation methods

10 p1963 A70-25069

HORIZON

Horizon sky UV spectral radiance, noting solar position and cloud cover effects

18 p3248 A70-36752

HORIZON SCANNERS

Instrument error analysis for spacecraft orientation and positioning near planet from planet disk observations

01 p0094 A70-11511

Earth horizon signal sensors on spin stabilized satellites using micron filters for cloud signal rejection

09 p1686 A70-23757

Horizon sensor design with null operating capabilities for synchronous orbit 3-axis stabilized communication satellites, discussing operation and testing

[AIAA PAPER 70-476] 11 p2121 A70-25484

Experimental IR earth horizon profiles measured by satellite in F region, discussing spectral channels and attitude control

12 p2225 A70-27751

Earth IR horizon seasonal and longer variations for horizon sensing instruments design

12 p2226 A70-27931

Probe rocket Tacite 02 head attitude gyrorestoration for IR horizon analysis, using stellar sensor and signal measurements

13 p2500 A70-28408

Thermal interface between edge of planetary disk and space for providing attitude reference during orbiting of planet

13 p2403 A70-28442

Low altitude atmospheric effects on IR beam horizon sensors in carbon dioxide band, noting corrections for spacecraft attitude measurement

15 p2735 A70-31792

Satellite-borne conical IR scanner flight data hybrid simulation and error analysis, suggesting carbon dioxide horizon noise model

[AIAA PAPER 70-1021] 20 p3631 A70-39513

Distribution functions of errors in earth and moon horizon sighting due to planetary surface unevenness

21 p3884 A70-40840

HORIZON SENSING

U HORIZON SCANNERS

HORIZONTAL FINS

U FINS

HORIZONTAL FLIGHT

Blade forces of helicopter rotor in forward flight calculated by unsteady lifting-line theory

01 p0004 A70-11366

Level flight optimization in horizontal wind varying with altitude, using glider concept and induced drag correction

[ONERA-TP-700] 07 p1193 A70-19131

Motion equations and dynamic lateral stability of towed glider in steady horizontal flight treated by small perturbations method, including design and handling influence

09 p1611 A70-23063

Concorde SST horizontal navigation, discussing data sources, equipment specifications, flight rules, man-machine interaction, etc

22 p4067 A70-42660

Horizontal flight speed effects on aerodynamic characteristics of air cushion vehicles with elliptical planform

22 p3959 A70-42801

Rocket nose cone optimal turn into horizontal ballistic trajectory after separation from booster, using dynamic programming

22 p3962 A70-43351

HORIZONTAL STABILIZERS

U STABILIZERS [FLUID DYNAMICS]

HORIZONTAL TAIL SURFACES

Boeing 2707 SST horizontal tail multiple channel actuation system features

17 p3020 A70-35827

HORIZONTAL TAILS

U HORIZONTAL TAIL SURFACES

U TAIL ASSEMBLIES

HORMONE METABOLISMS

Dibutyltyl cyclic adenosine monophosphate stimulation of melatonin and serotonin synthesis from C-14 labeled tryptophan by rat pineals in organ culture

01 p0022 A70-10824

Thyrotropin /TSH/ effects on thyroidal iodine metabolism during hypoxia in rats

02 p0231 A70-11703

Ionizing radiation effects on endocrine system, studying ACTH metabolism in rats under X ray irradiation

19 p3372 A70-38723

Human gluco-regulatory hormone reserve depressions following acute and chronic acceleration exposure

20 p3572 A70-39436

Adrenocorticotrophic hormone effect on oxygen tension in rabbit kidney

24 p4301 A70-45845

HORMONES

Flight fatigue syndrome origin, therapy and prevention, noting cortical adrenal hormones tests

01 p0031 A70-10234

Thyroidin influence on RNA content and nucleotide composition in hypothalamus, cortex and phenolic fractions of cerebral hemispheres resulting in accelerated protein biosynthesis

01 p0019 A70-10511

Vasopressin antidiuretic hormone effects on evaporative body weight loss during heat exposure

01 p0020 A70-10516

Glucagon infusion effect on human coronary circulation, relating changes in cardiac dynamics to myocardial oxygen consumption and blood flow

05 p0800 A70-16101

Hormones excreted by adrenal cortex function in rhesus monkeys pathogenesis after irradiation by sublethal dose

09 p1620 A70-22822

Somatotropic hormone and esculamine injection effects on rat survival rates under acceleration, noting sex linked differences

13 p2352 A70-29345

Epinephrine uptake and metabolic disposition in rat brain, determining pathways and turnover of endogenous brain hormone and enzymatic synthesis

14 p2536 A70-30348

Serum growth hormone response to hypoglycemia in man following insulin administration, reviewing lumped parameter model

19 p3360 A70-38006

Mathematical model of human pituitary gland mechanism controlling secretions of serum growth hormone in response to glucose deficiency

20 p3569 A70-38995

Auxin downward transport by gravity in leaves, examining ethylene inhibition

20 p3570 A70-39234

HORN ANTENNAS

Multimode excitation of large aperture horn antennas to produce electronic deflections of directional pattern

01 p0046 A70-11454

E plane radiation patterns of E plane sectoral horns enhanced by metallic grills arranged in optimum positions

02 p0270 A70-12734

Sky background brightness temperature measurement at 408 MHz by pyramidal horn antenna

03 p0496 A70-14344

Helicone antenna /axial mode helix combined with conical horn/ compared to conical horn in pattern and polarization characteristics

[AAS PAPER 69-623] 04 p0655 A70-14662

Radiation pattern computation for lens corrected conical scalar horn, comparing patterns and beamwidths with uncorrected horn and waveguide

04 p0656 A70-14721

Surface waves excited by horn above dielectric disk backed by metallic disk, formulating characteristic wave equations and solving for attenuation and propagation constants

04 p0659 A70-15305

Spherical hybrid modes in corrugated antenna conical horns, obtaining radiation pattern and gain with small flare angle

07 p1243 A70-20284

Computer predicted horn antenna radiation patterns through aircraft radome compared with measured values

09 p1645 A70-22689

Antenna array circular polarization adjustment using reflections from horn radiator and mirror

09 p1650 A70-23633

Curvilinear horn antennas synthesis having smoothly changing cross sections, studying methods for solving Fourier integral equation

09 p1652 A70-23660

Two dimensional impedance horn antennas synthesis by aperture field distribution and radiation pattern configuration relationship, deriving energy balance equation

11 p2015 A70-25348

Corrugated waveguide structures for aperture type feeds for spherical and paraboloidal reflector antennas, discussing experiments on 2-hybrid mode horn

11 p2018 A70-26024

Far field radiation patterns of Cassegrain, offset paraboloid and horn reflector antennas by stationary phase approximation method

11 p2019 A70-26659

Absolute sky brightness temperatures measured with horn antennas and Dicke receivers, indicating spectrum change due to galactic nonthermal radiation

12 p2309 A70-27893

Surface wave antenna radiation pattern from finite aperture of corrugated horn antenna

12 p2199 A70-28017

Radiation characteristics of horn antennas loaded with curved transverse dielectric slabs and radial dielectric strips, discussing axial directivity and half-power beamwidth

13 p2370 A70-29836

Antenna pattern and power gain determination from near field measurements on electrically large horn lens, standard gain horn and measuring antenna duplicate

15 p2698 A70-31956

Multihorn array antenna performance improvement by shaping beam for optimum earth coverage from stabilized synchronous satellites

16 p2860 A70-32952

High speed millimetric horn antenna with small azimuth and elevation beamwidths for airfield radar

16 p2876 A70-33407

Open waveguides and small horns theory, using Wiener Hopf method for radiation calculation

17 p3051 A70-35065

Far field diffraction, radiation and gain of wide flare angle corrugated conical horns

19 p3389 A70-37970

Complex waveguides with diverging body of revolution shaped horn, solving equation by Frobenius-Latysheva method

20 p3587 A70-39765

X band electromagnetic horn antennas, measuring triangular shape dielectrics effects on radiation pattern

20 p3599 A70-40312

Two dimensional impedance horn antennas synthesis by aperture field distribution and radiation pattern configuration relationship, deriving energy balance equation

20 p3600 A70-40460

X band horn antennas precision phase center measurement technique for high resolution system applications

23 p4176 A70-44966

HOT AIR

U HIGH TEMPERATURE AIR

HOT CATHODES

Hot cathode reflex discharges investigated to improve ion generation efficiency in space ion thrusters

03 p0536 A70-14368

Microscopic behavior and excitational processes found similar in argon ion lasers with hollow cathode or conventional heated oxide cathode discharge

11 p2063 A70-26370

Radial distributions and escape of charged particles across magnetic field in hot cathode Penning discharge plasma with LF oscillations

15 p2780 A70-32191

Hot cathode magnetron ionization gauge design, discussing performance and sensitivity

19 p3421 A70-37467

HOT CYCLE PROPULSION SYSTEM

U TIP DRIVEN ROTORS

HOT ELECTRONS

Hot photoelectrons in semiconductors assuming short lived photoexcited current carriers, deriving expressions for energy distribution function of semiconductor current carriers

01 p0153 A70-10066

Nitrogen, oxygen and air luminescence spectra excited by fast electrons at low gas pressures in IR spectral region compared with polar auroral spectra

01 p0083 A70-11536

Electrical domain instability in homogeneous hot electron semiconductors, discussing boundary conditions application to fluctuations

02 p0350 A70-11697

Current density and electron concentration fluctuations in semiconductors under electric field, obtaining theory of light scattering at hot electrons

03 p0539 A70-13405

GaAs nonlinear I-V characteristics and negative differential conductivity associated with electron heating by electric field

03 p0540 A70-13720

Whistler mode instability due to anisotropic charged particle velocity distribution, establishing general onset conditions for variable density cold plasma containing hot electrons

03 p0537 A70-14378

Field emission mechanism of hot electrons from semiconductors, discussing experiments with n-Si of high resistivity

06 p1126 A70-17749

Kinetic equation describing dynamics of inhomogeneous cloud of fast electrons and ions trapped in earth magnetic field

07 p1276 A70-20429

Fokker-Planck equation solution for electron scattering and energy loss in mirror confined hot electron plasma

11 p2090 A70-26022

Nickel-doped p- and n-type Ge hot electrons recombination characteristics in strong electric fields, examining electron capture cross section

15 p2782 A70-31628

Third harmonic generation using hot electron nonlinearity characteristics of semiconductors, considering plane-polarized electromagnetic wave nonlinear interaction with sample

15 p2783 A70-31970

InSb semiconductor, measuring small signal microwave conductivity for hot electron region at 9.4 GHz in high electric DC fields

19 p3488 A70-38747

Hot electrons bunch spread deceleration in collisionless plasma, discussing stationary moving jump formation similar to shock wave

22 p4077 A70-42299

Hot electrons Faraday effect in many-valley semiconductors, considering constant energy surface ellipsoidal form

24 p4392 A70-46361

Franz-Keldysh and hot electron effects in interband absorption of semiconductors in external electric field

24 p4392 A70-46361

HOT EXTRUDING

U EXTRUDING

HOT FORMING

U HOT WORKING

HOT GAS SYSTEMS

U HIGH TEMPERATURE GASES

HOT GASES

U HIGH TEMPERATURE GASES

HOT JET EXHAUST

U HIGH TEMPERATURE GASES

U JET EXHAUST

HOT JETS

U JET FLOW

HOT MACHINING

Austenitic stainless steels high temperature machining with W arc heating, considering constant pressure feeding and chip breaking method

20 p3638 A70-39943

HOT PLASMAS

U HIGH TEMPERATURE PLASMAS

HOT PRESSING

Niobium powder hot pressing compaction in terms of porous body volume viscous flow, determining viscosity shift time dependence

04 p0696 A70-14461

Integrally stiffened structures made by hot isostatic pressing of metal powders followed by conventional rolling

12 p2242 A70-27109

Mo powder compacting by hot pressing, determining activation energy

16 p2931 A70-33222

Hot pressed zirconia-zirconia ceramic fiber reinforced ceramic matrix composites, discussing mechanical properties and failure modes

22 p4057 A70-42285

HOT STARS

NT A STARS

NT B STARS

NT O STARS

NT WHITE DWARF STARS

Hypotheses for symbiotic stars nature, emphasizing binary with late type giant and hot small star components

03 p0568 A70-13325

Hot star photogravitational acceleration determined from difference between apex and antipex brightness, noting constant magnitude and direction of principal component of apex force

05 p0918 A70-16914

Luminous hot stars mass loss attributed to negative effective gravities in outer parts of reversing layers from ionic UV resonance lines

10 p1946 A70-24981

F-type close stars residual spatial motions and rotational velocity relationship, discussing angular momentum loss

13 p2498 A70-30015

Non-LTE and LTE line profiles and equivalent widths for transitions in singlet and triplet systems of neutral He in hot stars, explaining anomaly

14 p2641 A70-30884

Hot small mass neutron stars cooling time and internal characteristics, discussing evolution based on H-R diagram

15 p2808 A70-32886

Wolf-Rayet associated nebulae, presenting radio observations and mass determinations

16 p2980 A70-34193

Effective temperature of star zeta Puppis from combined angular diameter measurement and model atmospheres, comparing hot stars

24 p4404 A70-45414

HOT SURFACES

Slab melting under hot spots, obtaining starting solutions

18 p3346 A70-36491

HOT WATER ROCKET ENGINES

Bora-Sond atmospheric probe providing two stage minimum cost high altitude sounding for supersonic transport /SST/, discussing hot water propulsion system

17 p3178 A70-35257

HOT WEATHER

Protective clothing for personnel handling toxic and corrosive liquid propellants in hot climatic conditions at Guyana Space Center

12 p2179 A70-28043

Hot environment and hyperthermy effects on oxygen consumption in subjects performing muscular exercise

13 p2360 A70-29947

HOT WORKING

Solution treating temperature and microstructure effects on hot rolled Ni base alloy properties

07 p1306 A70-18995

Chemical composition and heat treatment effects on deformation resistance of nonaging aluminum alloys during hot working, noting quenching effect on recrystallization

07 p1294 A70-19388

Cold and hot work deformation of aluminum alloys, discussing flow-stress dependence on strain rate, temperature and composition

09 p1692 A70-22642

Hot shortness of molybdenum alloys under tensile testing due to molybdenum carbide precipitation on grain boundaries

11 p2066 A70-25914

Hot torsion test for Al alloys workability assessment, noting test temperature and specimen geometry effects on fracture strain values

13 p2436 A70-29816

Gas tungsten arc hot wire welding operational characteristics and applications

14 p2590 A70-30929

Hot rolling and warm working effects on microstructure and mechanical properties of Ni-Cu-Cb steel, noting optimum austenite plus ferrite phase field

15 p2756 A70-31566

Hot plasticity elongation of cast and wrought Ti-Al-V alloy as function of temperature and strain rate

17 p3117 A70-34401

Ti-Cu alloy sheet material age hardening, considering cold and warm work effects at various stages in aging cycle

17 p3121 A70-34430

Ti hot forming, discussing sheet use as aircraft structural material

17 p3098 A70-34444

Hot work effect on properties and microstructure of wrought Waspaloy, observing temperature decrease effect on fracture ductility

22 p4054 A70-42739

Succession of passes in rolling and hot shaping of thin walled angle steel

22 p4045 A70-42813

Space shuttle structural technology for booster and orbiter, discussing hot and cold structure concepts, reentry bodies, military payloads, radiating protective coatings, refractory materials, etc

22 p4111 A70-43516

HOT-WIRE ANEMOMETERS

Hot-wire probe support orientation to minimize flat plate turbulent boundary layer mean velocity determination errors

01 p0087 A70-10665

X array hot-wire anemometer measurements in flows with changing mean velocity direction during traverse

01 p0088 A70-10710

Forced convection of hot wire in hypersonic flow, determining Nusselt-Reynolds number relationship for hot-wire anemometers

02 p0223 A70-12101

Turbulence characteristics in liquids measured by hot film anemometry, discussing calibration methods selecting criteria as temperature control, drift influence and relative speed determination

02 p0303 A70-12687

Hot-wire and hot-film anemometry in two phase air-water and steam-water flow, discussing bubble passage, signal processing and measurements

02 p0305 A70-12836

Spatial resolution analyses of vorticity meter and hot wire arrays for measuring velocity derivatives in isotropic turbulence

03 p0492 A70-13760

Constant temperature hot-wire anemometer to compensate for thermal lag of wire/film resistance thermometer within useful frequency range

03 p0492 A70-13761

Steady MHD shear layer velocity profiles using hot film anemometry

05 p0887 A70-15924

Probe geometry effects on hot film anemometer probe performance during turbulence measurements in liquids

06 p1032 A70-17213

Vertical plume velocity and temperature measurements by hot wire probe on turbulent free convection zones over model fires

07 p1282 A70-19582

Plasmatron generated rarefied helium plasma parameters in external magnetic field using hot-wire anemometer Langmuir probe

07 p1349 A70-19653

Wall proximity and velocity gradient effects on thermocouple readings in turbulent boundary layer

07 p1285 A70-19834

Hot-wire anemometry equation suitable for wide regions of velocity and temperature derived by computing thermal losses by supports

08 p1496 A70-21236

External convective heat transfer coefficients from quartz-coated cylindrical hot film anemometer probes in mercury

08 p1599 A70-21582

Harmonics generated in hot-wire anemometers responses by wires thermal lag and amplitude of flow velocity fluctuations using computerized simulation

08 p1498 A70-21586

Karman trail vortices tangential velocity decay measurement by hot film anemometer experiments

09 p1661 A70-22961

Hot-film anemometers for measuring storm turbulence in presence of heavy rain

10 p1887 A70-23940

Heat transfer at low Reynolds and Grashof numbers determined using constant temperature anemometric wire

13 p2521 A70-28952

End support cooling in hot-wire anemometry of low density high temperature flows

13 p2412 A70-29882

Hot-wire probe measuring He-air mixture velocity and concentration following He discharge from circular orifice, noting calibration method

13 p2412 A70-29990

Intraarterial hot film constant temperature anemometry for point blood velocity measurements, detecting flow reversal

15 p2688 A70-31435

Constant temperature hot split film anemometer sensors based on velocity and heat flux distribution about probe, measuring flow rates

15 p2734 A70-31691

Admittance calibration of short HF through flow pneumatic lines, using hot-wire anemometer

16 p2891 A70-33628

Gas flow velocity measurement using hot foil probes

17 p3082 A70-34680

Turbulent boundary layer of flat plate, investigating superlayer structure by hot wire anemometer

18 p3238 A70-36066

Temperature profile along hot-wire anemometer attached to wall and normal to parabolic velocity steady flow field, using singular perturbation techniques

18 p3242 A70-36488

Thermal conductivity of frost, using imbedded hot-wire method

18 p3262 A70-37118

Turbulent flow phase velocity fluctuations measurement by hot-wire anemometers, obtaining cross-spectral density by Fourier analysis digital techniques

19 p3404 A70-38019

Wall proximity and velocity gradient effects on thermocouple readings in turbulent boundary layer

20 p3634 A70-40341

Constant temperature linearized hot-wire anemometer for low velocity high turbulence flow

21 p3827 A70-41455

Reverse curvature silicon transistor linearizer for hot-wire and thin-film constant temperature anemometers for aorta blood flow velocity measurements

21 p3827 A70-41458

Calibration data correlation for constant temperature hot film anemometer for low speed nonisothermal laminar air flow, using modified King law

21 p3828 A70-41475

Heat transfer in heated wire in supersonic flow near molecular transition zone, estimating anemometer sensitivity to motion fluctuations

22 p3959 A70-43240

Displacement effect of hot-wire anemometric probes near wall as function of support orientation

22 p4038 A70-43241

Thermal and aerodynamic interactions between wires of velocity sensitive anemometric crossed-wire probe, showing reduction by correction of measurements and minimal gap

22 p4038 A70-43242

Thermal calibration errors and sensitivity equations for hot-wire anemometers

23 p4195 A70-44288

Low noise constant temperature hot-wire anemometer design with second order high-cut filter, determining system stability

23 p4199 A70-45050

HOT-WIRE FLOWMETERS

- Turbulent flow velocity and stress components simultaneous measurement by single hot wire, discussing equations and computer program
04 p0685 A70-14447
- Hot wire turbulence measurements of cylindrical wall jet compared to results from free circular and plane wall jets
06 p1034 A70-17526
- Yawed hot wire measurements of turbulence fluctuations, discussing calibration and mutual interference of adjacent wire and wire supporting prongs in X-ray wire case
06 p1071 A70-18487
- Thermal conductivity of nitrogen in 350-1500 K range using hot-wire diffusion columns
11 p2147 A70-25756
- Velocity fluctuations in temperature gradient turbulent jets and in turbulent flames, using hot wire in cooled pitot tube
17 p3096 A70-35749
- HOT-WIRE TURBULENCE METERS**
U HOT-WIRE FLOWMETERS
U TURBULENCE METERS
- HOTSHOT WIND TUNNELS**
Nozzle boundary layer displacement thickness at Mach 30-70 in helium using Langley hotshot tunnel tests
04 p0675 A70-15603
- Measurement methods for forces, pressure and heat flow in hotshot hypersonic wind tunnels
17 p3057 A70-34773
- Hotshot wind tunnel performance improvement by coating arc chamber with silastene to retard heat loss and metal pollution
17 p3057 A70-34774
- Integrated double oblique shock scramjet for supersonic combustion tests and instrumentation development, discussing fuel injection through sonic orifices, combustion data, etc
[AIAA PAPER 69-827] 21 p3867 A70-41752
- HOUSINGS**
NT COWLINGS
NT RADOMES
Numerical photogrammetric techniques application to cadastral surveys and mapping, discussing standard errors
10 p1880 A70-24753
- HOVERCRAFT**
U GROUND EFFECT MACHINES
HOVERCRAFT GROUND EFFECT MACHINES
State of sea definition for hovercraft performance purposes, recommending Hovercraft Coastal Wind Wave Code
13 p2347 A70-29126
- HOVERING**
Matrix method for calculating aerodynamic loads, shearing forces, bending moments, torques, etc, in hinged main rotor helicopter blades during hover and vertical flight
06 p1167 A70-17914
- Plenum-chamber air-bearing and labyrinth-seal types air cushion lifting mechanisms performance in simulated hovering flight
12 p2162 A70-27981
- Optimal fixed-form pilot model computer program for VTOL longitudinal control hover task evaluation
16 p2851 A70-33341
- Longitudinal dynamics of VTOL aircraft during hover-forward flight transition, using multiple time scale analysis
[AIAA PAPER 69-130] 18 p3213 A70-36681
- Helicopter automatic approach and hover coupler systems, discussing cockpit display devices, handling qualities, pilot workload and fatigue and external load stabilization
23 p4140 A70-44464
- Propeller blade aerodynamic characteristics at zero advance ratio, reducing singular integral equation to nonsingular form for computer solution
23 p4136 A70-44993
- HOVERING STABILITY**
Man machine interface in VTOL aircraft control and stabilization systems adaptation during manually controlled hovering flight
03 p0414 A70-14094
- Flight tests with mounted and unmounted SG 1262 hovering test rig in Germany to determine optimal control and stability characteristics for VTOL VAK 191B
04 p0624 A70-15704
- Wing vibration problems associated with roll attitude control in hovering autostabilized VTOL transport aircraft with wing-mounted jet lift engines
05 p0794 A70-16116
- Static tank visualizations obtained in two dimensional flow and on rotors hovering or in transition in ONERA hydrodynamic tunnel
[ONERA-TP-777] 08 p1434 A70-21846
- Model for pilots optimal manual control of hovering VTOL aircraft longitudinal position
14 p2543 A70-31409
- Crane helicopter controllability, discussing load stabilization and precision hovering
17 p3015 A70-34723

- Hingeless rotor helicopter airborne and ground resonance characteristics, noting feedback stability control interference with rotors aerodynamic damping
17 p3015 A70-34733
- HRB-1 HELICOPTER**
U CH-46 HELICOPTER
HS-125 AIRCRAFT
U DH 125 AIRCRAFT
HU-1 HELICOPTER
U UH-1 HELICOPTER
HUBS
Electron beam welding of AH-56A helicopter rotor hubs outside of vacuum chamber, discussing modifications of machine
04 p0699 A70-15651
- Frequency change for coupled vibrations of slender rotating beam due to hub radius change determined in centrifugal force field by perturbation method
08 p1594 A70-21772
- HUECKEL THEORY**
Plasma pi-electrons effects in annulene molecules, obtaining dispersion relation for plasma oscillations by Hueckel theory
14 p2621 A70-30116
- HUGHES AIRCRAFT**
NT OH-6 HELICOPTER
HUGHES MILITARY AIRCRAFT
U MILITARY AIRCRAFT
HUGONIOT ADIABAT
U HUGONIOT EQUATION OF STATE
HUGONIOT EQUATION OF STATE
Release adiabats and recentered Hugoniot curves determination by shock reverberation techniques for compressible nonlinear materials, presenting results for epoxy resin and porous tuff
01 p0198 A70-10106
- Computerized stepwise construction of Hugoniot curve for detonation waves and Chapman-Jouguet detonation and deflagration points
03 p0607 A70-13920
- High purity beryllium dynamic tests determining Hugoniot equation of state, shock profile and spall threshold/onset of microcracking/for elastic pulses
[AIAA PAPER 69-360] 11 p2066 A70-25964
- Thermodynamics and velocity of MHD shock waves in perfect conducting fluid, using compressibility conditions and relativistic Hugoniot equation
19 p3477 A70-37580
- Macroscopically homogeneous composites control volume approach, examining Hugoniot equation of state
22 p4060 A70-43683
- HUMAN BEHAVIOR**
Book on dynamics of complex systems represented by control and human operators and animals behavioral activities models
01 p0034 A70-10501
- Underwater saturation habitats application as behavioral workshops for mission planning and human engineering of manned space flight, discussing Project Tekite
[AIAA PAPER 69-1120] 01 p0034 A70-10611
- Human capacity to discriminate between poorly and well balanced diets and liability to select amino acid imbalanced mixtures for deficient nutrient
01 p0028 A70-11314
- Man and animals physiological adaptation and behavior under conditions of polar regions, highland and arid areas
01 p0030 A70-11465
- Human EEG relationship to verbal behavior, discussing separation of stressful from nonstressful verbal stimuli, semantics and question-answer sequences
02 p0236 A70-12119
- Restricted problem solving tasks /perceptual maze test/ formulated as multistage decision making, discussing use of dynamic programming and algorithms
02 p0246 A70-12321
- Somatic motor unit spikes human biceps during posture holding, obtaining Markov chain and random variable behavior patterns
03 p0416 A70-13011
- Crew requirements influence on systems design and operations criteria for long duration biomedical and behavioral measurement program in earth orbiting space laboratory
[ASME PAPER 69-WA/BHF-17] 04 p0643 A70-14858
- Research problems resulting from observational methods in social-psychological studies, discussing categorization systems and coding reliability
05 p0802 A70-16668
- Respiration behavior of men during inhalation of various gas mixtures, observing spontaneous changes in breathing rates
07 p1206 A70-19471
- Visual observation, free space traversal, accelerometry and telemetry for measuring and recording human behavior, discussing free space-time traversal data logging system
14 p2542 A70-30794

- People as conservative processors of fallible information, treating stationary data generating process as nonstationary
14 p2537 A70-30898
- Vestibular habituation acquisition, retention and transfer correlation with stimulation, discussing alertness and arousal effects
14 p2539 A70-30915
- Physiological tests of sampled data hypothesis in human motor control system
16 p2851 A70-33323
- Soviet monograph on secondary signaling system role in development of speech, thought, conditioned and unconditioned reflexes, human will and hypnosis, noting salivary gland function
19 p3359 A70-37407
- Human monitoring behavior, discussing display, task and organismic variables effects
19 p3363 A70-38323
- HUMAN BEINGS**
Mankind role in cosmos as function of self realization developed by science and technology
11 p2153 A70-26057
- Neurological differences in spinal projections of animals subjected to cordotomies compared with human material, using selective silver impregnation technique
13 p2350 A70-28998
- HUMAN BODY**
Somatic motor unit spikes human biceps during posture holding, obtaining Markov chain and random variable behavior patterns
03 p0416 A70-13011
- High altitude acclimatization effects on cardiovascular system, external respiration, blood composition, optical and vestibular analyzers in human subjected to various stresses
04 p0630 A70-14576
- Human body turning /orienting/ in unsupported /weightless/ position by own muscular forces, determining inertia moments of body and parts relative to various axes
07 p1207 A70-19495
- Screen filtration pressure of human blood, establishing time, anticoagulant, red cells, platelets and leucocytes as physical determinants
07 p1210 A70-19590
- Human esophagus physiology, studying sphincter function from data on healthy and afflicted subjects
07 p1214 A70-19793
- Whole body counters as standard measuring devices in nuclear medicine and radiation protection, using scintillation detector principles
09 p1624 A70-22819
- Human body homeostatic mechanisms autoregulation, discussing feedback control systems for blood pressure and flow regulation, bodily movements and postural control, etc
10 p1810 A70-24038
- Prolonged hypodynamia effect on heart size and myocardium function obtained from human chest X ray studies
10 p1814 A70-24673
- Human gamma globulin and binary/ternary protein structures conformation transitions studied by UV difference spectra
12 p2173 A70-28346
- Capillary details in lentiform nucleus region of human brains, measuring blood vessels diameters, lengths and densities
12 p2173 A70-28347
- Minimum ventilation volume requirement for space suit relation to air contaminants and body gas discharge intensities and locations
13 p2358 A70-29333
- Force input and thoraco-abdominal strain due to sinusoidal motion of electrohydraulic shake table over 2-14 Hz range imposed on human body
13 p2359 A70-29438
- Radial and tangential stress distribution through annulus fibrosus dependence on material inhomogeneity for human intervertebral disk
15 p2692 A70-32328
- Isolated human heart measurements for time course and instantaneous distribution of normal heart excitation process
15 p2683 A70-32471
- Human body turning /orienting/ in unsupported /weightless/ position by own muscular forces, determining inertia moments of body and parts relative to various axes
15 p2685 A70-32740
- Human body radiation shielding, describing development of computerized standing and seated model for space missions
[AAS PAPER 70-053] 17 p3036 A70-34794
- Human body core temperature control dependence during exercise on heat dissipation, noting sweating control
20 p3570 A70-38997
- Human body elastic properties effects on arterial pressure measurement by sphygmomanometer
20 p3581 A70-39879

Human body radioactive nuclides in vivo quantitative analysis by gamma ray spectra, considering matrix method accuracy

20 p3582 A70-40449

Elastic bounce of body resulting from falling to ground with calf muscles in sustained contraction and without knee bending

21 p3765 A70-42151

Circadian rhythm in human body temperature by Cosinor method, showing inapplicability for narrow time span

22 p3977 A70-42872

Mean skin temperatures of human body by 10 point method, using cold and hot exposure data

22 p3978 A70-42874

Human hemoglobin chain, noting zeta chain synthesis during embryonic development

24 p4297 A70-45406

Intact human forearms venous blood velocity measurements, using nuclear magnetic resonance techniques

24 p4309 A70-45675

HUMAN CENTRIFUGES

Human heart chronotropic reactions during centrifuge acceleration tests up to tolerance limit, establishing sinus tachycardia in various degrees

05 p0804 A70-17120

Cine recording ophthalmoscope with TV monitoring for retinal photography during centrifugation

06 p1061 A70-17286

Acceleration environment duplication difficulties, considering human physiological responses dependence on centrifuges performance characteristics and geometries

07 p1222 A70-19927

Acceleration training schedules performed with animals and test subjects, assessing schedules effectiveness in increasing tolerances to transverse acceleration

09 p1623 A70-22086

Acceleration training schedules performed with animals and test subjects, assessing schedules effectiveness in increasing tolerances to transverse acceleration

15 p2693 A70-32682

Human retinal detachment treatment by centrifugation

22 p3975 A70-43699

HUMAN ENGINEERING

U HUMAN FACTORS ENGINEERING

HUMAN FACTORS ENGINEERING

USAF visual flight simulation devices from engineering and psychological standpoints, discussing human factors considerations

01 p0057 A70-10808

Reduced gravity simulators for studies of human mobility in space and lunar missions

01 p0037 A70-10958

Simulated lunar environmental facility to investigate effects of high risk vacuum, lunar gravity and terrain characteristics and spacesuit encumbrances on astronaut performance

01 p0037 A70-10961

Human factors research with simulated reduced gravity conditions by parabolic flight technique with aircraft

[AMRL-TR-69-16] Visual flight displays technological and human engineering development

01 p0037 A70-10962

Digital computer display techniques relationship with man in modern environment, considering human engineering and educational problems and future impact on intellectual qualities

01 p0221 A70-11281

Electronic head-up display experience in transport aircraft flight tests including human factor, installation, operational applications, etc

02 p0224 A70-11836

Air traffic control system for intercity and metropolitan VTOL airway reducing pilot and air traffic controller workloads

02 p0335 A70-12135

Display system for Apollo Telescope Mount designed for unclouded sun view by orbiting astronaut-scientists, discussing human factors, film budgeting, etc

02 p0298 A70-12151

Static electricity generation and discharge in human beings due to clothing layers, analyzing body capacitance, resistance and inductance for ordnance and fuels safety

03 p0439 A70-14133

Management role in air traffic controllers stress reduction, considering human factors affecting ATC system capacity

03 p0439 A70-14316

Man-machine systems design emphasizing impedance matching exemplified by visual approach landing

[ASME PAPER 69-WA/GT-15] Pilot visual information display systems influence on flight safety, discussing aircraft accidents and human error factors

04 p0691 A70-15143

Radiography of spine in seated position, discussing aircraft seats, aeronautical ergonomics, etc

05 p0804 A70-15765

Physiological and environmental factors influencing oxygen breathing system design and use for passengers and aircrews of high flying aircraft

06 p1003 A70-17716

Heart rate and circulatory load as ergonomic criteria based on muscular work, environment temperature, mental stress, etc

06 p0997 A70-18017

Pilot limitations role in USAF midair collisions, discussing information systems for collision avoidance

07 p1192 A70-19022

Crew visibility requirements for rendezvous, docking and earth landing of reusable reentry vehicles [AIAA PAPER 70-262]

07 p1399 A70-20398

Display design for improved target detection performance taking into account human attention to display field areas

08 p1452 A70-21301

Human biological organism analysis based on physiological determination of regulating and control functions dependence on oscillatory properties

08 p1452 A70-21460

Control display requirements for manned spacecraft, integrating human operator with vehicle control system and determining man machine relations in stabilization, control and guidance

08 p1498 A70-21678

Workload relieving displays and controls for general aviation, discussing feasibility of digital computer driven integrated displays

08 p1601 A70-21679

Display media development and implementation from engineering psychology viewpoint for information transfer in form compatible to sensory-perceptual capabilities

08 p1447 A70-21690

C-5 design features for entire environment assuring human integration as crew member or troop passenger

09 p1609 A70-22021

Human factors data standardization in NASA Apollo Applications Program for computer data processing

09 p1623 A70-22295

Human factors responsibility for aircraft accidents, discussing cooperation between air safety service and flight surgeons

09 p1626 A70-23016

Human psychophysiological inability to avoid mid-air collisions investigated for aviation safety

09 p1611 A70-23465

Bibliography of literature on bioengineering, biocontrol, medical physics, biotechnology, safety and human factors in technology

09 p1629 A70-23692

Human reaction time study leading to promptness concept to embody quantitative and qualitative aspects of psychological behavior

10 p1818 A70-24716

IR electro-optical tracker Oculometer using human eye motions for pointing and tracking

11 p1989 A70-25352

Human reactions to confined interiors design, examining human-environment interactions present in aircraft

[SAE PAPER 700234]

11 p1990 A70-25903

Associative analog designed for decision making by man searching for extremum in form of multilayer stochastic automaton

11 p1990 A70-25928

Applied psychology role regarding human factors in man machine systems, considering boredom, skills application, age and experience, etc

12 p2176 A70-27035

Human engineering in weapon systems development, considering flying and ground personnel training plans

12 p2177 A70-27038

Man machine interface between operator and automatic testing equipment based on ergonomic design cost

13 p2360 A70-29687

Visual display reference system rotation effect on control quality and tracking error compensation using stick signal control

14 p2540 A70-30249

Human error as function of variability, considering frequency, effects and controllability

14 p2543 A70-31115

Human factors in aircraft accidents, noting cockpit crew members overconfidence and carelessness

15 p2692 A70-32228

Human skull porous dipole layer shear and compressive properties, measuring static and dynamic strain rates

15 p2683 A70-32308

Human element in system development to achieve optimum tradeoffs among reliability, cost and other system criteria

15 p2693 A70-32629

Workmen as environmental variables in design, introducing Human Factors Report during spacecraft components manufacture and testing

15 p2693 A70-32636

Dynamic systems control and guidance by man in light of anthropotechnics, treating approaches to man machine systems optimization

16 p2850 A70-33263

Human factors requirements for effective utilization of electronic reconnaissance displays, noting SNR and TV lines over target effects on performance

16 p2851 A70-33459

Discrete stochastic optimal control model of human operator for single loop compensatory/pursuit tracking situation, considering application to manual control system design

16 p2852 A70-33463

Field maintenance interface between human engineering and maintainability, discussing air defense system malfunction and troubleshooting deficiencies

16 p2852 A70-33665

Maintainability assessment techniques, discussing models in terms of utility, application, validity and human engineering data

16 p2853 A70-33667

Low cost headup displays /HUD/ for pilot error reduction during takeoff, approach and landing, discussing displayed functions vs cost tradeoffs

16 p2911 A70-33818

Head up display /HUD/ flight tests, examining effects decreasing quality of manually handled instrument approach, discussing space myopia and disorientation

16 p2912 A70-33819

Flight deck design since 1920, discussing ergonomics and avionic aspects

16 p2913 A70-34048

Ergonomic and medicomilitary aspects of human adaptation to cold environments, discussing metabolic and physical protective reactions, clothing and personnel selection

16 p2850 A70-34346

Human body radiation shielding, describing development of computerized standing and seated model for space missions

[AAS PAPER 70-053]

17 p0306 A70-34794

Habitability factors in space station crew quarter design, discussing hygiene and dining facilities

17 p0306 A70-34803

Heat-up display /HUD/ system, discussing development, production, commercial aircraft applications and flight sequences uses

18 p3223 A70-36210

Performance in monotonous work situations, discussing various factors affecting efficiency

18 p3224 A70-36317

Soviet book on man in aircraft control system covering engineering psychology, complex flight problems, human factors and instrument panels

19 p3367 A70-37236

Air traffic controller stress reduction, discussing work-rest intervals and various management and human factors

19 p3371 A70-38647

Human factors in ATC, discussing simulation trials and impending problems

19 p3371 A70-38648

Comfort plane switch mounting design for helicopter collective controls, noting mock-up evaluation by test pilots

19 p3372 A70-38922

Radar consoles with various display components under different illumination levels to determine optimal operator performance, discussing push-button design recommendations

20 p3580 A70-39713

Human mass exchange parameters permissible errors for manned space vehicles life support systems design

20 p3581 A70-40200

Advanced Integrated Life Support Systems, discussing subsystem requirements and mission parameters

21 p3768 A70-40988

Aerospace digital computer and avionics systems man machine relationship optimization, considering human information and control response requirements

21 p3794 A70-41688

Human error as factor in aircraft accidents, considering man machine incompatibility and prevention measures

21 p3771 A70-41723

Low cost and weight reliable microminiaturized IC automatic cockpit checklist systems for aircraft pilots

22 p3977 A70-42298

Book on environment and human efficiency covering stress mechanisms, experimentation, exposure to chemicals, radiation, noise, heat, cold, machines, etc

22 p3967 A70-42457

Pilot influence on dynamic aircraft design, taking into account physiological state during various operational tasks

[ICAS PAPER 70-37]

23 p4138 A70-44134

Man-rated chamber facilities at Manned Spacecraft Center /MSC/, discussing safety requirements and criteria, environmental test chamber design and test results

23 p4152 A70-44458

- Space station requirements and design, discussing space shuttles, operational personnel, long term effects, logistical systems, functions, etc
23 p4259 A70-44606
- Space transportation, discussing space shuttles, technological, commercial, human and philosophical aspects
23 p4245 A70-44641
- Biological life support system based on mutual equilibration of human metabolism and technically controlled algae culture, discussing experimental evaluation
23 p4156 A70-45026
- HUMAN PATHOLOGY**
- Local gamma irradiation effect on number of chromosome aberrations in lymphocytes of human blood of oncological patients after hysterectomy
01 p0013 A70-10137
- Vascular anatomy correlation with human heart conduction tissue structures to study coronary artery disease cases exhibiting major conduction disturbances by ECG
01 p0013 A70-10273
- Reciprocal rhythm occurring with impulses of atrial or atrioventricular (A-V) nodal or ventricular origin, noting role of A-V nodal pathways
01 p0016 A70-10442
- French book on aeronautical and astronautical physiopathology and pathology covering stress factors of flying, high speed and altitude including hypoxia, atmospheric vacuum, etc
01 p0029 A70-11380
- Postmortem coronary angiographies showing role of arterial hypertension in coronary pathology
03 p0426 A70-13939
- Pathologic findings of left ventricular papillary muscle related to electrocardiogram, discussing papillary muscle dysfunction syndrome
03 p0426 A70-13942
- Pathological manifestations of acute myocardial ischemia without acute myocardial necrosis and myocardial infarction, discussing subjects with chronic occlusive coronary atherosclerosis
04 p0634 A70-15456
- Primary and secondary pathological changes in small coronary arteries and role in acute myocardial infarction development, discussing coronary arteries distribution
04 p0635 A70-15457
- Clinicopathological studies of coronary artery occlusion and acute myocardial infarction, discussing coronary thrombosis
04 p0635 A70-15459
- Physiological and physiopathological effects of transverse accelerations on spacecraft crews, discussing cardiovascular and respiratory systems
05 p0799 A70-15763
- Victim examination, human factors and forensic problems in flight accident investigations
05 p0807 A70-16497
- Lower limbs circulation of peripheral vascular diseased patients transcatheterously assessed with ultrasonic flow detector, comparing results with arteriograms
07 p1217 A70-18956
- Spinal cord overstretching and circumscribed pathological tension mechanism, considering histological and radiological findings
07 p1204 A70-19242
- Human metabolic study showing effect of yeast RNA and allantoin on serum and urinary uric acid formation
08 p1454 A70-20679
- Idiopathic myocardial disease patients investigated for serological anomalies and markers of immunopathology
09 p1621 A70-23301
- Carbohydrate metabolism disorders in head injury cases, comparing incidence with EEG abnormalities
10 p1810 A70-24037
- Hypodynamia effects on humans during prolonged bed rest, investigating immunological resistance, psychic disorders, myocardium changes, responses to pharmaceuticals, etc
10 p1817 A70-24696
- Skin galvanic reaction manifestation degree correlated to EEG changes accompanying injuries of human brain limbic structures
11 p1985 A70-25400
- Long air voyage after exteriorization of Wallenberg syndrome, discussing case history of subject with cerebral vascular accident
12 p2172 A70-28044
- Stomatological diseases during prolonged space flights simulation, discussing gingivitis, stomatitis, dental caries, parodontitis and odontogenous inflammations
13 p2352 A70-29338
- Microbial flora in human subjects confined to long term Tekite 1 underwater habitat
15 p2681 A70-31879
- Fatal general aviation accidents examined by pathologists, determining pilot incapacity, accident

- sequence, aircraft design modification and crash protection performance
17 p3033 A70-35567
- Long rhythms of periodic disparate heritable diseases in man
19 p3365 A70-38414
- Mathematical model simulating human respiratory physiopathology, based on hypothetical stable auto-oscillations dependence on ventilation/pulmonary exchange system
23 p4155 A70-44859
- Obstructive lung diseases clinical, radiological and functional diagnosis in legal medicine
24 p4296 A70-45122

HUMAN PERFORMANCE

- NT ASTRONAUT PERFORMANCE**
- NT BLACKOUT PREVENTION**
- NT OPERATOR PERFORMANCE**
- NT PILOT PERFORMANCE**
- Equipment reliability data application in analytic techniques to predict human requirements for system, using in-space maintenance as reference frame
01 p0055 A70-10117
- Mathematical models for perception and skilled action in man or machine, noting sensorimotor theory
01 p0034 A70-10498
- Human subjects performances on fixed interval reinforcement schedules, emphasizing effects of instruction
01 p0035 A70-10793
- Image quality effects on human performance in simulation, discussing time sharing strategies and task difficulty factors
01 p0036 A70-10809
- Visual fatigue symptoms, causes, relation to general fatigue and psychological aspects, discussing testing for sensory and visual fatigue
01 p0022 A70-10857
- Visual attention testing, considering perception focusing on stimulus object and eyelid blinking recording, measuring eye distance to work plane
01 p0023 A70-10861
- Visual faculties testing to improve performances in visual inspection tasks, considering threshold line concept and visual performance relation to age
01 p0023 A70-10862
- Reduced traction effects on human work performance in weightless and lunar gravity environment
01 p0037 A70-10959
- Prototype lunar gravity simulator for studies of reduced gravity effects on human self locomotive capability, using magnetic air bearings and body support system
01 p0037 A70-10960
- Human activities inadvertent effects on planet earth, discussing catastrophic physical environment changes and compensation methods
01 p0077 A70-11045
- Voluntary control over velocity of smooth pursuits, discussing saccadic and saccade free modes and switching during tracking
01 p0026 A70-11056
- Intermittent vs continuous noise effects on signal detection measures during audio visual checking task performance
01 p0039 A70-11167
- Human and cat visual neuron properties, discussing encoding orientation and dimensions of retinal images
01 p0028 A70-11360
- Reactions to visual emergency signals in humans after administering adrenalin, aminazin, melipramine or andaxine to change control systems functional state of cerebrum
01 p0030 A70-11467
- Mathematical models construction for predicting and measuring air traffic controller workload, using synthetic and analytic methods
02 p0332 A70-11972
- Human decision making via man-computer interaction, noting skill role in nonoptimal performance handling of simultaneous factors
02 p0245 A70-12140
- Speed and accuracy of foot operation of controls tested by circular targets in rows within reach of right foot
02 p0245 A70-12144
- Correlations between organizational factors and individual engineer performance, analyzing stability of relationships and time lags in measurement
02 p0246 A70-12378
- Subjects trained in visual monitoring task with autoinstructional device, showing higher signal detection rate than group trained by practice alone
02 p0247 A70-12380
- Human feedback and response mode in performing Bayesian decision task
02 p0237 A70-12382
- Plethysmographic investigation of myogenic load influencing sportsmen central nervous systems state, tabulating short and long distance running results
03 p0420 A70-13403
- Diurnal rhythms of physiological functions and human adaptation to shifted sleep-wakefulness

- schedule on healthy pilots subjected to solitary confinement
03 p0423 A70-13711

- Relative slant judgments elicited by paired comparison methods from subjects viewing computer generated slides representing rotated regular dot patterns
03 p0435 A70-13769
- Monitoring behavior in three source visual task, studying selective attention by response observation method
03 p0435 A70-13770
- Event probability and cost effects on performance in continuous motor task
03 p0436 A70-13771
- Cardiovascular system, neuromuscular activity and mental fitness of subjects performing physical and mental assignments with prescribed work-rest schedule during confinement
03 p0425 A70-13895
- Prolonged hypokinesia effect on human resistance to physical stress, noting prophylactic influence of physical exercises
03 p0425 A70-13898
- Visual prediction accuracy in estimating point coincidence of two moving targets as function of viewing opportunity and length of period
03 p0428 A70-14084
- Heart rate augmentation during constant performance in excess of endurance limit, considering muscle fatigue
03 p0431 A70-14292
- Work and exercise conditions effect in early training stages of learning sensorimotor skill, considering different body positions
03 p0432 A70-14295
- Mathematical model building for temporal human motor responses /reaction, movement, manipulation/ by response surface technology and statistical experimental design
04 p0642 A70-14851
- Human controller decision in air traffic control, discussing manpower, on-line computer use and maximized systems
04 p0643 A70-14903
- Noise effects on tracking performance, electroencephalography (EEG) and galvanic skin resistance (GSR)
04 p0643 A70-14977
- Horizontal transverse vibration effects on manual tracking performance, relating tracking errors to frequency rather than acceleration
04 p0643 A70-14981
- Activity and rest alternation effect on fatigue and rehabilitation behavior of trained athletes, discussing muscle performance characteristics
04 p0639 A70-15510
- Time constant of man machine system as adaptive variable in training devices derived from combined vehicle properties and human control characteristics
05 p0805 A70-16005
- Human performance evaluation and data acquisition as requirements for heuristic analytical models in systems engineering
05 p0805 A70-16008
- Catecholamine excretion, cardiovascular functions and subjective effort in healthy male subjects under various physical work loads
05 p0801 A70-16141
- Acceleration cues removal effects on vehicular velocity perception, using movie technique to control visual cues
05 p0806 A70-16143
- Human controller in psychology and control engineering, discussing linear and nonlinear modeling of human behavior
05 p0807 A70-16487
- Health conditions and operational efficiency of Italian military paratroopers during air transportation analyzed from questionnaire data
05 p0807 A70-16494
- Statistical analysis for personal variations contribution to total mean square error in time determinations
05 p0914 A70-16649
- Postrest upswing or muscles warm-up in motor skill learning
05 p0803 A70-16671
- Hypoxia effect on self paced work behavior of humans
05 p0803 A70-16672
- Standardized bicycle ergometer training effects at sea level and simulated altitudes, indicating hypoxia potentiating role
05 p0807 A70-16674
- Prolonged wakefulness effect on human work capacity in isolated chamber, determining physical, intellectual and sensory capacities
05 p0809 A70-17117
- Vigilance time degradation, studying effects of breathing gas mixtures with varying oxygen and carbon dioxide content
06 p1000 A70-17293
- Time of useful function (TUF) determination for human exposure to toxic gas combinations due to fire
06 p1000 A70-17294

- Book on human factor in aircraft accidents covering desire to please, fatigue, diurnal rhythm, psychology, etc
06 p0987 A70-18249
- Neurophysiological vertical and horizontal visual coordinates localization in man
06 p0998 A70-18484
- Artificial effects on atmosphere and near-earth space caused by human activity, discussing occurrence altitude, means of action and consequences
07 p1262 A70-18778
- Surface and underwater swimming tests for statistical correlation to linear maximum accelerations effects
07 p1201 A70-18788
- Human visual performance, discussing effects of object size and exposure time
07 p1204 A70-19050
- Radiorheopneumographic study of external respiration of office workers during mental and physical activity
07 p1204 A70-19142
- Evoked potential /EP/ correlate of binocular depth perception in man, discussing responses to horizontal and vertical changes in retinal disparity
07 p1205 A70-19284
- Veloergometric assembly using two bicycles for simultaneously measuring muscular motor activity of persons in competition
07 p1221 A70-19525
- Symmetrical motor centers inequality significance in humans during interaction under conditions of successive innervations during exercise
07 p1213 A70-19790
- Human color vision simulation by mathematical and electronic analogs for photoelectric color measurement and eye resolution
08 p1450 A70-20727
- Weightlessness effects on human vision, studying color perception, field of vision and light sensitivity
08 p1444 A70-20743
- Cardiac output and coronary blood flow during steady state recumbent exercise, discussing CO and Rb 84 measurements in human subjects
08 p1453 A70-21936
- Solar simulation /SISS/ for evaluating human visual system performance in contrasting space environment
09 p1655 A70-22680
- ATC and SST operations in terminal area simulation study involving airline crews and controllers in real time traffic situation
09 p1721 A70-22946
- Various phases of human isometric left ventricle contraction, comparing results with previously published data
09 p1620 A70-23111
- Target velocity and approach angle effects on accuracy of moving targets intersection estimation tested on human subjects
09 p1628 A70-23578
- Observation noise model for human controller remnant
10 p1823 A70-23893
- Step tracking in normal human subjects, studying muscle system around ankle joint
10 p1824 A70-23898
- Environmental thermal stress effect on human performance under high mental and low physical workload
10 p1812 A70-24505
- Differential luminance sensitivity of human eye using signal detection theory, correlating discrimination and detection results with electrophysiological data
10 p1812 A70-24599
- Human movement speed and accuracy as function of age in pencil tapping between paper-drawn targets
10 p1817 A70-24711
- Speed-accuracy interrelationship in human performance as operating characteristic for reaction time under variety of task conditions
10 p1826 A70-24712
- Response times in deciding same or different between successive visual stimuli
10 p1826 A70-24722
- Perceptual selection and integration of sensory data conveyed to brain, explaining various optical illusions
10 p1827 A70-24766
- Functional visual field selective process, studying performance as function of display angle
10 p1827 A70-24769
- Diurnal rhythms of physiological functions and human adaptation to shifted sleep-wakefulness schedule on healthy pilots subjected to solitary confinement
11 p1985 A70-25511
- Nine degree of freedom pitch axis model of human postural control system, deriving kinetic and potential energy expressions
11 p1990 A70-25675
- Human performance as controller evaluated in man machine control system, considering pursuit or compensatory tracking tasks
12 p2177 A70-27039
- Thermal stress /high ambient and body temperatures/ effect on human performance in high mental and low physical activities
12 p2177 A70-27043
- Mental blocking /incidental long reaction times/ during continuous serial performance using perceptual-selection and response theories
12 p2178 A70-27045
- Continuous active work effects on human sensorimotor performance, comparing latency distributions in mass and spaced practice groups
12 p2178 A70-27046
- Pursuit tracking during disturbance signal as function of human performance in man machine system
12 p2266 A70-27198
- Heterochronism of coordinated cophasal flexor and extensor movements during acrobatic leap in human subjects
12 p2168 A70-27344
- Air controllers traffic capacity using automation, discussing airspace loading effect, area navigation and rerouting
12 p2267 A70-27637
- Anaerobic and aerobic oxidation efficiency in muscular work performance before and after achieving oxygen steady state consumption
12 p2169 A70-27658
- Human detection capability for objects on electro-optical imaging displays calculated as function of SNR, viewing distances and brightness levels
12 p2236 A70-27903
- Visual feedback delay effects on steering and tracking performance
12 p2179 A70-28147
- Human forearm motion control mechanism, examining mechanogram, instantaneous velocity, acceleration and biopotentials of biceps and triceps brachii
12 p2173 A70-28314
- Maximum oxygen uptake correlation to age of subjects performing physical and sedentary work
13 p2350 A70-29112
- Compensatory tracking task with tactile displays determining gains and body locations by describing function and error power analyses
13 p2354 A70-29599
- Human error as function of variability, considering frequency, effects and controllability
14 p2543 A70-31115
- Sensory function in multimodal signal detection forced choice experiment involving auditory, visual and auditory-visual stimuli
14 p2539 A70-31167
- Optimal manual control model of human compensatory tracking response
14 p2543 A70-31408
- Hand-eye coordination in altered gravitational fields, using mirror viewed target in reaching test
15 p2689 A70-31886
- Eye movements effects on apparent /beta/ movement perception tested by display with ambiguous illusory movement
15 p2683 A70-32454
- Personnel subsystem reliability through empirical approach, determining relations of man-hardware-procedure systems
15 p2804 A70-32665
- Human factors requirements for effective utilization of electronic reconnaissance displays, noting SNR and TV lines over target effects on performance
16 p2851 A70-33459
- Human and machine pattern discrimination correlated by statistical correlation method from pattern recognition task involving computer simulation and humans
16 p2852 A70-33461
- Electronic equipment maintainability in military environment, discussing myths for hardware and human performance conditions
16 p2852 A70-33664
- Human muscular strength capacity relationship to maximal or submaximal dynamic work performance
16 p2853 A70-33668
- Human power output dependence on muscle mechanical properties and kinematics of input motion, describing ergometer
16 p2853 A70-33669
- Displayed cursor velocity effect on radar target acquisition time for subjects in simulated air defense environment
16 p2853 A70-33670
- Human tracking performance in position, rate and acceleration control systems under short term psychological stress induced by electric shocks
16 p2853 A70-33689
- Human acceleration resistance and psychomotor behavior under emergency flight conditions, including high temperature exposure and remaining in clinical position
17 p3037 A70-35135
- Systems engineering approach to comparison by emphasis for employee performance evaluation
17 p3130 A70-35298
- Performance in monotonous work situations, discussing various factors affecting efficiency
18 p3224 A70-36317
- Equidistance effects on human size and distance perception in visual alley
19 p3368 A70-37771
- Heat stress effects on serial reaction time in subjects performing visual tasks
19 p3361 A70-38053
- Response bias of conservative human inference, using revised odds estimate experiments
19 p3361 A70-38055
- Stabilogram and support dynamograph based on amplitude modulation of carrier frequency for standing stability determination in humans
19 p3371 A70-38220
- Attention and performance - Conference, Soesterberg, Netherlands, August 1969
19 p3361 A70-38310
- Component decision logical and temporal arrangement in visual search, defining target by several attribute value combination
19 p3362 A70-38314
- Attention theory experimental design logic, discussing quantitative theory
19 p3362 A70-38315
- Optimum attention allocation, discussing distraction resistance and multiple task performance
19 p3362 A70-38316
- Performance and response organization as uncertainty and structure function in pursuit tracking tasks
19 p3363 A70-38320
- Human memory information structure, discussing pattern recognition, simultaneous attention, problem solving and logic
19 p3363 A70-38322
- Human vigilance paradigm and physiology, discussing relationships between vigilance, signal detection and animal discrimination
19 p3364 A70-38324
- Prolonged hyperbaric oxygen breathing effect on human physical performance at rest and during severe exercise
19 p3364 A70-38369
- Lighting and background effects on human binocular color vision of signal lights in industry
19 p3366 A70-38923
- Brightness contrast by human observer binocular matching, discussing neural networks models
19 p3366 A70-38924
- Choice reaction and movement time dependence on hypoxia induced by air pressure reduction inside decompression chamber, discussing adult human performance
20 p3573 A70-39714
- Acute mountain sickness symptomatology and cognitive performance, using standardized General High Altitude Questionnaire
20 p3581 A70-40025
- Mental performance changes due to extended exposure of man to sensory deprivation environment, discussing prevention and treatment methods
21 p3770 A70-41479
- Human error as factor in aircraft accidents, considering man machine incompatibility and prevention measures
21 p3771 A70-41723
- Book on environment and human efficiency covering stress mechanisms, experimentation, exposure to chemicals, radiation, noise, heat, cold, machines, etc
22 p3967 A70-42457
- Longitudinal vibration effects on human reaction time and motor performance involving toggle switch and manual knob control in different working positions
22 p3977 A70-42871
- Vestibular sinusoidal stimulation effects on compensatory tracking under various postures and display conditions
22 p3976 A70-43706
- Labyrinthine and sensory information role in driving, discussing car simulator, driver tests with impaired inputs, age factors, etc
22 p3976 A70-43708
- Integrated regenerative life support manned tests for space laboratory design and development
23 p4154 A70-44632
- Syncope prevention in orthostatic heat test by inflating cuffs around legs and lower abdomen
24 p4306 A70-45331
- Alcohol effects on human short term memory, discussing pathological intoxication from flying safety viewpoint
24 p4307 A70-45345
- Human tracking performance as function of information precision in electrocutaneous display
24 p4308 A70-45508
- Human mental stress evaluation through chemical analysis of 17-hydrocorticosteroid level in parotid fluid
24 p4308 A70-45509
- Human interpolation accuracy for pointer or index position between two scale graduations
24 p4308 A70-45512

Expert judgments validity of human task performance time against empirical measures for use in analytical modeling 24 p4308 A70-45515

Artificial gravity simulation effects on human performance in space base [AIAA PAPER 70-1329] 24 p4417 A70-45938
Human EEG alpha rhythm during surface-tapping test with rod at time-limited maximum frequency, noting slowdown to preferred frequency 24 p4301 A70-45987

Human compensatory two dimensional visual display tracking performance with superimposed apparent vertical vibration, studying frequency dependent eye pursuit movements 24 p4309 A70-46078

HUMAN REACTIONS

Book on subatmospheric decompression sickness in man, covering raised intrapulmonary pressure effects and compensating pressure applications [AGARDOGRAPH-125] 01 p0019 A70-10514

Acid base responses of arterial plasma of anesthetized man during acute carbon dioxide partial pressure changes, discussing anesthesia effects 01 p0020 A70-10651

Human thermoregulatory responses as function of peripheral thermoreceptors during imposed negative heat load in different ambient environments 01 p0024 A70-10977

Hemoglobin concentration in red blood cells in men of various ages as function of altitude, discussing correlations with body weight and plasma protein 01 p0024 A70-10978

Visual stimuli duration effect on saccades precision and reaction time in peripheral field in normal subjects 01 p0026 A70-11055

Jet aircraft flyovers annoyance relationship to physical parameters of sound evaluated, using psychophysical method of constant stimulus differences 01 p0006 A70-11199

Topically administered vitamin A radioprotective effect on postradiation skin reactions 01 p0029 A70-11402

EEG investigation of cerebral bio currents during polar night-day cycle, studying central nervous system nonspecific automatic control mechanism dependence on ecological factors 01 p0030 A70-11466

Time sense in human subjects kept in caisson or cave isolation determined as function of upper brain stem paraconsciousness 01 p0041 A70-11474

Thermal discomfort by changing operational temperature of human subjects environment found to follow power law 01 p0041 A70-11474

Human vibration test program for airline passenger reaction to vibration environments of large commercial aircraft 02 p0244 A70-12132

Propagation velocity relation with time delay in human visual system, using various sets of line stimuli having different spatial distance 02 p0237 A70-12457

Human perceptual and response biases in choice reaction time tasks involving visual and auditory stimuli 02 p0239 A70-12624

Mean signal response time relationship to nonaging foreperiod 02 p0239 A70-12627

Accelerative and decelerative heart rate responses in human subjects given differential conditioning trials by auditory and electric shock stimuli under paced respiration 02 p0239 A70-12628

Human response in Apollo flights emphasizing astronauts food, water, waste management, physical examination, preventive medicine problems, etc 02 p0239 A70-12669

Display devices for ballistocardiographic test data obtained from professional pilots free of cardiovascular disease subjected to displacement and acceleration 02 p0247 A70-12676

Effect of immersion in thermoindifferent water on circulatory control and work capacity in trained and untrained subjects 02 p0241 A70-12770

Sensor, vegetative, motor and vestibulosomatic reactions to brief weightlessness in fighter pilots and laymen, ascribing disorders absence to statokinetic stability of organism 02 p0241 A70-12799

Functional state changes in organism awaiting and performing parachute jump using orthostatic test, respiration retention and Howard step test 03 p0420 A70-13477

Vestibular analyzer stimulation effects on cerebral blood circulation in humans during angular acceleration using rheoencephalography 03 p0422 A70-13692

Dehydrated food effects on human functional state, noting published literature on food composition, preparation, caloric and nutritional values, digestibility, etc 03 p0435 A70-13703

Reaction time task to examine relationship between preparatory intervals and auditory stimulus intensity in experimental designs 03 p0424 A70-13764

Human oculogyral illusion thresholds determined on Ames Man-Carrying Rotation Device to establish stimulus duration effect on angular acceleration thresholds 03 p0424 A70-13765

Signal detection theory analysis indicating within-session changes in human willingness to respond in visual monitoring task, considering optimal decision behavior 03 p0435 A70-13766

Auditory and visual ready signal intensity effects on reaction time, considering roles of practice and individual differences 03 p0436 A70-13772

Human atrial flutter studies using electrocardiographic electrodes placed within esophagus and right atrium 03 p0424 A70-13773

Phagocytic activity and carbohydrate metabolism in peripheral blood neutrophils of men exposed to atmosphere with increased O content, noting neutrophil energy exchange disorder role 03 p0426 A70-13901

Cardiac output and coronary blood flow changes in patients at rest and during peak exertion, stating correlation coefficients 03 p0428 A70-14065

Mechanical vibrations effect on man including motor vehicle dynamic vibrations 03 p0439 A70-14097

Thermal comfort in disparate environments, discussing human subjects skin mean temperature and body water loss 03 p0429 A70-14158

Thin, fat and average men responses to cold during one year period in Antarctica, measuring metabolic rates, skin and rectal temperatures 03 p0429 A70-14163

Evaporative weight losses by sweating in man exposed to warm environment as function of time, including graphical method for heat storage prediction 03 p0430 A70-14164

Two loop control system model of human lens accommodative system derived on basis of muscle mechanics, optics and experiments 03 p0439 A70-14275

Oxygen consumption and body temperatures during acute hypoxia in man, based on low oxygen mixture breathing tests 03 p0439 A70-14291

Closed life support systems tests, describing effects of long term /one year/ confinement of three human subjects 04 p0641 A70-14565

Prolonged dehydrated food diet effect on metabolism of humans, noting complete adaptation after three or four months 04 p0630 A70-14577

Combined hypoxic hypoxia and high ambient temperature found relieving strain on humans by increasing heat release by evaporation 04 p0630 A70-14581

Nonextension lines characteristic to human skin utilized to provide natural mobility and minimal ballooning in full pressure suits noting mapping, testing, construction, etc [ASME PAPER 69-WA/AUT-22] 04 p0642 A70-14826

Reciprocating force measurement at shake table and subject interface and repetitive circumferential human torso deformation under sinusoidal input at various frequencies and intensities 04 p0631 A70-14850

Human functional changes in controlling C-8 trainer measured by flicker value, pulse rate, reaction time and instrument and control error before and after flight 04 p0643 A70-14976

Interindividual reaction time using target speed anticipation test and relationship with manifest anxiety scale 04 p0643 A70-14978

Aircraft pilots vertigo during flight using questionnaire and interviews, emphasizing bank directional disorientation 04 p0643 A70-14979

Human communication in pilots and in maintenance and administrative personnel, noting time factor influence 04 p0644 A70-14985

Classical human reaction time as function of high and low auditory signal rates in vigilance setting, supporting inhibition theory of vigilance decrement 04 p0640 A70-15646

Adaptive multiparameter experiment for iterative minimization of investigated data points, based on human response pattern to psychophysical inputs 05 p0805 A70-16006

Human macrosaccadic eye movements related to four dial display conditioned by concurrent variable interval schedules of signals 05 p0800 A70-16127

Book on sense of time covering psychological and physiological aspects and electrophysiological experimental results in man 05 p0800 A70-16129

Human eye contribution to visual evoked responses under different color stimuli during all possible monocular and binocular combinations 05 p0801 A70-16382

Electrocardiographic changes during positive headward acceleration of normal human subjects after oxygen breathing and propanolol administration 05 p0808 A70-16675

Recumbency effect on human heel bone density during bed rest using X rays 06 p0996 A70-17850

Human motor reactions rhythmic system, relating reaction-skin-galvanic reflex to formation of successive conditioned connections 07 p1197 A70-18697

Physiological effects of prolonged human motor activity restriction, discussing oxygen transport system, work capacity relationships, body fluids volume and distribution, metabolism, etc 07 p1200 A70-18786

Acceleration effects on chest organs by X ray studies noting heart shape changes, pulmonary areas, diaphragm position, etc 07 p1201 A70-18791

Flavor sweetening preference in high protein and high fat diets, basing human subjects experimental range on choice of formulas 07 p1216 A70-18948

Intracerebral, peripheral and central blood circulation relationship in humans during transverse accelerations 07 p1209 A70-19520

Periodic components distribution of human cardiac activity rhythm noting slow waves 07 p1210 A70-19556

Left ventricular wall motion in normal man at rest and after exercise using echocardiogram 07 p1210 A70-19573

Posture change effects on vasodilator responses in humans, studying reactive, postexercise and local heat hyperaemia in forearms of subjects lying and standing 07 p1211 A70-19596

Auditory averaged evoked potentials to clicks in man subjected to selective listening task, comparing effect on attended and rejected ear 07 p1215 A70-20213

Microinterval analysis of phased development of human visual color perception in presence of short stimuli 08 p1443 A70-20733

Constant periods method to eliminate human responses during threshold measurements by holding first threshold perception flash fixed 08 p1445 A70-20750

Multistage treadmill exercise tests on healthy business executives noting S-T-segment responses 08 p1445 A70-21265

Alveolar ventilation and pulmonary circulation during application of negative pressure to lower part of human body 09 p1615 A70-22090

Ego strength relationship to respiration in response to sound and light stimulation tested in subjects balanced for alertness-drowsiness by EEG criteria 09 p1616 A70-22331

Attention and cue-producing responses in response-mediated stimulus generalization 09 p1617 A70-22342

Human complex responses to noise, considering individual variations, social and psychological factors, adaptation, etc 09 p1617 A70-22392

Eosinophilic leukocytes behavior in blood of Starfighter aircraft pilots due to flight stress 09 p1625 A70-23004

Air traffic vibration effects on human organs and sensations, considering blood circulation, lungs, eyes and muscles 09 p1625 A70-23007

Physiological reactions detection, transmission and data evaluation of aircraft pilots subjected to various stress environments, using radio telemetry 09 p1626 A70-23009

Blood pressure variations resulting in permanent irreversible hypertonia in air force pilots subjected to repeated stress situations and emotional irritations 09 p1626 A70-23011

Psychic stress causing factors and reactions in aircraft pilots on duty, analyzing harmful effects on organism 09 p1620 A70-23012

- Discrete motor act short term retention measurement to investigate decay and interference effects
09 p1621 A70-23378
- Human sensory-motor adaptation and aftereffects of exposure to accelerative forces using hand-eye coordination measurements
09 p1628 A70-23466
- Startle auditory stimuli effects on motor performance and recovery characteristics from heart rate and skin conductance recordings
09 p1628 A70-23577
- Time variations in human spectral response, considering sequential gain and phase estimates formation by Gabor elementary signals theory
10 p1823 A70-23895
- Heat accumulation, oral temperature and heart rate recovery of subjects in various thermal environments
10 p1810 A70-24034
- Human response to angular acceleration, discussing implications for motion capability in flight simulator [AIAA PAPER 70-350]
10 p1824 A70-24212
- Soviet collection of papers on prolonged immobility and effects on human organism
10 p1812 A70-24665
- Relative value of prolonged bed confinement and hypodynamia in estimating biological effects of weightlessness
10 p1813 A70-24666
- Prolonged hypodynamia effect on human organism, describing organizational and methodological principles for conducting investigations
10 p1813 A70-24667
- Prolonged hypodynamia /bed rest/ clinical observations, noting psychological and physical effects
10 p1813 A70-24668
- EKG and cardiac rhythm changes during prolonged hypodynamia /bed rest/ with restricted physical activity
10 p1814 A70-24669
- Human vascular tonus and hemodynamics during prolonged hypokinesia, observing changes in reaction to cold and reduced vascular tonicity
10 p1814 A70-24670
- Mineral saturation in calcaneal bone and hand finger phalanx in humans under prolonged hypodynamia by X ray analysis, observing Ca salts reduction
10 p1815 A70-24676
- Prolonged hypodynamia effect on human blood serum mineral content and enzyme activity
10 p1815 A70-24677
- Prolonged hypodynamia effect on human blood coagulation, noting antihemophilic effect of physical exercise
10 p1815 A70-24678
- Immunity indices in humans subjected to hypodynamia, noting infection resistance lowering
10 p1815 A70-24679
- Human central nervous system changes during hypodynamia, noting unidirectional shifts in brain hemodynamics, rheographic wave propagation time reduction, etc
10 p1815 A70-24680
- Cardiovascular reactions and orthostatic stability during hypodynamia determined from ECG, seismocardiograms, phonocardiograms, sphygmograms and tachy-oscillograms
10 p1817 A70-24694
- Transverse g-force tolerance and stability after prolonged hypodynamia in bed rest, noting effects of pharmaceuticals, physical exercise and prophylactic measures
10 p1817 A70-24695
- Information hypothesis and repetition hypothesis concerning human reaction time to visual stimulus information
10 p1826 A70-24714
- Human reaction time study leading to promptness concept to embody quantitative and qualitative aspects of psychological behavior
10 p1818 A70-24716
- Human reactions to successive visual signals, studying response time in single and grouped reaction
10 p1826 A70-24720
- Visual stimuli intensity influence on delay in reaction to second of pair of visual stimuli
10 p1818 A70-24721
- Information processing stages by reaction time measurements permitting discovery, property assessment and separate testing of stage durations additivity and stochastic independence
10 p1826 A70-24723
- Neurophysiological mechanism of motor activity during simple reaction time situation performance
10 p1818 A70-24724
- Human finger tips skin temperature periodical variations process and influencing factors using electronic analog model
10 p1823 A70-25306
- Dehydrated food effects on human functional state, noting food composition, preparation, caloric and nutritional values, digestibility, etc
11 p1989 A70-25503
- Pilot electroencephalograms during F-104 flights recorded by telemetering noting alpha, beta and theta activities
11 p1990 A70-25668
- Physiological and psychological human reactions during space flight concerning hypokinesia, space kinetosis, isolation and limited room conditions
11 p1986 A70-25707
- Human reactions to confined interiors design, examining human-environment interactions present in aircraft
11 p1990 A70-25903
- Dietary protein and yeast RNA levels effect on uric acid metabolism in normal man
11 p1987 A70-26002
- Size effects on velocity threshold for real movement during narrow stimulus object length increase
11 p1989 A70-26662
- Psychic stress at simulated flight vehicle guidance tasks evaluated quantitatively
12 p2177 A70-27037
- Thermal stress /high ambient and body temperatures/ effect on human performance in high mental and low physical activities
12 p2177 A70-27043
- Cerebral circulatory reactions of smokers and non-smokers exposed to altitude, measuring vasomotor, blood flow and cardiac frequency indexes using scalp electrodes
12 p2172 A70-28042
- Minute hyperventilation of human lungs causing expiratory suppression of respiration
12 p2173 A70-28315
- Sensory afterdischarge of human brain under light stimuli during sleep and wakefulness
12 p2173 A70-28354
- Motor reactions and neural negative induction duration in male and female human subjects of different ages
12 p2174 A70-28356
- Periodic high temperature effects on human systolic phase dynamics
12 p2174 A70-28359
- Paced respiration and selective attention effects on heart rate and finger pulse amplitude in adult females subjected to visual stimuli
13 p2350 A70-29241
- Human proprioceptive reflexes fluctuations correlation with spontaneous respiration and cardiovascular rhythms
13 p2350 A70-29323
- Human proprioceptive reflexes fluctuations during controlled respiration and voluntary apnea
13 p2351 A70-29324
- Coriolis illusions amelioration during space flight, noting cross coupling effects minimization by reflex vestibular stabilization of head
13 p2358 A70-29432
- Human response in Apollo flights emphasizing astronaut food, water, waste management, physical examination, preventive medicine problems, etc
13 p2353 A70-29434
- Human respiratory responses to gas mixtures with different oxygen content under rarefied atmospheric conditions
13 p2353 A70-29521
- Motion sickness in man and animals as normal response with individual susceptibility dependent on motion duration
13 p2355 A70-29793
- Human temporal motor response models relating reaction, movement and manipulation time to stimulus, movement and manipulation information
14 p2540 A70-30248
- Human operator ocular tracking and decay time stimulation response measurements using information, statistical, point process and random analysis
14 p2537 A70-30388
- Arousal effects on vestibular nystagmus in man, discussing forced alertness in mental arithmetics form
14 p2538 A70-30911
- Closed circuit respiration studies on subjects at rest and work, demonstrating potassium superoxide as oxygen source in breathing apparatus
15 p2688 A70-31500
- Physiological examination of healthy human beings, considering repose situation abnormal
15 p2691 A70-31923
- Human renal response to various exercise rates, measuring endogenous creatinine clearance, urine volume, solutes, acid, elements and protein excretion
15 p2684 A70-32534
- Alveolar ventilation and pulmonary circulation during application of negative pressure to lower part of human body
15 p2685 A70-32686
- Human tracking performance in position, rate and acceleration control systems under short term psychological stress induced by electric shocks
16 p2853 A70-33689
- Human circadian coronary circulatory rhythms during space flight weightlessness or bedrest with and without exercise
16 p2854 A70-33991
- Annoyance assessment for sonic boom series exposure near airport
16 p2843 A70-34325
- Decision theory model evaluation based on experimental findings concerning relationship between stimulus intensity and reaction time
17 p3036 A70-34605
- Tracking error correction time and proprioceptive reaction time, suggesting role of central mechanism without sensory feedback
17 p3036 A70-34606
- Nonextension lines characteristic to human skin utilized to provide natural mobility and minimal ballooning in full pressure suits noting mapping, testing, construction, etc
17 p3036 A70-34951
- Centrifugation effects on human peripheral arterial pulse behavior
17 p3037 A70-35126
- Hypoxia and parotid secretion in humans exposed to angular accelerations
17 p3038 A70-35137
- Human operators psychological response to unforeseen information received during routine activity in prolonged solitary isolation
17 p3038 A70-35362
- Human water-salt metabolism following exposure to transverse accelerations, discussing diuresis and Cl-K excretion
17 p3038 A70-35364
- Cooling hood effect on physiological responses to work in hot environment, discussing body temperature
17 p3031 A70-35422
- Mountain climbing effects on urinary excretion of vanillylmandelic and homovanillic acids, discussing circulatory system acclimatization
17 p3039 A70-35425
- Oxygen uptake and cardiac output in males during submaximal and maximal treadmill and bicycle exercise
17 p3039 A70-35428
- Prototype space foods effects on humans, determining changes in bacterial fecal flora content
17 p3032 A70-35565
- Psychophysiological tests involving programmed memory device evaluating human memorization process and sensorimotor reactions to light signals
17 p3040 A70-35676
- Environmental heat stress indices of human subjects in bicycle ergometer experiment
18 p3224 A70-36226
- Cortical evoked potentials in human motor conditioning to photic stimulus
18 p3221 A70-37212
- Electrophysiological characteristics of man during disorders in rhythmic system of conditioned motor reactions
18 p3221 A70-37217
- Latent period of human motor reflex in telegraph key press testing in response to oral command
18 p3222 A70-37218
- Intact femoral artery pressure-diameter relationship in man, discussing noradrenaline infusions effects
18 p3222 A70-37222
- Decreased mental and physical performance of human beings due to T-oral and placebo vaccine reactions
19 p3359 A70-37389
- Human spatio-temporal visual evoked response characteristics, showing potential gradient rotation in same period as input stimulus
19 p3360 A70-37845
- Human brain LF activity in visual evoked response, determining relationship to stimulation
19 p3360 A70-37846
- Human response time to visual stimulus preceding or following auditory stimulus as function of interstimulus interval
19 p3362 A70-38311
- Reaction time intersensory facilitation relationship to single channel theories of attention and human performance
19 p3362 A70-38312
- Preliminary taxonomy for errors in serial, self-paced choice reaction time experiments, discussing speed-error tradeoff
19 p3362 A70-38313
- Human sleep pattern changes due to acute sleepwalking cycle reversal
20 p3569 A70-38990
- Airborne electronic equipment, collision avoidance systems, displays, instrumentation, human response and ground based control in air traffic control
20 p3665 A70-39198
- Frank orthogonal vectorcardiograms on humans during acceleration, using beat-by-beat real time analog-digital computer technique
20 p3572 A70-39435
- Human gluco-regulatory hormone reserve depressions following acute and chronic acceleration exposure
20 p3572 A70-39436

- Ship engineers cardiovascular system functional changes during HF internal combustion engine noise, investigating EKG recordings and arterial pressure 20 p3582 A70-40292
- Human peripheral blood flow rewarming in cold ambient temperature, examining skin, rectal and tympanic membrane and oxygen uptake 20 p3576 A70-40327
- Unitary and compound stimuli and role of response categories in decision time 21 p3767 A70-40751
- Line tilting aftereffects on central and peripheral vision following spatial coincidence of inspection and test contours 21 p3767 A70-40752
- Serum enzymes lactate dehydrogenase, creatine phosphokinase and isoenzymes in conditioned male after marathon run, noting little myocardium damage 21 p3766 A70-42158
- Lateral and angular acceleration effects on blood and urine contents in specific metabolic indices of healthy young men 22 p3971 A70-43136
- Visually evoked responses in man to different light stimuli intensities, noting marked increase in binocular over monocular visual response 22 p3972 A70-43408
- Spectral sensitivity of freely moving human eye by determining threshold energy for correct choice between two monochromatically illuminated stimulus patches 22 p3972 A70-43412
- Human postural control system response to mechanical torque disturbance, using second order differential equation with state dependent parameters for approximate analysis 22 p3979 A70-43494
- Normal human postural control system reflex response to tendon jerk disturbance 22 p3979 A70-43495
- Apollo program medical data contribution to knowledge of human response to space environment 22 p3980 A70-43651
- Human disturbance from SST overflight sonic booms, discussing overpressure, rise times and durations 23 p4137 A70-44016
- Passengers physiological and medical problems on subsonic and supersonic aircraft 23 p4150 A70-44223
- Aircraft noise reduction, discussing generation sources in propulsion system, noise levels and subjective responses 23 p4140 A70-44395
- Hypodynamic effects on human external respiratory function and cardiovascular state under various microclimatic conditions 23 p4149 A70-45078
- Mammal and human acoustic reflex for impulsive sound, investigating immunization effectiveness 24 p4297 A70-45373
- Sonic boom, discussing characteristic flow phenomena, intensity, effects on buildings and animals, human reactions, etc 24 p4289 A70-45786
- Desoxycorticosterone action on human kidneys and sweat glands as function of temperature tested with various DOCA and NaCl doses 24 p4301 A70-45988
- HUMAN TOLERANCES**
- Lipid and carbohydrate behavioral abnormalities in patients with angiographically documented coronary artery disease observed by glucose tolerance tests 01 p0016 A70-10441
- Pulsed noise biological effects on human organism, showing stimulation of auditory duct and baric and mechanical reception system causing neural functional shift 03 p0433 A70-13476
- Spine acceleration tolerance after prolonged human exposure to weightlessness, noting osseous apparatus tissue decalcination 03 p0423 A70-13712
- Thermal protection rating systems for clothing fabrics based on pain and blister effects in human skin 03 p0438 A70-14064
- Human alveolar-arterial oxygen differences during rest, sleep and exercise in initial hypoxia induced by simulated high altitude exposure 03 p0429 A70-14161
- Cardiovascular responses to sustained high skin temperature in resting men noting dizziness, impaired vision and extracutaneous vasodilatation 03 p0429 A70-14162
- Artificial gravitation parameters for manned compartments of spacecraft, analyzing permissible angular velocity and rotation radius regarding vestibular-vegetative disorders 04 p0760 A70-14446
- Autonomic nervous system role in controlling body functions after rapid decompression, increasing tolerance to pressure gradients by physical training 04 p0630 A70-14575

- Physiological limitations of air traffic controllers, considering stress factors connected with workload 04 p0716 A70-15314
- Human susceptibility to weak fluctuations in geomagnetic field intensity, showing frequency range 05 p0809 A70-16861
- Nonionizing radiation sources relationship to human targets, discussing damage threshold levels 06 p0998 A70-17201
- Hemodynamics in cardiosclerosis patients and healthy subjects under hypoxia, investigating heart activity and blood circulation 06 p0994 A70-17667
- Thorax potential resistivity at sea and high altitude levels measured in children and adults inferring relation to ECG differences 07 p1206 A70-19296
- Statistical analysis of pulmonary ventilation and gas exchange indices during orthostatic tests before and after water immersion 07 p1209 A70-19517
- Physiological responses during exercise recorded in patients with healed myocardial infarction, considering work tolerance 07 p1212 A70-19693
- Human physiological responses to lower body negative pressure (LBNP), studying presence or absence of change for orthostatic tolerance as function of time 07 p1222 A70-19933
- USAF permissible human exposure levels for laser irradiation established from monkey retina experiments 08 p1451 A70-21045
- Thermal tolerance and comfort graph for air conditioned spaces with low air velocity, considering fighter plane cockpits 08 p1454 A70-21949
- Acceleration training schedules performed with animals and test subjects, assessing schedules effectiveness in increasing tolerances to transverse acceleration 09 p1623 A70-22086
- Orthostatic tolerance in humans increased by lower limb muscles electrostimulation, correlating subjective feelings with heart and pulse rate measurements 09 p1615 A70-22089
- Hypercapnic atmosphere effect on human organisms found tolerable in state of rest or performing light labor 09 p1615 A70-22094
- Acute oxygen deficiency effects on blood electrolyte concentrations in altitude-adapted and nonadapted humans 09 p1616 A70-22217
- Flight stress in Starfighter aircraft pilots related to fibrinolysis activity in blood 09 p1625 A70-23003
- Aircraft pilots psychic and flight stress admissible degree not resulting in hazardous consequences, suggesting measures to increase resistance 09 p1625 A70-23006
- Aircraft pilots fitness under flight stress, discussing smoking, overweight, lack of exercise, etc, leading to coronary afflictions 09 p1620 A70-23013
- Human tolerance to short duration high acceleration in centrifuge concerning peripheral or central vision trouble or syncope 09 p1626 A70-23112
- Heat tolerance time extension due to prior body cooling observed in aircrew subjected to heat stresses 10 p1824 A70-24036
- Spine acceleration tolerance after prolonged human exposure to weightlessness, noting osseous apparatus tissue decalcination 11 p1985 A70-25512
- Statistical analysis of pulmonary ventilation and gas exchange indices during orthostatic tests before and after water immersion 11 p1988 A70-26116
- Incremental lower body negative pressure as assay method for human orthostatic tolerance 11 p1992 A70-26518
- Physiological reactions of humans to orthostatic heat tolerance and natural acclimatization in summer and winter using tilt-table test and bicycle ergometer 12 p2169 A70-27656
- Artificial gravitation parameters for manned compartments of spacecraft, analyzing permissible angular velocity and rotation radius regarding vestibular-vegetative disorders 13 p2503 A70-28471
- Physiological indices criteria for human thermal stress tolerance, discussing rectal temperature, body surface condition, body temperature and local cooling effects 13 p2351 A70-29332
- High intensity noise effects on auditory thresholds, blood pressure and time response to light stimuli, showing permissible levels during space flights 13 p2358 A70-29334
- Permissible radiation exposure levels during prolonged space flights based on clinical data 13 p2351 A70-29336

- Inspired carbon dioxide pressure effects on human response to physical exercise, noting dyspnea and intercostal muscle pain 13 p2360 A70-29949
- Pattern center hypothesis for habituation to centrifugal and linear accelerations in man, investigating aftereffects by nystagmography 14 p2538 A70-30913
- Acceleration training schedules performed with animals and test subjects, assessing schedules effectiveness in increasing tolerances to transverse acceleration 15 p2693 A70-32682
- Orthostatic tolerance in humans increased by lower limb muscles electrostimulation, correlating subjective feelings with heart and pulse rate measurements 15 p2685 A70-32685
- Hypercapnic atmosphere effect on human organisms found tolerable in state of rest or performing light labor 15 p2685 A70-32690
- Antimotion sickness drugs evaluated for effectiveness under standardized stress conditions in slow rotation room 20 p3572 A70-39439
- Temporal and spectra combination effects on aircraft sound judged noisiness, using human subjects in anechoic chamber 20 p3580 A70-39712
- Preliminary physical training for human water immersion resistance improvement 20 p3576 A70-40196
- Atmospheric composition cyclic changes effects on human basal metabolism under hypokinesia 20 p3576 A70-40197
- Hypokinesia and reduced diet effects on human tolerance to static loads, discussing acceleration tolerance prediction 20 p3576 A70-40198
- Acceleration effects on human organisms, describing centrifuge, rocket sleds and catapult simulators 22 p3979 A70-43528
- Low carbon dioxide concentration breathing effects on exercise tolerance, discussing aerobic capacity decrement and hypercapnia occurrence 22 p3973 A70-43637
- Decompression hazards in manned orbiting systems, considering consciousness time, survival, pathological response, water vapor and denitrogenation effects and recompression rates 22 p3973 A70-43638
- Human and animal tolerances to hyperbaric oxygen, discussing response variation, toxicity modification, etc 22 p3976 A70-43701
- Human tolerance and ventilatory response to inspiratory mechanical loads 23 p4144 A70-43822
- Human ventilatory response to resistance unloading during muscular exercise 23 p4144 A70-43823
- Optimum acceleration profile for minimum severity index in injuries sustained by human subject 23 p4150 A70-44376
- Human body heat production and transfer through convection, radiation and evaporation under normal and reduced atmospheric pressure 23 p4154 A70-44654
- Orthostatic stability reduction in experiments with simulated weightlessness, investigating functional compensation mechanisms 23 p4149 A70-45025
- Ear protection for persons exposed to various jet aircraft noise environments 24 p4306 A70-45121
- Head movement role in motion sickness as function of angular velocity, discussing prediction of human tolerance in space station 24 p4297 A70-45341
- Critical supersaturation vs phase equilibration of tissue in computing decompression schedules from depth and exposure time 24 p4301 A70-45983
- Human cardiovascular compensatory responses to environmental cold stress, relating heart stroke to increased oxygen consumption 24 p4302 A70-46103
- HUMAN WASTES**

- Helicopter automatic hybrid navigation system for increased accuracy over unfamiliar terrain and above-human performance, comparing navigating pilot performance with machine 02 p0335 A70-12134
- Error analysis algorithms for reducing computational load in stochastic estimation and control problems in hybrid navigation systems 11 p2025 A70-26208
- Inertial hybrid navigation system optimization, discussing performance curves and numerical filters synthesis and error elimination 13 p2448 A70-28747
- Digital self optimizing distortionless filter for hybrid navigation system 17 p3054 A70-35281
- HYBRID PROPELLANT ROCKET ENGINES**
- SR-1 hybrid propellant engine for sounding rockets, describing design and operating characteristics 13 p2474 A70-28689
- Delta launch vehicle for scientific and application satellites, describing three stage liquid and solid propulsion systems 15 p2810 A70-31783
- Hybrid rocket motor with solid oxidizer in ammonium nitrate additive, determining stable combustion conditions 15 p2790 A70-32274
- Hybrid rocket engine with solid oxidizer, noting applications as apogee or perigee motor 18 p3301 A70-36655
- High and low thrust hybrid rocket propulsion systems involving combinations of chemical, nuclear, thermal and electric propellants for interplanetary flights 21 p3869 A70-42042
- Quasi-hybrid rocket engines with solid propellant and liquid hydrogen injection, discussing performance in comparison with other propellant systems 22 p4089 A70-42498
- HYBRID PROPELLANTS**
- Hybrid propellant combustion mechanisms, connecting surface reactions to melting mechanism and subsequent liquid flow [ONERA-TP-736] 03 p0543 A70-13632
- Fragment fabrication of hybrid propellant solid grain emphasizing spherical shape and diameter uniformity 04 p0737 A70-15673
- Combustion and pyrolysis of carbonaceous solids considered for hybrid rocket fuels, using integrating factors in Caratheodory multiple entropies 06 p1172 A70-17468
- Tri- and bipropellants in spacecraft propulsion, discussing liquid and powder metals, hybrids, frozen tripropellants, etc 15 p2789 A70-32253
- Linear regression rate of spherical solid hybrid fuel grains oxidized in reducing gas flow 15 p2786 A70-32263

HYBRID PROPULSION

Hydrogen peroxide oxidizer for higher characteristic mixture ratio in hybrid propulsion systems with hypergolic reactions ignition [ONERA-TP-773] 02 p0352 A70-12209

Electrocatalysts, electrode structure and design of fuel cells using air at cathode, describing applications to hybrid systems 12 p2166 A70-27765

Energy transfer methods for hybrid air breathing ramjet propulsion systems with rocket motor S gas source [ICAS PAPER 70-61] 23 p4233 A70-44156

HYBRID ROCKET ENGINES

Chemical high energy rocket propellants, discussing metal combustion, hybrid and tribrid engines, combustion chambers, etc 11 p2100 A70-26282

Hybrid rocket engine with solid ammonium perchlorate oxidizer, discussing equilibrium conditions and engine performance 15 p2786 A70-32272

Hybrid rocket engine with solid oxidizer based on ammonium perchlorate and Al, studying performance with FORTRAN 5 program 15 p2787 A70-32273

Hybrid combustion ram rocket drives, discussing booster initial acceleration, exhaust gas use as fuel and payload gain [ICAS PAPER 70-50] 23 p4233 A70-44147

HYDRATES

Methane and ethane hydrate number measurement, alleviating liquid water occlusion and evaluating pressure effect 13 p2362 A70-29212

Thermodynamic stability of methane clathrate hydrate, building up ice grains halo within comets inner coma 14 p2650 A70-31243

HYDRATION

Tropospheric negative small ions formation reaction scheme, considering hydration degree 11 p2046 A70-26390

Hydration and lipid-protein ionic interaction in stearic acid monolayers during conformation of poly-L-lysine films 19 p3373 A70-37840

Space environment husbandry, examining chickens stress response to restraint and parental hydration 24 p4296 A70-45337

HYDRAULIC ACTUATORS

U ACTUATORS

U HYDRAULIC EQUIPMENT

HYDRAULIC ANALOGIES

Steady and unsteady gas dynamics analogies with two dimensional water flow, taking into account energy and continuity equations 17 p3069 A70-35032

Isentropic gas two dimensional unsteady flow through channel contraction, using hydraulic analogy 22 p4012 A70-43438

HYDRAULIC CONTROL

Triple mode control strategy to provide near optimal stable transient response in variably loaded electrohydraulic servomechanisms 02 p0272 A70-12728

Pulse width modulated /PWM/ electrohydraulic servo response characteristics from modulator transfer characteristic determination by Fourier series analysis of PWM signal [ASME PAPER 69-WA/AUT-2] 04 p0625 A70-14831

Static and dynamic characteristics of inertia load driving systems using electrohydraulic pressure and flow control servovalves [ASME PAPER 69-WA/FLCS-15] 04 p0626 A70-14842

Electrical and hydraulic units controlling second antenna at Pleumeur-Bodou space communication center 05 p0819 A70-15984

Hydrostatic synchronized steering of tow tractor for Boeing 747 and wide body jets compared to mechanical system 05 p0829 A70-16421

Fluid controlled solid rocket motors design for Mars mission with acceleration level as parameter, discussing mission specifications, system design and component considerations [AIAA PAPER 69-446] 07 p1365 A70-19707

Book on hydraulic and electrohydraulic mechanisms covering power transmission by fluids under pressure, data for designing and utilizing equipment, etc 09 p1612 A70-22636

Differential equation formulation for pipeline in hydraulic automatic control system considered as lumped or distributed parameter plant 09 p1612 A70-22823

Self contained remote sense remote control pressure regulator using pure fluid amplifiers, controlling large or small flow over wide pressure range 09 p1614 A70-23688

Fluidic logic elements for controlling selected cells extinction in hybrid plasma-fluidic display 09 p1738 A70-23758

Electrohydraulic fast response servosystem design and operation, describing nonlinear model based on component limitations 10 p1807 A70-24578

Pneumatically operated lifting mechanism and fluidic control system added to Izod impact testing machine for automatic impact repetition, counting and stopping 11 p2034 A70-26837

Time optimal control synthesis of fast acting gyrocompass mounted on fixed foundation and with hydraulic damper and torsional suspension of sensor 12 p2233 A70-27564

Electrohydraulic control system dynamics, examining executive component loading at low speeds and nonlinear resistances 13 p2349 A70-29720

Bang-bang control of electrohydraulic servomechanisms, approximating optimal control by quasi-optimal controls 16 p2887 A70-33685

SST electrohydraulic primary and standby brake control systems, discussing design and advantages [AIAA PAPER 70-913] 17 p3024 A70-35825

Three digit hydromechanical step type actuator drives with slide valve assembly for computer data sampling systems 18 p3216 A70-37071

Hydraulic and pneumatic controls construction and use in machine tools 19 p3359 A70-38725

Liquid metal hydraulic servoactuation packages for flight control in high temperature environments without coolant systems 21 p3750 A70-40785

Flow difference sensor for aircraft hydraulic systems damage vulnerability reduction, discussing design, operation and flight tests results 21 p3750 A70-40786

Fluidic controls for propulsion engines, describing optimum fabrication techniques [ASME PAPER 70-FLCS-7] 22 p3964 A70-42420

Fluidics for aircraft high pressure hydraulic systems, discussing circuit breaker, feel computer and landing gear sequencing circuit [SAE PAPER 700784] 24 p4295 A70-45860

HYDRAULIC EQUIPMENT

NT AIRCRAFT HYDRAULIC SYSTEMS

Approximate determination of termination hydraulic servomotors frequency characteristics with four way valves using piecewise straight lines on Bode diagram 01 p0007 A70-10034

Aircraft/aerospace fluid systems flexible hose and rigid tube assemblies fire resistance and test requirements 01 p0011 A70-11459

Quick-disconnect couplings selection guide for aerospace fluid systems, emphasizing functional and weight considerations [SAE-AIR-1047A] 01 p0197 A70-11461

Hydraulic drive mechanism for moving missile tower between launch pad and storage site 02 p0276 A70-12862

Slide and sleeve type servovalves used in Boeing aircraft possessing chip shearing capability of 200 pounds axial force 02 p0229 A70-12863

Cavitating flow in converging channels of hydraulic system, calculating energy distribution at gas-vapor phase using Borda-Carnot theorem 03 p0466 A70-13513

Small three stage hydraulic turbine for aerospace and commercial applications, discussing design and performance 04 p0628 A70-15640

Stability conditions for relief valves assumed to be part of closed hydraulic line simulating receiving part 05 p0797 A70-15899

Hydraulic jacks for Boeing 747 support during assembly, discussing operation, console, pressure system and safety features 05 p0798 A70-16422

Vibration damping of oil hydraulic system using bladder type accumulator composed of rubber, measuring frequency response of shock absorber 06 p0988 A70-17140

Book on hydraulic and electrohydraulic mechanisms covering power transmission by fluids under pressure, data for designing and utilizing equipment, etc 09 p1612 A70-22636

Stability region of hydraulic system containing centrifugal pump calculated from pressure head dependence on pump inlet pressure 09 p1607 A70-23622

Hydraulic regenerative servoamplifier system for electrohydraulic actuator design, discussing specifications and test results 09 p1614 A70-23686

Pressure loss in tubulature of oil-hydraulic drive mechanism, allowing for viscosity changes associated with oil temperature and pressure increases 10 p1809 A70-25209

Hydraulic driving system stick-slip prevention by acceleration and transient velocity feedback compensation techniques 11 p2060 A70-26407

Electrohydraulic vibrators and shakers for testing aircraft systems, diesel engines and structural joints, describing design and operation 11 p2032 A70-26442

Rotodynamic pumps energetic characteristics determination by pneumatic tests, describing air test results for various models 12 p2165 A70-27399

Hydraulic piston-valve-type slave mechanism oscillations with rigid feedback and inertial load at actuated shaft, using harmonic linearization method 12 p2167 A70-28340

Hydraulic seals for fire resistant fluids in hydraulic equipment, describing computerized designs 13 p2416 A70-28610

Hydraulic system pumps ratings, classification and selection 13 p2419 A70-29219

Gear pumps for hydraulic systems, discussing costs, types and applications 14 p2590 A70-30302

Adaptive hydraulic servomechanism control systems synthesis by Liapunov direct method, noting parameter compensation effect on state error reduction 14 p2534 A70-30621

Radial clearance, pressure and piston length and diameter dependence of friction force at rest in piston type hydraulic devices 14 p2534 A70-30872

Liquid metals pump with cylindrical hydraulic coupling for actuating axial wheel, investigating cavitation and pumping effects on performance 14 p2535 A70-31012

Emergency auxiliary electric and/or hydraulic power for commercial and military aircraft using self contained monofueled gas turbine system 16 p2964 A70-33472

Spacecraft hydraulic timers design and qualifications testing, discussing oil selection and temperature dependence 16 p2914 A70-34112

Automatic control system stability, allowing for position and velocity loads and compressibility of fluid in force cylinder of hydraulic actuating mechanism 17 p3024 A70-35367

Dynamic characteristics of hydraulic fatigue testing machines, using hydraulic activation efficiency factor 17 p3064 A70-35718

Supply valve influence on dynamic characteristics of volumetric hydraulic actuator 18 p3215 A70-36126

Lumped parameter pipeline and hydraulic systems stability, deriving equations of motion for closed and open cycle control systems 18 p3216 A70-36946

Nonlinear resistance element with square law I-V characteristics for electrical analogs of hydraulic systems 19 p3359 A70-38707

Prototype synchronizing valves for maintaining identical flow velocities of two hydraulic actuating elements, noting unbalanced hydrodynamic forces and orifices asymmetry effects 20 p3564 A70-39717

Aircraft vertical gyro with hydraulic damping device, calculating ballistic deviations limitation conditions 20 p3632 A70-39733

Hydraulic load loops with random force signal for aircraft structures endurance testing 20 p3593 A70-39913

Hydraulic synchronizers for motors and actuators speed equalization, describing operation and technical specifications 21 p3756 A70-40800

Servo-hydraulic testing machine for measuring cyclic stress-strain behavior of materials subjected to fatigue and creep at elevated temperature 23 p4178 A70-44912

Hydraulic servomechanism stability and step response, considering unequal oil volume on either side of jack 24 p4292 A70-45159

Fluidic logic devices compared with electric relay and hydraulic/pneumatic valve equivalents 24 p4293 A70-45429

Hydraulic and pneumatic components for logic circuits of automatic controls, considering amplifiers, interlocked systems and use of fluidics 24 p4293 A70-45618

High pressure hydraulic fluidic vortex rate sensor feasibility, considering variable geometry sensor design, fabrication and tests [SAE PAPER 700788] 24 p4294 A70-45857

Hydraulic and pneumatic dampers operation, analyzing force components 24 p4427 A70-46380

HYDRAULIC FLUIDS

Purity requirements for oil in hydraulic systems of modern aircraft, discussing filtering devices and Swedish Air Force and SAAB specifications

01 p0130 A70-11359

Hydraulic fluid cleanliness requirements for aircraft systems, filtering, servovalve life, solid particles effects on friction, etc

03 p0414 A70-12999

Ultrasonic testing of hydraulic liquids and aircraft and engine lubricating oils resistance to viscosity decrease, analyzing large molecule compounds disintegration

09 p1693 A70-23405

Pressure loss in tubulature of oil-hydraulic drive mechanism, allowing for viscosity changes associated with oil temperature and pressure increases

10 p1809 A70-25209

Hydraulic seals for fire resistant fluids in hydraulic equipment, describing computerized designs

13 p2416 A70-28610

Proportional and flip-flop elements in hydraulic circuits using oils, noting cavitation effect on switching stability in digital elements

14 p2534 A70-30677

Upstream wear of small metal orifices under large pressure drops in phosphate ester hydraulic fluids due to current driven electrochemical corrosion

[ASME PAPER 70-FE-15] 16 p2919 A70-33629

Hydraulic fluids and lubrication oils resistance to mechanical shear forces by ultrasonic method based on acoustically induced cavitation effects

20 p3655 A70-39718

HYDRAULIC HEATING SOURCES

U HEAT SOURCES

U HYDRAULIC EQUIPMENT

HYDRAULIC JETS

Disintegration of charged distilled water jets, discussing drops size, velocity distribution and instabilities

03 p0467 A70-13781

Core length of water jet from circular tube, considering wall roughness, tube diameter and water viscosity and surface tension

06 p1031 A70-17135

HYDRAULIC PUMPS

U HYDRAULIC EQUIPMENT

U PUMPS

HYDRAULIC SYSTEMS

U HYDRAULIC EQUIPMENT

HYDRAULIC TEST TUNNELS

Interference between body and porous walls of water tunnels by one dimensional solution for usable length of tunnel

07 p1248 A70-19078

Chemical reaction product fluctuations in reacting and nonreacting turbulent wake of sphere in water tunnel detected by injected salts conductimetric titration

[AIAA PAPER 68-686] 23 p4134 A70-44570

HYDRAULIC VALVES

U HYDRAULIC EQUIPMENT

U VALVES

HYDRAULICS

Resistance, capacitance and inductance in passive hydraulic circuits considered in analogy with electric circuits to determine dynamic characteristics

03 p0415 A70-13931

Hydraulic characteristics of flow through miniature slot orifices for rocket engine injectors, observing stability of effluent liquid streams

[AIAA PAPER 70-706] 16 p2891 A70-33566

HYDRAULIC ENGINES

Satellite attitude and orbit control systems based on electrically heated ammonia or hydrazine

09 p1767 A70-23432

ATS-3 hydrazine orbit control system efficiency evaluation statistical method, considering stationkeeping maneuvers

[AIAA PAPER 70-460] 11 p2121 A70-25464

Pressure peaks control in hydrazine propulsion system during static tests by controlling initial hydrazine injection

11 p2101 A70-25691

First pulse vacuum startup measurements of monopropellant hydrazine thrust reactors with sponaneous catalyst, simulating spacecraft control dynamics

14 p2628 A70-30753

Monopropellant hydrazine RCS rocket engine module, discussing operating conditions, development, thermal control and valve internal leakage

[AIAA PAPER 70-654] 16 p2965 A70-33544

Small rocket engines tailoff impulse and tailoff repeatability, comparing monopropellant hydrazine and storable bipropellant engines impulse data

[AIAA PAPER 70-674] 16 p2967 A70-33576

Reentry vehicles fluidically controlled hydrazine rocket engine modules for roll rate control

[AIAA PAPER 70-650] 16 p2970 A70-33617

HYDRAZINE NITRATE

Simultaneous mass spectrometric differential thermal analysis of low pressure decompositions of nitrate salts of monomethylhydrazine and methylamine

20 p3688 A70-40475

HYDRAZINES

NT DIMETHYLHYDRAZINES

NT METHYLHYDRAZINE

Hydrazine monopropellant performance and characteristics, describing various catalysts and propulsion systems

02 p0352 A70-12265

Nonequilibrium initial condition combustion effects on propellant performance for hydrazine/ chlorine pentafluoride and hydrogen/fluorine with equilibrium, kinetic and frozen nozzle flow

[AIAA PAPER 69-469] 04 p0732 A70-15423

Preignition products from hydrazine propellants at simulated high altitude conditions using IR spectrophotometry, mass spectrometry and differential thermal analysis

07 p1358 A70-19579

Turbulent heat and mass diffusion in catalytic reactors for hydrazine decomposition, developing computer program to calculate temperature and reactant concentration distributions

[AIAA PAPER 69-421] 07 p1365 A70-19706

Oxygen-hydrazine interactions on partially immersed metal electrodes, studying conjugated electrochemical reactions

10 p1830 A70-24457

Optimum penetration and separation mixing of unlike doublet injector element with hypergolic hydrazine and nitrogen tetroxide propellants

[JPL-TR-32-1487] 11 p2099 A70-25995

Combustion stability effects of additives on hydrazine/nitrogen tetroxide propellant combination by measuring droplet burning rates

11 p2100 A70-26283

Ethylene-propylene elastomers compatibility with hydrazine determined under ambient conditions from gas evolution rate by catalytic decomposition

13 p2472 A70-28669

Disproportionation to combination ratio of hydrazyl radicals generated in absence of hydrazine direct decomposition

14 p2544 A70-30120

Hydrazine decomposition in low pressure flame, investigating isotopic substitution effect on flame speed

14 p2628 A70-31094

Pressurization system for nitrogen generation based on hydrazine catalytic decomposition, describing metal membrane configuration, fuel additives, etc

[AIAA PAPER 70-682] 16 p2962 A70-33583

Liquid hydrazine decomposition by Shell 405 catalyst, determining gaseous products by gas chromatography and titrimetric analysis

[AIAA PAPER 70-606] 16 p2856 A70-33603

Reactive stream separation high speed color photography for impinging streams of nitrogen tetroxide and hydrazine

[AIAA PAPER 70-608] 16 p2998 A70-33605

Fuel cell development, discussing consumable electrode, hydrogen/oxygen, hydrazine/hydrogen superoxide, hydrazine/air and methanol/air cells

19 p3359 A70-38497

Hydrazine-fuelled battery low power consumption auxiliary system with voltage regulator and gas pumps

22 p3966 A70-43539

Hydrazine-oxygen fuel cell design and operation, discussing efficiency, electrolyte space, etc

22 p3966 A70-43541

Strontium nitride hydrolysis, investigating hydrazine presence among products

23 p4158 A70-44598

HYDRIDES

NT CARBORANE

NT DIBORANE

NT DIHYDRIDES

NT LITHIUM HYDRIDES

NT METAL HYDRIDES

NT PHOSPHINES

NT SILANES

NT ZIRCONIUM HYDRIDES

NH emission systems radiative lifetimes and SiH and SiH transition probabilities measured, noting effects of radiative cascading

05 p0885 A70-16424

SiH molecular absorption lines in solar disk spectrum, determining maximum equivalent widths and oscillator strength

06 p1143 A70-17996

Magnesium hydride absorption lines in sunspot spectrograms indicating heavy Mg enhancement in sun relative to earth

08 p1571 A70-20904

Hydrides precipitation in Ti-Al-Mo-V alloys using transmission electron microscopy, discussing crystal structure, activation energy, hydride-matrix phase interface, etc

08 p1525 A70-21964

Temperature and hydrogen concentration effect on microhardness of polycrystalline beta-vanadium hydride, obtaining photomicrographs of indentations

10 p1906 A70-25227

Hydride segregation in Ti alloy weldments made with unalloyed Ti filler metal, determining effect on mechanical properties

14 p2591 A70-30932

HYDROCARBON POISONING

Titanium hydride deformation assisted nucleation in alpha-beta titanium alloy, showing low strain rate embrittlement and stress corrosion crack propagation in aqueous environments

17 p3116 A70-34395

Ti mechanical properties dependence on grain boundary size and hydride precipitation characteristics, considering transcrystalline and intercrystalline fracture

20 p3652 A70-40179

HYDROACOUSTICS

U UNDERWATER ACOUSTICS

HYDROAEROMECHANICS

U AERODYNAMICS

HYDROBROMIDES

Unbranched chain reaction in hydrogen bromide for studying laminar one dimensional flame propagation, determining temperature dependence, velocity and concentrations at fixed time

06 p1177 A70-17797

HYDROCARBON COMBUSTION

Tetrafluorodibromoethane combustion inhibitor effects on aircraft hydrocarbon fuels flame propagation rate and explosion pressure

01 p0160 A70-11011

Electric field effects on flame structure and propagation rate in methane-air mixture

01 p0217 A70-11013

Premixed methane-oxygen-nitrogen combustion in conical reactor fed by choked sonic flow jet, analyzing reaction products chromatographically

02 p0397 A70-12030

Reaction analysis of acetylene-oxygen flames with known concentrations and temperature profiles, integrating one dimensional flame equations numerically

02 p0251 A70-12035

Noise generation in turbulent premixed flames, turbulent diffusion flames and liquid-spray combustion of hydrocarbon fuels, using optical method

02 p0399 A70-12040

Combustion and flow characteristics associated with direct injection of liquid hydrocarbons into high speed air stream

[AIAA PAPER 70-88] 06 p1182 A70-18198

Methane and propane flames in rotating air flow fields generated by cylindrical rotating wire mesh screen, discussing flame lengths and blowoff velocities

14 p2666 A70-31090

Methane-air inverted flames blowoff at thin stabilization plates of twin slit inverted flame burner, determining critical values of Karlovitz flame stretch factor

14 p2666 A70-31092

Gas phase chemicals synthesis via AC diffuse discharge superimposed on propane-air flame seeded with potassium carbonate in electrically augmented flame burner

14 p2546 A70-31097

Electron temperatures and electron and negative ion concentrations in low pressure hydrocarbon flames

14 p2666 A70-31098

Laminar hexane diffusion flame, investigating distribution of final and intermediate combustion products

22 p4123 A70-42522

HYDROCARBON FUELS

NT GASOLINE

NT JET ENGINE FUELS

Liquefied natural gas or liquefied methane as burning propulsion system for SST, examining storage volume, fuel-tank insulation and implosion danger

03 p0543 A70-12998

Burning constants prediction for suspended hydrocarbon fuel droplets based on modified theoretical equation

03 p0544 A70-13916

Solid tar deposits from hydrocarbon fuels oxidation during prolonged storage

12 p2289 A70-27494

Hydrocarbon fuel components relative reactivities in direct electrochemical oxidation on platinum black/Teflon electrodes in phosphoric acid

12 p2182 A70-27762

Liquid hydrocarbon-air battery with fuel transport operation, considering electrode structure, boiling range, carbon dioxide rejection, etc

12 p2166 A70-27764

Natural gas-air fuel cell battery with sulfuric acid electrolyte for low temperature operation

12 p2166 A70-27766

Atmospheric pressure hydrocarbon-air mixtures confined by thin plastic membrane, obtaining composition range for detonation initiation limits

21 p3865 A70-40884

Computerized calculation of gas turbine cycles thermal efficiency, using hydrocarbon fuel, considering fuel composition and heat of combustion changes

22 p4125 A70-43439

HYDROCARBON POISONING

Acute gasoline poisoning toxicology and prophylaxis, manner of ingestion and effects on organs and systems

08 p1451 A70-20976

HYDROCARBONS

NT ACETYLENE
 NT ALKANES
 NT ALKENES
 NT ANTHRACENE
 NT BENZENE
 NT BUTADIENE
 NT BUTANES
 NT CYCLIC HYDROCARBONS
 NT CYCLOBUTANE
 NT CYCLOPROPANE
 NT DIPHENYL COMPOUNDS
 NT ETHANE
 NT ETHYLENE
 NT HEPTANES
 NT HEXENES
 NT METHANE
 NT METHYLENE
 NT NAPHTHALENE
 NT NEOPENTANE
 NT PARAFFINS
 NT PROPANE
 NT PROPYLENE
 NT TOLUENE
 NT TRIPHENYLS

Hydrocarbon content of coorongite derived from algae analyzed by IR spectrometry, gas chromatography and mass spectrometry, discussing alkanes and alkenes occurrence

01 p0041 A70-10037

Hydrocarbon contents of two sediments from Scottish Carboniferous Formation, examining isoprenoid alkanes abiogenesis

01 p0041 A70-10038

Electron mobility in single component aromatic hydrocarbons, considering crystals structures and electrical properties, energy dissipation and fluctuation, etc

01 p0158 A70-10517

Hydrocarbon fraction examination of *Botryococcus braunii* growing in natural environment, discussing unsaturated isomeric hydrocarbons

02 p0249 A70-11679

CH and CD molecules UV absorption spectra, using flash photolysis of diazomethane

02 p0341 A70-11795

Hydrocarbons and fatty acids distribution in living organisms, fossils, sediments and crude oils, discussing slow thermal maturation role and geological applications

02 p0252 A70-12520

Hydrocarbon distribution of various algae and bacteria, discussing hydrocarbons diagenesis and biological transformations in sediments

06 p0997 A70-18401

Ozone formation in presence of nitrogen oxides and hydrocarbons during long wave UV irradiation, noting energy yield

09 p1629 A70-22328

CH, CD and CH ion excited states decay rates determined from phase shift and frequency data, discussing implications for astrophysics

09 p1731 A70-22513

Carbonaceous chondrites composition by gas chromatography for light hydrocarbons and carbon, discussing origin of organic matter

10 p1949 A70-25327

Hydrocarbon assimilating bacteria cultures selection, considering highest specific growth rate and maximum productivity

11 p1991 A70-25939

Early Precambrian chert porosity and permeability, investigating hydrocarbon content origin

13 p2400 A70-29863

Thermal product distributions and energy dependencies of ion-molecule reactions in allene and propyne, using ion cyclotron resonance

16 p2856 A70-33651

Hydrocarbon gas detection using He-Ne laser radiation absorption, discussing detector electronics

17 p3107 A70-35520

Precambrian cherts hydrocarbon and fatty acid concentrations and C and S stable isotope ratios, discussing biological evolution rate

18 p3244 A70-35969

Tetrafluorodibromo-ethane and bromethyl inhibiting effects on explosion development in constant volume container and flame expansion rates in hydrogen-air mixtures

18 p3345 A70-36241

Solid propellant binders of saturated aliphatic hydrocarbons, describing microstructure, performance contribution, etc

21 p3865 A70-42143

Saturated hydrocarbon prepolymers for solid propellant elastomeric binders

21 p3865 A70-42144

Abiotic synthesis of meteoritic aliphatic hydrocarbons produced by open flow Fischer-Tropsch processes for hydrogen and Co interactions

24 p4402 A70-45377

HYDROCHLORIC ACID

UV absorption cross sections of CO, HCl and ICN, analyzing reactions causing various spectral features

08 p1455 A70-21340

Criticism and reply to Venus cloud water drop HCl concentration preventing ice cloud formation

11 p2108 A70-25653

CW HCl chemical laser action via chlorine atoms reaction with hydrogen iodide in fast flowing mixing device

19 p3444 A70-37542

Ca ion reversible effects of hydrochloric acid and ammonia water on betacyanin leakage from beetroot sections

19 p3365 A70-38375

Hydrogen chloride self broadened fundamental vibration rotation band intensity variation with pressure investigated by absorption spectroscopy analysis

22 p3983 A70-42945

HYDROCHLORIDES

Fugacities of hCl and HF compared with abundance in volcanic fumarolic emanations, indicating magma undersaturation

20 p3619 A70-39321

HYDROCYANIC ACID

U HYDROGEN CYANIDES

HYDRODYNAMIC EQUATIONS

NT HELMHOLTZ VORTICITY EQUATION

Hydrodynamics, mass and energy transfer equations for moderately dense gases multicomponent mixtures, using Bogoliubov theory

01 p1146 A70-10129

Finite difference schemes compared for numerical weather prediction by application to shallow water equations on hemisphere, noting mesh spacing

01 p0135 A70-11064

Protostars rapid contraction and flare up evolutionary phases, solving hydrodynamic equations of motion

01 p0190 A70-11344

Hydrodynamic equations and Grad transport coefficients for nonequilibrium rarefied monatomic gases developed for molecular collisions

01 p0068 A70-11567

Hydrodynamic approximation to interplanetary gas motion influenced by solar flare caused perturbations

01 p0192 A70-11586

Equations of hydrodynamics governing perfect fluid in second postNewtonian approximation to general relativity, deriving energy momentum tensor equation

02 p0337 A70-11776

Static thermosphere model using hydrodynamic equations, assuming uniform temperature and non-existent Coriolis forces, viscous stresses, horizontal velocity vector and thermal fluxes

02 p0327 A70-12384

Diffusive transport term in hydrodynamic equations describing flow over strongly ablating entry objects, discussing charge separation and pressure diffusion

03 p0405 A70-12926

Linearized steady state hydrodynamic equations describing solar wind meridional motions used for studying zonal pressure perturbations

03 p0558 A70-13599

Boundary value problems for partial differential equations representing steady gas flow hydrodynamic problems

03 p0469 A70-14228

Hydrothermodynamic equations used in forecasting meteorological components solved by assuming equations of motion quasi-linear and reducing to ordinary differential equations

05 p0878 A70-16195

Hydrodynamic coefficients of algebraic equations for boundary value problems in disturbed motion of body with rib-reinforced liquid filled cavity

05 p0836 A70-16956

Linearized MHD equations for motion of solids in viscous and electrically conducting fluids

06 p1120 A70-17532

Primitive and balance hydrodynamics equations of meteorological fields noting computational viscosity

06 p1097 A70-17826

Short term weather forecast hydrodynamic equations reduced to solving nonlinear differential equations by introducing dependent variables

07 p1329 A70-19647

Interstellar gas clouds collapse using finite difference numerical methods in solving hydrodynamic equations involving gravitation

07 p1390 A70-20288

Prognostic maps of geopotential and wind in middle troposphere derived from hydrodynamic equations

07 p1330 A70-20307

Surface oscillations of plasma in external HF field derived from hydrodynamics and Maxwell equations

07 p1355 A70-20367

Hydrodynamics, mass and energy transfer equations for moderately dense gases multicomponent mixtures using Bogoliubov theory

08 p1548 A70-21405

Orr-Sommerfeld equation of hydrodynamic stability theory solved for incompressible two dimensional boundary layer flow on basis of reduction to integral equation

10 p1867 A70-24161

Hydrodynamic lubrication theory two dimensional problem, comparing numerical methods for elliptical nonlinear differential equations

10 p1893 A70-24164

Hydrodynamic equations for ions and electrons of ionized collisional plasma in inhomogeneous magnetic field based on Boltzmann kinetic equations

11 p2088 A70-25710

Stellar hydrodynamic equations for thin disk galaxy derived from collisionless Boltzmann equation moments

11 p2117 A70-26688

General relativistic hydrodynamics near equilibrium, discussing velocity and kinetic energy increase spherically symmetric large masses as function of radius change

12 p2300 A70-27392

Pressure field equation derivation for hydrodynamic journal bearing in superlaminar regime, using turbulent Couette and screw flow friction correlations

13 p2418 A70-28742

Convection effects in mantle on earth gravitational field using hydrodynamic model

13 p2488 A70-28764

Hydrodynamic equations to obtain transformation coefficient for HF weakly damped waves in magnetoactive plasma, applying to solar corona

13 p2463 A70-29227

Comparative sets of higher order adiabatic motion equations for plasmas in electric and magnetic fields with slow variations

14 p2624 A70-31043

Atmospheric cellular convection, reducing hydrodynamic equations to amplitude equations for vertical velocity

15 p2770 A70-32064

Redundant variable errors in weather prediction, specifying initial conditions for time integration of hydrothermodynamic equations for atmospheric motion

15 p2771 A70-32368

Stationary hydrodynamic equations of gas channel and nozzle flow with inlet tangential discontinuities

16 p2833 A70-33247

Post-Newtonian equations of hydrodynamics and radiation reaction in general relativity

17 p3156 A70-34828

Lagrangian invariants of inviscid compressible fluid dynamics applied to hydrodynamic equations

17 p3070 A70-35333

Gasdynamic equations in Euler variables, constructing completely conservative difference schemes with first and second orders of approximation

18 p3241 A70-36288

Acoustic turbulence spectrum in compressible fluid with potential motion, using complex traveling wave amplitudes in hydrodynamic equations

18 p3242 A70-36637

Complementary variational principles applied to free oscillations of incompressible fluid in container, using linearized hydrodynamic equations

21 p3807 A70-41323

Ion sound system one dimensional hydrodynamic equations, examining formation and interaction of nonlinear ion acoustic shock waves

21 p3857 A70-41384

Nonlinear properties of first order differential equations for axisymmetric velocity vector fields of ideal incompressible fluid, using nonlinear singular integral equation

23 p4181 A70-44343

Two point hydrodynamic equation for molecular fluctuations divergent growth in classical shear flow via B-B-G-K-Y procedure and double series moment expansion

24 p4382 A70-46254

HYDRODYNAMIC STABILITY

U FLOW STABILITY

HYDRODYNAMIC TUNNELS

U PLASMA JET WIND TUNNELS

HYDRODYNAMICS

NT ELASTOHYDRODYNAMICS

NT ELECTROHYDRODYNAMICS

NT MAGNETOHYDRODYNAMICS

Hydrodynamic explanation of upper atmosphere perturbation effects on tropospheric circulation, discussing experiments for solar activity effects on atmospheric dynamics

01 p0073 A70-10582

Gas ignition and burning processes calculation with allowance for hydrodynamics, discussing time saving finite difference solution of differential equations system

01 p0218 A70-11020

Organic liquid nucleate pool boiling experiments determining stresses, surface tension, viscosity and gravitation relationships to bubble shape and microlayer formation

01 p0218 A70-11180

Characteristics of dynamic mechanical systems including solid state and hydrodynamic analogs of ideal incompressible fluids, based on statistical theory of turbulence

01 p0068 A70-11594

Dynamics of turbulent motion of incompressible viscous fluid particles, using Lagrangian functions

01 p0068 A70-11603

Leakage in mechanical face seals with hydrodynamic films, noting misaligned seal theories for pumping with cavities and two fluids
[ASLE FICFS PREPRINT 19] 02 p0308 A70-12170

Hydrodynamic turbulent boundary layer on smooth wall, using finite difference theory
02 p0285 A70-12351

Dynamic electric field in solar coronal exosphere on basis of kinetic and hydrodynamic theories, giving estimate of solar wind
02 p0359 A70-12609

Star rotation and meridional circulation hydrodynamic theory, considering magnetic fields and internal friction
03 p0564 A70-13228

Hydromagnetic forces effects on tidal period hydrodynamic waves, explaining ionospheric tidal motion behavior
03 p0478 A70-13995

Polarohydrodynamics method applied to electrochemical kinetics of electrode cathodic or anodic current by coupling surface reaction with mass transfer
03 p0534 A70-14268

Weather prediction technique based on hydrodynamical equations, outlining atmospheric circulation models
[AAS PAPER 69-619] 04 p0714 A70-14646

Optimum one dimensional Rayleigh gas slider bearing, calculating step location, pressure and load capacity for range of bearing numbers
[ASME PAPER 69-WA/LUB-1] 04 p0698 A70-14772

Hydrodynamic theory of elastic-viscous liquid lubrication for journal bearings, assuming stress-strain relationship with unequal cross stresses
05 p0855 A70-16509

Hydrodynamic model of blood coagulation in stagnation point flow, analyzing platelet diffusion, white cell bonding stress and thrombus formation
[AIAA PAPER 70-143] 06 p1003 A70-18123

Temperature fields and hydrodynamics in laminar flow of vertical liquid layers during free convection
07 p1422 A70-19655

Lagrangian tensor formalism for hydrodynamic stretching of material line and surface elements under statistically isotropic incompressible turbulence
07 p1260 A70-19979

Plasma flow structure near frontal point in earth magnetosphere, using quasi-hydrodynamic two dimensional model to obtain power series solution
07 p1391 A70-20419

Direct and inverse problems of hydrodynamics of supercavitating lattices with leading and trailing edge caverns extending over upper surface of profile
08 p1482 A70-20534

Hydrodynamic sealing action resulting from helical grooving machined into shaft or lip of radial seal, describing pressure gradients role
08 p1507 A70-21268

Boltzmann systems dynamics, discussing excitation spectrum, momentum relaxation time, particle diffusion trajectory, macroscopic theory of quasi-collective processes, hydrodynamics, etc
08 p1545 A70-21421

Star rotation and meridional circulation hydrodynamic theory, considering magnetic fields and internal friction
08 p1580 A70-21661

Supernovae hydrodynamics, discussing early light curves energy requirements and shock wave dynamics in terms of neutrino diffusion
09 p1749 A70-21992

Hydrodynamic processes during focusing of monopulse ruby laser emission into water, determining photohydrodynamic coefficient
09 p1694 A70-22111

Vortex and potential motions interactions in relativistic hydrodynamics, studying mutual generation
09 p1754 A70-22460

Vortex and potential motions interactions in relativistic hydrodynamics, noting effects of gravitation equations nonlinearity
09 p1754 A70-22461

Hydrodynamic stability criterion of isolating incompressible fluids subjected to unipolar space charge injection
09 p1737 A70-23311

Hydrodynamic energy flow down horizontal tunnel from nuclear explosive detonated underground, recording shock front luminosity and time of arrival
10 p1857 A70-23985

Momentum-energy tensor and angular momentum for hydrodynamic and electrodynamic fields determined in transformations of m-parametric Lie group
10 p1922 A70-24098

Optimization in epihydrostatics and epihydrodynamics, discussing liquid in rectangular tank, electro-magneto-epi hydrodynamics and thermal instability
10 p1866 A70-24108

Cascade theory of turbulence, applying cascade decomposition resulting from Navier-Stokes applica-

tion to hydrodynamic turbulence to Riemann equation for atmospheric and plasma turbulence
10 p1868 A70-24167

Hydrodynamic analogy in restricted three body problem of celestial mechanics, discussing mass and momentum conservation and physical properties uniqueness
10 p1938 A70-24180

Viscous fluid dynamics for reducing hydrodynamic resistance, discussing aquatic animals speeds, vortex flows, etc
10 p1871 A70-25193

Optimal efficiency of axial turbomachines limit loading of blade root and hydrodynamical criteria
11 p1975 A70-25791

Shock wave formation and propagation analyzed by hydrodynamic model of two directional traffic flow based on continuity equations and velocity-density empirical relations
12 p2212 A70-28196

Hydrodynamic entrance length in channels and tubes of varying cross section with arbitrary initial velocity profile
[DFVLR-SONDDR-39] 12 p2212 A70-28210

Thermohydrodynamic seals design, properties and performance compared with standard mechanical seals
13 p2417 A70-28612

Hydrodynamically lubricated rectangular taper-land bearing pads, analyzing geometry, viscosity, load capacity, friction and operating temperature conditions
13 p2418 A70-28740

Discontinuous hydrodynamic flows derived for stability condition using three dimensional second-order difference schemes
13 p2441 A70-29099

Axisymmetric bodies slow rotation or rotary oscillation in hydrodynamics and MHD using boundary value problems solutions
14 p2527 A70-30276

Low amplitude waves and substantial frequencies interaction by averaging method for hydrodynamics of waves in collisionless plasmas
15 p2720 A70-32114

Trail formation due to tidal effect in interacting galaxies during close approaches, considering mass flow hydrodynamics
15 p2801 A70-32481

Hydrogen oxygen rocket engine two phase liquid hydrogen pump capability and hydrodynamic design, analyzing constant-quality flow, acoustic effects, compressible flow and cavitation
[AIAA PAPER 69-549] 15 p2791 A70-32511

Hypervelocity impact theory, discussing Euler hydrodynamic codes, projectile cratering dimensional analysis, self similar solutions, etc
15 p2823 A70-32785

Andromeda Galaxy M31 hydrodynamic model based on given mass distribution, determining kinematic functions
15 p2808 A70-32884

Soviet book on hydrodynamics of flows with free boundaries, covering fluids penetration by solid body, hydrofoil motion, cavitation flow, etc
16 p2890 A70-32912

Hydrodynamic internal streamline flow analysis for turboprop inducer blades under cavitating and non-cavitating conditions
[AIAA PAPER 70-629] 16 p2964 A70-33528

Liquid or solid Leidenfrost film boiling on saturated cryogenic liquid surface, discussing hydrodynamic model similar to propellant spillage accidents
17 p3194 A70-34744

Hydrodynamic entry length for laminar flow between parallel porous plates, using finite difference theory for flow equations
17 p3069 A70-34983

Hydrodynamic flow stability, formulating localization properties for short wave perturbation
17 p3073 A70-35735

Hydrodynamic model analogy to water bag/incompressible homogeneous fluid in phase space/, investigating nonlinear collisionless plasma oscillations
19 p3474 A70-37365

Optimum one dimensional Rayleigh gas slider bearing, calculating step location, pressure and load capacity for range of bearing numbers
[ASME PAPER 69-WA/LUB-1] 19 p3436 A70-37617

Eringen theory of micropolar fluids for hydrodynamic turbulence
19 p3404 A70-37783

Solar atmospheric hydrodynamic response to stationary random forces homogeneous over horizontal planes, discussing common energy argument, various models and photospheric oscillation
19 p3523 A70-38690

Two dimensional detonations structure by nonlinear theory for systems with hydrodynamically unstable steady state solutions, imposing periodic boundary conditions
20 p3609 A70-39658

Boundary conditions on vector and scalar potentials in viscous three dimensional hydrodynamics, investigating compressible flow problems
20 p3612 A70-40115

Unsteady convective heat transfer and hydrodynamics of laminar and turbulent channel flows
21 p3808 A70-41374

Turbulent hydrodynamic and thermal boundary layer development in internally heated annulus
[ASME PAPER 70-HT-9] 22 p4008 A70-42438

Shock wave formation and propagation analyzed by hydrodynamic model of two directional traffic flow based on continuity equations and velocity-density empirical relations
22 p4012 A70-43321

Newtonian hydrodynamic analogies for homogeneous anisotropic models in general relativity
22 p4075 A70-43472

Trail formation due to tidal effect in interacting galaxies during close approaches, considering mass flow hydrodynamics
23 p4240 A70-43906

HYDROELASTICITY
Hydroelastic sloshing of liquid in partially filled circular cylinder with rigid or elastic walls, including surface tension effect
04 p0671 A70-15092

Hydroelastic oscillations natural frequencies in incompressible and nonviscous liquid in circular cylinder with free surface, demonstrating wall elasticity effects
13 p2512 A70-28832

HYDROFLUORIC ACID
HF molecular vibration rotation band observed in sunspot spectra, carrying out model calculations for spots differing in temperature for fluorine abundance
04 p0751 A70-15048

Hydrogen fluoride fundamental vibration rotation band spectral line shift and broadening due to carbon dioxide
07 p1337 A70-19365

Fugacities of HCl and HF compared with abundance in volcanic fumarolic emanations, indicating magma undersaturation
20 p3619 A70-39321

HYDROFOIL BOATS
U HYDROFOIL CRAFT
HYDROFOIL CRAFT
Hydrofoil and hovering craft design by fiber technology, discussing composite materials, whisker mechanical properties, polycrystalline fibers, matrix materials, etc
19 p3456 A70-38941

HYDROFOIL OSCILLATIONS
Unsteady hydrodynamic coefficients of supercavitating hydrofoil in harmonic oscillation in Helmholtz flow with free surface, investigating frequency, angle of attack and submergence depth
07 p1255 A70-19134

Hydrodynamic forces by oscillating foils in ideal incompressible fluid turbulent flow with stream separation
13 p2390 A70-29649

HYDROFOILS
Sweep angle relationship to cavitation inception on hydrofoils and to hydrofoil performance deterioration due to cavitation
06 p1032 A70-17211

Off-design performance characteristics of supercavitating hydrofoils in cascade for various arrangements, flap angles and flap chord ratios
[ASME PAPER 70-FE-24] 16 p2892 A70-33633

HYDROFORMING
Molybdenum disulfide and phenol formaldehyde resin lubricants for hydroextrusion of steel
15 p2743 A70-31639

HYDROGEN
NT DEUTERIUM
NT DEUTERIUM PLASMA
NT HYDROGEN ATOMS
NT HYDROGEN IONS
NT HYDROGEN ISOTOPES
NT HYDROGEN PLASMA
NT LIQUID HYDROGEN
NT ORTHO HYDROGEN
NT PARA HYDROGEN
NT TRITIUM
Multistate impact parameter treatment of hydrogen-helium excitation collisions, considering distortion, back- and rotational-coupling and virtual transition sequence
01 p0147 A70-10285

Semiempirical potential energy surface generation for triatomic hydrogen from London equation by evaluating Coulomb and exchange integrals taking into account effective orbital overlap
01 p0147 A70-10469

Interstellar neutral hydrogen flux effects on atmospheric hydrogen density, considering annual and semiannual density variations
01 p0186 A70-11207

Galactic satellite interpretation for high velocity hydrogen clouds at high latitudes
02 p0363 A70-11780

Cosmic ray primaries and secondaries direct heating of thermal electrons for computation of H I regions electron densities and temperatures

02 p0363 A70-11782

Diffuse soft X ray photoionization and heating of H I regions compared to cosmic ray heating

02 p0364 A70-11784

Hydrogen pressure-induced IR absorption spectra, noting applications to planetary atmosphere studies

02 p0341 A70-11805

Mutual diffusion coefficient of hydrogen atoms and molecules in upper atmospheres of major planets calculated as function of temperature, using Chapman-Enskog theory

02 p0342 A70-11817

Differential elastic and rotational excitation cross sections for electron-hydrogen scattering in close coupling approximation with electron exchange neglected

02 p0342 A70-11880

Chemical additives effect on H-Cl-N mixtures burning velocity in air and nitrogen

02 p0398 A70-12031

Volumetric reaction rates and mass transport coefficients as function of position for ducted two dimensional turbulent hydrogen-air diffusion flame

02 p0398 A70-12036

Molecular hydrogen Lyman bands radiative transition probabilities, using electronic dipole moment functions

02 p0344 A70-12659

Nb-Mo alloys in various proportions prepared by vacuum casting, showing embrittlement under hydrogen atmosphere

02 p0318 A70-12671

Physiological equivalents of air with rare gases and H substitutes for nitrogen in inhaled gas mixtures providing normal oxygen intake

02 p0249 A70-12798

Free-bound and free-free continuous emission of hydrogen near Balmer jump in T Tauri star AS209

03 p0566 A70-13315

Galactic bending dynamics, discussing omega and zeta motions coupling of neutral hydrogen in outer region

03 p0570 A70-13553

Molecular hydrogen destruction by reaction with carbon dioxide ion in Martian ionosphere, discussing conversion into atomic hydrogen

03 p0575 A70-13997

Protogalaxy formation and molecular processes in primeval hydrogen gas, discussing cold gas cloud cooling mechanism and contraction

03 p0577 A70-14153

Slow electrons elastic scattering by diatomic hydrogen molecule, analyzing cross sections in two center prolate spheroidal coordinates emphasizing polarization effect

03 p0528 A70-14179

Ar plasma interaction with concentric cool hydrogen sheath for simulation study for gaseous core nuclear space propulsion system

03 p0536 A70-14375

Molecular and solid hydrogen in dense interstellar clouds suggested from underabundance of neutral atomic hydrogen, discussing grain temperature

04 p0747 A70-14585

L-alpha absorption equivalent width measurements in UV spectra of beta-one, delta and pi Scorpii for interstellar hydrogen densities

04 p0748 A70-14586

Pressure-volume-temperature measurements on H, calculating fugacity coefficients

04 p0719 A70-15057

Solar Lyman-alpha radiation observed by OGO 4 spacecraft showing short term fluctuations superposed with monthly variation

04 p0741 A70-15128

Tensile tests on alpha Ti containing oxygen and hydrogen at various temperatures and strain rates to determine deformation and fracture

04 p0706 A70-15133

Hydrogen diffusion in pure Ti and beta Ti alloy VT15, determining diffusion coefficient for various temperatures

04 p0707 A70-15190

Hydrogen embrittlement as delayed rupture origin in high strength steels

04 p0711 A70-15682

Limits of self ignition in reaction of F with H detected photoelectrically

05 p0956 A70-16156

Ti-hydrogen reaction at ambient temperatures, investigating factors favoring reaction and preventive measures

05 p0863 A70-16524

Density wave theory and Schmidt model applied to Milky Way spiral structure, considering systematic motion of interstellar neutral hydrogen

05 p0918 A70-16928

Heat transfer to hydrogen calculated with reference to design of cooled rocket nozzles and combustion chambers

06 p1174 A70-17677

Viscosity, thermal conductivity, specific heat and Prandtl number of hydrogen, methane and hydrogen-methane mixtures calculated for variation with temperature neglecting dissociation effects

06 p1177 A70-17700

H I gas and H II regions kinematics, comparing radial velocities near galactic center

06 p1149 A70-18459

Hydrogen concentration effect on self sustained detonation wave propagation in hydrogen-carbon monoxide-oxygen mixtures, using Q switched pulsed laser schlieren photography

07 p1420 A70-18918

Pressure-narrowing theory applied to calculating equivalent widths of lines in quadrupole rotation-vibration spectrum of molecular hydrogen

07 p1338 A70-19366

Dissociating hydrogen transport coefficients analysis compared with data calculated as function of temperature and pressure without allowance for ionization

07 p1338 A70-19654

Hydrogen effects on ELI Ti-Al-Sn alloy, conducting tensile, fretting and abrasion tests on stressed and thermal cycled specimens

07 p1309 A70-19710

Atomic F reaction with hydrogen studied for vibrational, rotational and translational energy distribution, using IR chemiluminescence method

07 p1225 A70-20055

Hydrogen triatomic molecules existence, stability and ionization in molecular beams

07 p1345 A70-20139

Jupiter conductive molten metallic hydrogen core of moderate temperature suggested from solids melting point temperature dependence on pressure

07 p1390 A70-20238

Population of P level He excitation in solar prominences in H luminescence regions, noting ionization-recombination mechanism by UV radiation

08 p1564 A70-20555

Hydrogen supply rate by solar wind found comparable to hydrogen losses from earth by diffusion into space

08 p1487 A70-20637

Hydrogen penetrability in heat resistant steels subjected to high temperature creep, observing activation energy decrease with increased stress

08 p1515 A70-20923

Zero radiospectrometer for spectral observations of radio emission of excited galactic hydrogen at centimeter wavelength, noting Omega nebula detection

08 p1495 A70-21063

Intensity and altitude profile of H beta light emission and energetic hydrogen fluxes during auroral breakup using rocket soundings

08 p1489 A70-21383

Interplanetary density distribution of cold interstellar origin hydrogen dependent on solar EUV flux, considering interaction with solar wind protons

08 p1562 A70-21401

Iron base and nickel base alloys susceptibilities to internal hydrogen and hydrogen environment embrittlements, studying crack initiation inside and at metal surface

08 p1520 A70-21515

Phase comparisons between commercial cesium beam frequency standards and NASA experimental hydrogen maser NX-1

08 p1513 A70-21592

Ionization of rare gases /H and N/ by nitrogen ions, determining cross sections of formation of slow ions and electrons

08 p1549 A70-21801

Austenitic stainless steel hydrogen damage noting role of martensitic plastic deformation

08 p1525 A70-21965

Sigma Orionis E hydrogen-deficient atmosphere, using grid of constant-flux model atmospheres to determine abundances of five elements

09 p1755 A70-22504

Ti tetrachloride, Si tetrachloride and hydrogen gas mixtures flow over heated graphite substrates, describing Ti silicides formation

09 p1703 A70-22646

Molecular hydrogen parallel and perpendicular dynamic polarizabilities calculated for frequency dependence, using many body perturbation theory

09 p1731 A70-22780

Equivalent widths for rotational lines to detect interstellar hydrogen gas, discussing absorption line

10 p1937 A70-23947

Gas cloud expulsion from galactic nucleus indicated in 21 cm survey of neutral hydrogen

10 p1937 A70-23948

Quasi-bound levels determination method for molecular hydrogen ground state

10 p1919 A70-24395

Electrocatalytic activity of oxides in redox reactions without adsorption, noting application to hydrogen oxidation in acid medium

10 p1831 A70-24470

Quasars photoionization of intergalactic high density hydrogen gas to interpret absorption features absence, noting gas temperature

10 p1942 A70-24628

Enthalpy-entropy, enthalpy-pressure and composition diagrams of fluorine-hydrogen system, noting possible applications to rocket propulsion systems

10 p1929 A70-25100

Deuterium atom reaction with hydrogen molecule yielding HD and H using modulated crossed beams, plotting angular distributions and reaction velocities

10 p1920 A70-25148

Hydrogen, oxygen and carbon dioxide in off-gas stream from nuclear reactor experiment using on-line gas chromatography

11 p1994 A70-25615

CW chemical laser performance using molecular hydrogen diffused into supersonic fluorine atoms streams

11 p2063 A70-26067

Hydrogen-air turbulent diffusion flame structure at differing air and hydrogen velocities

11 p2151 A70-26387

Atmospheric hydrogen content continuous recording method based on absorption line analysis of mercury vapor from mercuric oxide reduction

11 p2052 A70-26389

Hydrogen-air reaction by singular perturbation methods for temperature and pressure values of supersonic combustion, changing reaction velocity by initial stoichiometry

11 p1995 A70-26624

Field ionization from hydrogen layers adsorbed at 4.2 K on W emitters in sealed-off tubes

12 p2274 A70-26858

PdH system electrical resistivity, studying hydrogen concentration role

12 p2282 A70-26900

Lyman alpha intensity and hydrogen concentration at 5 to 19 earth radii determined from OGO 3 spacecraft measurements

12 p2222 A70-27181

Absorption at solar H Lyman alpha line by earth hydrogen atmosphere measured as function of altitude from Aerobee flight spectrograms

12 p2222 A70-27182

Oxygen and hydrogen diffusion coefficients in aqueous potassium hydroxide electrolyte solutions at various temperatures and concentrations

12 p2181 A70-27575

Rotation law and circulation velocities in solar hydrogen convection zone under anisotropic turbulent velocity

12 p2302 A70-27588

Porous hydrogen electrode performance with Ni skeleton catalyst, studying effects of temperature, active layer thickness, etc

12 p2182 A70-27759

Laser emission generation on sodium lines, studying pulsed discharge mechanism involving ion-ion recombination in sodium vapor and hydrogen mixture

13 p2425 A70-28600

Cavity and storage temperature effects on hydrogen maser oscillation in 77-293 K range

13 p2425 A70-28713

Interstellar hydrogen density around solar system from calibrated Lyman-alpha intensity measurements of Vela 7

13 p2489 A70-28894

Predissociation of excited molecules in molecular hydrogen and deuterium by electric field as linear function of field strength

13 p2362 A70-29479

Charge, hydrogen atom and ion transfer in collisions involving deuterium-labeled methanol- acetaldehyde system and molecular ions

14 p2543 A70-30110

Elastic scattering of electrons by hydrogen as function of vibrational excitation, discussing intensities and cross sections

14 p2618 A70-30114

Differential cross sections for electron scattering by hydrogen with and without vibrational excitation, discussing inelastic processes

14 p2618 A70-30115

H and He intraatmospheric migration and dissipation, considering MHD waves, ionospheric plasma motions, chemical reactions, etc

14 p2569 A70-30211

Plasma production by irradiating solid hydrogen foils with intense pulse ruby laser

14 p2622 A70-30659

Neptune data from photoelectric observations of 7 April 1968 occultation of BD-17 deg 4388, determining hydrogen dominance and molecular density

14 p2642 A70-30890

Hydrogen abundance in Jupiter atmosphere quadrupole line used in comparing jupiter and solar atmosphere C/H ratios

14 p2650 A70-31221

Metal to hydrogen ratio for sun, Hyades and F-G stars based on photoelectric measurements of weak metal lines

14 p2652 A70-31388

Hydrogen embrittlement of martensitic Fe-Ni alloys as function of temperature via slow strain rate tensile tests

15 p2755 A70-31559

- Titanium vacuum pump, discussing pumping speed, sticking factor and sorption coefficient for hydrogen 15 p2744 A70-31845
- Molecular hydrogen, methane, water vapor and tritium concentrations near stratopause from air samples collected on Aerobee flight with liquid hydrogen cooled cryocondenser 15 p2728 A70-31995
- Hydrogen effect on impurity redistribution in heteroepitaxial Si layers on sapphire substrate 15 p2785 A70-32529
- Dissociating hydrogen transport coefficients analysis comparison with data calculation as function of temperature and pressure without allowance for ionization 15 p2828 A70-32691
- Population of P level He excitation in solar prominences in H luminescence regions, noting ionization-recombination mechanism by UV radiation 15 p2805 A70-32710
- Hydrogen solubility in electrically exploded metals 15 p2762 A70-32747
- Hydrogen separation from supersaturated solid solution in Zn-Zr alloy, measuring at room temperature with eudiometer 15 p2764 A70-32856
- Photodissociation and fluorescence cross sections for hydrogen by Lyman-alpha photons emission from collisional quenching 16 p2953 A70-33006
- Pressure broadened line widths in electric field induced fundamental hydrogen spectral band, noting linear variation with density 16 p2954 A70-33276
- Waste hydrogen utilization in microthrusters for spacecraft attitude control involving mass expulsion of cold gas [AIAA PAPER 70-613] 16 p2969 A70-33609
- Nuclear rocket nozzle cooling passages, discussing heat transfer and friction correlations for single-phase hydrogen turbulent flow [AIAA PAPER 70-661] 16 p2950 A70-33622
- Real hydrogen driver performance, analyzing intermolecular forces effects under high compression and heat 16 p2998 A70-33889
- Alpha Ti and alpha Ti-hydrogen alloys fatigue behavior, emphasizing twin formation influence and hydrogen effects 17 p3116 A70-34394
- Alpha Ti-hydrogen alloys, discussing fracture behavior temperature dependence 17 p3117 A70-34396
- Hydrogen embrittlement of Ti and Ti alloys under plastic deformation and critical hydrogen concentration 17 p3117 A70-34397
- Interstellar Lyman alpha observations with OAO, providing upper limit to neutral hydrogen column density 17 p3162 A70-34899
- Lyman alpha radiation from gaseous hydrogen nebula model, taking into account absorption by dust and interstellar neutral hydrogen 17 p3163 A70-34904
- Hydrogen abundance in white dwarfs, discussing inconsistencies in mass and bolometric magnitude models for Sirius and Eri B 17 p3170 A70-35389
- High velocity neutral hydrogen cloud observations, presenting tabulated characteristics and maps 17 p3170 A70-35439
- OGO-4 observations of hydrogen Lyman-alpha airglow surrounding earth, measuring dependence on solar zenith angle 17 p3080 A70-35764
- Transformation induced plasticity /TRIP/ high strength steels resistance to hydrogen embrittlement 18 p3273 A70-36047
- Chemical composition selection for Ti alloys with low susceptibility to hydrogen induced brittleness 18 p3274 A70-36121
- Hydrogen line absorption at 21 cm from Centaurus A /NGC 5128/ radio galaxy 18 p3318 A70-37017
- Neutral H spiral structure in Milky Way galaxy, discussing map derivation, pattern interpretation, arm characteristics and kinematics 18 p3327 A70-37161
- Milky Way galaxy spiral structure analysis, using neutral H Hat Creek survey with southern observations 18 p3327 A70-37164
- Neutral H concentrations far from galactic plane associated with spiral arms 18 p3327 A70-37166
- Milky way galactic plane corrugation, discussing maximum hydrogen brightness temperature oscillating in sinusoidal pattern 18 p3328 A70-37167
- Radial velocities of neutral hydrogen in anticenter region of Galaxy 18 p3328 A70-37170
- Galactic spiral structure from optical radial velocities of H II regions 18 p3329 A70-37179
- Carina spiral feature progress report covering O and B star distribution, optical and radio H 2 and H 1 sources and cosmic dust 18 p3330 A70-37185
- Neutral hydrogen observations in Sagittarius and Scutum spiral arms, examining circular galactic rotation by density wave theory kinematic models 18 p3331 A70-37197
- Alloying elements effect on diffusion coefficient of hydrogen in low-alloyed alpha titanium 19 p3449 A70-37274
- Hydrogen maser wall shift measurement, using flexible storage bulb for accuracy improvement 19 p3445 A70-37759
- Hydrogen flame ionization detector /HYFID/ for life-derived organic matter in Martian/Lunar soil 19 p3426 A70-37896
- Pulsar AP 2015 21cm line absorption profile, indicating uniform density and temperature neutral H model invalid 19 p3518 A70-38026
- Sbc galaxy NGC 7320 radio emission and neutral H observations, showing improbability of physical association with Stephan Quintet by distance measurement 19 p3524 A70-38699
- Atomic hydrogen population distribution in far UV of comets 19 p3526 A70-38782
- Interstellar molecular H Lyman resonance-absorption bands in far UV spectrum using rocket observation 20 p3701 A70-39002
- Hydrogen molecules rotational excitation cross sections by electron impact in adiabatic excitation, discussing polarization and distortion effects 20 p3675 A70-39606
- Hydrogen emanation and distribution in metals and alloys by Nd hydrogen metal detection method 20 p3651 A70-40071
- Vibrationally adiabatic model for reaction dynamics of atomic and molecular hydrogen systems, using zero point energy path 21 p3773 A70-41397
- Hydrogen maser frequency shift due to atomic collisions with deformable storage bulb surface 21 p3836 A70-41453
- Apollo 11 lunar rocks and soil hydrogen, C and Si concentration and isotopic composition 21 p3774 A70-41568
- Barrier heights for hydrogen-iodine reaction from semiempirical four-electron valence bond calculation 21 p3780 A70-41709
- Hydrogen adsorption and coadsorption with oxygen on W single crystal surface measured by mass spectroscopy and low energy electron diffraction method 21 p3862 A70-41887
- Electron losses from avalanches in hydrogen in cylindrical tube with plane parallel end electrodes, assuming elastic electron collision 22 p4076 A70-42355
- Interstellar and intergalactic medium physics, examining H I and H II regions thermal and dynamic states 22 p4098 A70-42578
- Diffusion effect on hydrogen and oxygen constituents height distributions in atmosphere and lower thermosphere, solving diffusion and continuity equations 22 p4020 A70-43160
- EPR method for elementary reaction kinetics of vapor phase oxygen atoms interacting with molecular hydrogen 22 p3983 A70-43349
- Interdiffusion coefficients for hydrogen-carbon dioxide and oxygen-carbon dioxide systems at low temperatures 22 p4076 A70-43393
- Solar motion apex for neutral hydrogen concentrations at different velocities, suggesting relationship to galaxy 23 p4239 A70-43815
- Exospheric neutral hydrogen temperature diurnal variation from satellite resonance filter data, suggesting Lyman alpha source external to geocorona 23 p4186 A70-43852
- Hydrogen slush characteristics, discussing advantages of liquid-solid mixture over liquid hydrogen, production methods, aging effects, transfer and pumping losses, storage, instrumentation, etc 23 p4232 A70-45075
- Electronic energy collisional transfer between atomic and molecular hydrogen, measuring excited molecule vibrational distribution 24 p4381 A70-45650
- H and He intraatmospheric migration and dissipation, considering MHD waves, ionospheric plasma motions, chemical reactions, etc 24 p4331 A70-46286
- Hydrogen effect on deformation and fracture of polycrystalline nickel 24 p4365 A70-46372
- Neutral hydrogen 21 cm line profiles in galactic plane, tabulating terminal positive velocity and brightness temperatures 24 p4414 A70-46381
- Galactic neutral hydrogen velocity distributions from 21 cm line profiles analysis 24 p4414 A70-46382
- ### HYDROGEN ATOMS
- Adiabatic and distortion approximations to two state treatment of ground state H atoms collisions at low energies 01 p1146 A70-10284
- Upper atmospheric atomic H and He concentration height distribution, considering L alpha and H alpha emissions, He emission, light components and direct measurements 01 p0074 A70-10589
- Solid hydrogen condensation on interstellar grain surfaces at extremely low temperatures related to H atoms density 01 p0183 A70-10896
- Solar Lyman alpha line profile and atomic hydrogen vertical distribution measurement method for terrestrial atmosphere in 200-500 km range 01 p0078 A70-11208
- Cross section calculation for spin change in H atoms pair collision, discussing wave number and temperature effects 02 p0341 A70-11796
- Mutual diffusion coefficient of hydrogen atoms and molecules in upper atmospheres of major planets calculated as function of temperature, using Chapman-Enskog theory 02 p0342 A70-11817
- Stimulated emission of RF recombination lines from ionized atoms in H I regions 02 p0372 A70-12251
- Direct interaction between hydrogen atom and positive ion with one electron, using Born and two and four state impact parameter treatments 02 p0344 A70-12703
- Dynamic time constants for specific transition and relaxation times of hydrogen maser, noting coupling between hyperfine differences and atomic polarization 03 p0498 A70-13007
- Hydrogen molecule formation relation to galaxy formation, discussing cosmic plasma neutralization role 03 p0577 A70-14152
- Neutral atomic hydrogen in Virgo A cluster and between Galaxy and Virgo A, using emission and absorption measurements 04 p0758 A70-15707
- Hydrogen atoms van der Waal dispersion interaction effects on H lines broadening in neutral medium, taking into account resonance interaction 04 p0723 A70-15714
- Gray and colorless features of moon explained as atomic H imported by solar wind replacing lost H by photolytic decomposition of water vapor 05 p0908 A70-16303
- Scattering matrix noniterative integral solutions applied to singlet and triplet s-wave Hartree-Fock phase shifts for electron-H-atom scattering 06 p1108 A70-17486
- Electron scattering from diatomic molecular systems including coupling of partial waves in fixed-nuclei approximation 06 p1114 A70-18633
- Hydrogen atoms collisional excitation cross section expressed in terms of quantum numbers of levels and ratio of colliding electron energy to transition energy 07 p1338 A70-19410
- Atomic hydrogen maser wall shift determined by measurements on FEP Teflon coated storage bulbs, suggesting Teflon properties change as basis 07 p1301 A70-19973
- Geocoronal glow as resonant scattering of solar Lyman-alpha-radiation by H atoms in upper atmosphere 07 p1270 A70-20032
- Calf thymus DNA structural and functional changes following exposure to hydrogen atoms and gamma radiation 07 p1215 A70-20050
- Relaxation time calculation for ground and excited states of H atoms and H-like ions in optically thin and thick plasmas, considering electron density role 07 p1353 A70-20058
- Born wave for atom-atom inelastic cross sections, calculating He excitation from ground state to higher states by H atom collision 07 p1346 A70-20241
- Excitation cross sections for bound-bound transitions in optical levels in hydrogenlike atoms induced by fast charged particles 09 p1730 A70-22230
- Ionizer design for hydrogen atom beam ensuring storage of polarized protons, using electron beam for ionization 09 p1732 A70-22846
- Quadrupole coupling between single and double excitation channels in hydrogen-hydrogen collisions found ineffective due to energy defect between channels 09 p1733 A70-23268

Charge exchange probability in proton-hydrogen atom collisions computed with two state atomic orbital expansion

09 p1733 A70-23270

Associative and collisional detachment in H atom and negative ion collisions based on complex adiabatic potential

09 p1733 A70-23431

Hydrogen 21 cm emission line in Perseus region observed for motion of neutral hydrogen connected with II Per, discussing stellar radial velocity

10 p1937 A70-23944

Ionization front interactions in interstellar gas, investigating expanding planar H II region and contact discontinuity in H I region

10 p1937 A70-23975

Interstellar atomic and molecular hydrogen abundance and physical state using rocket observations of Lyman alpha absorption line and ground based observations

10 p1941 A70-24551

Chemiluminescence from NO adiabatically expanded against supersonic H atoms stream in inert carrier

10 p1831 A70-24566

Luminescence of powdered silica and basalt bombarded by atomic hydrogen, relating spectral distributions dependence on ion energy to lunar luminescence

10 p1942 A70-24647

Frenkel pairs and interstitial hydrogen atoms observed in thin silver films after proton bombardment

12 p2253 A70-27209

Hydrogen and inert gas atoms collisional excitation cross sections calculated by multistate impact parameter approximation

12 p2276 A70-27878

Polarized Lyman alpha radiation emitted in electron collisions with atomic and molecular hydrogen and by electric field quenching of metastable atom

13 p2455 A70-29221

Carbon and sulfur reactions with solar hydrogen atoms in Apollo 11 lunar samples accounting for isotopic composition of fine-grained basaltic rocks

14 p2545 A70-30791

Atomic emission in water vapor afterglow, revealing presence of Balmer series of H atom with sodium D line

14 p2579 A70-31255

Gas ionization with hydrogen atoms in gravitational equilibrium at constant temperature in upper half space by instantaneous radiation burst in lower space

15 p2775 A70-31477

Atomic hydrogen distribution in upper atmosphere and solar system obtained during spin operation of OGO 5 with Lyman alpha photometer

15 p2798 A70-31655

Atomic hydrogen escape effects on altitude distribution, discussing lateral flow limitations on thermospheric diurnal variation

15 p2725 A70-31796

Hydrogen atom excitation at various energy levels by electron impact, applying Glauber theory

16 p2954 A70-33287

Hydrogen behavior in Ti and alloys by internal friction measurement, attributing relaxation peaks to stress induced ordering of atoms

17 p3115 A70-34382

Galactic UV emission attributed to solar radiation scattered by hydrogen atoms, using Mariner 5 measurements

17 p3163 A70-34902

Metal surface ionization measurements for upper atmosphere and interplanetary space energetic neutral hydrogen analyzer design

17 p3138 A70-35309

UV absorption lines in H I regions heated by cosmic rays, discussing possible detection by rocket or satellite spectroscopic observations

17 p3152 A70-35748

Earth Lyman alpha emission rates as function of atomic hydrogen column density in outer atmosphere, using Mariner 5 measurements

18 p3244 A70-36007

Elastic energy transfer cross sections calculation of H-H scattering to estimate neutralized solar wind particles thermalization

18 p3309 A70-36951

Atomic H electron transition induced by H atom collisional-excitation rates at various thermal energies, explaining anomalous recombination lines in H I regions

18 p3253 A70-37021

Galactic spiral structure from atomic hydrogen line intensity longitudinal distribution

18 p3328 A70-37168

H I local spiral arm drift curves from radio telescope operation

18 p3328 A70-37171

Interstellar H I gas physical conditions, discussing ionization ratio average values and temperature conditions

18 p3328 A70-37175

Diurnal variations of thermospheric atomic hydrogen, investigating lateral flow effects on global distribution

19 p3415 A70-38419

Time and power dependent Lamb shift resonance shapes measurement with circular polarized RF field in beam foil excited H atoms

20 p3675 A70-39498

Positive ion and electron production in H atom collisions with atomic and molecular gases, deriving ionization cross sections

20 p3675 A70-39605

Hydrogen ionization and second quantum level excitation by collision with H atoms in ground state

21 p3852 A70-40596

Atomic hydrogen 2s and 2p excitations by proton and He ion impact, considering ion-multipole interactions effect

21 p3852 A70-40598

Soft X ray background galactic absorption and intensity measurements indicating inverse relation to columnar atomic hydrogen density

21 p3877 A70-40698

Ionization cross sections for excited H atom-ground state H atom collisions, using Born approximation

21 p3852 A70-40719

Atomic hydrogen emissions in dayglow, considering excitation by resonance absorption of solar radiation

21 p3812 A70-40728

Cold neutral atomic hydrogen in Taurus dust clouds from 21 cm line dips in radiotelescope observations

21 p3887 A70-41108

Atomic hydrogen 21 cm line intensity distribution in Carina arm of Milky Way galaxy

22 p4100 A70-42851

Silicon line collisional broadening by electrons and hydrogen atoms, discussing Stark effect and van der Waal interactions

22 p4076 A70-42861

Galactic soft X ray and subcosmic ray heating and ionizing of interstellar H I regions

22 p4094 A70-42985

Stark effect in hydrogen atoms for nonuniform electric fields, considering correction of energy eigenvalues of Schrodinger equation by WKB method

23 p4221 A70-44401

Heitler-London curves calculation for electron exchange in H-H collisions as function of internuclear distance and velocity

24 p4381 A70-45252

Interplanetary atomic hydrogen density distribution from Lyman alpha scattering calculation, explaining background radiation anisotropy detection by Vela 7 satellite

24 p4403 A70-45392

D2A satellite optical experiments, examining atmospheric atomic H and solar and extraterrestrial 1216 A emission

24 p4339 A70-46094

HYDROGEN BONDS

Polywater electronic structure model, proposing hydrogen bonds resembling short strong bonds in FHF⁻/ions

11 p1994 A70-25656

Ammonia gas phase IR intensity measurements for hydrogen bonding energy and related parameters

23 p4158 A70-44783

HYDROGEN CHLORIDE

U HYDROCHLORIC ACID

HYDROGEN COMPOUNDS

NT CARBORANE

NT DEUTERIUM COMPOUNDS

NT DIBORANE

NT DIHYDRIDES

NT HYDRIDES

NT HYDROBROMIDES

NT HYDROGEN CYANIDES

NT HYDROGEN PEROXIDE

NT HYDROGEN SULFIDE

NT LITHIUM HYDRIDES

NT METAL HYDRIDES

NT PHOSPHINES

NT SILANES

NT ZIRCONIUM HYDRIDES

Rare gas diatomic and hydride ions reactions with hydrogen, determining rate coefficients and product channels by flowing afterglow technique

15 p2776 A70-31727

HYDROGEN CYANIDES

Carbon monoxide, carbon dioxide and oxygen impurities effects on threshold current and output power of HCN laser

12 p2249 A70-27648

Submillimeter range HCN gas laser design and characteristics, noting single mode, linear polarization and output power

12 p2250 A70-28180

HCN laser 890 GHz line phase locked to multiplexed standard frequency with wide bandwidth loop, narrowing line widths

13 p2426 A70-28798

HCN laser far IR line phase locked to absolute frequency standard

13 p2426 A70-28810

HYDROGEN FLUORIDES

U HYDROFLUORIC ACID

HYDROGEN FUELS

Medium temperature hydrogen fuel cells design, operational characteristics and performance

12 p2163 A70-26996

Large scale hydrogen fueled supersonic combustor test at simulated Mach 8 flight, describing fuel injector design

[AIAA PAPER 70-715]

16 p2965 A70-33539

Nonequilibrium recombination in supersonic nozzle of dissociated combustion products of hydrogen in air, investigating initial system and rate constants effect

20 p3582 A70-39269

Hydrogen-oxygen and hydrogen-nitrous oxide systems combustion, measuring isotopic substitution effect on flame speed by schlieren technique with rotating drum camera

20 p3583 A70-40472

Low thrust trajectory transfer from low to synchronous orbit, examining hydrogen resistance jet and mercury bombardment ion thruster

22 p4089 A70-42487

HYDROGEN IONS

Electron pressure and negative H ion population in late type dwarfs atmospheres by Ca I resonance line observation, noting non-LTE mechanism

01 p0191 A70-11351

Cross sections determined for formation of secondary positive molecular and atomic hydrogen ions during 1.4-46 keV positive molecular hydrogen passing through hydrogen

02 p0344 A70-12704

Carbon atom RF recombination lines evaluated for conditions in H II regions and planetary nebulae

04 p0748 A70-14587

Exchange perturbation theories applied to delta function model of molecular hydrogen ion, discussing EL-HAV second order energy at large internuclear separations

05 p0884 A70-15878

Relaxation time calculation for ground and excited states of H atoms and H-like ions in optically thin and thick plasmas, considering electron density role

07 p1353 A70-20058

Charge exchange and electron loss measurements in steam target exposed to high energy hydrogen ions beam, using equilibrium fractions method

07 p1345 A70-20142

Pulsar clusters and associations within 1 kpc of sun and hot O-stars and supergiants, calculating radius of surrounding H II regions

08 p1577 A70-21493

Internal radial velocities of diffuse emission nebulae in H II region, using photographic Fabry-Perot interferometer

08 p1581 A70-21952

Three body atomic systems with He atom and H negative ion on basis of scattering experiments dealing with resonance and threshold behavior

09 p1731 A70-22247

Charged particle interaction influence on photoionization cross section of negative hydrogen ion, considering initial state polarization leading to free s wave electron

09 p1732 A70-22826

Charge exchange cross section of hydrogen position ion-negative ion collisions

09 p1733 A70-23269

Associative and collisional detachment in H atom and negative ion collisions based on complex adiabatic potential

09 p1733 A70-23431

Galactic radio sources examined for hydroxyl lines associated with H II regions, making observations in absorption and emission

10 p1936 A70-23904

Ionization front interactions in interstellar gas, investigating expanding planar H II region and contact discontinuity in H I region

10 p1937 A70-23975

Hydrogen ion flux detected along earth magnetic force lines in Northern Hemisphere midlatitudes, determining flux magnitude

10 p1874 A70-24321

H II region properties from non-LTE analysis of alpha, beta, gamma, delta and epsilon radio recombination line data, determining electron temperature and concentrations

10 p1945 A70-24959

Approximations implicit in Cayrel statistical equilibrium or non-LTE analysis of ionic hydrogen bound free continuum in sun

10 p1947 A70-24989

Dogs respiratory response to arterial hydrogen ions at different carbon dioxide pressure levels during hypoxia or hyperoxia, discussing acid-base balance effects

11 p1986 A70-25674

Triatomic hydrogen ion role in solar photosphere opacity implied from limb darkening and specific intensity data

11 p2104 A70-25739

- Population densities of levels of excited atoms and ions in nonthermal plasma including hydrogen-like ion partition function
11 p2086 A70-25835
- Ionization equilibrium of atoms and hydrogen-like ions in nonthermal plasma, transforming into Saha formula for high electron densities
11 p2086 A70-25836
- Cross sections for electron impact excitation of positive helium and hydrogen ions, using non-relativistic Coulomb-Born-Oppenheimer reactance matrices
13 p2455 A70-28988
- Shock wave multiple ionization in hydrogen with impurities, discussing intensity and duration effects on electron temperature profile and ion concentrations
13 p2388 A70-29369
- H II region stellar color anomaly attributed to interstellar extinction
14 p2641 A70-30879
- Negative hydrogen ion balance in high intensity plasma source, measuring flux as function of discharge current
15 p2780 A70-32195
- Triatomic hydrogen positive ion-yielding reactions, using EVA ion-molecule beam apparatus
16 p2855 A70-33012
- Effective cross sections for molecular hydrogen and hydrogen positive ion formation in collisions between He, Ne and Ar ions or atoms
16 p2954 A70-33193
- Hydrogen ion-molecule reactions analysis by flow-afterglow technique, noting application to proton affinity measurement
16 p2857 A70-34005
- Compact ionized hydrogen components inside galactic H II regions of lower electron density, explaining existence and evolution by various models
16 p2980 A70-34308
- Plasmasphere bulge region morphology from hydrogen ion concentration measurement by mass spectrometer on OGO 5 satellite
18 p3312 A70-36014
- H 2 regions in Sc galaxies NGC 628, 4254 and 5194
18 p3327 A70-37159
- H 2 region and neutral gas spiral structure and radial distribution, using optical observations and radio continuum surveys
18 p3327 A70-37162
- H 2 region galactic clusters and exciting stars, reevaluating distances by color magnitude diagrams
18 p3329 A70-37178
- Local spiral arm H 2 regions distribution in Cygnus direction, discussing symmetry due to magnetic field
18 p3329 A70-37180
- P autoionization states of helium and hydrogen negative ions, calculating widths and shifts
19 p3474 A70-38307
- Simultaneous hydrogen ion composition measurements by upper ionospheric polar orbiting OGO 4 and eccentric orbiting magnetospheric OGO 3 at midlatitude
19 p3520 A70-38377
- H II region radial velocity comparison to galactic spiral structure, using optical and radio investigations
19 p3524 A70-38698
- Hydrogen negative ion thermal energy reactions with oxygen, nitric oxide, carbon monoxide and nitrous oxide, determining rate constants
20 p3583 A70-39616
- He/plus-/H-/minus/ collisional charge exchange cross sections, using modulated inclined ion beams technique
21 p3852 A70-40599
- Galactic K series emission at 1-10 keV by low energy cosmic rays and diffuse X rays interaction with H I region heavy ions
21 p3877 A70-40704
- High velocity intergalactic hydrogen origin, examining galactic evolution by gas infall
21 p3887 A70-41112
- Galactic rotation model derived from radial velocities and spectrophotometric distances of H II regions
22 p4101 A70-42864
- Photoionization cross sections for atoms and ions of carbon, nitrogen, oxygen and neon as function of wavelength for H II regions and planetary nebulae
22 p4104 A70-42997
- H II regions density-size relationship, using emission measurements and radio data
22 p4109 A70-43746
- Negative hydrogen ion forbidden bound-free continuum absorption cross section recalculation, deriving 10 to 8th power smaller than previous value
24 p4404 A70-45410
- HYDROGEN ISOTOPES**
NT DEUTERIUM
NT TRITIUM
Cosmic ray origin in high energy H and He isotopic abundances and energy spectra observed by IMP 4 satellite during solar quiet times
02 p0358 A70-12250
- Binary transition metal hydrides consisting of single metal and single hydrogen isotope, discussing preparation and kinetic, thermodynamic and structural properties
05 p0863 A70-16523
- Hydrogen-oxygen and hydrogen-nitrous oxide systems combustion, measuring isotopic substitution effect on flame speed by schlieren technique with rotating drum camera
20 p3583 A70-40472
- Apollo 11 lunar matter rare gas, H and N concentrations and isotopic abundances, discussing solar wind, gas diffusion loss from silicates and spallation component
21 p3908 A70-41583
- HYDROGEN OXYGEN ENGINES**
NT J-2 ENGINE
Hydrogen-oxygen variable length combustor longitudinal instability, studying hydrogen injection temperature effects on pressure interaction index and pressure sensitive time lag
01 p0214 A70-10324
- Predicted and measured low density plume impingement effects on loads and heat transfer compared on orbiting Saturn 5 with oxygen-hydrogen burner engine
04 p0737 A70-15430
- Analog-numerical measurements on French liquid oxygen and hydrogen motor
07 p1364 A70-19129
- Resonance ignition technique for gaseous oxygen and hydrogen rocket propellants
14 p2627 A70-30776
- Steady state one dimensional nozzle flow of reacting inviscid gas mixtures, giving numerical solution procedure for hydrogen-oxygen reactions
15 p2694 A70-32269
- Hydrogen oxygen rocket engine two phase liquid hydrogen pump capability and hydrodynamic design, analyzing constant-quality flow, acoustic effects, compressible flow and cavitation
[AIAA PAPER 69-549]
15 p2791 A70-32511
- Space based reusable manned/unmanned tug, discussing potential missions, system requirements and auxiliary hydrogen oxygen propulsion system
[AIAA PAPER 70-719]
16 p2964 A70-33533
- Optical system measurement of density and rotational temperature in gaseous plume simulating auxiliary propulsion and oxygen hydrogen burner of S-4B
16 p2913 A70-34023
- Pressure histories of burning modes in combustion driven shock tube using ignition of stoichiometric hydrogen-oxygen mixture with He dilution
17 p3195 A70-34922
- Hydrogen oxygen engine designs for space vehicle auxiliary propulsion systems, considering long life thrust chamber performance with compatible heat transfer characteristics
[SAE PAPER 700803]
24 p4395 A70-45908
- HYDROGEN OXYGEN FUEL CELLS**
Materials for separator matrix of rechargeable hydrogen oxygen fuel cell, noting use of composite potassium titanate
09 p1612 A70-22045
- Silver cathodes and plasma-sprayed anodes for cost effective hydrogen/oxygen fuel cells with solid zirconium dioxide electrolyte, considering carbon precipitation avoidance
10 p1830 A70-24459
- Hydrogen oxygen fuel cells with porous electrodes based on Elofflux principle, discussing diaphragms, electrolyte flow and heat removal
10 p1830 A70-24464
- Raney catalyst preparation and continuous operation in molecular hydrogen and oxygen electrodes noting improved voltage, manipulation and energy yield
10 p1831 A70-24467
- Hydrogen peroxide fuel cell performance in acid and alkaline electrolytes, investigating cathodic reduction of oxygen on platinum
10 p1808 A70-25037
- Fuel cells with alkaline electrolyte consuming H and O and operating near ambient temperature, discussing electrodes composition and performance
12 p2163 A70-26993
- Hydrogen-air fuel cell with half kilowatt output, describing electrode construction, cell operation, porosity effects on polarization, etc
12 p2163 A70-26995
- Hydrogen-oxygen fuel cell reaction water removal and heat loss using reconcentration device
12 p2163 A70-27066
- Hydrogen oxygen fuel cell investigated for oxygen transfer to Pt cathode surface
12 p2166 A70-27848
- Hydrogen oxygen fuel cells, demonstrating matching of power source and load, charge transfer, porosity, Nernst equation and electrochemical water synthesis
14 p2533 A70-30533
- Fuel cell development, discussing consumable electrode, hydrogen/oxygen, hydrazine/hydrogen superoxide, hydrazine/air and methanol/air cells
19 p3359 A70-38497
- Regenerative hydrogen-oxygen secondary fuel cells as rechargeable battery for communication satellites
21 p3756 A70-41007
- HYDROGEN PEROXIDE**
Hydrogen peroxide oxidizer for higher characteristic mixture ratio in hybrid propulsion systems with hypergolic reactions ignition
[ONERA-TP-773]
02 p0352 A70-12209
- Hydrogen peroxide infusion effect on skin remission following exposure to ionizing radiation on rabbit legs
09 p1619 A70-22791
- Hydrogen peroxide fuel cell performance in acid and alkaline electrolytes, investigating cathodic reduction of oxygen on platinum
10 p1808 A70-25037
- Temperature measurement on thin steel shield subjected to hydrogen peroxide motor exhaust heating at cryogenic temperatures in space
23 p4280 A70-44389
- HYDROGEN PLASMA**
NT DEUTERIUM PLASMA
Cs seeding effect on bound-free UV photoabsorption of Cs-H plasma at constant electron density and energies below H ionization
02 p0343 A70-11904
- Radiative, conductive and convective combined heat transfer mechanism in nonisothermal atomic hydrogen plasma laminar flow
02 p0400 A70-12660
- Steady state deuterium-tritium fusion reactor approximate parameters prediction possibility based on interim assumptions of plasma confinement, model, etc
02 p0349 A70-12755
- Ionization and electron temperature dependence on shock wave structure in partially ionized hydrogen plasma allowing for luminescent energy losses
03 p0465 A70-13060
- Interstellar media under action of supernova or nova, solving Navier-Stokes equations of hydrogen plasma for motion during shock wave formation
03 p0564 A70-13221
- Hydromagnetic normal ionizing shock wave properties in H and D mixtures and pure gases in SUPPER 2 shock wave tube
03 p0536 A70-14365
- Pulsed high current arc burning in hydrogen at pressures to 400 atm, discussing stability and discharge plasma parameters
04 p0729 A70-15224
- Heat flux, electrical and thermal conductivity of H measured on plasma in cascade arc chamber of high power load at 1 atm pressure
06 p1107 A70-18525
- Spectral line intensities in hydrogen plasma, calculating relative intensities and Balmer line width for various electron temperatures and optical thicknesses in H alpha line
07 p1389 A70-20205
- Interstellar media under action of supernova or nova, solving Navier-Stokes equations of hydrogen plasma for motion during shock wave formation
08 p1580 A70-21654
- Variational model of collisional-radiative recombination of atomic ions in hydrogen and alkali plasmas
09 p1735 A70-22828
- Photon bremsstrahlung from relativistic hydrogen plasma determined by studying electron-positron pairing effect on plasma radiation intensity
09 p1735 A70-22986
- Velocity and temperature distribution behind shock waves in hydrogen plasma measured to determine factors responsible for discrepancies in Rankine-Hugoniot conditions
10 p1867 A70-24149
- Plasma production by solid hydrogen-giant pulse laser interaction, studying time dependent distributions of plasma density, temperature and velocity
10 p1902 A70-25222
- Radiative energy transfer in hydrogen plasma having uniform heat source and bounded by parallel black plates
12 p2278 A70-27695
- Statistical mechanics of partially ionized hydrogen plasma, deriving Saha equation to calculate ionization degree and potential for various electron densities and temperature
12 p2281 A70-27882
- Free electrons non-Maxwellian equilibrium kinetic energy distribution function, considering partially ionized hydrogen-like plasma in thermal equilibrium
13 p2459 A70-28634
- Surface emissivity effects on combined conduction, convection and radiation heat transfer in nonisothermal hydrogen plasma, discussing optically thin and thick solutions
13 p2521 A70-29134
- Coupled temperature and electric potential distribution in finite rotational symmetric hydrogen arc column in axial magnetic field
14 p2621 A70-30656
- Radial ion temperature distribution in hydrogen arc within axial magnetic field measured spectroscopically by thermal Doppler effect
14 p2621 A70-30657

Laminar Cu-W electrode erosion resistivity in single chamber electric arc hydrogen plasmatrons with gas vortex stabilization

15 p2780 A70-32130

Electrons, positrons and photon energy distribution inside hydrogen plasma injected with high energy electrons

15 p2781 A70-32429

Hydrogen plasma refractive index and absorption constant for laser radiation frequencies as functions of electron temperature and atomic density

16 p2959 A70-34338

Microwave diagnostics of electron density, temperature and light emission in self excited moving striations in hydrogen plasma

19 p3475 A70-37553

Exponential kernel approximation effect on radiative energy transfer in high temperature hydrogen plasma

20 p3684 A70-40278

Stationary hydrogen RF plasma, using quadrupole mass analyzer for ion composition and extraction study

22 p4078 A70-42363

Dissociated and ionized hypersonic flows of hydrogen heated by electric arc techniques, investigating flows in wind tunnel nozzles

22 p4011 A70-42759

Atomic hydrogen plasma slab, calculating thermodynamic equilibrium deviations effect on resonance radiation

23 p4223 A70-43824

Atomic levels occupation numbers and ionization degree for optically thin hydrogen plasma with self consistent electron velocity distribution

23 p4227 A70-44932

Electric field radial distribution measured for stationary hydrogen arc with axial magnetic field

23 p4227 A70-44933

Five-moments approximation calculation of magnetoplasmodynamic hydrogen arc radial pressure profile as function of ambient pressure and superimposed magnetic field

23 p4228 A70-44935

Magnetoplasmodynamic hydrogen arc radial pressure profile as function of ambient pressure and superimposed magnetic field, using thirteen-moments approximation

23 p4228 A70-44936

Hydrogen cluster beam discharges, determining transient plasma ion density from Stark broadening measurements of H beta line

23 p4228 A70-44939

Spatial potential measurements in magnetized non-Maxwellian hydrogen plasma, using Zaitsev-Mnev method

24 p4385 A70-45464

Pressure gradient induced drift waves in collisionless hydrogen plasma in homogeneous magnetic field

24 p4388 A70-46209

HYDROGEN RECOMBINATIONS

Stimulated emission of RF recombination lines from ionized atoms in H I regions

02 p0372 A70-12251

Hydrogen 109 alpha recombination line emission in galactic H II regions surveyed at National Radio Astronomy Observatory

10 p1936 A70-23942

H II region properties from non-LTE analysis of alpha, beta, gamma, delta and epsilon radio recombination line data, determining electron temperature and concentrations

10 p1945 A70-24959

Recombination in hydrogen-oxygen reaction studied by monitoring IR emission from water vapor formed by shock initiated combustion

11 p1995 A70-26377

Hydrogen recombination and hydrogen molecules formation may explain sharp brightness variations in later dwarf stars

11 p2115 A70-26581

Planetary nebula NGC 7027, discussing hydrogen recombination lines

13 p2486 A70-28629

Atomic H electron transition induced by H atom collisional-excitation rates at various thermal energies, explaining anomalous recombination lines in H I regions

18 p3253 A70-37021

Dwarf Me stars flare spectra, examining hydrogen recombination layer and impulse heating of photosphere

20 p3702 A70-39013

Hydrogen-oxygen flames recombination rates measurements analysis, taking into account reverse reaction rates

20 p3583 A70-40470

Alpha hydrogen recombination lines 156, 166, 167 and 168 from galactic center, using radio telescope

22 p4103 A70-42980

Microwave recombination H lines, deriving electron temperature, electron density and emission measure sequentially

24 p4402 A70-45388

Hydrogen I region anomalous alpha lines recombination in Orion B spectrum, identifying carbon emitter by measured frequency separation

24 p4410 A70-45773

HYDROGEN SULFIDE

Hydrogen sulfide participation in vinyl polymerization investigated for reaction mechanism

05 p0810 A70-16051

Clean iron /011/ surfaces, determining sulfur, oxygen and hydrogen sulfide films effects on adhesion behavior

21 p3831 A70-40748

Ion-molecule reactions in mixtures of hydrogen sulfide with ethylene and acetylene from deuterium labeling studies via ion cyclotron resonance spectroscopy

21 p3773 A70-41200

HYDROGEN 2

U DEUTERIUM

HYDROGEN 3

U TRITIUM

HYDROGENATION

Hydrogenated Ni activation energy difference for lower and higher critical temperatures due to hydride dislocations binding energy

08 p1522 A70-21705

Serrated yielding in hydrogenated nickel alloys, noting hydride stability role in Portevin-Le Chatelier effect

08 p1522 A70-21706

Weld quality relationship to aluminum surface contamination by hydrogen-containing compounds

13 p2407 A70-29108

Hydrogen impurities anelastic relaxation effect on internal friction alpha peak in cold worked tantalum and niobium

13 p2435 A70-29350

Hardened steel embrittlement in low pressure hydrogen caused by crack growth as function of temperature

13 p2436 A70-29804

Internal friction in hydrogenated Ti-Mn alloys, observing relaxation peak formation under stress induced hydrogen diffusion in beta phase

16 p2930 A70-33082

Cellulose ion exchanger palladium catalysts preparation and applications in asymmetric hydrogenation reactions

17 p3042 A70-35125

Addition and hydrogenation reactions of azomethines in chemistry of carbon-nitrogen bond, emphasizing Schiff bases

20 p3582 A70-38978

Hydrogenated Ni elastic limit discontinuity, discussing Portevin-Le Chatelier effect

23 p4208 A70-44921

HYDROGENOLYSIS

Optically active alpha-amino acids synthesis from esters of alpha-keto acids by hydrogenolytic asymmetric transamination

17 p3041 A70-34749

HYDROGENOMONAS

Organic substrates effects on Hydrogenomonas eutropha autotrophic and heterotrophic metabolism

10 p1817 A70-24700

Carbon dioxide fixation in hydrogenomonas eutropha determined from titrating liquid culture with carbon dioxide, showing dependence on oxygen content in gas mixture

11 p1991 A70-25940

Molar growth yields from chemostat cultures of Hydrogenomonas eutropha on succinate and on fumarate, noting equivalence to ATP via oxidation

13 p2350 A70-29113

Ammonia incorporation in chemolithotroph Hydrogenomonas eutropha, investigating responsible enzyme

15 p2682 A70-32000

Hydrogenomonas vs Chlorella spacecraft life support systems, discussing human requirements and equipment for balanced food supply on long duration space missions

16 p2855 A70-34315

Energy yield measurements of catabolic and anabolic activity in autotrophically growing Hydrogenomonas eutropha

23 p4149 A70-44997

HYDROGRAPHY

Airborne real time IR imagery of thermal anomalies for geophysical exploration of water resources

09 p1674 A70-22262

HYDROKINETICS

U HYDROMECHANICS

HYDROLOGY

Earth environmental satellite data for oceanography and hydrology, discussing sea surface temperature mapping, low level wind conditions, snow and ice mapping, etc

[AAS PAPER 69-596]

04 p0676 A70-14635

Earth surface hydrology effect incorporated into atmospheric circulation mathematical model for climate, considering ocean as atmospheric moisture reservoir

04 p0680 A70-15296

Remote sensing techniques for water resources evaluation and hydrobiological features mapping with multiband scanner imagery

10 p1879 A70-24742

Automatic search for data in hydrology and meteorology, describing information search language development

14 p2602 A70-30141

Venus water presence from Venera 4 and Mariner 5 data suggesting polar seas and oceans saturated with hydrochloric acid and carbon dioxide as plant life source

14 p2637 A70-30365

Space acquired hydrological cycle data relating to water occurrence and movement in atmosphere and earth surface mantle

20 p3616 A70-39063

HYDROLYSIS

Moisture absorptivity and hydrolytic stability effects on operational parameters of gas turbine engine lubricants

06 p1075 A70-17222

Silane coupling agents glass-catalyzed hydrolysis without presence of acid, discussing reaction kinetics

06 p1091 A70-17599

Synthesis of alpha-dichloro-seco-A-norcholestanol from diol monoacetate reaction with triphenylphosphine followed by hydrolysis and repeated chlorination

06 p1005 A70-17975

Refutation of Sylvén-Snellman report of catalysis of benzoylarginine beta-naphthylamide and leucine beta-naphthylamide hydrolysis by beef spleen cathepsin B

10 p1812 A70-24534

Adenosine phosphates hydrolysis in solutions containing Ca ions and in synthetic seawater, investigating living systems energy transfer and prebiological evolution

11 p1986 A70-25702

Stereospecificity and reaction rate of enzymatic hydrolysis of racemic substrate by pepsin determined by nuclear magnetic resonance spectroscopy

12 p2181 A70-27472

Methane and ethane released from Apollo 11 lunar samples by crushing or acid treatment, suggesting carbides hydrolysis as main source

12 p2304 A70-27719

Amino acids analysis of Apollo 11 lunar fines by hydrolysis of aqueous extracts

21 p3778 A70-41623

Lunar fines hydrochloric acid hydrolysates examination by gas-liquid chromatography indicating presence of organosiloxanes

21 p3779 A70-41627

Strontium nitride hydrolysis, investigating hydrazine presence among products

23 p4158 A70-44598

NT MAGNETOHYDRODYNAMICS

Hydromechanics and thermodynamics in mechanical radial face seal design

11 p2059 A70-25792

HYDROMETEOROLOGY

Grouping method estimation of statistical data during hydrometeorological information processing to calculate essential data for distribution curve judgement

06 p1096 A70-17786

Signal attenuation and bandwidth limitations imposed by atmospheric hydrometeors on communications satellite systems above 10 GHz, discussing Comsat measurement programs

[AIAA PAPER 70-500]

11 p1997 A70-25408

Short wave radiation fluxes inclusion in hydrodynamic model of general atmospheric circulation based on aircraft sounding data and aerostatic observations

12 p2263 A70-27512

Meteorological satellites TV pictures processing for hydrological information, emphasizing snow photographs interpretation

14 p2601 A70-30138

Hydrometeorological information processing using ALGOL-60 translator language

19 p3463 A70-38759

Multispectral hydrometeorological environment monitoring in Earth Resources Survey Program

23 p4191 A70-44664

Technological and economical characteristics of serviced and unserved automatic hydrometeorological stations and second class nonautomatic station

24 p4340 A70-46406

HYDROMETERS

Optical hydrometer measuring water vapor content in vertical atmosphere column, using interference filters and thermoelectric sensitive element
20 p3625 A70-39027

HYDRONIUM IONS

Hydronium ion formation mechanism for D region, obtaining experimental support from mass spectrometer observation of ion production in oxygen glow discharge
09 p1671 A70-23500

HYDROPLANING

Wet runway operations in air traffic control, discussing viscous, reverted rubber and dynamic hydroplaning
13 p2348 A70-29779

HYDROPONICS

Carrot plants growing during 374 days in conveyor type aeroponic assembly, noting yield and morphological features
03 p0436 A70-13902

Sweet potatoes productivity and nutritive value as carbohydrates source in manned space flights
04 p0641 A70-14572

Plant cultivation in closed biological cycles by hydroponic method using keramsit/alumoferrisilicate/substrate
13 p2358 A70-29328

HYDROSPHERE [EARTH]

U EARTH HYDROSPHERE

HYDROSPINNING

Electrically conducting fluid hydromagnetic spin-up between infinite flat insulating plates in uniform magnetic field normal to boundaries
23 p4223 A70-43972

HYDROSTATIC PRESSURE

Electrical lead sealing in hydrostatic high pressure systems with gaseous pressure transmitting medium, considering piston cone seals, frozen oil seals, epoxy seals, etc
01 p0104 A70-10744

Orthotropic cylindrical shell with initial deflection under long term effect of external hydrostatic pressure, solving bending problem
02 p0390 A70-12809

Polyethylene and polypropylene mechanical behavior under tensile and compressive loads and subject to hydrostatic pressure, obtaining tensile nominal stress-strain curves for various pressures
03 p0517 A70-14201

Inertia effects due to circumferential and radial velocity in MHD hydrostatic thrust bearing in axial magnetic field
04 p0698 A70-14871

Adiabatic elastic stiffness constants of single crystal forsterite measured as function of hydrostatic pressure and temperature, using pulse superposition technique
04 p0678 A70-15055

Hydrostatic pressure effects on DNA, RNA and protein synthesis and division in *Escherichia coli* cultures
04 p0637 A70-15475

Ultraminiature pressure sensor for continuous recording of hydrostatic pressure in renal tubules and blood capillaries
05 p0804 A70-15772

Resistance strain gauge load cell for measuring compressive loads under high hydrostatic pressure, discussing gauge bonding
05 p0848 A70-16377

External hydrostatic pressure effect on fiberglass-reinforced plastics strength under unilateral heating, analyzing stress distribution
05 p0875 A70-17067

Theory for describing rotating fluid planets external geometry in state of hydrostatic equilibrium, noting role of equipotential surfaces
06 p1153 A70-18559

Hydrostatic journal bearing calculation for case of shaft misalignment, deriving linear inhomogeneous equations with symmetrical matrix for pressure
07 p1293 A70-19119

Hydrostatic journal bearing dynamic rigidity for compressible and incompressible fluids, describing fluid film elasticity and damping characteristics
07 p1293 A70-19121

Zener diode used as hydrostatic pressure gauge, describing pressure effects on diode current/voltage characteristics
08 p1477 A70-21644

Circular membrane creep under one-sided hydrostatic pressure, using governing equations for finite deformation
10 p1959 A70-24828

Hydrostatic oil journal bearings performance with several supply holes and incompressible lubricant, analyzing Reynolds pressure equation by numerical method
10 p1895 A70-24851

Blunted spherical shells stability under hydrostatic pressure by reducing equilibrium equations to differential
12 p2322 A70-27333

Fiberglass plastic cylindrical shells stability against creep under prolonged hydrostatic pressure, obtaining critical loading times
12 p2328 A70-28278

Self energized hydrostatic shaft seal operating with incompressible fluid in laminar flow regime, using general lubrication theory
13 p2417 A70-28614

Plastic deformation of Be single crystals under hydrostatic pressure, considering resolved shear stresses on glide systems
14 p2595 A70-30334

Superplastic deformation of thin circular diaphragms subjected to one-sided hydrostatic pressure, emphasizing thickness variations in bulged shapes
16 p2916 A70-32917

Normally intersecting closed cylindrical shells subjected to internal hydrostatic pressure, using Donnell shell theory
16 p2990 A70-33678

Adhesive bond between steel wire and epoxy resin, investigating hydrostatic pressure effect on shear strength
17 p3123 A70-34623

Teflon bucket and Be-Cu cap seal against hydrostatic pressure, discussing applications for high pressure superconductivity measurements
18 p3262 A70-37097

Hydrostatic pressure dependences of second order elastic constants of ZnTe and ZnSe at 295 K, using ultrasonic pulse echo method
19 p3486 A70-37762

Hydrostatic pressure derivatives of adiabatic elastic moduli of single crystal zirconium, noting high temperature Gr₁₁ isen-thermal expansion deviation
19 p3486 A70-37763

Right-mov₁ thunderstorm characteristics from mesonet network rawinsonde updraft observations, considering hydrostatic pressure and cyclonic rotation
19 p3462 A70-38260

Argon hydrostatic pressure effect on self diffusion coefficients and activation energy of Al and Be single crystals
20 p3644 A70-38961

Stiffened thin walled circular cylinders buckling and postbuckling behavior under axial compression or external hydrostatic pressure
20 p3719 A70-39621

Working medium excess and absolute pressure effects on pneumatic elements characteristics
22 p3967 A70-43566

HYDROSTATICS

Static and centrifugal filters merits for turbine engine lubrication systems, considering mechanical reliability, efficiency, dirt capacity and maintenance
01 p0164 A70-10686

Hydrostatic equation nonequilibrium terms role in single and multicomponent atmospheres, deriving solutions to Boltzmann equation
02 p0328 A70-12386

Hydrostatic models of sunspot penumbra and umbra, analyzing spot transparency influence on Wilson effect
03 p0571 A70-13596

De Sitter hydrostatic equations solution possible with help of boundary condition from external potential theory with/without assumed equilibrium in earth interior
04 p0678 A70-15051

Hydrostatic equilibrium in self gravitating core of rotating relativistic star, considering Newton and Einstein gravitation theories
05 p0914 A70-16648

Hydrostatic equilibrium solutions of internal structure of neutron stars using Brueckner equation
06 p1139 A70-17541

Moon figure and gravitational field determination based on hydrostatic theory, libration observations, node and perigee motion, lunar satellite trajectories and visible topography
06 p1141 A70-17824

Hydrostatic bearings design for minimum power loss and leakage and maximum stiffness, using geometry- dependent operating parameter
08 p1508 A70-21600

Stellar evolution computations numerical instability due to coupling between hydrostatic equilibrium and thermal processes
09 p1755 A70-22508

Optimization in epiphydrostatics and epiphydrodynamics, discussing liquid in rectangular tank, electro-magneto-epiphydrodynamics and thermal instability
10 p1866 A70-24108

Dynamic instability of multirecess hydrostatic journal bearings at critical shaft rotation velocity
13 p2418 A70-28745

Lagrange equations for translational motion and diameter variation of bubble system moving in hydrostatic field, taking into account dissipative forces
18 p3240 A70-36270

Hyperelastic bodies stability subject to conservative configuration dependent forces, formulating surface potential for hydrostatic loading
22 p4114 A70-42695

HYDROX ENGINES

U HYDROGEN OXYGEN ENGINES

HYDROXIDES

NT LITHIUM HYDROXIDES

NT POTASSIUM HYDROXIDES

Water vapor dissociation in dilute mixtures with Ar behind shock waves, studying OH concentrations using flash-absorption technique
08 p1548 A70-21355

Spectroscopic technique measuring OH concentrations behind shock waves by measuring absorption of OH lines, using water cooled RF powered lamp
09 p1683 A70-23512

Airglow hydroxyl emissions diurnal variations as function of height, using digital computer for time dependent solution of equations for oxygen- hydrogen atmosphere
10 p1872 A70-23826

Transitions in interstellar OH observed at National Radio Astronomy Observatory
10 p1948 A70-25000

Balloon-borne photometer for collecting twilight and daytime OH intensity and rotational temperature variations data
13 p2399 A70-29240

Electrochemical properties of sintered and film nickel hydroxide electrodes
22 p3966 A70-43542

HYDROXYCORTICOSTEROID

Transmeridian flights effect on diurnal urinary excretion of unconjugated 17- hydroxycorticosteroids in males, evaluating time shift effects
21 p3770 A70-41477

HYDROXYL COMPOUNDS

NT ALCOHOLS

NT ETHYL ALCOHOL

NT GLYCOLS

NT METHYL ALCOHOLS

NT PHENOLS

Enzymatic hydroxylation mechanism of p- hydroxybenzoate hydroxylase from *Pseudomonas putida*, describing product separation and purification
02 p0236 A70-12100

Night airglow emission intensities during IQSY concerning Na, OH and H alpha lines compared with intensities during IGY
02 p0292 A70-12433

Gas chromatography and mass spectroscopy study of fatty acids and hydroxy acids in 5000 year sediment from English Lake District
02 p0252 A70-12507

Hydroxy fatty acid methyl esters gas chromatography and mass spectrometry, noting trimethylsilylation usefulness for locating double bond
02 p0252 A70-12515

Gas chromatographic-mass spectrometric identification of aliphatic hydroxy acids in plants and sediments
02 p0252 A70-12521

G values of hyperfine components of OH radical molecular vibrational-rotational levels determined using optical RF double resonance
02 p0345 A70-12822

Maser-like stimulated OH emission regions observed in interstellar rarefied gas
06 p1148 A70-18391

Hydroxyl emission during auroras, noting absence of correlation with O I brightness fluctuations for IBC II-III aurora of 1 November 1968
09 p1671 A70-23496

Galactic radio sources examined for hydroxyl lines associated with H II regions, making observations in absorption and emission
10 p1936 A70-23904

Sagittarius sources A and B2 O18H absorption lines measured at microwave frequencies, determining oxygen isotopes abundance ratios
10 p1936 A70-23907

Microwave lines due to hydroxyl radical in interstellar medium, discussing emission from excited OH states
13 p2484 A70-28371

OH radio emission from IR stars, discussing spectra, polarization properties and red giant star model with expanding atmosphere
14 p2641 A70-30881

Galactic hydroxyl emission sources right ascensions, presenting coordinates and antenna temperature measurements
15 p2796 A70-31594

Serotonin, 5-hydroxyindoleacetic acid /5-HIAA/ and monoamine oxidase in bovine pituitary organ and median eminence
21 p3761 A70-40850

Galactic hydroxyl emission sources right ascensions, presenting coordinates and antenna temperature measurements
23 p4242 A70-44277

HYDROXYL EMISSION

Spectrophotometric airglow intensity measurements of OH, O I 6300, hydrogen H alpha and oxygen Herzberg I bands by airborne laboratory

17 p3080 A70-35769

Water vapor and OH spectra overlap, investigating association of galactic OH masers and water emission sources with IR stars

19 p3444 A70-37571

Night airglow hydroxyl rotational brightness temperature determined from emission spectra

19 p3412 A70-37777

Weak predissociation effects of hydroxyl compounds electron state on radiative lifetime via phase shift method

19 p3374 A70-38270

Double resonator ruby maser for observing transitions of interstellar hydroxyl, noting incorporation in modulation radiometer of astronomical telescope

21 p3835 A70-40641

Hydroxyl atmospheric airglow secondary production processes, discussing vibrationally excited oxygen molecules and rapid quenching by atomic O and HO sub 2

21 p3816 A70-41068

Laboratory measurement and low noise search in W3/OH for microwave emission lines in excited rotational level of interstellar OH

21 p3922 A70-41977

Interstellar molecules from stellar and galactic evolution viewpoint, emphasizing OH emission spectrum characteristics

23 p4238 A70-43801

Airglow hydroxyl emission altitude profile observations by rocket-borne photometer

23 p4191 A70-44407

Polarized maser emission from interstellar hydroxyl and water related to nonlinear weak magnetoplasma

24 p4381 A70-45258

HYGIENE

Physiological and hygienic data on oxygen partial pressure in space cabin atmosphere analyzed for manned space flights

07 p1220 A70-19502

Physiological and hygienic data on oxygen partial pressure in space cabin atmosphere analyzed for manned space flights

11 p1991 A70-26101

HYGROMETERS

NT PSYCHROMETERS

Barium fluoride film hygrometer elements for radiosondes, discussing manufacturing and testing methods

13 p2408 A70-29470

Time constant equations for hair and film radiosonde hygrometers, allowing for inertial errors in humidity and cloud boundary measurements

14 p2603 A70-30412

Balloon-borne optical dew point hygrometer and radiosonde measurements of atmospheric range refractive index

14 p2585 A70-30573

Humidity calibration utilizing precision wide range optically controlled thermoelectrically cooled dew point hygrometer

14 p2587 A70-31165

Humidity measurement and calibration systems, considering automatic optical dew point hygrometry

17 p3089 A70-35172

Chemically treated rolled hair properties following long term use in hair hygrometers

24 p4333 A70-45138

HYGROSCOPICITY

Warm fog clearing effectiveness by seeding with hygroscopic nuclei as function of fog droplet and seeding nuclei distribution

17 p3132 A70-35928

Hygroscopic materials warm fog clearing capabilities comparison, recommending urea and ammonium nitrate

20 p3664 A70-40065

Cetyl alcohol and water vapor growth by absorption and condensation on hygroscopic nuclei population in atmosphere under cooling

20 p3664 A70-40066

HYLLERAAS COORDINATES

Quantum mechanical inverse problem of elastic scattering theory, discussing Hylleraas solution for determining potential energy function from phase shift

12 p2274 A70-26899

HYPERBARIC CHAMBERS

Pressor response to epinephrine in hyperbaric atmospheres measured in cats under change of sympathetic tone

17 p3032 A70-35566

Hyperbaric oxygen effects on Coxsackievirus infection in mice

24 p4296 A70-45338

HYPERBOLAS

Meteors hyperbolicity based on statistical considerations and radiant distribution, discussing orbits perturbation and observation from earth

13 p2490 A70-29041

Elastic two cavity hyperboloid of revolution under stress due to rotating rigid stamp, solving torsional problem numerically

15 p2819 A70-32189

Acoustic and EM scattering by hyperbolic cylinder, considering plane wave incidence and line sources

15 p2700 A70-32406

Hyperboloid of revolution acoustic scattering, using Bloom-type method for hard hyperbolic cylinder

15 p2701 A70-32416

HYPERBOLIC FUNCTIONS

Spatial amplification criteria for hyperbolic wave equations extended to include parabolic equations, discussing convective and absolute instabilities

03 p0519 A70-13522

Simultaneous maximum likelihood estimation and coordinate conversion for redundant hyperbolic lines of position in radio navigation

[AIAA PAPER 68-888] 04 p0717 A70-15545

Numerical solution of nonlinear hyperbolic systems of differential equations using methods of differences, applying results to invariant cross section gas flow

06 p0964 A70-17236

Existence results for Cauchy problem for linear variable coefficient hyperbolic operators with multiple characteristics

06 p1094 A70-17898

Mixed problems with linear homogeneous boundary conditions with time-independent coefficients for semihyperbolic equations, discussing constraints

08 p1534 A70-21005

Solvability of linear problems with minimal smoothness constraints and of mixed problems for quasi-linear hyperbolic equations with coefficients and boundary conditions nonlinearities

09 p1712 A70-23120

Maximum principle condition of optimal control of monodimensional system described by nonlinear hyperbolic equations with time delay

11 p2021 A70-25340

Multistep formulations of optimized Lax-Wendroff method for nonlinear hyperbolic systems in space variables

13 p2440 A70-29086

Finite difference methods for approximating first order nonlinear hyperbolic differential equations, considering convergence

13 p2441 A70-29098

Unique solvability of mixed semihyperbolic linear equations of higher order with respect to spatial variables and time

15 p2768 A70-32475

Second order hyperbolic partial differential equations solution by characteristic grid and continuous characteristic methods

15 p2768 A70-32818

Second order hyperbolic partial differential equations analog solution based on method of characteristics, showing advantage over digital computer solution

15 p2768 A70-32819

Class of third order difference methods for hyperbolic equations in one and two dimensions applicable to nonlinear initial value problems

17 p1313 A70-35893

Initial boundary value problems for hyperbolic partial differential equations, including Cauchy problem

19 p3457 A70-37678

Nonlinear free boundary problem for hyperbolic one dimensional gas dynamics equations

20 p3658 A70-40105

Wave front arbitrary curvature, examining integration of weak discontinuities growth equation in quasi-linear hyperbolic system

22 p4062 A70-42953

Cauchy-Dirichlet type mixed problems for hyperbolic equations in cylindrical domain, using Zygmund-Calderon approximate calculus

23 p4210 A70-43978

HYPERBOLIC NAVIGATION

NT DECCA NAVIGATION

NT LORAN

NT LORAN C

NT LORAN D

Hyperbolic navigation systems circular fixes derivation error analysis

09 p1719 A70-22191

Hyperbolic position finding with synchronous satellites having frequency conversion unit for operations at higher frequency satellite signals

09 p1724 A70-23044

Error sensitivity to measurement uncertainties and satellite geometry of satellite linked hyperbolic navigation systems

09 p1724 A70-23046

Eurocontrol evaluation of navigational aid systems air traffic control, examining HARCO and VORDAC systems

19 p3468 A70-38641

HYPERBOLIC SYSTEMS

Wave propagation in inhomogeneous media, reducing quasi-linear hyperbolic partial differential equations to single nonlinear equation integratable by method of characteristics

03 p0525 A70-14184

Partial differential equations hyperbolic systems solutions by finite difference methods, considering schemes stability and viscosity from first differential approximation standpoint

07 p1326 A70-19599

Riemann invariants, discussing method of characteristics in physical and hodograph space applications and multidimensional hyperbolic systems

10 p1865 A70-24103

Quasi-linear hyperbolic systems interactions for rarefaction waves, applying Glimm difference method

16 p2943 A70-33782

Nonrigorous hyperbolic systems, discussing existence and uniqueness theorems contradiction in linear equations and proof of Cauchy problem

19 p3478 A70-37582

HYPERBOLIC TRAJECTORIES

Optimal acceleration from earth orbit to hyperbolic velocities of low thrust space vehicle, constructing asymptotic expansions near and far from central field

10 p1940 A70-24305

Nonadiabatic self absorbing radiative flow of gray gas around sharp cornered blunt body at hyperbolic speed by integral relations method

17 p3010 A70-34974

Spinning symmetric satellite attitude stability in hyperbolic orbit on flyby mission, examining by numerical integrations of equations of motion

17 p3181 A70-35753

Humason 1960e-1959X comet hyperbolic orbit, indicating solar system permanent membership

19 p3516 A70-37934

Minimum impulse transfer between circular orbit and hyperbolic trajectory velocity vector, assuming fixed transfer times

19 p3527 A70-38853

Travel time for trips to Neptune, calculating earth gravitational field escape hyperbola and waiting time before return

23 p4245 A70-44653

HYPERCAPNIA

Acid base responses of arterial plasma of anesthetized man during acute carbon dioxide partial pressure changes, discussing anesthesia effects

01 p0020 A70-10651

Rodents hypoxia tolerance following adaptation to hypercapnia by recording time of useful consciousness /TUC/ in repeated sloped surface clinging tests

01 p0026 A70-11249

Polycythemia and hypercapnia effects on apparent oxygenation of rat brain during acute hypoxia by changes in creatine phosphate concentration and lactate/pyruvate ratio

02 p0232 A70-11717

Hypercapnic atmosphere effect on human organisms found tolerable in state of rest or performing light labor

09 p1615 A70-22094

Hypoxia tolerance in white rats after exposure in hypercapnic medium

13 p2355 A70-29757

Single and combined hypoxia and hypercapnia effects on growing rats, discussing body weights, blood and histological measurements

13 p2357 A70-29948

Inspired carbon dioxide pressure effects on human response to physical exercise, noting dyspnea and intercostal muscle pain

13 p2360 A70-29949

Hypercapnic atmosphere effect on human organisms found tolerable in state of rest or performing light labor

15 p2685 A70-32690

Ambient temperature effects on rats and white mice tolerance to hypoxia, asphyxia and hypercapnia in nitrogen-oxygen and He-oxygen atmospheres

17 p3030 A70-35353

Orthostatic tolerance increase in animals by application of hyperoxic and hypercapnic gas mixtures

20 p3574 A70-40185

Hypercapnia effect on oxygen tension in ischemic myocardium in dogs using polarographic method

24 p4300 A70-45843

HYPERFINE STRUCTURE

G values of hyperfine components of OH radical molecular vibrational-rotational levels determined using optical RF double resonance

02 p0345 A70-12822

Concentrated Fe-Co alloys, effects of local atomic configurational changes on hyperfine interaction using Mossbauer spectroscopy

12 p2284 A70-27245

Isomer shift, Mossbauer recoil free fraction and nuclear quadrupole splitting for Fe57 in iron fluoride measured for lattice dynamics, fine and hyperfine structure

14 p2626 A70-30484

Formaldehyde rotational transition hyperfine components measured by molecular beam maser

20 p3702 A70-39008

Magnetism in austenitic stainless steels, discussing Mossbauer measurements of temperature dependence of hyperfine field and single line width

22 p4055 A70-43012

HYPERGEOMETRIC FUNCTIONS

Structural synthesis of functional control systems represented by first order differential equations, determining hypersurface

08 p1479 A70-20871

Heat insulated plate compressible boundary layer energy equations approximate solutions in hypergeometric functions

10 p1966 A70-23867

Cylindrical shell of variable thickness, deriving axisymmetric thermal stresses in terms of hypergeometric functions

18 p3336 A70-36137

Confluent hypergeometric functions indefinite integrals analytic expressions and reduction formulas

22 p4062 A70-42572

HYPERGEOMETRY

U HYPERSPACES

HYPERGOLIC ROCKET PROPELLANTS

Hydrogen peroxide oxidizer for higher characteristic mixture ratio in hybrid propulsion systems with hypergolic reactions ignition

[ONERA-TP-773] 02 p0352 A70-12209

Fluorine injectors for main tank injection of space vehicle liquid hydrogen tank, including study of hypergolicity and reaction product freezing

[AIAA PAPER 69-528] 04 p0736 A70-15406

Optimum penetration and separation mixing of unlike doublet injector element with hypergolic hydrazine and nitrogen tetroxide propellants

[JPL-TR-32-1487] 11 p2099 A70-25995

Oxygen difluoride-diborane reaction measured for pressure-temperature relationships and gas composition dependence on time, noting possible applications as hypergolic rocket propellants

11 p1995 A70-26138

Solid propellant radiant and hypergolic ignition, examining radiation absorption and surface reaction between fuel and gaseous oxidizer

20 p3689 A70-40081

Solid phosphorus triamide derivatives as ignition aids in hypergolic propellant systems, testing characteristics in interaction with oxidizers

21 p3865 A70-41404

HYPERONS

Hyperon and resonance particle effects on neutron star vibration, discussing vibrational energy storage and atmospheric electromagnetic generation

02 p0379 A70-12699

Neutron stars properties, using static cold stellar model to examine relation between central density and mass, and cool hyperonic matter composition

09 p1749 A70-21995

Neutron core star models based on realistic nuclear matter calculations and hyperons equation of state

17 p3157 A70-34844

Equilibrium theory of white dwarfs, neutron and hyperon stars, deriving equations for nonrotating objects composed of degenerate cold electron or neutron gas

20 p3704 A70-39472

Stable hyperon star existence in general relativity, discussing state equations for baryon matter, radial pulsation and superlumina and ultrabaryon conditions

21 p3888 A70-41116

HYPEROXIA

Patients with/without coronary heart disease inhaled various gas mixtures to induce arterial hypoxemia and hyperoxia, noting O availability for myocardial metabolism

01 p0016 A70-10440

Retinal vessels of humans at 11-2.0 atmosphere oxygen partial pressures, noting arterioles and venules dilation response to hypoxia and vasoconstriction response to hyperoxia

01 p0023 A70-10863

Protein metabolism of mice exposed to compression of air-oxygen mixture containing 27 percent oxygen, showing relationship to food intake

01 p0028 A70-11363

Oxygen consumption and rectal temperature in male mice confined in nitrogen and helium diluted hyperoxic atmosphere at specific temperature and humidity ranges

03 p0425 A70-13891

Phagocytic activity and carbohydrate metabolism in peripheral blood neutrophils of men exposed to atmosphere with increased O content, noting neutrophil energy exchange disorder role

03 p0426 A70-13901

Low body temperature effects on convulsive activity elicited by hyperbaric oxygen in unrestrained unanesthetized rats

04 p0629 A70-14448

Hyperbaric oxygenation effects on metabolism, comparing protective agents for rats exposed to 5 absolute oxygen pressures

04 p0631 A70-14681

Fire safety in hyperbaric systems isolated from environment by gas tight barrier

[ASME PAPER 69-WA/SAF-2] 04 p0784 A70-14836

White rats parenchymatous organs morphological changes following convulsion-producing exposure to pure hyperbaric oxygen

07 p1207 A70-19503

Vascular and dystrophic disturbances in rat parenchymatous organs in hyperbaric pure oxygen atmospheres, observing increased tissue eosinophilia

07 p1207 A70-19504

Hyperoxia effects on red blood cell/RBC/survival in rats on normal diets, noting relatively normal erythropoiesis after long term exposure

07 p1214 A70-19935

Protective ability of various compounds against hyperoxia at 5, 7, 9 and 11 atmosphere of pure oxygen

08 p1441 A70-20629

Rats acute hypoxia and altitude tolerances after prolonged exposure to hyperoxic atmospheres

08 p1446 A70-21437

Hyperbaric oxygenation treatment physiology and techniques, discussing limitations of equipment

09 p1620 A70-23017

Hyperbaric oxygen effect on heart muscle contractions in mammals, considering cells enzymatic activity and substrate utilization

09 p1623 A70-23586

Dogs respiratory response to arterial hydrogen ions at different carbon dioxide pressure levels during hypoxia or hyperoxia, discussing acid-base balance effects

11 p1986 A70-25674

Free radical content changes in mice organs under hyperoxia and hypoxia

11 p1986 A70-25941

White rats parenchymatous organs morphological changes following convulsion-producing exposure to pure hyperbaric oxygen

11 p1987 A70-26102

Respiratory gas exchange, heart rate, arterial acidemia and hypocapnia responses to physical work in hyperbaric environments and hyperoxia conditions

12 p2169 A70-27655

Altitude acclimatization protection against lung damage from exposure to oxygen at high partial pressures experimented on rats

12 p2170 A70-27659

Erythropoiesis inhibitor in blood from rabbit kidney vein during hyperoxia in nitrogen-oxygen atmosphere

14 p2535 A70-30155

Prolonged hyperoxia effect on red blood cell survival and hemolysis in rats on normal diet

15 p2681 A70-31786

Exercise and rest of humans under hypoxia and hyperoxia, determining blood acid-base state, ventilation and carbon dioxide partial pressure

16 p2849 A70-34256

Hyperbaric oxygen exposure produced hypertension and pulmonary edema, discussing carbon dioxide transport mechanism in blood

20 p3572 A70-39430

Orthostatic tolerance increase in animals by application of hyperoxic and hypercapnic gas mixtures

20 p3574 A70-40185

Hypoxia and hyperoxia effect on ballistocardiogram of healthy males, determining systolic and minute cardiac forces

21 p3763 A70-41231

Ballistocardiogram relationship to cardiac performance index in hypoxia and hyperoxia conditions, investigating systolic and minute cardiac forces

21 p3770 A70-41232

Sodium pentobarbital effect on oxygen poisoned mice, observing respiratory depression coupled with lung failure

21 p3764 A70-41480

Dehydrogenases activities in rabbit retina homogenates exposed to oxygen at high partial pressure for various time periods

21 p3765 A70-41487

Human and animal tolerances to hyperbaric oxygen, discussing response variation, toxicity modification, etc

22 p3976 A70-43701

Oxidative phosphorylation and oxygen consumption during hyperoxia in mitochondria preparations and tissue homogenates from white rat liver

23 p4146 A70-44316

Hyperoxia effects on rats in vivo white blood cell counts

24 p4297 A70-45340

HYPERPLANES

Localized states reconstructed as superposition of canonical states, using hyperplane generalization

15 p2766 A70-31437

HYPERSONIC AIRCRAFT

NT HYPERSONIC GLIDERS

Airframe-propulsion system integration for Mach 6 transport and Mach 12 research airplane, examining off-design operation effects and interaction of aerodynamic forces

[AIAA PAPER 70-542] 13 p2345 A70-29009

Dicyclohexyl/DCH/ endothermic dehydrogenation to diphenyl/DP/ over platinum-alumina catalyst without added hydrogen considered for hypersonic aircraft engine cooling

14 p2546 A70-31175

Hyperonic aircraft technology, discussing long range transport, reusable launch vehicles and propulsion systems

15 p2673 A70-31851

HYPERSONIC BOUNDARY LAYER

Turboamjet powered hypersonic aircraft axisymmetric inlet systems using forward translating cowl and centerbody for various air flow characteristics

[AIAA PAPER 70-687] 16 p2835 A70-33586

Slender hypersonic airfoil shape optimization for maximum lift to drag ratio for given profile area, chord and free stream conditions

19 p3352 A70-38304

Hypersonic airbreathers aerodynamic, structural and propulsive system interactions, discussing hydrogen fuel heat sink, airframe and engine cooling and airframe materials

[ICAS PAPER 70-16] 23 p4138 A70-44127

Hypersonic aircraft stability and control problems, discussing bulky engines and air intake and exhaust geometry

[ICAS PAPER 70-17] 23 p4138 A70-44128

All-body configuration hypersonic transport aircraft performance by computer synthesis, considering sonic boom constraint, maximum payload ratio and optimal cruise speed

[AIAA PAPER 70-1224] 24 p4291 A70-45957

HYPERSONIC BOUNDARY LAYER

Hypersonic dissociated laminar boundary layers with/without heat transfer calculated by integral method for case of thermodynamic equilibrium

01 p0003 A70-10933

Surface catalysis and variable transport properties effects on chemically frozen dissociated hypersonic air flow boundary layers enveloping flat plates and slender wedges

01 p0067 A70-11179

Ablation effects on transition Reynolds number of hypersonic boundary layer on slender cones

03 p0465 A70-12945

Explosion analogy to study hypersonic flow region behind shock wave including boundary layer at blunt body surface

03 p0406 A70-13332

Boundary layer transition limits at high Mach numbers, discussing transition on flat plate and bodies of rotation and Reynolds number

04 p0672 A70-15177

Magnetohypersonic boundary layer interactions, discussing boundary layer thickness relationship to Hartmann and Reynolds numbers

04 p0729 A70-15564

Boundary layer-induced pressures on flat plate in unsteady hypersonic flight calculated using tangent wedge approximation

[AIAA PAPER 70-184] 06 p1039 A70-18095

Integral moment method for interactions between laminar boundary layer and external supersonic flow applied to hypersonic laminar boundary layer near sharp expansion corner

[AIAA PAPER 70-186] 06 p1039 A70-18111

Flat plate boundary layer induced pressures in unsteady hypersonic flight

07 p1257 A70-19327

Hypersonic laminar boundary layer in strong viscous interaction region on wedge, determining velocity and enthalpy profiles, displacement thickness and induced pressure distributions, etc

09 p1606 A70-23294

Uncooled leading edge effect on cooled-wall hypersonic flat plate boundary layer transition, discussing leading edge bluntness effects

11 p1976 A70-25984

Interaction of laminar hypersonic boundary layer and supersonic corner expansion wave, discussing upstream influence, transverse pressure gradients and external flow

[AIAA PAPER 69-137] 12 p2211 A70-27826

Discrete sonic jets as boundary layer trips producing turbulent hypersonic flows with negligible intrinsic drag and downstream distortions

13 p2523 A70-29973

Explosion analogy to study hypersonic flow region behind shock wave including boundary layer at blunt body surface

14 p2528 A70-30711

Prandtl number effects on adiabatic wall temperature and pressure gradient at separation point for hypersonic compressible laminar boundary layer

14 p2566 A70-31027

Laminar hypersonic boundary layer interaction with corner expansion wave, presenting numerical solutions to viscous-inviscid equations for small turning angles

[AIAA PAPER 70-807] 17 p3065 A70-34457

Shock wave and viscous layer structures ahead of blunt body in rarefied hypersonic flow, using continuum theory

17 p3009 A70-34698

Displacement interacting boundary layer in symmetry plane region of flat hypersonic delta wing by control volume balances for mass, momentum and energy

17 p3010 A70-34975

Space vehicle reentry hypersonic boundary layer characteristics, considering air components chemical reactions due to excessive heat

18 p3346 A70-36384

Compressible hypersonic turbulent boundary layers solution by finite difference method, relating mixing length to velocity profile shape factor
20 p3684 A70-40269

Free stream disturbances influence on hypersonic boundary layer transition Reynolds number in heated and unheated flows
[AIAA PAPER 69-704] 21 p3809 A70-41744

Three dimensional hypersonic laminar boundary layer subdivided into inner and outer regions, obtaining flow description by matching inner and outer solutions
[AIAA PAPER 69-710] 23 p4182 A70-44565

Gas coolant slot injection into hypersonic laminar boundary layer, comparing experimental results to boundary layer equations numerical integration
23 p4282 A70-44694

HYPERSONIC COMBUSTION

Polymethyl methacrylate fuel for hypersonic air breathing propulsion systems, studying ablation, mixing and combustion processes
03 p0603 A70-12942

HYPERSONIC FLIGHT

Deviation angle optimization for cruising hypersonic jet aircraft, noting effect of rotation losses on design
03 p0406 A70-13019

Growth test vehicle /GTV/ flight test program for development of hypersonic flight to orbital speeds, discussing design, costs, capabilities, etc
03 p0582 A70-14188

Normal force component distribution and aerodynamic pressure position on rocket bodies at supersonic and hypersonic velocities
06 p0964 A70-17238

Tail screens and spoiler rings aerodynamic braking effect in hypersonic range, discussing separated boundary layer periodic unsteady flow
06 p0965 A70-17247

Boundary layer-induced pressures on flat plate in unsteady hypersonic flight calculated using tangent wedge approximation
[AIAA PAPER 70-184] 06 p1039 A70-18095

Flat plate boundary layer induced pressures in unsteady hypersonic flight
07 p1257 A70-19327

Streamlining design for high altitude hypersonic flight vehicles based on drag minimization at flight condition
07 p1189 A70-19717

Quasi-steady analysis of material under ablation-erosion heat transfer for hypersonic vehicles
11 p2149 A70-26144

Hypersonic test equipment, describing flight simulating hypervelocity wind tunnels, firing tunnels and shock wave tubes
13 p2384 A70-28927

Control efficiency of flaps at hypersonic speeds, considering thick turbulent boundary layer compression process
16 p2836 A70-33751

Nonequilibrium gas states evolution in detached wave front of hypersonic blunt body, comparing vibrational relaxation in free flight and wind tunnel flow
18 p3335 A70-35962

Thermal protection system based on radiation cooling for high altitude cruising hypersonic flight, achieving zero net mass transfer
21 p3950 A70-41745

Newtonian hypersonic aerodynamic theory for arbitrary bodies, discussing computational difficulty for shadowed areas
21 p3747 A70-41866

HYPERSONIC FLOW

Inviscid surface pressures calculated on slender wedges and cones at low frequencies and large oscillation amplitudes in hypersonic flow
01 p0003 A70-10854

Navier-Stokes hypersonic weak interaction theory for viscous heat conducting compressible fluid flow past slender axisymmetric body
01 p0003 A70-11097

Modified shock layer theory for predicting hypersonic internal flow in axisymmetric converging duct with attached shock at leading edge
02 p0276 A70-11854

Shock wave shapes in hypersonic flow past blunt conical nosed circular cylinders, using analogy with Savic perturbed hypersonic blast wave theory
02 p0277 A70-11862

Forced convection of hot wire in hypersonic flow, determining Nusselt-Reynolds number relationship for hot-wire anemometers
02 p0223 A70-12101

Brillouin scattering of hypersonic waves produced in liquid medium, using He-Ne laser light source
02 p0313 A70-12471

Hypersonic flow in thermodynamic equilibrium of diatomic dissociating gas with power law shock, investigating self similar solutions of Van Dyke small disturbance equations
03 p0405 A70-12925

Hypersonic flow characteristics on yawed circular cone surface at moderate angle of attack, applying results to inviscid and boundary layer flow computations
03 p0406 A70-12944

Shock wave shapes over axisymmetric power law bodies in hypersonic flow, noting asymptotic flow theory implications
03 p0406 A70-12946

Stagnation point velocity gradients for spherical segment models with bluntness ranging from hemisphere to flatnose cylinder in hypersonic flow
03 p0406 A70-12947

Explosion analogy to study hypersonic flow region behind shock wave including boundary layer at blunt body surface
03 p0406 A70-13332

Fracture and degree of material removal of glassy body in hypersonic gas flow, considering radiant heat conduction inside body
03 p0516 A70-13391

Approximate solution for hypersonic inviscid flow around spherically blunted bodies at small angle of attack, noting stagnation problems
03 p0407 A70-13547

Boundary layer transition from laminar to turbulent in hypersonic wind tunnel, determining Reynolds and Mach number effects
[ONERA-TP-737D] 03 p0467 A70-13641

Similarity laws in hypersonic flow of real gas around slender blunted bodies, particularly bodies with rough lateral surface
03 p0409 A70-13866

Hypersonic flow over blunt bodies, discussing Mach number, specific heat and blast wave limits
04 p0613 A70-14454

Hypersonic blunt body heat transfer prediction, including coupled effects of real gas behavior and slip boundary conditions
[ASME PAPER 69-WA/HT-28] 04 p0614 A70-14809

Convective heat transfer rates measured on cooled sharp leading edge flat plates at various angles of attack in hypersonic merged flow
[ASME PAPER 69-WA/HT-21] 04 p0614 A70-14813

Heat transfer from two dimensional hypersonic low density stream to wedges and sharp flat plates at expansion angles of attack
04 p0615 A70-14944

Circular cylinder drag in hypersonic transverse flows between continuum and free molecular flow, measuring drag and pressure distribution
04 p0615 A70-15089

Monograph on weak interactions on cones in supersonic and hypersonic flows, discussing flow divergence, measurement errors and data reliability
04 p0615 A70-15141

Hypersonic flow region about ducted blunt bodies of revolution, assuming correspondent flow conditions to maximum intake through duct
04 p0617 A70-15233

Hypersonic viscous gas flow past power law bodies under viscous interaction between boundary layer and inviscid flow extended to slender bodies
04 p0618 A70-15240

Delta wing of given volume and planform with maximum lift-drag ratio in hypersonic flow
04 p0618 A70-15243

Unsteady pressure at slender blunt body surface in three dimensional hypersonic gas flow
04 p0618 A70-15244

Three dimensional viscous and inviscid hypersonic flow interaction at rectangular corner, measuring surface and Pitot pressures, heat transfer rates, shear stresses, etc
04 p0620 A70-15533

Mass transfer and viscous interaction combined effects on axisymmetric hypersonic flow of perfect gas over slender bodies
[AIAA PAPER 68-717] 04 p0675 A70-15576

Hypersonic laminar separation of slip flow on slender cone with attached compression flares, using surface pressure measurements and Pitot surveys
[DFVLR-SONDDR-26] 04 p0620 A70-15577

Hypersonic glider performance in mesosphere entry using models located in rarefied gas flow at Mach 8
05 p0789 A70-15811

Slender wing with blunted leading edge to reduce thermal stresses at supersonic speed studied for aerodynamic characteristics in hypersonic flow
05 p0791 A70-17001

Equations of motion for hypersonic friction layers integrated using quadrature procedures
[DVL-913] 06 p1033 A70-17230

Frictionless hypersonic flow around blunt bodies of revolution, taking into account real gas effects in equilibrium and frozen flow calculations
06 p0965 A70-17242

Longshot free-piston wind tunnel for very high Reynolds number hypersonic flows, describing piston cycle, supply conditions, real gas effects on nozzle flow, etc
06 p1027 A70-17245

Inviscid hypersonic blunt body flow of hydrogen-oxygen mixtures in shock layer stagnation region
06 p0968 A70-17555

Small disturbance theory for internal conical inlet hypersonic flows, using method of characteristics for similarity law verification
[AIAA PAPER 70-127] 06 p0969 A70-18048

Kinetic flow regime in hypersonic flow past flat plate leading edge, using Boltzmann equation
[AIAA PAPER 70-181] 06 p0970 A70-18094

Hypersonic corner flow in He investigated by heat transfer, surface pressure, pitot surveys, oil and electron beam flow measurements
[AIAA PAPER 70-227] 06 p1039 A70-18110

Pressure interaction with slender cone in hypersonic flow
[AIAA PAPER 70-183] 06 p0972 A70-18126

Hypersonic aerodynamic measurements on cone, investigating effects of oscillatory mass addition on stability
[AIAA PAPER 70-217] 06 p0974 A70-18171

Hyperboloids and paraboloids in flow of Reynolds number 22-65000 and Mach number 10, discussing viscous interactions effects on pressure, drag and skin friction
[AIAA PAPER 70-182] 06 p0976 A70-18240

Rotational relaxation times for low density hypersonic nitrogen free jet, comparing measured and predicted impact pressures
06 p1043 A70-18279

Interactions between hypersonic neutral gas beam and orificed pressure gauge in spinning satellite noting dependence on angle of attack
06 p1159 A70-18290

Rotational and vibrational temperatures measured in hypersonic nonequilibrium rarefied gas flow field of cooled circular cylinder by electron beam technique
06 p1123 A70-18304

Knudsen iteration for predicting cooled blunt body near free molecular drag in hypersonic stream, using BGK model for collisions
06 p0979 A70-18313

Finite difference analysis of partial differential equations derived from Navier-Stokes equations in hypersonic leading edge problem in merged gas flow-layer regime
06 p0980 A70-18349

Wall pressure distribution, drag and lift measured on flat plates and wedges at Mach 8 rarefied gas flow for various leading edges
06 p0980 A70-18350

Cone bluntness effect on merging onset and downstream flow in merged region at Mach 8 and various Reynolds numbers
06 p0980 A70-18352

Sharp hypersonic flat plates inclined at various angles, obtaining flow field and merged region details
06 p0980 A70-18353

Hypersonic leading edge problem solved, using merged layer theory to provide link between noncontinuum flow upstream of transition and boundary layer flow downstream
06 p0980 A70-18354

Hypersonic rarefied argon and nitrogen flows over flat plate, investigating flow field and surface measurements from merged layer into transition regime
06 p0981 A70-18355

Drag of diffusely reflecting and cool slender cone in hypersonic flow, using nonlinear Boltzmann equation for hard spheres
06 p0981 A70-18359

Nitrogen hypersonic transitional flow at adiabatic sharp flat plate leading edge, presenting density, flow-field shape and local rotational temperature for various regions
06 p0982 A70-18361

Surface pressures and shock wave shapes on sharp flat plates and wedges in rarefied hypersonic transition flow with emphasis on merged layer regime
06 p0982 A70-18362

Hypersonic rarefied merged layer flow over sharp slender cones, using strong interaction theory and free molecular flow to analyze surface pressures
06 p0982 A70-18363

Continuum to free molecule hypersonic flow near flat plate sharp leading edge, studying Knudsen, Reynolds and Mach numbers effects
06 p0982 A70-18365

Orifice effect investigated for sharp flat plate in hypersonic rarefied flow, measuring surface pressure
06 p0982 A70-18366

Flow field measurements upstream of axisymmetric blunt body in rarefied hypersonic flow used to investigate merging between bow shock and boundary layer
06 p0983 A70-18372

Sphere drag measurements in low density hypersonic transition and near free molecular flow
06 p1124 A70-18373

Circular cylinders drag and pressure distribution in hypersonic range between continuum and free molecular flow
06 p0983 A70-18376

Drag on infinite cylinder in hypersonic nearly free molecular flow for various angles of attack, using kinetic approach
06 p0983 A70-18380

Hypersonic rarefied gas flow near stagnation point investigated to predict drag on sphere in high speed gas stream with densities in transition regime

06 p0984 A70-18382

Sphere and sharp slender cone drag coefficients in hypersonic transitional flow measured by flow modulation technique

06 p0984 A70-18389

Laminar boundary layer in hypersonic flow calculated by integral method, including effects of entropy gradient and induced pressure gradient

[ONERA-TP-784] 06 p0984 A70-18468

Stagnation point heating in hypersonic gas flow past blunt bodies, considering radiative transfer effects on shock wave temperature and density distribution, wave separation, etc

06 p0985 A70-18557

Three dimensional hypersonic flow past body solved assuming developable surface head shock wave

07 p1187 A70-18767

Inviscid hypersonic flow analysis for chemically relaxing air about wedges and pointed circular cones using Dorodnitsyn integral method

[DGLR-69-037] 07 p1188 A70-18986

Low density hypersonic flow over slender cone using air and He test gases

07 p1188 A70-19309

Velocity pulsations of hypersonic working flow in wind tunnel using miniature pressure transducers, discussing rms error

07 p1259 A70-19828

Viscous hypersonic flow past sphere in presence of strong injection through front surface at large Reynolds numbers using asymptotic method

07 p1189 A70-20146

Hypersonic flow past blunted cylinder at Mach number of infinity, investigating real gas effect using Lighthill ideal dissociating gas model

08 p1431 A70-20646

Aerodynamic characteristics of cylinder with wings in free molecular hypersonic flow of monoatomic gas at various angles of attack and slip

08 p1432 A70-21083

Monograph on hypersonic flow boundary layers research conducted by European countries, determining pressures, velocity and temperature profiles, skin friction, heat transfer, displacements, etc

[ONERA-TP-770] 08 p1601 A70-21844

Aerodynamic heating of blunt bodies, investigating dependence of hypersonic limit distribution on Mach number

09 p1603 A70-22419

Numerical solutions of variational problems concerning symmetrical wings with minimum drag and optimal aerodynamic efficiency in hypersonic flow

09 p1603 A70-22433

Drag on sharp cones in hypersonic flow, studying effects of intense transverse mass injection through porous walls

09 p1603 A70-22441

Vibration of thin bodies subjected to large angle attack in hypersonic flow, discussing curved bodies method to reduce problem to steady state flows

09 p1771 A70-22445

Aerodynamic characteristics of cooled blunt spherical bodies in low density hypersonic gas flow, discussing heat flux representation for different body surface temperatures

09 p1604 A70-22447

Inviscid hypersonic small disturbance theory applied to flow behind concave and convex exponential shock waves, determining supporting two dimensional airfoil surfaces

09 p1605 A70-23220

Drag coefficients for spheres and sharp cones in rarefied hypersonic air flow obtained in shock tunnel using free flight technique

[AIAA PAPER 69-140] 09 p1605 A70-23221

Small disturbance and similitude applicability to internal hypersonic conical flows in edge shock and Busemann inlets

09 p1606 A70-23245

Wedges calculated for lift-drag ratios at hypersonic speeds to find optimum surface geometry

09 p1606 A70-23282

Blast wave eigenvalues in asymptotic expansions approximation for hypersonic flows past blunt bodies

10 p1797 A70-23953

Inverse blunt body problem using integral relations method assuming inviscid axisymmetric hypersonic gas flow

10 p1798 A70-24116

Kinetic theory applied to model of interaction between two gas flows colliding at sharp leading edge at different hypersonic speeds

10 p1800 A70-24139

Hypersonic viscous interactions on insulated slender cone with mass injection assuming perfect gas flow and negligible transverse curvature effects

10 p1803 A70-24821

Rarefied hypersonic axisymmetric blunt body, examining bow shock and viscous layer upstream merging

10 p1804 A70-24823

Electrostatic cylindrical probes applicability to hypersonic flow field diagnostics

11 p2086 A70-25684

Flow near leading edge of sharp insulated and cooled flat plates, using Monte Carlo direct molecular simulation

11 p1975 A70-25968

Three dimensional hypersonic steady flow around blunt and pointed cones at nonzero angles of attack calculated by method of characteristics

[AIAA PAPER 69-187] 11 p1975 A70-25969

Radiation effects on viscous hypersonic low density stagnation flow using two layer model, calculating flow field and heat transfer coefficient

12 p2158 A70-28204

Supersonic and hypersonic motion past circular cone at angle of attack, analyzing for velocity and pressure distributions by linearizing conical motion equations

12 p2158 A70-28213

Radiant shock layer in hypersonic air flow past blunt bodies, showing effects on temperature field and density

12 p2159 A70-28245

Stagnation point position as function of gas thermodynamic state behind detached shock for spherical segment at incidence in three dimensional hypersonic flow

12 p2159 A70-28247

Forward inclined two dimensional circular arc slot nozzle jet flaps at hypersonic speeds, considering amplification and interaction processes

[AIAA PAPER 70-553] 13 p2340 A70-29018

Viscous shock layer equations of laminar hypersonic flow past blunt body at moderate to high Reynolds numbers

13 p2343 A70-29952

Surface pressure and heat transfer over blunt conical body in hypersonic flow with uniform mass addition of various gases

[AIAA PAPER 69-716] 13 p2523 A70-29977

Turbulent boundary layer characteristics on simple shapes in hypersonic flow, using mixing length theory and eddy exchange coefficient

14 p2564 A70-30262

Solar wind interaction with earth, moon, planets and comets, using hypersonic fluid analog involving shock wave interactions

14 p2631 A70-30360

Explosion analogy to study hypersonic flow region behind shock wave including boundary layer at blunt body surface

14 p2528 A70-30711

Hypersonic low density transitional flow over slender conical vehicle, calculating drag coefficient and density profiles

14 p2529 A70-31365

Viscous gas hypersonic flow past blunt nosed bodies based on Navier-Stokes equation

15 p2671 A70-31481

Hypersonic gas flow characteristics incident on elliptic paraboloid and triaxial ellipsoid at arbitrary angles of attack

15 p2672 A70-31647

Heat flux measurements in hypersonic rarefied flow by thin film surface thermometer

15 p2825 A70-31820

Hypersonic near free molecule flow over flat plate with sharp leading edge, using linearized kinetic B-K-G equation for small thermal accommodation coefficient

15 p2673 A70-32796

Lifting body pressure and heat transfer measurements at various angles of attack in hypersonic flow

[DGLR-70-029] 15 p2828 A70-32841

Supersonic and hypersonic gas flow past blunt bodies, using finite difference and integral relation methods

16 p2890 A70-33244

Book on aerodynamics of bodies of revolution covering hypersonic flow parameters effects, method of characteristics, slender body drag, blunt bodies, rarefied gas aerodynamics, etc

16 p2834 A70-33271

Equations of supersonic and hypersonic motion past circular cone by linearized method based on small perturbations with respect to nearly incompressible flow

16 p2835 A70-33746

Far wake properties of reentry body in hypersonic air flow calculated with or without chemical kinetics, using finite difference method

16 p2836 A70-33753

Aerodynamic wake structure of cylinders and spheres in hypersonic rarefied gas flow as function of Mach and Knudsen numbers

16 p2836 A70-33756

Laminar near wake of cylinder at free stream Mach 6, using modified Lees-Reeves method

16 p2836 A70-33762

Longshot free piston gun tunnel for high Reynolds number hypersonic flow tests

16 p2889 A70-33855

Transpiration and film cooling effects on aerodynamic characteristics of slender cone in hyper-

sonic flow tested in hypervelocity wind tunnel using mass injection

16 p2837 A70-33857

Experimental and numerical nonequilibrium shock layer around cones in hypersonic pure oxygen flows with simultaneous rotational, vibrational and dissociation relaxation

[AIAA PAPER 69-136] 16 p2894 A70-33858

Hypersonic internal flow investigation by differential equation numerical integration, determining shock shape and surface pressure

16 p2838 A70-33881

Boundary layer to wake bleed venting for flare-induced separation prevention in hypersonic flow over blunt bodies

16 p2838 A70-33884

Heat transfer and pressure drag of axisymmetric body in hypersonic flow, obtaining minimum energy nose and leading edge shapes by Pontryagin principle

[AIAA PAPER 70-825] 16 p3001 A70-33940

Axisymmetric detached shock preceding blunt body immersed in hypersonic monatomic gas flow, considering radiative ionization in cold precursor by differential approximation

16 p2839 A70-34252

Hypersonic flow of chemically reacting binary mixture of oxygen atoms and molecules past blunt body, presenting viscous shock layer equations and slip boundary conditions

[AIAA PAPER 70-805] 17 p3005 A70-34458

Low density hypersonic flow over finite width flat plate at zero incidence

17 p3007 A70-34473

Hypersonic viscous interaction on curved surfaces, extending Cheng inclined flat plate analysis

[AIAA PAPER 70-782] 17 p3007 A70-34474

Hypersonic flow field around yawed half angle cone from wind tunnel measurements including surface pressure distributions and flow visualization photographs

17 p3007 A70-34485

Hypersonic flow of shock heated plasma past axisymmetric blunt body and onboard magnetic source, using numerical method

17 p3008 A70-34491

Nozzle wall hypersonic turbulent boundary layers at free stream Mach number using pitot, hot wire, and wall fluctuation and static pressure measurements

[AIAA PAPER 70-746] 17 p3065 A70-34497

Nonequilibrium air ionization in hypersonic viscous shock layers in flow about axisymmetric blunt bodies

17 p3008 A70-34501

Time dependent solution for inviscid hypersonic flow of chemically reacting gas mixture about blunt bodies

[AIAA PAPER 70-771] 17 p3009 A70-34502

Yawed two dimensional wedges in hypersonic stream, including leading edge bluntness, viscous interaction and angle of attack effects

[AIAA PAPER 70-783] 17 p3009 A70-34503

Collection of papers on gas dynamics covering hypersonic flow, rarefied gas and plasma dynamics, heat and mass transfer, etc

17 p3069 A70-35031

Two dimensional hypersonic viscous flow, analyzing viscosity and bluntness induced pressure effects

17 p3010 A70-35034

Hypersonic flow past slender bodies, discussing inviscid flows, outer edge singularity of boundary layer and three dimensional interaction on needle-like bodies

17 p3010 A70-35035

Adiabatic and chemically inactive hypersonic continuum flow around blunt body, analyzing flow field

17 p3010 A70-35036

Dihedra placed at angle of attack in hypersonic rarefied gas flow, investigating base flow and near wakes

17 p3010 A70-35047

Hypersonic rarefied gas flow around flat plate with sharp leading edge and circular cylinder in transition region

17 p3011 A70-35241

Hypersonic flow containing dust, investigating for cosmic dust collection and analysis, discussing conditions for collected particle size distribution correspondence to original distribution

17 p3012 A70-35921

Hypersonic gas flow around blown plane of segmentally blunted cones at large angle of attack, using two dimensional model

18 p3206 A70-36258

Viscous hypersonic flow around nonslender bodies with mass supply at small Reynolds numbers, using thin shock layer model

18 p3206 A70-36259

Hypersonic flow around delta wings of finite thickness with supersonic leading edges

18 p3206 A70-36260

Nonequilibrium ionized hypersonic flow over blunt body at low Reynolds number, using thin shock layer assumption in analysis

18 p3208 A70-36689

Ablating nose equilibrium shape in laminar hypersonic flow during reentry

18 p3208 A70-36707

- Hypersonic aerodynamic characteristics of sharp slender right circular cones at angles of attack, using Newtonian impact theory modified for flow separation effects
[AIAA PAPER 70-979] 20 p3558 A70-39550
- Three dimensional supersonic and hypersonic gas flow by Oseen equations, obtaining asymptotic flow field
20 p3609 A70-39656
- Hypersonic test flow in arc heated wind tunnel, measuring freestream Pitot pressure, mass flux, stagnation point heat transfer rate and wall pressure
20 p3607 A70-40270
- Laminar viscous effects over blunt cones at hypersonic conditions, taking into account first and second order boundary layer theories
20 p3559 A70-40285
- Wedge angle large amplitude slow oscillations in hypersonic and supersonic flows, examining attached bow shock
20 p3559 A70-40288
- Hypersonic flow pattern past windward side of triangular wing with supersonic leading edges, joining potential and vortex regions behind shock wave
21 p3743 A70-40609
- Entropy layer in hypersonic flows, determining body configuration from shock wave shape described by coordinates power function
21 p3743 A70-40610
- Axisymmetric detached shock before blunt body in hypersonic monatomic gas flow, obtaining radiative ionization patterns in cold precursor
21 p3950 A70-41731
- Upstream disturbances propagation during hypersonic flow boundary layer interaction
21 p3748 A70-42205
- Dust content effect on hypersonic wind tunnel flow test results, noting drag force on slender and blunt nosed models
21 p3749 A70-42224
- Hypersonic viscous interaction between laminar boundary layer growing over flat plate and external flow field extended to curved surfaces
22 p3958 A70-42688
- Dissociated and ionized hypersonic flows of hydrogen heated by electric arc techniques, investigating flows in wind tunnel nozzles
22 p4011 A70-42759
- Pressure distribution, force and heat transfer measurements on varied-configurations of lifting reentry vehicles in hypersonic flow
[ICAS PAPER 70-03] 23 p4132 A70-44117
- Heat transfer and shock wave shapes about blunt slender cones in viscous-inviscid coupling hypersonic flow
23 p4134 A70-44569
- Optimum thickness ratio and minimum drag of slender bodies in hypersonic viscous flow as function of altitude
23 p4134 A70-44571
- Dissociative nonequilibrium hypersonic flow of low density gas mixtures over flat plate in free stream, noting catalytic wall effect on flow field
23 p4135 A70-44604
- Thick wedge large amplitude harmonic oscillations in hypersonic flow
23 p4270 A70-44609
- Hypersonic three dimensional flow past elliptic cross section slender bodies, discussing disturbance equations, pressure, velocity and density distributions and shock shape
[DFVLR-70-27] 23 p4135 A70-44633
- Radiative energy transfer during interaction between blunt body and hypersonic gas flow, noting effect on flow temperature, shock wave separation, etc
23 p4136 A70-45020
- Inviscid hypersonic flow fields past lower/compression/ surface of delta wing calculated by one strip approximation of integral relations method
24 p4289 A70-46245
- HYPERSONIC FORCES**
- Scaling laws for nose bluntness effects on hypersonic aerodynamics of bodies of revolution
[AIAA PAPER 68-1158] 04 p0620 A70-15530
- Hypersonic cruise vehicle data to define temperature, load criteria and materials for air induction systems associated with two dimensional variable geometry inlet
[SAE PAPER 690664] 05 p0791 A70-15839
- HYPERSONIC GLIDERS**
- Hypersonic glider performance in mesosphere entry using models located in rarefied gas flow at Mach 8
05 p0789 A70-15811
- Wind tunnel tests for aerodynamic and thermal environment of hypersonic glider VERAS /Vehicle for Experimentation and Research in Aerothermodynamics and Structures/
[DGLR-69-042] 07 p1187 A70-18981
- Hypersonic orbital glider range maximization, analyzing optimal angle of attack by use of rectangular velocity components
07 p1393 A70-19341

- Hypersonic glider VERAS aerodynamic and thermal environments, noting wind tunnel tests by thermosensitive paint method
16 p2837 A70-33765
- Nonrolling lifting gliding vehicle hypersonic longitudinal dynamic stability, applying analysis to space shuttles
[AIAA PAPER 70-977] 20 p3715 A70-39552
- HYPERSONIC HEAT TRANSFER**
- Lifting body pressure and heat transfer measurements at various angles of attack in hypersonic flow
[DGLR-70-029] 15 p2828 A70-32841
- Heat transfer and shock wave shapes about blunt slender cones in viscous-inviscid coupling hypersonic flow
23 p4134 A70-44569
- HYPERSONIC INLETS**
- Hypersonic cruise vehicle data to define temperature, load criteria and materials for air induction systems associated with two dimensional variable geometry inlet
[SAE PAPER 690664] 05 p0791 A70-15839
- Starting criterion for hypersonic inlets with large turbulent boundary layers, considering total pressure recovery from all shock and viscous losses
14 p2529 A70-30865
- Turbofanjet powered hypersonic aircraft axisymmetric inlet systems using forward translating cowl and centerbody for various air flow characteristics
[AIAA PAPER 70-687] 16 p2835 A70-33586
- HYPERSONIC NOZZLES**
- Mach numbers, electron density and temperature in partially ionized frozen equilibrium flows of Ar in hypersonic nozzle
01 p0063 A70-10994
- Turbulence in hypersonic nozzle due to two phase flow of ideal gas and solid spherical particles, discussing thermal and dynamic differences
03 p0407 A70-13494
- Approximate solution for far downstream flow of condensation in hypersonic wind tunnels and nozzles for colloidal thrusters and EHD generators
04 p0621 A70-15600
- Nozzle boundary layer displacement thickness at Mach 30-70 in helium using Langley hotshot tunnel tests
04 p0675 A70-15603
- Flow parameters measured in low density hypersonic nozzle, estimating error of all relevant parameters
06 p1030 A70-18302
- Dense gas effects in free piston hypersonic wind tunnel, discussing Longshot facility, free piston cycle, reservoir conditions decay and hypersonic nozzle flow
[AIAA PAPER 69-169] 07 p1249 A70-19310
- Frozen flow effect in hypersonic wind tunnel nozzle on parameters of nonequilibrium incident flow past wedge
09 p1604 A70-22446
- Laminar boundary layer characteristics in axisymmetric hypersonic nozzle calculated by finite difference method
10 p1804 A70-25187
- Laminar boundary layers in low density supersonic and hypersonic conical and axisymmetric nozzles, treating displacement, transverse curvature, velocity slip and temperature jump
[AIAA PAPER 69-633] 13 p2386 A70-28513
- Film cooling protecting axisymmetric nozzle slot surface exposed to high temperature Mach 6 air injection
18 p3242 A70-36695
- Hypersonic nozzle ignition phenomenon in reflected shock wind tunnel
19 p3352 A70-38170
- HYPERSONIC REENTRY**
- Radiant heat transfer in hypersonic aerodynamic heating, discussing radiant flux and carbon dioxide concentration in reentry problems
01 p0219 A70-11625
- Acoustic technique for flow transition detection on hypersonic ablating reentry vehicles, presenting supersonic wind tunnel test results
04 p0620 A70-15531
- Massive blowing effect on stagnation point radiative energy transfer of ablative heat shield during planetary entry at hypersonic velocities
[AIAA PAPER 70-203] 06 p0971 A70-18101
- Radiating gas flows during hypersonic planetary reentry, discussing atmospheric composition, shock layer characteristics, nonequilibrium flows, etc
06 p0985 A70-18558
- Self contained optimal control synthesis for spacecraft entering atmosphere at first cosmic speed, considering landing spots dispersion component decrease
13 p2500 A70-28407
- Spacecraft trajectory control for hypersonic atmospheric entry
13 p2500 A70-28411
- Hypersonic viscous effects on space shuttle entry trajectory, measuring lift and drag in free flight regime
23 p4258 A70-44526

HYPERSONIC SHOCK

- Graphite sphere mass erosion in low temperature hypersonic air plasma shock flow, determining breakdown temperature and mass entrainment rates
03 p0517 A70-13741
- Shock tube measurements of ionization relaxation times behind shock waves in air at shock Mach numbers from 8 to 17
03 p0471 A70-14360
- Axisymmetric radiating flow behind paraboloidal shock in ideal inviscid gas hypersonic stream, using differential approximation method for blunt body solution
04 p0669 A70-14937
- Viscous shock layer at hypersonic blunt body stagnation point, applying finite difference and nonlinear overrelaxation methods to seven species air model
04 p0620 A70-15539
- Model sampling or Monte Carlo applied to normal shock, giving temperature and density profiles for Mach 10 shock
06 p1050 A70-18337
- Normal hypersonic shock wave structure in diatomic gas, measuring density by electron beam fluorescence technique
06 p1050 A70-18341
- Surface temperature effects on low Reynolds number hypersonic shock layer development over flat plate sharp leading edge
06 p0982 A70-18364
- Hypersonic spherical gas expansion into finite pressure region with transition from supersonic to subsonic flow in shock wave, discussing structure and pressure effects
09 p1658 A70-22116
- High intensity shock wave propagation and generation of high enthalpy hypersonic flow studied to determine IMF-2 hypersonic shock tube performance limit
10 p1871 A70-24795
- Solid particle motions in dusty gas in inviscid hypersonic shock layers of slender wedges and cones and stagnation regions of cylinders and spheres
12 p2156 A70-27827
- Nonuniform external flow near blunt body stagnation point in diverging hypersonic thin shock layer
18 p3206 A70-36267
- Spark photography of models in free flight in hypersonic shock tunnel
[SMPTE PREPRINT 99] 22 p4032 A70-43035
- HYPERSONIC SPEED**
- Aerodynamic flight characteristics of lifting reentry bodies in subsonic to hypersonic range in wind tunnel tests
06 p1154 A70-17249
- Velocity synchronized Fourier transform hologram camera system for recording hypervelocity particles
09 p1688 A70-23775
- Drag measurement for star-shaped body at hypersonic speeds, comparing results with cone-shaped model
10 p1799 A70-24122
- Compression process in turbulent boundary layer on control surface at hypersonic speeds, noting influence on surface effectiveness and heating
[ONERA-TP-814] 11 p1979 A70-25815
- Electric arc shape moving at hypersonic speed investigated by Newtonian pressure distribution for thin shock layer
11 p2090 A70-25992
- Flat-top airfoil determined for lower surface shape to maximize lift drag ratio at hypersonic speeds using calculus of variations
11 p1977 A70-26397
- Aerodynamic effects of bluntness on slender cones in free flight tests at Mach 17
[AIAA PAPER 70-554] 13 p2340 A70-29019
- Supersonic slot cooling for surface protection at hypersonic speeds using contoured axisymmetric nozzle with streamlined body
14 p2663 A70-30257
- Longitudinal and transverse hypersonic mm waves excitation in quartz single crystal at liquid helium temperature
16 p2952 A70-33258
- Fighter engine capabilities in Mach 3 to 7 speed range, discussing propulsion system configurations
[AIAA PAPER 70-943] 16 p2965 A70-33542
- Far wake linear stability behind circular cylinders at hypersonic speed, comparing experiments and predictions
16 p2838 A70-33898
- Unperturbed atmospheric parameters calculation from surface measurements of blunt body at hypersonic speeds under various aerodynamic conditions
18 p3247 A70-36181
- Hypersonic flat and biconvex conical wings, calculating yaw effects on shock shape and pressure distribution
21 p3761 A70-40918
- Hypersonic aerodynamic deceleration devices for axisymmetrical bodies with cylindrical main sections and various front sections, using gun tunnel techniques
[AIAA PAPER 70-1174] 21 p3746 A70-41839

- Continuous surface of revolution parachute for supersonic/hypersonic speeds, performing wind tunnel tests
[AIAA PAPER 70-1173] 21 p3754 A70-41840
- Hypersonic sound speeds measured in methane at moderate pressures by spontaneous Brillouin light scattering experiments
21 p3830 A70-41938
- Ultrabright nanosecond flash light generation technique, using superradiant light sources for shadowgraph photography in high resolution hypervelocity field
[SMPT PREPRINT 74] 22 p4037 A70-43070
- European hypersonic aerodynamic research activities, describing Eurohyp program
22 p4127 A70-43507
- Longitudinal and transverse hypersonic mm waves excitation in quartz single crystal at liquid helium temperature
23 p4218 A70-44281
- HYPERSONIC TEST APPARATUS**
- Free flight ranges for hypersonic simulation from Mach 1 to Mach 30, noting onboard high-g telemetry instrumentation
04 p0663 A70-14723
- Free flight static, dynamic stability and drag data for 10 degree semiangle cone obtained at 8-16 Mach numbers
[AIAA PAPER 69-133] 09 p1605 A70-23218
- Hypersonic test equipment, describing flight simulating hypervelocity wind tunnels, firing tunnels and shock wave tubes
13 p2384 A70-28927
- Hypersonic velocity and turbulence measurements in wind tunnels, using spectral analysis of Doppler shifted laser light
17 p3103 A70-34849
- HYPERSONIC VEHICLES**
- NT HYPERSONIC AIRCRAFT**
- NT HYPERSONIC GLIDERS**
- Structural design and fabrication of load bearing Ta alloy radiation cooled elevon control surface for high L/D hypersonic flight vehicle
02 p0306 A70-11941
- Interaction between surface liquid film and hot gaseous turbulent boundary layer analyzed for hypersonic vehicle surface thermal protection design problems
04 p0669 A70-14927
- Hypersonic cruise vehicle data to define temperature, load criteria and materials for air induction systems associated with two dimensional variable geometry inlet
[SAE PAPER 690664] 05 p0791 A70-15839
- Orbit-shuttle and SST craft hypersonic flight vehicles design, discussing aerodynamic heating, shock stresses and propulsion system requirements
05 p0797 A70-17087
- Air breathing launch vehicle for earth-orbit shuttle assessed in light of hypersonic propulsion and configuration development
[AIAA PAPER 70-269] 07 p1365 A70-20380
- Range, block speed and fuel-weight ratio formulas for hypervelocity, boost glide and ballistic vehicles
08 p1582 A70-21871
- Slender body approximation for shape determination of nonlender hypersonic body of revolution with minimum convective heat transfer rate
09 p1788 A70-22931
- Cone roll dynamics-ablation patterns coupling in hypersonic wind tunnels
[AIAA PAPER 70-562] 13 p2340 A70-29025
- Hypersonic cruise vehicles viscous interactions areas, examining compression corners, shock interactions, laminar and turbulent flow, boundary layer separation, etc
[AIAA PAPER 70-781] 17 p3007 A70-34475
- Aerospace thermophysics considerations in spacecraft and hypervelocity vehicles systems thermal design, discussing thermal control and control coatings optical and radiative properties
[AIAA PAPER 70-812] 17 p3194 A70-34509
- Laminar heating in hypersonic vehicles interior corners, analyzing helium tunnel heat transfer data for various intersecting wedge corners
20 p3737 A70-39700
- Wave-riders aerodynamics and heat transfer, investigating lift to drag ratios for supersonic and hypersonic vehicles
[ICAS PAPER 70-18] 23 p4276 A70-44129
- HYPERSONIC WAKES**
- Spectrum function in Booker scattering formula /first order Born approximation/ for dielectric constant fluctuations in hypersonic wake plasmas
03 p0529 A70-12908
- Hypersonic far wake mean flow properties behind two dimensional slender body wind tunnel models at zero angle of attack
[AIAA PAPER 68-700] 04 p0621 A70-15578
- Hypersonic near wake, discussing correlations from optical studies, laminar near wake, blunt body and turbulent wake measurements
05 p0790 A70-16120
- Laminar hypersonic blunt cone wakes, discussing flow fields and axial static pressure distributions
06 p0968 A70-17553
- Axial profile characteristics of hypersonic near wake of slender circular cone based on pitot pressure, static pressure and stagnation temperature measurements
06 p0968 A70-17916
- Cylinder wakes in rarefied gas flow at Mach 20, obtaining density profile data from electron gun, impact pressure and cooled film probe measurements
06 p0984 A70-18387
- Model for predicting laminar-turbulent transition point in hypersonic wake of two dimensional laminar viscous flow
06 p0985 A70-18499
- Anamorphic optics to focus luminous wakes of hypervelocity projectiles onto focal plane of slitless spectrograph in free flight ballistic range launching
07 p1287 A70-20082
- Density profiles of sphere wake in rarefied hypersonic flow compared to free molecular flow calculations
08 p1431 A70-20591
- Gas and electron density fluctuations in weakly ionized turbulent wake behind hypersonic spheres and cones
11 p1978 A70-26773
- Intermittency role in free turbulent flow and EM wave scattering by hypersonic wakes
11 p1978 A70-26776
- Laminar near wake flow field of two dimensional adiabatic circular cylinder with surface mass transfer
[AIAA PAPER 69-67] 13 p2343 A70-29951
- Electron density fluctuation measurements in wakes behind hypersonic sphere projectiles, using Langmuir probes
[AIAA PAPER 70-730] 16 p2834 A70-33489
- Chemiluminescent processes accounting for radiation from turbulent wake flows behind hypersonic spheres in air
[AIAA PAPER 70-729] 16 p2997 A70-33492
- Aerodynamic wake structure of cylinders and spheres in hypersonic rarefied gas flow as function of Mach and Knudsen numbers
16 p2836 A70-33756
- Steady state plasma wind tunnel for flow around ionospheric satellites, studying wakes of cylinders and spheres
16 p2837 A70-33866
- Far wake linear stability behind circular cylinders at hypersonic speed, comparing experiments and predictions
16 p2838 A70-33898
- Complex impedance measurements for monopole antenna for electron densities in/out of OGO satellite wake in upper ionosphere
17 p3080 A70-35771
- Shock wave attenuation and reflection effects on turbulent hypersonic wakes in ballistic ranges
18 p3237 A70-36708
- Hypersonic sphere turbulent wake velocity measurement by spark technique, determining distribution from least mean squares fits of Gaussian curves
20 p3559 A70-40283
- Mean density and temperature measurements in hypersonic Ti spheres wakes in nitrogen atmosphere, using electron beam fluorescence probes
21 p3745 A70-41754
- Hypersonic projectile turbulent wake measurements, discussing velocity, mass density and temperature determination
[ICAS PAPER 70-07] 23 p4132 A70-44130
- HYPERSONIC WIND TUNNELS**
- U HYPERVELOCITY WIND TUNNELS**
- HYPERSONICS**
- Nose bluntness, angle of attack and oscillation amplitude effect on hypersonic unsteady aerodynamics of slender cones
[AIAA PAPER 70-216] 06 p0969 A70-18059
- HYPERSPACES**
- Microscopic particle mass spectra in six dimensional scalar, spinor and vector fields, noting cosmological implications and eight dimensional theory
14 p2616 A70-30342
- HYPERTENSION**
- Cross adaptation criteria and modifications in physiologic and biochemical processes in man and mammals, demonstrating positive cross acclimation between hypertension and hypoxia exposure
02 p0242 A70-12825
- Postmortem coronary angiographies showing role of arterial hypertension in coronary pathology
03 p0426 A70-13939
- Pulmonary hypertension in congenital heart diseases as function of blood flow
20 p3571 A70-39367
- Hyperbaric oxygen exposure produced hypertension and pulmonary edema, discussing carbon dioxide transport mechanism in blood
20 p3572 A70-39430
- Human arterial hypertension, correlating ECG changes with systemic hemodynamics
20 p3573 A70-40069
- Ballistocardiograms hypertensive observations multivariate analysis, discussing factors for various groups discrimination
21 p3763 A70-41230
- Hypertensive mechanisms - Conference, Canberra, Australia, January 1970
24 p4298 A70-45803
- Inherited hypertension genetic and autonomic factors, discussing rats crossbreeding for genetic contribution ratio in males vs females, age effects, etc
24 p4299 A70-45806
- Conduit arteries viscoelastic properties in normal and hypertensive dogs from recorded pressure and diameter waves
24 p4299 A70-45808
- Arterial hemodynamics in hypertension, discussing pulse changes mechanism as consequence of decreased arterial distensibility via disturbed relationship between ventricular ejection wave and impedance characteristics
24 p4299 A70-45809
- HYPERTHERMIA**
- Hot environment and hyperthermy effects on oxygen consumption in subjects performing muscular exercise
13 p2360 A70-29947
- Extreme heating effects on polypnea reaction in aquatic birds
18 p3219 A70-36537
- HYPERTONIA**
- U OSMOSIS**
- HYPERTROPHY**
- U GROWTH**
- HYPERVELOCITY ACCELERATORS**
- U HYPERVELOCITY GUNS**
- HYPERVELOCITY CRATERING**
- U HYPERVELOCITY PROJECTILES**
- U PROJECTILE CRATERING**
- HYPERVELOCITY FLOW**
- Time asymptotic solutions for hypervelocity blunt body flow field with coupled nongray radiation, treating shock as discrete surface
[AIAA PAPER 70-865] 16 p2999 A70-33908
- HYPERVELOCITY GUNS**
- Hypervelocity gas, electromagnetic, explosive drive and exploding wire accelerometers and high explosive, shaped charge, plasma drag and electrostatic accelerators for projectile impact studies
15 p2718 A70-32783
- HYPERVELOCITY IMPACT**
- Hypervelocity impact of small different diameter right circular cylinders, describing launching method using light gas gun
03 p0583 A70-12918
- Penetration criterion for double walled structures subject to hypervelocity meteoroid impact providing choice of protective material properties
[AIAA PAPER 68-1058] 03 p0584 A70-12921
- Micrometeorite detection involving impact stress wave monitoring by strain gages embedded in viscoelastic plastic
03 p0487 A70-13573
- Hypervelocity impact craters formed in low and variable strength laboratory materials to provide insight into formation mechanics and resultant structures of meteorite craters
03 p0603 A70-14349
- Meteoroid impact mass loss and formation of planets, investigating projectile-ejecta ratio and dependence on escape speeds
05 p0910 A70-16393
- Bumper materials effect on two component hypervelocity impact shields performance, noting material density influence
[AIAA PAPER 69-379] 07 p1310 A70-19713
- Steel balls impact on polyurethane foam, porous rubber and fiber materials, noting effects on both pellets and targets
09 p1769 A70-22123
- Hypersonic wind tunnel for erosion test of multiple particle impacts, considering dust on cork, carbazole and silicone rubber
[AIAA PAPER 69-341] 09 p1656 A70-23240
- Two plate meteoroid shields effectiveness determined by analyzing debris cloud ejected behind front plate after hypervelocity impact
[AIAA PAPER 69-380] 11 p2138 A70-26132
- Impact crater cross section in fused silica, describing photomicrographic technique for distinguishing hypervelocity from low energy impacts
[AIAA PAPER 69-367] 11 p2138 A70-26133
- Filamentary crystal growth associated with hypervelocity microparticles impact upon Cu foil
13 p2513 A70-29264
- Hypervelocity impact dynamics on copper cube targets imbedded with nickel wires, discussing terminal positions, Vickers hardness, flow fields, etc
[AIAA PAPER 69-368] 14 p2657 A70-30765
- Collection of papers on high velocity impact phenomena covering strong shock waves, materials reaction, etc
15 p2823 A70-32782
- Hypervelocity impact theory, discussing Euler hydrodynamic codes, projectile cratering dimensional analysis, self similar solutions, etc
15 p2823 A70-32785

Damage mechanisms of hypervelocity projectile impact on thin targets and spacecraft shields

15 p2823 A70-32786
Hypervelocity impact computerized calculations, considering material response, laminated meteor bumper, hollowed projectiles and thick target cratering

15 p2823 A70-32787
Hypervelocity impact generated shock propagation based on governing differential equations, using fluid mechanical model for perfect gas and real fluid

15 p2824 A70-32788
Metal property effects on deformation and strain energy distribution during hypervelocity projectile cratering

15 p2824 A70-32790
Hypervelocity impact damage on complex targets, considering spacecraft and missile design

15 p2824 A70-32791
Hypervelocity impact of spheres on thin targets using numerical solutions utilizing STEEP code two dimensional technique based on hydrodynamic elastoplastic model

16 p2991 A70-33853
Pyrex spheres accelerated to 15 km/sec by plasma rail gun to study hypervelocity impact in twin stainless steel and Al targets

[ALAA PAPER 70-378] 18 p3342 A70-36685
Al spheres hypervelocity impact against dry quartz sand targets in light gas gun facility, discussing energy partitioning

18 p3344 A70-36769
Power loss due to cumulative meteoroid impacts on solar cells during extended planetary missions, investigating hypervelocity particle impacts into glass

[ALAA PAPER 70-1139] 20 p3567 A70-40210
Structural configurations effect on momentum imparted to spacecraft by hypervelocity meteoroid impact

21 p3938 A70-41879
Hypervelocity impact flash resolved into sub-microsecond continuum radiation pulse succeeded by slow rising long duration light pulse from neutral atomic line emission

HYPERVELOCITY LAUNCHERS

23 p4227 A70-44553
Hypervelocity impact of small different diameter right circular cylinders, describing launching method using light gas gun

HYPERVELOCITY PROJECTILES

03 p0583 A70-12918
Taylor model of elastoplastic wave interaction during cylindrical projectile impact

01 p0206 A70-11150
Hypervelocity projectile size and density effect on ballistic limit of dual sheet spacecraft meteoroid protection structures, considering penetration of low and high density particles

[ALAA PAPER 69-376] 04 p0776 A70-15422
Tekite damage caused by micrometeoroid impact, projectile firing at glass spheres and survival time estimation

05 p0916 A70-16834
Electrostatic probe measurements of radial distributions of mean ion density in N and air wakes behind hypervelocity spheres compared with electron microwave measurements

[ALAA PAPER 70-87] 06 p0975 A70-18197
Anamorphic optics to focus luminous wakes of hypervelocity projectiles onto focal plane of slitless spectrograph in free flight ballistic range launching

07 p1287 A70-20082
Spin requirement to limit projectile yawing oscillations in hyperballistic range

12 p2157 A70-27835
Holographic technique to record hypervelocity projectile with front light resolution, discussing image blurring

15 p2736 A70-32031
Hologram camera system recording hypervelocity particles by velocity synchronized Fourier transform method, employing interferometer

15 p2737 A70-32039
Damage mechanisms of hypervelocity projectile impact on thin targets and spacecraft shields

15 p2823 A70-32786
Electron density fluctuation measurements in wakes behind hypersonic sphere projectiles, using Langmuir probes

[ALAA PAPER 70-730] 16 p2834 A70-33489
Pyrex spheres accelerated to 15 km/sec by plasma rail gun to study hypervelocity impact in twin stainless steel and Al targets

[ALAA PAPER 69-378] 18 p3342 A70-36685
Mean density and temperature measurements in hypersonic Ti spheres wakes in nitrogen atmosphere, using electron beam fluorescence probes

21 p3745 A70-41754
High speed cinematographic recording of wake behind hypervelocity projectiles

[SMPT PREPRINT 102] 22 p4032 A70-43033
Laser and flash X ray shadowgraph techniques in hypervelocity ablation/erosion investigations in hyperballistics range

[SMPT PREPRINT 28] 22 p4034 A70-43047

Hypersonic projectile turbulent wake measurements, discussing velocity, mass density and temperature determination

[ICAS PAPER 70-07] 23 p4132 A70-44130

HYPERVELOCITY WIND TUNNELS

NT CASCADE WIND TUNNELS

NT HOTSHOT WIND TUNNELS

NT PLASMA JET WIND TUNNELS

NT SHOCK TUNNELS

Local skin friction measurement on model in blow-down hypersonic wind tunnels using floating element transducer, giving results for flat plate and wedge

[ONERA-TP-756] 03 p0463 A70-13629
Schlieren recorder and Erdmann field absorption methods applied to qualitative and quantitative flow process studies in high velocity wind tunnel

04 p0689 A70-14925
Wall and total temperature variations effects on transition Reynolds number in hypersonic He tunnel, noting sound mode dominance

04 p0620 A70-15560
Approximate solution for far downstream flow of condensation in hypersonic wind tunnels and nozzles for colloidal thrusters and EHD generators

04 p0621 A70-15600
Longshot free-piston wind tunnel for very high Reynolds number hypersonic flows, describing piston cycle, supply conditions, real gas effects on nozzle flow, etc

06 p1027 A70-17245
German aeroballistic hypersonic test facility with moving model and rest atmosphere, describing acceleration mechanism and several tests

06 p0965 A70-17246
Pressure distribution at circular slender cone with 10 deg semiapex angle in hypersonic vacuum wind tunnel

06 p0966 A70-17251
Crossed field plasma accelerator designed as element of hypersonic wind tunnel driver

06 p1119 A70-17471
Wind tunnel tests for aerodynamic and thermal environment of hypersonic glider VERAS /Vehicle for Experimentation and Research in Aerothermodynamics and Structures/

[DGLR-69-042] 07 p1187 A70-18981
Dense gas effects in free piston hypersonic wind tunnel, discussing Longshot facility, free piston cycle, reservoir conditions decay and hypersonic nozzle flow

[ALAA PAPER 69-169] 07 p1249 A70-19310
Velocity pulsations of hypersonic working flow in wind tunnel using miniature pressure transducers, discussing rms error

07 p1259 A70-19828
Frozen flow effect in hypersonic wind tunnel nozzle on parameters of nonequilibrium incident flow past wedge

09 p1604 A70-22446
Hypersonic wind tunnel for erosion test of multiple particle impacts, considering dust on cork, carborazole and silicone rubber

[ALAA PAPER 69-341] 09 p1656 A70-23240
Supersonic flight simulation in hypersonic wind tunnels for developing hypersonic air breathing propulsion, describing ceramic storage heaters

13 p2384 A70-28666
Hypersonic wind tunnel testing of Plexiglas and nylon hemispheres instrumented with strain gages and thermocouples, comparing with calculated strain, temperature and ablation

13 p2520 A70-28727
Two component piezoelectric skin friction force transducer for hypersonic flow tunnel

13 p2405 A70-28815
Hypersonic test equipment, describing flight simulating hypervelocity wind tunnels, firing tunnels and shock wave tubes

13 p2384 A70-28927
Spatial distribution of three dimensional laminar boundary layer transition zone on sharp half angle cone from hypersonic wind tunnel tests

[ALAA PAPER 69-112] 13 p2343 A70-29953
French H630 hypersonic wind tunnel operating at Mach 8, discussing test results and potential

15 p2718 A70-32839
Longshot free piston gun tunnel for high Reynolds number hypersonic flow tests

16 p2889 A70-33855
Free flight wind tunnel test for feasibility of hypersonic drogue deployment into reentry vehicle wake

[ALAA PAPER 70-587] 17 p3060 A70-35195
Low pressure measuring system for aerodynamic models tested in Mach 12-14 wind tunnel, discussing transducers and high speed digital recording and data processing system

17 p3062 A70-35493
Digital computer for high speed wind tunnel data acquisition, processing and operations control

19 p3397 A70-37923
Hypersonic test flow in arc heated wind tunnel, measuring freestream Pitot pressure, mass flux, stagnation point heat transfer rate and wall pressure

20 p3607 A70-40270

Time varying flow properties effects on hypersonic wind tunnel spectroscopic measurements, considering direct emission and electron beam techniques

20 p3607 A70-40271
Dust content effect on hypersonic wind tunnel flow test results, noting drag force on slender and blunt nosed models

21 p3749 A70-42224
Ames Hypervelocity Free Flight Facility, discussing aerodynamic tunnel, radiation tunnel and light gas gun for reentry simulation

22 p4006 A70-42764
Spark photography of models in free flight in hypersonic shock tunnel

[SMPT PREPRINT 99] 22 p4032 A70-43035
Heat transfer measurements compared in free flight and in hypersonic wind tunnel at similar Reynolds number and temperature ratios

[ICAS PAPER 70-06] 23 p4275 A70-44115
Hypersonic wind tunnel facility for hypersonic aircraft and recoverable booster systems development

[DFVLR-SONDDR-19] 23 p4178 A70-44799

HYPERVENTILATION

Alveolar ventilation difference in nasal and oral breathing in hyperventilation due to work

05 p0802 A70-16492
Oxygen uptake increase phenomena in passively hyperventilated anesthetized and paralyzed dogs

07 p1205 A70-19293
Carbon dioxide effect on oxygen uptake during hyperventilation in normal man

07 p1205 A70-19294
Minute hyperventilation of human lungs causing expiratory suppression of respiration

12 p2173 A70-28315
Forced hyperventilation effect in human subject based on indices regarding changes in respiration rhythm, EEG and finger plethysmogram

15 p2679 A70-31607
Rats brain oxygenation during hyperventilation with air or oxygen-nitrogen mixture, measuring creatine phosphate concentration and lactate/pyruvate ratio

21 p3762 A70-41225

HYPNOSIS

Differential effect of hypobaric hypoxia on depressant characteristics of sodium barbital, sodium pentobarbital and chloral hydrate in rats and mice

04 p0631 A70-14680
Tranquilizers and hypnotics from rats organs analyzed by thin layer chromatography

22 p3978 A70-42879

HYPOCAPNIA

Respiratory center functional organization established as automatism with negative feedback, based on experimental data of dogs and cats artificial respiration and hypocapnic apnea

03 p0417 A70-13069
Respiratory gas exchange, heart rate, arterial acidemia and hypocapnia responses to physical work in hyperbaric environments and hyperoxia conditions

12 p2169 A70-27655

HYPODYNAMIA

Prolonged hypokinesia effect on human resistance to physical stress, noting prophylactic influence of physical exercises

03 p0425 A70-13898
Hypokinesia and nutrition deficiency effect on blood coagulation, noting combination with accelerations may lead to hypocoagulation

04 p0630 A70-14578
Prolonged hypokinesia effect on dynamics of 5-ox-yindoleacetic acid elimination in rat urine, showing occurrence of shifts in serotonin metabolism

09 p1615 A70-22092
Soviet collection of papers on prolonged immobility and effects on human organism

10 p1812 A70-24665
Relative value of prolonged bed confinement and hypodynamia in estimating biological effects of weightlessness

10 p1813 A70-24666
Prolonged hypodynamia effect on human organism, describing organizational and methodological principles for conducting investigations

10 p1813 A70-24667
Prolonged hypodynamia /bed rest/ clinical observations, noting psychological and physical effects

10 p1813 A70-24668
EKG and cardiac rhythm changes during prolonged hypodynamia /bed rest/ with restricted physical activity

10 p1814 A70-24669
Human vascular tonus and hemodynamics during prolonged hypokinesia, observing changes in reaction to cold and reduced vascular tonicity

10 p1814 A70-24670
Prolonged hypodynamia effects on hemodynamics using dye dilution method, noting adaptability in cardiovascular system

10 p1814 A70-24671
Prolonged hypodynamia effect on human cardiac cycle phases using poly- and kinetocardiographic data

10 p1814 A70-24672

Prolonged hypodynamia effect on heart size and myocardium function obtained from human chest X ray studies

10 p1814 A70-24673

Prolonged hypodynamia effect on human external respiration, arterial blood oxygenation, circulation rate and gas exchange under various physical stress conditions

10 p1814 A70-24674

Prolonged hypodynamia effect on human nutritional habits and protein metabolism, noting decrease in energy requirement and body weight

10 p1814 A70-24675

Mineral saturation in calcaneal bone and hand finger phalanx in humans under prolonged hypodynamia by X ray analysis, observing Ca salts reduction

10 p1815 A70-24676

Prolonged hypodynamia effect on human blood serum mineral content and enzyme activity

10 p1815 A70-24677

Prolonged hypodynamia effect on human blood coagulation, noting antihemophilic effect of physical exercise

10 p1815 A70-24678

Immunity indices in humans subjected to hypodynamia, noting infection resistance lowering

10 p1815 A70-24679

Human central nervous system changes during hypodynamia, noting unidirectional shifts in brain hemodynamics, rheographic wave propagation time reduction, etc

10 p1815 A70-24680

Human nerve and muscle system changes under prolonged hypodynamia

10 p1815 A70-24681

Human motor functions changes following prolonged hypodynamia, including physical training and hypokinesia roles in standing and walking

10 p1815 A70-24682

Human locomotor performance before and after prolonged hypodynamia, discussing biochemical features and changes in step length, torso and extremity kinematics, etc

10 p1816 A70-24683

Psychic functions stability during prolonged hypodynamia, discussing memory, attention span, sensometer reactions, time estimating, etc

10 p1816 A70-24685

Vestibular analyzer and otolithic apparatus disturbances and normalization under prolonged hypodynamia, noting pathological effects of repeated caloric testing

10 p1816 A70-24686

Prolonged hypodynamia effects on visual analysis, investigating functional weakening, fundus oculi appearance change and restoration after normal activity resumption

10 p1816 A70-24687

Physical exercise effects on man during prolonged bed rest, investigating muscle performance, static endurance, walking coordination and psychomotor functions

10 p1816 A70-24688

Occlusion training during hypodynamia with inflatable thigh cuffs to prevent unfavorable effects on cardiovascular system

10 p1816 A70-24689

Amphetamine, caffeine and securinine effects on hypodynamic syndrome in subjects during orthostatic tests and transverse G-forces under prolonged hypokinesia

10 p1817 A70-24690

Hypodynamia aftereffects on nervous system, investigating organic microsymptoms, asthenia, vegetative-vascular instability and skin muscle aknetic hypotrophy

10 p1825 A70-24691

Electrocardiac activity, myocardium and hemodynamic disorders in subjects after prolonged hypodynamia with or without physical exercises and during orthostatic test

10 p1817 A70-24692

Arterial oscillograms, pressure and heart beat rate during prolonged hypodynamia, noting neurocirculatory dystonia

10 p1817 A70-24693

Cardiovascular reactions and orthostatic stability during hypodynamia determined from ECG, seismocardiograms, phonocardiograms, sphygmograms and tachy-oscillograms

10 p1817 A70-24694

Transverse g-force tolerance and stability after prolonged hypodynamia in bed rest, noting effects of pharmaceuticals, physical exercise and prophylactic measures

10 p1817 A70-24695

Hypodynamia effects on humans during prolonged bed rest, investigating immunological resistance, psychic disorders, myocardium changes, responses to pharmaceuticals, etc

10 p1817 A70-24696

Prolonged hypokinesia effect on dynamics of 5-oxindoleacetic acid elimination in rat urine, showing occurrence of shifts in serotonin metabolism

15 p2685 A70-32688

Hypodynamic effects on human external respiratory function and cardiovascular state under various microclimatic conditions

23 p4149 A70-45078

HYPOGLYCEMIA

Hypoglycemia role in air sickness, aggravating effects of hypoxia and acceleration

17 p3040 A70-35914

Serum growth hormone response to hypoglycemia in man following insulin administration, reviewing lumped parameter model

19 p3360 A70-38006

HYPOKINESIA

Skeletal muscle proteins fractional composition in white rats during hypokinesia, noting water content changes

17 p3030 A70-35356

Bone and muscle tissue morphological changes in caged and immobilized rodents and in myasthenic humans

17 p3030 A70-35357

Aldosterone effects on hemodynamics of dogs under restricted motor activity, observing cardiac activity stimulation

17 p3030 A70-35358

Hypokinesia effects on rats protein synthesis rates, determining body and organ weights, muscle tissue nitrogen content and transaminase activity

20 p3575 A70-40187

Atmospheric composition cyclic changes effects on human basal metabolism under hypokinesia

20 p3576 A70-40197

Hypokinesia and reduced diet effects on human tolerance to static loads, discussing acceleration tolerance prediction

20 p3576 A70-40198

Muscular activity in regulation of organism functions during aging, considering hypokinesia effects

22 p3968 A70-42894

Water and salt metabolism changes during prolonged hypokinesia of rabbits, noting blood plasma dilution, hematocrit number and hemoglobin concentration reduction, etc

23 p4146 A70-44656

HYPOTENSION

Hypotensive effects of chloridazepoxide, amobarbital and chlorpromazine on behaviorally induced elevated arterial blood pressure in squirrel monkey

24 p4298 A70-45620

HYPOTHALAMUS

Cortex functional interrelationships with hypothalamus and formatio reticularis, studying role of corticofugal effects in anesthetized cats

01 p0012 A70-10051

Corticofugal effects of various cortical regions on neuron activity in hypothalamus posterior lateral sections in cats

01 p0012 A70-10053

Thermoregulatory salivary responses of dog to various ambient temperatures, emphasizing hypothalamic temperature, threshold and proportionality constant

01 p0017 A70-10465

Cerebral histamine distribution in rat brains, noting highest concentrations in hypothalamus and thalamus

01 p0020 A70-10708

Skin and hypothalamic temperature inputs for behavioral regulation of hypothalamic temperature of rats

01 p0020 A70-10725

Appetitive behavior of rats following cessation of hypothalamic stimulation, observing eating and drinking inhibition

01 p0027 A70-11275

Object carrying behavior of rats, using electrical stimulation of hypothalamic structures

02 p0237 A70-12395

Physicochemical properties of hypothalamic secretions responsible for coronary dilatation in rats, cattle and pigs, using analytical techniques

03 p0417 A70-13215

Conditioned fear reaction produced by electric stimulation of cat anterior hypothalamus, discussing effect of neocortex removal

03 p0420 A70-13425

Degenerate retinal fibers in duck photoreceptor path connecting to supraoptical hypothalamic region detected following optic nerve dissection

03 p0427 A70-13955

High altitude environmental effects on adrenal glands and hypothalamic neurosecretion in rats

04 p0629 A70-14568

Hypothalamic stimulation effects on cardiac and vascular efferent components of baroreceptor reflexes in spinal cats

07 p1202 A70-18866

Hypothalamus influence on potentials and recovery cycles of mesencephalic reticular formation in response to sciatic nerve stimulation in anesthetized rabbits

07 p1204 A70-19138

Somato-vegetative and behavioral reactions of rabbits to electric stimulation of hypothalamus after injecting aminazine

07 p1209 A70-19521

Involvement reactions in dying and reanimated cats with nucleus reticular hypothalamicus stimulated by rectangular electric pulses

07 p1209 A70-19522

Midbrain reticular neurons activity in cats during response to individual and coincident cortical and hypothalamic stimulations

07 p1213 A70-19789

Direct anatomical couplings between retina and hypothalamus via centripetal and centrifugal fibers by investigating light evoked potentials in rabbits brains

08 p1444 A70-20737

Hypothalamus stimulation effect on electrical activity of hippocampus at threshold and super-threshold levels in cats

08 p1446 A70-21448

Hypothalamus stimulus effects on sympathetic nerve activity to heart, spleen, kidney and leg skeletal muscle in anesthetized cats

09 p1614 A70-22001

Soviet book on nervous stress and cardiac activity covering hypothalamus and cardiovascular reactions and cardiac component of complex conditioned reflexes and emotional reactions

10 p1809 A70-23873

Electrode placement ancillary technique for obtaining stereotaxic atlas of infant rat hypothalamus

13 p2350 A70-29322

Vegetative nervous system reactions of patients with diencephalic syndromes, investigating hypothalamo-hypophysial-adrenal system role

13 p2352 A70-29353

Electrical stimulation of dogs hypothalamus effect on blood and lymph circulation and composition

13 p2352 A70-29354

Hypothalamic motivation, presenting data supporting less anatomical specificity

13 p2355 A70-29794

Hypothalamic electric stimulation intensity effects on elicited behavior, considering possible neural circuit threshold reduction

13 p2355 A70-29807

Eating, drinking and gnawing motivation interchangeability under hypothalamic stimulation, noting role of neural substrate activation

13 p2356 A70-29814

Thyroxine stimuli transmission from posterior hypothalamus to cerebral cortex ascribed to dorsomedial nucleus of thalamus

16 p2848 A70-33261

Electrical stimulation in rostromedial hypothalamus effects on thermogenesis of juvenile rats, calculating heat transfer at trunk

16 p2849 A70-33696

Integrating influence of medio-rostral hypothalamic structures upon temperature regulation of juvenile rat based on Area praepoptica medialis stimulation

16 p2849 A70-33697

Positive pressure breathing effects on cerebral blood pressure and catecholamine content of hypothalamus and adrenal glands in dogs

16 p2849 A70-33997

Temperature change relation between anterior hypothalamus and concha auricularis in rabbits

18 p3218 A70-36532

Pathways of short latency reticulo-cortical responses to thalamic nuclei and hypothalamic destruction in cats

24 p4299 A70-45837

Dynamic response of peripheral blood flow to hypothalamic temperature waveforms in baboon, using implanted thermodes

24 p4303 A70-46116

Chronically implantable water perfused thermode system for hypothalamic temperature waveforms generation

24 p4309 A70-46117

Alpha and beta reciprocal hunger regulating systems localized in rats hypothalamus areas by varying injection sites of alpha and beta adrenergic drugs

24 p4304 A70-46233

HYPOTHERMIA

Carbohydrate-phosphorus metabolites content in gophers brains under normal conditions during hypothermia and spontaneous warming at room temperature

01 p0012 A70-10055

Physiological research on humans in hypothermia resulting from confinement to life raft on open sea, analyzing thermal conditions, thermoregulation and survival

01 p0013 A70-10233

Conditioned reflexes, respiration and heart beat rates changes in white rats under hypothermia

03 p0424 A70-13717

Vestibular reactions in rats under hypothermal conditions by measuring postrotatory nystagmus beats number and duration, respiration rates and rectal temperature

03 p0425 A70-13893

Temperature and hemoglobin concentration effect on oxygen solubility in blood, constructing table for Bunsen solubility coefficients

03 p0428 A70-14156

- Low body temperature effects on convulsive activity elicited by hyperbaric oxygen in unrestrained unanesthetized rats
04 p0629 A70-14448
- Hypothermia effect at various temperatures and durations on nervous activity and vegetative functions of rats, discussing pulse and respiratory rates
07 p1197 A70-18696
- Cranioerebral hypothermia effects on phase structure of cardiac thrust in dogs
07 p1204 A70-19140
- Cerebrum hyperemia of dogs subjected to cranioerebral hypothermia, recording rheoencephalograms by occipitofrontal needle electrodes
07 p1207 A70-19473
- Succinic dehydrogenase activity in white rats cerebrum and liver under hypothermia and after warming
07 p1207 A70-19475
- Physiology of hibernation and hypothermia, noting potential use for metabolic need reduction during long interplanetary flight
10 p1943 A70-24757
- Conditioned reflexes, respiration and heart beat rate changes in white rats under hypothermia
11 p1985 A70-25517
- Brain tussling respiration and oxygen consumption in rats during hypothermia
12 p2168 A70-27345
- Hypothermia and ionizing radiation effects on hamsters influenza immune response
13 p2349 A70-28834
- Aircraft crew oral temperature related to work-rest schedules, discussing hypothermia, flight stress and in-flight depression
17 p3032 A70-35563
- Prolonged cold adaptation effect on heat transfer during recovery period after hypothermia in white rats
18 p3220 A70-36543
- Repeated snow cooling effect on heat transfer in white rats during temperature homeostasis recovery after hypothermia
18 p3220 A70-36544
- Book on survival in cold water covering physiology and treatment of immersion hypothermia and drowning, thermoregulation, etc
19 p3360 A70-37977
- Blood oxygen, carbon dioxide and pN during hypothermia induced by He-oxygen mixture and cold exposure in hamsters, comparing with hibernation state
23 p4147 A70-44787
- Pulmonary arterial and venous response to cooling, discussing role of sympathetic nervous system alpha receptors in hypothermia induced pulmonary constrictions in dogs
23 p4148 A70-44788
- Hypothermia and body rewarming effects on renal hemodynamics in anesthetized dogs
24 p4301 A70-45998
- HYPOTHESES**
NT LAGRANGE SIMILARITY HYPOTHESIS
NT NULL HYPOTHESIS
NT VORTICITY TRANSPORT HYPOTHESIS
Hypotheses concerning optimal methods of solving mathematical physics problems, choosing algorithms employable in digital computers
18 p3291 A70-36284
- HYPOTONIA**
Emergency hypotonia regional control with/without blood circulation centralization, describing device consisting of inflatable balloon, extracorporeal shunt, electromagnetic valve, manometer and circuit
15 p2687 A70-32891
- HYPOXEMIA**
Patients with/without coronary heart disease inhaled various gas mixtures to induce arterial hypoxemia and hyperoxia, noting O availability for myocardial metabolism
01 p0016 A70-10440
- Hypoxemia and acidosis avoidance during respiration cessation in halothane anesthesia
10 p1822 A70-25086
- Partial oxygen pressure in hyperaemic earlobe capillary blood under hypoxemic conditions, noting correlation with age and body weight
10 p1822 A70-25088
- HYPOXIA**
Phospholipid metabolism intensity in brains of adrenalectomized and pseudo operated rats under hypoxia
01 p0012 A70-10054
- Cardiac output and coronary blood flow during steady state hypoxia, considering room air and different oxygen concentration breathings
01 p0014 A70-10360
- Hypoxic stimulation effect on erythropoiesis in vivo bone marrow
01 p0017 A70-10464
- Retinal vessels of humans at .11-2.0 atmosphere oxygen partial pressures, noting arterioles and venules dilation response to hypoxia and vasoconstriction response to hyperoxia
01 p0023 A70-10863

- Rodents hypoxia tolerance following adaptation to hypercapnia by recording time of useful consciousness /TUC/ in repeated sloped surface clinging tests
01 p0026 A70-11249
- Erythropoietic response in anesthetized dogs subjected to sublethal whole-body proton irradiation followed by hypoxic hypoxia, discussing test procedure and results
01 p0027 A70-11300
- Dogs coronary vasodilator responses to hypoxia and induced tachycardia before and after lidoflazine and adenosine
02 p0230 A70-11702
- Thyrotropin /TSH/ effects on thyroidal iodine metabolism during hypoxia in rats
02 p0231 A70-11703
- Polycythemia and hypercapnia effects on apparent oxygenation of rat brain during acute hypoxia by changes in creatine phosphate concentration and lactate/pyruvate ratio
02 p0232 A70-11717
- Lactate rise diminution in anesthetized paralyzed dogs subjected to hypoxia by gas mixtures before and after beta-adrenergic blockade
02 p0233 A70-11724
- Cross adaptation criteria and modifications in physiologic and biochemical processes in man and mammals, demonstrating positive cross acclimation between hypertension and hypoxia exposure
02 p0242 A70-12825
- Intermittent EKG recordings during hypoxia test for detection and diagnosis of heart disorders in airmen
02 p0242 A70-12850
- Altitude changes effect on brown fat content and metabolism in deer mice, noting oxygen consumption and heat production limitation by hypoxia
02 p0242 A70-12865
- White mice hypoxia tolerance enhancement after intraabdominal administration of dilute hydrochloric and lactic acids
03 p0424 A70-13718
- Antihypoxic preparations protective effect on white mice and rats subjected to gravitational accelerations
03 p0425 A70-13890
- Human alveolar-arterial oxygen differences during rest, sleep and exercise in initial hypoxia induced by simulated high altitude exposure
03 p0429 A70-14161
- Oxygen consumption and body temperatures during acute hypoxia in man, based on low oxygen mixture breathing tests
03 p0439 A70-14291
- Combined hypoxic hypoxia and high ambient temperature found relieving strain on humans by increasing heat release by evaporation
04 p0630 A70-14581
- Vascular resistance and constriction and muscle mass related in pulmonary arteries of mice subjected to alveolar hypoxia
04 p0630 A70-14679
- Differential effect of hypobaric hypoxia on depressant characteristics of sodium barbital, sodium pentobarbital and chloral hydrate in rats and mice
04 p0631 A70-14680
- Cats trained for visual form discrimination tested for retention and reversal performance, studying oxygen deprivation influence
04 p0633 A70-15443
- Hypoxia effect on self paced work behavior of humans
05 p0803 A70-16672
- Standardized bicycle ergometer training effects at sea level and simulated altitudes, indicating hypoxia potentiating role
05 p0807 A70-16674
- Cardiac work limiting factors during exercise under hypoxia, studying cardiac output and coronary blood flow capacities
06 p0991 A70-17282
- Hemodynamics in cardiosclerosis patients and healthy subjects under hypoxia, investigating heart activity and blood circulation
06 p0994 A70-17667
- Acute hypoxia effect on mono-, di- and triphosphonitrides metabolism and content in white rats cerebral tissues, using chromatographic analysis
07 p1199 A70-18721
- High altitude and sea level erythropoietic and somatic development in chick embryos indicating optimal physiological adaptation with prolonged exposure
07 p1202 A70-18864
- Posthypoxic vasodilation in extremities of anesthetized dogs preserved after carotid and aortic reflexogenic zones exclusion
07 p1204 A70-19139
- Resistance to decompression sickness increased and mortality rate decreased in mice after adaptation to hypoxia at normal barometric pressure
07 p1206 A70-19469
- Mathematical model for oxygen tension changes in dogs brain tissues under hypoxia during altitude simulation
07 p1208 A70-19505

- Motivation changes in rabbits exposed to increasing hypoxia in pressure chamber altitude simulation
07 p1208 A70-19506
- Adaptive reactions in thyroidectomized rats blood and brain during adaptation to hypoxia compared with intact animals
07 p1214 A70-19794
- Exercise influence on cardiac output and coronary blood flow during hypoxia, correlating CO and systolic pressure with blood flow changes
07 p1214 A70-19928
- Physiology of high altitude, studying animal and man adaptation and changes in body processes due to life stresses and hypoxia
08 p1441 A70-20469
- Hypoxia effect on retrograde amnesia /recent memory loss/ in albino rats subjected to shock and decompression treatments
08 p1441 A70-20477
- Parathyroidectomy effects on high altitude adaptation and adrenal cortex activity in rats exposed to chronic hypoxia
08 p1442 A70-20719
- Rats acute hypoxia and altitude tolerances after prolonged exposure to hyperoxic atmospheres
08 p1446 A70-21437
- Biochemical and histochemical parallels of enzymatic activity in blood, cardiac muscle and liver under hypoxia
08 p1446 A70-21445
- Drug-alcohol and hypoxia effects on multiple task operator performance tested at altitude and pressure chamber treatments
08 p1448 A70-21939
- Decompression rates effect on altitude tolerance of white rats, discussing hypoxia influence on cardiovascular, respiratory, circulatory, thermal control and central nervous systems
09 p1614 A70-22084
- Acute oxygen deficiency effects on blood electrolyte concentrations in altitude-adapted and nonadapted humans
09 p1616 A70-22217
- Conscious dogs temporary local hypoxia effect on coronary blood flow regulation
09 p1623 A70-23585
- Hypoxia fundamentals and clinical treatment - Conference, Mainz, Germany, October 1967
10 p1820 A70-25076
- Physiology of oxygen transport in human organism and genesis of tissue hypoxia, discussing pulmonary functions, blood transport properties and tissue blood flow and diffusion
10 p1821 A70-25077
- Pulmonary functions disturbances producing hypoxia, discussing alveolar hypoventilation, arterio-venous admixing, blood distribution and oxygen diffusion disturbances
10 p1821 A70-25078
- Hypoxia diagnosis based on excess lactate determination as indicator of oxidative metabolism changes
10 p1822 A70-25084
- White mice hypoxia tolerance enhancement after intraabdominal administration of dilute hydrochloric and lactic acids
11 p1985 A70-25518
- Dogs respiratory response to arterial hydrogen ions at different carbon dioxide pressure levels during hypoxia or hyperoxia, discussing acid-base balance effects
11 p1986 A70-25674
- Free radical content changes in mice organs under hyperoxia and hypoxia
11 p1986 A70-25941
- Hypoxia tolerance of albino rats in He-oxygen and Ar-oxygen environments in heat-pressure chamber, discussing He-oxygen mixture cooling effect
11 p1987 A70-26103
- Mathematical model for oxygen tension changes in dogs brain tissues under hypoxia during altitude simulation
11 p1987 A70-26104
- Motivation changes in rabbits exposed to increasing hypoxia in pressure chamber altitude simulation
11 p1987 A70-26105
- Hypoxia biphasic effect on adrenal catecholamine content of guinea pigs and rats during short and prolonged periods
11 p1989 A70-26665
- Hematologic responses of mice subjected to continuous hypoxia in subatmospheric pressure
11 p1989 A70-26666
- Glycolysis and glycolytic enzymes activity increase in tissues observed during training of rats to hypoxia, discussing adaptive reactions at cellular level
12 p2167 A70-26975
- Rats myocardial contractility depression by free fatty acids during hypoxia or anoxia, noting mechanical performance improvement by glucose
12 p2170 A70-27898
- Autonomic effects on heart rate, portal, renal, cutaneous and muscle blood flows during arterial hypoxia in unanesthetized sham operated thalamic and pontine rabbits
12 p2170 A70-27899

Chronic hypoxia effects on heart size and hematocrit ratios tested in pigeons

12 p2172 A70-28075

Acceleration and hypoxia resistance of mice and rats after injections of phenamine, sidnocarb, strychnine, securinine, aralesside, trioxazine, banactisine and chloridazepoxide

13 p2358 A70-29344

Systemic hypoxia effect on renal tubule sodium reabsorption in anesthetized mongrel dogs [AMRL-TR-69-135]

13 p2353 A70-29435

Oxygen effect on night vision tested in men at 5,000 ft above sea level, obtaining threshold curves of dark adaptation

13 p2359 A70-29443

Hypoxia tolerance in white rats after exposure in hypercapnic medium

13 p2355 A70-29757

Single and combined hypoxia and hypercapnia effects on growing rats, discussing body weights, blood and histological measurements

13 p2357 A70-29948

Chick embryogenesis during hypoxia at high altitude, noting metabolic repression effects, hypothermia and brain atrophy

14 p2536 A70-30188

Chronic hypoxia exposure effect on development and maintenance of renal hypertension in rats

14 p2539 A70-30956

Molecular respiratory reflex and fluorescent signal in rabbits during hypoxia, determining redox kinetics of intracellular pyridine nucleotides

14 p2539 A70-31346

Hematologic changes in mice associated with mengovirus infection and hypobaric hypoxia during barometric pressure changes

15 p2681 A70-31878

Soviet monograph on gas laws in aviation medicine for reduced oxygen pressure pathology, discussing kinetic theory, temperature effects, solubility, diffusion, etc

15 p2682 A70-31925

Hypoxia and acetazolamide effects on color sensitivity zones in visual field

15 p2684 A70-32533

Ventilatory response to carbon dioxide in goats during acute and chronic hypoxia

15 p2684 A70-32539

Decompression rates effect on altitude tolerance of white rats, discussing hypoxia influence on cardiovascular, respiratory, circulatory, thermal control and central nervous systems

15 p2685 A70-32680

Contractile mechanics of cat papillary muscle during hypoxia and reoxygenation recovery

15 p2686 A70-32836

Sodium oxybutyrate effects on brain tissue oxidation during hypoxia in mice

15 p2686 A70-32851

Exercise and rest of humans under hypoxia and hyperoxia, determining blood acid-base state, ventilation and carbon dioxide partial pressure

16 p2849 A70-34256

Hypoxia and parotid secretion in humans exposed to angular accelerations

17 p3038 A70-35137

Serum calcium-digitalis synergism effect on dogs heart excitability, noting hypoxia role in arrhythmia production

17 p3026 A70-35325

Ambient temperature effects on rats and white mice tolerance to hypoxia, asphyxia and hypercapnia in nitrogen-oxygen and He-oxygen atmospheres

17 p3030 A70-35353

Altitude hypoxia adaptation effects on brain protein and RNA synthesis in rats, noting increase in memory resistance to environmental stress effects

17 p3030 A70-35359

Acute hypoxia effects on C14-tagged glycine absorption, distribution and discharge in rats organs and tissues

17 p3030 A70-35360

Spinal reflex activity in normal and altitude exposed cats before, during and after acute hypoxia

17 p3031 A70-35430

Hypoglycemia role in air sickness, aggravating effects of hypoxia and acceleration

17 p3040 A70-35914

Myocardial contractile function in rats under acute overstrain, evaluating role of preliminary training to altitude hypoxia

19 p3360 A70-37805

Hypoxia effects on aviators visual accommodation, convergence and stereoacuity, noting myopia increase with altitude

20 p3569 A70-38996

Hypobaric hypoxia effects on MM virus infection resistance in mice

20 p3572 A70-39428

Hypoxia warning systems using polarographic sensor and miniaturized electronics for face-mask and cabin installation for aircraft and spacecraft

20 p3579 A70-39429

Choice reaction and movement time dependence on hypoxia induced by air pressure reduction inside

decompression chamber, discussing adult human performance

20 p3573 A70-39714

Hypoxia and high ambient temperature effects on altitude tolerance in animals

20 p3575 A70-40186

Hypoxia effects on cerebral blood flow in anesthetized dogs, considering acidosis and vasodilation

20 p3577 A70-40330

Fasting plasma glucose concentration in rats after chronic hypoxia

20 p3577 A70-40542

Hypoxia and hyperoxia effect on ballistocardiogram of healthy males, determining systolic and minute cardiac forces

21 p3763 A70-41231

Ballistocardiogram relationship to cardiac performance index in hypoxia and hyperoxia conditions, investigating systolic and minute cardiac forces

21 p3770 A70-41232

Activation energies of acceleration and hypoxia stress in man and rats, noting brain function survival

21 p3764 A70-41484

Bioelectric activity changes in rats lumbar neurons, membrane and postsynaptic potential and discharge frequency during and after asphyxiation

22 p3971 A70-43404

Rapid decompression due to pressure loss in space vehicle or suit, discussing fulminating hypoxia, mechanical trauma and ebullism

22 p3973 A70-43639

Sinus and diaphragmatic nerves impulse activity during hypoxia compared with normal respiration in cats

23 p4145 A70-44312

Oxidative phosphorylation and oxygen intake during circulatory hypoxia in mitochondria of liver and brain in rats subjected to acute ischemia

23 p4145 A70-44315

Hypoxia effects on voluntary response time to peripherally located visual stimuli

24 p4302 A70-46107

HYSOMETERS

Atmospheric pressure measuring device based on hypsometer and mercury barometer principles for automatic weather stations or remote readout

06 p1066 A70-18247

Hypsometric chart plot of visible lunar hemisphere with consideration of relief, obtaining isohypses

15 p2803 A70-32494

Hypsometer design for accurate pressure measurements at high balloon altitudes

17 p3090 A70-35313

Hypsometric chart plot of visible lunar hemisphere with consideration of relief, obtaining isohypses

23 p4240 A70-43916

HYSTERESIS

Dynamic unbalance effects in rigid body rotors, discussing lubricant temperature changes and instability hysteresis

[ASME PAPER 69-LUB-14] 01 p0101 A70-10391

Tunnel diode studied for oscillations initiation resulting in hysteresis involving supply voltage and load conductance variations

03 p0459 A70-14284

Structural metals hysteresis properties under cyclic plastic loading at room temperature, considering cycle dependent creep and stress relaxation

[ASME PAPER 69-WA-MET-4] 04 p0705 A70-14763

Cyclic hysteresis-loop stress-strain behavior of 1100 aluminum, deriving power function

[ASME PAPER 69-WA-MET-1] 04 p0705 A70-14764

Hysteresis effect on cosmic ray modulation and gradient ionization near solar minimum from measurements made near earth with OGO 1 and 3 ion chambers

04 p0740 A70-15106

Thermal conductivity and hysteresis measured in cylindrical In foil under magnetic fields at temperatures below 1 K

05 p0891 A70-15792

Bistable optical resonators with saturable absorbers, discussing hysteresis characteristics and Q switching applications

06 p1105 A70-17449

He-Ne laser plasma vibrations and radiation power during active medium discharge excitation by DC current, noting characteristic energy hysteresis

08 p1511 A70-20519

Elastic systems vibrations calculated with allowance for amplitude and frequency dependent energy dissipation using hysteresis loop contour expression

08 p1585 A70-20978

Martensitic stainless steels structure related to energy dissipation capability, obtaining damping mechanism as magnetomechanical hysteresis

08 p1515 A70-20979

Electronic recording of cyclic strain diagrams of metals in wide loading frequency range using dynamic hysteresis method

08 p1585 A70-20987

Missile oscillations in plane during pitching moment hysteresis, discussing test coefficients suitability for predicting motion

09 p1606 A70-23258

Hysteresis in MOS transistors attributed to trapped charge carriers on oxide near silicon oxide interface

14 p2555 A70-30338

Magnetic hysteresis dynamic model for digital simulation of stabilized satellite attitude motions

15 p2812 A70-32509

Hysteresis loop behavior under tension-compression cycle fatigue related to Meyer strain hardness values of cyclically strained metals

16 p2934 A70-34334

Frequency multipliers with charge storage diodes, examining recombination and hysteresis effects on performance

17 p3050 A70-34588

Hysteresis effects during retuning of n-type GaAs Gunn oscillator with bias source and LCR circuit, showing range of domain damping by low field

17 p3055 A70-35689

Pisarenko generalized equations for hysteresis loop contour applied to oscillations of one degree of freedom system

17 p3137 A70-35710

Energy dissipation measurement in materials during fatigue testing by dynamic hysteresis loop method

17 p3096 A70-35712

Dynamic hysteresis loop measurement of energy dissipation in materials, showing deformation effects on accuracy

19 p3535 A70-37346

Dynamic unbalance effects in rigid body rotors, discussing lubricant temperature changes and instability hysteresis

[ASME PAPER 69-LUB-14] 19 p3435 A70-37606

Interactive hybrid simulation of TRIAD satellite motions, describing attitude control system with magnetic hysteresis damping

[ALAA PAPER 70-994] 20 p3714 A70-39536

Magneto-optic rotation and hysteresis recording instrument for thin magnetic films as function of temperature and wavelength, using Faraday effect

21 p3826 A70-41452

Apollo 11 lunar dust hysteresis curves and thermomagnetic curves, discussing metallic Fe abundance, susceptibility, alpha-gamma transition, etc

21 p3918 A70-41676

Free and forced oscillations of dynamic system with linear hysteretic damping, using nonlinear model

22 p4114 A70-42700

Harmonic linearization of nonlinear hysteretic elements in automatic control systems

22 p4000 A70-42828

Air and liquid filled excised lungs P-V hysteresis curves, determining surface tension in situ

24 p4302 A70-46104

I

I BEAMS

Horizontally curved I beams flanges elastic buckling, determining prebuckling flange stresses in longitudinal and radial directions

07 p1413 A70-20001

IBM COMPUTERS

NT IBM 360 COMPUTER

IBM COMPUTERS

NT IBM 360 COMPUTER

IBM 360 COMPUTER

IBM System/360 Operating System submodel simulator for multiprogramming, discussing language and structure

02 p0266 A70-12281

Ground support real time operating system 360 for manned spaceflight, discussing system features and performance

13 p2375 A70-29937

ICARUS ASTEROID

Icarus radar and optical observations indicating surface smoothness differences between central and higher latitudes, radius size and radar reflectivity

01 p0180 A70-10534

Radar observations of Icarus, using detected echoes to determine radar cross section, radius size and reflectivity

01 p0180 A70-10535

Icarus asteroid rotation period and brightness variation values obtained from photometric observations at Cassegrain reflector focus

01 p0180 A70-10536

Icarus surface reflectivity estimated from reflected light polarization, combining estimate with inferred absolute magnitude to obtain radius

01 p0180 A70-10537

Icarus asteroidal nature and fragmentation origin suggested from inclusion in angular momentum density-mass diagram

01 p0180 A70-10538

Icarus asteroid positions, UVB magnitude, brightness, colors, light curves and polarization, noting stony-iron composition

11 p2113 A70-26470

Variational equations from Herrick variation of parameters method for Icarus encounter with earth

13 p2488 A70-28823

ICE

Spectral reflectance of carbon dioxide and water frosts at 0.8-3.2 microns, growing frosts in cold vacuum chamber from high purity gases

07 p1388 A70-19945

Refractive index variations effect on backscattering, scattering and attenuation cross sections of ice sphere at various low temperatures

08 p1536 A70-21098

Aircraft ice crystal counter for real-time measurement in cirriform clouds, using contact electrification detection

12 p2264 A70-28091

Halo rings at hexagonal ice crystals in Martian atmosphere, analyzing via bright formations with respect to planetary phase angles

13 p2493 A70-29397

Radio waves attenuation anisotropy in sea ice by comparing vertically and horizontally polarized signals

14 p2546 A70-30132

Ice radiation and reflection characteristics in IR spectral region at certain Brewster angles

14 p2568 A70-30133

Liquid water occurrence on Mars surface, considering ice melting, evaporative cooling, atmospheric moisture content, etc

14 p2651 A70-31298

Potential gradient effect on charge separation mechanism during interaction of polarized snow crystals with ice sphere

15 p2769 A70-31445

Porous matrix explosions during sublimation of dusty ice with nonvolatile particles

19 p3471 A70-37659

ICE FORMATION

NT CLOUD GLACIATION

Ice tunnel testing facility at Naval Air Propulsion Test Center (NAPTC), describing methods, systems, instrumentation and various turbofan and turbojet engine tests

01 p0056 A70-10691

Factors in icing mechanism and principal features of various ice detectors for aircraft and helicopters

01 p0056 A70-10692

Laboratory tests to determine KC-135 air conditioning failure due to turbine wheel icing by flight condition simulation

01 p0005 A70-10694

Flight tests conducted in artificial and natural icing conditions, using CH-3C helicopter with rotor blades equipped with polyethylene anti-icing tape

01 p0006 A70-10695

Venus atmosphere simulation at condensation level in uniform temperature mixing cloud chamber, studying artificial and natural ice nuclei nucleation

02 p0373 A70-12293

GHOST /Global Horizontal Sounding Technique/ balloon for meteorological observation over Southern Hemisphere emphasizing technique to overcome icing in clouds

04 p0622 A70-14550

Aircraft icing effects on conventional and jet aircraft and helicopters, discussing seasonal variations for main climatic regions

07 p1329 A70-18926

Ice crystal density in Martian atmosphere from brightness of Martian parhelic halo

08 p1564 A70-20547

Thermodynamic stability of methane clathrate hydrate, building up ice grains halo within comets inner coma

14 p2650 A70-31243

Growing ice crystals surface electric potentials during various stages of water vapor condensation

15 p2769 A70-31444

Ice crystal density in Martian atmosphere from brightness of Martian parhelic halo

15 p2796 A70-31456

Ice crystals growth rate in natural clouds over minus 2-mins 32 C range based on characteristic axial ratio

19 p3462 A70-38261

ICE NUCLEI

Ice nucleating properties of dust particles above 80 km compared with soil and AgI particles

01 p0081 A70-11296

Venus atmosphere simulation at condensation level in uniform temperature mixing cloud chamber, studying artificial and natural ice nuclei nucleation

02 p0373 A70-12293

ICE OBSERVATION

U ICE REPORTING

ICE PREVENTION

CH-54 engine air inlet anti-ice system design, manufacture and testing, solving heat balance equations describing tapered gap heat exchanger

01 p0165 A70-10693

Icing, bird collisions and static charge problems for jet aircraft, discussing protective devices

03 p0413 A70-13792

Jet aircraft fuel systems icing prevention, considering fuel filters

05 p0796 A70-17020

Criticism and reply to Venus cloud water drop HCl concentration preventing ice cloud formation

11 p2108 A70-25653

ICE REPORTING

Factors in icing mechanism and principal features of various ice detectors for aircraft and helicopters

01 p0056 A70-10692

Satellite high resolution IR imagery for arctic sea ice mapping, describing sensor design and day and nighttime operation in film-strip format

[AIAA PAPER 70-301] 09 p1669 A70-22884

Sea and sea ice remote sensing by four-frequency radar /4FR/ system in EC-121 aircraft

12 p2215 A70-26904

ICING

U ICE FORMATION

IDEAL FLUIDS

Irrational motions of relativistic ideal thermodynamic fluids fulfilling incompressibility conditions

01 p0063 A70-10948

Rayleigh method convergence for linear development of perturbations in unsteady plane parallel flow of ideal fluid, formulating and proving theorem

01 p0064 A70-11032

Spinning top motion stability in homogeneous incompressible ideal resting fluid, using stability derivative for body of revolution

01 p0145 A70-11438

Equations of hydrodynamics governing perfect fluid in second post-Newtonian approximation to general relativity, deriving energy momentum tensor equation

02 p0337 A70-11776

Two spheres moving in ideal incompressible fluid, studying velocity field, hydrodynamic forces, kinetic energy, etc

03 p0465 A70-13335

Ideal fluid flow past sphere in rectangular duct and slot solved in series form in spherical functions

04 p0666 A70-14605

Soviet book on boundary value problems involving motion of ideal fluids in unsteady cavities of various geometries, determining attached fluid masses and oscillation frequencies

04 p0666 A70-14678

Ideal fluid motion characteristics near variable volume spheres with radial mass transfer through surfaces

04 p0672 A70-15198

Computer program to calculate ideal rotating fluid flow in arbitrary airfoil lattice on axisymmetric stream surface in variable thickness layer

04 p0617 A70-15239

Structural element for discrete element idealization missile and liquid propellant as one composite structure

[AIAA PAPER 70-123] 06 p1042 A70-18182

Ideal fluid planar potential flow, approximating stream function and velocity potential by matrix method

07 p1253 A70-18925

Ideal fluid in lightly filled spherical vessel under gravitational force investigated for surface tension effect on vibration frequencies

08 p1482 A70-20853

Perfect fluid sonic flows around weakly lifting three dimensional bodies downstream of shock wave, proving existence of lifting boundary layer

08 p1433 A70-21238

Geometric, cinematic and dynamic conditions of ideal fluid adiabatic nonstationary movement expressed by differential external system /s/

09 p1659 A70-22254

Prime formulas for studying perfect relativistic fluids with spin

09 p1728 A70-22840

Circle theorem for potential flows extended to two dimensional steady incompressible ideal fluid flows of constant vorticity

09 p1664 A70-23714

Quasi-one dimensional motion of perfect compressible fluid through pipe, considering one dimensional schemes in aerodynamics

10 p1865 A70-24102

Rayleigh method convergence for linear development of perturbations in unsteady plane parallel flow of ideal fluid, formulating and proving theorem

10 p1871 A70-25001

Efficiency loss with tip clearance predicted for mixed and axial flow single stage turbomachines, using perfect fluid model

11 p1974 A70-25787

Ideal fluid flow containing small spherical particles past cylinder and flat plate normal to stream using small perturbations method

11 p1976 A70-26012

Ideal weightless fluid jet flow past supercavitating plate at incidence using Tulin scheme

12 p2214 A70-28241

Motion stability of variable mass solid body with ideal liquid filled cavities about stationary point using Liapunov theorem

13 p2452 A70-29310

Incompressible ideal plane fluid flow complex potential caused by profile motion in presence of fixed infinite wall

13 p2390 A70-29632

Ideal weightless fluid plane potential flow in channel with permeable wall, deriving expressions for dynamic characteristics

13 p2390 A70-29648

Hydrodynamic forces by oscillating foils in ideal incompressible fluid turbulent flow with stream separation

13 p2390 A70-29649

Chemically reacting ideal substance model, describing thermodynamic properties and application to energy conversion processes

14 p2533 A70-30529

Force acting on cylinder in ideal incompressible fluid plane flow with steady vorticity

15 p2719 A70-31498

Thermodynamically perfect fluids in general relativity, considering heat transmission paradox and wave propagation velocities

16 p2997 A70-33103

Incompressible ideal fluid plane laminar flows at large Reynolds numbers in region bounded by moving walls with closed concentric streamlines, establishing functional properties

16 p2893 A70-33749

Interior ideal liquid flow of vertical jet under gravity, using differential equation to relate flow plane to unit half disk

17 p3069 A70-34979

Ideal fluid contained in half space with circular or strip-like aperture, formulating mathematical model to determine sloshing frequencies

18 p3238 A70-36057

Axisymmetric ideal incompressible fluid jet outflow from cylindrical vessel with conical bottom, using small parameter technique and conformal mapping

18 p3240 A70-36272

Ideal relativistic fluids adiabatic flow, investigating heat exchange effects within framework of special relativity

18 p3347 A70-36554

General relativistic equations for stationary axially symmetric rotating perfect fluid in comoving coordinate system

18 p3292 A70-36900

Thermodynamics and velocity of MHD shock waves in perfect conducting fluid, using compressibility conditions and relativistic Hugoniot equation

19 p3477 A70-37580

Electrically conducting perfect compressible fluid flow in semiinfinite channel under electromagnetic field, using multiple scales method

19 p3479 A70-37595

Sound field produced in uniform moving ideal fluid stream by nonuniform oscillating elastic wall

19 p3353 A70-38657

Perforated solid body moving in ideal incompressible fluid, deriving equations of motion in Lagrangian form

20 p3610 A70-39732

Bubble motion in ideal incompressible fluid, deriving motion equation in low viscosity fluid

20 p3614 A70-40392

Ideal fluid-cylindrical tank elastic bottom coupled forced oscillations, determining hydrodynamic pressure for tank reverse translational motion

20 p3615 A70-40444

Relativistic observer in rotational motion relative to inertial observer, imposing velocity onto perfect relativistic fluid

21 p3851 A70-42096

Rotational two dimensional steady shear flows of perfect incompressible fluid, considering channel flow characteristics for various wave modes

23 p4181 A70-44202

IDEAL GAS

Two dimensional and axisymmetric bodies shapes providing minimum wave drag to supersonic flow of perfect gas, considering bodies around which flow causes bound shock waves

03 p0409 A70-13863

Viscous compressible heat conducting laminar perfect gas flow in slender axisymmetric channels with adiabatic walls, using equations of motion

03 p0471 A70-14383

Viscous ideal gas supersonic flow past spheres, using integral relations based on Navier-Stokes equations

04 p0613 A70-14606

One dimensional steady adiabatic source nonisentropic flow of thermally and calorically perfect gas in conical nozzle, considering exit divergence and nonuniform flow effects

04 p0619 A70-15427

Mass transfer and viscous interaction combined effects on axisymmetric hypersonic flow of perfect gas over slender bodies

[AIAA PAPER 68-717] 04 p0675 A70-15576

Ideal equivalent gas method for studying thermodynamic properties in supersonic gas flows behind shock wave

05 p0831 A70-15872

Compressible fluid flow satisfying perfect gas equation in presence of thin foil, developing operators characterizing incompressible and compressible flows without Hall effect

05 p0790 A70-16158

Steady and frictionless supersonic flow of ideal gas of constant heat capacity around slightly deformed cone, calculating force exerted by gas

06 p0964 A70-17240

Cesium plasma composition as equilibrium mixture of ideal gases assuming chemical equilibrium attainable by specified reactions

07 p1349 A70-19660

Steady turbulent perfect compressible gas flow in axisymmetrical or plane channel, using equations governing channel height and static pressure variations

09 p1659 A70-22429

Transonic aerodynamics problems concerning plane and spatial rotational flows of perfect gas, discussing analytical and numerical methods

10 p1800 A70-24132

Perfect gas mixtures thermodynamic functions at high temperatures with correction for Debye-type electrostatic interaction effects

10 p1968 A70-24707

Shock wave reflection into ideal gas flow with linear density variation analyzed for flow field

12 p2211 A70-27832

One dimensional perfect gas motion under spatial pressure distribution, investigating self similar solutions

12 p2212 A70-28189

Perfect gas supersonic flow with constant velocity, pressure and density around finite nonaxisymmetric body at small angles of attack

12 p2158 A70-28197

Stagnation point position and entropy at surfaces of supersonic paraboloids in perfect gas

12 p2160 A70-28250

Chemically reacting ideal substance model, describing thermodynamic properties and application to energy conversion processes

14 p2533 A70-30529

High temperature inviscid flow of ideal radiating gas, analyzing effects of radiation pressure and energy on flow field

14 p2666 A70-30999

Strong shock waves profiles in monatomic perfect gases by Monte Carlo simulation, obtaining maximum density slope thicknesses

14 p2567 A70-31031

Cesium plasma composition as equilibrium mixture of ideal gases, assuming chemical equilibrium attainable by specified reactions

15 p2781 A70-32697

Nonreacting and chemically reacting laminar flows, calculating equilibrium, nonequilibrium and ideal gas laminar boundary and viscous shock layers over hyperboloid

[AIAA PAPER 70-808]

17 p3005 A70-34456

Normal shock structure in thermally perfect gas, using perturbation methods

17 p3070 A70-35244

Perfect and dissociating gas nonstationary supersonic flow around sharp profile of finite thickness analyzed by linearization and method of characteristics

19 p3351 A70-37242

Perfect gas irrotational isentropic nozzle flow by solving partial differential equations set

21 p3744 A70-41240

Self similar flow instability behind collapsing cavity boundary, examining perfect gas adiabatic equation of state

21 p3808 A70-41500

Exhaust plume rarefaction from sonic orifice, considering continuum to transitional behavior for perfect gas

[AIAA PAPER 69-657]

21 p3745 A70-41742

Self similar formulations for motion of radiating-absorbing perfect gas symmetric flow

21 p3954 A70-42202

Decelerated channel flow dynamics of ideal gas with supersonic velocity closed by compression shock, using finite difference method

21 p3747 A70-42203

Perfect gas acyclic and cyclic, steady and irrotational motions in subsonic regime around convex profile with constant curvature variation by Chaplygin method

21 p3846 A70-42259

Perfect gas circular subsonic flow around convex obstacle, using hodographic method for boundary problem

22 p3958 A70-42608

Macroscopic equations of motion established by Maxwell transport equations for relativistic perfect gas

22 p4011 A70-42716

One dimensional perfect gas motion under spatial pressure distribution, investigating self similar solutions

22 p4012 A70-43314

Perfect gas supersonic flow with constant velocity, pressure and density around finite nonaxisymmetric body at small angles of attack

22 p3960 A70-43322

Perfect gas three dimensional boundary layer separation on circular cone at incidence, comparing numerical calculation and experimental results

23 p4133 A70-44207

Perfect nonrelativistic bounded gas thermodynamics and surface tension, assuming single particle energy level density dependence on external potential

23 p4284 A70-44928

Perfect gas statistical relations by perturbation form of state equation for atmosphere

24 p4372 A70-46071

IDENTIFYING

NT TIMBER IDENTIFICATION

Automatic control system identification with respect to optimality criteria, mathematical models, computing techniques and input signals

07 p1247 A70-20029

Differential correction algorithm for identifying air-plane parameters from flight test data, assuming differential equations

08 p1465 A70-20783

Quasi-linearization technique in computer program for aircraft parameters identification featuring efficient search for optimal parameters in algebraic or differential equations

08 p1465 A70-20784

Aircraft accidents victims identification, considering use of specialized laboratories

09 p1626 A70-23018

Maximum likelihood methods for aircraft identification problems, considering model types, flight disturbances and available data

16 p2885 A70-33326

Asteroid identification during different oppositions, using numbered planetoids and node catalog

16 p2974 A70-33657

Parameter variation effects on iterative identification of linear system by learning method

17 p3130 A70-35299

3-O-methyl-mannose neutral sugar identification as constituent of fungal polysaccharide

20 p3572 A70-39625

Major and trace element concentration in contact zones of Precambrian diabase dikes from Wyoming ranges, showing dikes as continental tholeiites

03 p0472 A70-13148

Reflectance spectra obtained for igneous rocks and minerals, establishing correlation between reflectance and energy wavelength, composition and sample particle size

05 p0839 A70-16390

Chemical analysis of Australasian tektites inferring extraterrestrial igneous origin, noting similarity to preimpact parent rock

05 p0916 A70-16832

Apollo 10 and 11 photographs revealing probable igneous intrusions on lunar farside crater

06 p1137 A70-17195

Australasian microtektite compositional trends compared with critical plots enabling distinction between rocks formed by igneous sedimentary and vapor fractionation processes

06 p1150 A70-18477

Lunar surface samples characteristics correlation with terrestrial igneous rocks/basalts/ and eucrite meteorites based on alpha scattering analysis

07 p1380 A70-19203

Middle Miocene hiatus in volcanic activity of Western U.S., discussing K-Ar dates for Tertiary rock of Great Basin area

13 p2393 A70-28718

Apollo 11 lunar igneous rocks mineralogical, chemical and petrological features by optical and electron microscopy and X ray spectrometry

21 p3896 A70-41512

Opaque minerals in Apollo 11 lunar igneous and fragmental rocks, using reflecting microscope and electron microprobe

21 p3896 A70-41513

Fission track uranium distribution studies of Apollo 11 lunar volcanic rocks, using Lexan plastic print method

21 p3900 A70-41537

Apollo 11 lunar igneous rocks minerals and glassy phases characteristics, using electron probe microanalysis

21 p3900 A70-41538

Mineral chemistry of Apollo 11 igneous rocks, soil and breccia samples, comparing with meteorites

21 p3773 A70-41545

High crystallization temperatures for igneous rocks from Tranquility Base indicated from late formation of sulfide liquid forming complex troilite intergrowths and iron

21 p3902 A70-41553

Neutron activation analysis for Re and Os in Apollo 11 volcanic rocks, discussing possible meteoritic contamination of secondary rocks and fines

21 p3775 A70-41589

Chemical composition and reducing capacity of Apollo 11 igneous rocks, breccia and soil fines, using semimicro X ray fluorescence

21 p3777 A70-41602

Metallic Fe grains in Apollo 12 igneous rocks, discussing Ni and Co abundances

21 p3920 A70-41881

Terrestrial and synthetic lunar igneous rocks thermal conductivities in melting range, discussing thermal gradient

23 p4238 A70-43804

Aft-end igniter design and placement for solid propellant rocket motors avoiding overpressurization and nozzle pressure oscillations

21 p3866 A70-40892

IGNITION

NT ELECTRIC IGNITION

NT SOLID PROPELLANT IGNITION

NT SPARK IGNITION

Gas ignition and burning processes calculation with allowance for hydrodynamics, discussing time saving finite difference solution of differential equations system

01 p0218 A70-11020

Hydrogen peroxide oxidizer for higher characteristic mixture ratio in hybrid propulsion systems with hypergolic reactions ignition

[ONERA-TP-773]

02 p0352 A70-12209

Propane oxidation reaction and ignition delay times

[AIAA PAPER 68-633]

03 p0603 A70-12909

Ignition of freely falling single fuel droplets, considering initial size, oxidizer temperature, fuel composition, droplet spacing, etc

04 p0733 A70-15540

Combustion processes and ignition criteria in shock wave ignition of liquid fuel drop in oxidizing atmosphere

[AIAA PAPER 70-9]

06 p1180 A70-18142

Unsensitized gaseous fuel-air mixtures photochemical ignition due to molecular oxygen photodissociation by radiant energy absorption

[AIAA PAPER 70-149]

06 p1183 A70-18225

Preignition heat release rate profile in ethylene-air mixture flow against hot surface, determining temperature and velocity distribution optically

07 p1420 A70-19263

Gas phase ignition theory of evaporating fuel in stagnant hot oxidizing gas as function of temperature

07 p1421 A70-19317

Ignition and extinction in opposed jet diffusion flame for flow of compressible fluid with competitive/chain reactions

07 p1422 A70-19578

Liquid fuel droplet ignition quasi-stationary theory occurring at maximum chemical reaction rate

14 p2664 A70-30393

Preignition and combustion kinetics in airstream of Mg and Al suspensions in aviation kerosene and gasoline

14 p2664 A70-30395

Ignition and combustion in ducted turbulent supersonic flow, discussing premixed and unpremixed ethylene

16 p2997 A70-33488

Boron particles ignition and combustion in supersonic air stream, emphasizing axial and lateral two phase flow injection

[AIAA PAPER 70-720]

16 p2856 A70-33496

Pressure histories of burning modes in combustion driven shock tube using ignition of stoichiometric hydrogen-oxygen mixture with He dilution

17 p3195 A70-34922

Flameout and ignition correlation for diffusion fuel burnup behind angled stabilizers in annular turbine combustion chamber

18 p3300 A70-36127

Ignition surges role in combustion economics

18 p3348 A70-36652

Hypersonic nozzle ignition phenomenon in reflected shock wind tunnel

19 p3352 A70-38170

- Gas phase ignition theory with feedback of homogeneous propellant exposed to stagnant gas after shock reflection
[AIAA PAPER 69-559] 21 p3950 A70-41728
- IGNITION LIMITS**
Limits of self ignition in reaction of F with H detected photoelectrically
05 p0956 A70-16156
- Ignition and extinction of diffusion flames predicted from studying forced convection in boundary layers
[WSCJ PAPER 69-36] 06 p1178 A70-17976
- Cold ducted supersonic flow of premixed ethylene and air ignition by hot turbulent jet
[AIAA PAPER 70-148] 06 p1131 A70-18057
- Pregnation products from hydrazine propellants at simulated high altitude conditions using IR spectrophotometry, mass spectrometry and differential thermal analysis
07 p1358 A70-19579
- Minimal initial size of explosion reaction center used to explain ignition process in flammable mixtures, noting dependence on pressure, temperature and composition
07 p1422 A70-19586
- Gas discharge gap preionization by thin preheated tungsten wire ignition without explosion, resulting in plasma turbulence prevention and radiation density increase
13 p2462 A70-28986
- Low pressure deflagration, limit dependence on strand size in terms of cross section dimensions for composite ammonium chlorate propellant
[AIAA PAPER 69-144] 13 p2473 A70-29955
- Atmospheric pressure hydrocarbon-air mixtures confined by thin plastic membrane, obtaining composition range for detonation initiation limits
21 p3865 A70-40884
- IGNITION SYSTEMS**
Fuel injection and mixing and piloted ignition in supersonic flow design principles for scramjet engine, evaluating eddy viscosity model for parallel injection
02 p0354 A70-12047
- Solid rocket motor ignition system based on exothermic alloying of bimetallic wire constituents
[AIAA PAPER 69-425] 06 p1128 A70-17179
- Exothermic bimetallic ignition systems /EBIS/ design for solid propellant rocket motors of tactical missiles to reduce shock loadings
12 p2289 A70-27694
- Resonance ignition technique for gaseous oxygen and hydrogen rocket propellants
14 p2627 A70-30776
- Titanium powder compacts exothermic solid phase reaction ignition by focused laser pulse, obtaining temperature profile from mathematical model based on energy transport
20 p3639 A70-40473
- Composite solid propellant thermal ignition from hot wire tests and model
21 p3942 A70-40877
- Particulate boron levitated electrostatically in air and ignited by pulsed laser to avoid contamination, investigating combustion by high speed photography
[SMPE PREPRINT 100] 22 p4032 A70-43034
- IGNITION TEMPERATURE**
Fire prevention problems in closed oxygen-rich environments, discussing ignition temperature and flame propagation rate
03 p0607 A70-13961
- Ignition of cold premixed fuel by hot projectile, obtaining distance for ignition occurrence
[AIAA PAPER 70-150] 06 p1180 A70-18133
- Cold combustible mixture ignition at forward stagnation region of hot projectile, calculating temperatures for propane-air mixture
07 p1422 A70-19577
- Thermal explosion criterion for explosion/ignition delay of exothermic material surrounding heated wire as function of time
07 p1424 A70-20005
- Ammonium perchlorate-polymer mixtures combustion rates with/without cobalt oxide additions, studying ignition temperatures of stable flameless burning
09 p1787 A70-22108
- Stannic oxide-chromium oxide catalyst effects on thermal decomposition and ignition of ammonium perchlorate /AP/, calculating activation energy
11 p2100 A70-26281
- Spontaneous ignition temperature as function of surface-to-volume ratio in static systems for fuels
11 p2151 A70-26384
- Spontaneous ignition dependence on transient temperature variations accompanying gas entry to evacuated vessel
12 p2330 A70-27222
- Thermal testing of decomposition and spontaneous ignition of diethyl peroxide before explosion
12 p2330 A70-27224
- Oxygen motion velocity effect at various pressures on heatproof and heat resistant steels and alloys ignition, noting minimum ignition temperature
13 p2434 A70-29168

- External burning fuels environmental temperature requirements from nonlinear droplet ignition model, emphasizing droplet size importance
[AIAA PAPER 70-607] 16 p2997 A70-33604
- Autoignition, ignition and surface temperatures of M-2 double base propellant at low pressure, correcting thermocouple measurements by theoretical model
18 p3299 A70-36697

IGNITRONS

- Ignitron converters for feeding power plasmatrons and arc reactors, describing circuit and operation
11 p1984 A70-26742
- Semiconductors as igniter material for ignitrons, tabulating electrical characteristics
14 p2590 A70-30640

IGY [GEOPHYSICAL YEAR]**U INTERNATIONAL GEOPHYSICAL YEAR****ILLUMINANCE**

- Pupil diameter changes associated with constant change in accommodative stimulus as retinal illuminance varies
03 p0427 A70-13950

ILLUMINATING

- Illuminating conditions in deep layers of turbid plane-parallel medium for highly elongated scattering characteristic
04 p0745 A70-14497
- Spacecraft cabins illumination conditions selection based on cosmonaut visual perception of luminous objects
07 p1221 A70-19515
- Holographic 3D movie of front-lighted opaque objects, recording diffuse reflection with CW laser and high resolution film
09 p1684 A70-23533
- Motion picture holography using continuously pumped ruby laser illumination system in repetitive Q switched mode
09 p1689 A70-23782
- Spacecraft cabins illumination conditions selection based on cosmonaut visual perception of luminous objects
11 p1991 A70-26114
- Displacement component in chosen direction on deformed object surface, using hologram interferometry with double illumination
13 p2409 A70-29475
- Manual spectrograph for distant objects spectrophotometry under natural conditions and solar illumination
14 p2583 A70-30415
- Illumination level and contrast loss distribution in atmosphere to evaluate passive night vision equipment with image intensifier tubes
16 p2907 A70-33184
- Airborne illumination using argon vortex-stabilized arc lamp, noting applicability in near IR spectral range
17 p3023 A70-35152
- Lighting and background effects on human binocular color vision of signal lights in industry
19 p3366 A70-38923
- Object visibility limits when illuminated by laser beam with spatial selection method, discussing atmospheric conditions and light source radiation power
20 p3641 A70-39448

ILLUMINATION

- Diffuse illumination in holography indicating spread increase dependence on product of phase mean-square value and spatial frequency bandwidth
02 p0296 A70-11891
- Minimum altitudes for illumination levels of aerial color photographic film calculated for different landscapes
07 p1283 A70-19633
- Illumination of zenith region of sky before and during solar eclipse of September 1968 measured by luxometer
08 p1573 A70-20950
- Age and retinal illumination influence on human pupillary near reflex investigated by photographic measurements
12 p2171 A70-28036
- Si solar cell power output and spectral response as function of angle illumination, eliminating atmospheric influence
14 p2533 A70-30337
- Extrinsic photoconductor with reduced background under uniform illumination, describing frequency response as function of recombination and dielectric relaxation times and load resistances
14 p2586 A70-30989
- Illumination of zenith region of sky before and during solar eclipse of September 1968 measured by luxometer
15 p2806 A70-32762
- Illumination efficiency in shaped two reflector Cassegrain antenna system related to feed pattern deviation
16 p2861 A70-32968
- Geometrical figure fragmentation produced by intermittent illumination, examining dependence on presentation frequency and temporal factors
20 p3580 A70-39491

- Radar consoles with various display components under different illumination levels to determine optimal operator performance, discussing push-button design recommendations
20 p3580 A70-39713

- Visual acuity during ocular tracking movements as function of field illumination density
23 p4147 A70-44777

- Spatial aspects of sensitization effect properties compared to background light fields, lowering rod threshold at center by light addition to surrounding angular region
23 p4147 A70-44779

ILLUMINATORS

- Continuous Chlorella production as function of total illumination in high intensity light system incorporating aerobic fermenter for heterotrophic cells
04 p0645 A70-15454
- Monopulse ruby lasers for moving object illumination during shadow photography, noting applications to ballistic studies
09 p1698 A70-23173
- Acoustical holography with single stationary point detector noting reciprocity between detector and point source illuminator
17 p3088 A70-35030
- Thermoelectrically cooled GaAlAs injection laser illuminator, discussing optical-electronic interface problems and design and performance characteristics
22 p4052 A70-43603
- High efficiency gallium arsenide IR illuminators comparing dome diodes fabricated from diffused or Si doped solution grown materials
24 p4319 A70-45784

ILLUSIONS**NT MOON ILLUSION****NT OCULOGRAPHIC ILLUSIONS**

- Suprathreshold angular acceleration effects on oculographic illusion, obtaining magnitude estimates during and after acceleration
14 p2543 A70-30897
- Perceptual displacement of hashmark between detector and unequal squares, discussing contour repulsion and perspective interpretation
14 p2537 A70-30899
- Pitch and Coriolis illusions effects on pilot pitch angle adjustment in simulated takeoff
15 p2689 A70-31885
- Distorting and distorted components during geometrical illusions stereoscopic registration
19 p3366 A70-38926
- Imaginary axes effect of phenomenal space in contrast illusions of distance, discussing division of S field of vision by definite point fixation
20 p3573 A70-39764
- Stroboscopic stereophenomenon, investigating depth shift of oscillating target motion binocularly viewed for interocular luminance differences
23 p4147 A70-44781
- Pitch illusion in flight personnel under centripetal acceleration
24 p4306 A70-45330

ILMENITE

- Apollo 11 lunar rock clinopyroxene, plagioclase and ilmenite internal substructure, using high voltage transmission electron microscopy
21 p3901 A70-41544
- Apollo 11 ilmenite basalts petrology from regolith samples
23 p4239 A70-43898

ILS [LANDING SYSTEMS]**U INSTRUMENT LANDING SYSTEMS**

- ILYUSHIN AIRCRAFT**
Ilyushin 62 aircraft geometry, propulsion, structure, onboard equipment and performance
08 p1436 A70-21365

IMAGE CONTRAST

- Duty factor and contrast in scanned displays, discussing light modulator and emitting displays
01 p0043 A70-10780
- Simulation technique to evaluate TV contrast trackers standard scan performance using video tape recording
01 p0058 A70-10812
- Atmospheric water vapor effect on contrast between natural target and sky via spectrophotometric method, exploring target visibility and contrast relations
02 p0325 A70-11873
- Hologram image resolution, finding angular alignment of reconstruction wavefront as limiting factor
02 p0297 A70-11923
- Speckle pattern in image plane of laser illuminated diffuse object, calculating pattern intensity and contrast
02 p0312 A70-12106
- Photointerpreters information extraction, studying psychological effects of image contrast and resolution on accuracy of target detection
02 p0300 A70-12459
- Interferogram contrast as spatial frequency function measured for photographic materials used in holography by He-Ne laser
03 p0485 A70-13530

Photometry as aid for aerial photography, discussing resolution, mapping, etc 03 p0486 A70-13554

Object visualization in phase contrast using nonlinear interferential holography by successive recording of intensities on photographic plate 05 p0848 A70-16273

Automatic measurement of frequency-contrast characteristics of photographic films using linear, photoelectric and high speed comparator devices 05 p0852 A70-16865

Image contrast in holographic reconstructions, discussing influence of given surface intensity recording and oblique reference wave on hemigram 06 p1067 A70-18398

Photographic emulsions used for astronomical photography in U.S., discussing hypersensitization, exposure, processing and image evaluation methods 06 p1071 A70-18516

Threefold reduction of aerial negatives facilitating microfilming without impairing accuracy and clearness of image details 07 p1278 A70-18692

Visual and quantitative image definition, evaluating microdetail clarity in panchromatic, IR, color and color IR aerial photographs 07 p1281 A70-19369

Birefringence determination from contrast of interfering natural light beams 08 p1543 A70-20521

Resolution, contrast and gray scale performance of CRT displays compared to dot matrix displays 08 p1500 A70-21763

Small contrast objects detection by photographic technique, measuring gradients, granularity noise and density variations for emulsions 09 p1673 A70-22157

Photographic emulsion nonlinear response effect on image quality, discussing holography for multiple exposures 09 p1676 A70-22718

Object contrast effects on straight edge images in partially coherent illumination 10 p1898 A70-23910

Nb and Nb alloys activation in polarized light by etching technique, observing grain contrast improvement 10 p1906 A70-25229

Image contrast and diffraction efficiency of dielectric hologram made from diffuse signal beam, bleaching photographic emulsions 11 p2048 A70-25359

Fog visibility improvement by optical range gating, increasing image contrast by background radiance reduction 11 p2064 A70-26719

Quantitative analytic composite photography, performing image density point-to-point subtraction of two negatives 13 p2406 A70-28905

Microwave holography with artificial reference wave and receiver multiplier, improving linear resolution in image 13 p2408 A70-29407

Image coherence of object by laser illumination through moving diffuser related to diffuser autocorrelation 14 p2588 A70-31208

Scattering function and image quality in sharp edge holography using single mode laser, analyzing coherent and diffuse light 15 p2733 A70-31556

Radiograph images digital processing by linear and nonlinear position invariant techniques, obtaining contrast enhancement 15 p2706 A70-32569

Illumination level and contrast loss distribution in atmosphere to evaluate passive night vision equipment with image intensifier tubes 16 p2907 A70-33184

Modulation transfer function /MTF/ systems analysis with emphasis on target acquisition, relating image contrast characteristics of target and background 16 p2907 A70-33185

Optical system and light source imperfection effects interference image contrast lowering in laser interferometer for length measurements 16 p2928 A70-33292

Atmospheric optical inhomogeneity effect on image quality, investigating deflection angles for spherical light wave passage at various altitudes 16 p2915 A70-34215

INTIC tube memory image intensifier with contrast enhancement, describing design and performance 16 p2880 A70-34269

Metal grid capacitive memory for INTIC and direct view storage tubes, describing image contrast control 16 p2880 A70-34270

Meteor spectrosensitometric properties of panchromatic plates and films for aerial photos, investigating parametric conditions effect on image quality 19 p3422 A70-37653

Brightness contrast by human observer binocular matching, discussing neural networks models 19 p3366 A70-38924

Retinal images smearing during voluntary saccadic eye movements, obtaining thresholds for horizontal and vertical stimuli bands 19 p3366 A70-38927

Encircled energy calculation in optical systems with central obstruction, observing focus error, spherical aberration and central stop effects on image contrast 20 p3627 A70-39088

Sunspot umbras and penumbras magnetically nonsplit lines measured photographically by spot contrast discriminator 21 p3887 A70-41115

Optical telescope reflecting prism angle deviations effect on modulation transfer function and image quality 22 p4072 A70-42506

Pseudo three dimensional effect on monoscopic radar imagery for topographic relief differentiation, using offset superposition of transparencies 22 p4031 A70-42965

Cobb chart resolution in photographic system including independent sources of image spread and single source of granularity 24 p4334 A70-45450

Exposed photographic layers blackening phenomenon energy spectrum and mean square 24 p4336 A70-45655

Monochrome radiography for contrast strengthening to increase color images detectability by human eye 24 p4337 A70-45708

Radiography for nondestructive tests, considering image quality specification and choice of geometric progression for determining visibility 24 p4337 A70-45709

Wire and hole type penetrometers minimum perceptible image contrast level on radiograph, considering X ray quality and films effects 24 p4337 A70-45713

Photographic paper as emulsion film substitute in industrial radiography, evaluating sensitivity and image contrast 24 p4337 A70-45715

Radiography using photo-nuclear reaction emulsion to improve picture contrast by eliminating scattered photons in sample 24 p4337 A70-45716

Image contrast enhancement on neutron radiograph by energy tailored beams 24 p4376 A70-45748

IMAGE CONVERTERS

NT CELESCOPES

NT IMAGE TUBES

Image conversion scheme to obtain holograms of three dimensional objects illuminated with IR light, using nonlinear optics 04 p0685 A70-14406

Angular tolerance on IR radiation for phase matched image up-conversion in material with nonlinear susceptibility 04 p0703 A70-15621

Imaging properties of parametric image converters, taking into account frequency doubling of brilliant object by self interaction within nonlinear material 05 p0852 A70-16991

IR image conversion into visible using nonlinear KDP crystal 12 p2248 A70-27543

Acoustographic imaging system /AGIS/ using liquid crystal detection screen to provide color display of ultrasonic wave information 12 p2235 A70-27724

Retinal receptors physiology involved in transforming visible radiant energy into sensory message 12 p2172 A70-28105

Wide angle emitter images transformation into circular by reflecting cone and lens system, describing photographic and photoelectric methods 12 p2237 A70-28157

Holographic method for recovery of complete image /ghost/ from partial hologram and entire diffraction picture 12 p2238 A70-28186

Optical transformation of field ion micrographs providing orthographic, gnomonic projections and perspective images of hemispheric metal surface 14 p2584 A70-30506

Image processing and picture enhancement by computer, using fast binary log-antilog conversion 15 p2768 A70-32567

Optimal perturbation signal waveform linearizing nonlinear transfer characteristic of image sensing receptor array 15 p2705 A70-32725

Linked and fiber optic components, describing applications as punched card and tape reading, geometrical converters and sensing and scanning probes 16 p2904 A70-33145

Solid state IR to visible converter, using minority carriers stimulated tunnel injection into wide band gap phosphor 17 p3081 A70-34648

Optimum receiver for acoustical holography using discrete transducers arrays for image conversion 17 p3088 A70-35029

Apollo black and white TV scan converter design and operation 17 p3095 A70-35636

Ultrahigh speed ballistic-synchrophotography, using Imacon image converter camera for framing and streak modes [SMPT PREPRINT 113] 22 p4031 A70-43028

IMAGE CORRELATORS

Simultaneous recording of near and far field diffraction patterns at several exposures for single laser pulse 04 p0701 A70-15022

Stereo photographs conjugate image area matching, comparing automatic optical and electronic correlation techniques 09 p1680 A70-23067

Photoelectric devices for object position fixation and superposition of two images 09 p1684 A70-23635

Holographic identification of similar two dimensional images by linear transformation of space by spherical lens using white light correlator 12 p2238 A70-28185

Optical cross correlator with consecutive recording of mutual correlation function, using transparencies on different side of lens 13 p2412 A70-29865

Optical correlator for displacement measurements using laser produced speckle patterns of scattered coherent light 17 p3088 A70-35026

Image detection in pattern recognition through bipolar correlation, discussing reference generating algorithms and digital simulation results 20 p3633 A70-39972

IMAGE ENHANCEMENT

Aerial oceanographic photographic image enhancement by including blue spectral region, presenting Apollo 9 space photographs 12 p2217 A70-26917

Remote sensing techniques for earth resources inventory, describing image enhancement role in multiband space photography 12 p2220 A70-26936

Topographic shadow linears image enhancement by low angle illumination, describing pseudoradar technique for subcontinental sized fracture systems detection 12 p2221 A70-26960

Pilot midair collision warning instrument based on optical radar MTI, discussing target cross section enhancement by passive retroreflector 12 p2234 A70-27646

Image processing and picture enhancement by computer, using fast binary log-antilog conversion 15 p2768 A70-32567

Radiograph images digital processing by linear and nonlinear position invariant techniques, obtaining contrast enhancement 15 p2706 A70-32569

Apollo black and white TV scan converter design and operation 17 p3095 A70-35636

Interferometric holograms of vibrating body via numerical analysis of oscillations amplitude and phases 18 p3258 A70-36303

Holographic velocity data recording /velocimetry/, discussing axial resolution enhancement by spherical wave illumination 19 p3423 A70-37859

Photographic processing methods for high efficiency low noise phase holograms on silver halide emulsions 22 p4025 A70-42286

Holographic exposure and reconstruction processes, considering illumination beam polarization effects on image brightness 22 p4040 A70-43616

Photographic image deblurring method, using image forming holograph and amplitude weighting transparency 22 p4042 A70-43670

Picture transmitting systems noise rejection enhancement via redundancy, discussing video coding and decoding and signal filtration 23 p4159 A70-43760

Degraded photographic image enhancement limitations due to film grain noise 23 p4193 A70-43820

Light scatterers use behind phase object in double exposure holography, determining laser radiation wave front dynamics effect on image quality 24 p4334 A70-45461

Monochrome radiography for contrast strengthening to increase color images detectability by human eye 24 p4337 A70-45708

Image contrast enhancement on neutron radiograph by energy tailored beams 24 p4376 A70-45748

IMAGE FILTERS

Blurred photographic image restoration by combining computer generated holographic phase and photographic amplitude filters 12 p2230 A70-26981

Auxiliary minus-visual filters in high altitude IR aerial color photography, suggesting tests for film sensitometric properties

14 p2588 A70-31235

Orion Nebula photographed at H alpha line with half angstrom filter

15 p2807 A70-32805

International photographic planetary patrol network, discussing filmstrips of Mars and Jupiter using blue, green and red filters

23 p4242 A70-44262

IMAGE INTENSIFIERS

NT IMAGE ORTHICONS

Image intensifiers to improve telescope system sensitivity and spectral resolution in radiometric measurements of reentry vehicles

03 p0489 A70-13654

Automatic photo-optical technique for processing of cineangiograms to find time-course history of left ventricular volume

04 p0641 A70-14559

Optical performance of image intensifier system with good resolution for exposure times down to 1 nsec

04 p0695 A70-15568

Photographic film imagery, degraded by long term artificial atmospheric turbulence, restored by spatial filters placed in Fourier transform plane

07 p1336 A70-20090

Electron camera with two stage image intensifier control electrode tube for rapidly evolving and slightly luminous phenomena, discussing exposure times

14 p2590 A70-31406

Electronic zoom for low light level TV sensor employing electrostatic image intensifier coupled optically to SEC camera tube

16 p2903 A70-33128

INTIC tube memory image intensifier with contrast enhancement, describing design and performance

16 p2880 A70-34269

Image intensifier apparatus photographing nuclear electromagnetic cascades in ionization spectrometer

18 p3261 A70-37091

Magnetically focused two and four stage cascade picture amplifiers for astronomy and nuclear physics applications

20 p3630 A70-39426

Image intensifier systems for direct view radiological systems

22 p4028 A70-42589

Phosphor-output image intensifier response to single photon inputs in multichannel spectrophotometer for faint optical sources

23 p4195 A70-44291

IMAGE MOTION COMPENSATION

Image processing for motion blur removal, discussing methods for measuring degradation and filter design for image restoration

09 p1688 A70-23773

Open loop TV image motion compensation by image transducer with gyro demodulator analyzing errors in rate and rate-integrating gyros and AC pick-offs

14 p2588 A70-31190

Atmospheric ground layer temperature variations effect on astronomical telescope observations, discussing image motion character and origin

15 p2772 A70-32462

Spaceborne narrow band TV system with image memory tube and electronic shutter, noting variable exposure time, motion compensation and multimode scanning

17 p3089 A70-35267

Quantitative measurement of solar limb image motion and blurring, noting role of telescope aperture

20 p3634 A70-40424

IMAGE ORTHICONS

Optimum planetary image intensity at TV camera cathodes, exemplifying with Saturn orthicon image

04 p0688 A70-14694

Image orthicon in high precision astronomical camera, evaluating geometric accuracy and stability by distortion measurement

21 p3822 A70-40819

Meteorological TV imaging systems development in last decade, including low and synchronous altitude camera, sensors, orthicons, etc

23 p4193 A70-43963

Image orthicon detection and recording system adapted for spectroscopic measurements in shock tube emission studies

23 p4197 A70-44469

IMAGE TRANSDUCERS

Integrated image sensor matrix array derived from equivalent circuit to minimize sneak path effects

10 p1854 A70-23879

Thermal transducer for rapid nondestructive testing, discussing imaging of specimen bond defects and thermal property differences

10 p1894 A70-24173

High speed thermal transducer for imaging bond defects and thermal property differences within test specimens during nondestructive tests

13 p2420 A70-29244

Open loop TV image motion compensation by image transducer with gyro demodulator analyzing errors in rate and rate-integrating gyros and AC pick-offs

14 p2588 A70-31190

Semiconductor image detectors in photodiode and photoconductor forms, describing construction and operation modes

15 p2714 A70-32673

Optimal perturbation signal waveform linearizing nonlinear transfer characteristic of image sensing receptor array

15 p2705 A70-32725

Hybrid solid state image detectors, discussing integration and excitation storage operation modes

17 p3053 A70-35122

IMAGE TUBES

Electron image projection tube for fabricating integrated circuits of micron size transistors

03 p0458 A70-14027

Broadband image pick-up tube with high near IR sensitivity, comparing performance with other vidicons

16 p2907 A70-33186

Space radiation effects on secondary electron conduction /SEC/ image tube performance, observing temporary degradation and permanent damage

16 p2878 A70-33433

Metal grid capacitive memory for INTIC and direct view storage tubes, describing image contrast control

16 p2880 A70-34270

Image tube observations of Large and Small Magellanic Clouds and southern planetary nebulae at Cerro Tololo Observatory

20 p3705 A70-39480

Astronomical instrumentation and methods in different nations, emphasizing photoelectric image receivers

23 p4199 A70-45033

IMAGE VELOCITY SENSORS

Airborne electro-optical imaging sensor subsystems performance optimization, comparing mathematical and graphical methods for providing maximum SNR

16 p2906 A70-33172

Photosensitivity and scanning of planar Si photodiode image detector arrays, using most ring counter and shift register

10 p1846 A70-23881

Automatic image interpretation and classification - Conference, Pisa-Tirrenia, Italy, August-September 1968

12 p2193 A70-28101

Automatic image interpretation and classification using two dimensional digital Fourier transforms

12 p2193 A70-28106

Image processing, considering sampled data methods applied to two dimensional data

12 p2193 A70-28107

Sufficient statistics for optimal correlation function in classifying optical images in pattern recognition, using permissible transformations

14 p2553 A70-30421

Close range atmospheric shape classification, using image recognition theory concepts

19 p3416 A70-38572

IMAGING TECHNIQUES

NT RADAR IMAGERY

Optical reconstruction of microwave holograms recorded by liquid crystal detectors, emphasizing dependence on IR heat bias provided by incandescent bulb

01 p0086 A70-10421

Dynamic shape recognition scheme with two dimensional image mapped by spatial integration onto one dimensional time varying function, discussing corner information preservation

01 p0033 A70-10496

Ultrasonic imaging of internal structure by Bragg diffraction, noting reflection and dark field extension and use for flaw detection and medical diagnostics

01 p0111 A70-10570

Real time recording and permanent display, using high power energy density focused Ar laser beam for ink transfer

01 p0111 A70-10782

Image quality effects on human performance in simulation, discussing time sharing strategies and task difficulty factors

01 p0036 A70-10809

Visual simulation limitations, discussing parallax error correction in display system, wraparound system, image generation, TV and motion picture film systems

01 p0036 A70-10813

Flying spot scanner design and performance to generate images for visual flight simulation

01 p0089 A70-10816

Flying spot scanners evaluation as image processing devices, discussing scan patterns effect on video signal

01 p0089 A70-10817

Ultrasonic imaging system for flaw detection, analyzing welds

01 p0104 A70-10881

Ultrasonic holography in nondestructive testing, discussing metal block with simulated defects

01 p0089 A70-10882

Holographic techniques for extended high resolution images with resolved elements less than 0.5 micron in image field of 10 cm or more

01 p0090 A70-10886

Birefringent lens producing spatially separated multiple images, discussing polarization control, thin crystalline lenses and electro-optic control

01 p0091 A70-10915

Optical spatial amplitude filtering techniques application to moire fringe patterns processing

01 p0058 A70-11060

Book on coherent optics and holography covering image restoration, holographic interferometry, lensless Fourier transform holography, etc

01 p0144 A70-11074

Ultrasonic image superposition technique for visualization of impact fractures in glass reinforced plastics

01 p0059 A70-11101

Diffraction limited resolution criteria for geoscene imagery

02 p0297 A70-11924

Alphanumeric label and vector scan converted bright display operation, characteristics and equipment, discussing line scanning method, visual storage, display phosphor problems, etc

02 p0256 A70-11974

Three dimensional picture of wave system of single headed spin detonation constructed by simultaneously considering wave mapping in real and hodograph planes

02 p0278 A70-12028

Man machine digital display low cost system for displaying black and white image data with gray levels, color image data and dot patterns

02 p0265 A70-12152

Photographic relief images with arbitrary profile produced by using image relief height as spatial frequency function

02 p0300 A70-12462

- Photographic negatives analysis, storage and reconstruction using facility permitting photography conditions simulation and computer image treatment
02 p0302 A70-12614
- Autostereoscopic display using vibrating vanifocal mirrors, including laboratory computer generated real time image and movie projection systems
02 p0302 A70-12631
- Image formation with partially coherent light, summarizing basic properties and diffraction theory of image formation
02 p0315 A70-12831
- RF holographic vision through rain, fog or darkness, discussing cholesterol ester-coated Mylar sheets and pyroelectric hot plates detectors and antenna sensory matrix
02 p0305 A70-12843
- Spatial registration of digitized multispectral video imagery obtained from multilens cameras, multichannel optical-mechanical line scanners and multiple TV camera systems
03 p0453 A70-13000
- Displacement interferograms and schlieren pictures of optical inhomogeneities in transparent media obtainable from single exposure hologram, using non-monochromatic and laser light for reconstruction
03 p0483 A70-13258
- Double exposure holograms in diffuse radiation used to reconstruct in white light interferogram images localized in hologram plane
03 p0483 A70-13259
- Rotating prism method for obtaining time correlation between streak photographs and characteristic waveforms of flash X ray discharges
03 p0492 A70-13762
- Real image holography of complex organism or body organs as teaching aid and research tool in medicine and biology
04 p0685 A70-14558
- Three dimensional X ray imaging technique from conventional radiograph set photoreduced and projected by special purpose imaging system
04 p0686 A70-14561
- Computer processing role in film scanning and digitizing for enhancing X ray and radioisotope scanner images in medical radiographs, discussing image noise reduction
04 p0654 A70-14562
- Computer method to combine autofluorescence data to produce three dimensional display of absorbed radioactive material from multiview images
04 p0686 A70-14563
- Holographic technique for transferring phase perturbation of subject waves onto spherical waves focusable through aperture and examinable by interferometric and schlieren methods
04 p0691 A70-15034
- Image formation from wave front sampling in holography by spatial filtering, comparing Monte Carlo sampling to spaced sampling
04 p0692 A70-15365
- Visual object images describable in terms of cross correlation functions without loss of information
04 p0662 A70-15437
- Optical, digital and hybrid image processing techniques with objectives of image enhancement and replacement
05 p0847 A70-16121
- Projection display methods using scanned and modulated multicolor laser beams, discussing beam generation, modulation and scanning
05 p0858 A70-16188
- Hologram constructed with microwaves with image reconstruction at optical wavelengths using laser
05 p0849 A70-16659
- Earth resources survey aircraft system producing optical spectrum imagery of continental U.S. with photometric and photogrammetric fidelity
05 p0850 A70-16686
- Imaging properties of parametric image converters, taking into account frequency doubling of brilliant object by self interaction within nonlinear material
05 p0852 A70-16991
- Image recognition problem analyzed by deterministic approach yielding criteria for operation of recognition algorithm
06 p1014 A70-17633
- Acoustic characteristics of high subsonic model cold jet using imaging technique and measurements of energy flux of flow, calculating energy flux from flow-field measurements
06 p1040 A70-18125
- Optical properties of Gabor holograms with pure reference beam, discussing image reconstruction using He-Ne laser
06 p1072 A70-18565
- Visual imaging systems for Mars orbiter compared for performance and interactions with mission and spacecraft design
07 p1280 A70-19230
- Book on holography principles and applications, discussing imaging properties, coherence, photographic emulsions, optical analog computers, etc
07 p1283 A70-19739
- Detector for focus assessment of laser on target, scanning image by fiber optics
07 p1302 A70-20089
- Aerial color photography, considering lens types, exposure, filters, films, etc
08 p1498 A70-21543
- Display devices using electrostatic forces, discussing electrostatic printing, magnetic display system, etc
08 p1499 A70-21686
- Interferograms taken by phase difference amplification technique with nonlinear hologram, considering amplified image accuracy
08 p1500 A70-21788
- Holographic image reconstruction analysis based on two beam interferometry by spatially incoherent light source, obtaining optical transfer function
08 p1514 A70-21790
- Small contrast objects detection by photographic technique, measuring gradients, granularity noise and density variations for emulsions
09 p1673 A70-22157
- Photographic image reconstruction of spatially incoherent illuminated object using twofold holography
09 p1675 A70-22486
- EROS program earth imaging models characteristics, describing airborne and spaceborne film return and global and geosynchronous space data transmission
09 p1678 A70-22889
- Parametric image transformation during sum frequency generation
09 p1636 A70-23134
- Digital image processing applied to picture generation, intensity and geometric manipulation, spatial frequency operations and image analysis
09 p1682 A70-23507
- Covert solid state imaging system applicability to totally dark laboratory environment
09 p1686 A70-23752
- Electro-optical autocollimating focus sensor for optical systems of high angular resolution, analyzing defocus detection and errors
09 p1687 A70-23764
- Duplex schlieren optical system with one channel for data recording and second channel for visual monitoring
09 p1687 A70-23766
- Textured gray-scale imagery by computer simulating lunar display
09 p1642 A70-23771
- Optical image processor using Fourier transform corrective function for image restoration
09 p1688 A70-23774
- Pulse-biased phototransistor imaging mosaics behavior measurement showing significant photovoltaic mode at high light levels
10 p1846 A70-23880
- Bragg diffraction imaging for sound fields visualization
10 p1893 A70-24170
- X ray laminography for nondestructive testing based on synchronous rotation of source, sample and image forming planes
10 p1895 A70-24577
- Swedish real time IR imaging system, discussing airborne applications in locating fresh water springs and defining irrigation patterns
10 p1879 A70-24743
- Lens aberrations compensations in partially coherent image holography
10 p1891 A70-24838
- Fisheye projection of undistorted images obtained by fisheye lenses onto spherical screen from spherical center for hemispheric display, minimal overhead occlusion, etc
10 p1892 A70-24951
- Hologram resolution and information storage along depth of reconstructed image related to maximum track density of bubble chamber
10 p1892 A70-25113
- Thermal imaging device adaptable to IR, microwave or ultrasound radiation, projecting image on heat sensitive surface
11 p2050 A70-25643
- Modified holographic technique for three dimensional display of X ray pictures
11 p2050 A70-25644
- Spatial and amplitude modulators for laser-photographic display system producing real time TV pictures or images
11 p2062 A70-25734
- Multispectral imaging from lander for Martian surface constituents discrimination
11 p2051 A70-26000
- Microwave illuminated aperture near radiation field mapped and processed for microwave hologram suitable for optical imaging for far field pattern simulation
11 p2051 A70-26025
- Satellite coherent side-looking imaging radars producing radar maps with photographic-type quality
11 p2005 A70-26038
- Photoelastic analysis using fringe multiplication instrument applied to two dimensional models under load and frozen stress slices
11 p2061 A70-26834
- Residential urban environment data extraction from high and low resolution images
12 p2216 A70-26907
- Urban development detection by remote sensing imagery of highway and rail linkage
12 p2216 A70-26908
- Blurred photographic image restoration by combining computer generated holographic phase and photographic amplitude filters
12 p2230 A70-26981
- Brightness distribution in hologram generated image modulated by square of temporal-spatial coherence modulus of laser emitting longitudinal and transverse modes
12 p2233 A70-27503
- Terrain spectral imagery from satellites for natural resources investigations
12 p2235 A70-27745
- Relative control data incorporation into sequential or simultaneous analytical triangulation systems, considering extraterrestrial photographs reduction
12 p2308 A70-27875
- Coherent light holographic and incoherent interferometric imaging analogy, noting three dimensional image formation
12 p2236 A70-28120
- Mutual coherence functions for quasi-monochromatic illumination measured by image holography
12 p2237 A70-28124
- Wavefront reconstruction by holograms of focused images illuminated by white light, analyzing spatial coherence
13 p2408 A70-29364
- Three dimensional images reconstruction with coherent light, facilitating transmission by holographic information volume reduction
14 p2581 A70-30146
- Soviet papers on image recognition covering sequential optimization, self learning processes, transformations statistics, spatial discretization, optical information processing, etc
14 p2552 A70-30418
- Maximum convergence function in image recognition using dynamic programming and sequential optimization
14 p2553 A70-30419
- Learning self learning relationship in image recognition, analyzing resolving function with minimum probability for erroneous recognition
14 p2553 A70-30420
- Standard pattern recognition with spatial discretization, concerning discrete cell or segment viewing
14 p2553 A70-30422
- Computerized control for beam scanning and optical data processing concerning symbols, letters and photographic images
14 p2553 A70-30424
- Essa 7, Surveyor 7 and Mariner 4 space TV systems geometric distortions analysis and potentials in analytic photogrammetry and topographical mapping
14 p2586 A70-30982
- Ultrahigh speed photographic equipment with electronic systems, investigating integral images and slit cameras
14 p2589 A70-31401
- Three dimensional holographic optical imaging system, examining resolution factors
15 p2734 A70-31595
- Hologram superposition on photosensitive surface for multiimage successive recording, examining resolution, SNR, etc
15 p2734 A70-31596
- Holographic technique to record hypervelocity projectile with front light resolution, discussing image blurring
15 p2736 A70-32031
- Solar catadioptric coronagraph design free from chromatic image defects
15 p2737 A70-32041
- Holography technique for dual real images reconstruction of transparent objects with all planes in focus
15 p2738 A70-32053
- Holography without reference waves, describing image characteristics of spherical waves from point source
15 p2743 A70-32893
- Imaging type electro-optical detection systems design for passive night surveillance, building camera system and testing in helicopters and fixed wing aircraft
16 p2903 A70-33127
- Surface temperature colour contour maps of objects undergoing aerodynamic testing, utilizing electro-optical and computer techniques
16 p2905 A70-33169
- Instrument for visualization of EM field in open resonators in mm range
16 p2908 A70-33213

TV experiment for Mariner Mars 1971 Project, providing fixed and variable feature imaging data

16 p2978 A70-34027

Optical images from microwave far field /Fourier transform/ holograms, noting carrier fringe dependence

16 p2913 A70-34043

Earth resources technology satellite /ERTS-A/ for Eros program, producing telemetric imagery spatially correlated to earth surface

16 p2898 A70-34046

TV photograph image instability of stars, developing discontinuity and variability criteria as elementary approximate method for comparing nonuniformities

16 p2979 A70-34177

Solar limb image vibrations, establishing quantitative comparisons between statistical characteristics of fluctuations and weather conditions on propagation path

16 p2979 A70-34179

Reflecting prism standards rotations effect on autocollimated images positions of optical instruments, investigating focusing method

16 p2915 A70-34214

Hologram image construction by graphical method

16 p2915 A70-34216

Image distortion in reconstructions from phase only holograms, noting savings in collection and processing of acoustic holographic data

16 p2915 A70-34324

Human lung internal surface area automated measurement by computerized image processing techniques, grading emphysema

17 p3035 A70-34578

Computer generated holograms, using binary transmittance for wave fronts and three dimensional images construction

17 p3085 A70-35006

Partial coherence theory in holography with photogrammetry applications, reconstructing images with fringes representing constant range contours

17 p3087 A70-35023

Photographic and multisensor imagery augmented by field survey for mapping vegetation boundaries and density differences within and between plant communities

17 p3079 A70-35616

Observation classification /image identification/ for two normal sets with common covariance matrix, investigating error probability asymptotic behavior

19 p3375 A70-37283

Acoustical holography forming optical wavefield analog for nondestructive testing, medical diagnosis, underwater and seismic imaging

19 p3425 A70-37887

Bubble chamber photography and track image reconstruction by holography, discussing measurement apparatus, accuracy and tolerances

19 p3428 A70-38510

Holographic ultrasonic imager using liquid surface detector for real time imaging of test objects moving through viewfield, discussing nondestructive test applications

19 p3433 A70-38829

Earth resources satellite orbits and imaging sensors, discussing multispectral spin scanner design

20 p3626 A70-39053

Earth resources ground data processing in image formats from sensors in aerospace platforms, discussing collection control, image storage, retrieval, etc

20 p3591 A70-39058

Holographic bandwidth reduction by periodic dispersion structures, noting large viewfield and compact data recording

20 p3627 A70-39096

Diffraction-limited scalar image formation with large angle point reference hologram arrangement of arbitrary surface shape, point reference source and object

20 p3628 A70-39131

Microwave hologram recording for surface displacement, with laser beam illumination for optical reconstruction of image

20 p3628 A70-39152

Photographic images formation mechanism, examining streaks resolving power and total densities

20 p3632 A70-39747

Optical image hologram production, investigating gas flows around body by means of Mach-Zehnder interferometer

20 p3633 A70-39761

Holographic recording in transparent bodies with optical characteristics changeable under intensive light

20 p3633 A70-39999

Lunar and earth surfaces imaging for astronaut training in LEM simulator

20 p3607 A70-40320

Holographic measurement of general forms of motion based on reconstructed images dependence on coherence

21 p3822 A70-40810

Holography application to marine ecological studies, using laser beam reduction techniques for image

recording and reconstruction of large areas and volumes

21 p3823 A70-40821

Field-ion microscope image formation, determining periodic surface potential variation effects on high field tunneling

21 p3862 A70-40974

Two dimensional data array contour tracing algorithm for reduction of image coding bits number

21 p3786 A70-41327

EROS program earth imaging models characteristics, describing airborne and spaceborne film return and global and geosynchronous space data transmission

[AIAA PAPER 70-294]

21 p3829 A70-41871

High velocity source and receiver scanning effect on holographic image, observing rotation and distortion

21 p3829 A70-41928

Diffraction theory of sideband holography with transmission objects, discussing geometrical construction of image location and disappearance conditions

21 p3830 A70-41998

Detonation front position determination in explosive by photoelectric technique

22 p4121 A70-42341

Ultrasonic imaging systems of nondestructive testing, discussing photographic and chemical systems, thermal, optical and mechanical methods and electronic systems

22 p4027 A70-42584

Neutron radiography in cold, resonance or epithermal, and fast neutron energy ranges, discussing converter materials for direct exposure or transfer method

22 p4028 A70-42590

Electron pulse generator for imaging of glass microspheres simulating meteorite flight and impact in evacuated vessel

[SMPT PREPRINT 96]

22 p4036 A70-43059

High speed holographic methods for supersonic phase objects movement and replacement of conventional optical processes in shock tubes, firing tunnels, etc

[SMPT PREPRINT 77]

22 p4037 A70-43067

Recording of inhomogeneous mutual coherence functions in one hologram by combining image with Fourier /Fresnel/ holography

22 p4038 A70-43151

Ultrashort time perceiving electron-optical conversion methods, discussing image quality and brightness, quantum yield and time resolution

22 p4038 A70-43424

Nondestructive testing by ultrasonic acousto-optical imaging in opaque objects

22 p4047 A70-43518

Material transfer image recording using focused laser beam, discussing experimental setup and test results

22 p4040 A70-43605

Transparent objects holographic interferometry with illumination derived from phase gratings to eliminate laser speckle

22 p4040 A70-43611

Photographic image deblurring method, using image forming holograph and amplitude weighting transparency

22 p4042 A70-43670

Line-by-line and two dimensional image processing performance, considering transmission rates and distortion

23 p4160 A70-43762

Holographic primary and conjugate images properties, considering applications in moving scenes recording and multiple images storage and retrieval

23 p4193 A70-43924

Three dimensional holographic optical imaging system, examining resolution factors

23 p4195 A70-44279

Hologram superposition on photosensitive surface for multiimage successive recording, examining resolution, SNR, etc

23 p4195 A70-44280

Automatic shutter for recording holograms with laser light, controlling exposure time by photoconductor cell

23 p4197 A70-44472

Focused image holographic interferometry by double exposure with reconstruction in white light applied to flat rotating subject

23 p4199 A70-45058

High resolution upper photosphere images obtained by slow raster scanning device and germanium bolometer, noting points around sunspots

24 p4400 A70-45307

Image forming performance in photographic system design, considering Cobb chart resolution as figure of merit

24 p4334 A70-45449

Optical image reconstruction from holograms, discussing photographic materials resolution, response linearity, spatial noise, etc

24 p4335 A70-45654

Sideband Fresnel and lensless Fourier transform holographic images elongation and contraction

24 p4339 A70-45817

Acoustic holographic system producing two dimensional picture in real time, using stationary linear transducer arrays

24 p4339 A70-46080

Microminiature solid state LSI imaging system design, construction and performance characteristics

24 p4320 A70-46216

IMBEDDINGS [MATHEMATICS]

NT INVARIANT IMBEDDINGS

Computer-aided circuit design by imbedding singular elements to transform network synthesis into analysis problem

10 p1855 A70-24762

IMCC [CONTROL CENTER]

U INTEGRATED MISSION CONTROL CENTER

IMIDES

N-substituted tetrabromophthalimides prepared as fire retardant additives to PVC, polyester and epoxy resins

05 p0811 A70-16585

Glutethimide and aminoglutethimide reversible inhibitory effect on rat pituitary adrenal system in response to stress

07 p1203 A70-18902

IMINES

Photoreaction produced N-cyclohexyldiphenylketenimine from cyclohexyl isocyanide and diphenyldiazomethane

17 p3042 A70-34820

Addition and hydrogenation reactions of azomethines in chemistry of carbon-nitrogen bond, emphasizing Schiff bases

20 p3582 A70-38978

IMMERSION

U SUBMERGING

IMMISCIBILITY

U SOLUBILITY

IMMITTANCE

U ELECTRICAL IMPEDANCE

IMMOBILIZATION

Hypokinesia effects on transversostriated muscle fibers of mice, noting changes in myofibrillar apparatus, mitochondria and sarcoplasm

04 p0629 A70-14569

Immobilization effects on alpha rhythm, locomotor coordination and visual alimentary motor reflexes of cats

04 p0629 A70-14570

Nontoxic method of immobilizing protozoan *Tetrahymena pyriformis* and bacterium *Escherichia coli* in acrylamide polymers, discussing microorganism viability

05 p0802 A70-16477

Physiological effects of prolonged human motor activity restriction, discussing oxygen transport system, work capacity relationships, body fluids volume and distribution, metabolism, etc

07 p1200 A70-18786

Hypokinesia effects on cellular and humoral indices of antibody formation in rats, noting exposure time role

07 p1208 A70-19509

Monograph on directional hearing in meridian plane with head in fixed position, noting extended concept of sound

08 p1452 A70-21299

Hypokinesia effects on cellular and humoral indices of antibody formation in rats, noting exposure time role

11 p1988 A70-26108

Blood serum enzyme activity in rats during prolonged hypokinesia, noting increase of aminotransferases

13 p2351 A70-29329

Macroscopic architectural changes of cancellous and cortical bone in Rhesus monkey following long term immobilization and chemical removal of calcium

20 p3569 A70-38983

Weightlessness and immobilization effects on mechanical tolerance of bone compressive and breaking strength in monkeys

22 p3973 A70-43648

IMMUNITY

Serologic evidence of immune mechanisms, including heart muscle antibodies in patients with idiopathic cardiomyopathy, showing no autoimmune disease in majority

01 p0014 A70-10276

Autoimmunity to heart tissues in cardiac diseases, reviewing immune mechanisms in rheumatic fever, postcardiotomy and postinfarction syndromes

01 p0016 A70-10438

Mice and hamster infection resistance following short term acceleration stress, eliminating low hydrocortisone level as protective agent

03 p0428 A70-14067

Immunity indices in humans subjected to hypodynamia, noting infection resistance lowering

10 p1815 A70-24679

Hypothermia and ionizing radiation effects on hamsters influenza immune response

13 p2349 A70-28834

Hypobaric hypoxia effects on MM virus infection resistance in mice

20 p3572 A70-39428

- Mammal and human acoustic reflex for impulsive sound, investigating immunization effectiveness 24 p4297 A70-45373
- IMMUNOLOGY**
- Postnatal increase of immunologic competence to sheep RBC antigen in germ free and conventionally reared mice 01 p0000 A70-11310
- Natural immunity characteristics in dogs after proton exposure, analyzing integumentary bactericidal activity, oral microflora and neutrophil phagocytic activity 03 p0423 A70-13707
- Space cabin atmosphere effects on primary and secondary immunological responses in mice relative to spleen weight and antibody titers following antigenic stimulation 03 p0437 A70-14062
- Spacecraft cabin atmosphere effects on mice primary and secondary immunological responses relative to spleen histochemical and biochemical changes in enzyme activity 03 p0437 A70-14063
- Local stress effect on immunocompetent cells differentiation in guinea pigs lymphatic ganglia, noting increase in number of antibody producing cells 05 p0803 A70-17114
- Radial immunodiffusion for serum proteins quantitation adapted to capillary blood and compared with results for venous blood 07 p1214 A70-19932
- Idiopathic myocardial disease patients investigated for serological anomalies and markers of immunopathology 09 p1621 A70-23301
- Natural immunity characteristics in dogs after proton exposure, analyzing integumentary bactericidal activity, oral microflora and neutrophil phagocytic activity 11 p1985 A70-25507
- Amino acids changes distribution in specificity regions of light polypeptide chains of immunoglobulins showing correspondence with Poisson distribution 14 p2536 A70-30349
- Infection resistance during extended space flights, discussing microfloral exchange, defense mechanisms, waste, etc 15 p2688 A70-31677
- Antigens immunological response during myocardial infarction 20 p3570 A70-39151
- Mice immunobiological reactivity at simulated high altitude 20 p3575 A70-40189
- Human elbow induced forearm and hand vessels tachyphylaxis to angiotensin, noradrenaline and acetylcholine compared to vascular response of vasopresin 21 p3761 A70-40577
- IMP**
- Interplanetary medium energetic electrons and isotopes measurement, discussing spectrometer electronics of IMP H and J 21 p3825 A70-41000

- Impact against elastoplastic blank allowing for base and striker compressibility, giving solution in region of plane wave first reflection from base 05 p0947 A70-17016
- Thin walled cylindrical shells design for axisymmetric impulsive loads, calculating strains due to explosive forming in water 06 p1167 A70-17867
- Cyclic plastic deformation changes with load increase under uniform stress with normal loading and nonuniform stress with impact loading, considering fatigue limit 06 p1168 A70-17923
- Rotational relaxation times for low density hypersonic nitrogen free jet, comparing measured and predicted impact pressures 06 p1043 A70-18279

Large Froude number solution for nonseparative impact of elliptical cylinder floating on incompressible fluid surface in half space extended to small Froude numbers
07 p1253 A70-18770

Membrane stress in thin circular viscoelastic ring under impulsive loads and internal heat, using stress-strain relation for linear Maxwell material model
08 p1589 A70-21311

Impact forces and specimen bending moments generated during dynamic test interpreted in terms of system dynamics and material fracture characteristics
08 p1518 A70-21319

Elastic post stability under longitudinal impact on rigid support, considering loading/unloading phases for calculating shock half wave length and critical rate
08 p1591 A70-21443

Steady state motion of sinusoidally excited primary system with impact damper solved analytically by piecewise linear technique
08 p1546 A70-21858

Dynamic buckling of thin circular ring subjected to radially directed impulsive load, investigating in-plane and out-of-plane modes
08 p1596 A70-21978

Finite plates impact flow field analysis from isentropic one dimensional flow equations solution through hodograph transformation
09 p1776 A70-22721

Elastic beam stability, natural frequencies and critical forces under longitudinal impact with nonuniform compressing force
09 p1780 A70-23116

Transition of stress distribution on collision surface of seminfinitesimal elastic plane with rigid beam, using Fredholm integral equation
10 p1954 A70-23950

Aircraft arresting hook response to impact regarding beam flexibility and internal damping using numerical wave propagation methods
10 p1963 A70-25069

Gas-filled composites under impact loading, studying thermal damping due to heat transfer between compressed gas and solid structure
11 p2140 A70-26480

Reaction impulse during steel spheres impacts at lead surface in vacuum dependent on kinetic energy, velocity and spheres material
11 p2146 A70-26794

Seismic echo produced by jettisoned Apollo 12 S-4B stage impact at lunar surface analyzed by multiscatter scattering theory
12 p2298 A70-27280

Euler-Bernoulli and Timoshenko beam impact models compared for case of finite beam resting on spring supports
12 p2327 A70-27843

Missile impact and trajectory for water entry with zero angle of attack, including deceleration measuring instrumentation
[AIAA PAPER 70-531] 13 p2387 A70-29039

Jet collisions solutions for impact of pin at obstacle, solid body impact at surface, cylindrical shells longitudinal impact and jets interactions
13 p2453 A70-29771

Flight Impact Simulator for simulating bird strikes and bird-proofing of aircraft
16 p2888 A70-33290

One dimensional analysis of stress and strain concentration resulting from longitudinal impact of viscoelastic rods
17 p3185 A70-34965

Elastic and plastic cylindrical shells, investigating dynamic buckling under impulsive loads
18 p3338 A70-36436

Elastic systems impact buckling approximate solution by finite difference method
18 p3342 A70-36591

Strain transducer /optical diffraction grating/ for plastic wave propagation measurement along specimens subjected to impact
19 p3425 A70-37884

Nonlinear stress-strain model of unloading in symmetric longitudinal impact of two elastic-plastic bars, using numerical method
19 p3541 A70-38046

Passive shock isolation, describing environments, excitation types, equations of motion, etc
21 p3934 A70-40915

Bending stress at clamped support of impulsively loaded semiinfinite conical shell, obtaining formulas from perturbation theory
21 p3938 A70-41759

Seismic signal by Apollo 12 lunar module impact indicating deep layer of powder by signal propagation
21 p3920 A70-41894

Metal deforming machines permissible impact velocities determination
22 p4046 A70-42815

Transient elastic vibrations of air and liquid filled cylindrical shells under radial impact, using shadow-optical cinematography
[SMPT PREPRINT 107] 22 p4031 A70-43030

Rope transverse oscillations due to impact taking bending rigidity into account
24 p4424 A70-45627

IMPACT PREDICTION

Digital computer program /LANDIT/ for predicting structural impact response of axisymmetric landing vehicles consisting of rigid payload and crushable impact limiter system
02 p0380 A70-11945

Model for impact behavior of elastic body at elastic half space, measuring gas molecule impulse exchange at metal surfaces
06 p1171 A70-18260

Book on dynamics of mechanisms with elastic connections and impact systems covering differential and finite difference equations, equations of motion, friction effects, etc
08 p1502 A70-20753

Real time opto-triangulation by cinethedolites for data acquisition used in rocket impact prediction
09 p1640 A70-23779

Impact problems of slip clutch and beam scales dynamic characteristics simulation by 1130 CSMP /Continuous System Modeling Program/
10 p1860 A70-24653

Computational limitations of midcourse correction velocity for lunar impact trajectories, considering impact miss magnitude correction
11 p2109 A70-25955

Sounding rockets impact dispersion associated with wind measurement errors and thrust misalignments, discussing correction via reduced aerodynamic stability and initial rocket spin
13 p2503 A70-28677

Impact times measurement by photography, correlating projectile velocity with projectile-target distance
20 p3635 A70-40530

Apollo command module land impact capability, discussing impact dynamics, possible landing area, spacecraft structure, crew couch and strut attenuation system, etc
[AIAA PAPER 70-1165] 21 p3930 A70-41847

Spinal injury prediction during emergency ejection and crash impact protection research
23 p4153 A70-44489

Sounding rockets dispersion, considering deviations from predicted point of impact due to wind effects, thrust vector errors and manufacturing inaccuracies
23 p4262 A70-44845

Birdproofing aircraft research program using pneumatic cannon firing real and simulated bird carcasses
24 p4292 A70-46398

IMPACT PRESSURES

U IMPACT LOADS

IMPACT RESISTANCE

Digital computer program /LANDIT/ for predicting structural impact response of axisymmetric landing vehicles consisting of rigid payload and crushable impact limiter system
02 p0380 A70-11945

Bumper materials effect on two component hypervelocity impact shields performance, noting material density influence
[AIAA PAPER 69-379] 07 p1310 A70-19713

Austenization temperature, cooling rate and tempering conditions effect on steel castings structure, strength and impact properties
14 p2596 A70-30875

Conical pivot bearings for impact accelerations tolerance in space environments, discussing optimum dimensions and minimal torque design
16 p2923 A70-34164

Pressure distribution shock pattern and impact wave resistance in frictionless plane parallel and source shaped supersonic flow
18 p3207 A70-36385

High impact Ag-Zn cell design for space missions instrument package landing, considering heat sterilization and minimum operational capability
21 p3757 A70-41013

IMPACT SENSITIVITY

U IMPACT RESISTANCE

IMPACT STRENGTH

Microstructure and impact strength of welds of Cr-Mn steel containing nitrogen, observing grain growth dependence on nitrogen content
03 p0509 A70-13277

Structural strength under impact loading with allowance for shock waves, comparing various strength calculation methods
04 p0774 A70-15098

Matrix stiffened nickel-chromium welding products featuring high tensile strength at room and elevated temperatures and high impact strength at cryogenic temperatures
08 p1508 A70-21488

Cycloaliphatic epoxy resins tensile and impact strength improvement by modification with elastomeric materials, considering heat distortion temperature
16 p2936 A70-33359

Impact transition behavior and strength-toughness relation of high purity Ni maraging steels, noting intergranular fracture at grain boundaries
18 p3273 A70-36043

Boron-Al composite filament fracture behavior and postimpact tensile strength, examining shock loading and impact velocity effects
22 p4060 A70-43682

Full-swing and incremental Charpy impact and Izod tests for ceramic intrinsic impact strength
23 p4209 A70-43872

Mg addition effects on impact strength and micro structure of Al-Si-Cu alloys, using Charpy test and metallographic methods
24 p4363 A70-46196

IMPACT TESTING MACHINES

Shot delivery per second per unit area from ejector nozzle during shot peening, determining ideal delivery rates for shot of various sizes
07 p1291 A70-18830

Pneumatically operated lifting mechanism and fluidic control system added to Izod impact testing machine for automatic impact repetition, counting and stopping
11 p2034 A70-26837

Charpy impact test accuracy for model machine certification, discussing erroneously high test values
15 p2820 A70-32236

Drop-weight test machine evaluation taking into account operator, test machine, specimen thickness, notch type and strength level effects
15 p2759 A70-32241

Impact test machines, specimen design and energy measurement in dynamic test method for steel fracture strength
15 p2759 A70-32242

Gas gun and instrumentation for impact tests
18 p3238 A70-37090

Solid rocket fuels mechanical properties, using high speed pneumatic test machine and impact tensile tester
22 p4088 A70-42342

IMPACT TESTS

NT CHARPY IMPACT TEST

Hypervelocity impact of small different diameter right circular cylinders, describing launching method using light gas gun
03 p0583 A70-12918

Micrometeorite detection involving impact stress wave monitoring by strain gages embedded in viscoelastic plastic
03 p0487 A70-13573

Hypervelocity impact craters formed in low and variable strength laboratory materials to provide insight into formation mechanics and resultant structures of meteorite craters
03 p0603 A70-14349

Meteoroid impacts as sources of seismic energy on moon, using projectile impact coupling to seismic waves in vacuum chamber experiment
04 p0751 A70-15056

Plastic-viscoplastic bar wave propagation due to longitudinal impact, analyzing stress profiles to determine effect of strain rate
05 p0926 A70-15913

Hammer forces and specimen bending moment-time responses and fracture resistance during notched beam impact test
05 p0938 A70-16479

High velocity microparticle simulation techniques for studying properties, dynamics and origin of micrometeoroids, considering accelerators and impact results
[AIAA PAPER 70-30] 06 p1029 A70-18131

Diffused diaphragm pressure sensors in impact probes used in wind tunnel tests of dynamic response of supersonic air induction systems
06 p1074 A70-18605

Heat transfer during plane air jet impact into concave surface with parabolic profile, determining specific thermal fluxes by electrocalorimetry
07 p1189 A70-19810

Steel balls impact on polyurethane foam, porous rubber and fiber materials, noting effects on both pellets and targets
09 p1769 A70-22123

High speed instrumentation camera system for recording rapid motions during Apollo landing impact
09 p1688 A70-23770

Acoustic impact technique /AIT/ for aerospace structures nondestructive testing, describing theory, instrumentation and applications
10 p1894 A70-24175

Seismic analysis of lunar module impact and missile-earth impact, comparing recorded signal parameters
11 p2118 A70-26748

Maximum impact force and central deflection time function of transversely struck beam, assuming no reflected elastic wave effects on stresses
[DFVLR-SONDDR-48] 12 p2325 A70-27619

Penetration mechanics of multisheet structures based on discrete particle modeling of impact debris
[AIAA PAPER 69-371] 13 p2509 A70-28521

Hypervelocity impact dynamics on copper cube targets imbedded with nickel wires, discussing terminal positions, Vickers hardness, flow fields, etc
[AIAA PAPER 69-368] 14 p2657 A70-30765

- Severity comparisons of specified and actual impulse tests determining component reliability
14 p2563 A70-30867
- Microbial release from solid spacecraft materials after hard landings, testing survival during decontamination or terminal sterilization
15 p2688 A70-31664
- Vibration mode response and impact time sensitivity of mechanical impedance of human skull, relating head injury factors
15 p2682 A70-31934
- Impact testing of metals - ASTM Conference, Atlantic City, June 1969
15 p2758 A70-32232
- Inertial load-time effects in instrumented impact tests, showing corrections for bending stress and dynamic fracture toughness measurements
15 p2820 A70-32240
- Size effects on impact energy disposition in plastically deformed thick steel specimens at shelf temperature, using similitude laws
15 p2760 A70-32332
- Hypervelocity gas, electromagnetic, explosive drive and exploding wire accelerometers and high explosive, shaped charge, plasma drag and electrostatic accelerators for projectile impact studies
15 p2718 A70-32783
- Gas turbine aero engines damage due to bird strikes, emphasizing rig testing and simulation at first stage rotor blading
18 p3236 A70-35995
- Meteoritic dust collection in upper atmosphere by sounding rocket, discussing efficiency of sampling configurations for inertial impaction
18 p3316 A70-36768
- Heat transfer during plane air jet impact into concave surface with parabolic profile, determining specific thermal fluxes by electrocalorimetry
20 p3736 A70-39260
- Longitudinal tension impact tests on nylon tape and Apollo pilot parachute riser construction, determining wave propagation effects [AIAA PAPER 70-1182]
21 p3843 A70-41831
- High speed plasma jet propagation, obtaining time of arrival measurements, brightness temperature, pressure and impact data
22 p4012 A70-43014
- Birdproofing aircraft research program using pneumatic cannon firing real and simulated bird carcasses
24 p4292 A70-46398
- IMPACT TOLERANCES**
Analog simulation of elastic wave propagation in thick walled hollow circular cylinders to determine safe impact speed
17 p3185 A70-34964
- IMPACTORS**
Metal deforming machines permissible impact velocities determination
22 p4046 A70-42815
- IMPEDANCE**
NT ACOUSTIC IMPEDANCE
NT CONTACT RESISTANCE
NT ELECTRICAL IMPEDANCE
NT ELECTRICAL RESISTANCE
NT LC CIRCUITS
NT MECHANICAL IMPEDANCE
NT REACTANCE
NT RESPIRATORY IMPEDANCE
NT SKIN RESISTANCE
Open region waveguide radiation and scattering solved using impedance surfaces of related closed region convergence
09 p1640 A70-23807
- Electromagnetic plane wave oblique reflection from flat surface with spatially modulated surface impedance, computing wave spectrum
13 p2367 A70-29527
- One flow influence on another at two plane jets interaction zone, applying to proportional fluid amplifier inlet impedance calculation
15 p2720 A70-32020
- Dispersion equation for impedance elements periodic structures phase velocity calculation, discussing approximate solution methods
22 p3984 A70-42392
- Nonzero electron temperature effect on mutual impedance of quadrupole probe in hot isotropic plasma
22 p4080 A70-42720
- IMPEDANCE MATCHING**
Unconditional stability criterion of active two port in scattering and admittance matrix notation equivalent to conjugate matching for maximum power gain with part impedances
02 p0271 A70-12820
- Dispersion equation and coupling impedance of two dimensionally periodic slow wave structure of cellular cylinder type with parallel perpendicular diaphragms
03 p0456 A70-13438
- Man-machine systems design emphasizing impedance matching exemplified by visual approach landing [ASME PAPER 69-WA/GT-15]
04 p0642 A70-14856
- Multistage microwave transistor amplifiers design for 4 GHz band, describing poor input/output impedance matching solution
08 p1475 A70-21279
- Electric propulsion design, considering effects of weight, impedance matching, beam voltage regulation and operating point variations in formulating system mass and reliability
09 p1743 A70-23248
- Reactance filters for matching circuits design with optimum transforming performance
09 p1650 A70-23404
- Shock impedance definition consistent with acoustic limit, considering use of impedance mismatch to reduce sonic boom overpressure
10 p1805 A70-24522
- Mutual impedance coupling among minimum scattering antennas with electromagnetic properties expressed in terms of radiation patterns
12 p2198 A70-27956
- Mutual impedance between coplanar skew dipoles with arbitrary lengths and terminal positions, noting convenience for computer programming
16 p2861 A70-32970
- Wheatstone structure impedance bridges, describing balancing method in sinusoidal alternating regime
16 p2872 A70-33106
- Transmitter-antenna matching, using Pi-filter for resonance transformation
19 p3389 A70-38071
- Short cylindrical microwave antenna radiation directivity enhancement by optimum double impedance loading
20 p3599 A70-40318
- Mutual impedance of interacting dipoles at wedge tip, determining errors for short spacing distances
21 p3796 A70-40638
- Axial mode helical antenna design with built-in impedance transformer for airborne applications
21 p3796 A70-40758
- Transistorized IF amplifier output matching to long transmission line, deriving formulas for gain and pass-band over wide output impedance range
22 p3995 A70-42520
- Wideband TEM quarter wave microwave coupler with continuously variable coupling range, employing even and odd mode characteristic impedance levels change
24 p4318 A70-45215
- IMPEDANCE MEASUREMENTS**
Plasma density and electroacoustic resonance effects on coupled cylindrical antennas self and mutual impedances measured in Hg-arc discharge
01 p0050 A70-10461
- Probe impedance loss in cold magnetoplasma related to distribution of point charge potentials
02 p0346 A70-12124
- Transistor admittance and diffusion parameters in direct measurement with varying frequency, evaluating reliability
03 p0459 A70-14285
- Induced electromotive force method for determining impedance changes of monopole on base of large cone
06 p1019 A70-17558
- Slot line wavelength, impedance, transitions and tolerances measured at S band using different dielectric constant materials
08 p1475 A70-21282
- Reactive portion of mutual impedance of arbitrary antennas calculated from radiation patterns by interpolation method
09 p1648 A70-23162
- Electric bridge for measuring complex impedances and admittances in 60 kHz-30 MHz frequency range
09 p1650 A70-23402
- Transfer impedance measurement for HF quadrupole probe immersed in hot magnetoplasma
10 p1877 A70-24709
- Rectangular tolerancing of dipole impedance values scatter for random passive network samples
12 p2194 A70-26968
- Fluidic components downstream impedance calculation, using measured/monitored pressure ratio
14 p2534 A70-30680
- Phase errors of hydraulic input impedance of arterial bed due to proximal or distal pressure measurements
15 p2682 A70-31940
- Filter circuits composed of stripline resonators, determining input impedance and attenuation by digital computer
15 p2701 A70-32468
- Admittance measurements of rectangular or circular waveguide fed aperture antennas illuminating displaced metal plate
16 p2872 A70-32963
- Loaded resonant circular loop radiation field patterns table, determining load impedance for antenna design
16 p2872 A70-32971
- Avalanche diode transient temperature response, measuring thermal impedance under pulse bias conditions
16 p2878 A70-33695
- Transthoracic mutual impedance responses to lung ventilation, discussing spatial and temporal intravariability
17 p3035 A70-34576
- Complex impedance measurements for monopole antenna for electron densities in/out of OGO satellite wake in upper ionosphere
17 p3080 A70-35771
- Impedance measurements on microwave tripole antenna for circular polarization, including expressions for radiation pattern
19 p3388 A70-37868
- Antennas impedances in warm isotropic plasma, using hydrodynamic and kinetic /Vlasov/ equations
19 p3380 A70-38406
- Admittance matrix of microwave networks, referring to coaxial line-waveguide coupling through 3 kMc adapter
21 p3802 A70-42250
- Satellite-borne loop antenna resistive and reactive impedance measurements in topside ionosphere
22 p4019 A70-43112
- Automated high precision electrical resistance measuring system using digital computer control
24 p4334 A70-45384
- IMPEDANCE PROBES**
NT RADIO FREQUENCY IMPEDANCE PROBES
Collision and motion effect on rocket-borne quadrupole probe transfer impedance near lower hybrid resonance in ionosphere
13 p2371 A70-29919
- Electron density measurements in ionosphere along rocket trajectory, using sweep frequency RF impedance probe with guard ring
23 p4192 A70-44877
- IMPELLER BLADES**
U ROTOR BLADES (TURBOMACHINERY)
IMPELLERS
NT PUMP IMPELLERS
Axial flow turbine stator and impeller blade twist calculated from gas flow stage area diameter using continuity and vorticity equations

- Impeller elastic and elastoplastic strength of centrifugal supercharger with curved disks and radial blades, using variational method
01 p0211 A70-11417
- High hub/tip ratio centrifugal compressor with pipe and vane cascade diffusers for turbofan engines, determining impeller performance [ASME PAPER 69-WA/FE-28]
04 p0733 A70-14774
- Three dimensional incompressible turbulent boundary layer detachment on rotating blading of axial impellers
11 p1975 A70-25793
- Unsteady relative flow in centrifugal impeller passage running at part capacity and zero flow observed by hydrogen bubble flow visualization method [ASME PAPER 69-GT-35]
14 p2529 A70-31024
- Radial flow impellers design for maximum machine performance, using straight cascade characteristics
15 p2672 A70-31825
- Flow equations for flow field in entry to radial or mixed flow impellers of turbomachines [ASME PAPER 70-FE-36]
16 p2892 A70-33640
- Pure impulse principle applied to axial compressor impellers with high solidity high camber blades
18 p3301 A70-36647
- Forced vortex impeller in axial flow fan without inlet vanes, presenting lift and drag coefficients of blade sections, loss of head, etc
19 p3352 A70-38222
- Velocity distribution in boundary layer on thin rotating turbine blade of impeller driven at wind tunnel outlet, solving turbulent and laminar flows momentum equations
19 p3352 A70-38224
- IMPERFECTIONS**
U DEFECTS
IMPERMEABILITY
U PERMEABILITY
IMPINGEMENT
NT JET IMPINGEMENT
Single impact data considered ineffective in estimating target damage induced by micron-sized particle cloud impingement
04 p0737 A70-15425
- Predicted and measured low density plume impingement effects on loads and heat transfer compared on orbiting Saturn 5 with oxygen-hydrogen burner engine
04 p0737 A70-15430
- Free flow field from underexpanded rocket motor nozzle and impingement effects of pressure and heat transfer to flat plate [AIAA PAPER 69-568]
13 p2473 A70-28510
- IMPLANTATION**
Transducers for bioimplantable telemetry systems self used by nonhospitalized patients
13 p2357 A70-28816
- IMPLEMENTATION**
U PERFORMANCE
IMPREGNATING
Preimpregnated materials processing, discussing molding, resin-reinforcement, unidirectional materi-

als, ablative applications, mechanical data and air-frame uses

05 p0874 A70-16614

Low temperature oxide film effect on porous titanium carbide impregnation by liquid steel

07 p1311 A70-19805

Ti alloys thermoxidation impregnation with rarefied nitrogen and oxygen plasma, determining optimal gas pressure and temperature conditions and magnetic field frequency effects

17 p3101 A70-35391

Effective pores size, volume and surface area in refractory materials, using impregnation rate measurement

18 p3277 A70-36467

Wear resistant titanium carbide based cermet material production by impregnation techniques, discussing grain size and heat treatment effects

19 p3450 A70-37453

IMPULSE GENERATORS

Small rocket engines tailoff impulse and tailoff repeatability, comparing monopropellant hydrazine and storable bipropellant engines impulse data

[AIAA PAPER 70-674] 16 p2967 A70-33576

IMPULSE NOISE

U ELECTROMAGNETIC NOISE

IMPULSE TRANSFER ORBITS

U TRANSFER ORBITS

IMPULSES

Medium duration optimal rendezvous between near circular noncoplanar orbits with close orbital planes, analyzing six impulse solutions

[ONERA-TP-763] 03 p0571 A70-13639

Subjective measurement of sound level of impulses and pulses, investigating 1 kHz tone and selection of time length between sound events

05 p0882 A70-16344

Severity comparisons of specified and actual impulse tests determining component reliability

14 p2563 A70-30867

Hall generator measurement of impulse currents, noting error sources and compensation

16 p2900 A70-33072

Sandwich rings inplane transient response to concentrated radial impulsive loads based on Timoshenko type theory, noting dependence on extensional to shear stiffness ratio

16 p2993 A70-34093

Dynamical stresses in members and structures under impulsive loads, taking into account solid viscosities and frequencies effects

17 p3187 A70-34998

Energy and impulse tensor of nonviscous relativistic fluid, excluding sound velocity greater than light velocity

19 p3404 A70-37593

Automatic control system impulse response points identification by fast Fourier transform

19 p3393 A70-37852

IMPURITIES

Electric characteristics and impurity distribution in GaAs-Ge heterojunctions obtained by deposition on p-type Ge

01 p0155 A70-10143

Complex formation mechanisms and effects on impurity diffusion profiles in semiconductors

01 p0155 A70-10180

Critical impurity concentrations of He-Ne laser quenching determined with mass spectrometer, giving impurities molecular weight and ionization potential for input powers

01 p0110 A70-10491

Impurity diffusion in Ni using diffusion theory, considering activation energies for Mo and W

02 p0317 A70-12396

Phonon-photon scattering intensity and line shape used to study laser-excited impurity centers dynamic characteristics in stimulated induction regime

03 p0499 A70-13256

Contamination sources covering ball bearing contamination, relay contact failure, instrument window internal fogging, electronic circuit corrosion and air conditioning problems

05 p0809 A70-16712

Structure and interstitial impurities effects on Nb modulus of elasticity at normal and high temperatures, noting rolling

05 p0866 A70-17040

Impurities effect on grain boundaries composition and brittle fracture of metals

06 p1087 A70-17608

Kinetic theory of laser emission on band impurity transitions, noting spatial homogeneity effect on laser mode

07 p1299 A70-19852

Low temperature fuel cell materials impurity effects on catalyst poisoning, stressing sulfur elimination from rubber molding

10 p1832 A70-25043

Raman and IR spectrum analysis of polywater indicating impurities role in anomalous properties

11 p1994 A70-25655

Foreign gases effects on He-Ne lasers IR emission, describing quenching due to positive column electron temperature decrease

11 p2062 A70-25826

Interstitial and substitutional impurity effects on fracture strength, plastic properties and ductile-brittle transition temperature of vanadium determined from impact and tensile tests

11 p2066 A70-25913

Intense laser radiation effect on electrons interactions with acoustic and optical phonons and ionized impurities in semiconductors

12 p2246 A70-27360

Impurity centers thermal and autoionization and effective capture cross section dependent on free carrier concentration in GaAs under electric field, allowing for plasma shielding

12 p2285 A70-27361

Iron impurity energy level behavior in seminsulating GaAs from determining temperature dependences of Hall coefficient, resistivity, optical absorption and steady spectral photoconductivity

12 p2286 A70-27370

Carbon monoxide, carbon dioxide and oxygen impurities effects on threshold current and output power of HCN laser

12 p2249 A70-27648

Impurities and electrothermal instabilities effect on conductivity of two temperature nonequilibrium plasma

12 p2281 A70-27846

Energy resonances between laser levels of carbon dioxide and diatomic and triatomic molecular impurity species, discussing population inversion due to superelastic collisions

13 p2425 A70-28622

Grains impurities effect on interstellar extinction curve from graphite grain model, discussing dirty ice coatings

13 p2489 A70-28915

Hydrogen impurities anelastic relaxation effect on internal friction alpha peak in cold worked tantalum and niobium

13 p2435 A70-29350

Shock wave multiple ionization in hydrogen with impurities, discussing intensity and duration effects on electron temperature profile and ion concentrations

13 p2388 A70-29369

Impurities effects on UV absorption in semiconductors, deriving kinetic type equation for two particle Green function

13 p2471 A70-29511

Circulated air natural and technical impurities effects on gas turbine time dependent performance emphasizing erosion, deposits and overheating

13 p2475 A70-29713

Ionized impurity scattering in polar semiconductors by strong electric fields, using energy and momentum conservation equations in electron temperature approximation

13 p2472 A70-30017

Synthetic autoclave grown quartz crystals with W and Ga impurities, discussing spectral properties and weak absorption bands after irradiation

14 p2625 A70-30154

Gold impurity photovoltaic effect in silicon, determining optical cross section for transition

14 p2627 A70-30528

GaAs slices efficiency as transferred electron devices, correlating impurity profiles with microwave performance

15 p2708 A70-31957

Hydrogen effect on impurity redistribution in heteroepitaxial Si layers on sapphire substrate

15 p2785 A70-32529

Diffused p-n junction devices impurity profile from capacitance-voltage measurements

15 p2710 A70-32562

Fermi level for crystal with slowly changing impurity determinable by solving Poisson equation and by condition of electroneutrality

15 p2786 A70-32899

Heterodiffusion coefficients and activation energy for Cu, Ag and Au impurities in Al, using gamma spectrometry and X ray emission microanalysis

16 p2930 A70-33081

Impurities solubility in semiconducting indium telluride with stoichiometric vacancies, verifying thermodynamic model by phase diagrams

16 p2960 A70-33224

Fe and Al impurities in bis-ethylene chromium /BEC/ and in chromium films obtained by thermally induced decomposition of metal organic compound

18 p3297 A70-36463

Impurity distribution in diffused p-n junction in thin epitaxial film, calculating space charge region width and junction capacitance

20 p3685 A70-38967

Impurity dependent critical resolved shear stress of magnesium oxide single crystals, using compression testing

21 p3862 A70-41910

Impurities concentration estimate in metals by low temperature residual resistivity, investigating contact and contactless measurements

22 p4052 A70-42573

Stacking fault energy determination, discussing impurities influence in equilibrium dimensions distortion of extended nodes in titanium carbide

22 p4053 A70-42727

Boron impurities introduction into InP crystals grown by liquid encapsulation, detecting IR absorption bands due to localized lattice vibration

23 p4231 A70-44891

Monatomic crystal vibrational spectrum, noting quasi-local vibrations near high impurity concentrations

24 p4388 A70-45202

Mossbauer effect analysis of Fe impurity atoms in n- and p-type semiconductor compounds with wide and narrow forbidden gaps

24 p4388 A70-45204

Impurities and heat treatment effects on W internal friction at high temperatures, considering relaxation processes, recrystallization and microstructure

24 p4357 A70-45227

GaAs crystal surface Raman scattering from phosphorus impurities localized modes, using Ar ion laser line

24 p4391 A70-46255

IMPURITY

U PURITY

IN-FLIGHT MONITORING

In-flight compensation for space probe trajectory deviations, discussing attitude determination and control of triaxial and spin stabilized space probes

01 p0186 A70-11265

Integrity monitoring of redundant multiplex control systems for aircraft autoland operations, discussing Triplex autopilot

02 p0329 A70-11833

In-flight data acquisition systems to overcome manual methods limitations, discussing applications and system configuration

02 p0224 A70-11839

Radiation pyrometers development for in-flight measuring and controlling aircraft engine compressor blades temperature

03 p0480 A70-12900

In-flight radiometric calibration of low brightness OGO 4 airglow photometer

04 p0696 A70-15645

Automatic control of continuous medical monitoring in manned space flight

07 p1220 A70-19512

Self calibrating radiometer for in-flight measurement of earth surface thermal microwave radiation

07 p1282 A70-19616

Concorde electronics systems for testing and flight safety, controlling center of gravity, braking, kinetic heating, air conditioning, fuel flow and inertial navigation

07 p1194 A70-19741

MADAR onboard maintenance system designed for C-5 aircraft monitoring line replaceable units in electrical, avionics, environmental, mechanical and propulsion systems

07 p1195 A70-20375

Onboard integrated maintenance system for aircraft avionics in-flight subsystems monitoring

08 p1471 A70-20669

Onboard measurements of single engine propeller-driven aircraft performance, stability and control in nonsteady symmetric flight

08 p1438 A70-21869

Fighter aircraft inflight thrust control using thrust reverser technology to improve operational capability

09 p1610 A70-23019

Slip-ringless propeller blade mounted measurement system for steady state and vibratory stresses from multiple strain-gage locations during flight and ground tests

11 p2051 A70-25891

Aircraft performance, stability and control testing from nonsteady flight measurements, ascertaining repeatability of results

11 p1980 A70-25905

Automatic control of continuous medical monitoring in manned space flight

11 p1991 A70-26111

In-flight thrust measurement via internal gas generator and external traverse methods, discussing accuracy requirements, errors and aircraft design role

13 p2474 A70-28539

Aircraft equipment automatic test methods, comparing in-flight, on ground and second line testings

13 p2348 A70-29681

In-flight evaluation of selected aircraft pilots controllers, noting role in design

17 p3020 A70-35836

Avionics maintenance effectiveness logistics, discussing symptom pattern observation technique /SPOT/ for in-flight data

19 p3554 A70-38399

Aircraft landing maneuver optimization by in-flight monitoring of approach and landing phases, furnishing decision making display
[AIAA PAPER 70-1000] 20 p3560 A70-39531

In-flight thrust measurement methods on SERT 2 ion thrusters, using accelerometer, electrical parameters and orbit change
[AIAA PAPER 70-1126] 20 p3691 A70-40219

Airborne test computer for in-flight radar checkout featuring tape storage of computer program and cockpit mounted optical readout
22 p3993 A70-42320

Nondestructive tests for flaw detection during various aircraft production and operation phases
22 p4047 A70-43531

Astronaut biological parameters monitored under prolonged space flight conditions for rescue operations
23 p4146 A70-44678

IN-FLIGHT THRUST MEASUREMENT
U IN-FLIGHT MONITORING
U THRUST MEASUREMENT

INACTIVATION
U DEACTIVATION

INCANDESCENCE
Operation characteristics of flash, arc, incandescent and explosion type laser pump lamps
13 p2431 A70-29874

Electro-optical transducers based on photoconductive cells, phototransistors and microminiature incandescent and solid state light emitters
16 p2904 A70-33144

INCIDENCE
Angle of incidence effect on oblique impact crater formed by high speed solid spherical particles colliding with massive lead targets
03 p0592 A70-13449

Diffraction-field structure on two-element gratings in near zone, calculating amplitude, phase and energy flux for normal and slant incidence of EM fields
19 p3377 A70-37720

INCIDENT RADIATION
High intensity pulsed laser radiation scattering by free electrons, studying linearly polarized incident radiation
02 p0312 A70-12276

Measured heat flux conversion into average radiation incident on convex satellite surfaces in test chambers
03 p0606 A70-13536

Three dimensional characteristic of light scattered by lunar surface determined for various incidence angles and azimuths from Zond 3 photometric measurements
04 p0744 A70-14441

Azimuthal telescope for recording cosmic rays intensity, noting statistical error for vertical and oblique incident component
05 p0846 A70-15967

TEM wave reflection incident on conducting thin strips semiinfinite array in free space not accompanied by emission
05 p0812 A70-16243

Three dimensional electromagnetic scattering from thin walled conducting circular tube of finite length normally incident with E or H polarized plane wave
05 p0816 A70-16987

Transmission and reflection coefficients calculated for electromagnetic waves incident on inhomogeneous absorbing layer applicable to ionosphere, plasma and p-n junction
06 p1009 A70-17834

Ionospheric absorption at oblique incidence during IQSY, studying seasonal and diurnal variations as solar zenith angle function
06 p1009 A70-17905

Thermoluminescent glass X ray dosimeter sensitivity tested as function of rigidity of gamma and X radiation, noting compensating filters for incident radiation
08 p1496 A70-21217

Thermal radiation absorption in hemispherical cavity, determining apparent absorptivity for diffuse and parallel irradiation
09 p1790 A70-23565

Open region waveguide radiation and scattering solved using impedance surfaces of related closed region convergence
09 p1640 A70-23807

Energy spectra of electrons transmitted through Be, Al and Au targets measured for incident electron energy
10 p1918 A70-23984

Motion of incidence regions of X ray radiation in auroral zone using simultaneous balloon measurements
10 p1935 A70-25283

Topographic shadow linears image enhancement by low angle illumination, describing pseudoradar technique for subcontinental sized fracture systems detection
12 p2221 A70-26960

Radar look direction effects on geological features detectability, considering topographic relief and incidence angles roles in feature enhancement and suppression
12 p2221 A70-26962

Three dimensional characteristic of light scattered by lunar surface determined for various incidence angles and azimuths from Zond 3 photometric measurements
13 p2485 A70-28466

Meteor trail radiant, velocity and altitude measurement by obliquely incident radio waves
14 p2635 A70-30309

Sonic boom incident and ground reflected waves action on exterior wall, calculating arrival time as functions of aircraft speed and altitude and wall slope
14 p2566 A70-30861

Plane wave ray optical scattering by two spheres for arbitrary angle of incidence and observation, noting importance of first order interaction terms
14 p2551 A70-31157

Cosmic rays geomagnetic bending and effective angles of approach for various ground stations
14 p2633 A70-31313

Protective coatings for silicon photosensitive elements to reflect incident energy at wavelengths not participating in conversion into electricity
15 p2677 A70-31599

Backscattering, bistatic scattering and current distribution on thin wires during electromagnetic wave incidence
15 p2700 A70-32412

Plane wave random signals arrival angle maximum likelihood estimation for multiple antenna systems
15 p2704 A70-32594

Refractive index and group velocity in moving dispersive half space /cold plasma or dielectric/ under incident wave from vacuum
16 p2859 A70-32936

Attenuation, refraction and multiple reflection effects on light reflection from shock front at near grazing incidence
16 p2953 A70-34271

Optimum mounting angles for direct solar radiation flux on solar battery on circular orbit satellite
18 p3215 A70-36176

Crew radiation dosage from fission fragments in plume from gas core nuclear rocket
18 p3224 A70-36562

Ion temperatures and incident intensities in plasmas produced by solid target irradiation with Q switched laser beam
19 p3479 A70-37765

E and F region electron density response to incident radiation intensity on upper atmosphere during solar eclipses
19 p3419 A70-38916

Radiative transfer among surfaces forming long cavity exposed to collimated incident energy
21 p3944 A70-41022

Arbitrarily shaped cylindrical conducting structures with transient incident electromagnetic wave, calculating scattering from integral equation by digital computer
23 p4165 A70-44957

Two dimensional electromagnetic scattering body geometry reconstruction from given incident and scattered far field distributions
23 p4165 A70-44958

Two identical conducting thin cylinders illuminated by plane wave at arbitrary incidence angle, determining backscattering cross sections and induced current
24 p4314 A70-46133

INCINERATION
U INCINERATORS

INCINERATORS
Aerodynamic holder stabilized smoke flames to avoid intermittent flaming and thick puffs for incinerator air pollution reduction
21 p3942 A70-40887

INCLINATION
Critical inclination problem, discussing canonical variables and Bohlin Zeipel technique
14 p2639 A70-30707

INCLUSIONS
Thermal stresses of semiinfinite plate with circular hole filled with elastic inclusion and subjected to uniform heat flow
03 p0601 A70-14317

Mean acoustic force on small spherical and nonspherical inclusions in standing acoustic field, discussing equilibrium orientations of body
04 p0720 A70-15085

Stress distribution in long beams with circular annular inclusion under concentrated load solved in series form
05 p0928 A70-16024

Linear and nonlinear inelastic spherical inclusion in elastic and viscoelastic isotropic matrix with constant strain or stress fields at infinity
05 p0932 A70-16171

Three dimensional electrostriction theory for stress and displacement on penny-shaped crack in elastic dielectric with conducting oblate spheroidal inclusion
07 p1409 A70-19569

Thermoelastic state of plate near foreign circular inclusion, assuming heating by uniformly distributed sources and ideal plate-inclusion thermal contact
08 p1587 A70-21171

Nonmetallic inclusions effect on steels cyclic strength dependence on inclusion composition and metallic matrix properties derived from fatigue tests
08 p1590 A70-21413

Multiple scattering of plane time harmonic compressional elastic wave impinged on parallel circular cylindrical inclusions in finite domain, analyzing stress field
08 p1592 A70-21469

Carbonaceous material genesis in Tieschitz meteorite from electron microprobe analysis, discussing chondrule formation process residue likelihood
08 p1578 A70-21561

Temperature field in infinite plate with disk shaped inclusion and stationary point heat source determined, allowing for heat transfer conditions
09 p1778 A70-23082

Temperature fields and stress-strain state in elastic bodies with thin walled cylindrical shell inclusions during uniform heat flow at infinity
09 p1778 A70-23083

Stress-strain state analysis of transversely isotropic plates with inclusions under bending loads
09 p1782 A70-23298

Hyperelastic bodies containing finite number of inclusions and defects analyzed by continuous dynamic model
10 p1954 A70-24014

Elastic properties determined for reinforced composite material with hollow spherical inclusions embedded in matrix
11 p2136 A70-26083

Stress concentration around elastic spheroidal inclusions in isotropic elastic body under shear
11 p2140 A70-26483

Stress analysis of infinite elastic plate containing elastic rectangular inclusion subjected to uniform stress field
13 p2508 A70-28486

Weekeroo Station iron meteorite silicate inclusions chemical composition compared to chondrites
13 p2497 A70-29858

Isotropic slab with implanted elastic circular disk, analyzing stress-strain state due to torsional and bending moments
15 p2824 A70-32895

Rigid inclusion effect on stress distribution in isotropic infinite solid with Griffith crack under plane strain
16 p2994 A70-34250

Stress concentration around small elastic spherical inhomogeneous inclusion on circular cylinder in torsion
17 p3183 A70-34631

Bond stress distribution in elastic solid with axisymmetrical inclusions under uniform tension, using three function and point matching techniques
17 p3184 A70-34911

Circular inclusion interface separation in matrix under incident compressive waves interpreted for fiber reinforced composites
17 p3185 A70-34963

Quantitative analysis of nonmetallic inclusions in steels containing Ti after electrochemical anodic dissolution
18 p3277 A70-36464

Elastic bending of perforated inhomogeneous plane with circular holes or inclusions
18 p3340 A70-36579

Omnidirectional dynamic stress gauge as embedded elastic inclusion, discussing transient response to ground shock compression wave pressure
19 p3422 A70-37699

Elastic particulate composite solid with microinclusions, deriving dispersion relations governing plane longitudinal wave propagation modes by analogy with continuum theory
19 p3540 A70-37942

Stress concentrations due to cylindrical inclusions in homogeneous matrix, using stress function methods
20 p3656 A70-40045

Elastic and viscoelastic plates, calculating stress concentration and separation of embedded smooth circular inclusion under uniaxial tension
21 p3932 A70-40548

Lunar petrology of silicate melt inclusions from Apollo 11 rock samples, discussing heating experiments
21 p3902 A70-41548

Rigid circular cylindrical inclusion elastic bedding dynamic loading, calculating stresses in interface
22 p4112 A70-42345

Elastic wave diffraction by rigid inclusion, calculating far field displacement and cross section by integral equation method
22 p4073 A70-42636

Particle size, shape and absorptivity effects on inclusion damage of Nd-doped barium crown laser glass
22 p4050 A70-43007

Elastic plane equilibrium with thin walled flexible rectangular finite inclusion under symmetrical concentrated load, including computer calculated tangential stresses
22 p4118 A70-43569

INCOHERENCE

Photographic image reconstruction of spatially incoherent illuminated object using twofold holography
09 p1675 A70-22486

INCOHERENT SCATTERING

Pulse methods for measuring correlation function of incoherent scattered signal, calculating bit estimator errors for large and small SNR
01 p0045 A70-11088

Ionospheric measurements of electron density, electron and ion temperature profiles from strength of incoherent radio wave scattering
01 p0082 A70-11530

H-function integrals for noncoherent isotropic scattering for two level atom, tabulating numerical values for Lorentz scattering profile
09 p1727 A70-22506

Ionospheric parameters measurements by incoherent RF scattering, discussing current status of theory and observations
12 p2225 A70-27738

Incoherent scattering of radiation from collisionless plasma in quasi-stationary state, analyzing wave energy from spectral decomposition for given background distribution function
13 p2457 A70-28558

Electron beam interaction with plasma in absence of magnetic field, discussing microwave radiation emission and incoherent scattering and instability spatial growth
13 p2459 A70-28569

Incoherent scatter observations of atmospheric density and temperature in lower thermosphere, observing seasonal variations
14 p2578 A70-31246

Atomic oxygen density and temperature diurnal variation determination by F region incoherent scatter measurements, using nonlinear regression analysis
21 p3817 A70-41096

INCOMPRESSIBILITY

Nonlinear stress-strain equations for incompressible hyperelastic media developed for undeformed and deformed continuum states
01 p0201 A70-10892

Incompressible elastomer viscoelastic response to exponential extension ratio history in simple tension based on constitutive equations
01 p0201 A70-10893

Irrotational motions of relativistic ideal thermodynamic fluids fulfilling incompressibility conditions
01 p0063 A70-10948

Finite element method applications to finite axisymmetric deformations of incompressible elastic solids of revolution
13 p2510 A70-28734

Finite elements for three dimensional compressible and incompressible solid continua based on minimum potential energy and variational principles
14 p2659 A70-31128

Thermoelasticity of incompressible solids, integrating linearized equations using Helmholtz solution
14 p2660 A70-31224

Second order incompressible elastic torsion problems reduction to two dimensional classical linear elasticity problem without body force
17 p3189 A70-35434

Alfven waves synchrotron emission in incompressible medium, investigating generation by rotating DC current carrying circuit
21 p3861 A70-42227

Two incompressible isotropic nonlinear elastic solids mixture, investigating entropy production inequality effects
24 p4425 A70-45991

INCOMPRESSIBLE FLOW

NT STOKES FLOW

Boundary layer equations for plane steady incompressible flow, studying given velocity profiles effects on equations solutions
01 p0060 A70-10144

Finite element solution of incompressible lubrication problem by minimum principle for transient incompressible Reynolds equation with boundary conditions
[ASME PAPER 69-LUB-A] 01 p0100 A70-10378

Elongation and combined shear stresses in incompressible creeping plane flows of viscoelastic lubrication for squeeze-film bearings
[ASME PAPER 69-LUB-22] 01 p0101 A70-10385

Transient heat transfer near two dimensional stagnation point in viscous incompressible fluid steady flow
01 p0002 A70-10457

Parachute inflation dispersion studied by plotting dimensionless products characterizing incompressible flow process
01 p0006 A70-10849

Axisymmetric turbulent incompressible and isothermal self preserving jet investigation using linearized constant temperature hot-wire anemometers
01 p0065 A70-11099

Incompressible slow viscous nonNewtonian flow with free surface solved by finite element method,

showing computerized results for squeezed fluid between two plates
01 p0066 A70-11131

Incompressible turbulent boundary layer and separation flow into forward facing normal step, considering step heights and boundary layer thickness
01 p0066 A70-11133

Incompressible viscous fluid flow in contact with infinite plate and rotating in perpendicular magnetic field, obtaining flow characteristics by Laplace transform
01 p0067 A70-11138

Time dependent behavior of separated and unseparated unsteady flow of incompressible viscous and inviscid fluids without heat transfer
01 p0067 A70-11162

Parametric approximation method extended to incompressible laminar boundary layers with surface suction or injection
02 p0277 A70-11857

Isotropic incompressible three dimensional turbulence representation by wave vector scalar functions, discussing maximum functions number determination
02 p0277 A70-11878

Integral relations method efficiency and accuracy in solving incompressible turbulent boundary layer equations, noting acceptability for turbulent flows with small wake components
02 p0282 A70-12331

Extended mixing length method for computing turbulent shear stress distribution required in calculating two dimensional incompressible turbulent boundary layer
02 p0282 A70-12333

Boussinesq eddy viscosity concept solving equations of two dimensional incompressible turbulent boundary layer, using implicit five point finite difference method
02 p0285 A70-12350

Axial flow reversal in swirling incompressible tube flow, discussing static pressure, velocity profiles and turbulent Navier-Stokes equation
03 p0465 A70-13017

Axisymmetric incompressible fluid flow aerodynamic properties in flat vortex chamber, studying core and boundary layer interactions and velocity fields
03 p0551 A70-13731

Incompressible viscous fluid rectilinear flow along arbitrary cross section duct under pressure gradients oscillating at large frequencies
03 p0468 A70-14147

Surface singularities method for calculating incompressible potential flow about bodies of revolution with arbitrary thickness ratio and angle of attack
03 p0410 A70-14322

Boundary layer equations for axial laminar and turbulent incompressible flows over slender bodies of revolution solved by finite difference method
[ASME PAPER 69-WA/FE-2] 04 p0667 A70-14786

Incompressible laminar Falkner-Skan boundary layer suffering sudden acceleration by moving belt, noting boundary layer separation
[AIAA PAPER 69-40] 04 p0674 A70-15534

Incompressible two dimensional time dependent Navier-Stokes equations for oscillating body with rectangular boundaries
[AIAA PAPER 69-185] 04 p0779 A70-15616

Closed form solutions describing nonlinear motions of incompressible fluid flowing in thin walled tube buckled by uniform external pressure
05 p0832 A70-16090

Compressible fluid flow satisfying perfect gas equation in presence of thin foil, developing operators characterizing incompressible and compressible flows without Hall effect
05 p0790 A70-16158

Incompressible two dimensional turbulent boundary layer equations with arbitrary pressure distribution solved by weighted residual method
[AIAA PAPER 69-397] 06 p1032 A70-17214

Separated incompressible flow around wing profile, considering calculation of separated potential flow generation with given separation point
06 p0966 A70-17253

Lift and vortex drag due to flaps on thin sweptback tapered wings in inviscid incompressible flow, obtaining spanwise loadings
06 p0967 A70-17256

Viscous core of incompressible swirling flow through nozzle using momentum-integral equations
[AIAA PAPER 70-51] 06 p1038 A70-18079

Finite difference solution of time dependent Navier-Stokes equations for two and three dimensional laminar incompressible flow, discussing results for flat plates
[AIAA PAPER 70-46] 06 p1041 A70-18170

Tangent plane method and polar coordinates for lifting surfaces, calculating normal velocity at field point on surface carrying doublet distribution for incompressible flow
[AIAA PAPER 70-78] 06 p0975 A70-18195

Incompressible flow past airfoils with oscillating jet flaps used as rapid lift and momentum generators in aircraft gust load alleviation and mode stabilization
[AIAA PAPER 70-79] 06 p0975 A70-18196

Dynamic characteristics of systems consisting of train and air in tunnel using one dimensional incompressible fluid description
[AIAA PAPER 70-141] 06 p1042 A70-18216

Unsteady airfoil stall in incompressible flow, including pitch rate induced accelerated flow effect on leading edge and trailing edge stall
[AIAA PAPER 70-77] 06 p0976 A70-18237

Trailing edge region of flat plate in laminar incompressible flow examined for high Reynolds numbers limit using Navier-Stokes reduced equations
07 p1255 A70-19213

Plane rigid airfoil frequency response in incompressible potential flow using simple equivalent oscillator based on Theodorsen function
07 p1404 A70-19232

Navier-Stokes equations solved for unsteady incompressible three dimensional stagnation point flow, noting reduction to two dimensional and axisymmetric cases
07 p1188 A70-19343

Book on mathematical theory of viscous incompressible flow covering stationary and nonstationary boundary value problems for linearized and nonlinear Navier-Stokes equations
07 p1258 A70-19697

Pressure distribution on flat plate resulting from potential incompressible flow interaction between secondary jet and subsonic mainstream
07 p1190 A70-20415

Incompressible laminar boundary layer stability of incompressible fluid for nonparallel oncoming flow, deriving perturbed motion equation
08 p1483 A70-21179

Second order boundary layer equations for incompressible flow, presenting simplified integral momentum equation for two dimensional and axisymmetric flow
09 p1660 A70-22681

Laminar separation bubble in incompressible flow produced on flat plate by pressure gradients, correlating bursting with Reynolds number and pressure distribution
09 p1660 A70-22770

Boundary layer equations with heat transfer for laminar and turbulent incompressible flows about two dimensional and axisymmetric flows, using finite difference method
[ASME PAPER 69-HT-7] 09 p1663 A70-23560

Stress tensors in initial value problem for incompressible flow with nonlinear viscosity
09 p1663 A70-23570

Circle theorem for potential flows extended to two dimensional steady incompressible ideal fluid flows of constant vorticity
09 p1664 A70-23714

Steady and unsteady viscous incompressible one dimensional flows parameters in deformable cylindrical tube determined, solving continuity and motion equations by Galerkin method
09 p1664 A70-23715

Equivalent oscillatory model defined from asymptotes of frequency response amplitude and cut-off frequency amplitude value of plane rigid airfoil in incompressible potential flow
10 p1953 A70-23841

Orr-Sommerfeld equation of hydrodynamic stability theory solved for incompressible two dimensional boundary layer flow on basis of reduction to integral equation
10 p1867 A70-24161

Rigid body mode of viscous incompressible fluid flow response to small perturbations of rotating spherical container, applying torque interaction
10 p1868 A70-24196

Viscous incompressible flows nonlinear stability theory, considering perturbed flows tending toward stationary or flow periodic in time
[ONERA-TP-802] 10 p1869 A70-24542

Laminar flow into channel with symmetrical jets along walls, considering velocity profiles and flow establishment lengths
10 p1870 A70-24790

Monograph on Beltrami steady state, frictionless flow of incompressible medium past spherical surfaces, assuming vortex and stream lines agreement
11 p2034 A70-25498

Numerical techniques and solutions for compressible and incompressible laminar separated flows using time dependent finite difference equations
[AIAA PAPER 68-741] 11 p2035 A70-25972

Conducting fluid incompressible flow in entrance of MHD channel by momentum integral method, permitting edge stress existence at boundary layer free stream interface
[AIAA PAPER 69-724] 11 p2035 A70-25977

Incompressible inviscid fluid flow behind impeller blades, determining velocity profiles, flow-off angle and stable operation limits
11 p1977 A70-26349

Two dimensional incompressible mixing layer investigated by constant temperature linearized hot wire anemometers, discussing turbulent/nonturbulent interfaces

11 p2040 A70-26540

Energy spectrum of homogeneous isotropic incompressible turbulence, discussing eddy relaxation and direct interaction approximation

11 p2040 A70-26541

Incompressible homogeneous isotropic turbulence velocity expanded in Hermite functionals of Gaussian white noise random function advected by fluid

11 p2040 A70-26543

Inviscid incompressible conducting fluid flow past body in aligned magnetic field at low magnetic Reynolds number, discussing small perturbations evolution

11 p2041 A70-26623

Aerofoil free vibrations with fixed center of gravity in incompressible potential flow under representative previous histories effect

12 p2328 A70-28214

Two dimensional unsteady incompressible fluid flow through airfoil lattice

13 p2389 A70-29491

Incompressible ideal plane fluid flow complex potential caused by profile motion in presence of fixed infinite wall

13 p2390 A70-29632

Two dimensional incompressible steady turbulent flows based on Prandtl hypothesis relating eddy viscosity to kinetic energy and scale

14 p2564 A70-30259

Two dimensional incompressible turbulent boundary layer with mass addition and heat transfer, calculating temperature and velocity profiles by marching integration

14 p2564 A70-30261

DMC computer code for simulation of two dimensional viscous incompressible flow about arbitrarily shaped bodies

14 p2527 A70-30271

Unsteady incompressible laminar boundary layer equations solution after Crocco transformation by implicit finite difference scheme for flow around blunt body

14 p2528 A70-30290

Magnetoaerodynamic boundary layer of incompressible conducting fluid over right circular cylinder under magnetic field, showing flow separation

14 p2621 A70-30550

Sears function and lifting surface theory for harmonic gust fields in incompressible flow, modifying function for accurate interpolation of large numbers

14 p2528 A70-30860

Two dimensional incompressible laminar boundary layers asymptotic structure with injection, obtaining velocity profiles

14 p2566 A70-30995

Incompressible two dimensional potential flow analysis with compressibility effects for thick highly cambered multibodies in cascade, noting slotted compressor blade performance

14 p2529 A70-31023

Incompressible turbulent boundary layer calculation based on shearing stress hypothesis, considering layer at flat plate, boundary conditions and velocity profiles

15 p2719 A70-31490

Nonlinear bearing surface of symmetrical rectangular edge wings without slipping in incompressible flow, using oblique horseshoe vortex model

15 p2673 A70-32128

Book on flow separation covering steady/unsteady, turbulent and incompressible flows, base pressure, thermal effects, etc

16 p2833 A70-32913

Two dimensional incompressible isothermal laminar separation of Newtonian fluid in steady flow, obtaining velocity profiles

16 p2892 A70-33635

Laminar and turbulent boundary layer equations solutions for incompressible/compressible flows about two dimensional and axisymmetric bodies, using finite difference method

16 p2892 A70-33641

Equations of supersonic and hypersonic motion past circular cone by linearized method based on small perturbations with respect to nearly incompressible flow

16 p2835 A70-33746

Incompressible free jet characteristics determination from unique differential equation in laminar and turbulent flow regimes by unitary method

16 p2893 A70-33750

Incompressible flow interaction of perfect irrotational flow through two blade wheels in relative motion, observing pressure variations at nozzle profile

16 p2836 A70-33755

German monograph on planar straight cascades in incompressible frictionless potential flow, basing method on singularity method integral equation reversal

16 p2839 A70-34081

Annoyance assessment for sonic boom series exposure near airport

16 p2843 A70-34325

Laminar incompressible separating and reattaching flows, correlating finite difference solutions with experimentation

17 p3008 A70-34488

Model diffusion equation for inhomogeneous incompressible turbulent flow, applying to free turbulent flows

17 p3069 A70-34825

Incompressible laminar boundary layer, determining thermal conductivity gradient effect on temperature profiles

17 p3070 A70-35045

Incompressible laminar boundary layer along rectangular corner, obtaining similar solutions for velocity distribution

17 p3070 A70-35239

German monograph on oscillations of tandem wing without outgoing wake in plane incompressible flow, using numerical computations

17 p3011 A70-35372

Local skin friction law for turbulent boundary layers in incompressible flow, applying rule for compressible flow conditions

17 p3075 A70-35922

Incompressible laminar boundary layer equations approximate solution by Galerkin-Kantorovich technique

18 p3238 A70-35972

Steady incompressible flow past circular cylinder at Reynolds numbers up to 100, using finite difference solutions of motion equations

18 p3238 A70-36191

Free turbulent incompressible jet, analyzing pulsating characteristics and energy balance with Reynolds stress equations

18 p3240 A70-36264

Incompressible heavy fluid film stability during flow along inclined plane constituting crystallization front, analyzing linearized equations of perturbed flow

18 p3240 A70-36271

Axisymmetric ideal incompressible fluid jet outflow from cylindrical vessel with conical bottom, using small parameter technique and conformal mapping

18 p3240 A70-36272

Incompressible fluid flow past array of arbitrary profiles vibrating with arbitrary phase shift, taking into account blade displacement and vortex wake effect

18 p3206 A70-36277

Boundary value problem for Navier-Stokes equations of viscous incompressible fluid flow, discussing convergence of iterative solution

18 p3241 A70-36290

Magnetohydrodynamic flow of electrically conducting viscous incompressible fluid past nonconducting semiinfinite flat plate under transverse magnetic field

18 p3295 A70-36431

Laminar incompressible flow in arbitrary cross sectioned entrance region of ducts by numerical technique after transformation to boundary value problem

18 p3243 A70-36878

Two dimensional cascades for incompressible plane potential flows with given velocity distribution

18 p3209 A70-36880

Two dimensional steady inviscid incompressible flow past profiles in parallel flow with nonuniform velocity distribution

19 p3354 A70-38676

Incompressible axisymmetric flow through turbomachines, developing flowfield for given velocity distribution along arbitrary streamline

19 p3354 A70-38933

Perforated solid body moving in ideal incompressible fluid, deriving equations of motion in Lagrangian form

20 p3610 A70-39732

Boundary value problems in uniform incompressible inviscid flows past complex profile bodies by R functions method and variational technique

20 p3610 A70-39772

Laminar incompressible free shear layers by method of weighted residuals for turbulent jets, obtaining velocity profiles for similarity and physical planes

20 p3613 A70-40286

Unsteady incompressible flow in laminar boundary layer with homogeneous suction during longitudinal flow past flat plates, investigating boundary layer stability

20 p3614 A70-40391

Energy dissipation in laminar unsteady incompressible viscous fluid flows, discussing velocity fields, boundaries, tangential motion and entrainment

20 p3614 A70-40402

Asymptotic behavior of boundary layer equations solution for viscous incompressible flow past curvilinear obstacle

21 p3806 A70-40613

Incompressible MHD flow in entrance region of channel with electrically conducting walls, calculating interacted laminar heat transfer by integral method

21 p3856 A70-41038

Boundary layer transition region of flat plate in incompressible flow by subsonic wind tunnel tests, demonstrating harmonic wall perturbation effect

21 p3808 A70-41440

Two dimensional unsteady viscous incompressible MHD flow past infinite flat plate with uniform suction, considering Hartmann and Reynolds numbers

21 p3858 A70-41450

Irrotational incompressible flow through two dimensional channel with asymmetric contraction

21 p3809 A70-41757

Incompressible laminar boundary layers thermal response behavior in wedge flow, obtaining surface response, temperature fields, heat flux and steady state data

21 p3811 A70-42164

Subsonic channel incompressible gas flow past semiinfinite flat plate base, using flow pattern for cavitation flow

21 p3748 A70-42213

Nonparallel viscous incompressible fluid flows in channel between parallel porous plates with suction and blowing respectively, calculating stability by numerical solution

21 p3811 A70-42216

Viscous incompressible fluid flow between two rotating concentric spheres, calculating stability

21 p3811 A70-42217

Heat and mass transfer in plane inductionless and dissipationless incompressible MHD boundary layer with longitudinal pressure gradient

21 p3861 A70-42231

Micropolar incompressible fluid slow stationary flow past sphere

21 p3812 A70-42252

Incompressible Newtonian fluid laminar radial flow between parallel stationary disks, obtaining integral solution for Navier-Stokes equation

22 p4007 A70-42302

Laminar axisymmetric incompressible boundary layer calculation based on Mangler transformation

22 p4008 A70-42414

Two dimensional incompressible flow, calculating strong suction effects on laminar boundary layer separation by linear model

22 p4010 A70-42630

Thermal boundary layer near stagnation point in three dimensional fluctuating incompressible flow, using Lighthill method

22 p4124 A70-42685

Optimum pressure distribution and airfoil profiles for maximum lift without separation in incompressible flow determined by second order theory

22 p3959 A70-42704

Irrotational incompressible free falling jet, using asymptotic expansion solution for mixed boundary value potential problems

22 p4012 A70-42938

MHD incompressible viscous flow in nonconducting circular tube, determining pressure, flow rate and magnetic field level by continuum theory concepts

23 p4224 A70-44161

Incompressible laminar swirling jet flow, obtaining similarity solution for Navier-Stokes equations

23 p4184 A70-44982

Incompressible Newtonian fluid flow between closely spaced corotating disks, showing radial pressure distribution similar to laminar flow

24 p4324 A70-45293

Incompressible laminar flow in entrance region of rectangular duct allowing direct computation of eigenvalues

24 p4287 A70-45294

Unsteady incompressible thermal boundary layer flow past three dimensional obstacle for Prandtl numbers near unity

24 p4428 A70-45366

Three dimensional laminar boundary layer in unsteady incompressible flow, presenting solution by successive approximations method

24 p4325 A70-45594

Two dimensional incompressible air flow past circular cylindrical body, investigating separation point control by suction and jet injection

24 p4288 A70-46010

Inviscid conducting incompressible fluid steady motion past thin airfoils, presenting crossed and aligned fields and Alfvén motion with Hall effect

24 p4289 A70-46033

INCOMPRESSIBLE FLUIDS

Suffness values of externally pressurized incompressible fluid-film thrust bearings under turbulent Couette flow, discussing Reynolds number effects

01 p0100 A70-10383

Hydrodynamic stability of high purity insulating incompressible fluid subjected to unipolar ion injection

01 p0151 A70-10669

Critical conditions for hydrodynamic stability of incompressible nonconducting fluids subjected to unipolar injection, establishing variational principle leading to characteristic relation

01 p0152 A70-10672

Spinning top motion stability in homogeneous incompressible ideal resting fluid, using stability derivative for body of revolution

01 p0145 A70-11438

Characteristics of dynamic mechanical systems including solid state and hydrodynamic analogs of ideal incompressible fluids, based on statistical theory of turbulence

01 p0068 A70-11594

Dynamics of turbulent motion of incompressible viscous fluid particles, using Lagrangian functions

01 p0068 A70-11603

Incompressible viscous fluid plane flow using series expansion

02 p0277 A70-11910

Lower bounds of Stekloff and free membrane eigenvalues for sloshing of incompressible inviscid fluid, subject to gravity in rigid tank with free surface

02 p0278 A70-11999

Rayleigh step journal bearings, considering pressure distribution, load capacity and attitude angle and optimal film thickness ratio for incompressible fluid lubrication

02 p0307 A70-12167

Steady axially symmetric MHD flow of inviscid incompressible fluid of small conductivity in strong magnetic field past fixed axisymmetric bodies

02 p0347 A70-12234

Conservation equations for mass, mean momentum and kinetic energy for incompressible turbulent boundary layer, using finite difference procedure

02 p0284 A70-12347

Two spheres moving in ideal incompressible fluid, studying velocity field, hydrodynamic forces, kinetic energy, etc

03 p0465 A70-13335

Turbulent boundary layer of incompressible fluid flow in axisymmetric channels with swirl at inlet, considering components interaction, velocity, circulation profiles and resistance

03 p0466 A70-13389

Pulsation frequency affecting boundary layer separation from channel wall in incompressible fluid flow calculated by equation

03 p0466 A70-13399

Viscous incompressible laminar two dimensional flows using Navier-Stokes equations, emphasizing near wake and flow around leading edge

03 p0467 A70-13640

Unsteady state lift and moment action on lattice of profiles moving in incompressible fluid, determining suction originating at leading edges of profiles

03 p0409 A70-13868

Laminar boundary layer in incompressible liquid, noting effect of variation of kinematic viscosity and density on stability

03 p0468 A70-13870

Unsteady MHD flow of viscous incompressible electrically conducting fluid through rectangular duct under transverse magnetic field

03 p0471 A70-14333

Heat transfer in steady state flow of electrically conducting incompressible viscous fluid in annular channel between coaxial circular cylinders under magnetic field

03 p0608 A70-14335

Instability of viscous laminar plane jet of incompressible fluid, finding minimum critical Reynolds number for various assumptions of parallelism

04 p0670 A70-14990

Hydromagnetic flow of viscous incompressible electrically conducting fluid near accelerated infinite porous flat plate with variable suction or injection

04 p0672 A70-15095

Gravitational instability of finitely conducting incompressible fluid layer of finite thickness surrounded by nonconducting medium

05 p0915 A70-16696

Blowing intensity influence on turbulent boundary layer of incompressible fluid and friction drag of flat plate

06 p1036 A70-17852

Non-Newtonian fluids in continuum mechanics, classical Navier-Stokes theory limitations and theory of incompressible fluids for viscometric flows

06 p1037 A70-17926

Navier-Stokes equations numerical integration in Eulerian coordinates, applying results to compressible and incompressible fluids steady flow [AIAA PAPER 70-2]

06 p1040 A70-18113

Large Froude number solution for nonseparative impact of elliptical cylinder floating on incompressible fluid surface in half space extended to small Froude numbers

07 p1253 A70-18770

Approximate solution for heat transfer in incompressible fluid laminar flow in circular tube

07 p1253 A70-19060

Hydrostatic journal bearing dynamic rigidity for compressible and incompressible fluids, describing fluid film elasticity and damping characteristics

07 p1293 A70-19121

Turbulent wake behind plate due to confluence of two incompressible fluids with different densities

07 p1261 A70-20463

Rigid viscoplastic incompressible fluid flow governed by system of variational inequalities involving Navier-Stokes equations

08 p1482 A70-20590

Elastic body with incompressible fluid filled cavities, studying motion and stability by deriving motion equations starting from principle of least action

08 p1544 A70-20951

Propulsive and lifting motions of pointed profile in ideal incompressible fluid related to alternate vortices emission

08 p1433 A70-21234

Model for magnetic field-line reconnection in conducting incompressible fluid, determining maximum reconnection rate entirely by null point conditions

08 p1553 A70-21615

Boundary layer development on body accelerating in viscous incompressible fluid, using straight lines approximation and asymptotic expansions

08 p1485 A70-21631

Oscillations of highly viscous incompressible fluid in partially filled cavity of body moving about fixed point, solving Navier-Stokes equations by asymptotic method

08 p1485 A70-21632

Heat transfer in MHD channel flow of viscous incompressible rarefied gas with slip flow and temperature jump boundary conditions

08 p1554 A70-21769

Cauchy problem solution for linearized Navier-Stokes equations of incompressible rotating viscous fluid, discussing velocity and angular momentum effect on asymptotic behavior

09 p1659 A70-22326

Aerodynamic characteristics of plane straight walled diffusers initial and stabilized flow segments, assuming incompressible fluid and turbulent boundary layer

09 p1659 A70-22430

Free incompressible oil jet interaction with mobile plate, discussing plate configuration, oil free pressure and nozzle diameter, applications to electrohydraulic converter design, etc

09 p1613 A70-22825

Incompressible homogeneous fluid model in non-relativistic generalized gravitation theory using analytical solution

09 p1762 A70-23118

Hydrodynamic stability criterion of isolating incompressible fluids subjected to unipolar space charge injection

09 p1737 A70-23311

Incompressible anisotropic fluid flow around semiinfinite plate at large Reynolds numbers, using interlocked asymptotic expansions and deformed coordinates to obtain boundary layer equations

09 p1663 A70-23390

Motion and continuity equations for unsteady two dimensional flow of incompressible viscous fluid along infinite flat plate with time dependent suction

10 p1862 A70-23877

Transition from compressible to incompressible fluid assuming isothermal flows and finite stresses for density at or different from initial value

10 p1863 A70-24008

Alfven flow of dissipative conducting incompressible fluids in presence of thin airfoil in magnetic field, considering flow turbulence calculation

10 p1922 A70-24143

Laminar boundary layer flow of incompressible fluid in wake of symmetrical disturbance, deriving higher order approximations and introducing Euler transformation

10 p1802 A70-24420

Compressible flow equations of motion applied to incompressible fluid flow through nozzle with eddies and springs

10 p1871 A70-24796

Approximate solution for heat transfer in incompressible fluid laminar flow in circular tube

10 p1871 A70-25211

Viscous incompressible fluid secondary steady state flow due to rotating spheroid, considering acceleration terms in Stokes linear equation solution

11 p2034 A70-25390

Book on engineering aspects of MHD power generation, discussing working gas ionization and electrical conductivity, incompressible conducting fluid motion in magnetic field, etc

11 p1982 A70-25525

Velocity distribution around isolated and cascaded airfoils in plane potential flows of incompressible fluid determined by use of nonsingular integrals

11 p1974 A70-25781

Turbulent flow detachment in incompressible fluid around thick bodies, considering plate perpendicular to wind

11 p2037 A70-26466

Turbulence in incompressible electrically conducting fluid with uniform applied magnetic field, discussing nonlinear energy transfer mechanisms and magnetic effects

11 p2096 A70-26771

Two dimensional viscous incompressible conducting fluid flow between parallel porous walls in magnetic field, studying skin friction fluctuations

12 p2209 A70-27157

Wall shear stress distribution in noncircular ducts with steady incompressible fluid flow

12 p2209 A70-27217

Pulsation energy distribution in turbulent flow of incompressible fluid near tube wall, defining energy diffusion, production and dissipation terms in energy balance equation

12 p2210 A70-27321

Transient flow of viscous incompressible fluids with free surfaces calculated using Lagrangian coordinates

12 p2210 A70-27425

Incompressible fluid turbulent motion statistical equations, considering Lagrangian distributions of fluid particles coordinates and velocities

12 p2212 A70-28190

Turbulent flow of incompressible fluid, obtaining closed system of approximate equations for probability distribution of velocities

12 p2213 A70-28237

Two dimensional irrotational incompressible fluid motion bounded by flexible stretched and unstretched film, noting hydrodynamic shock for closed film

12 p2213 A70-28238

Homogeneous and stationary turbulence in incompressible fluid, proposing dynamic model for strong wave interactions during cascade process

13 p2457 A70-28557

Plane incompressible conducting fluid laminar jets analysis in magnetic field, using boundary layer equations for zero electric field

13 p2461 A70-28964

Viscous and inviscid incompressible fluids motion boundary value problems solutions with aid of kinetic stress functions

13 p2388 A70-29319

Unitary solution to incompressible and nonviscous fluids in presence of slender profile

13 p2464 A70-29542

Incompressible, viscous and electrically conducting fluid flow due to rotating disk in uniform magnetic field, discussing hydromagnetic interaction effect on velocity and friction

13 p2465 A70-29544

Plane, steady, irrotational flow of gaseous subsonic stream bounded by two infinite parallel walls, discussing application to incompressible fluids

13 p2389 A70-29631

Plane cavity geometry behind plate in incompressible potential flow, deriving geometrical functions to obtain desirable shapes

13 p2390 A70-29645

Hydrodynamic forces by oscillating foils in ideal incompressible fluid turbulent flow with stream separation

13 p2390 A70-29649

Motion equation derivation for incompressible fluid flow in baroclinic ocean, allowing for horizontal macroturbulent exchange

14 p2601 A70-30136

Incompressible turbulent fluid flow through ducts and pipes by integral boundary layer techniques, considering entrainment principles

14 p2564 A70-30258

Inviscid, incompressible superposed fluids stability in presence of inhomogeneous porous media, noting motion with decaying amplitude

14 p2577 A70-30993

Nonstationary MHD Couette flow of viscous incompressible fluid between two parallel walls caused by instantaneous fluctuations of applied transverse magnetic field

15 p2777 A70-31479

Force acting on cylinder in ideal incompressible fluid plane flow with steady vorticity

15 p2719 A70-31498

Incompressible viscous fluid steady flow admission into bounded space from cylindrical tube, demonstrating solvability of plane and three dimensional versions

15 p2720 A70-31642

Conducting incompressible fluid flow past sphere, examining effect on magnetic field for small magnetic Reynolds number

15 p2778 A70-31913

Conducting incompressible fluid laminar flow between rotating disks in transverse magnetic field with source at center

15 p2779 A70-31915

Steady flow of incompressible fluid through converging-diverging tube, considering implications in occlusive vascular disease

15 p2691 A70-31936

Computerized design of multipad and multirecess incompressible fluid film bearings

15 p2744 A70-31958

Heat transfer between incompressible fluid flow and insulated walls with time varying temperature at channel inlet, applying Laplace transforms

15 p2827 A70-32175

Viscous incompressible fluid nonstationary flow boundary layer extension around porous plate at Prandtl number equal to unity

15 p2722 A70-32873

Boundary value problem of two dimensional Poisson equation solution procedure with Hockney formulas, applying to unsteady viscous incompressible flow past flat plate

16 p2943 A70-33737

Incompressible ideal fluid plane laminar flows at large Reynolds numbers in region bounded by moving walls with closed concentric streamlines, establishing functional properties

16 p2893 A70-33749

Incompressible viscous fluid divergent turbulent flow detection in conical tube of revolution based on measuring wall pressure differences along tube generatrix

16 p2894 A70-33849

Structural incompressible liquid element for discrete linear idealization of missile and propellant vibration analysis

16 p2991 A70-33852

Wave propagation in infinite elastic plate in contact with inviscid incompressible liquid layer, deriving dispersion relation

16 p2993 A70-34094

Multistage solution algorithm for solving Navier-Stokes equations stationary problem, considering plane motion of incompressible fluid

18 p3239 A70-36216

Viscous incompressible liquid two dimensional flow around flat plate, discussing visualization techniques and velocity distribution measurement

18 p3239 A70-36218

Flow stability of incompressible heavy viscous fluid along wall of vertical circular cylindrical pipes, relating flow parameters to stability

18 p3240 A70-36278

Hydrodynamic model analogy to water bag/incompressible homogeneous fluid in phase space/, investigating nonlinear collisionless plasma oscillations

19 p3474 A70-37365

Stiffness values of externally pressurized incompressible fluid-film thrust bearings under turbulent Couette flow, discussing Reynolds number effects [ASME PAPER 69-LUB-25]

19 p3435 A70-37611

Unsteady incompressible planar gas jets with stable vortex street, investigating near flow field region to establish oscillatory component

19 p3404 A70-37799

Boundary layer equations for two dimensional flow of incompressible constant density micropolar fluid past plane wall, noting skin friction

19 p3404 A70-37962

Unsteady laminar incompressibles fluid flow in parallel plate channels and circular tubes, solving Navier-Stokes equations for prescribed discharge

19 p3405 A70-38347

Steady two dimensional incompressible shear flow, correlating velocity profiles with resistance distribution

19 p3406 A70-38350

Unsteady flow and heat transfer in viscous incompressible fluid due to infinite porous cylinder oscillations about axis with suction at surface

19 p3406 A70-38445

Viscous incompressible electrically conducting fluid steady flow between parallel coaxial rotating disks with transverse magnetic field

19 p3481 A70-38446

Compressible and incompressible Stokesian fluids motion described by finite element analog of Navier-Stokes equation

20 p3607 A70-38999

Turbulent wake behind plate due to confluence of two incompressible fluids with different densities

20 p3557 A70-39263

Elastic body with incompressible fluid filled cavities, studying motion and stability by deriving motion equations starting from principle of least action

20 p3672 A70-39376

Unsteady viscous flow of incompressible fluid through porous straight channel under time varying pressure gradient, determining suction and injection effects

20 p3609 A70-39670

Laminar boundary layer multidimensional universal equations solution for incompressible liquid using method of characteristics

20 p3611 A70-39804

Turbulent boundary layer calculation in incompressible fluid, using one parameter method

20 p3612 A70-39810

Thermal boundary layer theory for turbulent jets of incompressible fluids from relationship between velocity fluctuations and temperature

20 p3614 A70-40347

Bubble motion in ideal incompressible fluid, deriving motion equation in low viscosity fluid

20 p3614 A70-40392

Laminar convective flow from linear heat source along vertical plate, solving numerically for incompressible fluid by boundary layer approximation

20 p3614 A70-40403

Complementary variational principles applied to free oscillations of incompressible fluid in container, using linearized hydrodynamic equations

21 p3807 A70-41323

Heat transfer and skin friction in quasi-steady axisymmetric turbulent pipe flow of incompressible fluid with variable physical properties

21 p3808 A70-41375

Turbulent energy balance and spectra of axisymmetric wake behind sphere in incompressible fluid, measuring flow velocity

21 p3745 A70-41376

Pulsation energy distribution in turbulent flow of incompressible fluid near tube wall, defining energy diffusion, production and dissipation terms in energy balance equation

21 p3810 A70-42062

Incompressible fluid turbulent motion statistical equations, considering Lagrangian distributions of fluid particles coordinates and velocities

22 p4012 A70-43315

Lift determination of slender curved periodically recurring airfoils array in plane potential flow of inviscid incompressible fluid

23 p4133 A70-44158

Twisted incompressible viscous fluid flow in conical diffuser described by differential equation system, considering flow velocity field and separation point

23 p4133 A70-44159

Rotational two dimensional steady shear flows of perfect incompressible fluid, considering channel flow characteristics for various wave modes

23 p4181 A70-44202

Hall effect on incompressible electroconducting viscous fluid motion past finite conducting flat plate, discussing boundary conditions

23 p4225 A70-44247

Solid particles interactions during entrainment by viscous incompressible fluid in pipe, calculating interaction force as function of radius, distance and Reynolds number

23 p4181 A70-44310

Nonlinear properties of first order differential equations for axisymmetric velocity vector fields of ideal incompressible fluid, using nonlinear singular integral equation

23 p4181 A70-44343

Incompressible viscous fluid two dimensional flow in absence of mass forces, considering Tollmien-Schlichting wave perturbation effect on flow stability

24 p4324 A70-45365

Inertia effects and suspension rheology for incompressible Newtonian fluid shear flow around neutrally buoyant rigid sphere

24 p4327 A70-46243

INCONEL [TRADEMARK]

Inconel 718 and Al 2219 alloys surface flawed specimens fracture toughness and flaw growth comparison for high pressure hydrogen vessel

01 p0114 A70-10029

Ni-Cb intermetallics phase precipitation during aging of Inconel alloy 718, composition, stability and structure

01 p0116 A70-10093

Coherent precipitates effect on explosive shock hardening of pure nickel and Inconel alloy sandwich assemblies determined from simultaneous shock loading at specific pressures

01 p0116 A70-10107

Press load prediction for deep drawing Ti-Al-V alloy, stainless steel and Inconel X under various lubrication conditions at room temperature [ASME PAPER 69-WA/PROD-15]

04 p0698 A70-14835

Creep rupture and residual tensile strength tests to evaluate long time properties and structural stability of Inconel 718 alloy, performing phase analysis

07 p1310 A70-19731

Ni-based heat resisting alloy /Inconel 700/ investigated for hot corrosive environment effect on stress rupture and fatigue strengths

13 p2434 A70-29157

Diffusion layer microprobe analysis during chromaluminization of Inconel turbine blade

14 p2595 A70-30293

Inconel 600 high temperature high strain rate fracture process by hot torsion tester, noting temperature effects

15 p2762 A70-32389

Inconel 713 alloy, investigating chromaluminization treatment effect on fatigue strength at 700 C

18 p3278 A70-37211

Inconel short term creep properties measured for various temperature and stress levels, presenting results in polynomial and graph form

22 p4055 A70-43098

Low cycle notch fatigue tests on Inconel and low alloy steel, giving fatigue strength reduction factors for design

22 p4055 A70-43103

Metallurgical interaction phenomena in welding zone of heat treated Inconel 600, using hot ductility testing and metallographic methods

22 p4046 A70-43150

INDENTATION

Fourier transform applied to Riemann boundary value solution to biharmonic equation governing elastic theory for half plane with circular protrusion or indentation

01 p0199 A70-10155

Hardness measuring instrument by dynamic method at high temperatures in vacuum, using magnetic or nonmagnetic indenter balls

01 p0092 A70-11111

Adhesive rocking and parallel translation contact for circular cylindrical punch indenting elastic half space solved using simultaneous equations

05 p0932 A70-16139

Microhardness measurements of carbides, borides and nitrides in wide temperature range, considering indentation load selection

06 p1089 A70-17661

Surface mean deformation state under shot peening found equal to deformation under single indentation

07 p1292 A70-18835

Indentation pressures in rigid perfectly plastic solids correlated with ratio between indenter strain and material yield strain for various indenter geometries

12 p2322 A70-27232

INDEPENDENT VARIABLES

NT LATTICE PARAMETERS

Nonlocal continuity and correctness of principle for comparing functions with Liapunov vector function, demonstrating continuous dependence of principle on certain parameters

01 p0130 A70-10151

Dynamic programming for optimizing distributed parameter control systems described by parabolic linear integrodifferential equation with delayed argument

01 p0131 A70-10556

Dynamo theory of stellar and planetary magnetic fields, discussing mathematical analysis and electronic computation of eigenvalue problems and field parameters

01 p0185 A70-10957

Terminal state control systems efficiency from determining permissible range of control parameter variation for steady and unsteady linear dynamic systems

01 p0052 A70-10982

Inertial damper optimum parameter selection for achieving maximum nutation damping factor for gyroscopic stabilizer

01 p0091 A70-10985

Critical diameter and detonation parameters of nitromethane and tetranitromethane as function of powder content

01 p0217 A70-11004

Runge-Kutta method with position dependent optimal parameter alpha for initial value problem solution to minimize total error

01 p0134 A70-11364

Geomagnetic micropulsations fluctuations during solar activity cycle showing changes in excitation frequency with change in corpuscular fluxes parameters

01 p0083 A70-11539

Multipole analysis for earth magnetic field allowing secular variation to be illustrated by time trends in multipole parameters

02 p0288 A70-11742

Parametric approximation method extended to incompressible laminar boundary layers with surface suction or injection

02 p0277 A70-11857

Mixed boundary value problem for viscoelastic body with constant Poisson ratio solved by variables separation method, proving convergence

02 p0390 A70-12802

Small parameter method for reducing self similar viscous flow problems to ordinary third order differential equations with boundary conditions at wall and infinity

02 p0288 A70-12821

Single dispersion statistical analysis by simultaneous parameters tolerances application

03 p0518 A70-12937

Multielement active/passive antenna systems maximum SNR value obtained by determining conditions satisfied by parameters

03 p0456 A70-13092

Zero crossings of signal harmonic function with normal phase distribution, deriving relations with spectrum and modulating process parameters

03 p0447 A70-13289

Averaging over finite and infinite intervals derived for nonlinear integrodifferential equations with varying variables

03 p0594 A70-13507

Optimal synthesis and design of distributed parameter system for waveguides using gradient technique with devised algorithm to overcome convergence problem

03 p0449 A70-13563

Closed loop nonlinear optimal control systems sensitivity to small parameter variations noting influence of feedback

03 p0461 A70-14171

Ionization study of gas discharge parameters behind shock wave front produced by moving plasma pulse interaction with immovable gas discharge plasma

03 p0535 A70-14361

Relative satellite motion equations derived in generalized parameters, obtaining expressions for coefficients of correcting impulses sensitivity to measurement errors

04 p0760 A70-14430

Distributed parameter systems with arbitrarily many degrees of freedom, studying conditions for destabilization absence

04 p0767 A70-14483

Resonance oscillations onset by initial conditions in dynamic system described by hyperbolic equation containing independent time lag variable

04 p0718 A70-14485

Optimal control of multidimensional distributed parameters plants described by linear or nonlinear partial differential equations, considering boundary conditions

04 p0660 A70-14551

Modified harmonic balance method applied to critical values determination of nonlinear automatic control system parameters

04 p0661 A70-14555

Dynamic equilibrium prediction for creep and fatigue of various metals under various loading conditions, using time-temperature and cyclic stress-strain parameters

[ASME PAPER 69-WA/MET-9] 04 p0704 A70-14759

Dominant and small parameters determination through sensitivity coefficients in heat transfer problem

[ASME PAPER 69-WA/AUT-4] 04 p0713 A70-14829

Upper and lower bounds for eigenvalues of lumped parameter straight line torsional system determined by receptance synthesis based on Holzer method

04 p0773 A70-15083

Automated parameter search techniques applied to low thrust mission design, stressing trajectories and mission optimization

[AIAA PAPER 69-261] 04 p0736 A70-15404

Radar data parameter determination method, discussing false alarm calculation

05 p0811 A70-15988

Adaptive multiparameter experiment for iterative minimization of investigated data points, based on human response pattern to psychophysical inputs

05 p0805 A70-16006

Weighting coefficient matrix parameters for European satellite triangulation determined, considering sequence of separate points shown by photographs instead of single point

05 p0839 A70-16345

Slide rule for calculating electron number density, Debye length and Debye sphere particles in plasma parameters determination

05 p0852 A70-16847

Signal parameter quasi-optimal estimation during reception on background of normal noise with unknown correlation function

06 p1009 A70-17671

Identification algorithm for estimating parameters in constant coefficient linear system independent of prior estimates

[AIAA PAPER 70-34] 06 p1015 A70-18164

Roller machine adjustment parameters determination by analytical relations allowing for intermediary zone

07 p1292 A70-18837

Optimal control of linear distributed parameter systems using functional analysis

07 p1245 A70-19096

Parameters identification in nonlinear boundary value problems by successive approximations technique, using Lagrange multipliers and Newton-Raphson method

07 p1327 A70-20025

Shallow shells of variable thickness and curvature calculated using small parameter method based on functional analysis

07 p1416 A70-20193

Differential correction algorithm for identifying airplane parameters from flight test data, assuming differential equations

08 p1465 A70-20783

Quasi-linearization technique in computer program for aircraft parameters identification featuring efficient search for optimal parameters in algebraic or differential equations

08 p1465 A70-20784

Functions generation to determine probabilistic parameters of automatic air traffic control system

08 p1541 A70-20873

Model characteristics selection for dynamic system behavior simulation, studying characteristics variability extent without changing trajectory behavior dependence on parameter space

08 p1544 A70-20953

Optimization of control of oscillatory process with deviating argument in maximum principle form, reducing solution to boundary value problem

08 p1544 A70-20954

Automatic control system stability with restricted nonlinearity, investigating lumped and distributed parameter systems and unique and nonunique equilibrium positions

08 p1479 A70-20996

Sectional gyroscopic pendulum stability in space of system parameters reduced to determining periodic motions regions by Hamiltonian equations

08 p1496 A70-21206

Parameters defining elliptic vibration of light reflected from surface using photoelectric ellipsometer

08 p1546 A70-21673

Quantum mechanical form of Cramer-Rao inequality used to determined error lower bound for radiating object parameter observed by quantum-limited optical system

09 p1694 A70-22072

Flow characteristics behind sphere suspended in vertical axisymmetric jet dependent on ratio of specific parameter

09 p1658 A70-22118

Algorithm for controlled plant parameters determination based on sensitivity function calculation

09 p1653 A70-22145

Nonorthotropic pinched plates deflections solution, demonstrating asymptotic convergence of small parameter method

09 p1769 A70-22151

Nonlinear parameter of two intersecting laser beams in interaction with free electrons plane wave external field coupling

09 p1695 A70-22213

Parameter optimization of V and rhombic antennas with sloped wires, determining radiation angle from radiation pattern

09 p1649 A70-23336

Optimal control of distributed parameter systems, discussing necessary and sufficient optimality conditions based on functional analysis with emphasis on thermal processes

09 p1654 A70-23542

Wave propagation constants in electron wave TWT, studying nonuniformity parameter influence to determine relationships between beam and system parameters

09 p1652 A70-23655

Satellite orbit prediction formulas for Vinti dynamic model with three coordinates expressed in terms of independent variable

10 p1939 A70-24188

Numerical analysis of forced parametrically excited plate vibration in plane supersonic flow, using digital computer

10 p1958 A70-24527

Radial distribution of plasma parameters for thermionic converters with electrode shielding by plane sapphire rings, showing lateral surface effect

10 p1808 A70-25124

Pulsed system accuracy increment by increasing number of modulated signal parameters in addition to pulse duration modulation

10 p1843 A70-25137

Slowly varying parameters as engineering problem in nonlinear lumped systems

10 p1856 A70-25239

Digital control program parameters synthesis to realize time optimality with pure delay for ensuring absence of auto-oscillations under steady conditions

11 p2022 A70-25577

Algorithm for selective quadrupole parameter tolerance calculation, combining random search method with statistical testing

11 p2018 A70-25923

Multidimensional determined automatic control system structure and parameter synthesis by root method

11 p2023 A70-25926

Circuit for analog computing system to determine function extremum of many variables in presence of constraints

11 p2023 A70-25927

Constrained complex optimization method for synthesizing distributed-lumped-active networks

11 p2024 A70-26204

Kalman filtering and differential correction techniques applied to T-33 flight test data for aircraft system parameters identification

11 p1982 A70-26323

Dimensionless parameters associated with heat transport within living tissues using biothermal model

11 p1992 A70-26513

Satellite orientation by determining rotation parameters about centers of mass with respect to certain coordinates

11 p2128 A70-26782

Energy derivation for mechanics and thermodynamics with generalization to systems of more than two dynamic variables, considering transformations and Newton and Kepler laws

12 p2164 A70-27070

Lumped linear model parameters determined from dynamic test data on mode shapes and frequencies for approximating distributed elastic structure

12 p2317 A70-27122

Angular aberrations produced by airborne radomes calculated by computer, allowing optimal parameters selection and knowledge of radio properties

12 p2195 A70-27274

Design parameters for optimum heavily loaded single rotation ducted fan characterized by ultimate wake vortex system

[AIAA PAPER 69-222] 12 p2157 A70-28083

Optimal control for processes with parameters and state variable inequality constraints using gradient projection method and maximum principle

12 p2205 A70-28337

Space navigation procedures verification considering vehicle trajectory parameters, noting applicability to linear systems with estimable parameters

13 p2447 A70-28412

Relative satellite motion equations derived in generalized parameters, obtaining expressions for coefficients of correcting impulses sensitivity to measurements errors

13 p2503 A70-28455

Averaging over finite and infinite intervals derived for nonlinear integrodifferential equations with varying variables

13 p2440 A70-28656

Spacecraft parameters role in response to atmospheric disturbances, considering model design and control systems effects

[AGARDOGRAPH-115] 13 p2504 A70-28757

Linear distributed system with periodic parameters spectral characteristics based on multidimensional Fourier transforms with drift

13 p2383 A70-29718

Optimal policy for linearly distributed parameter control system, describing sufficient conditions

13 p2384 A70-29899

Parameters optimization of nonlinear electric servo actuator on basis of statistical criteria

14 p2559 A70-30157

Optimal control theory for system model dependence on state and control variables history

14 p2562 A70-31410

Gas ring lasers, discussing optimal parameters, colliding waves interference, nonmutual effect and radiation polarization

15 p2749 A70-31451

Relay control systems stability bound determination in nonphase variable form, assuming unknown system parameters

16 p2881 A70-33034

Pontryagin stability criterion interpretation for systems with time delay in parameter plane, using computer oriented method

16 p2882 A70-33046

Time optimal control for linear distributed parameter system using functional analysis with method of deepest descent

16 p2882 A70-33122

Heterodyne conversion transducer large signal internal parameters dependence on heterodyne, signal amplitudes and intermediate voltage

16 p2873 A70-33240

X-22 VTOL aircraft initial parameter, state and covariance matrix estimates by Kalman filter and smoothing algorithms

16 p2885 A70-33329

Linear continuous vibratory system unknown parameters identification from frequency response data

16 p2988 A70-33337

Parameter identification in distributed systems by method of characteristics, discussing noisy measurements and limited available transducers

16 p2942 A70-33338

Distributed parameter feedback systems with quadratic cost criteria, obtaining optimal controls characterization

16 p2886 A70-33339

Motor design parameters effects on solid propellant extinguishment predicted from mathematical combustion model

16 p2962 A70-33571

Mechanical system random excitation, evaluating parameters to satisfy conditions for statistical characteristics of steady state output processes

16 p2953 A70-34296

Binary data system parameters sudden change detection by noisy observation based on Bayes criterion

17 p3056 A70-34856

Control systems synthesis with parametric invariance for spacecraft boosters

17 p3177 A70-35219

Feedback control systems synthesis by three parameter space, using two dimensional graphic techniques

17 p3130 A70-35296

Parameter variation effects on iterative identification of linear system by learning method

17 p3130 A70-35299

Existence and uniqueness of optimal control for one dimensional linear system with distributed control

parameter using input-output integral with quadratic functional
17 p3057 A70-35627

Third order accuracy for nonlinear hyperbolic system of partial differential equations extended to equations with independent variables
17 p3131 A70-35891

F region small scale ionization discontinuities parameters observational data concerning anisotropy, dimensions, velocity and lifetime
18 p3246 A70-36088

Astatic gyroscope subjected to steady random translational vibration, optimizing parameters by mathematical model
18 p3257 A70-36136

Previous history effect on parameters relation in similar turbulent boundary layers under pressure distributions
18 p3241 A70-36375

Time and altitude dependences between 340-1000 km of delta parameter for height scale ratio of neutral and electron-ion gases, discussing diffusion coefficient
18 p3254 A70-37030

Cylindrical body with gravitational and magnetic anomalies, selecting point coordinates for body parameters
19 p3407 A70-37298

Cassegrain antennas design parameters using graphs for minimum blockage condition
19 p3376 A70-37690

Microwave transistors parameters measurement by scattering S_{11} parameter method for characterizing noise, gain and dynamic range, reading input and output impedances from Smith chart
19 p3386 A70-37692

Gyrotropic waveguides parameters computer calculation based on inhomogeneous isotropic region, taking into account discontinuities
19 p3378 A70-37736

Multiparameter systems with dominant complex roots constrained by degrees of freedom to construct reduced characteristic equation
19 p3392 A70-37824

Signal spectral parameters for reducing VLF atmospheric data from analyzer observations
19 p3412 A70-37998

Human monitoring behavior, discussing display, task and organismic variables effects
19 p3363 A70-38323

Electronic components mass production for automatic control equipment, determining parameters probabilistic scatter
19 p3390 A70-38578

Galactic rotation law parameters determination, considering effect of random and systematic errors on accuracy
19 p3525 A70-38774

Parameter S mean values measurement in Perseid meteor shower, discussing wind effects and accuracy
19 p3526 A70-38778

Optimal control of distributed parameter systems via functional analysis
20 p3600 A70-39136

Watts lunar limb correction charts parameters solution, using grazing and total stellar occultations by moon
20 p3705 A70-39478

Aircraft stability design by parameter plane technique, using for YO-3A aircraft
[AIAA PAPER 70-983] 20 p3560 A70-39546

Small parameter effects on absolutely invariant systems under transient perturbation, analyzing gyrostabilizer performance
20 p3603 A70-39831

Mode-generated average variables of atmospheric horizontal heat flux by transient cyclonic eddies used in mean motion circulation model
20 p3664 A70-40063

Discrete parameter stochastic optimization problems necessary conditions, deriving maximum principle
20 p3659 A70-40107

Parameters influence on mercury hollow cathode neutralizers for Kaufman ion thruster
[AIAA PAPER 70-1090] 20 p3693 A70-40245

Radial distribution of plasma parameters for thermionic converters with electrode shielding by plane sapphire rings, showing lateral surface effect
20 p3568 A70-40517

Optimal control problem for plant including dynamics and input constraints parameters treated by calculus of variations and Pontryagin maximum principle
21 p3801 A70-40899

Linear elastic structure with few degrees of freedom, discussing parameters experimental determination
21 p3935 A70-41409

Quasi-linearization relationship with Kalman filtering for nonlinear systems parameter estimation in process noise absence
21 p3845 A70-41749

Microwave parameters for Gunn devices with low electric field, obtaining data on characteristics and operating mode
21 p3863 A70-41989

System parameters identification from short-term signal observations, using Bayesian approach
21 p3802 A70-42253

Multiparameter eddy current test methods, describing test coil output signal amplification, demodulation and recombination
22 p4028 A70-42592

Spherical Bessel functions fast generation recurrence technique, presenting real or complex arguments
22 p4062 A70-42920

Magnetospheric plasma parameters from ground observation data of Pc-1 type micropulsations, assuming radiation belt plasma cyclotron instability
22 p4022 A70-43283

Coupling components in homotopic classification of elliptic systems of second-order equations with independent variable
23 p4212 A70-44349

Missiles aerodynamic coefficients parameter sensitivity from test data, using least squares analysis
23 p4133 A70-44525

Restricted osculating two body orbit with time derivative of eccentric anomalies difference position as independent variable in perturbation differential equations
23 p4244 A70-44635

Parameter optimization of gravity gradient stabilized satellite in circular orbit, considering minimum transition time and eccentricity oscillation
23 p4264 A70-45014

Bayesian identification of system parameters for observable and nonobservable input signals
24 p4316 A70-45474

Microwave oscillator design using Y-parameters from measured scattering parameter data at desired frequencies, applying negative resistance circuit theory
24 p4320 A70-46235

INDEXES [DOCUMENTATION]
Bibliography of far IR spectroscopy with subject index
14 p2586 A70-30987

Direct access on-line information retrieval system combining computer assisted instruction and bibliographic retrieval, using thesaurus for literature indexing
17 p3048 A70-34600

Graph theoretical cluster technique for producing index terms thesaurus for information retrieval system, discussing algorithms
24 p4316 A70-45161

INDEXES [RATIOS]
Angular dependence of one dimensional first and second index matching for optical parametric mixing of laser and SRS Stokes beams for tunable laser source
03 p0498 A70-13157

Oxygen index flammability test for polymeric materials, showing general applicability in quality control and research
09 p1710 A70-23346

Time lag system performance index bounds determination and optimal feedback controller design based on min-max criteria
14 p2561 A70-31185

Automated Readability Index for technical materials weighting word and sentence length in multiple regression equation
24 p4308 A70-45510

INDIA
Meghdoot program for satellite network communications technology applications to national goals in India
04 p0757 A70-15670

Civil air transportation in India, using mathematical models to estimate optimal development and efficiency of future air traffic potential
08 p1601 A70-21544

ACME hybrid airborne satellite TV and communications system for India, using airborne TV transmitters
[AIAA PAPER 70-472] 11 p1998 A70-25418

Report to COSPAR on Indian space research describing organizational structure, facilities, experiments and international cooperation
15 p2830 A70-31715

Microwave propagation refractive index over India, showing influence of humidity and vapor pressure
15 p2701 A70-32470

INDIAN OCEAN
Lherzolite, anorthosite, Gabbro and basalt dredged from Mid-Indian Ocean Ridge noting geological and geophysical features
04 p0675 A70-14422

Meteorological data from radiosonde and radar wind observations during Indian Ocean expedition of research vessel Meteor
07 p1329 A70-19350

INDICATING INSTRUMENTS
NT ANEMOMETERS

NT APPROACH INDICATORS
NT ATTITUDE INDICATORS
NT CLOUD HEIGHT INDICATORS
NT FLOW DIRECTION INDICATORS
NT GYRO HORIZONS
NT GYROCOMPASSES
NT HOT-WIRE ANEMOMETERS
NT MICROBALANCES
NT MICROWAVE SENSORS
NT PLAN POSITION INDICATORS
NT POSITION INDICATORS
NT RADIO DIRECTION FINDERS
NT SONIC ANEMOMETERS
NT SPACECRAFT POSITION INDICATORS
NT SPEED INDICATORS
NT TACHOMETERS
NT WEIGHT INDICATORS
NT WIND VANES

Radar visual indicator used with scan converter and as synthetic indicator with computer controlled flight safety system
02 p0263 A70-12700

Visual recordings of cardiac rhythm obtained from flashes of miniature indicator tube, describing circuit filter function
08 p1452 A70-21439

Coherent instrumentation radar for White Sands Missile Range, discussing system design emphasizing pulse Doppler capability
10 p1842 A70-24881

Short range aircraft collision pilot warning indicator for low altitude and closure speeds
11 p2078 A70-25706

Waveguide gas discharge indicator of transmitted microwave power, investigating sensitivity, discharge conditions, filler gas and pressure effects
11 p2020 A70-26807

Liquid metal level indicators and resistance type level meters for turbines using alkali metal as working media
14 p2587 A70-31010

CH-47 cruise guide indicator for displaying fatigue loading to pilots, discussing design and operation
17 p3082 A70-34705

Small swing angle detector for balloon payloads, using rate gyro principle
17 p3090 A70-35314

Fluidic parallel flow low airspeed indicator for V/STOL instrumentation tested in wind tunnel
[AIAA PAPER 70-906] 17 p3096 A70-35818

Two-axis electrolytic bubble level as precision vertical reference and tilt indicator for ballistic missiles inertial navigation systems
[AIAA PAPER 70-949] 20 p3631 A70-39578

Remote digital mean wind speed indicator with numerical display, using photoanemometer for airport application
21 p3831 A70-42247

Quartz Z-variometer for autonomous variation stations, describing construction and operation
23 p4194 A70-44089

Waveguide gas discharge indicator of transmitted microwave power, investigating sensitivity, discharge conditions, filler gas and pressure effects
24 p4317 A70-45179

INDICATORS
Search duration distribution of two stage lock-on indicator scanning signal search systems, using regenerative random process and integral recovery equation
15 p2696 A70-31501

INDIUM
DC electrical conduction in In and In-Pb alloy foils sandwich structures, discussing size effect and Pb diffusion rate
03 p0540 A70-13624

Thermal conductivity and hysteresis measured in cylindrical In foil under magnetic fields at temperatures below 1 K
05 p0891 A70-15792

Plastic deformation effects on superconductivity of wire specimens of high purity Pb, In and Ti cold worked at liquid He and annealed
06 p1127 A70-18614

Al, Ga and In effects on creep and rupture stress of Ti at 500 C
17 p3120 A70-34425

In thin film resistance thermometers fabrication by vapor deposition in vacuum, considering electrical properties dependence on temperature
22 p4039 A70-43446

Radiochemical neutron activation analysis of In, Cd, Y and rare earth elements in rocks
24 p4310 A70-46375

INDIUM ALLOYS
DC electrical conduction in In and In-Pb alloy foils sandwich structures, discussing size effect and Pb diffusion rate
03 p0540 A70-13624

Binary Co-In system thermal analysis, X ray diffraction and microscopy, discussing phase diagram
14 p2595 A70-30838

In-Au contacts for GaAs, discussing fabrication and performance tests on transverse Gunn mode oscillator
20 p3686 A70-39118

Direct gap conduction band and alloy composition monitoring InAlP, using electron microprobe cathodoluminescence and X ray emission
22 p4086 A70-43019

INDIUM ANTIMONIDES

Current carrier mobility in n-InSb calculated by Schwinger variational method over temperature range
01 p0154 A70-10098

Natural absorption band absorption coefficient frequency and temperature dependences in doped n-InSb
01 p0154 A70-10100

Hole mobility in n-type InSb semiconductors determined from solving kinetic equation for minority carriers allowing for scatterings
01 p0155 A70-10185

Plasma injection occurrence as function of temperature in n-InSb subjected to low electric field strengths and fitted with Ohmic contacts
01 p0159 A70-11176

Recombination emission of InSb semiconductor at low temperature during pinch effect with electron gas degeneration, calculating spectral distribution and effective temperature vs current
03 p0539 A70-13406

Coherent microwave generation mechanism in indium antimonide at high electric fields, formulating thin plasma layer double stream interaction theory
03 p0534 A70-14214

Active region characteristics of double injection laser employing electron-hole plasma in p-type indium antimonide
12 p2247 A70-27491

Electric field distribution in rectangular waveguide loaded with magnetized n-InSb at room temperature obtained by solving boundary value problem by variational method
12 p2202 A70-28163

Photovoltaic InSb IR detectors design and operation, emphasizing performance in restricted field of view
16 p2926 A70-33152

Submillimeter lasers radiation measurement with n-InSb detectors at liquid He temperature
17 p3107 A70-35109

High field noise emission from indium antimonide, suggesting electron-hole plasma as source
19 p3486 A70-37767

Sensing elements piezoresistive Si and indium antimonide film sensing elements for high sensitivity pressure transducers and accelerometers, discussing airborne telemetry applications
19 p3431 A70-38538

InSb semiconductor, measuring small signal microwave conductivity for hot electron region at 9.4 GHz in high electric DC fields
19 p3488 A70-38747

Circular waveguide with axially magnetized plasma, investigating twist mode propagation in InSb at 70 GHz
24 p4311 A70-45214

INDIUM ARSENIDES

Indium arsenide crystals conduction band structure with various electron concentrations, determining electron mass dependence on concentration and temperature
01 p0154 A70-10096

InAs-GaAs solid solutions microhardness and brittleness, studying chemical composition effects
04 p0730 A70-14464

N-type InAs single crystals optical properties with various carrier concentrations at 1-6 μ wavelengths and 300-78 K temperatures, studying absorption spectra
08 p1555 A70-20512

Microwave backward tunnel diodes in InAs, predicting reliability and sensitivity improvements over other materials
13 p2379 A70-29593

InAs thin films electrical properties and IR reflectance, determining thickness and substrate temperature effects on carrier concentration and mobility
15 p2783 A70-31965

Plasma reflection edge in thin film InAs semiconductors, calculating refractive index and extinction coefficient from free charge parameters
15 p2783 A70-31966

Indium arsenide role in IR image detectors, describing photoelectric threshold and quantum efficiency
17 p3143 A70-35118

Single and polycrystalline indium arsenide preparation methods and quality control
17 p3143 A70-35119

Indium arsenide p-n junctions fabrication and electrical and photoelectric properties
17 p3143 A70-35120

Absorption coefficient of n-type indium arsenide single crystals with varying electron and doping concentrations, investigating spectral dependence
17 p3144 A70-35705

Photosensitivity and electroluminescence spectra of GaAs-indium gallium arsenide p-n heterojunctions at room temperature
17 p3144 A70-35708

InAs p-n junction laser electrical and optical characteristics during spontaneous and stimulated radiative recombination
18 p3269 A70-36739

InAs pulsed injection laser at cryogenic temperature for measuring time constant of IR radiation detectors
20 p3630 A70-39449

Epitaxial GaAs films growth from solid solutions of InAs-GaAs system deposited on GaAs substrates, noting electron mobility and temperature effect
20 p3686 A70-39629

Highly alloyed indium arsenide reflection spectra and band structural characteristics
24 p4389 A70-45482

INDIUM COMPOUNDS

NT INDIUM ANTIMONIDES

NT INDIUM ARSENIDES

NT INDIUM PHOSPHIDES

NT INDIUM TELLURIDES

INDIUM PHOSPHIDES

Solution crystallization method to obtain gallium indium phosphide semiconductor alloys, discussing optical absorption thresholds and transitions
01 p0158 A70-10661

Bulk n-type InP single crystal transferred-electron oscillators, investigating current instabilities
14 p2556 A70-30686

Microwave oscillator performance of InP three level transferred electron devices
17 p3048 A70-35874

Microwave output power and impedance for InP and GaAs bulk negative resistance oscillators, using velocity/field characteristics
21 p3800 A70-42049

Boron impurities introduction into InP crystals grown by liquid encapsulation, detecting IR absorption bands due to localized lattice vibration
23 p4231 A70-44891

INDIUM TELLURIDES

Interband transitions and optical absorption edge analysis in indium telluride using dependence on photon energy
03 p0541 A70-13725

Impurities solubility in semiconducting indium telluride with stoichiometric vacancies, verifying thermodynamic model by phase diagrams
16 p2960 A70-33224

INDOLES

NT TRYPTOPHAN

Melatonin biosynthesis, discussing regulation by light and sympathetic nerves, daily pineal rhythms, estrous rhythms and ovarian hormones
03 p0424 A70-13809

Prolonged hypokinesia effect on dynamics of 5-oxyindoleacetic acid elimination in rat urine, showing occurrence of shifts in serotonin metabolism
09 p1615 A70-22092

Pineal C14-indoles synthesis in rats noting no direct effect of morphine
11 p1988 A70-26299

Prolonged hypokinesia effect on dynamics of 5-oxyindoleacetic acid elimination in rat urine, showing occurrence of shifts in serotonin metabolism
15 p2685 A70-32688

Serotonin, 5-hydroxyindoleacetic acid /5-HIAA/ and monoamine oxidase in bovine pituitary organ and median eminence
21 p3761 A70-40850

INDUCED FLUID FLOW

U FLUID FLOW

INDUCERS

U INTAKE SYSTEMS

INDUCTANCE

Impedance behavior of inductive posts with small capacitive gap in waveguide
08 p1468 A70-20644

Solid state device inductance by thermal effects, describing characteristics and applications in resonant circuits
15 p2783 A70-31839

Fluidic systems linear lumped components design with allowance for energy factor Q, investigating capacitance and inductance
15 p2678 A70-32675

Interference free high speed monolithic digital integrated gate, determining current swing, lead inductances and switching times
17 p3048 A70-34587

INDUCTION

Light inductions and echo intensities in liquids and gases, investigating thermal vibrations, translational Brownian motion, particle collisions and laser diffusion effects
06 p1082 A70-17809

Steady state tangential drag by solar wind on geomagnetic cavity, describing unipolar induction
22 p4013 A70-42469

INDUCTION HEATING

Induction furnace for thermal treatments and melting of solid and liquid metals, alloys and sintering and degassing ceramic and metallic systems in vacuum
04 p0664 A70-15371

Boundary value problems solutions estimated for heat conduction equation in unbounded domain, considering function satisfying heat induction equation
07 p1419 A70-18852

Powder metal parts induction sintering, comparing performance with conventional method
13 p2420 A70-29249

Induction plasmas in thermal equilibrium dominated by radial conduction losses, discussing energy balance equation and Ar plasmas at atmospheric pressure
13 p2465 A70-29701

Thermal induction plasma discharge characteristics, considering radiation and conduction losses
13 p2465 A70-29702

Asteroidal parent bodies heating by electrical induction during early solar evolution
18 p3310 A70-35938

INDUCTION SYSTEMS

U INTAKE SYSTEMS

INDUCTORS

Manganin piezoresistive shock gauge constant current supply using inductor and termination technique eliminating shunting
02 p0303 A70-12737

High speed homopolar inductor alternators with minimum leakage reactance, using geometric programming for objective function optimization
16 p2879 A70-34059

INDUSTRIAL MANAGEMENT

NT PERSONNEL MANAGEMENT

Quality control and reliability assurance in industrial supplier-customer relationship, emphasizing management role
24 p4431 A70-46386

INDUSTRIAL PLANTS

NT FOUNDRIES

Automatic multiple station test system for manufacturing plants, considering centrally controlled vs free standing and intelligent vs nonintelligent remote stations
08 p1470 A70-20655

Aeronautical construction complexes in France
10 p1895 A70-24862

Complex plants process control by experimental statistical methods, considering curves plotting, computer requirements, optimum method selection, etc
20 p3592 A70-39902

INDUSTRIAL SAFETY

Initiator desensitization process involving use of volatile inert liquid to increase safety during assembly operations
03 p0549 A70-14137

Static electricity hazards and problems in electronics and aerospace industries
07 p1333 A70-18930

Hazards in manufacturing solid propellants evaluated to design tests and suggest process conditions
07 p1361 A70-19915

Health hazards of laser operations, considering laser and laser area physical characteristics, operating procedures and controls
10 p1824 A70-24062

Commercial and industrial microwave hazards exposure criteria and survey techniques used in state and local governments
18 p3224 A70-36228

Safety program effectiveness based on evaluation activity for monitoring field installations
19 p3555 A70-38848

INDUSTRIES

NT AEROSPACE INDUSTRY

NT AIRCRAFT INDUSTRY

NT DEFENSE INDUSTRY

NT WEAPONS INDUSTRY

Engineering development role in metal forming industry expansion, discussing metals ductility or plasticity increase for extending processes
12 p2244 A70-28146

Soviet optical instrument industry development trend /1971-1975/, considering spectral, test, measuring, reading and microscopic equipment
13 p2412 A70-29864

Global weather prediction network economic benefits to key industries, discussing adverse weather effects on production schedules, fuel supplies, construction, harvesting, etc
14 p2610 A70-31143

INELASTIC BODIES

U RIGID STRUCTURES

INELASTIC COLLISIONS

Nucleons and high energy pions inelastic interactions with complex nuclei involving external diffraction production of pions
03 p0526 A70-13029

Cosmic ray particles inelastic nuclear interactions mean free path in iron measured in Wilson chamber and ionization calorimeter
03 p0554 A70-13030

Relativistic phase of stellar system evolution caused by inelastic stellar collisions, discussing thermal relaxation rate, obtaining distribution function
03 p0564 A70-13226

Electron density and temperature in ionized gas created by thermal collisions between neutral parti-

- cles, analyzing chemical ionization and inelastic collisions influence [ONERA-TP-752] 03 p0532 A70-13631
- Extensive air shower characteristics for inelasticity coefficient, nucleon-pion interaction cross sections and secondary particles, noting parameter interchangeability 05 p0898 A70-15946
- Inelastic He atom-ion collisions provide understanding of capture and excitation cross sections 05 p0885 A70-16555
- Maxwellian distribution perturbation in chemically reacting gas mixtures with lower inelastic collision frequency than elastic 06 p1110 A70-17761
- Collision cross sections direct measurement for determining macroscopic reaction rates in inelastic molecular collision processes in gas dynamics 06 p1113 A70-18276
- Energy distribution of positive Ar ions scattered from thermal diatomic D noting inelastic collisions 07 p1339 A70-20056
- Molecular beam research at low, intermediate and high energies, discussing inelastic processes, intermolecular potentials, etc 07 p1344 A70-20131
- Born wave for atom-atom inelastic cross sections, calculating He excitation from ground state to higher states by H atom collision 07 p1346 A70-20241
- Time dependent matrix elements for multistate impact-parameter calculations for atom-atom inelastic cross sections 07 p1346 A70-20242
- Relativistic phase of stellar system evolution caused by inelastic stellar collisions, discussing thermal relaxation rate, obtaining distribution function 08 p1580 A70-21659
- Extensive air shower simulation for determining inelasticity effect on electrons, hadrons and muons variation at sea level 08 p1563 A70-21674
- Transport cross sections for isotopic methane and mixtures, considering inelastic and thermal diffusion effects 14 p2665 A70-30652
- F 2 layer heating by photoelectrons reconsidered in terms of electron inelastic collisions effect on temperature 15 p2727 A70-31870
- Diatomic molecules inelastic collision cross sections for specific rotational transitions, discussing S matrix energy requirements for statistical analysis 19 p3474 A70-38268
- Low voltage arc nonequilibrium ionization rate, taking into account atom-electron collisions 20 p3684 A70-40389
- Secondary cosmic ray muon inelasticity in high energy neutrino interactions for deep mine experiments, using lepton current 21 p3845 A70-41139
- Interface interaction of colliding plates of different materials, reducing flow problem to differential equation via hodograph transformation 21 p3747 A70-41962
- INELASTIC SCATTERING**
- Periodic potential and residual Coulomb interaction effect on inelastic light scattering from electronic excitations in semiconductors, using diagrammatic perturbation theory 01 p0156 A70-10280
- Inelastic muon-nucleon scattering implications on cosmic rays, studying equation validity for absorption cross section 02 p0359 A70-12702
- Cosmic ray particles high energy interactions during extensive air showers, noting inelastic superhigh energy collisions 03 p0556 A70-13040
- Elastic and inelastic scattering of proton beams from magnesium and silicon isotopes, using optical model 04 p0723 A70-15637
- He to carbon fusion reaction rate enhancement in dense matter by inelastic scattering processes, discussing C 12 deexcitation to ground state 05 p0885 A70-16934
- Inelastic scattering of electrons by surface plasma oscillation for low energy electron diffraction and photoemission, interpreting surface plasmon excitation 07 p1337 A70-19359
- Inelastic scattering of He ions by Ne as function of angle, initial energy and energy loss using collision spectroscopy 07 p1346 A70-20243
- Pulsed electron beam irradiated dielectrics secondary electron emission in vacuum, emphasizing inelastic scattering 13 p2471 A70-29409
- Differential cross sections for electron scattering by hydrogen with and without vibrational excitation, discussing inelastic processes 14 p2618 A70-30115
- NO and oxygen ions vibrational excitation due to inelastic scattering from He, calculating scattering angle variation 16 p2955 A70-34010
- Inelastic energy losses in oxygen ion beams collisions with neutral molecules, determining vibrational transition probabilities 16 p2955 A70-34011
- Coupled channel calculation of inelastic proton scattering from Ne 20 using Hartree-Fock wave functions 17 p3137 A70-34517
- Deep inelastic lepton-hadron scattering cross sections universality properties based on Wilson theory 20 p3674 A70-39150
- Anomalous angular distribution and inelastic cross section of muon-nucleon interaction for penetrating underground cosmic ray particles 22 p4095 A70-43232
- Transverse and longitudinal current correlations in fluids from modeled kinetic equations, noting inelastic neutron scattering from liquids 24 p4378 A70-45261
- INEQUALITIES**
- U ELASTIC PROPERTIES**
- Differential and integral inequalities theory and applications, Volume 1, Ordinary differential and Volterra integral equations 01 p0133 A70-11324
- Constitutive inequalities for isotropic elastic solids under finite strain generated by introducing concept of conjugate pairs of stress 08 p1590 A70-21351
- Consistent and inconsistent linear inequalities evaluating speed and efficiency of algorithm for pattern recognition problems 08 p1467 A70-21782
- Nonlinear partial differential inequalities treated by comparison function mu associated with continuity and growth conditions 10 p1908 A70-23836
- Generalized inverse algorithm for solving linear inequalities from Ho-Kashyap algorithm 11 p2013 A70-26207
- Coerciveness /Korn/ inequalities role in boundary value problems for elliptic systems of partial differential equations, noting applications to three dimensional linear elasticity theory 12 p2260 A70-26974
- Generalized iterative inverse algorithm for linear inequalities set involved in pattern recognition and threshold logic requiring decision functions determination 16 p2870 A70-33739
- INERT ATMOSPHERE**
- Strain gauge data obtainable on rosettes used for measuring test component stresses at 550 F in inert atmosphere 03 p0482 A70-12965
- Powder metallurgy all-inert processing method for producing nickel base superalloys forgings, discussing microstructure, reproducibility, mechanical properties, etc 09 p1701 A70-22553
- Pulsed current gas tungsten arc welding in inert gas atmosphere and applications 12 p2238 A70-26853
- Soviet monograph on bimetal and refractory metals production by rolling in vacuum or inert media 19 p3433 A70-37402
- INERT GASES**
- U RARE GASES**
- INERTIA**
- NT INERTIA PRINCIPLE**
- NT MACH INERTIA PRINCIPLE**
- Inertial gravitational fields described by Maxwell equations, showing potentials defining four vector velocity field of test particles 01 p0141 A70-10140
- Squeeze film investigation between rotating plane annuli, considering inertia due to centrifugal effect [ASME PAPER 69-LUB-6] 01 p0102 A70-10396
- Aerosol particles Brownian motion under inertial forces in absence/presence of obstacle 01 p0143 A70-10997
- Inertia effects in squeeze film between two curved surfaces and in externally pressurized bearing with converging lubricant film 01 p0104 A70-11388
- Inertia effect of electrically conducting lubricant on load capacity of hydromagnetic inclined slider bearing under magnetic field 01 p0104 A70-11389
- Inertia effects on pressure distribution, load capacity and frictional torque in MHD hydrostatic thrust bearing lubrication flow 02 p0307 A70-12162
- Propulsion efficiency in air and in space measured according to relativity concepts, including electric field inertia explanation 02 p0355 A70-12364
- Vibrational response of simply supported and clamped circular plates subjected to gyroscopically induced inertia loads, using equations of motion 03 p0583 A70-12920
- Bubnov-Galerkin approximations convergence in problem of thin plate nonlinear vibrations, allowing for inertial forces due to rotation 03 p0593 A70-13470
- Static and dynamic characteristics of inertia load driving systems using electrohydraulic pressure and flow control servovalves [ASME PAPER 69-WA/FLCS-15] 04 p0626 A70-14842
- Inertia effects due to circumferential and radial velocity in MHD hydrostatic thrust bearing in axial magnetic field [ASME PAPER 69-LUB-F] 04 p0698 A70-14871
- Inertial damping of soft rubber under forced torsional vibrations, discussing viscoelastic body linear model 04 p0712 A70-15100
- Delay characteristics of narrow band double bridge amplifier used as inertial component of photoelectric star transit recorder 04 p0693 A70-15489
- Inertial parameters and functions of dissipative and restoring forces in quasi-linear oscillatory system determined from free motion characteristics 05 p0884 A70-16951
- Ballistic reentry vehicle roll related to trim angles caused by inertia asymmetries [AIAA PAPER 70-204] 06 p1156 A70-18074
- Nonlinear spinning shallow spherical shell equations solved for equilibrium stress and displacement distributions, discussing inertia loading 07 p1406 A70-19342
- Free in-plane flexural vibrations of circular rings, developing equation of motion to include shear deformation and rotatory inertia effects 08 p1592 A70-21473
- Inertia effect in failure mechanics for steadily developing equilibrium cracks in dynamic system with time dependent periodically variable load 09 p1771 A70-22466
- Forced inertial oscillations in rotating processing fluid-filled circular cylinder 09 p1664 A70-23682
- Flutter characteristics of uniform cantilever wing with concentrated inertias using Direct Matrix method 10 p1963 A70-25071
- Titan 3C boost phase inertia loads on payload estimated for satellite design, using frequency and interface acceleration methods [AIAA PAPER 70-485] 11 p2120 A70-25446
- Rockets angular motion due to thrust with ramp input, presenting graphs for different inputs and inertia ratios 11 p2123 A70-26125
- Inertial and gravitational mass equivalence related to observation of anomalous K-meson decay 12 p2272 A70-27391
- Hydraulic piston-valve-type slave mechanism oscillations with rigid feedback and inertial load at actuated shaft, using harmonic linearization method 12 p2167 A70-28340
- Delayed moment of force relativistic definition within reference of inertia, discussing lever bent at right angles 13 p2452 A70-29635
- Cloud droplets coagulation growth, calculating aerosols inertial capture coefficient by fine jet method 14 p2602 A70-30390
- Inertial load-time effects in instrumented impact tests, showing corrections for bending stress and dynamic fracture toughness measurements 15 p2820 A70-32240
- Solar system Eotvos experiments for measuring gravitational to inertial mass ratio of celestial bodies 16 p2978 A70-34033
- Additional inertia introduced by velocity profile gradient in flow direction effects on externally pressurized gas bearing 16 p2924 A70-34233
- Statistically indeterminate Timoshenko beams oscillations natural frequencies and modes by lumping properties of linear and rotary inertia at discrete points 16 p2994 A70-34235
- Human vision inertia and irradiation algorithm, satisfying Talbot law 18 p3217 A70-36082
- Squeeze film investigation between rotating plane annuli, considering inertia due to centrifugal effect [ASME PAPER 69-LUB-6] 19 p3435 A70-37608
- Fluid inertia and compressibility effects considered in equations for foil over lubricating film [ASME PAPER 69-WA/LUB-10] 19 p3435 A70-37615
- Elastic materials consisting of particles with rotary inertia, long range force and dipole interactions, deriving constitutive relations 19 p3538 A70-37794
- Forced vibrations of rotor with variable rotating speed, investigating inertia terms effect 19 p3542 A70-38221
- Aircraft, rocket or other rigid or flexible structure, computing inertial constants based on measurements of generalized masses of natural modes 21 p3935 A70-41408

- Apollo 11 lunar specimen thermal diffusivity, conductivity and inertia in breccias and crystalline igneous rocks measured over wide temperature range
21 p3916 A70-41663
- Parallel circular squeeze film bearing, calculating Newtonian fluid inertia effect on lubrication by perturbation solution

- Opening distance and inflation time prediction for parachutes deployed supersonically based on subsonic performance 07 p1394 A70-19725

Liquid hydrogen balloon inflation system for use at remote locations, discussing characteristics and economy 20 p3607 A70-40086

Stress distribution and shape in arbitrarily shaped gore parachute under unsteady pressure distribution during inflation and descent [AIAA PAPER 70-1197] 21 p3752 A70-41819

Three body problem for parachute system dynamics during inflation [AIAA PAPER 70-1170] 21 p3755 A70-41843

Parachute trajectory and opening load prediction based on inflation process and added mass, determining drag area as function of distance [AIAA PAPER 70-1168] 23 p4137 A70-43993

INFLECTION POINTS

Two dimensional wave front shapes induced in finitely strained elastic body by impulsive point body force, discussing normal and double inflection points 08 p1584 A70-20581

Heat transfer mechanism in foil-vacuum insulation, analyzing factors responsible for point of inflection on experimental temperature field curves 13 p2521 A70-28861

INFLUENCE COEFFICIENT

NT STRUCTURAL INFLUENCE COEFFICIENTS

Longitudinal stability derivatives prediction for rigid and elastic airplanes, using influence coefficient method [AIAA PAPER 69-131] 04 p0624 A70-15383

Aircraft wing load calculations using aerodynamic influence coefficients based on linear subsonic or supersonic flow theory 06 p0967 A70-17255

Influence coefficients for toroidal shells under axisymmetric edge loads, taking one term in asymptotic expansion of Hankel function 11 p2132 A70-25693

Unsteady aerodynamics prediction of supersonic elastic aircraft, discussing aerodynamics influence coefficients/AIC/method refinement [AIAA PAPER 70-944] 20 p3558 A70-39583

Bounds to direct influence coefficient derived by hybrid stress finite element method 22 p4116 A70-43203

INFORMATION

Electronic camera instrumental profile, information capacity and object recognition 14 p2583 A70-30363

INFORMATION DISSEMINATION

ELDO project planning and progress monitoring system for management provided by Central Planning and Progress Monitoring Service 21 p3956 A70-41497

Satellite data acquisition and dissemination functions of National Space Science Data Center (NSSDC) [AIAA PAPER 70-335] 24 p4322 A70-45615

INFORMATION PROCESSING

U DATA PROCESSING

INFORMATION RETRIEVAL

SPIRAL system for free-flowing text information storage and retrieval in machine readable library 02 p0264 A70-12129

Information storage and retrieval system development and operation for diversified crew/equipment task data, using general purpose digital computer 02 p0265 A70-12143

Explosives and pyrotechnics information sources including government manuals, commercial publications, symposium proceeding, R and D programs 03 p0610 A70-14127

Hologram storage and retrieval in photochromic SrTiO crystals at ruby laser wavelengths 06 p1072 A70-18519

Information extraction efforts using imaging sensors on earth resources satellites compared to data processing for environmental satellite imaging sensors [AIAA PAPER 70-284] 09 p1669 A70-22894

Verbal information recall latencies as function of time interval from initial memory storage and retrieval repetitions 10 p1818 A70-24718

European information retrieval network for interrogating NASA master file on space literature using computer terminals 14 p2670 A70-31174

Holographic data storage for random information display and retrieval in wide range consumer credit network 16 p2903 A70-33135

Direct access on-line information retrieval system combining computer assisted instruction and bibliographic retrieval, using thesaurus for literature indexing 17 p3048 A70-34600

Solid state display for on-line information retrieval using light emitting crystals, integrated circuits and hybrid packaging 17 p3063 A70-35514

Flight loads data extraction and analysis from damaged magnetic tapes after aircraft crash 17 p3094 A70-35518

Integrated data systems for aircraft maintenance, noting information retrieval role in maintenance management for cost reduction and safety 20 p3740 A70-39647

Papers on information science and technology covering computerized retrieval, automatic indexing, selective dissemination, etc 21 p3955 A70-40894

Scientific/technical information collection, retrieval and dissemination, discussing organization, employment of technical/scientific expert personnel and use of modern data processing equipment 23 p4286 A70-44670

Graph theoretical cluster technique for producing index terms thesaurus for information retrieval system, discussing algorithms 24 p4316 A70-45161

INFORMATION SYSTEMS

NT MANAGEMENT INFORMATION SYSTEMS

SPIRAL system for free-flowing text information storage and retrieval in machine readable library 02 p0264 A70-12129

Reliability optimization of information systems with discrete time resource output and measured efficiency control 04 p0661 A70-15195

Information display devices, discussing interactive graphic consoles, reusable film, magneto-optics, broadband laser, etc 05 p0851 A70-16725

Baseband transmission system information transmission rate improvement, using multivalued PCM signals 06 p1007 A70-17461

Stochastic model of information handling centers as typified by document storage and retrieval derived from integral equation to determine expected primary store size 06 p1016 A70-18450

Pilot limitations role in USAF midair collisions, discussing information systems for collision avoidance 07 p1192 A70-19022

Integrated display for crowded tactical aircraft cockpits, presenting multisensor information for weapons and fire control systems 08 p1500 A70-21760

Multidiscipline systems analysis of satellite assisted information system improving earth resource management, developing User Decision Models [AIAA PAPER 70-335] 09 p1792 A70-22855

Earth Resources Satellite Information Systems, discussing NASA Space Application Program relation to national goals, federal spending, cost effectiveness analysis, information sales, etc 09 p1793 A70-22860

Data management functions of National Space Science Data Center (NSSDC), discussing data processing and information system for secondary usage [AIAA PAPER 70-320] 09 p1641 A70-22866

Remote sensing data applications to agricultural statistics, discussing policy and standards for aggregate data release, confidentiality, error analysis, etc [AIAA PAPER 70-312] 09 p1793 A70-22868

User information traffic forecasting method for operational Earth Resource Satellite System, discussing user expectations [AIAA PAPER 70-293] 09 p1793 A70-22890

Soviet book on automatic scanning information systems, discussing equipment, system parameters, scanning methods, etc 10 p1840 A70-24376

Nonavionic Aircraft Integrated Data System configurations evaluation by computer model, showing cost effectiveness data in terms of aircraft maintenance and availability [AIAA PAPER 70-396] 10 p1808 A70-24909

AIRLORD system consisting of central data processing and I/O units for predeparture handling of passengers and freight at airports 11 p2013 A70-25365

Information transfer services potential demand including telephone, telegraph, videophone, electronic mail, etc [AIAA PAPER 70-443] 11 p2152 A70-25448

Earth resources satellite ground data handling system providing initial processing, reproduction, indexing, storage, retrieval and dissemination functions 12 p2191 A70-26943

Space information systems effectiveness evaluation based on generalized homomorphous model 13 p2372 A70-28377

Spaceborne information processing for manned missions, describing layered system with fault tolerance and onboard checkout 13 p2372 A70-28415

Onboard satellite information processing systems for bandwidth compression using digital filters and error correcting coding 13 p2381 A70-28431

Automatic search for data in hydrology and meteorology, describing information search language development 14 p2602 A70-30141

Price estimate elements interrelationship using three dimensional matrix for computerized cost data extraction 14 p2668 A70-30524

Memory systems in measurement and control equipment, describing applications to linearizing, compression and data refresh operations 14 p2554 A70-30676

Quality information system consisting of closed loop input/feedback methods insuring design requirements of Saturn S-2 stage 14 p2654 A70-31116

European information retrieval network for interrogating NASA master file on space literature using computer terminals 14 p2670 A70-31174

Accident/incident information exchange in aviation community, noting Flight Safety Foundation 15 p2674 A70-32209

Material data file and retrieval system for designers in automotive, equipment and appliance industries, discussing applications to other FRP markets 16 p2935 A70-33352

Airborne flight test data acquisition and ground based automatic bulk data processing system for helicopter test and development programs 17 p3014 A70-34713

Experiment information management, discussing data flow patterns, acquisition, processing, storage, etc 17 p3199 A70-34807

[AAS PAPER 70-057] Data acquisition system applications philosophy, discussing data integrity, expansion facility, flight safety, etc 18 p3258 A70-36339

Statistical properties of civil ATC system based on central processor, discussing system informational congestion 18 p3288 A70-36394

Optimization model for evaluating information management systems for handling control functions of long duration space station missions 19 p3532 A70-37851

Management information systems based on Apollo program experience, considering improvements in data accuracy, display, feedback, etc 19 p3553 A70-37862

Water management decision model using earth resources information system with satellite-based remote sensors, evaluating costs and benefits by systems analysis 20 p3616 A70-39066

Aircraft/spacelcraft assisted agricultural resource information system design concerning nongovernmental user and remote sensing needs 20 p3740 A70-39067

Digital optical storage for information system components 21 p3823 A70-40852

Papers on information science and technology covering computerized retrieval, automatic indexing, selective dissemination, etc 21 p3955 A70-40894

Automated airline communications system for collecting, analyzing, storing, transmitting, receiving and presenting information required by ATC and advisory services 21 p3789 A70-41347

Aircraft accident filing system data analysis using Fortran programs 22 p3962 A70-42880

Information handling for safety design concerning standards, criteria and requirements 23 p4153 A70-44493

Data management functions of National Space Science Data Center (NSSDC), discussing data processing and information system for secondary usage [AIAA PAPER 70-320] 23 p4285 A70-44514

Space station program information management system involving data acquisition and extended manned flight operation with minimum ground support [IBM-70-U60-0015] 23 p4164 A70-44637

Earth resources information systems using space, aerial and ground measurements, discussing Apollo 9 IR color photograph of Mississippi Valley and timber inventory applications 23 p4192 A70-44679

Graph theoretical cluster technique for producing index terms thesaurus for information retrieval system, discussing algorithms 24 p4316 A70-45161

Satellite based navigation/air traffic control information systems for short range STOL air carrier aircraft [AIAA PAPER 70-1338] 24 p4373 A70-45930

Upper Air Space Control Center Automatic Data Processing and Display System for air traffic control 24 p4323 A70-46238

INFORMATION THEORY

Book on communication and information theories application to fading dispersive communication channels, discussing tropospheric scatter, HF ionospheric links, moon bounds, etc 02 p0253 A70-11700

Rate distortion function for class of sources, proving positive and negative sides of Shannon encoding theorem for noisy channels 02 p0266 A70-12611

Visual object images describable in terms of cross correlation functions without loss of information 04 p0662 A70-15437

Informative filter automatic selection for describing visual object with aid of frequency spectrum, taking filter output voltage mean square value as criterion 04 p0662 A70-15438

Risk-reducing information role in decision making using Marschak bidding procedure 07 p1203 A70-18964

Entropy analysis of feedback control systems leading to separation theorem and feedback process information interpretation 07 p1245 A70-19095

Destructive and nondestructive tests optimum procedure for quality control based on information theory, decision statistics and cost optimization 09 p1691 A70-22573

Optimum coding of information for symmetric channel described by code word transformation probability 09 p1639 A70-23694

Information hypothesis and repetition hypothesis concerning human reaction time to visual stimulus information 10 p1826 A70-24714

Physical formula for information content in communication signals based on receiver observation concept, noting role of channel properties and encoding 10 p1844 A70-25223

Information theory, considering biological applications, coding and information content and transmission 10 p1846 A70-25284

Information theory as basis for statistical thermodynamics, discussing maximum entropy principle and probability as frequency in Gibbs ensemble 11 p2083 A70-25694

Optimum symbol sequence interleavers realization taking into account storage capacity and encoding delay 11 p2014 A70-26246

Random fields entropy estimation technique taking into account higher than immediately adjacent spatial dependencies 12 p2192 A70-27771

Practical codes in digital space communication systems, reviewing Shannon information theory theorems 15 p2698 A70-31963

Data transmission from information sources over communication channels with limit imposed on attainable reliability, discussing coding theorem of information theory 16 p2871 A70-34259

Book on random processes, communications and radar covering optimum filtering, detection, information theory, ergodic theory, probability and integration axioms, parameter estimation, coding, etc 17 p3043 A70-34602

General linear /Kalman/ sequential filter to account for finite correlated white noise without state vector augmentation or measurement differentiation 21 p3828 A70-41735

Information transmission and coding theory - Conference, Tashkent, Uzbek SSR, September-October 1969, Section 1, Data transmission theory, Methods of coding and decoding 22 p3985 A70-42490

Optimal reception of phase manipulated signal on noise background with unknown statistics and information parameter a priori probabilities 22 p3987 A70-42561

Recurrent adaptive methods for verification of multialternative hypotheses in stepwise signal processing 22 p3993 A70-42565

Suboptimum extraction of pattern features from continuous measurements, assuming different Gaussian random classes 22 p3991 A70-43493

Information theory of hearing, considering subjective properties of nonsteady sound signals and discernibility relations 23 p4155 A70-44700

Information theory in physics and engineering, considering data processing, error correction codes, space communication, optical data transmission, noise effects and holography 24 p4379 A70-45616

INFRARED ASTRONOMY

Far IR night sky emission above 120 km over millimeter range, using rocket-borne telescope 01 p0069 A70-10040

Near limb solar IR brightness distribution observed during total solar eclipse of 12 November 1966 in Argentina by sounding rocket photometers 01 p0186 A70-11271

IR observations for position of hypothetical Seyfert-like nucleus explaining M82 polarization pattern 02 p0372 A70-12246

IR flux variations from Seyfert galaxy NGC 4151 nucleus, using telescope 03 p0562 A70-14221

Cassegrainian liquid He cooled IR telescope for rocket-borne IR astronomy, discussing optical, cryogenic and electronic designs 04 p0689 A70-15017

Far IR extrinsic photoconductive detectors for rocket-borne liquid He-cooled IR telescope, discussing limiting noise factor 04 p0689 A70-15018

Intensity and spectral distribution measurement techniques for nonvisible extraterrestrial radiation, discussing rocket spectroscopy results 04 p0757 A70-15648

SNR for IR photovoltaic semiconductor cell generalized for astronomical case, noting stars approximation to black body radiators 05 p0849 A70-16645

Unusual IR object IRC plus 10216 interpreted as galactic source surrounded by optically thick dust shells, noting resemblance to black body energy distribution 05 p0920 A70-16976

IR astronomy techniques and photometric standards, solar-lunar and planetary observations, cosmic background radiation, etc 06 p1153 A70-18549

IR luminosity of galactic nucleus from far IR observations, noting considerations favoring nonthermal model consisting of multiple sources 10 p1947 A70-24996

Submillimeter astronomy, discussing atmospheric absorption difficulties and principal areas of application 12 p2311 A70-28271

Spectrum of bright IR object VY Canis Majoris, noting absorption feature attributed to SiO molecules in stellar atmosphere 17 p3154 A70-34540

IR balloon observations of absolute solar brightness and stratosphere transparency, discussing BCA and HSRA models 17 p3078 A70-35580

Vesta diameter and albedo determination by IR emission measurements, allowing for roughness and rotation 17 p3173 A70-35758

Radio emission search from IR objects near IC 1805 18 p3318 A70-37018

Lunar and planetary laboratory communications, Volume 8 covering IR astronomy, Mercury, Mars, Uranus, comets, etc 19 p3515 A70-37929

Martian photographic map during 1967 opposition in red and near IR range 19 p3516 A70-37935

Nebula K3-50 IR radiation source observation, noting energy distribution resembling NGC 7027 and W51-IRS 2 20 p3701 A70-39003

Main sequence stars faint end IR observations for luminosities and temperatures 20 p3702 A70-39014

IR star types T-Tauri, B-emission and M supergiants observations using UVBRI photometry 21 p3890 A70-41163

IR observation of chromospheric Ca II K-line during total eclipse of 7 March 1970 24 p4401 A70-45314

INFRARED DETECTORS

CAT remote sensing for advance aircraft warning, using IR instrument to detect turbulence-associated temperature preceding aircraft 01 p0087 A70-10697

Ge bolometer cooled by liquid helium 3 to near absolute zero to achieve high sensitivity for far IR detection 01 p0091 A70-10910

IR systems in military intelligence and space research including aerospace and planetary investigations, discussing IR detection and IR and earth radiation 01 p0144 A70-11255

Intrinsic IR detectors photosaturation, studying performance degradation due to high background light levels 02 p0297 A70-11925

Resin bonding material suitable for IR detectors noting transmission properties 02 p0321 A70-11926

Mercury cadmium telluride alloy as photoconductive IR detector material noting properties, composition and temperature dependence of energy gap 03 p0543 A70-14196

Far IR extrinsic photoconductive detectors for rocket-borne liquid He-cooled IR telescope, discussing limiting noise factor 04 p0689 A70-15018

Nonlinear dielectric element /tandem/ for detecting IR radiation in contactless temperature measurement 05 p0848 A70-16363

Specifications nomographs for earth resources IR radiometers, considering ground resolution, aperture diameters, detector arrays, etc 09 p1677 A70-22870

Aircraft surface temperature measured with airborne IR TV system 09 p1686 A70-23754

Ge-Cu IR detector photoconducting characteristics and application to carbon dioxide laser mode pattern measurement 10 p1898 A70-23922

IR sensor for detecting clear air turbulence, discussing design, installation, supporting equipment and inflight test results 12 p2229 A70-26946

IR remote temperature gradient sensor as clear air turbulence detector, presenting inflight test results 12 p2229 A70-26947

Optical IR system as low cost pilot warning indicator providing audible and visual collision warnings to general aviation aircraft 12 p2234 A70-27647

Flame temperatures simultaneous measurement in two spectral regions, using photoelectric IR pyrometer 12 p2237 A70-28158

Photoconductive and thermal IR detectors development 13 p2410 A70-29656

IR radiating bodies angular displacement determination by vacuum evaporated thermocouple radiation detectors, describing stationary communication satellite altitude control 15 p2740 A70-32422

Photovoltaic InSb IR detectors design and operation, emphasizing performance in restricted field of view 16 p2926 A70-33152

Pyroelectric IR radiation detector based on materials polarization changes associated with temperature changes 16 p2905 A70-33154

Encapsulated liquid crystal screens for IR laser beam imaging detectors with high thermal sensitivity and real time viewing in bright light 16 p2927 A70-33167

Passive radiative coolers role in utilizing IR detector systems for low temperature spacecraft applications, describing staged radiator design, optimization and tests 16 p2983 A70-33921

[ALAA PAPER 70-854] Conical passive radiation coolers for quantum IR detectors on equatorial synchronous earth satellites, determining temperature excursions 16 p2915 A70-34314

Solid state IR to visible converter, using minority carriers stimulated tunnel injection into wide band gap phosphor 17 p3081 A70-34648

IR heterodyne signal statistics, discussing receiver characteristics and design 17 p3105 A70-35096

Indium arsenide role in IR image detectors, describing photoelectric threshold and quantum efficiency 17 p3143 A70-35118

Photoemitting cesium antimonide thin films for IR detectors 19 p3488 A70-38202

Cryogenically cooled photoconductive IR radiation detectors, determining wideband optical heterodyne performance 20 p3627 A70-39085

Optical thermal testing by IR radiation, reviewing thermistor bolometer, various detectors, radiometric microscopes, NDT equipment, etc 21 p3831 A70-40747

Cryogenic cooling of IR radiation sensors for increasing sensitivity, considering background radiation interference from sensor optical system and detector/preamplifier noise 21 p3825 A70-41052

IR radiation thermometry, discussing detector types, industrial applications and specialized instruments 21 p3828 A70-41698

IR radiation, transmission and detection in non-destructive testing, discussing atmospheric transmission, thermal and photon-type detectors, etc 22 p4029 A70-42595

Clear air turbulence detection by IR radiometry of thermal gradients, using staggered receivers for panoramic visualization 24 p4314 A70-46093

Semiramis IR angular deviation measuring unit, discussing operation theory and performance characteristics 24 p4339 A70-46322

INFRARED FILTERS

Methane IR filter for monochromatizing He-Ne laser 21 p3823 A70-40823

INFRARED HORIZON SCANNERS

U HORIZON SCANNERS

U INFRARED SCANNERS

INFRARED IMAGERY

Soil characteristics influence on soil thermal regime related to thermal IR imagery and subsurface soil conditions

03 p0474 A70-13555

Ground temperature effect on thermal resolution in IR line scan imagery, discussing equipment and operating procedures for temperature gradient detection

04 p0686 A70-14617

Angular tolerance on IR radiation for phase matched image up-conversion in material with nonlinear susceptibility

04 p0703 A70-15621

Line scanning IR imagery system for thermal mapping of fire, water and soil conditions

05 p0836 A70-15770

IR imagery by InSb detectors applied to mapping earth surface thermal distribution

05 p0840 A70-16498

Airborne real time IR imagery of thermal anomalies for geophysical exploration of water resources

09 p1674 A70-22262

Satellite high resolution IR imagery for arctic sea ice mapping, describing sensor design and day and nighttime operation in film-strip format [AIAA PAPER 70-301]

09 p1669 A70-22884

IR holograms real time visual reconstruction by frequency stabilized carbon dioxide lasers

09 p1684 A70-23534

Swedish real time IR imaging system, discussing airborne applications in locating fresh water springs and defining irrigation patterns

10 p1879 A70-24743

Thermal imaging device adaptable to IR, microwave or ultrasound radiation, projecting image on heat sensitive surface

11 p2050 A70-25643

IR image conversion into visible using nonlinear KDP crystal

12 p2248 A70-27543

System design for IR imaging radiometer from synchronous altitude satellite, considering spacecraft dynamics, detectors and cooling

14 p2586 A70-30974

Cloud formation and structure determination using aircraft-borne IR stereo imagery

15 p2769 A70-31687

Encapsulated liquid crystal screens for IR laser beam imaging detectors with high thermal sensitivity and real time viewing in bright light

16 p2927 A70-33167

Surface temperature measurement with airborne IR scanning imager for terrain analysis

16 p2905 A70-33170

Day/night thermal IR imagery detection of moisture stress of girdled trees in upland forest

16 p2898 A70-34047

Indium arsenide role in IR image detectors, describing photoelectric threshold and quantum efficiency

17 p3143 A70-35118

Remote multispectral sensing of environmental and vegetative gradients in Yellowstone National Park by intercomparison of thermal IR and visible band imagery

17 p3079 A70-35617

Day and night IR imagery compared for interpreting vegetation

17 p3079 A70-35618

Visible and IR imagery by meteorological satellites measuring surface temperature, atmospheric circulation and state parameters, storm development and tracking, cloud motions, etc

20 p3660 A70-39076

Ground temperature effects on thermal gradients resolution in IR line scan imagery

24 p4334 A70-45363

INFRARED INSPECTION

Composite window permitting visual or photographic observation and IR irradiation of test materials in ultrahigh vacuum system

09 p1698 A70-22994

IR NDT bond inspection system for helicopter rotor blade honeycomb box assemblies, using closed circuit slow scan video system to detect bondline voids

17 p3101 A70-35184

Thermal IR nondestructive testing of adhesively bonded boron composite/Al honeycomb structures, discussing surface, cross section and instrumentation sensitivity effects

24 p4341 A70-45570

INFRARED INSTRUMENTS

Meteorological spaceborne IR instruments associated with NASA satellites, discussing various Tiros and Nimbus instruments

03 p0491 A70-13666

Lidar and IR radiometer mobile laboratory for atmospheric optics research, including construction details and support equipment

03 p0463 A70-13677

IR equipment on Tiros and Nimbus 1 and 2 satellites, describing vertical atmospheric sounding

03 p0492 A70-13833

Microwave and IR distance measuring devices design and operational principles, discussing main circuits and reading displays

05 p0851 A70-16799

IR crossed beam system for direct density turbulence measurements in mixing region of subsonic air jet

[AIAA PAPER 70-235] 06 p1065 A70-18091

IR technology in aircraft, satellite and rocket electronics, discussing photography, scanners, search and pursuit devices, guided rockets, pilot warning devices, etc

08 p1494 A70-20687

IR thermometers in situ calibration, analyzing maximum error due to reflection effect

09 p1684 A70-23536

Sea surface temperature measurement over large areas using IR remote sensing system mounted on airborne platform

09 p1686 A70-23756

Graphite IR radiator for radiative capacity and flame temperature measurements investigated for life time dependence on ambient pressure and temperature

10 p1888 A70-24257

IR electro-optical tracker Oculometer using human eye motions for pointing and tracking

11 p1989 A70-25352

Servocontrolled IR optometer providing electrical signal proportional to refractive power of human eye

12 p2237 A70-28123

Temperature measurement of products in solar furnace by IR pyrometers, considering interference filters, reflections parasitic effects, etc

15 p2740 A70-32424

Visual IR laser beam display, using cathode ray tube phosphor with variable sensitivity and range control

15 p2752 A70-32441

IR optical radiometer for jet engine turbine blade temperature measurement, comparing with junction wire thermocouple

16 p2905 A70-33168

IR reflectometer system using Fourier transform spectrometer and ellipsoidal mirror, describing design, construction and performance

16 p2905 A70-33171

IR radiometer for Mariner Mars 1971 project providing surface brightness temperatures

16 p2913 A70-34028

Surveyor Canopus sensor and Project Scanner dual IR radiometer mechanical design

16 p2914 A70-34107

Global meteorological parameters measurement by satellites, discussing IR instruments

20 p3664 A70-39711

Thermocouple and IR temperature measurement techniques comparison for double base solid propellants at low pressures

20 p3694 A70-40275

Thermal emission spectra of earth and atmosphere from IR Michelson interferometer onboard Nimbus 3 satellite

24 p4330 A70-45977

INFRARED LASERS

Scanned laser microscope producing shadowgraph displays of IR transmittance variations attributed to defects in polished Si and GaAs semiconductor wafers

01 p0105 A70-10025

IR CW sum-frequency up-conversion of carbon dioxide laser radiation using phase matched proustite as nonlinear crystal

01 p0111 A70-10786

IR radiation absorption from carbon dioxide laser in supersonic gas jet, applying results to nitrogen-carbon dioxide gas dynamic laser action

01 p0148 A70-11123

Laser action observation on IR bands of first positive system of molecular nitrogen using pulsed excitation

04 p0704 A70-15625

IR laser giant pulses duration and power measured by photomultiplier and lithium metaniobate

06 p1082 A70-17770

CW laser operation at 10.6 microns in DF-carbon dioxide and HF-carbon dioxide molecular systems achieved by purely chemical means

08 p1513 A70-21539

Laser frequency measurement and active and passive stabilization techniques, emphasizing HCN laser phase locking to frequency standard output

09 p1697 A70-22951

He-Ne laser IR generation in three mirror mismatched resonator, using Fabry-Perot interferometer to study mode and lasing range frequency shift

10 p1900 A70-24265

Plasma self Q switching in pulsed far IR lasers, discussing lens effect of plasma electrons delaying laser pulses

11 p2062 A70-25634

Holographic compensation for atmospherically induced phase distortion of IR laser beam

11 p2049 A70-25638
